"The superficial objectors find fault with the literacy test because it does not guarantee character, something that it was not meant to do. It is primarily a method of affecting quantity, not quality. Others denounce it as the outcome of bigotry, but this factor is relatively unimportant in the movement; besides, the device ought to be judged on its merits. It is regrettable that Catholics will not consider more the economic argument for restriction. Others object that the country needs to be developed. If that means that a large group will be worse off than before, the objection is baseless. All the rough work generally done by unskilled foreigners would be done by Americans if they were

paid sufficient wages. The immigration commission declared there is a constant oversupply of unskilled labor.

"The selfish persons are those who wish to increase production and profits through cheap labor at less than living wages. They would prefer Chinese and Japanese laborers if they could get them. They do not deserve serious consideration."

[American Federation of Labor Weekly News Letter, May 6, 1916.]

LITERACY OPPONENTS CONTINUE ALARM CRY.

TOLEDO, OHIO, *April 29.*

Under the caption "Still harping on the literacy test," the Evening Blade expresses these editorial views on the Burnett immigration bill now pending in the Senate:

"A number of persons in excellent vocal condition continue to be exercised over the literacy test of the immigration bill. The faults and flaws they find in it are simply amazing. If an earnest-minded citizen confined his reading to these criticisms he would become convinced that this test must be eliminated or the Republic will perish.

"The Immigration Commission, which first made a study of ways to restrict the human flood from Europe, voted 8 to 1 for the literacy test, because it was the only practical method suggested to it. One proposal was that the emigration from any one country should in a single year be confined to a certain percentage of the 10-year average emigration of the country. Another proposal was that immigration be controlled as to groups. In any one year, only a single group should have the privilege of entering the country. There was still another idea, that a contract be required guaranteeing the immigrant's ability to earn a living wage. Plainly, some of the restrictions could not be applied. The commission had to accept the literacy test as the one thing that could be administered day after day without doing grave injustice, conflicting with laws and treaties, and raising the business of examining immigrants to the dimensions of flourishing munitions plants.

"Once the immigration bill is passed and becomes operative, we will hear little more about the shortcomings and oppressions of the literacy test. The agitation has been conducted mostly by people who saw in this test a threatened shortage of cheap labor, an increase in living standards which would make a low standard of wages no longer possible."

[From the Cleveland Press, Cleveland, Ohio, May 16, 1916.]

IMMIGRATION.

This newspaper stands for the further restriction of immigration. Hence we favor the bill now in Congress providing for a literacy test. We have many and important reasons for including this policy in our declaration of principles. We favor restriction, in the first place, for the sake of the immigrant himself who is brought in most cases from a life of lowly simplicity in his native land to a life of deadly isolation, exploitation, and degradation in this country.

Millions of these people are herded to-day in smoke and soot-swept settlements and insanitary slums where, shunned, lonesome, and abused, they learn nothing whatever of the land of their so-called adoption—learn rather to hate it because of the miseries they are compelled to suffer by those who exploit them. It was once America's proud boast that this country was the haven of the poor and oppressed. The evidence is clear and conclusive that the peasant who is poor and oppressed in Europe is still further impoverished and oppressed when, having fled, he finds himself in this haven of his dreams.

We hold that this Nation has not assimilated the thirteen millions odd of immigrants who have landed on our shores since the opening of this century, and that it is high time now to call a halt upon further immigration until we shall have taken this great mass of humanity to our hearts, cheered them with our interest, educated them to our national ideals and made them Americans who will love, and die if need be, for the Nation which has really lifted them from poverty and freed them from oppression. We insist that this process of valid absorption is one of the prime necessities in the making of a new and united American Nation.

We, too, believe, with organized labor, that the practically unrestricted immigration of the past 15 years has been unfair to the working people of this country. The competition of a million new arrivals every year, in addition to the natural native increase of hands that work, was too great.

The entire advantage was with capital—often heartless, ruthless capital. The almost complete cessation of immigration since the beginning of the war has been a double-edged revelation to the American workingman and to those thoughtful citizens who have viewed with anxiety the increasingly serious labor problem in our land. Unemployment has passed. Wages have increased. Working people are more prosperous, their families more comfortable. And, mark this: Although immigration was suspended and the working population was decreased by the half million who returned to Europe to fight, production increased beyond all records, as shown by the official figures of our exports and domestic consumption. Does this not prove that well-paid, regularly employed labor, unhampered by competition flowing from abroad, is a greater producer of national wealth than dissatisfied labor, working half time and suffering from undue competition?

Have we not also the proof before us that a population of 100,000,000 can provide in the natural human increase all the labor needed for the work to be done?

Thus restriction of immigration promises better citizens of our foreign-born, more prosperous, and more contented citizens in our great working classes, better homes, a stronger people in body and mind, greater production of wealth, all of which will combine to cement us into a Nation strong for hearth and country and willing and quick to defend both when the occasion demands.

Mr. PADGETT. Mr. Chairman, I yield 10 minutes to the gentleman from Illinois [Mr. CANNON].

Mr. CANNON. Mr. Chairman, I will state to the gentleman from Tennessee that I would prefer to speak a little later, after I have heard further debate, to get a better conception of the amendment.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I yield to the gentleman from New Hampshire [Mr. SULLOWAY].

Mr. SULLOWAY. Mr. Chairman, it seems to me there have been conversions here during this discussion more sudden than St. Paul's by far. I want to say to the Members of this House that there is but one navy yard in the United States that has 40 feet of water at all times, and that there has never been a penny expended for dredging at that yard and there never will need to be. I refer to the one at Portsmouth, N. H. The yards named here to be equipped for the purpose of building battleships are all subject to dredging, and this bill carries an appropriation of $327,000 for that purpose for the next fiscal year.

Mr. HUMPHREY of Washington. Mr. Chairman, will the gentleman yield?

Mr. SULLOWAY. Certainly.

Mr. HUMPHREY of Washington. My friend is mistaken in respect to the Bremerton yard. We have no dredging there. We have 60 feet of water.

Mr. SULLOWAY. That is the Puget Sound yard?

Mr. HUMPHREY of Washington. Yes.

Mr. SULLOWAY. If the gentleman will look at the bill, he will find that there is an appropriation of $15,000 or $25,000, I forget which, to continue dredging there.

Mr. HUMPHREY of Washington. That is the approach to the dock.

Mr. SULLOWAY. I do not know what it is or what excuse there is for it, but I am taking the bill as it is before us to-day. If the approaches to the dock have but 24 feet of water, as Admiral Stanford stated on page 23 of the hearings, that is the controlling depth, no matter what depth at the dock, but 17 feet less than at Portsmouth. That is true also of every navy yard except the Portsmouth yard, and the appropriations for dredging have mounted to millions upon millions. Admiral Stanford, constructor of yards and docks, has said it would be necessary to continue dredging at all these yards, as they have done in the past. Portsmouth is admitted to be the best yard under our flag and in the United States. There are 40 feet of water there at low tide. A captain can take his craft up that channel without tugging, without pilots, by night or by day. There is no other yard that has that depth of water. On page 27 of the hearings gentlemen will find the different depths of water in each of these yards, and I will put the data in the RECORD. There is not another one that comes within 5 feet of it in depth. There is to-day a dock there of precisely the same size as the one at Boston. They were twins. Gov. McCall and myself were sort of accouching angels at their birth. They were born at the same time and in the same bill. In each of those docks was sufficient room at the time they were authorized to hold any ship constructed or contemplated. It is a remarkable yard. Above it a short distance, not half a mile, is what is known as Great Bay, and within that bay there are thousands and thousands of acres of water from 60 to 100 feet deep.

The navies of the world could swing at anchor and there would not be any such danger of collision as happens in most all of the other yards by ships coming from the sea or going out to it, because it would be at the end of navigation. It is above and beyond the docks. Take, for instance, a yard like Mare Island, with 22 or 23 feet of water, where they are dredging all of the time, with large appropriations for that purpose, and I am not talking against that yard with a view to undoing it. I am stating it as a matter of fact in order that gentlemen of the House may know what they are doing when they locate shipbuilding plants in yards like that, where they have to be dredged perpetually, and then refuse to give to a yard at Portsmouth the same privilege, where dredging will never be needed. The channel is worn and the dock is cut and chiseled out of the solid granite.

Why is the Portsmouth yard excluded from the list of yards on the Atlantic coast by the proposed amendment of the chairman of the Committee on Naval Affairs? Shot in here like a flash of lightning from a clear sky, authorizing the Secretary of the Navy in his discretion to equip certain yards to construct capital ships; never considered by the committee, and by means of the most vicious and infernal gag rule ever presented to a legislative body I am limited to a few minutes to oppose it or to urge that the Portsmouth yard be included in the list.

The answer is patent. No Secretary of the Navy—not even the Hon. George von L. Meyer—would dare refuse to put the Portsmouth yard first on the list, by reason of its superior natural advantages over all other yards. This gag-rule, snapshot legislation will end on March 4, 1917, thank God. And the people will join with Dr. Watts in singing:

Believing, we rejoice to see the curse depart.

[Applause.]

We are in greater need of larger docks than of battleships. Early in this session I introduced a bill that went to the Committee on Naval Affairs, authorizing the construction of a dock at the Portsmouth yard, and I now have an amendment to this bill filed at the Clerk's desk that can never be reached under this gag rule, which prohibits in its working the consideration

of amendments other than those proposed by the 21 members of the Committee on Naval Affairs. More than 400 Members of the House are absolutely denied hearing on matters of great importance to their constituents and, but for this rule, would be able to have the right to be heard in their behalf.

My amendment reads as follows:

On page 20, line 16, after the figures "$3,000," insert "dry dock—limit of cost not exceeding $3,500,000—in all, $3,503,000."

Permit me to quote Rear Admiral H. R. Stanford, Chief of the Bureau of Yards and Docks, in his testimony before the Committee on Naval Affairs, where he gives the depth of water at the several yards and the necessity for big docks—the man who for years has been at the head of said bureau.

The Mare Island yard furnishes a sample illustration of the expense of dredging and the results obtained in muddy-bottom straits, rivers, and channels. On page 48 Admiral Stanford said that yard was located in the early fifties, and at that time there was 40 or 50 feet of water in the straits. On page 30 it appears that $20,000,000 have been expended on that yard; that not one of the battleships built in the last eight years can get in. And on page 27 it appears that the controlling depth now is but 22 feet, with a continual expenditure of money to the amount of $20,000,000, and the loss of from 18 to 28 feet in depth of water in the straits. And this bill provides $50,000 for dikes and dredging for the next fiscal year at that yard.

The dock at Charleston, S. C., is still more fortunate. This bill provides $187,000 for dredging and opening a channel to that dock where the controlling depth of water is 22 feet.

On page 95 Admiral Stanford said:

At this stage of our naval development the construction of additional docks and battleship piers is as essential as the building of the ships. I think our need for large dry docks and deep-water piers equipment for hauling heavy weights is most urgent, both south and north of Hatteras.

Question by Mr. KELLEY:

Would not an expenditure of $15,000,000 in dry docks, piers, wall extension in our various naval stations do more in promoting the efficiency of the fleet than the addition of a single battleship?

The Admiral's answer was:

It's hardly a fair question to put to me.

Page 96:

I did say that my personal view is that the need for big dry docks is most urgent of the Navy ashore.

On page 90 the Admiral said:

During the past few years the appropriations for yards and docks improvements have been greatly reduced and curtailed, so that there is a very great need for more docks.

On page 90 Admiral Stanford said:

In 1913 there was expended, approximately, for yards and docks $9,000,000. During the past year something over $7,000,000.

On page 91:

It is safe to say that appropriations for yards and docks, for several years to come, will be from $7,500,000 to $10,000,000 to develop the additional dry docks that are needed.

On page 97:

I think for the last three or four years, ever since the construction of our superdreadnaughts, we have needed these additional docks.

On page 50:

We have but three dry docks that will admit the 13 ships built, building, or authorized, and the program if carried out will give us 29 of these capital ships and only four docks that will hold them. The department recognizes the need of more big docks to be built at other yards.

On page 41:

The General Board has recommended that we should have 40 feet of water at all the principal yards.

On pages 90 and 91:

Dredging will be required from time to time in every yard we have, excepting Portsmouth and Puget Sound.

On page 99:

There is dependable deep water at the Portsmouth yard, as I stated two or three days ago. The reason I did not refer to that yard particularly is because it is not fitted with a dock large enough to dock a superdreadnaught.

No harbor on the Atlantic coast possesses the depth of water, the natural advantages, the wonderful channel, that never requires dredging, that is so free from sand, silt, and mud, up which a battleship or a dreadnaught can wend its way in high tide and low tide, as the one at Portsmouth, N. H. Worn out of solid rock, with a width practically equal to any channel on the Atlantic coast, with a bottom as smooth as a floor, this great waterway has a controlling depth of 40 feet, sufficient to sail any vessel afloat or under construction, without waiting for favorable conditions or depending upon Omnipotence to provide sufficient waters through the instrumentality of the tides to get a great ship to its dock.

From the birth of this Republic to the present moment Portsmouth has been famous as a shipbuilding center. But it is not on the glorious past of this famous old seaboard city that I would dwell, but upon its great possibilities at this time, when we, as well as all of the people of the earth, are confronted with great questions of proper and adequate preparedness, and when we are called upon to take account of stock, to look over our advantages and our opportunities for national safety and national security. The protection of home and the protection of our liberties and our Government are solemn duties that we must meet, not with hysteria but with calmness, saneness, and judgment. Proper protection is the greatest element of national safety.

No navy yard in the country is so admirably situated as the one at Portsmouth, N. H. Not only does it have the deepest waterway, 40 feet at controlling depth, but is the most defensible harbor on the Atlantic coast. Situated 10 miles at sea from Portsmouth, absolutely commanding the harbor, are the Isles of Shoals, a series of islands which could be fortified and which not only would command Portsmouth Harbor, but also the coast for miles, both north and south. At Portsmouth the opportunity for development is greater than in any other yard in this country. Available land can be bought at prices per acre that in some of the great cities where navy yards are located would be sold by the foot at fabulous prices.

The opportunity for additional dry docks is unsurpassed anywhere for the reason that the natural advantages of the soil make it a natural location for these great resting places for our ships. The great dry dock constructed some years ago, which at that time would take the largest ship of our Navy, would have contained a ship before a single bit of masonry was placed in it. The great basin for this dock was cut out of the solid rock. There has never been a dump cart full of mud or sand washed into it or its approaches from the ocean since it was constructed. It never requires dredging to get ships in, and when a dock is once completed here, outside of the natural wear and tear, there would never be any artificial repairs necessary by the working of the elements that have to be met. Nature provided everything essential at Portsmouth for the greatest naval station in the world. Climatically it possesses advantages unexcelled by any place where a navy yard or a naval station is located in this country.

From a labor standpoint it means much to the thousands of men employed in the way of cheap rents and a desirable place to live. It has tremendous advantages in this respect over the yards in the great cities. There are opportunities there for men to own their homes at a modest price and within the reach of their pay envelope. This means contented workmen, the keeping of skilled labor, for whenever a workingman accumulates enough to build him a home he settles down there usually to spend his days. As a great economic proposition, both to the Government and to the employees, Portsmouth offers wonderful advantages, which any private business concern in the country would seize upon as a great asset.

While cities and places where other naval yards are clamoring year after year for appropriations for dredging to keep the channels of their harbors open so that present-day shipping may dock in safety Portsmouth has deep enough water to safely float our big ships at any hour of the night or day. Every navigation expert who appeared before the House Naval Committee admitted on questioning that Portsmouth had an abundance of water. It was freely stated that this was the only harbor on the Atlantic coast where water conditions are perfect, and, with the single exception of Puget Sound, the only place on either coast.

Much of the expert testimony before the Naval Committee favored new and additional docking facilities, and it was frankly admitted that there would be practically no dry-dock facilities for our big ships of the future when we get them constructed. It is not in line with wisdom or good judgment to construct great and expensive dreadnaughts with no place to repair and dock them, neither is it a wise business policy to expend money for great dry docks in places where the water is not of sufficient depth to get a great vessel of the future into it when it is constructed.

There is no question about Portsmouth, for the water is there now. It is not a gamble or an experiment, but a reality. The cold facts are there, and they are indisputable. Portsmouth has suffered in the past, I regret to say, because it lacked some of the social advantages of Boston, New York, and Norfolk. Unfair and untrue criticisms of the yard have been made by men who placed the pink tea above efficiency; but in spite of this the yard, which 20 years ago, when I came to Congress, was about ready to be abandoned, has been improved, developed, and brought to

a standard that now compels it to be recognized as one of the great yards of the country.

Sentiment, favoritism, and the popularity of its location have not entered into its present high standing. It has come to the front in spite of official handicapping and backbiting, and purely upon its merits and because of its unquestioned natural advantages. Notwithstanding talk of its abandonment from certain sources in times past, it has continued to grow and develop, and will continue to grow and develop until it ranks second to none in this country.

This yard has been designated as a submarine base by the present administration, which was the very least that could be done. The workmen at that yard are to-day constructing undersea craft, but that is only a small part of the work that should be done there. With land already owned by the Government, with much more that is available, the work of the yard must and will be enlarged to meet the natural requirements and the demands of the times. This Congress may not see fit to rise to the occasion and place in the greatest and deepest waterway on the Atlantic coast a great dry dock to meet all the requirements of the future but there are other Congresses coming which will not be so blind to the wonderful opportunities of Portsmouth, and circumstances and demands of the future will absolutely require the greater development of this natural naval base, making it sufficient to meet any emergency and to be properly equipped for any line of naval construction.

Another novel feature of the Portsmouth Harbor is Great Bay, a large body of water up the river from the navy yard, which is of sufficient size and depth, having 100 feet of water in many places, to anchor the navies of the world. This could be made available with a comparatively reasonable expense and at a cost not in excess of many recent river and harbor improvements in various sections of the country. With the development of Great Bay, a naval base and anchorage could be secured that would be far superior to the one at Hampton Roads and other places, because it would be away from the main channel of traffic and there would be absolutely no danger of collisions and accidents by vessels passing to and from the ocean.

Portsmouth has been the scene of the visits of many of the large ships of our Navy of the past, and there are no records of them going aground, as has often happened in the case of some of the other harbors where navy yards are located. Vessels have to come to anchorage at the yard after coming up the harbor under their own steam and without assistance of tugs. The removal of Hendersons Point some years ago took away the only difficulty to navigation that existed and made Portsmouth Harbor and the navy yard dry dock safe and easy of access, a harbor that never freezes in winter and which possesses at all times ample and abundant water to ship any vessel that floats.

Admiral Stanford, Chief of the Bureau of Yards and Docks, in the hearings before the Committee on Naval Affairs of the House said:

There is dependable deep water at the Portsmouth yard. There is difficulty of getting into the New York yard at times. At some times it will happen that you have to lay outside the San Francisco Harbor before entering on account of sea and fog. There is also difficulty in getting over the bar at times at San Francisco. The Philadelphia Navy Yard is 90 miles from the Capes, and there is a portion of the river between these two points which under certain tidal conditions would barely pass our largest vessels. At the Norfolk yard dredging is required in the river in front of the yard and also a widening of the channel is required. It is my impression that Charleston, S. C., can only be entered under favorable conditions. There is good water leading up to the Boston yard.

Speaking further on this same subject, Admiral Stanford said:

At the Portsmouth yard the controlling depth of the water is 40 feet, the controlling width 500 feet, and the range of the tide 7.8 feet. At Boston the controlling depth is 35 feet, the width of the channel 540 feet, and the tidal change is 9.6. At New York the controlling depth is 31 feet, the controlling width of channel is 450 feet, and the mean rise and fall of the tide is 4.2 feet. At Philadelphia the controlling depth is 30 feet, the controlling width from the yard to the sea is 600 feet, and the tidal change is 5.9 feet. At Norfolk the controlling depth is 35 feet, the controlling width is 450 feet, and the mean rise and fall of the tide is 2.8. At Charleston, S. C., the controlling depth is 22 feet, the width of channel is 300 feet, and the mean rise and fall of the tide is 5.2.

This goes to show that of all harbors on the Atlantic coast used for naval purposes Portsmouth has the greatest depth of water. Admiral Stanford also stated that periodical dredging was absolutely necessary at Boston, New York, and Norfolk. This is something that is never necessary at Portsmouth.

To give the country some idea of the cost of dredging in the approaches to the navy yards of this country, let me quote from the present bill. This measure we are now here considering carries $337,000 for the coming fiscal year. It is divided up as follows: Navy yard, Boston, dredging, $10,000; navy yard, New York, to continue dredging, $50,000; navy yard, Philadelphia, to continue dredging, $25,000; navy yard, Charleston, S. C., to continue dredging, $12,000; dredging Cooper River, approach to navy yard, Charleston, S. C., $175,000; navy yard, Mare Island, Cal., maintenance of dikes and dredging, $50,000; navy yard, Puget Sound, Wash., to continue dredging, $15,000. Continually sums aggregating millions have been appropriated during the past decade to keep these harbors of the navy yards of this country open to navigation, on account of the constant filling of the channels with mud, sand, and silt, and for the purpose of getting a deeper waterway. But at Portsmouth it has never been necessary to make these constant appropriations. The depth of the water has been there from time immemorial and will remain as long as the world exists.

Admiral Stanford, in the hearings before the Naval Affairs Committee, pointed out the great need for docks. He stated in his testimony that during the past few years there had been a great curtailment in the amount of appropriations for this purpose. He said:

My personal view is that more dry docks are most urgent. Ever since we began the construction of the superdreadnaughts we have needed these additional docks.

The Admiral was asked by Representative BUTLER of Pennsylvania, a member of the committee, this question: "Would we not be in a bad mess if we should have war now for lack of docking facilities?" "I think so; yes," replied the Admiral.

Admiral Stanford made the astounding admission before the Naval Committee that we have but three dry docks on both the Atlantic and the Pacific coasts that will admit the 13 ships constructed, under construction, or authorized; and if the present program is carried out, it will give us 29 of these capital ships and only three dry docks in the United States navy yards which will hold them. Two of these are located on the Atlantic coast—one at Norfolk, one at New York—the other being at Bremerton, on the Pacific coast. None of these docks are large enough to hold the fast cruisers that are contemplated under the provisions of this bill.

With these indisputable facts in view, with this country embarking upon a program to place its Navy on a footing that will guarantee us national security and national safety, with a view to developing a proper coast defense that will insure the peace and happiness of our people, I appeal to the good judgment and the common sense of this House to place some of these great improvements and means of national defense where nature has given us the greatest advantages and the deepest harbor anywhere on the coast of our great country. In this time of a crying demand for additional docks, the place to put them is where, when they are completed, ships can be brought to them in safety, where the Almighty has already constructed the channel, and where sufficient water exists to-day, without the use of a dredge, to float in safety the mightiest ship within the conception of man. This place is at Portsmouth, in the district which I have the honor to represent.

Let no one think in anything I have said I have thought to belittle any of our navy yards. Far from it; for I am in favor of developing all of them. But in future construction I believe it to be a patriotic duty to build and improve them where nature has ordained they should be. [Applause.]

Mr. ROBERTS of Massachusetts. Mr. Chairman, I yield five minutes to the gentleman from Wisconsin [Mr. STAFFORD].

Mr. STAFFORD. Mr. Chairman, I dislike to voice a discordant note in this family arrangement of providing for all of the yards from Portsmouth on the Atlantic to New Orleans on the Gulf and from Puget Sound on the north down to the other extreme. I think we are going very fast, indeed, when we authorize, even in the discretion of the Secretary of the Navy, the equipment of yards confessedly unsuited for building programs, such as those at New Orleans, Charleston, and other places, under the guise of naval necessity. This bill is fast becoming a public-building bill rather than a naval bill. Yesterday you voted in favor of an ultimate $20,000,000 Government armor-plate project, when there are sufficient existing plants to furnish armor at cost, and with the completion of this 20,000-ton armor-plate plant the result will be that it will drive the private concerns out of business, because there will not be enough armor contracted for to warrant their continuing in existence. You also have in this bill a provision for the establishment of a plant for the manufacture of projectiles, and now under the guise of naval necessity, which, if carried out, will involve this Government to the extent of millions and millions of dollars—not six millions or seven millions, but hundreds of millions of dollars—it is proposed to equip these yards for shipbuilding purposes, this to be done at so-called navy yards which Secretaries of the Navy in times past have condemned as unfit for navy-yard purposes. Where is this trend, this wild rage of Democratic extravagance, going to end? The bill which was brought in here involving two hundred and

sixty-odd millions will leave us ultimately carrying millions beyond that.

But it takes something more than mere buildings to make a proper shipbuilding yard. The Government can order the buildings, but it will take time.

A shipyard that was constituted to repair ships has not the necessary foundries, has not the machine shops, and above all else has not the necessary organization of men that will be required to make it an efficient shipbuilding concern. There is no consideration in this family arrangement of the Government interests. There is no hope of defeating it when you bring in here an omnibus public building bill.

Mr. CRAMTON. Will the gentleman yield?

Mr. STAFFORD. For a short question.

Mr. CRAMTON. Does the gentleman mean to insinuate that there can be such a thing as "pork" in preparedness?

Mr. STAFFORD. Far be it for me to insinuate something that is so patent. So, Mr. Chairman, you are taking away from the Secretary of the Navy the right to determine where these ships in case of necessity can be properly built. Those who wish to get an advantage for yards in their districts by having them created into a large shipbuilding plant are objecting to an obvious business proposal offered by the gentleman from California to equip the New York Yard and the Mare Island Yard, which to-day are the only two yards in the country that have the necessary equipment and the necessary organization to build these capital ships. They are objecting to that because they fear that it will be trenching on their own private preserves, to get, what—not "pork" but "pie." Such a policy can not be too severely criticized when under the guise of naval preparation you are trying to take away from private shipbuilding yards the building of ships that can be more economically and more expeditiously built than in Government yards lacking the material for large shipbuilding purposes. If we are ever going to have a merchant marine, the private yards should be encouraged with construction of naval vessels so long as their prices are fair and right.

We are going wild in our haste to make a showing. Without any investigation as to the fitness of these yards you are directing their conversion into shipbuilding plants upon the ipse dixit of local representatives. When once navy yards are equipped, the hue and cry from local interests will demand their employment regardless of cost or need.

The proposed policy is Government ownership run wild with only combination of local interests to support it. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. BUCHANAN of Illinois. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I yield five minutes to the gentleman from Pennsylvania [Mr. VARE].

The CHAIRMAN. The gentleman from Pennsylvania [Mr. VARE].

Mr. VARE. I ask that the Clerk read the amendment offered by the gentleman from Tennessee [Mr. PADGETT].

The CHAIRMAN. The Clerk will read the amendment.

The Clerk read the amendment, as follows:

Page 100, following the amendment inserted after line 9, insert the following:

"In the event the Secretary of the Navy is unable to secure from the shipbuilders contracts for the expeditious construction of the ships herein authorized at a fair and reasonable price, the sum of $6,000,000, or so much thereof as may be necessary, is hereby appropriated to enable the Secretary of the Navy to equip the navy yards at Puget Sound, Philadelphia, Norfolk, Boston, Portsmouth, Charleston, and New Orleans, with suitable and necessary machinery, implements, building ways, and equipment for the construction of such of the ships herein authorized as may be assigned to such yard for construction."

Mr. VARE. Mr. Chairman, I would much prefer that the amendment of the gentleman from Tennessee [Mr. PADGETT] had provided $6,000,000 without any condition; but, however, I find as it is it is a step in the right direction, namely, to give the Secretary of the Navy the discretion to further equip the yards of the country which he regards as efficient.

During the discussion a few moments ago the question arose as to which were the superior, the governmental or private shipbuilding plants. That recalled to my mind an incident that occurred on the floor of this House two years ago. There had been bids invited by the Secretary of the Navy from the various private shipbuilding yards for a transport, since called the *Henderson*, which is being constructed at the Philadelphia Navy Yard. Bids were received from these private shipbuilding yards of the country, and the lowest private shipbuilding bid was from the Newport News Shipbuilding Co., which bid was $1,725,000.

The Secretary of the Navy thought that the bids were excessive. He then invited Government yards to send in estimates. The Philadelphia Navy Yard furnished the lowest estimate, and that estimate was $1,405,069, as against $1,725,000. It was said at the time by the gentleman from Virginia [Mr. JONES], who represents the district in which the Newport News Shipbuilding Co. is located, that that company's bid was backed up by a bond. On the other hand, I said that this was a business proposition, and I had such confidence in the ability of the estimating board of the Philadelphia Navy Yard that I would be willing to back up the estimate of the Philadelphia Navy Yard by my personal bond. There was a difference of $319,930 between those two propositions.

Mr. LOUD. Will the gentleman yield?

Mr. VARE. With pleasure.

Mr. LOUD. Did the Philadelphia bid include insurance, overhead charges, depreciation, and all other incidentals that attach to a private yard?

Mr. VARE. I will come to that in a moment. I report to this Congress to-day that this transport will be launched this month, and that instead of saving more than $200,000, which I then predicted, it will save $400,000 beyond all overhead charges and insurance. [Applause.]

And so it is that I welcome the proposition that the chairman of the committee makes, that the yards of the country be placed upon a competitive basis, and I am quite sure that the great mass of laboring people of Philadelphia will do likewise. I would prefer there be no conditions prescribed in the amendment. I want to say to the Members of the House that I am not one of those who believe in governmental ownership. I do, however, believe that these Government plants ought to be so well equipped as not only to be efficient in order to determine what is a reasonable price in battleship construction, but they ought to be well equipped at all times to meet all emergencies. [Applause.]

Mr. ROBERTS of Massachusetts. Mr. Chairman, I yield five minutes to the gentleman from California [Mr. CURRY].

Mr. CURRY. Mr. Chairman, if the ships provided for in this bill are to be constructed within the time limit, they will have to be constructed in the Government navy yards. You will not receive a bid from a private yard for the construction of one of these ships. At the present time every private yard in the United States has already contracts for the construction of all the ships they can build within the next three years. At the present time there are 368 ships being constructed and construction ordered at these private yards. More than 300 of them are large ships for use in the overseas trade. It will take at least three years to construct those ships, and under the circumstances the battle cruisers and the other ships provided for in this bill, and ships that will be provided for at the next session of Congress, will have to be constructed in the navy yards of the United States. But two of those navy yards at the present time are equipped to construct a battleship, the one at New York and the one at Mare Island. Now, I hope that the amendment of the gentleman from Tennessee, as amended by the gentleman from California, my colleague, Mr. NOLAN, will be adopted. That will provide $7,000,000 to be used in the discretion of the Secretary of the Navy for the equipment of all the navy yards in the United States. Mare Island and New York will need more equipment than they have if they are assigned other ships to build than are assigned to them to-day, and it is right and proper that part of this money should be used in the further equipment of those two yards. I am glad there is a disposition in this House to equip the navy yard at Bremerton. There ought to be two first-class yards on the Pacific coast, fully equipped to do the work of the Navy.

Our friend from Washington [Mr. HUMPHREY] has year after year and year after year tried to impress upon this House the absolute necessity for equipping the Bremerton Yard. All that has been done for that yard has been done by the Congress through his efforts. If Bremerton is equipped every Member of this House knows it will be due to the efforts of Mr. HUMPHREY, who has worked hard and persistently for the adequate equipment of that yard. He has appeared before the Committee on Naval Affairs and has told you on the floor of the House what ought to be done for Bremerton and for Mare Island, the two yards on the Pacific coast. I feel certain that the amendment of the gentleman from Tennessee as amended by my colleague will be accepted by the gentleman from Tennessee and adopted by the House, and that the $7,000,000 will be provided for the absolutely necessary equipment of the navy yards if this building program is put through.

I wish to call the attention of the committee to the fact that Mare Island has an organization that is unexcelled in efficiency. She always turns out first-class work within the estimate and

time limit and has never been compelled to ask for a deficiency on any job that has been assigned to her.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. ROBERTS of Massachusetts. Mr. Chairman, did the gentleman consume all his time?

The CHAIRMAN. The gentleman consumed four minutes.

Mr. ROBERTS of Massachusetts. How much time has that side remaining?

The CHAIRMAN. Four minutes remaining.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I yield four minutes of that time to the gentleman from California [Mr. STEPHENS].

Mr. STEPHENS of California. Mr. Chairman, I want to call attention to the fact that construction in Government navy yards is sometimes cheaper than in private yards, and as an illustration of that, the bid of the Mare Island Navy Yard for the battleship *California* was $245,000 less than the bid of any private yard, and that bid, although $245,000 less than any private yard, included $500,000 with which to extend the building ways in Mare Island Navy Yard for the building of that and other capital ships. In addition to that it included the furnishing of a number of items for the *California* which private yards excluded from their bids. And the Mare Island Navy Yard, on the Pacific coast, has never yet exceeded its estimates nor the time in which it said it would construct a ship. The Mare Island Navy Yard has proven its character and capability.

Mr. Chairman, at least four of the Government navy yards on the Atlantic coast, as well as the Puget Sound and Mare Island Navy Yards, on the Pacific, should be equipped for largest construction, and especially so when the private yards are unable to meet the requirements of the Government. If ever this Nation engages in naval warfare on the Pacific Ocean we shall need both navy yards there for both repair and construction. Mare Island Yard is now being equipped for the construction of capital ships and the Puget Sound Yard should be similarly equipped at the earliest day possible. I think the amendment proposed is a perfectly proper one and should be adopted. [Applause.]

Mr. ROBERTS of Massachusetts. Mr. Chairman, I suggest that the chairman of the committee occupy some of his time.

Mr. PADGETT. Mr. Chairman, I yield one minute to the gentleman from Virginia [Mr. HOLLAND].

Mr. HOLLAND. Mr. Chairman, I wish to say that I am heartily in favor of this amendment. Under present conditions I believe any scheme of preparedness is absolutely useless which does not, in addition to authorizing battleships, provide the several yards with the facilities necessary for building them.

I ask unanimous consent for permission to extend my remarks in the RECORD.

Mr. ROBERTS of Massachusetts. I yield to the gentleman from Washington [Mr. JOHNSON].

Mr. JOHNSON of Washington. Mr. Chairman, I am well acquainted with the navy yard at Bremerton, know its highly favored location and the present state of its equipment. I know also of the comparative ease with which it can be further equipped for the complete construction of first-class ships. I hope that soon some of the vessels authorized last year, and others now being authorized for the Navy, may be constructed in that yard.

Under the provisions of the amendment about to be voted on, I believe that ships will soon be on the ways at Bremerton. The needs of this yard have been well presented to the committee during its hearings by my colleague Representative HUMPHREY, in whose district the yards lie, and by all of the Members of the delegation from the State of Washington. The people of Bremerton, too, have been active and alive to the matter. They are to be complimented on having sent to Washington my old friend and acquaintance, Mr. J. E. Barnes, with a mass of facts which are not to be controverted. The people of Bremerton do not ask for favors for their yard; they ask that its capacity be utilized. I believe the amendment proposed by the gentleman from Tennessee [Mr. PADGETT] will solve the situation. I shall not take the time of the committee further.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. BUCHANAN].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. NOLAN].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Tennessee [Mr. PADGETT].

The question was taken, and the amendment was agreed to.

Mr. PADGETT. Mr. Chairman, I have an amendment here which I wish to offer.

The CHAIRMAN. The gentleman from Tennessee [Mr. PADGETT] offers an amendment, which the Clerk will report.

The Clerk read as follows:

On page 24, strike out all of lines 14 to 25, inclusive, and, on page 25, strike out all of lines 1 to 7, inclusive. Insert in lieu of the matter stricken out the following:

"Beginning at a point marked by a concrete monument at the southeast corner of the land acquired by the United States from the John Li estate through condemnation proceedings, which point has the coordinates 230.1 feet south and 87.2 feet west from 'Ford No. 5' (Ford No. 5 being marked by a galvanized pipe in a concrete monument stamped 'U. S. 1911,' established by the United States district engineer office, and having coordinates 8,570.99 feet south and 10,087.64 feet west from the Ewa Territorial triangulation station); thence north 23° 12' east 177 feet, more or less; thence north 16° 0' east 66 feet, more or less, to a point on the shore line at high-water mark; thence southerly along high-water mark to a point marked by a concrete monument that is, with reference to the point of beginning, south 51° 0' east 70 feet, more or less, the southwesterly boundary of the said tract being formed by the line joining said last-mentioned point on the high-water line with the point of beginning."

Mr. PADGETT. Mr. Chairman, this is to correct the description of a piece of land. The War Department first furnished the boundaries, and they were inaccurate. They have since notified the Secretary of the Navy of the correct boundaries, as set out in this amendment. It is to exchange the two tracts of land between the two departments. The Navy Department has a small tract of land that the War Department had use for, and the War Department had another small tract that the Navy Department had use for, and it is just authorizing the departments to exchange the use.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Tennessee [Mr. PADGETT].

The question was taken, and the amendment was agreed to.

Mr. PADGETT. Mr. Chairman, I offer another amendment.

The CHAIRMAN. The gentleman from Tennessee offers a further amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. PADGETT: Page 76, after line 19, insert as a new paragraph:

"The sum of $340,000, or so much thereof as may be necessary, is hereby appropriated for a test of the Neff system of propulsion in such submarine as the Secretary of the Navy may designate for the purpose. *Provided*, That should the system prove unsuitable for use in submarines one-half the cost of the equipment shall be borne by the Government and one-half by the owners of the Neff system, and that if any part of the system is considered desirable for retention its value, previously agreed upon, shall be deducted from the cost of the equipment in determining the cost of the experiment to be borne by each party to the contract."

Mr. MANN. Mr. Chairman, I reserve a point of order on that.

Mr. PADGETT. Mr. Chairman, I simply want to make this statement. I have a letter from the Secretary of the Navy that is dated March 10 that I will ask the Clerk to read in a moment.

This matter was considered before the Committee on Naval Affairs, and a number of naval officers testified in regard to it; and I believe that every officer who testified stated that there were three military objections to the proposed engine, which, in their opinion, were almost insuperable. That is the way they expressed it. They expressed themselves very strongly against it.

The effort is to secure an oil internal-combustion engine to operate, submerged, by the use of compressed air. It would be very desirable indeed to secure that if possible. There are many objections and shortcomings to the battery system that we have in our submarines, both in the lead battery that is installed in our submarines and also to the Edison battery, from which we had an explosion, as you will remember, a short time ago in the New York yard, when five men, I believe, were killed, and eight or nine were injured. If it is possible to secure an engine that will operate by combustion of oil to propel the submarines when submerged, it would be a very desirable thing and a very great addition to the usefulness of the submarines. But the naval officers stated to the committee that when the engine was operating submerged, the air used in the combustion of the oil being discharged into the air would produce a wake of air bubbles that would disclose the presence and the trace of the submarine. They gave it as their opinion that that would be a very great objection, and if there was no way of overcoming that it would destroy the usefulness of the engine, because the wake, disclosing the track of the submarine, would destroy the utility of the submarine by making its whereabouts known. The owners of this system insist that the air is discharged in such a way and in such a position with reference to the propeller blades that it is churned up so in the water that it will not produce a wake. That, however, has never been demonstrated, and there is that conflict of claims.

Another claim is that in the discharge from the combustion, when submerged, there is more or less oil that goes out with the

refuse into the water, which will rise to the surface and produce an oil wake, and that would disclose the track and the whereabouts of the submarine. That by the owners is disputed, and they stated it would not.

There is still a third military objection that the naval men submitted, and that was that the operation of the engine would produce so much noise when submerged that the under-water communications—the telephones—would pick up the noise at a distance of several miles and disclose the location or the whereabouts of the submarine.

Mr. COX. Mr. Chairman, will the gentleman permit one question?

Mr. PADGETT. Yes.

Mr. COX. That is very interesting. Does the gentleman know how Germany has overcome that, or any of those objections?

Mr. PADGETT. We have never heard that she has overcome it.

Mr. COX. Why, then, don't they discover the presence and whereabouts of German submarines that are all around England?

Mr. PADGETT. The German submarines are moving down and up, and they are operating in very small waters, and they come in and out of their bases. We know of no way that a submarine is operated except by storage batteries. We are trying to get a system of propulsion under water that will dispense with the batteries, and it would be a wonderful achievement if it could be accomplished.

Mr. LOUD. Mr. Chairman, will the gentleman yield?

Mr. PADGETT. Yes.

Mr. LOUD. Is it not a fact that the Government has already contracted for two or three installations of the Deisel internal combustion engine on some of our submarines, one of them being the very boat that had the accident some time ago?

Mr. PADGETT. I do not know as to that.

Mr. LOUD. I was informed by the representative of the electric company that sold them that they had placed an order for those boats.

Mr. PADGETT. They had them for surface operation. We use the internal combustion engine or the Deisel engine; we have them on all the boats.

Mr. LOUD. Exactly.

Mr. PADGETT. But they do not operate submerged. They operate on the surface, and while in operation on the surface they charge, when the boat either runs very slowly or stands still; with the oil engine, operating on the surface, they generate electricity that stores the batteries, but the moment that the boat submerges the engines stop. They do not operate under water, and all submerged operation is by electricity from the storage batteries.

Mr. LOUD. I gathered from what the gentleman said before that they had not used those engines. I was quite sure that they had.

Mr. PADGETT. Oh, no. All our submarines are operated on the surface by the Deisel combustion engine.

Mr. WM. ELZA WILLIAMS. Mr. Chairman, will the gentleman yield?

Mr. PADGETT. Yes.

Mr. WM. ELZA WILLIAMS. What is the engine operated with that operates on the surface?

Mr. PADGETT. Oil.

Mr. WM. ELZA WILLIAMS. That is the one that is proposed to be used when submerged?

Mr. PADGETT. Yes.

Mr. WM. ELZA WILLIAMS. Does not the gentleman believe, from the experience of the German submarines in this war, that they have a submarine far superior to anything that we have?

Mr. PADGETT. I do not know. Over there, from what we can get, it seems they advertise their successes. We over here advertise our failures. We do not know anything about their failures or shortcomings.

Mr. WM. ELZA WILLIAMS. But we do know that their successes almost involved the United States in trouble with Germany.

Mr. PADGETT. Well, I do not care to discuss that.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. PADGETT. Mr. Chairman, I will ask for five minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. PADGETT. When the matter was before the committee, in consideration of the testimony that was given by the naval officers, which I have stated to the committee here today, the Naval Committee concluded not to recommend this appropriation for experimental purposes upon one of the boats. Since then a number of Members of the House have spoken to me about it. They have heard about it. Mr. Neff has submitted to me a large amount of data on the subject from the department and naval officers which I thought I had here on the table, but it seems it has been removed; but on account of the great desirability and urgent need of some means of propulsion under water, different from storage batteries and which would be more efficient, I thought I would lay the matter before the House.

The complaint has been made sometimes that we do not experiment enough. I do not think there is any very substantial basis for the criticism, because there is a great deal of experimentation done, and we appropriate for experimentation; but I thought I would lay this matter before the House with a statement of the facts and let the House determine whether or not we would make this appropriation.

The statement is made that there are certain parts of this machinery embraced in this appropriation of $340,000 that could be used whether the experiments were successful or not. Allowing for this salvage, it is estimated that it would reduce the loss to something like $100,000 or $150,000 if the experiments in underwater combustion were a failure; and the proposal is that the company shall bear one-half of the loss and the Government one-half. That would involve the expenditure of somewhere from $50,000 to $75,000 on the part of the Government.

Now, with this statement I lay the matter before the House for its consideration and determination as to whether or not under the circumstances the House feels justified in making this appropriation, and in having this experiment made, to see whether or not it is possible to have this thing developed to a successful stage.

Md. MADDEN. Will the gentleman yield?

Mr. PADGETT. I yield to the gentleman from Illinois.

Mr. MADDEN. Is not this a most extraordinary proposition to bring before the House?

Mr. PADGETT. It is out of the usual; yes.

Mr. MADDEN. Is there any justification for a man who pretends to have a machine that he is endeavoring to put upon the market asking to have the Government pay the cost of developing it?

Mr. PADGETT. I think there are cases where the Government has developed——

Mr. MADDEN. They do it in guns, but not in engines.

Mr. PADGETT. In certain things; and if the experiment promises success, the great desirability of the end to be attained would more than justify the expenditure. The question that I hesitated about was that all of the naval officers who testified before our committee were of the opinion that the military objections which were stated were insuperable, and in the committee I was at first averse to recommending it, and the committee left it out and did not recommend it.

Mr. MADDEN. What does the department say about it?

Mr. PADGETT. The Secretary of the Navy has recommended that the experiment be made. I will ask permission to have his letter read, so that we may have it before us and in the RECORD.

Mr. MADDEN. Just a moment, before the letter is read. What will it cost?

The CHAIRMAN. The gentleman's time has expired.

Mr. PADGETT. I ask unanimous consent for five minutes.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent that his time be extended five minutes. Is there objection?

There was no objection.

Mr. MADDEN. What does this man who controls the engine propose to charge the Government if the experiments are successful?

Mr. PADGETT. He proposes to charge the Government a profit not exceeding 25 per cent on the cost of manufacture.

Mr. MADDEN. What is the cost of manufacture?

Mr. PADGETT. I do not know. He said he would enter into an agreement with the Government that the profit should not exceed 25 per cent of the cost.

Mr. MADDEN. Then, we are buying a pig in a poke if we enter into this thing. Yesterday the House went on record against even buying armor plate from institutions that were already in existence, at a fixed price, or at a price to be fixed by the Secretary of the Navy. Yet, here we come to-day with a proposition that nobody knows anything about, and that a man who has a patent upon an engine is endeavoring to force upon the Government, without anybody knowing anything whatever

about it, and those who pretend to know—the officers of the Navy—talking against it.

Mr. PADGETT. I am not submitting any question with reference to a contract, or the purchase of anything. The only question involved here is the question of experiment as to whether or not the experiments were worth a trial, to see whether or not we can develop this engine. As far as I am personally concerned, I stated before the committee that I was unwilling to include it in the report or to recommend it, and the committee so acted. I am bringing it here and making this full statement without in any way involving the committee and without even my personal recommendation. I am simply laying it before the House, in order that they may have all the facts and determine for themselves whether or not they want to make this experiment.

Mr. TILSON. Will the gentleman yield?

Mr. PADGETT. I yield to the gentleman from Connecticut.

Mr. TILSON. In the opinion of the gentleman, would these experiments go on if the Government did not take hold of the project? Will this gentleman drop his experimenting and let it go by the board if the Government does not take it up?

Mr. PADGETT. I am not prepared to answer that. I have heard that it is owned by some individuals of very limited means. I will just state—it is a statement of private matters—that the other day I got a letter from some gentleman either in Iowa or Illinois, I am not sure which, stating that he had taken some stock in this matter, and that they were calling on him to advance some more money, and that he had hardly any money, and asking me for my opinion. I told him that I had no recommendations to make, that the committee had failed to recommend it, and that I did not know whether Congress was going to do anything or not, and that he must act on his own judgment, that I could not give him any advice.

Mr. KINKAID. Will the gentleman yield for a question?

Mr. PADGETT. I yield to the gentleman from Nebraska.

Mr. KINKAID. Can the gentleman inform the committee what is the estimated cost of making the experiments?

Mr. PADGETT. The amount asked for is $340,000. It was estimated, however, as the matter was stated to me, that certain parts of the machinery, the engines, and so forth, are common to all of the submarines, and that with that salvage taken out it would reduce the loss, if it was a failure, to about $100,000 or $150,000, which, if divided between the owners and the Government, would make the loss of the Government somewhere between $50,000 and $75,000.

Mr. GARDNER. Is the gentleman from Tennessee going to vote for his own amendment?

Mr. PADGETT. I am willing to vote for it.

Mr. GARDNER. Are the members of the committee generally going to vote for it?

Mr. PADGETT. I think not, no, sir; and I am not advocating it as a member of the committee. I am not submitting it as a member of the committee. I am simply laying it before the House with this statement of facts, so that the House may have the facts.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MADDEN. Mr. Chairman, I make a point of order against the amendment.

Mr. PADGETT. I ask that my time be extended long enough to have a letter from the Secretary of the Navy read.

Mr. MADDEN. I will withhold the point of order until that is done.

The Clerk read as follows:

NAVY DEPARTMENT,
Washington, March 10, 1916.

SIR: There is transmitted herewith a copy of a letter from Mr. Abner R. Neff regarding the Neff system of propulsion for submarines for which he submitted a proposal to the department September 30, 1915, for its installation in a submarine.

There has been considerable correspondence from time to time between the department and Mr. Neff and his predecessors, the L—A Submarine Boat Co., looking to the installation of such a system in a submarine, and more than a year ago the department offered to place a submarine at the disposal of this company for the purpose, the proposition then being substantially that the Neff Co. would install their system at their expense, and that if it proved satisfactory it would be purchased at a figure to be mutually agreed upon in advance of installation.

In the present case Mr. Neff has not submitted a definite proposition covering responsibility for the efficient operation of his system, although his proposal of September 30, 1915, was made under the same conditions as applied to bidders on submarines as a whole; that is, it covered the guaranties for surface and for submerged speed and for defects that might develop in any part of the system.

There are, however, features of the system which might render its use highly objectionable from a military standpoint and, therefore, make it unsuitable for use in a submarine. These features are not covered in the form of contract on which Mr. Neff bid, nor is any mention of them made in his later correspondence. They refer to the possibility of the presence of the submarine being disclosed by the air bubbles or the oil "slick" from the exhaust of her engines when submerged and also by the noise of her engines.

While the probability is that these conditions would exist, the problem is one which can be definitely determined only by experiment, and as it is extremely desirable to get rid of storage batteries, if a satisfactory substitute can be found, it is believed that there is sufficient merit in the scheme to justify a trial of it. While recognizing that there are objections to the system which may render it unsuitable, the Bureaus of Construction and Repair and Steam Engineering nevertheless recommend that it be tested in order definitely to determine its merits. It is, therefore, recommended that an appropriation be made for the purpose somewhat along the following lines:

"That $340,000, or so much thereof as may be necessary, is hereby appropriated for a test of the Neff system of propulsion in such submarine as the Secretary of the Navy may designate for the purpose: *Provided*, That, should the system prove unsuitable for use in submarines, one-half the cost of the equipment shall be borne by the Government and one-half by the owners of the Neff system, and that if any part of the system is considered desirable for retention its value, previously agreed upon, shall be deducted from the cost of the equipment in determining the cost of the experiment to be borne by each party to the contract."

Sincerely, yours, JOSEPHUS DANIELS.

Hon. L. P. PADGETT, Member of Congress,
Chairman Committee on Naval Affairs,
House of Representatives.

Mr. MANN. Mr. Chairman, may I ask the gentleman from Tennessee, or any other naval expert in the House, a question. I read in the morning paper a statement which, I think, said that a British submarine had been out 46 days without touching port. Of course, I do not believe everything I hear or read, but is that possible?

Mr. PADGETT. I do not know what is possible, but it is not common.

Mr. MANN. I know that it is not common, but I wanted to know whether it was possible.

Mr. ROBERTS of Massachusetts. I think it would be possible for a submarine to stay out that length of time without touching port, if she had supplies brought to her by other vessels, and that is being done.

Mr. MANN. This statement indicated that that was not done, and I wanted to know if it was possible for a submarine to stay out longer than 10 days without touching port or receiving supplies.

Mr. PADGETT. I think 7 or 8 days is about the limit of what we call our coast-defense submarine.

Mr. MANN. What is the power in these submarines?

Mr. PADGETT. It is an oil-burning engine running on the surface and storage batteries, electric batteries, when submerged.

Mr. MANN. How long can they run submerged?

Mr. PADGETT. About 70 miles, if they run at a very slow speed. They can stay under about 14 or 15 hours when running 4 or 5 knots an hour. But if they run 14 or 15 knots an hour they can stay under only an hour or two.

Mr. MANN. Then they have to rise to the surface and charge the batteries.

Mr. PADGETT. Yes.

Mr. MANN. How much oil do they carry?

Mr. PADGETT. I do not know, they have a cruising radius of about 400 or 600 miles.

Mr. MANN. What is the relative comparative power produced by oil whether it be used directly or for the storage of electricity?

Mr. PADGETT. I do not know how much oil is consumed in generating electricity where the boat is standing still, but I would think it would be much less than where she is running. Where they are running nothing but the engine and not carrying the weight and resistance of the boat and just running the engines and developing electricity it must be much less.

Mr. MANN. That is not exactly what I wanted to get at. I wanted to know what is the loss of power in converting oil into electricity.

Mr. PADGETT. I do not know.

Mr. MANN. That is the first question I would ask if I was investigating submarines as to power.

Mr. PADGETT. I do not know the relative power of electricity generated by burning the oil bears to the direct power of the oil operating in the oil engine direct.

Mr. MANN. It may be that some of the other wise experts can answer my question.

Mr. PADGETT. I would be justified in saying this, that in our battleships we use oil for generating electricity for the purpose of running the motor that drives the shaft in the battleship, and in that way get more power than they do by coal burning.

Mr. MANN. That is like a man raising himself by pulling on his boot straps.

Mr. MADDEN. Mr. Chairman, I make the point of order against the amendment that it is not germane, that it is a violation of all the ethics of the House, bringing in something that nobody knows anything about, and it is new legislation.

Mr. PADGETT. I think, Mr. Chairman, it is subject to a point of order.

The CHAIRMAN. The Chair sustains the point of order.

Mr. PADGETT. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 21, line 16, after the figures "$500,000," insert "to provide structural shop and shop facilities in place of those recently destroyed by fire (limit of cost not to exceed $1,050,000), $450,000."

Mr. MANN. Mr. Chairman, I reserve a point of order on that amendment. I would like to ask the gentleman what it is for?

Mr. PADGETT. It is for a shop at the Norfolk yard on account of one that was burned since the committee reported the bill. It is recommended by the Secretary of the Navy. They had a fire down there and this is to build a new shop.

Mr. MANN. What was the value of the shop destroyed by fire?

Mr. PADGETT. It was nothing like so good as the one proposed to be built here.

Mr. MANN. Was it worth half a million dollars?

Mr. PADGETT. The limit of cost here is $1,050,000.

Mr. MANN. Fifty thousand dollars to replace the old shop and one million for additions.

Mr. HOLLAND. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. HOLLAND. The purpose is to save as much of the old machinery as possible. It is hard to say what the old shop was worth.

Mr. ROBERTS of Massachusetts. What was the old shop used for?

Mr. HOLLAND. It was a ship-fitters' shop. I would like to say that it was a shop that had been added to from time to time, and it is practically impossible to tell exactly what it was worth. A part of the machinery was exceedingly valuable.

I wish to say that the shop facilities for promptly and expeditiously handling the repair work assigned to the Norfolk Navy Yard are inadequate, as is conclusively shown by the statements of the following naval experts and officials:

First. Secretary Daniels, in a letter dated February 15, 1915, and which can be found on page 2843 of the hearings, said:

Many of the shops at the Norfolk Navy Yard are antiquated and incapable of satisfactory remodeling.

Second. A naval board, composed of Admiral Edwards and others, in a report made to the Secretary of the Navy in 1914, made the following statement:

The Norfolk Navy Yard, being one of the oldest yards in the country, contains many old buildings of a design and construction which, judged from modern industrial needs, are neither adaptable for storehouses nor for manufacturing purposes. While undoubtedly of excellent construction for the period in which designed and have served the purpose for which built, some are now showing signs of weakness, and the life of many of them can not be greatly prolonged. It would undoubtedly promote economy and efficiency to give consideration to the question of erecting new buildings in preference to attempting any important improvement or extension of buildings which were designed for conditions which no longer exist.

Third. Admiral Stanford, on page 193 of his hearing before the Committee on Naval Affairs, said:

The Norfolk yard to-day is one of the principal Navy bases of this country, but is equipped almost exclusively with buildings which were constructed years and years ago and which were designed for work upon wooden vessels of the old Navy. The yard is not equipped at this time, in my judgment, with buildings which enable that yard to most efficiently and economically perform the work which is exacted of it, and as a business proposition it is going to be necessary to provide for modern and ample shop buildings at an early date, and if you can do it at once it would be a good thing.

Fourth. Assistant Secretary of the Navy Roosevelt, on page 3472 of his hearing before the Naval Affairs Committee, declared:

The general situation is that the Navy has, in the various navy yards, a lot of buildings that go back to the earliest day of the Government. They were buildings that were built for wooden-ship construction, sail lofts, mold lofts, etc., purely for wooden ships with very little iron, and where the furnaces, if there were any, or the forges, if there were any, were all very primitive in character, and were in the open air. We have had to use those buildings as the Navy developed, at first into an iron Navy and next into a steel Navy, for purposes for which they were not meant, and the result has been that at the older yards the conditions in some shops are distinctly bad. The conditions at Norfolk are probably worse than at any other place.

Fifth. Naval Constructor R. M. Watt, who, until a short time ago, was Chief of the Bureau of Construction and Repair, and is now industrial manager at the Norfolk Yard, in a letter to the chairman of the Committee on Naval Affairs, on page 3615 of the hearings, wrote, in part, as follows:

Of all the yards in the country the Norfolk Yard is the most antiquated. It has fewer modern improvements and facilities than any other yard belonging to the Government. The reason of this is that appropriations have not been made for new and modern shops and other necessary facilities which go along with it. According to the publication of the Bureau of Yards and Docks, "Public Works of the Navy, July 1, 1912," and the appropriations which have been made for the different yards since July 1, 1911, make a total value of offices, storehouses, and shops for the different yards as follows:

Portsmouth, N. H	$2,555,000
Boston, Mass	2,668,000
New York, N. Y	3,587,000
Philadelphia, Pa	1,975,000
Washington, D. C	3,513,000
Norfolk, Va	1,506,000
Charleston, S. C	1,459,000
Mare Island, Cal	2,728,000
Puget Sound, Wash	1,512,000

You will see from this valuation that the offices, storehouses, and shops at the Norfolk Navy Yard have a less value than of any other yard in the country, with the exception of Charleston, S. C., but the worst of it is that this valuation is placed on old and antiquated and out-of-date shops, which makes the situation very much worse than the figures show it to be.

These statements conclusively show not only the need for new and better shop buildings at Norfolk, but that the facilities there for doing work are worse than at any other station.

Some provision should be made at once for new shop facilities, and for the reasons briefly stated as follows:

First. The old buildings can not be moved or be so remodeled as to make them suitable for modern industrial purposes. They need not be torn down, but, as testified to by Admiral Stanford, they can be utilized for storage purposes and will provide storage facilities which are now very much needed. (See p. 209.) It would be real economy to use them for this purpose, the only purpose for which they are now adapted.

Second. Just treatment to its employees imperatively demands that this yard shall be modernized and improved without delay. Present conditions in these old buildings, most of which were erected before the Civil War, are almost intolerable. They are not properly ventilated; are not adequately heated; are without proper light and also without suitable and sanitary wash rooms and toilets; and are otherwise lacking in the facilities which are essential for the protection of the health and comfort of the men employed therein. Such conditions would not be allowed in any private establishment, and ought not to be permitted in any Government yard. Such buildings are not adapted for present-day industrial uses, and it is impossible for the men, who are compelled to use them, to accomplish the work which might otherwise be expected of them. Until these conditions are changed the men can not render their best service and can not efficiently and economically perform the work which is required of them. This occasions a direct loss to the Government. It would be effecting a real economy to remedy such a condition.

Third. It is unfair to this yard not to provide these new shop facilities at once. Work at the yard is largely secured by competitive bidding, and fair competitive bidding can not be had unless the yards are equally well equipped for the work. It is unfair to this yard to compel it to compete for work with better equipped yards. It is unfair to expect from it the same degree of efficiency and the same good results as from yards with modern buildings and modern conveniences. It is unfair to so neglect such an important station that it can not perform the work which might otherwise be exacted of it. It would be real economy to so equip it that you could secure genuine rivalry and sharp competition between this and other yards and between this and private yards. The policy now being followed is wrong and would eventually bring about the partial abandonment of this station, except for its advantages and its strategical location.

Fourth. It is unfair to the fleet not to make immediate provision for these improvements. By reason of its geographical location and its accessibility at all seasons of the year, this yard has been and must continue to be the great repair and supply station of the Navy. In time of peace it is visited by a larger number of ships and vessels than any other yard. Vessels in distress invariably seek it, and it can be reached when the channels to some of the other yards are closed by ice or by storm or are otherwise inaccessible. In time of war it must, by reason of its location near Hampton Roads and Chesapeake Bay, be the yard of the greatest military activity. If our ships are kept ready for service they must be periodically docked and overhauled. Disabled ships, whether such disability is occasioned by accident or constant use, must be repaired. The maintenance of the fleet in an efficient condition must depend upon the ability of the yards to promptly render it necessary docking and repair service. This service is absolutely essential, and the lack of it might at any time result in greater loss to the Government than the cost of these needed improvements. It is possible for it to result in the defeat of the fleet.

And yet this yard, the great repair station of the Navy, is now without the shop facilities so necessary to enable it to

render in the most economical and most expeditious manner this very essential service. It is unfair to the Navy to keep it in such condition. Such an important repair station should be so developed and equipped as to make it capable of promptly and efficiently meeting any demands which might reasonably be made upon it.

Fifth. The facilities for work at the yard have been rendered still more inadequate since the destruction by fire on May 18 of the ship-fitters' shop, the most important shop of all ship-repair stations. This one shop employed 400 men, and the urgency of their work is best shown by the fact that it was being done in three shifts of eight hours a day. These men are now temporarily housed and employed, but they are badly handicapped in their work. Steps should immediately be taken to provide new shops. If not provided, this yard, conceded to be of the greatest importance for the maintenance of the fleet, can not render the service which must be required of it.

It is useless to provide for the construction of additional ships unless at the same time you make some provision at the several yards for the pressing facilities which the very maintenance of the fleet imperatively demands. This is equally as important, and its neglect is not in the interest of economy nor in the interest of the Navy. Ships are useless unless kept ready for service, and the yard must do the work necessary to keep them ready.

Mr. PADGETT. Mr. Chairman, in this connection I would like to have read a letter of the Secretary of the Navy with reference to this.

Mr. HOLLAND. And I would like to say, so far as the cost of the building is concerned, that it is the amount recommended by the Secretary of the Navy; but if the committee believes that the amount is too large and that the amendment ought to be amended, then let the committee do it, but do not fail to provide at this yard a facility that is absolutely essential to enable it to do necessary work—not only the work which has heretofore been exacted of it but the work which may hereafter be required of it.

Mr. MANN. Mr. Chairman, I suppose this amendment may have been prepared by the Secretary of the Navy. I see that when originally prepared it provided for an appropriation of $450, but before it was offered it was changed in pencil so as to provide an appropriation of $456,000. I think, however, that a little matter like that on the naval bill amounts to nothing.

Mr. PADGETT. That was typewritten, not by the Secretary of the Navy, but the clerk of my committee added corrections to it to correct the shortcomings of the typewriter.

The CHAIRMAN. The Clerk will read the letter referred to by the gentleman from Tennessee.

The Clerk read as follows:

THE SECRETARY OF THE NAVY,
Washington May 22, 1916.

MY DEAR MR. PADGETT: The Norfolk Navy Yard reports that a fire at that yard on May 18, 1916, completely destroyed the yard's ship fitters' shop. The loss of this building will prove a serious handicap to repair work now on hand there and will also delay the completion of destroyer *No. 70*, although all possible arrangements within my power have been made for temporary expediencies to care for the emergency.

I have already brought to your attention, in my letter to you of March 25, 1916, the inadequacy of the shop facilities at the Norfolk Navy Yard for promptly and expeditiously handling the repair work assigned to that yard. If this were so before the destruction of the shop for ship fitting, the most important shop of a ship-repair yard, you will at once realize how much embarrassment will result at this yard in the future unless steps are immediately taken to improve the conditions.

In this letter of March 25 I urged an appropriation for the construction of structural or ship-fitters' shops, and in recognition of the conditions at Norfolk, a few months ago ordered the Chief of the Bureau of Yards and Docks to make an inspection of the Norfolk Navy Yard with the view to informing me as to the urgent and immediate requirements for improving the facilities there. Shortly after his return I directed him to confer with the Chief of Naval Operations and the Chief of the Bureau of Construction and Repair with the view to their submitting to me a joint recommendation, and I am forwarding herewith a copy of a report made by them in accordance with my directions.

I would refer you to paragraph 5 of this report, giving the items recommended by them to be included in the present appropriation act. I understand that the first item, a dry dock, is already included in the preliminary draft made by your committee of the appropriation bill. In view of the destruction of the ship-fitters' shop by fire, I earnestly recommend and urge that a special appropriation be secured for:

"A structural shop (cost not to exceed $1,050,000). $450,000 to be immediately available, of which $50,000 shall be available for salvage of tools and to insure the continuance of structural work until the new shop is completed."

Sincerely, yours, JOSEPHUS DANIELS.

Hon. L. P. PADGETT,
Chairman Committee on Naval Affairs,
House of Representatives.

Mr. MANN. Mr. Chairman, the gentleman from Virginia [Mr. HOLLAND] stated a moment ago that this appropriation was to provide the shop and replace the machinery. Is he correct about that?

Mr. HOLLAND. That is my information—that it is largely for that purpose. I have been furnished no detailed figures.

Mr. MANN. It seems to me that we ought to have some one on the floor, even on an item so small as $1,050,000, who knows something about it, who knows what it is for. Of course, I know that in a lot of these things we do not pay very much attention to such small sums of money, but I would like to ask the chairman of the committee whether this is for the shop—that is, to replace the shop, to replace the machinery, or is it for both?

Mr. PADGETT. It is both.

Mr. MANN. The letter of the Secretary of the Navy asked for $1,050,000, to replace the shop, as I just heard it read. I do not know whether the gentleman has read it or not; but if he has not, what would be the situation under this amendment——

Mr. PADGETT. My information is that it embraced the shop and the fitting out of shop.

Mr. HOLLAND. That is my information.

Mr. MANN. But that is not what the letter reads, as I heard it read from the desk, though I may be mistaken about that. If that be not the case, what is the situation? This is an amendment to provide a structural shop and shop facilities. I take it that shop facilities in this case means the machinery, and so forth.

Mr. PADGETT. That is what I understand.

Mr. MANN. To replace those recently destroyed by fire, limit of cost not to exceed $1,050,000. Under the rules of the House and under the practice of Congress, where you have a limit of cost fixed, whenever that limit of cost is reached and you desire to add anything to it, you must have legislation, or it is subject to a point of order. Under this amendment, having expended $1,050,000, if they desired to add a 20-cent tool down there they could not make an appropriation for it without its being subject to a point of order. There ought never to be a limit of cost fixed upon tools, machinery, at navy yards or anywhere else. There never has been before. I quote from the letter of the Secretary which has just been read:

I earnestly recommend and urge that a special appropriation be secured for:

A structural shop—cost not to exceed $1,050,000.

If that means machinery, then I do not understand the English language.

Mr. PADGETT. The amendment that is offered provides for the shop and the shop facilities, which takes in the machinery that would fit out the shop.

Mr. MANN. Yes; but you put a limit of cost upon the shop and the machinery.

Mr. PADGETT. Yes.

Mr. MANN. And that limit of cost is legislation.

Mr. PADGETT. Yes.

Mr. MANN. And you can not exceed it hereafter.

Mr. PADGETT Of course hereafter we would have to depend upon Congress in dealing with the question, as it was presented then, and the limit of cost as occasion arises is often extended.

Mr. MANN. I do not know that I shall be here, but if I am, and an appropriation is sought to provide additional machinery down there, please remember that it will be subject to the point of order.

Mr. HOLLAND. Mr. Chairman, I want to say that I had a talk with the Chief of the Bureau of Yards and Docks, and unless I misunderstood him the purpose is not only to provide for the shop but also to provide the machinery.

Mr. MANN. How much is the shop to cost, and how much of the appropriation is for machinery?

Mr. HOLLAND. I could not advise the gentleman as to the exact figures.

Mr. MANN. When you make an estimate of $1,050,000—I wonder they did not make it $1,049,999—certainly somebody must have gotten the figures up on those two propositions, and we are entitled to have the information.

Mr. HOLLAND. I have not the figures; they have not been furnished me.

Mr. PADGETT. Here is a letter referred to there, signed by Admiral Benson, Chief of the Bureau of Operations; Admiral Taylor, Chief of the Bureau of Construction and Repair; and Admiral Harris, Chief of the Bureau of Yards and Docks, who made an investigation, and they report for $1,000,000 for the shop and $50,000 is added to that, and in the letter which the gentleman had there he will notice that the Secretary in the estimate which he drafted, stated that $50,000 was for the salvage of the old machinery.

Mr. MANN. I see that plainly enough. That is not for machinery; that is for salvage of the old machinery. That is not

to supply machinery for the shop; and under the gentleman's amendment——

Mr. PADGETT. I understand.

Mr. MANN. You can not put in any new machinery in that shop. You can build a shop and have a roof over it, but you can not do anything in it.

Mr. PADGETT. We are authorizing a shop with machinery to cost $1,050,000, not providing for so expensive a shop as they recommended.

Mr. MANN. Oh, no; you do not know what you are doing. That is the trouble about it.

Mr. PADGETT. Shop and machinery.

Mr. LONGWORTH. Mr. Chairman, I agree entirely with the gentleman from Illinois it would be wise to know the relative proportions of the cost of machinery and the shop. I would like to ask the chairman if he can tell us what was the original cost of the machinery and the shop?

Mr. PADGETT. I stated I could not. That was put in many, many years ago—some of it before the Civil War—and it has come along down with repairs and additions and scrapping and new machinery, and I could not give the gentleman any idea what it was. I will ask unanimous consent that this amendment be passed over until to-morrow, and in the meantime I will get detailed information along the line of the gentleman's request.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent that this amendment be passed over until to-morrow morning. Is there objection?

Mr. MOORE of Pennsylvania. Mr. Chairman, reserving the right to object, in order to close the matter up now, does the gentleman recall whether an appropriation has yet been made for the burned machine shop at the Philadelphia Navy Yard?

Mr. PADGETT. I do not know. We have made so many appropriations for the Philadelphia Navy Yard, I do not know whether that has been made or not.

Mr. MOORE of Pennsylvania. I rather expected the gentleman to say that. The fact that the Norfolk Navy Yard has about $792,000—practically $800,000—in this bill and the Philadelphia Navy Yard $538,000 answers the gentleman as to that.

Mr. PADGETT. I will state to the gentleman that the Secretary of the Navy recommended very earnestly a dry dock at Norfolk, and did not recommend one at Philadelphia, and the gentleman's committee put in one for Philadelphia at three and a half million dollars without the recommendation of the Secretary of the Navy.

Mr. MOORE of Pennsylvania. We appreciate that, for it was due.

Mr. PADGETT. So it does not lie in the mouth of the gentleman to be captious about the committee.

Mr. MOORE of Pennsylvania. May I ask the gentleman again whether the request for the reconstruction of the burned machine shop at the Philadelphia Navy Yard has yet been complied with?

Mr. PADGETT. I do not know; there has not been any request for several years.

Mr. MOORE of Pennsylvania. It was burned several years ago.

Mr. PADGETT. There has been no request from the department nor from a Member of Congress for several years.

Mr. MOORE of Pennsylvania. This was before the committee at one time. May I ask the gentleman whether any request by the department was made for a floating crane at the Philadelphia Navy Yard?

Mr. PADGETT. Not this year—either by the department or the gentleman himself.

Mr. MOORE of Pennsylvania. I wish to submit to the gentleman that a bill was introduced by my colleague [Mr. VARE] and has been before the committee asking for a floating crane, which is a matter of great necessity, since you are obliged to hire one once in a while at the Philadelphia Navy Yard——

Mr. PADGETT. The matter has not been impressed upon the committee by either the department or the gentleman.

Mr. STAFFORD. Will the chairman of the committee take the general committee into his confidence and tell the committee in how many instances they have departed from the recommendations of the General Board or the Secretary of the Navy and favored some special pet project of a local district?

Mr. PADGETT. We did not favor any special project of a local district. The committee two years ago recommended one at Philadelphia, which went out on a point of order, and——

Mr. STAFFORD. I do not mean a dry dock, but generally speaking.

Mr. PADGETT. Generally speaking, I can not give the gentleman any details.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

Mr. STAFFORD. Mr. Chairman, reserving the right to object, as we are not considering this bill in the regular order but by special rule, I think it is only due to the committee that the gentleman should indicate how many instances there were when the committee went beyond the recommendations of the department.

Mr. PADGETT. Sometimes we put in more and sometimes less.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee? [After a pause.] The Chair hears none.

Mr. HOLLAND. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. BORLAND. Mr. Chairman, I submit an amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Line 26, page 37, add the following:
"*And provided further*, That any retired officer, while on active duty, shall receive the pay and allowances of the grade, not above that of lieutenant commander, that he would have attained in due course of promotion if he had remained on the active list for a period beyond the date of his retirement equal to the total amount of time during which he has been detailed on active duty since his retirement."

Mr. PADGETT. Mr. Chairman, I reserve a point of order against the amendment.

Mr. MANN. Where does that come in?

Mr. BORLAND. At the bottom of page 37.

Mr. Chairman, if the chairman of the committee wants to reserve the point of order I will make a little statement of the amendment first before touching on the point of order. My understanding is that this particular provision occurs in exactly these words, except the change of title, lieutenant commander to major, in the Army bill. It is exactly the language that was carried in the Army bill with reference to Army officers who are detailed for active duty. As I understand the purpose and the practical effect of it is to give the Government the advantage of the work of these retired officers in cases where it can be done and on conditions that are fair to the retired officer. Now, to illustrate that, because an illustration brings it more closely home to my conception and does, I think, to other nonprofessional men—there is a young man of my acquaintance in the Navy, I do not know exactly what his rank is, but it can not be very high, who had his hearing impaired by a gun discharged in the line of duty. He is a splendid, active young man. My impression is that he was appointed from Arkansas, went through the Naval Academy, is a trained naval constructor, and a very efficient man, and he was retired because in the line of his duty his hearing was impaired by this gun discharge. He is in line with a good deal of work, especially with the enlargement of the Navy. In fact, he is detailed for that purpose right now. But the effect of the present law is, as I understand, no matter how long he has been detailed for that work—and I think he ought to be detailed to it as long as he is able to perform competent work in that branch of the service—his retirement grade does not change as the grade of a man in the active service does. He may become more skilled and more efficient, but he has been retired at a very low grade as a young officer in the Army.

Now, that matter has been corrected by the Military Committee by a specific provision in the military bill which provides that the officers under the grade of major, if they are detailed from the retired list to the active list for duties they are able to perform, advance in grade as though they were on the active list. This is a proposed application of the same principles of the Navy, using the rank of lieutenant commander instead of the rank of major. In other words, a man has to be low down on the list before this can affect him at all, and he never can get above the rank of lieutenant commander.

Now, it does seem to me there are cases similar to the one that I have pointed out, where a man's hearing is affected, or perhaps some other defect incurred in the line of duty. A great deal can be done with the technical knowledge with which the Government has educated him to the advantage of the service. Instead of his lying a dead weight upon the retired list of the Army and continuing to draw his pay and do nothing more, he should be given active duty. If he has the technical knowledge that ought to be used, he should be permited to use it. I have not any other information about it, but I have no doubt it will appeal to the fairness of the members of the Naval Committee, it being exactly the proposition the Military Committee put on their bill.

Does the gentleman from Tennessee insist on his point of order?

Mr. PADGETT. It is subject to a point of order, but I want to ask the gentleman a question.

Mr. BORLAND. Yes.

Mr. PADGETT. Is this the identical provision that is contained in the Army reorganization bill passed at the present Congress?

Mr. BORLAND. I understand it is identical, word for word, with the provision, except that the Army bill uses the word "major" as the rank above which they can not go, while this uses the words "lieutenant commander."

Mr. PADGETT. And this puts the two services upon the same basis?

Mr. BORLAND. Precisely. The Advocate General has put his approval upon this wording.

Mr. PADGETT. I will not insist upon the point of order, but let the House vote on the merits of it.

Mr. BUTLER. Mr. Chairman, I reserve the right to object. This provides for a promotion upon the retired list. It may be that the rule has been repealed in the Army, but I do not know that. I had no opportunity, however, to prevent that, but I have one to prevent it here; and I am going to make the prevention, and I will make the point of order.

Mr. BORLAND. Will the gentleman reserve it?

Mr. BUTLER. I certainly will if the gentleman wants to make a statement.

Mr. BORLAND. I call attention to the fact that in no case can the commander receive the pay or allowance above the rank or grade of lieutenant commander.

Mr. ROBERTS of Massachusetts. If this proposition is a fair one for a junior officer who has been retired for disability, why is it not fair for a lieutenant commander? If a commander has been retired for disability and can perform some active service, why cut the line and say that it is fair for the man below and not fair for the man above?

Mr. BORLAND. I think the distinction was made on this account. I will say that this young man I describe was a comparatively young man, barely over 30 years of age. He had his hearing affected by a gun discharge. He had only just come out of the Naval Academy and just received his technical education.

Mr. ROBERTS of Massachusetts. In what grade was he retired?

Mr. BORLAND. I do not know.

Mr. ROBERTS of Massachusetts. That of junior lieutenant, or what?

Mr. BORLAND. I do not know. I could not say.

Mr. ROBERTS of Massachusetts. If he was 30 years old he was probably a junior lieutenant. Now, let me ask the gentleman a question. If he is on active duty he is getting the full pay, is he not?

Mr. BORLAND. Yes; if he is on active duty he is getting full pay; but if he stays on active duty 20 or 30 years he would still be getting what? As I understand it, he would still be getting the active pay of a junior lieutenant.

Mr. ROBERTS of Massachusetts. Is not that better pay than if he were not at work?

Mr. BORLAND. Yes; but I do not see why, if he is doing the work, he should not have the active service counted in his favor.

Mr. ROBERTS of Massachusetts. The objection is to bringing these retired men in and taking all the snore stations—getting all the soft berths.

Mr. BORLAND. There may be a scramble among officers for promotions; but we are considering the payment of bills for the retired officers. We are not considering it from the standpoint of the officer who wants a promotion in the service, but from the standpoint that we are paying for these men anyway, and should not we at least have some benefit from their service?

Mr. BUTLER. I do not agree about the scramble for office. I am opposed to men on the retired list being placed on active duty.

Mr. ROBERTS of Massachusetts. Mr. Chairman, will the gentleman yield there?

Mr. BORLAND. Yes.

Mr. ROBERTS of Massachusetts. The gentleman misunderstands the situation entirely. This law has not the slightest effect on the promotion of a man on the active list.

Mr. BORLAND. That is the gentleman's own statement.

Mr. ROBERTS of Massachusetts. No; I did not say that. I said this would shut out the line officer when he comes on shore from having a proper duty, and the effect would be to keep him at sea indefinitely, because there is no place on shore where he would get relief from sea duty by reason of all the places being filled up with men on the retired list doing active duty.

Mr. BORLAND. That assumes that there is not more work to be done on shore than could be done by the retired officers. I am not sure that we should not use the retired officers in that way, anyway. But I do not think either one of these assumptions is absolutely incontestable.

Mr. GARDNER. Mr. Chairman, will the gentleman yield?

Mr. BORLAND. Yes.

Mr. GARDNER. Does the gentleman know whether the effect of the passage or adoption of this amendment would be to displace any officer who was in the line of promotion? In other words, would an officer under the gentleman's amendment be an active officer of his grade?

Mr. BORLAND. I understand that this could not possibly interfere with the promotion of an officer in the active service.

Mr. PADGETT. This is on the retired list, and there are no extra numbers on the retired list.

Mr. BORLAND. It simply says that the man who is on the retired list and is assigned to active duty shall have——

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. BORLAND. Mr. Chairman, I would like to have five minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

Mr. BUCHANAN of Illinois. I object.

Mr. GARDNER. Mr. Chairman, I ask for recognition in my own right.

The CHAIRMAN. The gentleman from Massachusetts [Mr. GARDNER] is recognized.

Mr. GARDNER. Mr. Chairman, I wish to ask the chairman of the committee, in connection with this amendment, a question. As I understand it, there is no question of promotion involved except on the retired list?

Mr. PADGETT. That is right.

Mr. GARDNER. Very well. Now, if you say that a man shall have the same promotion as he would have had if he had served that length of time longer on the active list, how do you determine in what grade he is to be promoted?

Mr. PADGETT. Simply by the man in front of him and the man who is behind him at the time he went out. This, as I stated, gives promotion on the retired list. It is subject to a point of order, but I was willing that the matter should be debated. The gentleman from Pennsylvania [Mr. BUTLER] made his point of order.

Mr. BUTLER. I reserved the point of order. I withheld it so that the gentleman from Missouri [Mr. BORLAND] might have an opportunity to make a statement.

Mr. BORLAND. Mr. Chairman, I do not think it is subject to a point of order. It is offered at a place which provides for the pay and accounts of the officers and men of the Navy, and it contains a good many of these provisos. The one immediately preceding it is in the rating of storekeepers in the artificers' branch. There are a number of similar designations there. I do not know upon what theory the gentleman from Pennsylvania [Mr. BUTLER] is making the point of order, unless it is not germane. I do not think that is tenable. I think it is germane to that particular paragraph, and certainly to the bill itself.

The CHAIRMAN. The particular portion of the bill to which the amendment is offered provides for the compensation and rating of enlisted men in active service. The amendment of the gentleman from Missouri [Mr. BORLAND] provides for the compensation of retired officers when assigned to active duty. In the opinion of the Chair it is not germane to the provision of the bill to which it is offered, and the Chair sustains the point of order.

Mr. BORLAND. Mr. Chairman, I reoffer the amendment at page 66.

Mr. MANN. I reserve a point of order on it, Mr. Chairman.

Mr. BORLAND. At page 66, line 10, I reoffer the amendment.

The CHAIRMAN. The gentleman from Missouri reoffers the amendment, and the Clerk will report it.

The Clerk read as follows:

Amendment by Mr. BORLAND: On page 66, line 10, insert: "*And provided further*, That any retired officer while on active duty shall receive the pay and allowances of the grade, not above that of lieutenant commander, that he would have attained in due course of promotion if he had remained on the active list for a period beyond the date of his retirement equal to the total amount of time during which he has been detailed on active duty since his retirement."

Mr. BUTLER. Mr. Chairman, I reserve a point of order.

Mr. MANN. I make the point of order.

Mr. BORLAND. The Chair will observe that the paragraph applies to a great many retired officers, and provides "That the aforesaid officers shall be carried as additional numbers in the grade to which they may be appointed under this act," so that it includes exactly provisions of this character. It seems to me the point of order is not well taken.

The CHAIRMAN. The provision of the bill to which the amendment is offered authorizes the President to appoint on the active list certain officers of the Navy now on the retired list, and provides that they shall, when appointed, be carried as additional numbers. Under the law retired officers may be assigned to duty on the active list, and receive the compensation of the grade they had reached when retired. The gentleman from Missouri proposes that when assigned to the active list they shall receive the compensation of the grade to which they would have been promoted had they remained in active service without retirement. The Chair does not believe that amendment is germane to the provision of the bill authorizing the President to appoint on the active list certain designated officers now on the retired list. The Chair sustains the point of order.

Mr. TOWNER. I desire to offer an amendment.

The CHAIRMAN. The gentleman from Iowa offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. TOWNER: Page 102, line 15, after the word "plant," strike out the period, insert a colon, and the words and figures following, to wit: "*Provided further*, That if in securing contracts for any of the increases authorized by this act the Secretary of the Navy shall be unable to make contracts within six months from the passage of this act, which shall provide for the completion and delivery to the Government of battle cruisers within 24 months, of scout cruisers within 18 months, and of destroyers and submarines within 1 year from the date of such contracts, within the limits of cost herein provided, the Secretary shall forthwith report such fact to Congress, with a full statement of reasons assigned and conditions existing, together with an estimate of the cost for the enlargement of Government plants to provide for the building therein of all such increases of the Navy herein authorized for which contracts can not be secured for completion within the limits of the time herein specified."

Mr. STAFFORD. I reserve a point of order.

Mr. MANN. A parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MANN. This is an amendment offered to the proviso on page 102. If this amendment should be agreed to, would it still be in order to move to strike out the proviso as amended or is it necessary to make that motion now or before the amendment is agreed to? Of course, this is to perfect the text, I take it.

The CHAIRMAN. The Chair is of the opinion that the pending amendment is of a distinctly substantive nature.

Mr. MANN. I am not raising the point of order. That is raised elsewhere. In the form in which the amendment was offered it was offered as an amendment to perfect the text.

Mr. TOWNER. The question is whether or not the motion to strike out the proviso in the bill could be made independently or whether necessarily such a motion would include this proviso.

The CHAIRMAN. The Chair will recognize the gentleman to debate the amendment, and will reserve his decision on the question raised.

Mr. MANN. The gentleman from Wisconsin [Mr. BROWNE] desires to make a motion to strike out the proviso and to have that motion pending.

The CHAIRMAN. The gentleman from Wisconsin offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BROWNE: After the word "emergency," in line 2, page 102, strike out the following:

"*Provided*, That no part of the appropriations made in this act shall be available for the salary or pay of any officer, manager, superintendent, foreman, or other person having charge of the work of any employee of the United States Government while making or causing to be made with a stop watch or other time-measuring device a time study of any job of any such employee between the starting and completion thereof, or of the movements of any such employee while engaged upon such work; nor shall any part of the appropriations made in this act be available to pay any premium or bonus or cash reward to any employee in addition to his regular wages except for suggestions resulting in improvements or economy in the operation of any Government plant."

The CHAIRMAN. The Chair thinks that amendment will be in order after the amendment of the gentleman from Iowa [Mr. TOWNER] is disposed of.

Mr. MANN. I suggest to the gentleman from Wisconsin that he modify his amendment so as to propose to strike out the proviso, beginning with line 2, on page 102, so that it will be to strike out the proviso as amended, if it shall be amended.

Mr. BROWNE. I assent to that suggestion.

The CHAIRMAN. The gentleman asks unanimous consent to modify his amendment. The gentleman can submit that amendment subsequently.

Mr. BROWNE. I ask that the Clerk modify it according to that.

Mr. GARDNER. Mr. Chairman, does the mere fact that the amendment offered by the gentleman from Iowa—which seems to be totally unrelated to the proviso—is offered following the proviso, make it an amendment to the proviso?

The CHAIRMAN. The gentleman from Iowa moved to strike out the period and insert a colon, and his amendment seems to be an amendment to the proviso.

Mr. GARDNER. I raise the point of order, if it is not too late, that it is not germane to the proviso that it seeks to amend.

The CHAIRMAN. The point of order is pending.

Mr. GARDNER. Why does not the gentleman offer it as a separate paragraph? That will remove the confusion. Obviously the paragraph would have to be completed before you could move to strike it out, and surely the gentleman from Iowa [Mr. TOWNER] has no desire to modify the proviso by his amendment, which is totally unrelated.

The CHAIRMAN. The portion of the paragraph proposed to be stricken out can be stricken out regardless of the action of the committee on the amendment offered by the gentleman from Iowa, and would be in order even if the amendment of the gentleman from Iowa was agreed to.

Mr. MANN. But the way the amendment was offered by the gentleman from Iowa was to strike out the period in line 15 and insert a colon, and then so forth.

Mr. GARDNER. If the Chair will hear me, if the amendment of the gentleman from Iowa [Mr. TOWNER] is adopted, and then the question reverts to the amendment of the gentleman from Wisconsin and that is adopted also, not only is the proviso stricken out which the gentleman from Wisconsin [Mr. BROWNE] seeks to strike out, but also the proviso offered by the gentleman from Wisconsin will be stricken out, under the parliamentary situation which the Chair has declared to exist.

[Mr. TOWNER addressed the committee. See Appendix.]

Mr. PADGETT. Mr. Chairman, I make the point or order against the amendment offered by the gentleman from Iowa [Mr. TOWNER] that it is legislation, that it changes existing law, and is not germane; and further, the House has already voted on the proposition.

The CHAIRMAN. The amendment is clearly legislation, and the Chair sustains the point of order.

Mr. HAUGEN. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. TOWNER. Mr. Chairman, upon the pending amendment to strike out the proviso on page 102, I understand that a specified time is desired for debate. I want to be liberal with gentlemen about it. What time is desired?

Mr. BROWNE. Mr. Chairman, I would like for myself 15 or 20 minutes.

Mr. BUTLER. I do not know of anyone else who desires to be heard on this side.

Mr. MANN. We have some other amendments which we desire to get a chance to offer, and the time is somewhat restricted now.

Mr. PADGETT. Mr. Chairman, I ask unanimous consent that debate on the pending amendment to strike out the proviso on page 102 and all amendments thereto close in 40 minutes, 20 minutes of the time to be controlled by the gentleman from Pennsylvania [Mr. BUTLER] and 20 minutes to be controlled by the gentleman from Colorado [Mr. KEATING].

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent that all debate on the pending amendment and all amendments thereto close in 40 minutes, one-half to be controlled by the gentleman from Pennsylvania [Mr. BUTLER] and one-half by the gentleman from Colorado [Mr. KEATING]. Is there objection?

Mr. MOORE of Pennsylvania. Mr. Chairman, reserving the right to object, I wish to observe at this time that the majority and the minority side of the committee having concluded their amendments some 15 minutes ago, and only 1 hour remaining before adjournment this afternoon, and possibly only 3 hours to-morrow, the gentleman is very liberal in the time allotted for this amendment.

Mr. PADGETT. Oh, the House generally began offering amendments much longer ago than 15 minutes.

The CHAIRMAN. Is there objection?

Mr. MOORE of Pennsylvania. Mr. Chairman, reserving the right to object, I wish to state that at 12 o'clock the gentleman stated that there were two more amendments from his side of the committee, and I think on this side of the House it was stated there would be two more amendments. Three hours have been used in the discussion of committee amendments since

then. Now, when the main body of the House wishes to offer amendments, the gentleman proposes to give 40 minutes to one amendment, with but 1 hour remaining of the day's time.

Mr. PADGETT. I am only expressing the wishes of both sides of the House.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

Mr. MOORE of Pennsylvania. Mr. Chairman, reserving the right to object——

The CHAIRMAN. Debate is not in order. The committee takes more time in trying to come to an agreement than in discussing propositions. Is there objection?

Mr. MOORE of Pennsylvania. I object.

The CHAIRMAN. The gentleman from Pennsylvania objects.

Mr. BROWNE. Mr. Chairman, I ask unanimous consent that I may proceed for 20 minutes.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to proceed for 20 minutes. Is there objection?

There was no objection.

Mr. BROWNE. Mr. Chairman, the amendment I propose seeks to strike out a provision in this bill which is similar to the bill familiar to a great many here known as the Tavenner bill, which provides that the stop watch or any time-measuring device shall not be used. It also prohibits the premium or bonus system. We are using the time study and the premium systems in several of the departments of the Government, and these systems are giving the best of satisfaction, and the heads of these departments are anxious to retain them. We have both of these systems in use in the Post Office Department and in the Ordnance Department. The question here is whether it is a wise time now to place in this large appropriation bill a provision which may interfere seriously with the administration of the Navy Department. I wish to call attention to just what the stop watch is used for. A great many people look upon the use of the stop watch as an instrument of torture to the laboring man, while, as a matter of fact, the stop watch is used to-day by thousands of manufacturers. It is not used simply to be held over an employee, but it is used more particularly as a time-measuring device, a laboratory instrument, to determine how long it will take to accomplish a certain task. To determine the cost of any article that is manufactured there are three elements that must be determined. First, there is labor, then material, and third, the overhead or managing charges. And the greatest of these three items is the labor that enters into every manufactured article. Now, the greatest scientific experts on efficiency hold that the only way to find out what an article costs is in some way to find out how much labor and how long it takes that labor to accomplish that task, and as a result they take a skilled employee and see how long it takes him to accomplish that task, and they make this time study by the use of a watch. They make many of these experiments to determine the quickest and best way to accomplish the work.

Now, take the Watertown Arsenal, where both the time study and premium system have been established since 1909 by Gen. Crozier. A great many objected to it when it was being established. Some thought it would result in throwing out a large number of laboring men, putting them on the scrap heap, as they expressed it; but what was the result? No man there lost his job on account of it, but they constantly shifted men about until they got men who were adapted to each particular job, and as a result there has been a tremendous saving made, and I will read you some of the testimony of Gen. Crozier later in regard to it.

Mr. KEATING. Will the gentleman yield?

Mr. BROWNE. I want to make my statement first. If the use of a stop watch and the premium system, or any time-measuring device, is a bad thing, then we want to abolish it. We want to abolish it not only in the Navy Department but also in the Military Department and the Post Office Department and other departments; and so, if we vote to retain the provision I seek to strike out, we logically will have to insert a similar provision in the next appropriation bill that comes up—the fortification bill. They are attempting at this time to insert a provision of that kind in the Post Office bill, and the question will come up squarely whether this Government, which is embarking to-day on so many new activities, is going to follow the private manufacturing institutions and adopt efficient methods, or whether it is going to remain at a standstill and prohibit those methods.

Now, take the premium system, which goes along with the time-study system. The premium or bonus system are practically the same thing—technically they are different, but they are used in the testimony of these experts as being synonymous. They take a man in a shop and set him at a job, and they find out how long it will take him to do that job. They try to get as efficient a man as they can. They then add to the time it takes him to complete the task additional time, sometimes 60 per cent, so they will not set an excessively small time, and fix that as the time an ordinary man can do the job. Then they say to the men who are working on similar jobs, "If you can do more than that task in the required time you will get a premium." As a result, that man has an incentive to do the best he can, and as a result of that practice in the Watertown Arsenal every man who is working under the premium system gets on an average over $10 a month premium. He gets, in the first place, the full day's wage, which is the going wage paid in private institutions of that kind, and in addition he gets a premium, and that premium in the Watertown Arsenal averages over $10 a month.

Now, just see what the Government employees in the navy yards and the arsenals are getting. In the first place, this Government gives an eight-hour day, and I am heartily in favor of that. Next, it says to each employee, "You are entitled to 15 full holidays with full pay." Next it says, "You are entitled during the year to seven legal holidays with full pay." Next, the Government gives each employee during the summer months 13 half-holidays—13 Saturday afternoons off. In all this makes 28½ days that the Government employees in the Navy Department, the War Department, and the Post Office Department get with full pay. That amounts to 10 per cent of the working days of the year that every Government employee working in these departments has to himself, with full pay for every day.

So I say that this Government is not treating its employees badly, but is treating them generously, and that is why they like to work for the Government. Now, what do the heads of these great departments that have this efficiency system—the time study and the premium system—say about it? Secretary of War Baker has written a letter to the Speaker of this House testifying in the very highest terms of the way that system has worked in the War Department, and says it would work great injury to the Government to prohibit the use of these efficiency methods. Postmaster General Burleson and the First, Second, Third, and Fourth Assistant Postmasters General, all of them, are unanimous in saying that prohibiting the use of a time study and premium system is going to disorganize their great departments. Now, our Post Office Department competes with the express companies in the parcel post. Our Navy Department, in its shipyards, is going to compete with private institutions, and they want to use the same efficiency methods which their competitors use. Now, there is another thing to which I desire to call attention, and that is about a year ago the President of the United States, cooperating with the Secretary of the Navy, appointed an Advisory Board to the Navy. He sent out to 11 of the great scientific societies in the United States and asked each to select a man from its society to act as an advisory board in the matter of preparing the national defense. Each society selected one of its members by referendum, and they elected Thomas A. Edison as the chairman of the Advisory Board, and in addition to that others were appointed, which made in all 23 to advise the Navy Department. What do these great scientists and experts, men who are disinterested, say of this legislation? I have the opinion of a number of them, and everyone that has expressed himself has emphatically protested against the Tavenner bill, which is incorporated in this naval bill, and I wish just simply to read for a moment from some of these great men upon that subject.

Here is what Thomas A. Edison says:

> In my opinion, the bill introduced by Congressman TAVENNER is based on fallacy. It is an attempt to prevent efficiency and would be disastrous to labor and to the public.
>
> The worst enemy of all workers is an inefficiently managed shop.

Here is another of these men, Lawrence Addicks, of Chrome, N. J., a member of the American Society of Mechanical Engineers, a graduate of the Massachusetts Institute of Technology, and consulting engineer for Phelps, Dodge & Co. He is as strongly against this proposition as is Mr. Edison.

Another man who takes the same position is Elmer A. Sperry, of New York City, member of American Society of Mechanical Engineers; is a graduate of Cornell, class of 1876; designer of electric appliances; and noted inventor (designer of gyroscopic stabilizer for ships and aeroplanes).

Another is A. M. Hunt, of New York City; member of American Society of Mechanical Engineers; is a graduate of Naval Academy of 1879; is consulting engineer and experienced in the development of hydroelectric, steam, and gas plants.

Still another is Alfred Craven, of New York City; member of American Society of Mechanical Engineers; is a graduate of

Naval Academy of 1876; is chief engineer of the Public Service Commission of New York City; and was formerly division engineer in charge of the construction work on the Croton aqueduct and reservoirs.

Another is Frank J. Sprague, of New York City; member of American Society of Mechanical Engineers; is a graduate of Naval Academy of 1888; now is consulting engineer for the Sprague, Otis, and General Electric Companies. He was the founder of the Sprague Electric Railway Motor Co., and was concerned in establishing the first electric trolley system in the United States.

Another is W. R. Whitney, of Schenectady, N. Y.; member of American Society of Mechanical Engineers; is a graduate of Massachusetts Institute of Technology of 1890; is at present director of the research laboratory of the General Electric Co.; has been the moving spirit in the perfecting of metallic electric-lamp filaments and the development of wrought tungsten.

All of these men believe that the Tavenner bill would be disastrous to efficiency and would injure the laborer himself.

Mr. HUMPHREY of Washington. Mr. Chairman, will the gentleman yield for a question?

The CHAIRMAN. Does the gentleman from Wisconsin yield to the gentleman from Washington?

Mr. BROWNE. Yes.

Mr. HUMPHREY of Washington. Has the gentleman the opinion there of Mr. Louis D. Brandeis, recently nominated for the Supreme Court by the President?

Mr. BROWNE. Yes, I have; and Mr. Brandeis favors the time study and premium system and believes that they are necessary to any efficiency methods. I will quote from Brandeis later. Here is the opinion of John F. Wallace. He was formerly chief engineer of the Panama Canal. He resides in New York. He says:

I would say that the Tavenner bill is so obviously to the disadvantage not only of the United States Government, but also to all employers of labor as well as to labor itself that it is difficult to conceive of its finding favor with our Senators and Representatives. The prosperity of the American Nation, outside of the personalities of its broad and progressive citizens, has been due to the introduction of labor-saving machinery and the substitution of brains for manual labor in all classes of human industry, and it should be apparent to employees in the mass as much as to employers that increased efficiency in production has not only bettered the condition of workmen, but also increased the available profits out of which compensation of labor is paid.

Elmer L. Corthell, doctor of science, president American Society of Civil Engineers, says:

It is my decided personal opinion from careful study of industrial conditions in this and other countries, covering many years, that the result of the proposed Tavenner bill will lead fast to industrial and commercial disaster. Every effort should be made to remove rather than increase the burden on our industries. This bill, if enacted into law, will lead to irreparable injury and loss to the industry, commerce, and particularly the foreign trade of this country.

And I could go on with the testimony of all these other men. My friend from Washington [Mr. HUMPHREY] asked me about Mr. Brandeis. I have Mr. Brandeis's statement, and I will read it. When Louis D. Brandeis appeared before the Interstate Commerce Commission a few years ago he made the statement to them that the railroad companies of the United States were losing $1,000,000 a day because they were not efficient, and the railroad companies and the Interstate Commerce Commission both asked him to prove it, and he brought his great efficiency experts before them, and he was days and days introducing evidence, making out his case. He submitted a brief on the subject that will convince anyone who will read it that a time study is necessary to efficient management. Everyone knows that if any man in this country is in favor of labor, a champion of organized labor, it is Louis D. Brandeis. And what does he say?

Mr. KEATING. Mr. Chairman, will the gentleman yield there?

The CHAIRMAN. Does the gentleman from Wisconsin yield to the gentleman from Colorado?

Mr. BROWNE. Yes.

Mr. KEATING. Does the gentleman know of any railroad in the world that has adopted a stop watch?

Mr. BROWNE. I do not know of any.

Mr. KEATING. You do not know of any railroad that has taken the opportunity to save $1,000,000 a day?

Mr. BROWNE. There are hundreds of thousands of men working to-day under the stop-watch and time system that are absolutely contented, and I could stand here and read from now until to-morrow night from the testimony that I have, not only from manufacturers all over the United States that are making use of the time-study and premium system but also the employees working under such system who are heartily in favor of the same. And I have failed to find a single instance where the employees wanted to abolish the system.

SCIENTIFIC MANAGEMENT DEMANDS TIME STUDY.

The results obtained through scientific management depend further on a careful study of each operation with a view to determining, in the first place, what time should normally be taken in performing the operation, and, secondly, whether it can be performed in a better manner than as hitherto practiced. The whole realm of science is brought to the aid of the humblest workman.

Scientific management recognizes also that due appreciation of the actual results of effort must be based upon actual knowledge, and such knowledge is an essential condition to the best performance. The current record of the accomplishment of each individual, of each machine, and of all materials is an indispensable factor in scientific management. Without such a record the tyranny of the foreman, and all the discord which attends it, is inevitable. Without such a record, justice to employer and employee is impossible. Without such a record, waste can not be eliminated.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. BROWNE. Mr. Chairman, I ask to proceed for five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. BROWNE. These interruptions have taken a great deal of my time.

Mr. NOLAN. Mr. Chairman, reserving the right to object, I would like to have some understanding that those who are opposed to the motion shall have an equal amount of time.

Mr. BROWNE. Mr. Brandeis says further:

FINANCIAL GAINS.

Under scientific management the employee is enabled to earn without greater strain upon his vitality from 25 to 60 per cent more than under the old system.

The larger wages are made possible by larger production; but this gain in production is not attained by speeding up. It comes largely from removing the obstacles to production which annoy and exhaust the workman, obstacles for which he is, or should not be, made responsible.

Mr. Brandeis commends in the strongest manner possible in his brief, both as to time study and the premium system, and Louis D. Brandeis is against the piece system. Organized labor is against the piece system. Yet this bill does not condemn the piece system, but the time system; time study of any kind. It condemns the premium system; and yet organized labor, so far as ever I have known, has never made any public statement where it has condemned the use of the time system or the premium system outside of Government work.

Mr. GALLAGHER. Mr. Chairman, will the gentleman yield there for a question?

The CHAIRMAN. Does the gentleman yield?

Mr. BROWNE. Yes.

Mr. GALLAGHER. I would like to ask the gentleman whether he knows if Mr. Brandeis or Mr. Wallace or any other scientific man that he has cited ever worked under a stop-watch system or knows anything about it?

Mr. BROWNE. They have made a great study of it.

Mr. GALLAGHER. I do not believe they know anything about it.

Mr. BROWNE. Well, the laboring man is not always the best judge of what is best for him. We know that in days gone by the labor men fought every labor-saving device. We know that the Government Printing Office was the last great printing office in the United States that put in linotype machines, because the men in the Government Printing Office thought it was going to hurt them. But it did not hurt them, and never has; but, on the contrary, they were benefited by such inventions.

Now, my friends who are in favor of the Tavenner bill argue that scientific management is subject to abuse. It is. Every system is subject to abuse. If you have the flat day's work system and you have an unscrupulous employer, he may ask a man to do a day and a half's work in a day. All a man has to do is simply to stop working for such employer.

An employer that wants to treat his men badly can do it under one system as easily as another. It is policy and good business sense to treat laboring men fairly and squarely. Now, under this system it has not impaired the health of any employee. I have Gen. Crozier's statement upon that and I have the statement of the Secretary of War on that. He has ascertained that fact very carefully. They say it will overstimulate a man if you give him a premium. Just look at that a moment. If a premium was going to overstimulate a man if that man was working for himself, he would have the same incentive to overwork as he would if working for a premium. A man may sometimes overstimulate himself because he is working for a premium, but such men are exceptions, and laws are not made for the exceptions. Men are not created with equal capacity. A man that can do twice the work of another man ought to get pay for it. I say that a man ought to have the advantage of his talents, of his energy, and of his ability. And this time system and this premium system give him this.

Take, for instance, a paper mill. A paper machine costs $75,000. It is an important thing in that paper mill to have a man working at that machine that can work it most efficiently. Some men may not be adapted to certain work. They may put such a man at some other machine and he may do well at his new work. So they get the square man in the square place, and the result is we have greater efficiency, a greater output. I have testimony here that it would take me hours to read, showing how much the output is increased and how much more the laboring men are getting under it. And although I have not any accurate information about it, I believe that they are using the time study and premium system in a majority of the up-to-date manufacturing plants in the United States, and the evidence shows that where they have this time system, it shows this fact, that in those plants where they have scientific management they have decreased the hours of labor and increased the output, and at the same time they have increased the wages of labor.

Mr. KEATING. Was not the testimony before our committee with regard to the boot and shoe industry as an example, that less than 15 per cent of the boot and shoe manufactories of this country had the stop-watch system?

Mr. BROWNE. I think that is correct. And some lines have it completely. A large proportion of the automobile works have it.

Mr. KEATING. In the young men's clothing business the testimony showed that there was just one concern in the entire United States. Was not that true? It was so testified before our committee.

Mr. GORDON. You are mistaken about it.

Mr. KEATING. I am not mistaken about it.

Mr. BROWNE. Take the clothing industry. A man testified here, a Mr. Fiess. He showed how he had reduced the hours of labor to seven hours a day. He had increased the pay of the employees and increased his output. Just stop and think a minute. We are going into a great many undertakings in this naval bill. We are going to manufacture armor plate, and great emergencies may arise when we will need to use all efficiency methods known to increase and hasten our output, and should it be the policy of our Government at this time to say that we shall not use a system that is almost universally used by the private employers of the United States just because you can find employers who, maybe, are abusing the system? I can go to plants where they have the common day-work plan, where they have an unscrupulous employer who is abusing his laborers. I do not believe that the heads of great Government departments will abuse a system of this kind.

Gen. Crozier, Chief of the Bureau of Ordnance, states that in the various arsenals over which he has charge there are 6,194 employees. These employees work eight hours per day, and each employee has a 15 days' leave of absence each year with full pay, and receives the same wages as are paid for similar work in private works and in addition many receive premiums or bonuses.

Gen. Crozier testified before the Labor Committee that if the Tavenner bill became a law it would have the effect of abolishing all time study and premium work in the Watertown Arsenal, and in his opinion the labor cost would be doubled.

The following questions were asked Gen. Crozier when he testified, and answered by him as follows:

"Mr. DENISON. As a result of this system, have you had a chance to observe whether or not there is a decrease in the vitality of the employees, and whether it has an injurious effect upon the laborers themselves?

"Gen. CROZIER. It has not in the least. As I stated a moment ago, the records show that the percentage of accidents among the premium workers is less than among the day workers.

"Q. Does the application of the system result in eliminating the men or shifting them?—A. We have a great deal of shifting of the men. We have not discharged any man as a direct result of the system. We have never discharged a man because he could not come up to the system. (Hearings p. 169.)

"Q. General, what is your judgment, speaking with reference to these men, as to whether or not this system will result in decreasing their vitality and health?—A. I do not see the slightest reason why it should. You must remember that the effort which is made is only to ascertain what the workmen can do reasonably, or can be reasonably expected to do. In that respect it constitutes a safeguard, because without the system in any effort to establish tasks I do not see that we can do anything but resort to the pacemaker. If you have an employed pacemaker, he may be an exceptional man, and he would furnish the only standard you would have to go by in forming your expectation as to what a man should do. Even under this legislation this kind of a process would not be forbidden.

"Q. Let me ask this question: Do you think that the enactment of this law, if it should be enacted, would result in any embarrassment to the Government or in any decrease in its ability to meet the situation in case we should become involved in a war?

"Gen. CROZIER. I think it would have a great influence on it, because in that case we would have, in the first place, no accurate knowledge of what a day's work should be, what the output of the workman should be, or what we should require him to do, or what we should tell him to do to get a day's work.

"Q. Do you think you could get a factory to a high state of efficiency without the stop-watch system?—A. I think we could not reach a high state of efficiency without it. I do not believe I could have gotten the Watertown Arsenal up to its present state of efficiency without using the stop watch or some other equivalent time-measuring device.

"Gen. CROZIER. When the amendment carrying similar legislation to that which is now proposed was added to the Army bill last year in order to let the employees see what the effect would be, I gave it by order the same effect it would have if it became a law. I thereupon received a petition signed by several hundred employees of the Frankford Arsenal, where the premium payments were made, asking that my action be withdrawn. A part of the petition is as follows:

PETITION OF EMPLOYEES.

"FRANKFORD ARSENAL, *January 28, 1915.*

"CHIEF OF ORDNANCE, UNITED STATES ARMY:

"I believe that this system (referring to the premium system) has been eminently successful because, according to published reports, the manufacture of small-arms ammunition at the Frankford Arsenal presents a decided economy when compared with costs of the same ammunition procured from private manufacturers. Many of us, based upon the premium system of competition, have obligated ourselves to purchase homes, and if the premium rates are abolished, it means the loss of our homes to us.

"It is very probable that branch of Congress which passed this legislation had in view the interests of the employees, but we beg to differ on this very point. While the legislation prohibits rewarding us for our increased efforts which we give the Government, it does not prohibit an officer or foreman from requiring us to work just as hard as we are now working and for very much less compensation.

"The power of your authority, and that of your officers and your foremen to make us work harder, has not been lessened by this legislation, but you have been deprived of the opportunity of paying us for such increased work as you may give to us.

"We therefore ask you to submit this petition to the Secretary of War, with the recommendation that he transmit it to Congress for consideration and, we hope, favorable action.

"Signed by several hundred workmen." (Hearings, p. 163.)

About March 8 premium payments were restored at the Frankford Arsenal. Maj. Shinkle, who was in charge of the cartridge branch of the arsenal, wrote to Gen. Crozier as follows:

"DEAR GENERAL: When your restoration of premium payments was announced in the cartridge factory there was a complete change in the whole atmosphere of the building. Pessimism gave way to optimism, dissatisfaction to complete contentment.

"There never was a better illustration of the fact that the premium system, when administered in the interests of the employees, is one of the greatest stimulus for the moral, physical, and financial well-being of the employees, etc. (Hearings, p. 185.)

GIVING THE MAN A CHANCE, GIVING HIM INSPIRATION, MAKES A MAN OUT OF HIM INSTEAD OF A MACHINE.

"The social gain of the workman from scientific management is greater even than the financial. He secures the development and rise in self-respect, the satisfaction that his work, which in almost every line of human activity, accompanies great accomplishment by the individual. Eagerness and interest take the place of indifference, both because the workman is called upon to do the highest work of which he is capable and also because in doing this better work he secures appropriate and substantial recognition and reward.

BRANDEIS FAVORS BONUS SYSTEM.

"The money reward for the individual workman's high accomplishment is ordinarily and probably most effectively distributed by means of a bonus system. The bonus system under scientific management has proved itself to be perhaps the most appropriate method of securing to labor its proper reward and perpetuating full cooperation between employer and employee.

SCIENTIFIC MANAGEMENT HELPS CONSUMER.

"Experience in trade has shown that except where there is a close unregulated monopoly the public always secures some part of the benefit gained by reduced cost of production. The reduced selling price comes ordinarily, not as a voluntary concession, but because the demand of the consumer for lower prices proves irresistible in competitive or publicly regulated business."

SCIENTIFIC MANAGEMENT AND LABOR UNIONS.

Mr. Brandeis believes in and has been as great a friend of organized labor as any man of this generation. He says in his brief:

"The claim has been made that scientific management and labor unions are inconsistent; that the organization of labor present insuperable obstacles to the introduction of scientific management in railroads and other industries where unionism is potent. This claim, we believe, is wholly unfounded in fact.

"Collective bargaining is alike an important factor under scientific management as under the old system.

"Unionism does not prevent the introduction of scientific management. It is true that unions, in some trades, have bitterly opposed the introduction of the piece rate or the bonus system without scientific management, just as other unions have opposed the day rate system without scientific management. And very intelligent labor leaders have from time to time objected, and objected properly, to ruthless methods of speeding up; but, as shown above, speeding up is not scientific management.

"It will always require tact and patience to introduce radically new methods, whether the persons to be effected are organized or unorganized workers."

SCIENTIFIC MANAGEMENT APPLICABLE TO ALL BUSINESS.

"Experience has already demonstrated that the principles of scientific management are generally in their application, and can be introduced into practically all businesses, and all departments of any business. They have been successfully applied in private competitive business, like machine shops and factories, steelworks and paper mills, cotton mills and shoe shops, in bleacheries and dye works, in printing and book binding, in lithographing establishments, in the manufacture of typewriters and optical instruments, in construction and engineering work."

Mr. Brandeis produced evidence of the success of scientific management in many different industries, and offered to continue further, when Commissioner Prouty of the Interstate Commerce Commission said:

"Mr. Brandeis, you can hardly add anything to your case by calling the representatives of some other industry and showing these same principles have been applied there. It is perfectly evident that if they

have been applied in one case, they can be applied in another analogous case."

Dr. H. S. Person, director of the Amos Tuck School of Administration and Finances of Dartmouth College, Hanover, N. H., writes as follows:

"I have never been in charge of an industrial plant, nor have I practiced management engineering, therefore what I have to say is not based upon that sort of experience. I have, however, in order to acquaint myself with scientific management for the purpose of instruction, visited many plants, talked with workmen, and made observations particularly with respect to the effect of scientific management upon the workmen. My conclusions are as follows, with respect to the Taylor *system of management* in which is used the stop watch for time study and in which is applied some form of premium of bonus wage payment:

"The happiness of the worker is greater than under conventional management.

"The health of the worker seems to average better than under conventional management.

"The statistical record of accidents shows that they are less under the Taylor system of management.

"Wages are greater for a given expenditure of time and energy.

"Hours of labor vary in different plants according to the industry, but for any given industry seem to be less than the average of that industry.

"The output is greater per hour of application of labor.

"The unit cost of the product is less than under conventional management.

"The quality of product is better than under conventional forms of management, for the reason that its method of inspection eliminates defective work."

Tabor Manufacturing Co., Philadelphia, Pa.: Records examined by Mr. Godfrey, now president of Drexel Institute, show 73 per cent increased wages and 25 per cent reduction in selling price.

Eastern Manufacturing Co., Bangor, Me., by Mr. F. R. Ayer, vice president and general manager: Workers more satisfied; weekly earnings for employees increased 25 to 50 per cent; hours reduced from 10 to 9; increase in output, 20 to 75 per cent; cost reduced 10 to 25 per cent; quality of product improved.

Lewiston Bleachery & Dye Works, Lewiston, Me., by Mr. D. N. Bates, agent: Wages increased 25 per cent; rest periods given to workers; women quit work one-half hour earlier than men; accidents decreased; output increased by improved machine and methods, about 60 per cent; by training operators and bonus, 40 per cent; cost reduced about 40 per cent; workers anxious for a bonus.

H. H. Franklin Manufacturing Co., Syracuse, N. Y., by Mr. G. D. Babcock, product manager: Increase in wages, 36 per cent—20 per cent above average wage in locality; hours reduced to 50 per week; reduction in sale price of our product for improved quality, 32 per cent.

Hermann, Aukan & Co., Lebanon, Pa., by Mr. D. J. Walsh, jr.: Labor turnover reduced; sanitary conditions improved; increase of wages of 25 to 75 per cent; increase in production, 150 per cent, largely through the combination of planning and bonus incentive; direct cost of production somewhat reduced; quality bettered. The operators in one department requested that bonus work be established in their department, so as to give them a chance to earn as high wages as the operators now on bonus.

Smith & Furbush Machine Co., Philadelphia, Pa., by C. W. Schwartz, jr., general manager: Twenty to twenty-five per cent premiums earned; output increased; gross cost, including expenses, about the same with much greater uniformity of cost and more accurate cost in detail; quality better; scolding eliminated.

Packard Motor Car Co, Detroit, Mich., by S. S. Beall, vice president of manufacturing: Happiness increased; have been requested by men to set standard times; average premium, 27 per cent of day wages; hours of labor shortened by premium system; output increased; quality of products maintained.

Knox Motors Co., Springfield, Mass., by F. E. Doolittle, superintendent: Happiness of operators greatly increased; better physical and mental condition; more work accomplished in eight hours under bonus system than in nine hours on straight time; output greatly increased; cost considerably cheaper; quality equally good.

Acme Wire Co., New Haven, Conn., by Ralph W. Langley, works manager: Wages of employees increased 25 per cent; records prove no increase in accidents; no injury to health; output increased 25 to 50 per cent; cost diminished; quality of product improved; bonus earnings frequently deposited in savings bank.

Plimpton Press, Norwood, Mass., by A. E. Barter, superintendent: Workers happier through the setting of definite tasks; health improved and accidents decreased; wages increased 20 to 30 per cent, with average wage increased much more than this through the more continuous employment, which is a direct result of time study; capacity of plant increased; standard of quality improved rather than lowered.

New England Butt Co., Providence, R. I., by J. G. Aldrich, president: Employees anxious to have time studies made; accidents less; wages at least 35 per cent higher; output considerably more on work which has been time studied; cost of product considerably less; quality of product is in general better under time-studied work.

Sewell-Clapp Envelope Co., Chicago, Ill., by R. B. Frazer: Wages based on time study increased 15 to 25 per cent; hours of labor planned to be reduced; increase in output up to 100 per cent. In a recent offer of special preferred stock the first purchasers were men who were working on bonuses.

Waverley Press, Baltimore, Md., by Edward B. Passano, president: Increase in production 33⅓ per cent; operatives earning 33 to 50 per cent more; apparently satisfied and in good health.

Clothcraft Shops, Cleveland, Ohio, by Richard A. Feiss, general manager: Happiness improved; health of workers improved, as shown specifically by average of absentees only 1.4 per cent; accidents formerly quite numerous reduced to practically nothing; wages largely increased; hours of labor reduced from 54 to 48 and overtime practically eliminated; output increased; cost substantially lessened, although wages enormously increased; accurate standards of quality have been set through stop-watch observations.

Eaton, Crane & Pike Co., by William N. Eaton, secretary and treasurer: Increase in wages 15 per cent; hours reduced 10 per cent; greater confidence because employee knows task set by scientific study of methods and time is accurate; health benefited through the shorter hours; greater ease in doing work; rest periods and greater happiness because of wage increase; accidents decreased materially; output increased 22 per cent; quality of product improved.

[Col. Wheeler, p. 74.]

REDUCTION IN COST OF LABOR AND MATERIALS DURING DEVELOPMENT OF SCIENTIFIC MANAGEMENT.

During the development of the new scientific management at the Watertown Arsenal, the cost, not only of labor but also of material, in making sets of parts for the alteration of 12-inch mortar carriages (for short guns) was gradually reduced, "so that we have this result, that the direct labor cost per set was reduced from $480 to $275 per set. The shop expense cost was reduced from $335 to $332 per set, and the material cost was reduced from $785 to $362 per set."

[Col. Wheeler, p. 93.]

DECREASE IN COST OF GEARS UNDER PREMIUM SYSTEM.

Referring to a case where a man was required to cut teeth in 17 steel gears: "As a result of the time study on this work, this man was told that the work ought to be done in 71 minutes, and that if it was done in 71 minutes he would get a premium of 33⅓ per cent. * * * Adding 66 per cent to that time made the time 120 minutes per gear within which he could earn a premium, his saving in time being shared by the arsenal. This man completed the 17 gears in 1,356 minutes, whereas his total allowance was 2,040 minutes, and he earned a premium of approximately 25 per cent. In executing this work under this system he reduced the cost of each gear from $2.41 to $1.06, or a saving per gear of $1.35."

[Gen. Crozier, p. 935.]

EMPLOYEES INCREASED EARNINGS AT PIECEWORK OVER DAY RATE, ARSENAL.

At the arsenal in June, 1911, one miller whose day rate was $2 averaged at piecework $3 a day; that is, his percentage of increase averaged 50 over and above his day rate.

Eighteen millers whose day rate was $1.75 each averaged at piecework $2.63 each; that is, their percentage of increase was 50.28.

Four millers whose day rate was $1.50 each averaged at piecework $2.02 each, their percentage of increase being 34.66.

Two millers whose day rate was $1.25 each averaged at piecework $2.23 each, their percentage of increase being 78.40.

In a group of 25 millers the increased earnings at piecework over their day work averaged from 34.66 to 78.40 per cent.

Fifteen millers whose day rate was $2.50 each averaged at piecework $3.09 each, their percentage of increase being 23.60.

Two profilers whose day rate was $2.75 each averaged at piecework $3.12 each, their percentage of increase being 13.45.

Twelve profilers whose day rate was $2.50 each averaged at piecework $3.09 each, their increase being 23.60 per cent.

Two profilers whose day rate was $2.25 each averaged at piecework $2.63 each, their percentage of increase being 16.88.

Another trade, polishers. One polisher whose day rate was $3.25 averaged at piecework $3.60, an increase of 10.76 per cent.

Eighteen polishers whose day rate was $3 each averaged at piecework $3.59 each, their increase being 19.66 per cent.

Eighteen polishers whose day rate was $3 averaged at piecework $3.55, their increase being 18.33 per cent.

The object of that is simply to show, as stated at the time to the witness, that the rates are such that men, by the extra effort intended to accompany piecework, may make this percentage over and above their day rates.

[Gen. Crozier, p. 1198.]

MACHINISTS UNDER NEW SYSTEM ARE REDUCING COST TO A NOTABLE EXTENT—EXAMPLES GIVEN.

With reference to the length of time that is required for making studies by the use of the stop watch, it is now reported from the Watertown Arsenal that the use of the stop watch in setting the time for the turret lathe work has practically ceased, and that the same condition is being approached in reference to the engine lathes—that very few time studies indeed have been made since the 1st of November in the foundry—although I think there are now working in the foundry, and have been for a month or two past, pretty nearly 75 per cent of the molders under the new system, and have given them compensation under that system. In the machine shop they have been working something like 20 per cent of the machinists under the new system. These men have been doing very well. They have reduced the cost of things. They have kept on reducing the cost of things to a notable extent.

[Gen. Crozier, p. 1204.]

EXAMPLE OF FLOOR JOB IN FOUNDRY—REDUCTION OF OVER 41 PER CENT.

Now, I wish to give an example of a little different kind. Mr. O'Leary asked me about a bench job, so I gave him an example about a bench job. Now, here is an example of a floor job in the foundry, the molding of the elevating arms for a 6-inch disappearing gun carriage. The elevating arm is an affair shaped something like this [indicating]. It is intended to raise and lower the breech of the gun It is pivoted at its lower end about an arbor and its upper end embraces the trunnions of a band which is placed on the gun near its breech, so that by raising and lowering this arm the breech of the gun is raised and lowered. It is about 6 or 7 feet long, and the spread is perhaps 20 inches up at the top.

That, of course, was a larger job than the one I mentioned a moment ago, and the cost of it under the day-work method was $42.35. After a time study had been made of it the cost was reduced to $24.87, making a saving of $17.48, which was 41 and something over per cent of the original cost. The saving represented a sum of $9.94 a day to the Government. The man's pay was increased from $3.52 to $5.02, which was an increase of 42⅝ per cent.

OFFICE OF THE POSTMASTER GENERAL,
Washington, D. C., May 18, 1916.

Hon. EDWARD E. BROWNE,
House of Representatives, Washington, D. C.

MY DEAR MR. BROWNE: With reference to your letter of April 28, asking for my views in regard to H. R. 8665, entitled "A bill to regulate the method of directing the work of Government employees," you are informed that it is my opinion that the enactment of the above-mentioned bill into law would be prejudicial to the best interests of the Post Office Department and Postal Service. I inclose herewith copies of memoranda submitted by several of my assistants covering the subject in detail.

Very sincerely, yours,

OTTO PRAEGER,
Acting Postmaster General.

POST OFFICE DEPARTMENT,
FIRST ASSISTANT POSTMASTER GENERAL,
Washington, May 10, 1916.

CHIEF CLERK,
Post Office Department:

It is my opinion that the attached bill (H. R. 8665) should be opposed by the department. It is reactionary in character and, if enacted, would prove a bar to the adoption, in the administration of the service at large as well as in the department, of methods and practices which

are recognized as sound and proper by all progressive and intelligent business executives.

It may be true that the methods and practices against which the bill is directed, if wrongly applied or left to the discretion of inexperienced supervisory officers, might work hardship and injustice on employees, but this is no justification for condemning and proscribing the general scheme and the principles on which it rests.

"Scientific management" rests upon the theory that intelligent and effective supervision of labor is possible only when the supervisory officer possesses definite knowledge of the time which ought to be consumed by a reasonably efficient man, under reasonably efficient conditions, in the performance of a given task. It recognizes, naturally, the variations in capacity that will be found among different workmen. It merely fixes standard times as a result of actual tests under ordinary conditions and presupposes that different employees may fail to attain the standard, may attain the standard, or may exceed the standard, depending upon their ability and the conditions surrounding the particular job. Under scientific management, where properly and intelligently applied, there are usually two standards—(1) the standard of performance which may reasonably be expected of an efficient employee under efficient conditions, and (2) a standard of performance below which no employee may fall without jeopardizing his salary or position, subject, of course, to exception when the inefficiency is due to conditions over which the employee has no control, such as defective machines, tools, etc., or, in the case of the Post Office Service, defective distribution cases, bad light or ventilation, poor space arrangements, etc.

Scientific management not only enables the employer to eliminate the totally inefficient, but enables him to ascertain definitely the employees who are below the standard of efficiency so that he may endeavor to develop them and also to determine the question of adaptability with respect to different employees.

So far as the Post Office Service of this bureau is concerned, there has been no complete application of all of the principles of scientific management, although it is believed that the tendency should be toward the adoption and application of such principles. We have, however, endeavored to apply, in a restricted way, several of the principles and practices—for example, the efficiency rating system promulgated by general circular in November, 1908. This system was the original step in the direction of scientific efficiency ratings but is now obsolete, and the department has had under consideration for several years the question of improving it. Without some standard of performance and method of ascertaining the performance of different clerks and carriers, even the present crude efficiency rating system could not be applied to our service. The time element is most important, and whether a stop watch is used or not, it is necessary to ascertain the time required by a clerk or carrier to handle the mail distributed to him or to perform other duties to which he is assigned. The broad language of the Tavenner bill proscribing the use of a stop watch or "other time-measuring device" appears to prohibit any method of calculating the time taken by the clerk or carrier to perform his work.

In the City Delivery Service we have adopted recently certain standards of work. For example, our system of determining the reasonableness of office time of carriers consists of a comparison of the time required by the carrier actually to perform his work and the time which he ought to have required based upon standards of 16 letters and 6 papers per minute for two-trip carriers and time allowances for miscellaneous duties. Although the comparison is arrived at as a result of a deductive method, it is, nevertheless, a "time-measuring device." With respect to the street work of carriers, the time element is important again, and the average performance of the carrier, for purposes of comparison, is set up against the actual time consumed by the carrier when accompanied by a foreman or roundsman. The foreman frequently uses not only his ordinary watch and a pedometer but frequently, I believe, equips himself with a stop watch as well as a counting device to determine the number of stops, etc., the carrier may make and the time he consumes per stop. These practices in the City Delivery Service, although somewhat crude as compared with the methods and practices employed in modern industrial plants, are of the nature of scientific management and they, as well as improved methods of their kind, are necessary if we are to arrive at anything like good efficiency in the City Delivery Service.

It is believed, moreover, that the tendency should be toward the adoption of a device or method which will more exactly determine the time consumed by both clerks and carriers in the performance of the different kinds of work assigned to them. Standards of work have not been so generally applied in the case of post-office clerks. Even here, however, it has been necessary, in order to comply with the law requiring that promotions be based on efficiency ratings, to conduct case examinations to determine the speed and accuracy of which distributors are capable. These tests are essentially time studies, and the results are used for making up efficiency ratings. The next step will be to make a comparison between the standards established by these tests and the actual day-to-day performance of the clerks. In other words, the "stop watch" or "time-measuring device" principle is already a necessary feature of the management of post-office clerks, and the principles of "scientific management" are the means by which the next great advance in post-office efficiency is to be accomplished.

Time tests are absolutely essential to the determination of intelligent standards, and the more definite and exact the standards are the surer the employee will be of fair treatment. In our service, with its many thousands of employees and hundreds of supervisory officers, it is absolutely necessary, in the interest of fair treatment for the employees, that some definite method be adopted for the ascertainment of output and the determination of standards for comparison with output. Whether the standards are determined according to a definite plan and stated in writing or whether they are merely the ideas of different supervisory officers based upon opinion or judgment, the fact remains that standards are necessary and do exist for comparison with output. Unless the standards are determined as a result of time tests of specific work under a uniform method or plan they will result from the observation and judgment of supervisory officers, and this observation and judgment will be of as many degrees of intelligence and accuracy as there are supervisory officers.

Furthermore, standards are essential to the intelligent administration of the service by the department, for without standards of performance and information as to the measure in which the standards are attained by the employees of different offices the department has no intelligent way to determine whether an office is overmanned or undermanned.

It is my judgment that the enactment of the Tavenner bill would be prejudicial to the best interest of the Post Office Department and the Postal Service.

DANIEL C. ROPER,
First Assistant.

POST OFFICE DEPARTMENT,
SECOND ASSISTANT POSTMASTER GENERAL,
Washington, May 15, 1916.

CHIEF CLERK,
Post Office Department:

Reference is made to the letter dated April 28, 1916, from Hon. EDWARD E. BROWNE, asking the views of the Postmaster General with reference to bill H. R. 8665, entitled "A bill to regulate the method of directing the work of Government employees." The bill, in part, prohibits any person having charge of the work of any employee of the United States Government from making with a "time-measuring device a time study of any job of any such employee between the starting and completion thereof, or of the movements of any such employee while engaged upon such work."

It would be impracticable to satisfactorily administer the Railway Mail Service under such prohibition. The work of the Railway Mail Service consists largely in the distribution of mail on moving trains, and the service must be adjusted to the train operation; therefore it is impossible to organize it on the basis of eight hours' work for every week day on every railway postal clerk's run. There are many long train runs on which the railway postal clerks to properly perform the service must be on duty for considerably more than eight consecutive hours, and this is offset by giving the clerks days off duty alternating with days on duty, the length of the time off duty to depend upon the number of hours of work performed by the clerk during the days when he is on duty. To accomplish this, there must be a "time study" of every railway postal clerk's run, to include the hours when he is on the train, the time devoted at terminals to loading, unloading, going to and from post offices, delivering and receiving registered mail, extra time on account of delayed trains, and extra work to meet emergencies; otherwise it would be impossible to determine what would be a reasonable assignment for a railway postal clerk in any given case. Again, railway postal clerks work in postal cars by themselves, in many cases a long distance from the headquarters of their supervising officials, and in order to determine how many clerks should be assigned to a run a "time study" must be made as to the number of pieces or packages of mail to be distributed and handled within the limit of time available on the particular trains; otherwise too much or too little work might be required of a clerk; and if, by reason of no "time study" having been made, insufficient clerical force was provided, the mail would not be distributed, its delivery would be delayed, and the public service would suffer.

The preamble of the bill indicates that the proposed legislation is intended to be in the interest of Government employees, but if applied to the Railway Mail Service it would be detrimental to the interests of the employees, because without a "time study" of the work and conditions of each railway postal clerk's run there would be danger of employees being placed in assignments requiring of them excessive hours of duty and unreasonable amount of work. On the other hand, they might be placed in assignments where the average number of hours per day and the amount of work performed would fall much below a reasonable standard; therefore I recommend that the bill be not enacted into law, its provisions being contrary to the interests of the public service and of the Government employees as represented by the Railway Mail Service.

OTTO PRAEGER,
Second Assistant.

POST OFFICE DEPARTMENT,
FOURTH ASSISTANT POSTMASTER GENERAL,
Washington, May 17, 1916.

CHIEF CLERK,
Post Office Department:

Referring to bill H. R. 8665, entitled "A bill to regulate the method of directing the work of Government employees," your attention is invited to the inclosed communication from the Superintendent of Rural Mails, the contents of which are indicative of the attitude of this bureau toward the provisions of the bill

It is not the present practice of this bureau to use any time-measuring device in determining the efficiency of any of the employees under its supervision, but the necessity for inaugurating a new system, involving the use of a timing watch, may arise at any moment. This is especially true with respect to accounting, cost keeping, and certain features of the rural-delivery carrier service, and it is exceedingly important that such improvements as may be made in the Postal Service by means of a time-measuring device be not rendered impossible of accomplishment by the enactment into law of the provisions contained in the Tavenner bill.

J. K. PICKETT,
Acting Fourth Assistant.

POST OFFICE DEPARTMENT,
FOURTH ASSISTANT POSTMASTER GENERAL,
Washington, May 17, 1916.

CHIEF CLERK, *Fourth Assistant:*

With reference to the attached bill entitled "A bill to regulate the method of directing the work of Government employees," which in part prohibits any person having charge of the work of any employee of the United States Government from making a time study of any job of any such employee, I have to state that the enactment of any legislation which would divest the executives of the United States Government Departments of all authority to introduce any system intended to determine the amount of work performed by an employee in a given time, or the length of time required by an employee to complete a given job, would have a vicious effect upon the conduct of the public business, since such legislation would place a premium on slothfulness and tend to encourage sluggishness and indifference on the part of employees.

I fully concur in the statements of the First Assistant and the Second Assistant, which appear in the attached communications.

GEO. L. WOOD, *Superintendent.*

Mr. KEATING. I want to ask unanimous consent that my colleague [Mr. NOLAN] may proceed for 15 minutes.

The CHAIRMAN. Is there objection?

Mr. MANN. Can not we limit the debate then on the amendment?

Mr. BROWNE. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MANN. Reserving the right to object to the request of the gentleman from Colorado——

Mr. KEATING. There are about four gentlemen over here that would like about five minutes apiece.

Mr. MANN. I have not any doubt of that. Still, let us see if we can not reach an agreement as to time, anyhow.

Mr. KEATING. I would like to do that, as far as I am personally concerned.

Mr. MANN. Because there are other amendments and the time is limited.

Mr. KEATING. I would like to discuss this matter, but I am perfectly willing to enter into any arrangement that these other gentlemen who are anxious to present their views——

Mr. OLIVER. I would call the attention of the minority leader to the fact that the chairman of the committee, the gentleman from Tennessee [Mr. PADGETT], is absent.

Mr. MANN. I understand, but the chairman of the committee made a request for 20 minutes on a side. That was objected to, and then 20 minutes was given to the gentleman from Wisconsin [Mr. BROWNE] and an additional 5 minutes. I think it was understood then that some time would be occupied on the other side.

Mr. KEATING. That would be 25 minutes on each side.

Mr. PADGETT. Has there been a proposition made as to an agreement as to time?

Mr. MANN. There have been 27 minutes used by the gentleman from Wisconsin [Mr. BROWNE].

Mr. PADGETT. How much time did you want on your side?

Mr. MANN. We want to have a limitation.

Mr. PADGETT. You have used 25 minutes.

Mr. MANN. Twenty-five minutes.

Mr. PADGETT. And they want 25 minutes on this side?

Mr. MANN. So that it can be yielded as you want it.

Mr. PADGETT. Mr. Chairman, I ask unanimous consent for 25 minutes of time.

Mr. SHERLEY. Mr. Chairman, I do not know of any more important matter that is going to come up, because the vote here is going to determine the vote on the fortifications bill and a number of other appropriation bills. There are two or three letters here which I have received from the War Department that I would like to call to the attention of the committee, and I would like to speak at least five minutes. I do not want to delay the committee, but I am sincere in the belief that this matter is important enough to be thrashed out.

Mr. PADGETT. Suppose you take 10 minutes more on your side?

Mr. MANN. I would rather take five. We have some more amendments. I realize the importance of this amendment, and I would like to discuss it the rest of the afternoon.

Mr. PADGETT. There are some over here that want some time on the matter.

Mr. MANN. The gentleman knows that the time is fixed. Various gentlemen are waiting to offer amendments.

Mr. PADGETT. Does the gentleman say the time has been fixed on the bill?

Mr. MANN. Yes.

Mr. MOORE of Pennsylvania. All these amendments will be precluded at 2 o'clock to-morrow.

Mr. PADGETT. It has been suggested that we just let it run for the present.

Mr. MANN. I am willing to agree that there be 30 minutes on that side and 5 minutes on this side.

Mr. PADGETT. Then I ask unanimous consent that we have 30 minutes on this side and 5 minutes additional on the other side, and that the Chair control the time.

Mr. SHERLEY. I do not know what you mean by "this side" and what you mean by "that side." I want to speak on the amendment. I do not care where I get the time so that I get it.

Mr. PADGETT. I suggest that the Chair control the time.

Mr. MANN. Some gentlemen want more than 5 minutes. I suggest that the gentleman from Tennessee [Mr. PADGETT] take 30 minutes and that I have 5 minutes.

Mr. PADGETT. That would give you 30 minutes in all.

Mr. MANN. No; I say 30 minutes to the gentleman from Tennessee and 5 minutes to myself.

Mr. PADGETT. I ask unanimous consent, then, that the debate on this amendment and all amendments thereto close in 35 minutes, 5 minutes to be controlled by the gentleman from Illinois [Mr. MANN] and 30 minutes by myself.

The CHAIRMAN (Mr. WHALEY). The gentleman from Tennessee asks unanimous consent that debate on this amendment and all amendments thereto be closed in 35 minutes, that 30 minutes be controlled by himself and 5 minutes by the gentleman from Illinois [Mr. MANN]. Is there objection?

Mr. KEATING. Reserving the right to object, does that give my colleague from California, Mr. NOLAN, 15 minutes?

Mr. PADGETT. No; it could not give him 15 minutes. I was going to say that I would yield to the gentleman from Colorado 20 minutes of that time, and the gentleman from Ohio [Mr. GORDON] 5 minutes, and to the gentleman from Kentucky [Mr. SHERLEY] 5 minutes.

Mr. KEATING. Under that arrangement the supporters of the arrangement would have 40 minutes and those who support the original proposition of the bill would have only 20 minutes. That is not a fair division.

Mr. MANN. Not quite, Mr. Chairman. If that arrangement was made, I should yield to the gentleman from California [Mr. NOLAN] the five minutes on this side. I do not say that is fair. I am not undertaking to pass upon that.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

Mr. KEATING. Reserving the right to object——

Mr. PADGETT. Mr. Chairman, if that request is objected to, I do not know of anything except to let it run——

Mr. SHERLEY. I think we can arrange it easily. There ought to be an equal division of time, of course. I understand that gentlemen have had 20 minutes.

Mr. MANN. Twenty-five.

Mr. SHERLEY. Twenty-five by the clock; but there were interruptions.

Mr. MANN. No; he had 25 minutes.

Mr. SHERLEY. Two or three minutes were lost in getting order. How much time does the gentleman from California want?

Mr. NOLAN. I want 15 minutes.

Mr. SHERLEY. And the gentleman from Illinois wants 10.

Mr. KEATING. The gentleman from Illinois, who speaks on the post-office feature of it, wants five, and I should like five myself.

Mr. SHERLEY. If you run it 35 minutes, with 15 minutes additional on the other side, that would make 50 minutes additional time.

Mr. MANN. I submit that that ought not to be done. There are other amendments to be offered, and the committee has an amendment that is coming up to-morrow morning. There are only three hours to-morrow before the vote.

Mr. SHERLEY. I do not care. I simply feel that there are some matters that I ought to present.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee [Mr. PADGETT]?

Mr. KEATING. I shall have to object, unless we can get more time.

The CHAIRMAN. Objection is made.

Mr. NOLAN. I renew my request that I be allowed to proceed for 15 minutes.

The CHAIRMAN. The gentleman from California renews his request that he may proceed for 15 minutes. Is there objection?

Mr. MANN. I am not willing to concede that, unless we can fix the time for debate, which, I think, we ought to do, because there are other gentlemen in the House beside these who want to discuss this amendment. They want to offer amendments. I ask unanimous consent that the gentleman from Colorado have 30 minutes and that I have 5 minutes, and that at the end of that time all debate close.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that all debate on this amendment and amendments thereto close in 35 minutes, 30 minutes to be controlled by the gentleman from Colorado and 5 minutes by himself. Is there objection?

There was no objection.

Mr. KEATING. I yield 15 minutes to the gentleman from California.

Mr. GORDON. Will the Chair please state what that agreement was?

The CHAIRMAN. That debate on this amendment and all amendments thereto close in 35 minutes, 30 minutes to be controlled by the gentleman from Colorado [Mr. KEATING] and 5 minutes by the gentleman from Illinois [Mr. MANN].

Mr. FITZGERALD resumed the chair.

The CHAIRMAN. The gentleman from California [Mr. NOLAN] is recognized for 15 minutes.

Mr. NOLAN. Mr. Chairman and gentlemen, this is a very important section of the naval appropriation bill. A similar provision was included in the Naval and Army appropriation bill in the last session of Congress after considerable discussion. I had the good fortune to sit as a member of the Committee on Labor during the Sixty-third and Sixty-fourth Congresses and to hear the testimony on the Dietrich bill, and in this Congress on the Tavenner bill, which strikes at the stop-watch time study and premium and bonus systems as employed in Government establishments.

During the consideration of the Tavenner bill the efficiency engineers of this country had the opportunity of presenting their case to the House Committee on Labor. It was brought out during the testimony of those gentlemen that the efficiency engineers of this country had formed an organization with headquarters in New York and had solicited funds and started a propaganda campaign throughout this country to prohibit the inclusion in the Army and Navy and fortifications appropriation bills of any prohibition of the stop-watch time study and premium and bonus systems. I do not take issue with those gentlemen. That is their profession. They are making a living at it; but they have started a propaganda throughout this country, and they have Members of Congress deluged with an avalanche of telegrams and letters protesting against this provision in the naval appropriation bill.

Now, these gentlemen testified before the House Committee on Labor, and with all due respect to the gentleman from Wisconsin, I do not know whether he read all of the testimony that took place before the committee or not, but I know that he was not present at most of the hearings and did not have the opportunity to hear the testimony of those in favor of the Tavenner bill. I happened to be present on each and every occasion.

The fact was brought out before the Committee on Labor that not one of the gentlemen who appeared and represented himself as an efficiency expert and a scientific management engineer had ever had any practical shop experience, not one. They were all graduates of some technical institute and took up the question of scientific management after they had their experience in some particular school or institute of technology, but not one had ever had any practical shop experience. If Members of the House had an opportunity to read all of the hearings that took place before the Committee on Labor, I doubt whether there would be a small minority here that would not say that the efficiency engineers were the best witnesses for the Tavenner bill.

I have here some charts prepared by Mr. Minor Chipman from records of work done on different jobs at the Watertown Arsenal. They are included in the hearings before the Committee on Labor. I want to call your attention to these charts. If there is anything in the claim of the gentleman that the stop watch is a scientific device in measuring the element of time as it pertains to the labor of the individual, here is complete evidence that it is not accurate, but inaccurate. Here is a chart of an employee, 2516. It is his record of efficiency for the month of March, 1914, when the system was in full force, and this employee worked on 224 jobs. The highest point he struck that month was 200 per cent, and the lowest 21 per cent. Just imagine; on one job he performed it in half the time and on the other he only performed one twenty-first of it in the time set by the time-study men for scientific management by the stop watch.

I call your attention to it to show the variations. That is supposed to be 100 per cent, this line on the chart. That is the task set; and look at the variation up and down here, shown by this line. That employee was one of the highest skilled men in the Watertown Arsenal, and on one job he gets 200 per cent and in the other 21 per cent. I call your attention to that to show you the inaccuracy of the so-called stop-watch system.

Mr. STAFFORD. Will the gentleman give the average that the man had?

Mr. NOLAN. His average was 121.35. Now, here is the same man's chart, April, 1914, for efficiency on 140 jobs. His highest was 172.9 and his lowest was 45; his average was 121 per cent. That is the chart for the following month.

Here is a chart—and these were taken from the records of the Watertown Arsenal—of an employee that was not listed as a highly skilled mechanic. It is his efficiency chart for one year. The highest point he reached was 149 and the lowest was 33.3, and the average for the year was 96. Now, these gentlemen claim that it was absolutely essential that they should have the use of a stop watch as a time-measuring device for setting the task. This chart shows the inaccuracy of it. If the time-study men were accurate and the stop watch must be accurate, there would be hardly any deviation below or above the line. They would not go to 21 below in one instance and 33.3 in the other.

They have tried to create an impression that this particular time service and abolition of the stop watch and the bonus and premium system in Government establishments is a blow at national efficiency. I want to call attention to this fact. There is nothing in this bill that prohibits any sort of facilities, whether it happens to be machinery or a system of scientific management, applied in a common-sense way. The purpose of this provision in the naval bill is to stop the speeding up of the individual so that they can not take the last ounce of energy and strength away from him without any attention or consideration being paid to fatigue studies or the effect on those human elements involved.

Mr. GORDON. Will the gentleman yield?

Mr. NOLAN. Yes.

Mr. GORDON. How does keeping the measurement of time that a man consumes at a given task speed him up?

Mr. NOLAN. By the stop watch they study every motion that is made, taking time by the one-hundredth of a second; they take the time of the individual selected first and then make the average man come up to it.

Mr. GORDON. How do they make them?

Mr. NOLAN. They set the task and require him to do it or else he loses his job, and they admit they make no provision for the man that falls by the wayside under this system.

Now, let me proceed on the proposition of the bonus and premium. There are many people in the country that object to any restriction on the bonus and premium system. Let me call your attention to what transpired before the committee. A simple example was given the efficiency experts, and I will give it to the House to show you how men are paid. The question was asked the efficiency engineers, Suppose you were called on to install an efficiency system in a shoe factory and you found a group of men were making five pairs of shoes at $8 a day. After applying all the elements of scientific management and efficiency you decided that eight pairs of shoes at $8 a day was a fair task, and eight pairs of shoes was the task. What would you pay the individual for the ninth pair of shoes? That ought to be simple enough. You would think that the workman would get as much for the ninth pair as he got for any one of the eight. Here is the answer: "We would pay him 33⅓ to 50 cents for the ninth pair of shoes." These experts claimed, and the hearings will bear out my statement, that notwithstanding the fact that the employer secured an additional output of three pairs of shoes for the $8, due to the establishment of the efficiency system, that he should be further rewarded by getting anywhere from one-half to two-thirds of additional production over and above the eight pairs of shoes, and that the worker, instead of receiving the same rate for the ninth pair as he received for each one of the first eight, should have his price reduced from 50 to 66⅔ per cent.

That is how the premium and bonus system is applied; that is how it is applied in the Watertown Arsenal, according to the testimony of Gen. Crozier. Talk about employees being satisfied to work under it! In 1911, I believe it was, or 1910, a strike took place against this system at the Watertown Arsenal, and one of my colleagues in the House was a member of the committee that investigated conditions up there. The men were induced to return to work on account of this investigation, and while the committee that conducted the investigation did not denounce the system in its entirety, they called attention to the fact that abuses crept in under it, and they did not think at that time it was necessary to recommend any legislation. Since that time the employees in the Watertown Arsenal have been petitioning and protesting against this system. I have a letter here, not an inspired letter but a letter in which 194 of the lower paid employees of the Watertown Arsenal wrote me indorsing the minimum wage bill which I introduced and which is before this House, and here is what they conclude:

> We believe that you will do your best to make the Nolan bill a law. The 194 petitioners of the Nolan bill, with many others working here, also pray to have the Taylor premium system abolished in this arsenal as being detrimental and a menace to our best mutual good.

I withhold the names of the three men that signed this letter as a matter of protection to them.

According to the proponents of the so-called Taylor system and other systems of scientific management, the underpaid and unskilled workers have a greater opportunity under scientific management than by other day-labor systems, and here are 194 laborers in that arsenal who have not received any of the benefits of it, but who have labored under all of the detrimental features of it, and they are protesting against it.

Reference was made here to a Cleveland clothing dealer who came before the committee, and before I pass on to that I

want to say this: I do not believe that 10 per cent of the men who have petitioned Congress against the Tavenner bill have this so-called efficiency system established in their shops. I know this to be the fact in San Francisco, because their men will not work under it, and it invites trouble.

Mr. BROWNE. Mr. Chairman, I would like to ask the gentleman if there has ever been a strike caused by the time study or premium system?

Mr. NOLAN. Yes.

Mr. BROWNE. Whereabouts?

Mr. NOLAN. In the Government establishment at Watertown.

Mr. BROWNE. In any private institutions?

Mr. NOLAN. Lots of them throughout the country.

Mr. BROWNE. Name one.

Mr. TAGUE. Mr. Chairman, will the gentleman yield?

Mr. NOLAN. For a question.

Mr. TAGUE. For the benefit of the gentleman, I would like to tell him that I have already filed, at the request of the workmen in the Watertown Arsenal, a petition to the Army Department to abolish it.

Mr. NOLAN. There was reference made to a gentleman who testified before the committee who had a clothing establishment in Cleveland, who contended here that he had the most contented group of workers under one roof in America. Here is what developed in his shop. I get this from one who was familiar with the conditions in the shop of Mr. Feiss, who is one of the members of the so-called committee of ten who are protesting:

In one plant it was found that iron standards supporting signs were erected at the bench of every group of workers and that on the signboard, in large figures, was placed the number of pieces which that group must finish to accomplish their day's work, so that each group saw before them when the day's work began what their task would be and every other worker in the room could see what tasks the other groups had performed.

From time to time during the forenoon and the afternoon foremen went from group to group counting up the number of pieces already finished and then hanging up this number under the one indicating how much must be done for the day's work, so that each group were notified numerous times during the day of whether they were behind or ahead and each other group knew whether the rest were ahead or behind, the whole purpose of this scheme being to work competition between the groups and to encourage the greatest possible exertion; in other words, to make a racehorse of the group where the foreman endeavored to beat the records being made by the groups under the other foreman.

That is exactly what scientific management as these gentlemen who explain it undertake to show will do. They have no fatigue studies. Scientific-management experts and efficiency engineers tell us that they make none. They pick the time-study man from men in the shop, and from men who have never had any practical experience in trying to determine the effect of this system on the human beings who must perform the task set. The whole objection to this is that you can not apply a stop watch and the results obtained from a stop-watch system to a human being and make it apply generally, as you can to a race horse or to an athlete upon the athletic field. The human being in the workshop has to work day in and day out under the system, while the race horse is prepared for his race just as the athlete is prepared for what he does on the athletic field, with a rest before and plenty of rest afterwards.

So much has been said about "scientific management" and efficiency that the terms have come to represent something definite in the public mind. Something which is definite; not because of any facts which have been ascertained, but because of the terms used with reference to those systems of management which claimed to increase the efficiency of labor and which have been widely advertised under the name of "scientific management."

For several years the proponents of "scientific management" had a clear field and were able to create certain impressions upon the public mind as to the scientific basis for their systems and the protection which their systems gave to labor, which influenced many prominent men to indorse "scientific management."

It is only within most recent times that any thorough and systematic effort has been made to investigate the conditions which had developed, so far as labor is concerned, in those manufacturing establishments which had introduced any of the so-called systems of "scientific management."

Since an investigation has been made by competent authorities, we discover that the claims of scientific accuracy so far as labor is concerned, vanished into thin air.

It is but natural that a system which claims to deal scientifically with labor so far as the stress of labor and the wages to be paid is concerned, would offer some scientific instrument or basis for measurement and determination, and yet we find after extensive hearings by the Committee on Labor and special committees appointed by Congress to investigate "scientific management" that there is not in existence, so far as "scientific management" is concerned, any thorough studies of human fatigue; that the efficiency engineers have discovered no rule or instrument to determine where the danger point in fatigue begins or when the danger point of fatigue has been reached.

We find, furthermore, that none of the efficiency engineers have as yet worked out any adequate data upon the question of long-time efficiency so far as labor is concerned; that they have no standard measurement to determine what the workers' normal speed or exertion should be; and that they have no standard to determine what the hourly wage rate or the payment for labor should be except what they may find in other establishments in the same locality.

Instead of scientific standards of measurements in these matters, each efficiency engineer's personal opinion becomes the standard, and it is upon this frail basis of one human being's opinion that the only element of scientific knowledge is to be discovered.

Last year an investigation was made of "scientific management" as it affected labor under the authority of the Federal Commission on Industrial Relations. The work was done by Mr. R. F. Hoxie, University of Chicago, as chief investigator, his assistants being Mr. Robert G. Valentine, an expert on employing management, and Mr. John P. Frey, an experienced trade-unionist, these two gentlemen representing the employers and the workers.

Some 35 plants in all were investigated and in addition, Mr. Hoxie spent a year in gathering the facts, and one remarkable feature of the report which he prepared was that, when completed, it met with the unqualified approval of the gentleman who had represented the employers' interests and the trade-unionist who had represented labor. In view of the fact that it was a unanimous report, their findings are entitled to be accepted as authoritative, particularly in view of the fact that since the submission of this report no efficiency engineer has submitted evidence to indicate that any one of the statements contained in the report was inaccurate.

It has been said by more than one authority who has read the report that it is one of the most scientifically prepared documents which has been submitted by any body of investigators. And this report iterates and reiterates the fact that there is but little which could be termed scientific about the conditions found under "scientific management" so far as labor is concerned, while on the other hand many conditions affecting labor were found which not only were unscientific but most detrimental to the wage earners' interest, both physically and mentally.

It may be that nothing could impress upon your minds the utterly unscientific and inaccurate results which have followed the application of "scientific management" so much as a graphic illustration.

One of the features of "scientific management" is the use of the stop watch by the time-study man, and the efficiency engineers claim that through the use of this stop watch, the study of the equipment, material, and the man, an accurate or scientifically accurate time can be set in which the workman should perform the task.

It is not difficult to grasp the fact that if the time in which different work was to be performed was scientifically determined that the workmen would accomplish approximately the same percentage called for on each task, and yet investigation shows that the widest of variations exist in the times required to perform tasks which have been set under "scientific management."

We have heard both in the committee room and on the floor of Congress considerable about "scientific management" as it has been applied in the Watertown Arsenal, and I know of no better illustration of the utter inaccuracy of determining the tasks for workmen than can be found in this arsenal.

I hold in my hand some charts prepared by Mr. Miner Chipman, which are prepared from the records of work performed on different jobs by employees of the Watertown Arsenal. The charts are included in the hearings held by the Committee on Labor on the Tavenner bill.

The first one, which relates to the work of employee No. 2519 for the month of March, 1914, indicates that he was a workman of more than ordinary efficiency. During this month he worked on 224 jobs, and for the month his average efficiency was 121.35 per cent. But whether he had accomplished every task in the exact time allowed for it by the split-second watch time-study man, or whether, owing to his great efficiency, he had reached 121 per cent, the degree of time in which he accomplished each task as set by the time-study man would be approximately the same. Yet what do we find on the one hand? One job he performed in one-half of the time set by the time-study man; on another he was able to accomplish but 21 per cent of the task within the time set.

I have another chart, made up from the performance of the same employee during the month of April, and here he shows that his average efficiency was about the same in being 121 per cent, yet on some jobs he was able to accomplish but 45 per cent of what was required by the time-study man within the time set, while on some jobs his efficiency was as high as 172.9 per cent.

As it might be held that this man because of his higher average efficiency might show a greater variation in his output per job, I would call your attention to the record of employee No. 2681 for the months from October 1, 1912, to September 30, 1913. Here we find for this long period an average efficiency of 96 per cent, or, in other words, that this worker on the average accomplished but 96 per cent of his work in the time set by the time-study man, but we find on some jobs that he was able to accomplish but 39.3 per cent of the task within the time set, while on other work he not only accomplished the task but did so with the rating of 149 per cent efficiency.

While such charts are not an indictment against "scientific management" in itself, they do constitute the most convincing evidence that when put into application those who operate the split-second watches and who make the time studies are unable to determine how long a man should be allowed for the performance of a task with any degree of scientific accuracy. In fact, any foreman in an old-fashioned one-horse shop who would allow such differences in the time in which a workman should do his work would be laughed out of the shop by the workers and employers alike.

While theoretically it has been held that "scientific management" through the use of its so-called scientific methods would prevent any overstrain, overexertion, overfatigue upon the worker's part, the result of the investigations made have indicated that nowhere are there to be found such systems for the remorseless speeding up of labor as exist in establishments applying the methods of so-called "scientific management."

The time set for the performance of a task, or the time in which a piece of work must be done, is determined by the time-study man; then to urge or stimulate the workers to accomplish this task they are paid an additional amount either in the form of a premium or a bonus, and the efficiency engineers frankly inform us that they would not expect to secure the performance of the task if it were not for this additional money inducement which is held out to the worker; but this financial inducement is not considered sufficient, and other features are introduced to speed up labor.

In another plant they had established for some of the day workers a very novel evidence of so-called scientific efficiency.

Here some of the work could not be regulated by pulley wheels and machinery because it must be done by hand, and so, as machinery could not be speeded up which the worker must keep pace with, another method had to be devised, and in front of the worker's bench was a metronome, which was set in motion, and the workers were expected to move their arms backward and forward keeping time with the moving arm of the metronome.

In another plant a peculiarly effective system had been devised for speeding the workers to their limit.

The bonus system of payment was in existence and the foreman of each group of workers received a bonus in addition to his wages, based upon the percentage of the workers under his charge who succeeded in accomplishing the task set for them, or, in other words, of earning their bonus. The larger the number of workers who accomplished their tasks within the time set the higher the foreman's bonus.

The idea of making the bonus an effective part of "scientific management" was carried one step further, and the time-study man, who also set the time in which the tasks must be performed, also received a bonus. But his bonus was based upon the number of workers who failed to accomplish the task within the time set, so that when the tasks were set so difficult that but few of the workers could accomplish them, the time-study man's bonus was increased. In other words, the time-study man's income depended upon setting the task so difficult that but few of the workers could accomplish it, while the foreman's income depended upon his prevailing upon the workers in his charge to accomplish their task within the time set.

Here the workers were between the upper and the nether millstone, between the devil and the deep sea. They were at the mercy of two men, each of whom was stimulated to help out a condition which aimed to secure the last ounce of energy from every worker affected by the system.

These illustrations are taken from an almost countless number which could be given to emphatically disprove the claims that "scientific management" has made relative to its protected influence in preventing overstrain and overspeeding.

We have listened to lengthy statements as to the specific efforts made under "scientific management" to train the workers and to make better mechanics and craftsmen, but when we search for the evidence we find that the efficient workman, the highly skilled specialist which "scientific management" talks about is the man who has been trained to do one simple part in connection with one of the articles which is finally to be assembled into a complete whole.

It is the kind of training which may enable a worker to learn how to screw on a certain size nut upon a bolt more rapidly; which may educate the girl in the garment shop so that she will be proficient in the trade of sewing on buttons or stitching the seam on a collar; it is the kind of industrial or mechanical training which equips the unfortunate worker for no other job than the minutely specialized part of the simple operation upon which he is allowed to work.

I would hesitate to make this statement if it was not so completely borne out by the investigations which have been made, but in view of these I am fully justified in holding that if "scientific management" as it is in operation in the industries to-day could be applied to all of our industries within a year, the training of artisans and craftsmen would cease and the American workers would become a nation of unskilled laborers, or rather laborers skilled in performing but one simple operation in connection with the industry in which he was engaged.

In fact, "scientific management" definitely aims to build up a small body of highly trained men, time and motion study men, instructors, and the head of the planning department, and this little handful of men are to acquire all of the knowledge and to do all of the directing, and there is to be this little group who will do all of the thinking and the immense army of workers who are not to be allowed to think because their thinking would interfere with the unlimited rules and regulations of "scientific management." And we would have in our country a little group with all of the knowledge and all of the directing power in their hands and the masses of laborers dependent upon this group for what meager information they would be allowed to secure as skilled workers.

I have confined myself to a discussion of so-called "scientific management" as it affects labor. It is with this feature that I am particularly interested, because this feature is by far the most important, for it affects the lives of the workers themselves; it would determine the degree of mechanical knowledge which they shall acquire, and establish the standard of living for the masses of our people.

No fact was brought out more clearly in the special investigations made by Congress, in the hearings held by the Committee on Labor, and the investigations made by Mr. Hoxie and his assistants, than that the theory and the practice of this so-called "scientific management" differs on many points as far as the east is from the west.

It has been overwhelmingly proven that as applied in industrial establishments to-day, "scientific management" works in opposition to its theories so far as labor is concerned on many vital points.

In fact, there seems to be but one point where "scientific management" consistently applies its theories in practice, and that is, in the autocratic control which the employer must exercise.

"Scientific management" in its relation to the workers is essentially autocratic; there is no place in it for industrial democracy, no point at which labor can be given a voice in the determination of the terms of employment and the conditions of labor.

In this country we hold, at least, that the wage earner has a right to a voice in determining under what conditions he shall work and what the terms of his employment shall be; and we hold that this right, and the daily exercise of this right, is essential to our American institutions, because without its exercise and where the employer determines terms of employment and conditions of labor to please his fancy, his sympathies, or his desires for profits, he also determines the wage earner's standard of living, because wages determine what kind of a

home the worker shall live in and where this home shall be located; whether it shall be an insanitary two or three room home in a crowded tenement, or whether it shall be a comfortable dwelling place with sufficient room and pure air and sunshine entering into it.

His wages and the degree of vitality which he must daily give up to the employer determine his physical condition, the opportunities which he will have for self-development for a knowledge of the great problems which affect us as a people and determine his value as a citizen. But now, under "scientific management," we find both in the theory and in the practice that labor is to be prevented—in fact, must be prevented—from having an effective voice in these most essential matters, because we are told "scientific management," the systems which it applies, the forms under which it works, are such that they can not be made a subject for conference and agreement between the employers and the workers.

"Scientific management" in theory and in practice is essentially autocratic, and as one American I shall always use all of the influence at my command to oppose the growth of any institution or tendency which will develop autocratic control, whether in our industries or in any other department of our activities as a people.

I insert an editorial from the Washington Post:

[From the Washington Post, Saturday, May 6, 1916.]

TOO MUCH EFFICIENCY.

To a certain order of mind the idea of getting a little more out of a given situation than anyone else can extract from it appeals with irresistible attraction. With these the announcement of a new method of efficiency means that the world has ceased to muddle through and has begun some real progress.

While inclined to give due credit to the efficiency workers for their achievements, it is felt that the line should be drawn somewhere. Both common sense and healthy sentiment join in protest against the latest efforts in this respect, which involve the production of two eggs a day from a single hen. This is brought about by a very simple expedient. The confiding biddy is placed in a darkened room, fitted up with electrical dinguses, which convey the illusion of a double day and night period within a single 24 hours. The outcome is that a hen, all unconscious of the deception, lays her regular egg a day, as she thinks, whereas the brutal taskmaster gathers in a pair with no compunctions of conscience, so far as can be ascertained. On the contrary, the account of the affair implies that he rather boasts of it.

Somehow, we instinctively recognize that it won't do. For a while perhaps there will be an actual gain. But the temporary increment can not mean other than eventual loss. One can readily prophesy an exotic brand of egg produced by the electrical method that will pale its ineffectual yolk when peered at through the shell by perspicacious housewives or later dallied with by the men folk at the breakfast table. Besides, it means no real progress. The substance of albumen and lime and protein and phosphorus must come from somewhere at a definite cost. Why not put two hens on the job?

And while the plea is being made for the hen, why not let the general principles involved apply to humanity as well? The real problem of society to-day is not so much to get the last vestige of available effort out of a given individual as it is to provide that every individual shall find his place, and there do his appointed work in respectable measure, with a little reserve force left over for the enjoyment of playtime and rest at the end of the day's task.

I incorporate in my remarks the following letter, which was received too late to read to the House:

COMMITTEE OF TEN TO OPPOSE LEGISLATION
ANTAGONISTIC TO EFFICIENCY IN AMERICAN INDUSTRY,
New York, May 31, 1916.

To the Representatives in Congress:

The antiefficiency rider on page 102 of the naval appropriation bill if retained will brand everyone responsible for it as a coward. If its principle is sound, Congress should enact the Tavenner bill, which openly embodies it.

If afraid to do this, Congress should be more afraid to seek by indirection what it can not or dare not do directly. The country demands efficiency and will profoundly resent legislation forbidding it.

Scientific management stands for better efficiency, for better working conditions, and for better wages. The opposition to it is based on ignorance of facts and experience and on the selfish interest of exploiters of labor.

We urge you to oppose by vote and voice this attempt to hobble American industries. It can not prevail for long, and its inevitable condemnation, when understood by the people, will include all responsible for it.

Yours, truly,

COMMITTEE OF TEN,
W. HERMAN GRUEL,
Secretary.

This letter will give you an idea of the campaign of intimidation that has been carried on by the so-called "Committee of Ten," representing the "efficiency engineers," who have never made any endeavor to set standards for their own profession nor to correct any of the abuses in so-called "scientific management." Their work in installing "scientific management" corresponds with their actions in writing this and other letters. They attempt to label every Member of Congress who opposes the stop-watch, bonus, and premium systems as a coward, and also threaten, in the last paragraph, the Members of the House who are in favor of the Naval Committee provision with their vengeance. So far as I am personally concerned, I welcome their opposition, realizing that if they do not stand for any better standards in their personal affairs than they do in connection with their business, such opposition is always to be welcomed.

The CHAIRMAN. The time of the gentleman from California has expired.

[By unanimous consent Mr. NOLAN was granted leave to extend his remarks in the RECORD].

Mr. KEATING. Mr. Chairman, I yield five minutes to the gentleman from Illinois [Mr. TAVENNER].

[Mr. TAVENNER addressed the committee. See Appendix.]

MESSAGE FROM THE SENATE.

The committee informally rose; and the Speaker having resumed the chair, a message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 6239. An act authorizing the Commissioner of Navigation to document as vessels of the United States two dredges built of American material and owned by James Stewart & Co. (Inc.), a citizen of the United States.

NAVAL APPROPRIATION BILL.

The committee resumed its session.

Mr. PADGETT. Mr. Chairman, I yield five minutes to the gentleman from Minnesota [Mr. VAN DYKE].

Mr. VAN DYKE. Mr. Chairman and gentleman of the commitee, I am not interested in this bill particularly because of private manufacturers or private manufacturing establishments, but simply because of the effect it has upon Government employees and the effect upon the service rendered by those employees. In passing, however, I desire to state that my ideas on the issue of a stop watch coincide with the statement made by Senator LODGE in a speech against its use, which is as follows:

The one object of the time measure is to produce speed. Now, speed is not the only thing that the Government or any other employer or manufacturer is seeking for. There is something more important than speed, and that is quality. Speed has nothing to do with quality. Owing to great inventions of our time, owing to steam and electricity, we have carried speed to such an extent in all of our manufactures that certainly in many cases the product has deteriorated in quality as it has advanced in quantity and rapidity of production.

The stop watch and the time measure can tell you nothing whatever about quality. It may be a basis of fixing wages or anything else, but the only thing we can possibly tell by time is speed. We all associate a stop watch with its use for racing horses. I dare say it is used now for racing automobiles, but not by a man buying horses for his ordinary use. In the days before automobiles I used to own horses and be very fond of them and drove them a great deal, but I never put a stop watch on a horse I was going to buy. I wanted to know his qualities; I wanted to try him; but I was not going to buy a horse to use on the track, and therefore I had no use for the stop watch. They use a stop watch to test a horse that is going on the track to race in the Derby, for instance, or in any of our great races. It is of the utmost importance to know what the horse can do on the furlong, or on the quarter mile, or on the half mile, but it does not tell the story of his quality. It will tell the story of speed and the qualities necessary to speed, but there are many qualities it does not tell.

Now, to put the stop watch on human beings may tell how fast they can work, but it can tell nothing of the quality of their work, nor how long they may work. A horse may be very good for a short spurt and absolutely worthless for a 4-mile race. It is a poor test. It is a promoter of the idea that the one thing to do is to turn out just as much as we can just as far as we can. That has gone through everything in this period of ours. It has deteriorated style, it has deteriorated literature, it has deteriorated art. It is deteriorating manufacture.

I do not believe, Mr. Chairman, in standing over men with stop watches to see how far they can go under pressure in securing speed in performing a given piece of work. The very fact of a stop watch implies strain on every faculty, on every physical power, driving the heart and lungs and every muscle to the utmost possible point.

In the days of slavery it was said there was one school of slave owners who believed it was more profitable to work the slaves to the last possible point and let them die than to try and care for them when they were ill and work them reasonable hours and treat them without a stop watch. Those who believed in working them to death, I imagine, were a very small and merciless minority, but there is always that disposition.

I am a thorough believer in the best man getting the best wage and the hard-working man getting what his hard work deserves. I have no desire to see the thriftless and idle paid as well as the industrious, steady, and hard-working men; but I do not believe anything is gained for the Government or for anybody else in standing over a man with a stop watch to see whether under pressure he can do a certain piece of work in a given time. I do not believe it is sound economy.

Reference was made to the Post Office Department in the talk made by the gentleman from Wisconsin [Mr. BROWNE], who told how efficient the system had worked out in that department. I want to show you—and I am giving you this from personal observation—what happens and how this system is taken care of under the Post Office Department. When a letter is dropped in the post office it is handled first by what is known as a post-office clerk—a distributing clerk. Those clerks are given a certain number of letters which they must work within a certain given period of time, which will run, in different places, from 16 to 30 and sometimes 40 letters per minute. The peculiar

part of the system is this, that it is absolutely impossible to create a standard in handling mail. You can easily see that, when you stop to think of the number of different kinds of addresses that are on different letters, some of them written legibly, some typewritten, but no two alike; so without a doubt you will agree with me that no standard can be placed which would be fair to the clerk.

These post-office clerks are required to handle so many a minute, observed, when this system is used, with a watch, and urged to their topmost speed. Then some time afterwards, probably that week or the following week, they are observed from what is known as a secret passage within the post office. This is taken from the testimony before the committee. The clerks are informed that they have not kept up to the speed that they established at the time they were observed; that is quite natural, it is human, in fact, for a man to speed up when his foreman is looking on and telling him he has to produce a required speed at that time. At this point I desire to submit a communication sent to the clerks and carriers of Chicago and extracts from statement of Thos. F. Flaherty, secretary-treasurer of the National Federation of Post Office Clerks, made before the House Labor Committee on the Nolan minimum-wage law; also letter sent to myself after I had introduced a bill to prohibit the use of the stop-watch and time-measuring systems in the Postal Service:

COMMUNICATION SENT TO THE CLERKS AND CARRIERS OF CHICAGO.

POST OFFICE, CHICAGO, ILL.,
Delivery Division, January 29, 1915.

Circular No. 7.
Subject: Rating of clerks and carriers.
Superintendents of stations:

Superintendents of stations will submit as soon as possible, in C. P. O. Form 3990, efficiency ratings for all clerks and carriers assigned to their respective stations on the quantity and quality of work performed during the year ending November 30, 1914.

The next efficiency ratings following the above will be given for the six months from December 1, 1914, to May 31, 1915, and shall be submitted hereafter semiannually, December 1 and June 1, respectively, on C. P. O. Form 3990.

The efficiency rating of each employee from December 1, 1914, on shall be determined on his record for attendance, adaptability, speed, accuracy, and efficiency, and the relative value of each subject shall be charged as follows:

	Points.
Perfect in attendance, one-fifth point off for each day absent	14
Perfect in adaptability	12

Adaptability of clerks shall be determined by their availability for any clerical duty, application, appearance, and courtesy.

Adaptability of carriers shall be determined by periodical tests as to the manner in which they memorize removals and dispose of their "overs"; their application, general appearance, and courtesy in the office and in the field. Maximum in speed, 12 points.

To be given as follows:

Clerk distributing—	
50 cards per minute on examination	12
45 cards per minute on examination	11
40 cards per minute on examination	10
35 cards per minute on examination	9
30 cards per minute on examination	8
25 cards per minute on examination	6
20 cards per minute on examination	3
16 cards per minute on examination (but qualifies)	0
Carriers routing and trying out on exclusive:	
Firm districts—	
40 pieces per minute on test	12
35 pieces per minute on test	11
30 pieces per minute on test	8
25 pieces per minute on test	5
20 pieces per minute on test	2
Under 20 pieces per minute on test	0
Office-building districts—	
35 pieces per minute on test	12
30 pieces per minute on test	11
25 pieces per minute on test	8
20 pieces per minute on test	5
17 pieces per minute on test	2
Under 17 pieces per minute on test	0
Mixed business and residence districts—	
25 pieces per minute on test	12
23 pieces per minute on test	11
20 pieces per minute on test	9
17 pieces per minute on test	6
15 pieces per minute on test	2
Under 15 pieces per minute on test	0
Three-trip residence districts—	
20 pieces per minute on test	12
19 pieces per minute on test	11
17 pieces per minute on test	9
15 pieces per minute on test	6
13 pieces per minute on test	2
Under 13 pieces per minute on test	0
Two-trip residence districts—	
18 pieces per minute on test	12
17 pieces per minute on test	11
16 pieces per minute on test	9
15 pieces per minute on test	7
14 pieces per minute on test	5
12 pieces per minute on test	2
Under 12 pieces per minute on test	0

Accurate observance of the working schedule by carriers, 12 points. To be determined by weekly periods for first trip in each month of the year.

Where a carrier averages schedule leaving and returning on first trip for each weekly period he shall receive 12 points.

For an average of each minute excess of the schedule as outlined above he shall lose one-half of a point.

Accuracy in the distribution of mail by clerks, 12 points.

Standard for maximum points, 99.50 per cent correct on case examination:

99.50 per cent correct	12
99 per cent correct	11
98.50 per cent correct	10
98 per cent correct	9
97.50 per cent correct	7
97 per cent correct	5
96 per cent correct	3
95 per cent correct (but qualifies)	0

Perfection in all of the above subjects shall entitle an employee to 50 points on efficiency, and the net result would give an employee an efficiency rating of 100.

For example, should an employee's record and service be such that it would earn him 13.80 points for attendance, 11 points for adaptability, 11 points for speed, 11 points for accuracy, the points earned for efficiency would be 47, or a sum total of 93.80 points, which would be the rating earned.

All clerks assigned to stations, except those who are engaged entirely in cage work, must be examined on distribution and assigned to the distribution of mail upon receipt of each dispatch. Cage clerks who perform no distribution shall be rated on speed and accuracy, in accordance with the superintendent's judgment and observation as to their ability to perform the duties assigned them.

LE ROY T. STEWARD,
Superintendent of Delivery.

It is a physical impossibility to reach the standard set by the Chicago postal officials and to retain it for any number of years. The strain both mentally and physically is too great and many employees drop from the service or are forced to accept wage reductions others are dismissed for inefficiency.

EXTRACTS FROM STATEMENT OF THOMAS F. FLAHERTY, SECRETARY-TREASURER OF THE NATIONAL FEDERATION OF POST-OFFICE CLERKS, MADE BEFORE THE HOUSE LABOR COMMITTEE ON THE NOLAN $3 MINIMUM-WAGE LAW.

Mr. VAN DYKE. You spoke a moment ago about speeding up in business. Do they use any such thing as a stop watch in your line of business?

Mr. FLAHERTY. The stop watch is used in some offices; yes. In that connection I will read a letter; I won't mention the office, because it might get somebody in wrong, but it is from a large office in the Middle West, addressed to a clerk in the mailing division. It says:

"It is noted that in the January tests you cased 47 pieces per minute unobserved and 61½ pieces observed. With the early return of this communication I would thank you to explain the difference of 14½ pieces per minute."

In other words, while the clerk was being observed, the man stood over him with a stop watch and he cased 61½ pieces of mail. The unobserved test means that the man was being watched unknown to himself, whether from the overhead inspectors' gallery or whether from the adjoining case I do not know. And in that connection, it might be of interest to the committee to know that in every office in the country, any office of any size, at any rate, there is all along the walls a hidden gallery. The inspectors can enter that gallery from the outside, and sometimes they wear black dominoes so they can not be observed from down below. And from these points of vantage they look down and watch the men at work. The reason given by them, of course, is that it is a preventive against rifling the mails; but as a matter of fact, from the report to Congress last year, you will see there were out of 38,000 clerks only 160 of them detected in rifling the mails. The report does not show how many were detected by this particular method, but the report does show there was only 1 man out of 350 that is liable to do that thing. And I do not believe it is in accord with the spirit of our American institutions, particularly our Government institutions, to have men spied upon; to have 349 innocent men spied upon in order to catch one man who might possibly be guilty. I should think that ordinary police methods ought to prevail in detecting a man who would be weak enough to do a crime of that kind.

To return to the speeding-up question, Congressman, the clerk answered by saying that when he threw the 61½ letters per minute he was endeavoring, as requested, to see how many he could possibly case on a five-minute test. He was being tested with a watch, and, of course, he knew it and was going possibly a little beyond his normal speed. Then he says:

"This is a pace that it would be absurd to think of maintaining for eight hours. I do not know the conditions under which the 47 pieces per minute were cased, but am of the opinion that that is a reasonable rate of speed."

He did not know when he was observed when he cased the 47 letters per minute.

I will say in this connection—and you know it, Mr. Van Dyke—that mail is not uniform. Some of it is typewritten—that is, the addresses—and some of them are almost illegible; and you can not maintain a fair speed or as high speed on letters poorly addressed as you can on those typewritten or on business letters of business men.

The reply to that clerk's answer was "with a little effort you can maintain or exceed standard at all times, and I expect your future tests to show this."

In other words, by the use of a stop watch they were expecting to maintain more than a normal speed; and in that connection, too, here is something that might be of interest to the chairman of the committee, because it pertains to the New York office. A letter here from a clerk in the money-order division of the New York office—and he mentioned and gives the names of three men, and he says that these men have gone insane through the speeding-up methods that are in vogue there. He gives their names—I do not believe that I had better give them for the record, but the committee can read them if they so desire. It tells when they entered the service and when they resigned; and he said one of them committed suicide and killed his daughter, due to nervousness. Another was a nervous wreck.

He says that the above men were not always nervous, but since the pushing tactics were used during the past four or five years the men have changed.

That is in the money-order department of the New York office, in which, as you are aware, they operate a great many of these machines. He says:

"One sheet can not be paid properly in one hour, the time given by the superintendent. Some do it in less than one hour, but they do not check or examine the sheets, which is against the rules of the money-order department. Each machine is numbered, and a record is taken when the clerk sits down at the machine; also the number of the machine he is working on. This week he has ceased timing, but he is watching, and if anyone takes over an hour on a sheet he will surely get—"

He leaves that blank.

LETTER SENT TO CONGRESSMAN CARL C. VAN DYKE AFTER HE HAD INTRODUCED HIS BILL TO PROHIBIT THE USE OF THE STOP-WATCH AND TIME-MEASURING SYSTEMS IN THE POSTAL SERVICE.

NATIONAL FEDERATION OF POST OFFICE CLERKS,
Washington, D. C., February 17, 1916.

Mr. CARL C. VAN DYKE,
House of Representatives, Washington, D. C.

DEAR SIR: Permit me to thank you in behalf of the National Federation of Post Office Clerks for having introduced H. R. 8677, a measure to prevent the use of the stop-watch or time-measuring device or system in the Postal Service, reading as follows:

"*Be it enacted, etc.*, That it shall be unlawful for any officer, superintendent, foreman, or other person having charge of the work of any employee of the Postal Service to make or cause to be made with a stop-watch or other time-measuring device or system a time study of the movements of any such employee.

"SEC. 2. That it shall be unlawful for any officer, superintendent, foreman, or other person having charge of the work of any employee of the Postal Service to use the results or records obtained by a stop-watch or other time-measuring device or system in determining what amount of work or labor is to be done in a given time by such employee.

"SEC. 3. That any person violating any of the provisions of this act shall be deemed guilty of a misdemeanor, and shall be punished by a fine of not more than $500 or by imprisonment for not more than six months, or by both such fine and imprisonment.

"SEC. 4. That this act shall take effect upon its passage."

The use of the stop watch in timing postal workers at their tasks has long been a source of complaint for the railway mail clerks, post-office clerks, and letter carriers. Some measure of relief has come to the railway mail clerks since the elimination of the so-called "speed test" instituted by former General Superintendent A. H. Stephens, but the clerks and carriers are still subjected to the obnoxious practice of having a supervisory official time their movements at work. Legislation is therefore sought to have this inhumane system abated entirely in the Postal Service.

Organizations of postal employees have repeatedly passed resolutions at their conventions protesting against the timing systems and speeding-up methods in operation in the service. The department has frequently been memorialized by the service workers to stop the practice of timing them to determine their speed, yet this unjust method of harassing the employees is still in vogue in the post office.

The National Federation of Post Office Clerks, assembled in convention in San Francisco September 6 to 10, 1915, unanimously adopted these resolutions:

"Whereas a system of timing clerks to determine their speed at distributing mail is in effect in many post offices; and

"Whereas this system is unjust and unfair and detrimental to the workers' welfare and the efficiency of the service: Therefore be it

"*Resolved*, That we, the National Federation of Post Office Clerks, in convention assembled, protest against this inhumane method of determining an employee's fitness and capabilities; and be it further

"*Resolved*, That our officers present this protest to the department in the strongest possible manner."

Under date of October 16, 1915, the executive committee of the National Federation of Post Office Clerks transmitted to the Postmaster General this protest:

PROTEST AGAINST TIMING DEVICES.

"We voice our emphatic objection to the use of timing or clock devices to determine the speed at which a postal employee must work. The installation of such a system is a gratuitous affront to the supervisory officials, who have heretofore managed the forces under them sufficiently well to insure the expeditious dispatch of the mails.

"A clerk's record on scheme examination, together with the manner in which he performs daily the duties to which he is assigned, should suffice to determine his fitness for promotion or retention in the service. To harass him to maintain abnormal speed by timing his movements is not conducive toward increasing his efficiency. On the contrary, such methods tend to impair efficiency.

"We ask the department's advocacy of legislation to prohibit the use of timing devices in ascertaining the amount of work performed, or to be performed, by postal employees."

The National Association of Letter Carriers, in convention at Omaha, Nebr., September 6 to 11, 1915, adopted without a dissenting vote this resolution:

"Whereas the Post Office Department has during the past fiscal year introduced the speeding-up system; and

"Whereas this speeding-up plan is detrimental to the service, to the public, and to the employees; and

"Whereas the speeding-up plan is frowned upon and has been ordered discontinued in some departments by the Congress of the United States of America: Therefore be it

"*Resolved*, That our national officers are instructed to use all means in their power to secure the abolition of the speeding-up system."

Despite the appeals of the employees, the department sanctions the practice of "efficiency experts" and "desk" economists, who prowl around with watches in hand seeking to discover what fractional part of a minute a carrier has wasted in casing his mail or whether the clerks engaged in distribution are maintaining the standard of speed—a standard frequently set by the fastest man.

I received recently a letter from a Chicago clerk, who wishes his name withheld, which clearly expressed the injustice of timing a mail distributor to ascertain the amount of work he is doing. He says:

"The officials of the Chicago post office have arranged and instituted a speeding-up system absolutely on a par with the so-called Taylor efficiency system, condemned by the House Labor Committee after exhaustive hearings. Holding a watch to ascertain how many letters per minute a clerk or carrier is distributing is an unpracticable and unjust method: First, because the penmanship on various letters and postal cards varies to such an extent that it is impossible to standardize time for distribution. The clerk or carrier may receive a run of mail that contains a typewritten letter addressed to every person in the block, and distribution of them can be made speedily. Second, the effect of a speeding system on the human being is the same no matter in what industry it is attempted. It results quickly in a nervous breakdown, and particularly does it reduce the efficiency rather than increase the efficiency of any man; and, further, it stultifies the initiative and makes of the human being as far as possible an automatic piece of mechanism."

While the tendency to speed up the postal workers has extended to all branches of the service, the use of the stop watch to determine a worker's speed is most common among those clerks engaged in the distribution of mail. This is a work that lends itself to an application of the timing systems more readily than any other clerical duty.

And yet the use of any timing device upon mail distributers is glaringly unjust. These men must all qualify at frequent intervals by taking what is known as a case examination, when their knowledge of their work, their accuracy, and their speed can be definitely determined. If a distributer is slow and inaccurate, his examination will disclose these shortcomings. It is unnecessary, therefore, to stand behind him with a watch or to surreptitiously spy upon him from an overhead hidden gallery.

These post-office distributers, the hapless victims of the stop-watch practices, must acquire their knowledge of postal work after or before hours upon their own time. After eight hours of steady and nerve-racking toil, too often in a germ-laden, dusty atmosphere, in poorly lighted and illy ventilated basements, they must study intricate distribution schemes at home to better equip themselves for office work. The majority of these men work at night. To compel an employee to devote his time at home toward acquiring knowledge of use only in the post office, and then to prod him into abnormal activity in applying that knowledge by timing his movements, has a tendency to impair rather than improve the efficiency of the service.

The First Assistant Postmaster General in his testimony before the House Committee on the Post Office and Post Roads stated that the installment of the so-called two-division plan in the larger post offices made possible such great economies that he was asking for only a 3 per cent increase instead of the usual 6 or 7 per cent to take care of the normal expansion of the service. This statement, coupled with the fact that the department is asking for but 1,300 additional clerks—the smallest number in many years—plainly indicates that the speeding up of the distributers will continue unless Congress takes some action to prevent it. The two-division plan means to the distributers that they must adapt themselves to different kinds of work. They must acquire a knowledge of both the incoming mail schemes and the outgoing mail schemes. They must study twice as much at home. At work they are shifted from pillar to post, always subject to the fear that a time test is being taken when they are least prepared for it. It is unfair to this class of workers, whose efforts the First Assistant Postmaster General states have made economies possible under the two-division plan, to keep them under the exactions of a time study or speed test. There is a big, pulsating, human factor behind this gigantic task of keeping the Nation's mail in constant motion. These men should not be degraded to the level of machines. Let Congress puts its emphatic stamp of disapproval upon the use of any time-measuring system which tends to grind down the spirits and hopes of those performing the most arduous tasks in the Postal Service.

In my judgment the moral effect of the enactment of this legislation will not be lost on the administrative officials of the service. If Congress says it will not tolerate the use of a time-measuring system, it says, in effect, that it disapproves of the speeding up, the harassing, the demoting, and all of the petty annoyances to which the clerks and the carriers have been subjected.

With sincere appreciation of your consistent support of remedial postal legislation, I am

Very truly, yours,

THOS. F. FLAHERTY,
Secretary-Treasurer.

From the post office the letter goes to the railway mail car, and in the Railway Mail Service they have what is known as the plus-and-minus system, and I just want to say this in regard to that, that the man, at the risk of his life, can receive 500 plus points, and that is the only way he can receive 500 plus points, and there are five different ways in which he can receive 500 minus points. Then, there is what is known as the 100 per cent efficiency night.

One hundred per cent efficiency night is a new scheme to utilize every moment of the time of the railway postal clerk from the time he reports for duty until he reaches the other end of his run. While there is no objection to this from the standpoint of the clerk himself, he realizing that he is supposed to deliver eight hours' work for every day's wage, still the system itself is obnoxious, not only because it tends to drive men, but also because of the poor service to the public which is bound to result from a system of this kind. This system has recently been inaugurated in the tenth division by Supt. Reed, and, in passing, I desire to state that one of the big troubles of all of the systems of efficiency in the service as adopted by different superintendents and different supervisory officials of the Post Office Department are different in character and different in the way that they are enforced by these different supervisory officials. I do not suppose there is another division in the United States where the 100 per cent efficiency nights is in force. It is in force only on certain lines or railway post offices in the

tenth division. Consequently we have this peculiar effect: Clerks running on one railway post office are subjected to rules and regulations which clerks on parallel lines are not subjected to. This causes dissatisfaction amongst the employees, with the resultant lack of efficiency within the service. Now, let us see just how it works out as to delivery of the mail. I am going to give a specific case. The St. Paul and Jamestown railway post office, running on the Northern Pacific Railway west of St. Paul, Minn., prior to the time of putting this so-called time-saving system into effect was manned by five men through. After a time study was made it was determined that Friday night was to be used as a 100 per cent night. Five men were allowed to go through on this night. Saturday was also a 100 per cent night and had five men through, but Sunday and Monday were figured as 60 per cent nights on account of the falling off of the volume of mail handled on Sunday and Monday nights, and only three men were allowed to run through from St. Paul to Jamestown on these nights.

As I have stated previously in my talk, because of the peculiarities existing in the Postal Service it is practically impossible to determine upon a standard hour's work, or a standard day's work, in so far as a timing device is concerned. All Monday nights of the year and all Tuesday nights, Friday and Saturday nights do not correspond exactly as to the volume of mail carried on any one railway post office. If this train goes out on the coming Sunday night with four tons of mail in the car, that is no reason why the Sunday following they will not have more than four tons of mail. This is especially true in the northwestern country, where during the entire winter season trains are missing connections and delayed trains are the regular instead of the exceptional case, and there is no way of determining in advance just how much mail any particular railway post office will carry at any given time in the future. Consequently, it has been the practice of the department to so man the crews on different trunk lines so that they were able to handle the mail on the heaviest night in the week. The same number of men would constitute the crew on the two or three light nights in the week in order to take care of any emergency which might arise and insure the speedy delivery of the mail. This safeguard of the speedy delivery of the public's mail was done away with when this time study had been finished and the 100 per cent efficiency nights put into effect, for if on any of the lighter nights in the week connections which have been missed by previous trains are received by the train having the 60 per cent crew, you will find that it will be impossible for these men to complete their distribution because the result of time study was such as to take care of only the amount of mail which the official putting this system into effect presumed would be received on this night, and no provision has been made to take care of emergencies. What happens? When the clerks reach the other end of the run they find that they have not been able to complete their distribution and this mail is turned over to the next crew unworked, or returned to the initial point for another ride over the entire length of the road. However, the mail of the business men, and others, of that section of the country has been delayed from 12 to 36 hours. Possibly they will not discover the fact, but nevertheless their mail has been delayed. I hardly think the public, when acquainted with the true facts of cases of this kind, would clamor to any great extent for such service.

I do not believe it is the purpose of Congress to enact legislation that will allow economy in any branch of the service when the very best service to the public is not obtained. It is only a few years ago that in this same branch of the service speed tests were put into operation. This was tried out and found wanting. For reasons hereinbefore stated, it was found that it was a very impractical proposition.

By an order effective May 25, 1915, signed by Mr. J. P. Johnston, the general superintendent of the Railway Mail Service, the "speed test" was officially rejected.

This order of the general superintendent was issued following a unanimous recommendation made by all of the division superintendents of the Railway Mail Service. The division superintendents in conference adopted a resolution advising that for service reasons the "speed test" be discontinued.

One of the division superintendents who participated in this conference made the following statement:

After considering the question thoroughly, we decided that it was for the best interests not only of the service but of the clerks as well that the speed tests be abolished as a part of our efficiency-rating system.

There are two reasons for this. The first is that the speed test is extremely difficult to apply, so that the basic principle involved in it could not be applied with fairness and justice either to the clerks or to the service.

The second reason for the action taken by the superintendents is that this test could not be so administered as to get from it a true rating, so far as the efficiency of any of the clerks is concerned.

Notwithstanding this sad experience that the Railway Mail Service had with the "speed-up" system, other branches of the Postal Service continue to employ the same.

The following is the post-office speed test of the city of Cincinnati. This was submitted in the testimony of the national secretary of the carriers' association:

POST-OFFICE SPEED STANDARD.

After making time allowances as noted below, carriers should distribute the number of pieces per minute indicated in the following tables:

Two-trip carriers.		Three-trip carriers.		Four and five trip carriers.	
Percentage.	Pieces.	Percentage.	Pieces.	Percentage.	Pieces.
10	13	10	14	10	16
15	12½	15	13½	15	15½
20	12	20	13	20	15
25	11½	25	12½	25	14½
30	11	30	12	30	14
35	10½	35	11½	35	13½
40	10	40	11	40	13
45	9½	45	10½	45	12½
50	9	50	10	50	12
60	8	60	9½		

"Under 'papers' is included everything except letters, circulars, and cards; time allowances should be made as follows: One minute per piece for registered mail, C. O. D. parcels, insured parcels, postage-due mail, and communications; one-half minute for each change of address order written up; one minute for each seven pieces marked up.

"To arrive at the rate of speed make proper deductions from the total office time on account of 'time allowances' and divide the number of pieces of mail of all classes handled by the number which represents the net number of minutes of office time. For example, a two-trip carrier whose total office time amounts to 1 hour and 31 minutes handles 800 pieces of mail, 35 per cent of which is classed as papers; he handles 2 registered pieces, 1 postage-due piece, answers 1 communication, and marks up for forwarding 77 pieces and enters 4 orders. Making proper deduction for 'time allowances' in accordance with above table, his net office time is 91 minutes less 17 minutes. Dividing 800 by 74, we get 10.8, which shows the average number of pieces handled per minute, and which should be compared with the above table.

"Many carriers should be able to exceed the rates of speed indicated in the above table, and no carrier should fall below the requirements. It can not be supposed that all of the carrier force can sustain their work at the standard fixed by the department, and for this reason there will be routes which are not served according to these standards. Those carriers who can not serve a standard route should be assigned to routes at those outlying stations where they would serve routes in accordance with their abilities, and these assignments should carry a less salary than that paid men serving standard routes. For instance, if it is found after a thorough test that any carrier is unable to conform to the departmental standards of work, he should, if receiving the maximum salary, be reduced in salary, on the grounds of inefficiency, and assigned to a station where undertime, according to the standard of work, is unavoidable."

On October 14, 1915, a test was made of 210 carriers in the Cincinnati post office, divided as follows:

Forty-six six-trip carriers; 10 five-trip carriers; 30 four-trip carrires, 31 three-trip carriers, and 93 two-trip carriers. Out of a total of 210 men 130 fell below the standard in this test. Of the six-trip carriers 23 measured up to the standard and 22 fell below it. Five-trippers, 2 carriers made the standard and 8 fell below; of the four-trippers, 4 men made the standard and 26 fell below; of the three-trippers, 8 measured up to the standard and 23 fell below; of the two-trippers, 43 made the standard and 50 fell below; of the total number, 80 carriers measured up to the speed test of the department and 130 fell below.

Of the test taken on Friday, October 15, 1915, out of a total of 206 men but 72 measured up to the standard and 134 fell below the standard.

The statements referred to are as follows:

CINCINNATI, OHIO.

Result of speed test taken on Thursday, Oct. 14, 1915.

[Number of carriers covered by test 210; forty-six 6-trip carriers; ten 5-trip carriers; thirty 4-trip carriers; thirty-one 3-trip carriers; and ninety-three 2-trip carriers.]

Number of trips.	Number of cards, letters, circulars.	Number other classes.	Number of Reg. Ins. c. o. d.	Number postage due.	Communications answered.	Orders booked.	Forwarded marked up.
6	68,716	5,256	191	363	3	33	4,346
5	10,382	1,058	12	48	0	20	600
4	26,591	4,247	32	84	2	46	1,831
3	21,159	5,528	55	34	4	101	2,209
2	42,642	13,485	70	63	6	123	4,237
Total	169,490	29,574	360	592	15	323	13,223

Table showing time consumed actually.

[First column, time allowance according to weights given in standard table, second column, and time after allowances are deducted and by which the averages are computed are shown in the third column. Time computed in minutes.]

Number of trips.	Actual time.	Allowances.	Time.	Average.	Number of men.
6	5,810	1,195	4,615	16	46
5	1,102	158	944	12.1	10
4	2,900	402	2,498	12.3	30
3	2,848	458	2,390	11.1	31
2	6,125	805	5,320	10.5	93
Total	18,785	3,018	15,767	12.6	210

NOTE.—Fifty-six men, five and six trippers, averaged 15.3, standard 16; 30 four-trippers averaged 12.3, standard 15.5; 31 three-trippers averaged 11.1, standard 13; 93 two-trippers averaged 10.5, standard is 11.5. Out of a total of 210 men, 130 fell below standard.

Table showing the number of men in each class who attained the standard.

	Standard or better.	Lower than standard.	Total.
6-trippers	23	23	46
5-trippers	2	8	10
4-trippers	4	26	30

2	7,233	937	6,196	10.3	91
Total	20,893	3,311	17,582	12.4	206

NOTE.—Fourty-four 6-trippers averaged 16.8, 10 per cent of papers standard demanded 16; nine 5-trippers averaged 12.5, 10 per cent of papers standard demanded 16; twenty-eight 4-trippers averaged 12.3, 20 per cent papers standard demanded 15; thirty-four 3-trippers averaged 10.5, 25 per cent papers standard demands 12.5; ninety-one 2-trippers averaged 10.1, 35 per cent papers standard demands 10.5. Out of a total of 206 men 134 fell below the standard.

Table showing the number of men in each class who attained the standard.

	Standard or better.	Lower than standard.	Total.
6-trippers	22	22	44
5-trippers	1	8	9
4-trippers	6	22	28
3-trippers	9	25	34
2-trippers	34	57	91
Total	72	134	206

It will be seen from the foregoing that the department is maintaining a speeding-up system which exacts the maximum amount of work from every carrier.

Please note carefully that in the test made on October 14, 1915, out of 210 carriers who were given this test only 80 carriers measured up to the speed test of the department and 130 fell below. No further mention need be made of this, as it is very apparent that, even if a test of this kind is to be considered necessary in the service, that certainly any test in which 130 out of 210 carriers would fall below the required speed could not be a fair and equitable test. So it is in the Postal Service. One of the principal reasons of opposition to any test of this kind is not only of the test itself but because of the abuse of such a test by supervisory officials. Again, let us see how the public is affected by this system. The Government workday is an eight-hour day. In establishing the length of a route which is to be covered by a carrier an inspector, foreman, or roundsman goes out over the route with a carrier and determines by the use of a watch, and sometimes a pedometer, the length of the route and the number of stops which constitute a day's work for that carrier. In determining this the uncertain part of it is the amount of mail which is handled on this special route is never the same. Probably the day in which this route was established was on a Tuesday, or a Wednesday, which are lighter days than the following Monday. This is because on Monday they have the accumulation of Sunday's mail. The work this carrier could perform on a Wednesday was definitely measured. Therefore, when the added amount of mail is given him to distribute he finds that he can not complete his distribution in a given time. Consequently, under the rules of the department it is necessary to take back the undistributed mail to the office with a consequent delay in the delivery of that mail of at least from 16 to 20 hours on a two-trip route and nearly as great a delay on any other route. This complaint is not of a necessity made by the carrier, because it does not affect him personally half as much as it does the persons who should have received the delayed mail on time.

As a member of the Labor Committee, and being interested in this proposition of time study from the standpoint of the Postal Srvice, I asked different witnesses who came before the committee protesting against the stop-watch bill what their opinion of the efficiency system employed by the postal department was and as to whether or not such efficiency systems as used in the Post Office Department were, to their minds, good ones. Each and every man admitted before that committee that he knew nothing about the efficiency systems used in the Post Office Department. I believe that one of these men was a member of the so-called "committee of ten" who had already condemned the bill that I had introduced, but when cross-examined before the committee cheerfully admitted that he did not know the difference between a tie sack and a pouch; how a man received plus or minus points; what kind of speed tests were used, had never heard of a full railway post-office car. In fact, he plead ignorance of the entire proposition, but still had the temerity through the medium of different publications and letters sent out to different civic organizations to oppose the bill introduced by myself. It might be interesting to submit at this time extracts from Henry R. Towne's testimony on the Tavenner stop-watch bill.

EXTRACTS FROM STATEMENT OF HENRY R. TOWNE ON THE TAVENNER STOP-WATCH BILL.

Henry R. Towne, of the Yale & Towne Co., is one of the most widely known exponents of scientific management. He believes abuses of the stop-watch in the Postal Service should be stopped.

Mr. VAN DYKE. As I understand this bill, of course, primarily, it is to apply to Government employees entirely. Certainly it is to apply to abuses which are being practiced in the Government service at the present time, and you have no objection to correcting any abuse which is in existence at the present time in the Government service, have you?

Mr. TOWNE. None at all; on the contrary, I am glad to promote it.

Mr. VAN DYKE. We have, for instance, probably some 130,000 to 140,000 postal employees, and each branch of the Postal Service is being subjected at the present time to a time system, in which they use time-saving devices. For instance, on carriers they have a pedometer on the leg, and they time them in order to find out what is the quickest possible time they can cover a route, and the other men have to come up to that time, or have just recently, and they have been putting them back into the collection service or other service of that kind. In other words, there is no bonus system. It is all the other way. In the Railway Mail Service they have inaugurated a system whereby they take the heaviest night in the week, where primarily, or before inaugurating this system, they used to have five men on a crew, they put the five men out on the heaviest night and reduced that crew proportionately each night according to the amount of mail. If they get an excess of the regular amount of mail on any one of these nights, these men have to speed up, practically at the same rate as a man at an ordinary walk when he has to go on a dog trot, in order to clean up and distribute at this rate on their route.

Mr. TOWNE. Do you call this scientific management that you are describing?

Mr. VAN DYKE. I am talking about the provisions of the bill. The bill, as intended, says "time-saving device or system." This is a timing system.

Mr. TOWNE. Supposing under this system you have just described it is found out that a certain carrier on a route in New York City has 20 or 30 per cent longer route than it is supposed he had, due to his having to go into and out of corridors, as nearly all do in the lower part of the city, and that thereupon the department says, "Why, here, this rate is not just and fair; that man ought to have a higher rate or a shorter route. He is being treated unfairly." Would you object to the application of the system for that service?

Mr. VAN DYKE. The bill as it stands at the present time does not take that into consideration, but it does take into consideration the abuses prevalent in the service at the present time, and all this bill seeks, as I understand, at the present time, is to correct those abuses which are prevalent in the Government service. As a matter of fact the bill does not state that even the Government departments can not time the clerks in order to discover the cost of operating at all, but it does seek to prohibit abuses which are being practiced at the present time.

Mr. TOWNE. Would you not try to eliminate abuses in both directions? Suppose, for example, the postmaster of New York City found on one particular route the carrier taking two hours, where his predecessor took only one hour, and he asked him about it and he said, "I can not do any better," and thereupon the postmaster should put some other carrier, in whom he had confidence, on the route and told him to take it a day or two and he found he could do it comfortably in one hour. Would you say that was a misapplication of scientific methods?

Mr. VAN DYKE. It has been my experience, after my varied experience in the Post Office and other departments of the Government, that we never have to legislate along those lines; that all we have to legislate for is to prohibit abuses the other way.

Mr. TOWNE. Do you not think a case of that kind ought to be subject to correction as well as the other?

Mr. VAN DYKE. it is taken care of at the present time in the service. They have no bonus system, but they have a demerit system or a plus and minus system. There is one way in that service by which employees can obtain 500 plus points—that is by risking life—but there are six distinct, different ways they can get 500 minus points. For instance, he can make a misstatement to his superior. It is abuses of that kind we are endeavoring to correct in this bill.

Mr. TOWNE. I should be with you most heartily in any legitimate effort to prevent abuses, but in preventing abuses do not let us legislate good things out of existence, still less make them penal.

Now, then, Mr. Chairman, as I understand this amendment, and, as a matter of fact, the entire proposition, it does not apply in any shape or manner to private employers. It is simply legislation which may have a tendency to eliminate certain abuses that are prevalent at the present time in different branches of the service, and while I freely admit that it is absolutely necessary, in the Postal Service especially, to keep a record as to the amount of time put in by different employees, and while it is impossible, especially in the Railway Mail Service, to work the men eight hours six days each week, it is therefore absolutely necessary to keep a system of time credit; still I do not believe that it is for the best interest of the men, the department, or the public who should be served by his department, to inaugurate, or keep in effect, any system which has a tendency to speed a man beyond his normal ability to work.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. MANN. Mr. Chairman, I yield five minutes to the gentleman from Kentucky [Mr. SHERLEY].

Mr. SHERLEY. Mr. Chairman, it is impossible in five minutes to discuss this question, but I just want to suggest this serious thought to the committee. We have very largely increased the manufacture by the Government of munitions of war. Yesterday I spoke in favor of a Government armor plant. Much of the argument that has been made in favor of Government manufacture has been on account of the record that has been made in cheapness of manufacture; and, despite the statements that were made by the gentleman from Illinois [Mr. TAVENNER], I know from very many personal talks with Gen. Crozier, he considered the efficiency of the arsenals would be greatly interfered with by the abolition of a system that he and those conversant with it believe to be modern and enlightened.

It is possible to abuse anything. You can so arrange a task that is unfair. You can so speed a man as to wear him out; but the Government does not do so. The gentleman used the illustration of a man running instead of walking. It would have been a fairer illustration if he had suggested a man going in a straight line instead of going one way and then turning at a right angle to get to the same point. In other words, this system is one showing you how to go straight to the task. It is a method for creating a fair standard, and then saying to the workman, "If you work beyond that, if you are better than your neighbor, and have more efficiency, you shall be paid for it."

Now, there is objection to it if it is abused by an unfair standard, but where there are abuses the remedy is not by abolishing the system, but doing away with the management responsible for the abuse. We can control the Government arsenals without abolishing a proper system. But the real objection is the objection made by the man who is below the average and who wants to have his inefficiency made the standard of a day's labor and who objects to another man making more money than he.

Now, I have not time to refer to it here, but I will put in the RECORD one letter from a man by the name of John Driscoll. I do not know who he is, except he is employed at the Watertown Arsenal. He writes a letter to the Secretary of War, which the Secretary transmitted to the chairman of the Committee on Appropriations. Hence I came to know of it. This letter states that the men there are satisfied, and that under this system he is making 27 per cent more money than he did theretofore. He does not want anybody to deprive him of the opportunity of making that amount of money.

And I want you to read the letter which was submitted by the Secretary of War, Mr. Baker. He is a man who has been rather noted for his humanitarian views. He was an ideal mayor of Cleveland. No man there had any more friends among the laboring classes. I do not believe that you could get him to recommend a system that he believed was detrimental to the real interests of the working classes. If I did not believe that the system would be of benefit not only to the arsenals but to the men employed there I would oppose it as quickly as anybody else. I am not willing to coin the lives of men into a profit either for the Government or for a private manufacturer. But I recognize that this is an era of progress. If a man can be taught to do a given thing easier and better and quicker than has been done before, you have no right to deny him that benefit. You turn back the dial of time when you undertake to say that a thing can not be done in a right way and in a proper method. I deny that there has been any evidence of abuse in the arsenals, and in the absence of that I am not willing to say to the administrative officers of the Government that "You shall not use an economic system; you shall not have such a method."

Under leave to print, I insert the letters referred to:

[House Document No. 1053.]

PREMIUM PAYMENTS IN GOVERNMENT EMPLOYMENT.

Letter from the Secretary of War, submitting information relative to time studies and premium payments in Government employment.

WAR DEPARTMENT,
Washington, April 20, 1916.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

DEAR MR. SPEAKER: There is pending in the House of Representatives a bill (H. R. 8665), introduced January 11, 1916, to regulate the method of directing the work of Government employees, the object of which is to prohibit at the Government arsenals what are known as time studies and premium payments. Similar legislation to that which is carried in the bill was enacted on the Army appropriation bill which was passed at the last session of Congress, in the form of a prohibition of the payment from funds appropriated in the act of the salary of any person engaged in making or directing time studies or of any premium. There is therefore apparent the possibility of similar legislation at the present session, either in the form of a separate act or in the form of a restrictive prohibition upon an appropriation act. I think that such legislation would be unwise.

The time study referred to may be defined as a method of ascertaining by careful observation and study in connection with a timing process the most advantageous manner in which a given piece of work can be done and also the time in which it can reasonably be expected to be done by following this best manner. The premium is an extra cash compensation which is paid to a workman for accomplishing the work in this reasonable time, or for approaching the time within certain rather liberal limits, the compensation being in addition to the regular wages of the workman, which are not disturbed, and depending in amount upon the degree to which he approaches the reasonable time which has been ascertained. The timepiece is used only in the study of a new job, for the purpose of working it out properly and for assigning the proper time for its performance. It is not held over a man for the purpose of ascertaining whether he is working industriously, and its employment is of less and less frequency as information is accumulated which makes special study unnecessary. The premium is the workman's share of the economy which is effected by the system.

This system has now been in practice in the Ordnance Department for something like five years. At the place at which it has been most fully put into effect, the Watertown Arsenal, Mass., it has resulted in very substantial economy of production and in a material increase of the earnings of the employees. The last monthly report from the arsenal indicates that the total amount paid in premiums during that month was $3,315.61, which was earned by 311 employees, an average of about $10.66 each. The total number of mechanics and workmen at the arsenal was 554, of which approximately 56 per cent worked during the month on premium jobs. The total pay roll of the arsenal for the month was $45,250.85, of which amount it therefore appears that slightly over 7.32 per cent was paid in premiums. The premiums are in addition to the day wages of the employees, which are regulated in accordance with those of the vicinity for work of similar character to that done at the arsenal. During the five years that the system has been in operation at the arsenal neither the day wage nor the number of employees has diminished, but the amount of work done and the average earnings have increased in an important degree.

The legislation which is being urged upon Congress is advocated by organized labor, which is opposed to the system intended to be prohibited for the essential reason which is embodied in the charge that it is a speeding-up system. I can not understand this charge as having any other meaning than that the work required of the employees by the system is unduly severe. Of the truth of this charge in the practice of the system at the Watertown Arsenal there is no evidence whatever, but there is a good deal of evidence the

other way. There is no complaint of overwork at the arsenal, and no workman has been discharged because of failure to meet the requirements of the system. To prohibit the system of which the records show undoubted advantages, both to the Government and to the employees, because of a charge unsupported by evidence, or even by any attempt at evidence—for there has been no effort to prove overwork at the Watertown Arsenal—seems to me to be most unwise.

There has been no investigation at the Watertown Arsenal which has resulted in a report condemnatory of the practice at that establishment. This department has endeavored to secure an investigation and report from the Federal Commission on Industrial Relations, created by the act of August 23, 1912, and that commission employed a committee which did make a very thorough investigation. Neither the commission nor its committee, however, made any mention of the Watertown Arsenal in its report, but both of these bodies confined themselves to a general discussion of the relations of scientific management and labor largely as a social question. The commission was not able to agree, and conflicting reports were made by groups of its membership. The report of the special investigation committee has not been made public, but the substance of it is understood to be contained in a book entitled "Scientific Management and Labor," by the chairman of the committee, which leaves the subject of scientific management in its general practice in shops which have introduced it still open to discussion. The only investigation at the Watertown Arsenal of which the result has been published in a report is that which a special committee of the House of Representatives made some four years ago, and as a result of which the committee recommended that there should be no legislation upon the subject. There have been expressions from the employees at the Watertown Arsenal both for and against the system. There are evidences that at least some of the expressions against it have come from representatives of organized labor, but I am persuaded that this opposition proceeds from a mistaken theory; for while it is obviously true that a piecework system in which the pay of the employees is based solely on a piece price and high-speed machinery is used to drive operatives harder than is consistent with their physical and nervous welfare, is objectionable, it is equally true, in my judgment, that the system above described as operative in the Watertown Arsenal is not open to either of these objections. The Government surely should not be denied the opportunity of securing efficient work from its employees without an investigation of the facts which would justify the action proposed to be taken.

All of my predecessors in the office of the Secretary of War who have held that office since the introduction of the system at the Watertown Arsenal have been in favor of its retention and have opposed efforts to abolish it. I have been in this office too short a time to have had an opportunity to visit the arsenal or to familiarize myself thoroughly with the details of the practice at that establishment, but I have long been interested in both aspects of the problem presented and do not feel that I am an entire stranger to the controversy merely because of the recentness of my contact with this particular application of it.

The relation between fatigue and efficiency is being widely studied, and in some of the European countries astonishing statistical demonstrations of the effect of speeding-up processes have already been obtained. There can be no question that the whole nervous and physical system of the operative is imperiled, and his strength, as a part of the national strength, decreased, if he is either urged or induced to work beyond a sound physiological maximum. On the other hand, inefficient production is bad for the operative. It is always bad for a man not to do his best, not to make the most of his opportunities and of his labor, and to produce less than he can under a system of proper inducements and compensations. It is bad for the national life, for its industrial efficiency, and for its squareness to have its component parts, whether they be operatives in an industrial plant, professional men, or public officers, turning into the aggregate either a product so excessive that it represents a deterioration in their physical and nervous strength, or a product so insufficient as to represent less than their honest and safe best. To strike the happy mean involved in these statements is, of course, difficult, but at the Watertown Arsenal we seem to have made a fair approach to it. The wages paid to our operatives as a flat rate, irrespective of their response to the time system, is the current rate of the community for similar work, and in addition to that, premiums are offered, not large, but large enough to stimulate continuous and faithful activity. So far as I know, there is not a case on record at Watertown since the introduction of this system of a nervous breakdown or physical exhaustion due to excessive work, nor is it claimed that the operatives in that plant, protected as they are against long hours by a wise eight-hour provision, are in any sense driven or hurried beyond a fair and safe limit.

As I am not in any sense personally responsible for the work which has been done at the Watertown Arsenal, I can be permitted to say that, in my judgment, it represents an achievement of which both the legislative and executive branches of the Government can be justly proud. The reproach is often made that the public can not conduct an economical and efficient industrial enterprise, but no such charge can be brought against the Watertown Arsenal, and I think it would be a grave misfortune to the public service and to the employees of the Government there engaged if any action were taken prejudicial to the system which is working so well, without a special investigation at the arsenal itself which would make a comprehensive study of the results of the system, both in output and upon the operatives. Similar studies have been made in other places; there are a great many experts who know exactly how to make such studies, and the information presented by them could be weighed and proper value given it in determining a future policy.

Sincerely, yours,

NEWTON D. BAKER,
Secretary of War.

WAR DEPARTMENT,
Washington, May 5, 1916.

Hon. JOHN J. FITZGERALD,
Chairman Committee on Appropriations,
House of Representatives.

DEAR MR. FITZGERALD: On April 20 last I wrote a letter to the Speaker of the House of Representatives in regard to the bill (H. R. 8665) prohibiting the use of time study and premium payments at Government establishments. In this letter I speak of the possibility of this prohibition either through the passage of the bill referred to or by means of a restrictive prohibition upon an appropriation act, similar to the one placed upon the Army appropriation bill at the last session of Congress. As the fortification bill, which is in charge of your committee, carries the appropriations covering most of the work which is done at the Watertown Arsenal, the place where the time-study and premium-payment system is in practice in the ordnance department, and is thus likely to encounter a proposed amendment prohibiting expenditure of its funds under this system, similar to the amendment which was added to the Army bill at the last session of Congress, I take the liberty of inviting your attention to my letter to the Speaker, which was published as House Document 1053 of the current session, and also of forwarding to you herewith a copy of a letter which I have just received from Mr. John Driscoll, a machinist employed at the Watertown Arsenal, who states with some emphasis and some detail his satisfaction with the system of payment in practice at the arsenal and his belief in the satisfaction of his associates, together with his hope that the system will be allowed to remain. In case an amendment of the tenor suggested shall be offered, I hope that you will give these papers consideration.

Sincerely, yours,

NEWTON D. BAKER,
Secretary of War.

---

16 LADD STREET,
Watertown, Mass., April 26, 1916.

The honorable the SECRETARY OF WAR,
Washington, D. C.

DEAR SIR: In February of 1915 I took the liberty of addressing some communications to the Members of Congress upon the question of the abolition of the so-called Taylor or premium system, then and at present in force at the United States Arsenal at Watertown, Mass., where I am now, and for 20 years past have been employed as a machinist. The opponents of the present premium system were not successful in that attempt to abolish it and we have continued to enjoy its benefits from that time to the present.

Another attempt, however, is now being made to deprive us of the benefit of this premium system, and it is for the purpose of enlisting your voice and vote in favor of the system and for the benefit of those of us, by far the majority of the employees of the arsenal, who have prospered under the beneficent provisions of the premium system, that I now address you.

Permit me, therefore, to briefly set forth some of the facts concerning the situation as I know it to exist at the Watertown Arsenal: There is at present employed about 178 machinists; of this number, 134 are working under, and are in favor of retaining, the present premium system.

The balance of the employees are largely in favor of retaining the present system, but for personal reasons do not wish to take an active part in an effort to retain it, or to be openly identified as its supporters. A very small part of the present working force desire the abolition of the present system.

I am not going to state the reasons why this small minority runs counter to the wishes of the great majority of the employees. Their reasons for so doing might be ascertained.

In common with the others who are in favor of the present system, I have been able to earn an average of 27 per cent over ordinary wages, and that, too, without feeling that I have at all overworked myself. I desire, as do the other employees who desire that the present system be retained, to spend my time while in the shop in an earnest effort to render a good day's service for a good day's wage and to reap the benefit that comes to me as a result of the system now in vogue by continued conscientious effort. I do not feel at all as if I were a slave, driven to my utmost endeavor by a hard-hearted task master; rather do I enjoy my work, conscious that by its fair performance and possibly a little added effort I may win the prize which will more than compensate me for any extra care or diligence that I may exercise. I have been reaping these benefits since the installation of this premium system, and I desire, for the benefit of myself and my family, to continue to reap them in the future, and I feel, as does a great majority of my coworkers, that the right to earn these premiums should not be taken from us arbitrarily upon the invitation of a few men who are either ignorant of or entirely misinformed regarding this matter which so vitally concerns the interest of the workers at this arsenal. There is, save for the discontent of these few men, a feeling of harmony existing at the Watertown Arsenal between those in authority and the workers which is unsurpassed, I believe, in any other governmental or private institution in the country. These relations will be shattered if the present system is abolished, and they ought not, I respectfully submit, to be disturbed.

Under the present system the records of the men are open to the inspection of those who have the right to see them, and each individual is assured that his earning capacity is limited only by the length of the working day and his own faithfulness and diligence.

You will not find among those who desire the abolition of the present system any of the employees who have, by faithful work, earned and merited substantial premiums, but you will find among the agitators for the destruction of the present situation those who have not earned premiums and who are contented, seemingly, to do as little for their day's wages as they possibly can do and retain their positions. In these days "efficiency," which, after all, means common sense and skill applied to the task in hand, and lack of waste in its performance, is a slogan of all industrial concerns. Private enterprises employ efficiency experts to advise employers; not so much on the question of speeding up the workers as of conserving the workers' energies, and directing them intelligently to the end that greater production may be had.

If the wishes of the opponents of the present premium system are heeded and the system itself abolished, the Government will find itself in competition with private enterprises, unable to compete with them in the open market, because of the better conditions which obtain in private shops and the lack of incentive in Government shops to the worker to give the best that there is in him skillfully, energetically, and cheerfully.

We produce at the Watertown Arsenal, under the conditions which now obtain, in a manner and to an extent second to none under normal conditions. I predict that if the present system is abolished the best men, the ambitious men, will leave the governmental employ and will seek other field where their skill and fidelity will be recognized and more worthily compensated. At the Watertown Arsenal we have no real grievances.

If the workers, individually or collectively, feel that they have a grievance, they are encouraged by those in authority to make that grievance known. If it is a just one, it is remedied; if it is unjust, the injustice of it is pointed out and the men are ordinarily satisfied.

This spirit of helpful cooperation will be destroyed, in my judgment, by the abolition of the present system.

I have never known conditions, during my 20 years' service in the Watertown Arsenal, to be as satisfactory as a whole to the workers as they have been during the past four years, during which time we have worked under the premium system.

For these reasons I appeal to you to work to sustain and keep in force the present premium system of wages in the shops of the Government. The basis of the pending bill to abolish this system can not be an intimate knowledge of what it accomplishes, and I respectfully submit that its passage would destroy the great benefits which we now enjoy, would take away from us the worthy ambition which we now possess, and would be a grave wrong, since it would, by reducing our income, seriously affect our future welfare, our happiness and that of those dependent upon us.

Respectfully,

JOHN DRISCOLL.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. TAGUE having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had passed bills and joint resolution of the following titles, in which the concurrence of the House of Representatives was requested:

S. 708. An act to make immediately available for the use of the State of Georgia in paying expenses incurred by said State in connection with the joint encampment held at Augusta, Ga., July 22 to 31, 1914, certain sums appropriated for arming and equipping the militia of said State;

S. 4594. An act to validate certain declarations of intention to become citizens of the United States;

S. 5805. An act permitting the Riverview Ferry Co. to construct, maintain, and operate a bridge across the Yellowstone River in the State of Montana;

S. 5425. An act to standardize lime barrels;

S. 5851. An act to extend the time for constructing a bridge across the Eastern Branch of the Elizabeth River in Virginia;

S. 6073. An act granting the consent of Congress to George Fabyan to construct a bridge across the Fox River; and

S. J. Res. 133. Joint resolution to authorize the President of the United States to convey the acknowledgments of the Government and people of the United States to various foreign Governments of the world who have participated in the Panama-Pacific International Exposition to celebrate the completion and opening of the Panama Canal, and also the four hundredth anniversary of the discovery of the Pacific Ocean.

The message also announced that the Senate had passed with amendments bills of the following titles, in which the concurrence of the House of Representatives was requested:

H. R. 755. An act to incorporate the Boy Scouts of America, and for other purposes; and

H. R. 13765. An act to amend section 73 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, and for other purposes.

NAVAL APPROPRIATION BILL.

The committee resumed its session.

Mr. KEATING rose.

The CHAIRMAN. The gentleman from Colorado is recognized for five minutes.

Mr. KEATING. Mr. Chairman, as the gentleman from Kentucky [Mr. SHERLEY] says, it is quite impossible to discuss this subject in five minutes.

I would call the attention of the committee, however, to the fact that the provision under discussion applies to the Navy Department, and that the same provision, in the identical language, was in the naval appropriation bill which was passed one year ago. So that for one year the navy yards of this country have been operating under this law. Does anybody pretend to say that the navy yards of this country are not efficient?

Mr. SHERLEY. Mr. Chairman, will the gentleman yield?

Mr. KEATING. I regret that I have not the time. Where the gentleman errs, and where a lot of other gentlemen err, is in the supposition that you can not have an efficiency system without a stop watch. I hold in my hand an efficiency system covering 16 or 18 closely printed pages—the efficiency system of the navy yards—and there is not a word in that pamphlet concerning a stop watch.

In all the evidence submitted to the Committee on Labor, in all the investigations that have been conducted by committees of this House and by commissions representing Congress and the National Government, it has never been established that you can not have an efficiency system without a stop watch. On the contrary, it has been testified repeatedly that you can have an efficiency system without the stop watch, the premium, or the bonus system.

Only the other day I asked Secretary of the Navy Daniels if, as the result of the operation of this law, he had received the slightest complaint, and he said, "Not at all."

Now, my friends, who is it that is demanding that this law shall be repealed? The leader of the opposition, the chief supporter of the "stop-watch" system before our committee was James A. Emery, of the National Association of Manufacturers. The Members of this House will probably recall Mr. Emery in connection with the Mulhall investigation in the Sixty-third Congress. We did not hear much from Mr. Emery during the remainder of the Sixty-third Congress, but at the beginning of this Congress he reappeared first as the opponent of child-labor legislation, and sent out misleading statements to manufacturers all over this country concerning the proposed legislation.

After he had been defeated by this House on child-labor legislation he bobbed up to oppose the so-called Tavenner bill and the riders placed upon appropriation bills to prevent the use of the "stop watch."

The only Government official I know who has joined with Mr. Emery is Gen. Crozier, of the Ordnance Department. But Gen. Crozier has not demonstrated, and has not attempted to demonstrate, that in his arsenals, where he uses the system, he has gained any higher degree of efficiency than they have in the navy yards, where they refuse to use the system. Now, it is not alone sufficient for Gen. Crozier to come in here and say that as a result of his system he has made a saving. He should be able to prove that under his system he has made a greater saving than they have made in the navy yards.

What are the facts? If anything, the weight of evidence is on the side of the navy yards, and tends to show that they are more efficient than the arsenals. Personally I think there is little to choose between the two. [Applause.]

Mr. Chairman, I desire to insert in the RECORD the following extracts from a report submitted to this House by the Labor Committee on the Tavenner bill to abolish the "stop watch" in governmental arsenals and workshops:

The object of the Tavenner bill is to end the use of the "stop watch" and the bonus and premium systems of payment of employees in Government arsenals and workshops.

Your Committee on Labor made a favorable report on a similar bill in the Sixty-third Congress, but owing to the congested condition of the calendar the House did not have an opportunity to act on it.

NULLIFYING WILL OF CONGRESS.

However, the substance of the proposed legislation was attached as "riders" to the military and naval appropriation bills for 1916. A brief statement containing those "riders" and the amazing attempt of certain officers of the Government to nullify the plain intent of Congress should prove of interest at this point.

On January 22, 1915, Mr. Deitrick, of Massachusetts, offered the following amendment to the military appropriation bill, then pending in the House:

"On page 52, after line 14, insert the following: *Provided*, That no part of the appropriation made in this bill shall be available for the salary or pay of any officer, manager, superintendent, foreman, or other person having charge of the work of any employee of the United States Government while making or causing to be made with a stop watch or other time-measuring device a time study of any job of any such employee between the starting and the completion thereof, or of the movements of any such employee while engaged upon such work; nor shall any part of the appropriations made in this bill be available to pay any premium or bonus or cash reward to any employee in addition to his regular wages, except for suggestions resulting in improvements or economy in the operation of any Government plant; and no claim for services performed by any person while violating this proviso shall be allowed."

A point of order was made against the amendment, but after extended discussion it was withdrawn and the amendment adopted without a division.

Three days later Brig. Gen. Crozier, Chief of Ordnance, wired the commanding officer at the Watertown, Mass., arsenal as follows:

"Cease all time studies ('stop-watch' studies) and all premium payments, except such as shall have accrued at time of notification of employees, and notify them at once.

"CROZIER."

A similar telegram was sent to the commanding officer at Frankford Arsenal, Philadelphia.

CROZIER ENCOURAGED EMPLOYEES TO PROTEST.

Gen. Crozier, when he appeared before your committee, stated he had sent these telegrams "in order that the employees might protest if they saw fit." On the receipt of the general's telegrams the foremen notified the employees of the arsenals that they would be deprived of the premiums which they had been receiving, but would be expected to do just as much work. In other words, they must continue to "speed up," but without the sustaining hope of reward.

Gen. Crozier denies that he authorized the foremen to issue these instructions, but there is ample evidence to show that they were issued.

* * * * * * *

"RIDERS" RETAINED IN BILLS.

Gen. Crozier's telegrams and the orders of the arsenal foremen had the effect expected and a number of the employees signed petitions protesting against the adoption of the "riders." Gen. Crozier admits that the employees—most of whom were women receiving $1.16 a day—were "assisted" in preparing these petitions which were forwarded to Members of the House and Senate.

Gen. Crozier appeared before the Senate committee and joined in the protest. By a small majority the Senate struck out the "riders," but when the military and naval bills went to conference the House conferees, acting on instructions from the House, insisted that they must be restored, and that was done.

Secretary of the Navy Josephus Daniels proceeded at once to enforce the mandate of Congress as expressed in the "rider" attached to the naval appropriation bill, and issued the following order:

NAVY DEPARTMENT,
Washington, April 19, 1915.

From: Secretary of the Navy.
To: Commandant and industrial managers of all navy yards and stations.
Subject: Circular letter in regard to premium and bonus systems.

Attention is called to the proviso in the naval appropriation act for the fiscal year ending June 30, 1916, reading as follows:

"*Provided*, That no part of the appropriation made in this act shall be available for the salary or pay of any officer, manager, superintendent, foreman, or any other person having charge of the work of any employee of the United States Government while making or causing to be made with a stop watch or any other time-measuring device a time study of any job of any such employee between the starting and completion thereof, or of the movements of any such employee while engaged upon such work; nor shall any part of the appropriations made in this act be available to pay any premium or bonus or cash award to any employee in addition to his regular wages, except for the suggestions resulting in improvements or economy in the operation of any Government plant."

All premium and bonus systems of doing work and all time studies or timing of employees as defined in this act will be discontinued on or before June 30, 1915.

The wording of this act, however, is construed as not prohibiting straight piecework—that is, work paid for at a certain rate, such as per hundred rivets, per hundred feet of calking, etc.—with or without a guaranteed day's wage in case of failure through no fault of the employee.

Where systems are in use based upon premiums or bonuses, these should be charged, if possible, to straight piecework, as defined above, provided such charge is acceptable to the employee.

JOSEPHUS DANIELS.

Gen. Crozier, on the other hand, set about nullifying the effect of the "rider" on the military appropriation bill, and with the assistance of former Secretary Garrison and other officials of the department was almost completely successful.

The following extract from the hearings before your committee will prove illuminating on this point:

"Mr. KEATING. Didn't you understand that when Congress added that rider it wished the premium and bonus systems to be abolished in Government work?

"Gen. CROZIER. I had no way of knowing the will of Congress except by its legislation. I can perhaps throw a little light on the latter by saying: The Member of Congress who proposed that amendment, and at whose instance it was added to the law, was aware, before it was too late to attach that same kind of a rider to the fortifications bill, that without attaching it the legislation would not apply to funds under the fortifications bill, and he did not seek to do that.

"Mr. KEATING. You did not seem to experience any particular difficulty in interpreting the law when you issued the order suspending the bonus system at Frankford Arsenal?

"Gen. CROZIER. The law applies to Frankford. Do you mean Watertown Arsenal?

"Mr. KEATING. You issued an order at Frankford which you say you intended as a warning to the employees as to what would occur in case it went into effect?

"Gen. CROZIER. Yes, sir.

"Mr. KEATING. Then, after the rider was put into effect, you came forward with a scheme by which you evaded the plain intent of Congress, but you did not tell the workmen you had that in mind when you issued the first order.

"Gen. CROZIER. You say I evaded the plain intent of Congress. I did not evade it in the opinion of the comptroller.

"Mr. KEATING. How about Frankford Arsenal? Was that order issued under a misapprehension of what this legislation meant or intended?

"To be perfectly frank, you attempted to show these employees what you thought the effect of this legislation would be if it passed, and after the rider was adopted, you found means by which you could avoid the purpose of the legislation?

"Gen. CROZIER. I found means by which I saved them from the disadvantages of the legislation.

"Mr. KEATING. You did not suggest there was a way out of it when you issued the warning?

"Gen. CROZIER. I did not.

"Mr. KEATING. You referred to this legislation that was pending and you warned them if the legislation was passed a certain situation would be created, and you did that for the purpose of getting them to protest to Senators and Representatives?

"Gen. CROZIER. I did that for the purpose of allowing them to protest if they wanted to.

"Mr. KEATING. You are warning them that in case certain legislation was enacted a certain condition would be created, and instead of that you created an entirely different situation?

"Gen. CROZIER. I found a way of saving them from it.

"Mr. KEATING. You think it is perfectly proper, do you, for the Chief of Ordnance of the United States Army to conduct himself in that fashion?

"Gen. CROZIER. I do."

Gen. Crozier's attitude is a very strong argument in favor of the passage of the bill now under consideration. He is apparently willing to defy the law, so long as no penalty attaches, but he promises to obey it if he is furnished with a sufficient incentive in the form of a fine and imprisonment.

EXTENDED HEARINGS ON BILL.

Your committee held extended hearings on the Tavenner bill and many able witnesses appeared for and against the measure.

The opponents of the bill, led by Mr. J. A. Emery, chief counsel for the National Association of Manufacturers, declared that to eliminate the "stop watch" and bonus and premium systems would "penalize efficiency and encourage waste."

The supporters of the bill insisted that the combination of "stop watch" and bonus and premium was "in spirit and essence, so far as labor is concerned, a cunningly devised speeding and sweating system."

The majority of your committee feels that the proponents of the bill made so strong a case that we are justified in urging Congress to enact the legislation needed to drive the "stop watch" and bonus and premium systems from Government shops.

EFFICIENCY WITHOUT THE STOP WATCH.

The opponents of this legislation have much to say about "efficiency" and "scientific shop management," and they seek to create the impression that "efficiency" can not be secured unless (a) the workman's every movement is timed by a "stop watch," and (b) that the old system of day's pay is abolished and bonuses and premiums substituted therefor.

Your committee feels there is nothing in the evidence submitted at the hearings, or in the experience of mankind, to sustain either of these contentions.

In this city we have the Washington Navy Yard, employing thousands of skilled mechanics. The stop watch is not used there, and the commandant will assure you he has the "most efficient body of mechanics ever gathered together inside one fence."

The workmen at the Rock Island Arsenal have succeeded in defeating Gen. Crozier's attempt to introduce the "stop watch," and they have demonstrated their "efficiency" by producing munitions of war for very much less than the Government pays contractors for the same articles.

For instance, Gen. Crozier tells us that a 3-inch gun carriage for which contractors asked the Government $3,398.82 was produced in the Rock Island Arsenal for $2,192.27, a saving of practically one-third. And this is not an exceptional case.

Is it necessary to still further "speed up" workmen who have displayed the skill and industry needed to produce these results?

* * * * * * *

"STOP WATCH" REJECTED BY PRIVATE ENTERPRISE.

Turning from the Government shops to the plants of private industry, we find that the "stop watch" has not been received with favor.

Mr. Richard A. Feiss, of Cleveland, Ohio, a manufacturer of men's clothing, was presented by the opponents of this legislation as one of their principal witnesses. He defended the use of the "stop watch" and was emphatic in his declaration that "efficiency" could not be secured without it, but he was forced to confess that his concern was the only house in that section of the clothing business which had installed the system. The following extract from Mr. Feiss's testimony will shed light on this point:

"The ACTING CHAIRMAN. Do you know of any other concern in your business that is using the system?

"Mr. FEISS. No, sir; our business, the clothing business, as a whole, is very backward.

"The ACTING CHAIRMAN. As a consequence there is no other concern that you know of that we could make comparisons with as to the results in your shops and others?

"Mr. FEISS. No; no other industry.

"The ACTING CHAIRMAN. These other business men who are competing with you have had an opportunity to adopt this system?

"Mr. FEISS. Yes.

"The ACTING CHAIRMAN. They have been confronted with your splendid and highly successful example for some time?

"Mr. FEISS. Yes; our shops are always open to anyone.

"The ACTING CHAIRMAN. They have not seen fit to adopt your ideas?

"Mr. FEISS. They are adopting some of the ideas. The trouble with most of the men at the top is that they are not practical men.

"The ACTING CHAIRMAN. They think they are practical men.

"Mr. FEISS. I think they will admit that they are not.

"The ACTING CHAIRMAN. But, anyhow, whatever may be your opinion of your competitors, there are many concerns that have not adopted it, although they have had this example before them?

"Mr. FEISS. Yes."

The boot and shoe industry furnishes another example. Not 15 per cent of the boot and shoe factories in this country use the "stop watch," and the 85 per cent which have refused to use it experience no difficulty, so far as the records show, in competing with their so-called "scientific" rivals.

What has been said of the clothing and boot and shoe industries applies with equal truth to other lines of industrial endeavor.

The workers of this country are not a lot of lazy drones who refuse to do a reasonable day's work unless their every movement is timed by a "stop watch."

WORKERS CONDEMN "STOP WATCH."

The workers' attitude toward the "stop watch" is stated in the following excerpt from the testimony of Mr. John P. Frey, editor of the International Molders' Journal, before your committee:

"Mr. SMITH. What objection has the workman to time study?

"Mr. FREY. Some have the feeling that it is humiliating to have a man standing over your back, or around you, with a stop watch, checking off every movement you make, trying to catch you beating some little time. Others object because it forces them to work harder and harder, and it puts into the employer's hands a power which they use unjustly against them.

"Mr. SMITH. You think the general objection is that it overworks the men?

"Mr. FREY. I should say from what the workers told me, that I interviewed, it was half and half. It was partly the feeling of humiliation in having some one stand over them with a stop watch, and others felt that the system meant making their work that much harder.

"Mr. SMITH. What is the feeling of the workmen about the Taylor system?

"Mr. FREY. I have not encountered one who favored it. All that I have interviewed are bitterly opposed to it.

"Mr. SMITH. Are the workmen generally opposed to a bonus system?

"Mr. FREY. Some of the workers—I want to revise that statement as to the Taylor system. I found some workers working under the Taylor system who said they did not consider it hurt them much.

"Mr. SMITH. But, generally speaking, you think you are safe in saying they are opposed to it?"

* * * * * * *

SENATOR LODGE ON THE "STOP WATCH."

Senator HENRY CABOT LODGE presented the case against the "stop watch" in graphic fashion during a discussion of the subject in the Senate during the third session of the Sixty-third Congress. Senator LODGE said:

"The one object of the time measure is to produce speed. Now, speed is not the only thing that the Government or any other employer or manufacturer is seeking for. There is something more important than speed, and that is quality. Speed has nothing to do with quality. Owing to great inventions of our time, owing to steam and electricity, we have carried speed to such an extent in all of our manufactures that certainly in many cases the product has deteriorated in quality as it has advanced in quantity and rapidity of production.

"The stop watch and the time measure can tell you nothing whatever about quality. It may be a basis of fixing wages or anything else, but the only thing we can possibly tell by time is speed. We all associate a stop watch with its use for racing horses. I dare say it is used now

for racing automobiles, but not by a man buying horses for his ordinary use. In the days before automobiles I used to own horses and be very fond of them and drove them a great deal, but I never put a stop watch on a horse I was going to buy. I wanted to know his qualities; I wanted to try him; but I was not going to buy a horse to use on the track, and therefore I had no use for the stop watch. They use a stop watch to test a horse that is going on the track to race in the Derby, for instance, or in any of our great races. It is of the utmost importance to know what the horse can do on the furlong or on the quarter mile or on the half mile, but it does not tell the story of his quality. It will tell the story of speed and the qualities necessary to speed, but there are many qualities it does not tell.

"Now, to put the stop watch on human beings may tell how fast they can work, but it can tell nothing of the quality of their work nor how long they may work. A horse may be very good for a short spurt and absolutely worthless for a 4-mile race. It is a poor test. It is a promoter of the idea that the one thing to do is to turn out just as much as we can just as far as we can. That has gone through everything in this period of ours. It has deteriorated style, it has deteriorated literature, it has deteriorated art, it is deteriorating manufacture.

"I do not believe, Mr. Chairman, in standing over men with stop watches to see how far they can go under pressure in securing speed in performing a given piece of work. The very fact of a stop watch implies strain on every faculty, on every physical power, driving the heart and lungs and every muscle to the utmost possible point.

"In the days of slavery it was said there was one school of slave owners who believed it was more profitable to work the slaves to the last possible point and let them die than to try and care for them when they were ill and work them reasonable hours and treat them without a stop watch. Those who believed in working them to death, I imagine, were a very small and merciless minority, but there is always that disposition.

"I am a thorough believer in the best man getting the best wage and the hard-working man getting what his hard work deserves. I have no desire to see the thriftless and idle paid as well as the industrious, steady, and hard-working men, but I do not believe anything is gained for the Government or for anybody else in standing over a man with a stop watch to see whether under pressure he can do a certain piece of work in a given time. I do not believe it is sound economy."

PREMIUM AND BONUS SYSTEMS.

The premium and bonus systems of payment of employees are designed to supplement the "stop watch" in stimulating the workers to the extreme limit of their physical and mental endurance. When the human machine can no longer stand the strain a new one is to be substituted and the old one sent to the industrial scrap heap.

The opponents of the legislation under discussion deny the truth of this statement, but there is a mountain of evidence to sustain the charge.

* * * * * * *

The United States Public Health Service has just issued Bulletin No. 73, "Tuberculosis Among Industrial Workers," by Surg. D. E. Robinson and Asst. Surg. J. G. Wilson.

Those gentlemen are surely impartial and competent witnesses, and here is what they have to say:

SPEEDING UP.

"This is a natural resultant of the piecework system, and from the standpoint of the employees' health, does more harm than any other one thing associated with factory work. Although it works, or appears to work, to the interest of the employer by increasing the output of the individual workers, these good results are probably only temporary, as the pernicious effect upon the health of the wage earner will, in the end, have the opposite effect."

LABOR'S EARNEST OPPOSITION.

Labor, organized and unorganized, has systematically opposed the introduction of the system into Government plants. Gen. Crozier asserts that outside influences are responsible for the workers' hostile attitude, but the evidence submitted to your committee seems to completely disprove the general's theory.

The leaders of organized labor instead of fomenting trouble in the Government shops have with difficulty restrained the workers from throwing down their tools and quitting work. At the Watertown Arsenal the employees united to employ Miner Chipman, an engineer, to assist them in an attempt to induce the War Department to dispense with the obnoxious system.

Two hundred and thirty-five of the workers furnished Mr. Chipman with detailed information to enable him to complete his case. Of these, 214 were opposed to the system. Of the protestants, 113, or 52.8 per cent, were nonunion, and 101, or 47.2 per cent, were union.

All these men were asked to answer the following question: "Do you think the agitation is brought about through union labor or similar sources?"

They replied as follows: "Noes," 137; "yeas," 28; not answering, 70.

* * * * * * *

CONCLUSION.

In conclusion your committee would suggest:

The system so persistently urged by Gen. Crozier involves a fundamental, not to say revolutionary, change (a) in determining what is a reasonable day's work for an employee in the national arsenals and workshops and (b) in the method of compensating the workers, to wit, the substitution of the "bonus" or "premium" system for the age-old "day's-pay" system.

The workers affected seem to be almost unanimous in their opposition to the change. They insist it will be oppressive to them and will be without benefit to the Government.

So intense is this feeling that an attempt to install the system in all the Government workshops would, in the judgment of your committee, lead to very serious consequences.

In view of these well-established facts, it seems to your committee it would be the height of folly to permit Gen. Crozier to persist in his plan. Apparently, the only way to restrain him is to enact the bill under discussion, and your committee trusts the House will take prompt and favorable action.

The CHAIRMAN. The time of the gentleman from Colorado has expired. All time has expired. The question is on agreeing to the amendment offered by the gentleman from Wisconsin [Mr. BROWNE].

The question was taken, and the Chairman announced that the ayes seemed to have it.

Mr. KEATING. A division, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 72, noes 83.

Mr. BROWNE. I ask for tellers, Mr. Chairman.

The CHAIRMAN. Tellers are demanded.

Tellers were ordered, and the Chairman appointed Mr. BROWNE and Mr. KEATING to act as tellers.

The committee again divided; and the tellers reported—ayes 74, noes 100.

So the amendment was rejected.

Mr. SHERLEY. Mr. Chairman, I ask unanimous consent to extend my remarks.

The CHAIRMAN. The gentleman from Kentucky asks unanimous consent to extend his remarks. Is there objection?

There was no objection.

Mr. KEATING. Mr. Chairman, I make the same request.

The CHAIRMAN. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. TAGUE. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Massachusetts [Mr. TAGUE] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. TAGUE: Page 5, line 13, after the figures "$46,000," add the following:

"The Secretary of the Navy is hereby authorized to use the ships of the United States Navy for the transportation of mail to and from neutral countries in cases of emergency or necessity."

Mr. PADGETT. Mr. Chairman, I reserve a point of order on the amendment.

The CHAIRMAN. The gentleman from Tennessee [Mr. PADGETT] reserves a point of order on the amendment.

Mr. TAGUE. Mr. Chairman, in presenting this amendment I believe that if the House will consider the importance of it and what it means to the business interests of this country they will accept it.

The reason for this must be apparent to every Member of the House who knows the conditions that have prevailed across the sea during the past two years.

The mail of our business men and our people has been interfered with and held up without right or justice, creating hardships and inconvenience to our business interests. I know of no better way of meeting this issue, when it is known that we are without a merchant marine, than by carrying the mail to and from neutral ports on the ships of our Navy.

Not for many years has this country been subjected to such insolence and arrogance on the part of any nation as it is at the present time, when the English Government board neutral ships and take therefrom the mail of our people in direct defiance of the international law and without respect for this or for the other neutral nations.

As one Representative in this Congress I want to know how long we are going to permit the British or any other Government to tamper with the business men's mail of this Nation. They are complaining that bonds and stocks that are sent across the sea have never reached their destination, and only yesterday the captain of a ship that entered the port of Newport News made the following statement:

MAIL FOR UNITED STATES IS SEIZED BY BRITISH.

NEWPORT NEWS, *May 31.*

Capt. Carl Nordman, of the Swedish steamship *New Sweden*, in port from Gothenburg with mail for the United States, Canada, and Mexico, stated that all the parcel-post matter aboard his ship was removed by British authorities at Kirkwall, where his ship was taken by a patrol boat.

About 30 sacks of first-class mail from Scandinavian countries for the United States also were removed and held. Scandinavian mail for Canadian points and a quantity of Russian mail was not disturbed.

In 1775 this country threw off the yoke of English oppression and tyranny, and with the first shot fired at Lexington told England and the world of the birth of a new and independent Nation, and from that day this country has proudly proclaimed that independence.

We have never allowed any nation since that time to interfere with the progress of our business without bringing them to account for it, and not until now has any nation attempted to do this in face of the objection of this country.

How much longer we intend to allow this interference is for us to decide, and I know of no better time than now, when appropriating money to build up our Navy that we shall build it so strong and powerful that it will be a message to English insolence and insults or to any other nation who dares to interfere with our rights upon the sea.

By the adoption of this amendment we send our mail in case of emergency on our warships, with the American flag floating proudly from the masthead, and then let the British attempt to seize it if they dare. That is true Americanism; that is the protection that our American business men deserve at the hands of this Congress to safeguard their business.

The laws of this country forbid any persons interfering with our mails, and anyone who does will be punished by the law. The mail being carried across the sea is just as important as the mail of our own country and deserves that same protection, and if we are unable to punish those who interfere with it, as we do within the confines of our own land, then it is for us to send it across the sea so protected that no nation will dare to interfere with it, and if they do they will do so at their own peril.

We place it in the hands of the officers and men of the American Navy, who have never been found wanting in the performance of their duty in the protection of the rights of the American people. We have always been proud of our American Navy, and we are proud of it to-day. Its personnel can not be excelled by any navy in the world, and is made up of the best of American manhood, who have always been ready to defend the honor and name of their country. We are giving them to-day a navy which they can be proud of, and let us at the same time, by the passage of this amendment, protect our rights upon the high seas.

Like other members of the committee, I have received many letters from the business men of the country whose mail has been interfered and tampered with, depriving them of business that should rightfully come to them, and many complaints have come from our citizens in this country and abroad whose mail, for no reason whatsoever, has been interfered with. Let us, by our accepting this amendment, say to the world that we will not permit in the future any interference with our mail or the rights of America or Americans upon the seas.

May I ask to be allowed to insert in the RECORD a few editorial comments that have come to me recently from some of the newspapers dealing with this question and also with the matter of interference with our rights upon the sea?

[From the Boston American, May 29, 1916.]

A JACKSONIAN AND ROOSEVELTIAN PLAN TO SAFEGUARD OUR NEUTRAL RIGHTS.

Congressman PETER F. TAGUE, of Boston, has introduced a resolution in Congress providing that the United States mails between this country and the neutral ports of the world shall be conveyed in the armed ships of our Navy.

There is a reason for this resolution. The British Government has assumed, without right and without precedent in international law and without decent respect either for this Nation or for other neutral nations, to interfere both with our mail and with the mail of the other neutral nations.

This country has enforced against Germany the claim which the President set up against the use of the submarines which Germany regarded as vital to the successful prosecution of her conflict with Great Britain. The President and the national administration acknowledge that in principle the violation of our rights by the British interference with our mail is no less flagrant. It certainly has less excuse in military necessity than the German use of their submarines. There has, however, been a marked difference in the vigor of the prosecution by our national administration of our demands for fair and respectful treatment by both belligerents. We have entered upon a course of procrastinating negotiations with Great Britain concerning this violation of our rights. Apparently no progress has been made toward a settlement of the controversy.

Now Congressman TAGUE has conceived a way in which an issue can be very promptly forced in this situation. By his resolution he calls upon the Government to send our mail in our warships with our flag at the masthead. Then let the British attempt to seize that mail if they care so to do.

This would be the Jacksonian way of dealing with such a question. It would be the Jacksonian way of settling the question. This method of conducting diplomatic negotiations made Andrew Jackson the most successful diplomat this country knew between the Revolution and the Civil War. This method is also the Roosevelt method of conducting negotiations. It is the way former President Roosevelt would have settled the controversy long, long ago. It is the way of dealing with questions so decisively that they do not have time to get a hot box and become dangerous.

It is only by paltering with embarrassing situations that we make them dangerous. There can not be the least doubt in the world that if our mail were sent in a battleship the British Government would very courteously and discreetly let it entirely alone. Then there would be the end of the controversy.

Mr. TAGUE'S resolution is statesmanship. The administration will do well to heed Mr. TAGUE'S suggestion. Mr. TAGUE has a just conception of real neutrality, for it is not real neutrality to demand our rights vigorously against one belligerent and meekly against another.

[From the Boston American, May 24, 1916.]

FUNDS TAKEN FROM CENSORED LETTER.

WORCESTER, *May 24*.

Patrolman Michael Freil, of the local police department, has written to the Department of State, at Washington, protesting against the abstraction of a money order from a letter which he sent to his mother in Ireland, and which was opened by British censors. He has received a letter from his mother stating that his communication had been opened, and the money order was missing. According to the policeman, the American Express Co. investigated and found that the money order was cashed in Ireland, the indorser giving the name of "A. Lang."

[From the Traveler, May 8, 1916.]

CHARGES BRITISH WARSHIP TRIED TO STOP THE "TEXAS"—WILLIAM P. LARKIN MAKES SENSATIONAL STATEMENT AT MEETING OF CLAN-NA-GAEL.

That the British battleship *Vancouver* tried to hold up the United States battleship *Texas* on the high seas and asked for information as to her destination and complement on October 24, was a declaration made by William P. Larkin, presiding at a public meeting of the Clan-na-Gael, in Hibernian Hall, Dudley Street, last night.

To support his sensational declaration, he read a telegram which he declared was sent by Commander John Wood, of the *Texas*, to the Secretary of the Navy. The telegram reads:

OCTOBER 26, 1915.

To the honorable the SECRETARY OF THE NAVY.

SIR: I have the honor to report herewith an incident which occurred as follows:

At 3.20 o'clock on the morning of October 24, while under full steam for Hampton Roads, we received a wireless from the British warship *Vancouver*, which was accompanied by a British warship torpedo boat. The message inquired as to our destination and full particulars of our complement. Our reply was worded as follows: "Why the hell should we give you the information? Can't you see our flag?" Whereupon we were commanded to halt, to which I replied by ordering all decks stripped for action. Within 15 minutes from the time I was commanded to halt my decks were stripped for action. My men were at their posts, and without further action they proceeded on their way. Hoping that I acted wisely in the fulfillment of my duty, I remain.

JOHN WOOD,
Commandant U. S. S. "Texas."

Following the sensational announcement made by Larkin, John Dovey, editor of the Gaelic American, declared that it was only a matter of transportation that prevented 200,000 trained Irishmen from going to Ireland from the United States to aid in the Irish rebellion.

The meeting was attended by about 1,200 of the "physical force" section of the clan, with a sprinkling of Germans. They contributed $232.60 for the "Irish Republic," and one of the speakers read a notice from City Collector John Curley that another meeting will be held May 15, either in Tremont Temple or in Faneuil Hall.

The other principal speaker was Robert Sturn, vice president of the German-American Alliance.

Mr. TAGUE submitted the following resolution, which was referred to the Committee on Foreign Affairs and ordered to be printed:

House resolution 247.

Whereas the mails leaving this country for neutral countries have been opened and censored by the English Government against the protest of the people of our country and in detriment to the business interests of our country, causing injury to business and much uneasiness to our citizens; and

Whereas the mails from neutral countries destined to the United States of America have been likewise opened, censored, and delayed; and

Whereas the English Government has shown no disposition to discontinue this practice, which is a violation of our rights to the seas and our rights to do business with neutral countries: Therefore be it

Resolved, That the President of the United States is authorized, through the Secretary of the Navy, to transport mail to and from neutral ports upon the ships of the United States Navy, and that any interference with our mails shall be resented by such ships with all power of our Navy and said ships.

Mr. PADGETT. Mr. Chairman, I make the point of order.

The CHAIRMAN. The Chair sustains the point of order.

Mr. GARDNER. I ask unanimous consent to proceed for 15 minutes.

The CHAIRMAN. Does the gentleman offer an amendment?

Mr. GARDNER. Yes; I offer an amendment, which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. GARDNER: Page 100, line 10, strike out all down to line 15, on page 101.

The CHAIRMAN. The gentleman from Massachusetts [Mr. GARDNER] asks unanimous consent to proceed for 15 minutes. Is there objection?

There was no objection.

Mr. GARDNER. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. GARDNER. Mr. Chairman, the part of the bill which I seek to strike out is that part which authorizes President Wilson to send nine gentlemen, noted for their interest in peace, to a European peace conclave.

TALK LESS AND DO MORE.

If there are gentlemen here who are fearful lest we get mixed up in war, let me remind them that if they long to keep out of European troubles they had better stop meddling with European affairs and keep their itching fingers out of European pies.

We Americans have been sitting like a lot of overfed dowagers in the best seats in the opera. We have been criticizing and scolding and patronizing the men who are doing the fighting, and simultaneously we have been filling our own pockets at their expense. We have been moralizing away as if we were not actuated by anything except the grandest motives on earth, and as if greed and timidity were quite unknown to us.

The United States has talked so much and done so little that we shall stand better in the eyes of the world if for the present we hold our tongues and let the men who have been doing the fighting do some of the talking as well.

ENTANGLING ALLIANCES.

Now comes this proposition to ally ourselves with European and Asiatic nations in establishing an international court, with an international army and navy to back up its decrees.

From this time forward everything is going to be left to arbitration, we are told. Oh, of course, I know that at present they talk of limiting the scope of these arbitrations; but if you are going to have an international court at all and tie this country up to an international army and an international navy you had better arbitrate the things which men have strong feelings about, and not merely arbitrate questions which no one would fight over anyway.

Gentlemen have been painting a very attractive picture of the power of this international court to prevent belligerency on the part of angry nations. I can easily see the attractiveness of the program if we only consider one side of the picture. If our international army and navy prevent a war, well and good; but suppose they can not prevent a war. Suppose that the international army and navy must actually be used to suppress some nation or group of nations which may be dissatisfied with the decree of the international court. What then? Is the United States going to let that international court declare war for us in some European or Asiatic quarrel with which we have no concern whatever?

WHAT WOULD HAVE HAPPENED IN 1914?

Suppose that we had had this kind of an international court in 1914, and suppose that this international court had decided that Germany and Austria were in the wrong and had then called upon the United States to furnish its quota of men and money and ships to put down the Austrian and German belligerents. Looking the proposition honestly and squarely in the face, what chance is there that this Congress would have voted in 1914 to raise half a million men and send them to war in Europe to support the allies against Germany and Austria? Why, even to-day, with all the unavenged ghosts of the *Lusitania* victims haunting our pacifist dreams, even now, to-day, we could not get a vote through this Congress to raise half a million men to participate in civilization's struggle for self-preservation.

MONROE DOCTRINE AND CHINESE EXCLUSION.

But let us ask ourselves whether we are genuine in clamoring for the settlement of international questions by arbitration. Would we, were the issue to arise, consent to arbitrate the Monroe doctrine? Would we consent to arbitrate our right to exclude the Chinese and other yellow races from this country? Those are two of the doctrines nearest to the American heart. Yet they are the very doctrines under which the rest of the world chafes. Supposing that you had your international court, with a judge from Japan, and a judge from Great Britain, and a judge from Sweden, and a judge from Germany, and a judge from Austria, and a judge from Russia, and a judge from Italy, and suppose that Japan were to go before that court and claim the right of free immigration of Japanese and Chinese into the United States, would our workingmen submit to a decree of that international court under which we should certainly be overrun by cheap yellow labor? I think not. I think that this Congress would repudiate such a decision of an international court.

Now, take the Monroe doctrine. Supposing Germany goes before that international court and claims the right to restore order in Mexico in order to recover property which has been taken from the Kaiser's subjects. Supposing that we refuse to intervene and refuse to let Germany intervene. Will the international court support us or will it support the side of Germany? If it decrees that Germany has the right to send an army into Mexico, what are we going to do? Submit to the decree of the court or repudiate our international agreement?

Mr. SMITH of Michigan. Mr. Chairman, will the gentleman yield?

Mr. GARDNER. Yes.

Mr. SMITH of Michigan. I would like to inquire whether it is proposed to submit questions of national honor and vital interest to this court?

Mr. GARDNER. The gentleman evidently did not hear the first part of my remarks.

Mr. SMITH of Michigan. Yes.

Mr. GARDNER. I stated that the proposition was to limit the functions of the international court at present, but if the court is to have any value at all it must settle questions which men fight about, not questions which men only argue about. The proposition at present is to leave to the international court all academic wrangles, like boundary disputes and waterways questions, and that sort of pother which nobody would fight about anyway.

SCRAPS OF PAPER.

I confess that I have lost confidence in international agreements. Countries do not keep their treaties when the pace gets too hot. In 1914 Germany promptly announced her disbelief in "scraps of paper." Greece found a reason for evading her treaty with Servia. Uncle Sam's hands are by no means clean. We violated our treaty with the Chinese when we passed the Chinese-exclusion act, and we violated our treaty with the Indians when we drove them from their coveted lands to the country west of the Mississippi River.

JUDGING BY THE PAST.

What sort of success should we have had with arbitration if it had prevailed in the past? Supposing that the question had been left to a court of international judges whether the American colonies had the right to revolt against Great Britain in a matter of taxation levied to pay for New England's own defense. Do you think that we should have won our case before an international court?

Mr. GARRETT. The taxes were not confined to New England.

Mr. GARDNER. No; but if the gentleman will remember the first army was formed in New England. From Virginia we got our commander in chief, but I think the gentleman will admit that if the Revolutionary War had not broken out in New England it would have been many years before it broke out elsewhere. It was New England's fight in the first instance.

Now, let us take up the Mexican War.

We needed some territory in the Southwest, so we helped Texas revolt from Mexico. Then we annexed Texas and went to war to prevent Mexico from recovering her former territory. How do you think that an international court would have looked upon that casus belli?

Supposing that the North and the South had tried to arbitrate their difficulties at the time of the Civil War. What question would they have arbitrated? Half of the Nation thought then, and still thinks, that it went to war to end slavery, and the other half thought then, and still thinks, that it went to war to defend its firesides from invasion. Does anyone to-day believe that the abolition of slavery was an evil thing? And yet, notoriously, the leaders of European thought were for the most part opposed to the course of the North.

Last of all, how should we have come out if our difficulties with Spain in 1898 had been submitted to an international tribunal? Would an international court have decided that we had adequate proof that the battleship *Maine* was blown up from the outside? Would an international court have conceded our right to aid the Cuban insurgents against their Spanish masters? If you have the slightest doubt on this matter, look back to your newspapers just before the Spanish War. As a matter of fact, a sort of international court actually convened itself to sit on the very question of our dispute with Spain. You may have forgotten about that court. It was known to the world as the Concert of European Powers, and a grand old harmonious concert it was, when Great Britain broke in with a dissenting note. The rest of the orchestra had attuned its fiddles to the popular air of "Down With Your Uncle Samuel." Just at that moment Great Britain started to play "Hail, Columbia," and broke up that concert of European powers. I dare say that that was about as near to an international court as we shall get for some time to come.

Mr. BENNET. Mr. Chairman, I desire to offer a preferential amendment to perfect the text.

Mr. BYRNES of South Carolina. Mr. Chairman, I desire to be recognized.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 100, after line 9, insert—

The CHAIRMAN. The Chair does not think this is a preferential amendment. It is to insert——

Mr. BENNET. In the latter part of the text which the gentleman from Massachusetts asked to be stricken out my amendment comes in, and under the rules of the House an amendment perfecting language is in order.

The CHAIRMAN. But the gentleman's amendment proposes to insert some other matter.

Mr. BENNET. If the Chair will look at the latter part of my amendment he will see——

The CHAIRMAN. The Chair does not think it is a preferential amendment. The gentleman can offer his amendment in

the event the amendment of the gentleman from Massachusetts be adopted.

Mr. BENNET. If the Chair will listen. In the amendment offered by the gentleman from Massachusetts——

The CHAIRMAN. Striking out the entire paragraph.

Mr. BENNET. Striking out the entire paragraph. Now, my amendment inserts new matter between lines 10 and 11. Then, on page 100, within the matter proposed to be stricken out by the gentleman from Massachusetts, it inserts after the word "*be*," in line 22, the words "the commissioners herein provided for and," and in line 24, page 100, strike out the word "representatives" and insert the word "commissioners." Now, if the amendment proposed by the gentleman from Massachusetts should succeed there would be nothing to which that portion of my amendment could attach.

The CHAIRMAN. The gentleman can prepare a new amendment which would be in order.

Mr. BENNET. In order to reach that what I would have to do would be to get up a new amendment consisting of the first part of mine and then all of lines 10 to 21, and change that which is stricken out, and change lines 22 to 24, and in line 23——

The CHAIRMAN. It would be an entirely different provision, and it would be in order to insert that.

Mr. GARDNER. Mr. Chairman, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. The gentleman from Massachusetts asks unanimous consent to withdraw his amendment. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

Mr. BENNET. Now, Mr. Chairman, I offer this as an amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 100, after line 9, insert:

"That a commission of nine members be appointed by the President of the United States to consider the expediency of utilizing existing international agencies for the purpose of limiting the armaments of the nations of the world by international agreement, and of constituting the combined navies of the world an international force for the preservation of universal peace, and to consider and report upon any other means to diminish the expenditures of government for military purposes and to lessen the probabilities of war.

"On page 100, line 22, after the word 'be' insert 'the commission herein provided and'.

"On page 100, line 24, strike out 'representatives' and insert 'commissioners'."

Mr. BENNET. Mr. Chairman, the first part of this amendment ought not to be new to men who have served any length of time in this House, because in the Sixty-first Congress it was reported from the Committee on Foreign Affairs and passed this House and the Senate with the addition of a limitation by which it expired within two years and with an appropriation of $10,000. It was signed by President Taft, but he never, very much to my regret and to the regret of other friends of peace, appointed the commission authorized—a commission under that resolution consisting of five. The Sixty-first Congress, of course, was Republican. The Sixty-second House was Democratic, and the Committee on Foreign Affairs of the Sixty-second Congress reported out the same resolution, and again, by unanimous consent, as my recollection is, the resolution passed the House in the Sixty-second Congress.

So that this House has twice committed itself—once when Republican and once when Democratic—to what I now suggest. Mr. Chairman, there is a good deal of force to what the gentleman from Massachusetts [Mr. GARDNER] says in relation to the defects of an arbitral court. There are things that no self-respecting nation, any more than any self-respecting man, will submit to arbitration—those things for which both men and nations will fight—and it is at that point that an arbitral court almost certainly will break down.

Now, what does this resolution do? This resolution faces the fact that the expenditures for war, particularly the naval expenditures, are going to be tremendously high. We are voting for preparedness. I am voting for two battleships, and all that, and no matter how big this bill is when it goes through the House, I am going to vote for it. But, nevertheless, I realize that the very size of these bills will some day bring about a movement all over the civilized world to stop war, because the nations can not afford it.

Mr. GARDNER. Will the gentleman yield?

Mr. BENNET. Yes.

Mr. GARDNER. Suppose that all the navies were disarmed, would not the British potential navy, to wit, her merchant marine, which could be armed in time of war, more overbalance the rest of the world than her navy does at present?

Mr. BENNET. Mr. Chairman, I would not want to answer dogmatically, but I see the gentleman's point.

Mr. GARDNER. That she would be much better off after this than now, because she would have a better potential navy than before.

Mr. BENNET. Very likely the Foreign Affairs Committee, when they drafted this resolution, had precisely this matter in mind, because they provided for the combination of the nations of the world into an international force for the preservation of universal peace. In other words, they did not go to the idealistic extreme of disbanding all the navies, but they took the step of preventing the expansion of the navies and continuing what we had, with the diminution incident upon the wear and tear as the international police——

Mr. MEEKER. The gentleman mentioned a moment ago the expense we are going to now for providing a navy. Does the gentleman believe, after all, our additional outlay for the Navy is ahead of our increase in wealth?

Mr. BENNET. I am quite sure it is. In fact, I know our expenditures for naval affairs are increasing with geometrical rapidity as compared with our increase in wealth.

Now, this proposition of mine does another thing. We can map out a program now and appoint a commission now, without reference to any foreign country, and when the international conference comes——

The CHAIRMAN. The time of the gentleman has expired.

Mr. BENNET. I ask unanimous consent for two minutes more.

The CHAIRMAN. The gentleman from New York asks unanimous consent for two minutes more. Is there objection?

There was no objection.

Mr. BENNET. The advantage of this proposition of permitting the President to appoint this commission now is that when the international conference comes the United States of America will have a commission which has studied the question and which will not go blindfolded into any international conference. I shall vote, in any event, for the proposition of the committee, because I think it is a step in the right direction; and with the multiplying expense of armament, it may be the best thing in the bill.

Mr. FESS. I am greatly interested in the possibility of stopping all war; but is there anything in this that might lead to an entangling alliance with another country of Europe; being a quarrel between us and a European country, that would be the outcome if it had to be referred to arbitration?

Mr. BENNET. If the gentleman will read my proposition he will not find any chance of an entangling alliance in that. But I still think the other is a step in the right direction.

Mr. DECKER. I ask in all kindness this question: Do you think it would be easier to get 10 men to agree if you laid down a specific proposition of defense, or if you say to them, "Come together, gentlemen, and let us talk it over, and we will make you suggestions and we will come to some agreement"?

Mr. BENNET. I think nine men that have spent a couple of years in educating themselves on that subject could do not only themselves good and the country good but good to the countries to which they went.

Mr. DECKER. That is what Mr. HENSLEY's resolution provides for.

Mr. BENNET. No; Mr. HENSLEY's resolution provides that upon the conclusion of the European war this commission shall be appointed. Mine provides that the commission shall be appointed now, and that if an international conference is called, then the commission shall be in existence and cooperate.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. DECKER. Mr. Chairman and members of the committee, it is not my desire to quibble about the different plans. The gentleman from Massachusetts [Mr. GARDNER] has withdrawn his amendment.

Mr. GARDNER. Mr. Chairman, will the gentleman yield just for a minute?

Mr. DECKER. Yes.

Mr. GARDNER. Just to straighten out the parliamentary tangle the amendment was withdrawn. The gentleman will offer it again just as soon as the amendment is voted down.

Mr. DECKER. Before I begin I would like to read a cablegram. It reads:

STOCKHOLM, *May 8, 1916.*

Congressman HENSLEY, *Washington, D. C.:*

Neutral conference congratulates you upon reported success in Committee on Naval Affairs in securing recommendation to Congress of appropriation for world congress at end of war. Hopes Congress will vote favorably.

LOCHNER, *General Secretary.*

[Applause.]

Now, I want to say to the distinguished gentleman from Massachusetts—and he is a distinguished gentleman—that from the beginning of time this question has been before the world. We may build our battleships as we have planned in this bill; we may train our armies to march; we may resort to the reeking sword and the belching cannon, but I hope the time will never come in this country when men will not still hope for the day when justice and love and kindness will be stronger than the sword. [Applause.]

I want to congratulate the distinguished gentleman [Mr. HENSLEY] from the State from which I come. I want to commend him for his persistence, his courage, and his lofty purpose. I know that in this hour, when the clouds of war hang over the world—in this hour, when men kneel at the shrine of Jesus Christ and then rise from their knees and rush at each other's throats—some people think it is a poor time to talk about love and peace and the brotherhood of man. I know that it is almost popular to-day to sneer at the man who plants his feet upon the doctrine of the brotherhood of man and the fatherhood of God. I know that when a man sometimes, even for a moment, dreams and hopes for the time when the war drums shall throb no longer, men will tap their heads and say, "Pacifist." If a man to-day begins to say a word in behalf of the men who pay the taxes for enormous armaments, some people will say, "Henry Ford." If a man, forsooth, dares to speak in favor of persuasion and reason as a greater power than a battleship, some one will say, "Bryanite." If a man, forsooth, dares in this hour of tragedy and in this world conflict to speak about the fellowship of human beings and the kindness that should exist between nations as well as men, some people say to themselves, "He must believe in the teaching of Jesus Christ; he must really believe in the power of love."

I am not one of those who wish to leave my country defenseless. I believe in a reasonable and adequate Navy and a reasonable and adequate Army; but I hope that this Congress and no other Congress will ever lose sight of the fact that the world power and the safety which America enjoys is not based so much upon tramping legions, battle cruisers, dreadnaughts, aeroplanes, or deadly submarines as upon the belief that this Nation does not covet any other nation's territory, that this Nation does not covet any other nation's gold, that this Nation, though it wants a world commerce, does not want a commerce built on force. We believe in the doctrine of Bismarck—that a commerce built on force is not worth what it costs, and that the price mark and diplomacy are the greatest guaranties of profitable commerce. Of course, we do not want our country to be unprepared for defense. I believe in reasonable armament, keeping in consideration all the time the Atlantic and the Pacific Oceans; keeping in consideration the less need of force if our Nation will be honest, if it will be just. [Applause.]

This paragraph which the gentleman from Massachusetts [Mr. GARDNER] moves to strike out seeks to bring about a world conference at the end of this war, looking toward arbitration and the limiting of armaments and the lessening of war. It may not strike a responsive chord in the minds of all statesmen and diplomats. It may be scoffed at by those who command the mighty navies and direct tremendous armies. But it may reach beyond these and penetrate the ranks of those who bear the burdens and fight the battles. It may reach to the trenches of Verdun and the far-flung battle line where millions of Russians, Germans, and Austrians contend. This message, direct from the people of this country, may sound above the cannon's roar and cause these fighting, dying millions to ask themselves the question, "Is there not a better way?" Even when this war is ended this paragraph may not appeal to "the masters, lords, and rulers in all lands," but it may appeal to those who, maimed and halt and blind, stagger back to ruined homes and desolate hearths. It may appeal to orphans and widowed women and childless mothers. It may appeal to those whose hearts are torn with sorrow, suffering, and woe, and those whose backs must bend under the burden of taxation necessary to pay for this mad carnival of butchery and destruction. And these are the ones to whom we want the message to go. Until these plain, common men, whose toiling, fighting, dying makes up the sum of every nation's life, until these begin to think, to question, to understand the causes that lead to international strife, there can be no hope of permanent peace. When these plain men shall come to demand that their hopes, their aims, their happiness, their lives be considered, then rulers will not think it unusual and dishonorable to resort to arbitration, negotiation, and even to concession instead of war.

Mr. HENSLEY. Mr. Chairman, I truly hope that the amendment suggested by the gentleman from New York will not be agreed to, for the reason that the provision contained in the bill on page 100, which was suggested by myself, has been gone over very carefully by the Naval Affairs Committee, and it was reported unanimously without a dissenting vote.

I am very anxious that this provision may remain in the bill without change for many reasons. Some of those reasons I discussed with the gentleman from New York, and I think he will agree with me that there are ample reasons for asking that the provision remain in the bill as it is.

Mr. Chairman, I listened with a great deal of interest to the talk made by the gentleman from Massachusetts [Mr. GARDNER]. I must say that I was astonished at the position that he took. I recall that there was a time in the history of our country when some men insisted that there should be no laws for the prevention of dueling, when some men thought it was perfectly right, when certain disputed questions of honor were involved, to go out and shoot it out with each other upon the field of honor. I recall distinctly that on many occasions—if I had time I would be glad to recite some of those occasions—when some of the best men of our country went out, and one or the other was shot down ruthlessly at the hands of a one-time friend. The gentleman from Massachusetts insists that there are questions which can not be arbitrated. Mr. Chairman, there comes a time in connection with nations the same as with individuals, when all disputed questions can be arbitrated. Is it better and wiser to first engage in war over a question of honor and after you have had killed and slaughtered thousands or millions of your people to then arbitrate the differences? Many disputes have been settled by arbitration which otherwise might have led to war.

Now, with reference to the Japanese question. Does not the gentleman from Massachusetts remember that out in California they prohibited the Japanese children from attending the public schools with the white children, which was contrary to the wishes of the Japanese? And what did Japan do? Why, when the San Francisco calamity occurred Japan answered what she regarded as an offensive act to her nation by appropriating so many millions of dollars to the sufferers of San Francisco. [Applause.]

When later California passed an alien land law for the purpose of preventing Japanese holding and owning land and when the jingo press of this country very nearly involved us in war, Japan again answered by appropriating money sufficient to make a creditable exhibition of her products at that fair.

Now, gentlemen of this committee, I say that if ever there was a time in the history of the world when this Nation should take the initiative upon a great vital question it is at this juncture. Picture, if you can, the deplorable situation that will be presented by the sufferers of Europe at the conclusion of this war. Can you imagine that in the history of the world militarism more prostrate than it will be at that time. Think of the sufferers of those countries. We can not afford to look with complacency upon these suffering people. We should think internationally and not nationally upon these great questions. Many of the things that the gentleman from Massachusetts [Mr. GARDNER] has referred to are not in this resolution. Let me read it to you so that you can intelligently pass upon it.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HENSLEY. I ask for two minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. HENSLEY. I will read it:

Upon the conclusion of the war in Europe, or as soon thereafter as it may be done, the President of the United States is authorized to invite all the great Governments of the world to send representatives to a conference which shall be charged with the duty of suggesting an organization, court of arbitration, or other body, to which disputed questions between nations shall be referred for adjudication and peaceful settlement, and to consider the question of disarmament and submit their recommendation to their respective Governments for approval. The President is hereby authorized to appoint nine citizens of the United States, who shall be qualified for the mission by eminence in the law and by devotion to the cause of peace, to be representatives of the United States in such a conference. The President shall fix the compensation of said representatives, and such secretaries and other employees as may be needed. Two hundred thousand dollars, or so much thereof as may be necessary, is hereby appropriated and set aside and placed at the disposal of the President to carry into effect the provisions of this paragraph.

I can not understand how any individual can stand upon the floor of the House and oppose this proposition. I can not quite understand his purpose. I know I have witnessed in the last few months, certainly within the last year's time ships bearing gifts going from the very hearts of the people in this country to those unfortunate sufferers of Europe that have also borne shrapnel and ammunition for the destruction of other folks over there. I have not quite understood it, but some light from day to day is thrown upon that great question. It does to me seem most abhorrent that men will stand on the floor of this House and talk in a way that indicates that they stand for war as against peace between nations. We settle differences between

men; we have a mechanism set up whereby disputes between individuals are settled. Why can not there be some sort of machinery set up between nations whereby disputed international questions may be submitted for settlement.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

[Mr. HENSLEY had leave to extend his remarks.]

Mr. CLARK of Missouri. Mr. Chairman and gentlemen, I would not take the time of the committee if I did not believe that this is the most important section of this bill. [Applause.] In the interest of clear understanding I will call it the Hensley section. I have always believed, believe now, and have always acted on that belief individually, that there are things in this life that individuals are justified in fighting for, and that there are things in the world that nations are justified in fighting for—things both personal and national, which from their very nature can not be compromised.

I have a very high opinion of the gentleman from Massachusetts [Mr. GARDNER]. He is intelligent; he is both insistent and consistent; he is courageous; he possesses mental integrity. But I never saw anything in my life that reminded me of the speech he delivered a few moments ago except the sleight-of-hand performer in a country show pulling rabbits, gold watches, and everything you can think of out of a silk hat. [Laughter and applause.] He conjured up a lot of ghosts and made them walk. He injected into the Hensley section of this bill things that Mr. HENSLEY and other members of the Naval Committee never dreamed of. There is not a thing in this resolution that justifies nine-tenths of his speech. Most of his objections are chimerical—figments of the imagination—merely that and nothing more. He wants to know whether we would be willing to arbitrate the Monroe doctrine. No. [Applause.] We will never arbitrate the Monroe doctrine while the earth spins on its axis and slides down the ecliptic. [Applause.] It is the political life preserver of the western world. [Applause.]

There are a lot of dilettante people in this country who have been talking about the Monroe doctrine being obsolete and played out and a matter of ancient times. The temper of the American people is such that they will not only retain the Monroe doctrine, but strengthen it and improve it. [Applause.] If any gentleman thinks that they do not agree on that proposition, he is very much mistaken. It is the only political proposition that the American people ever did agree on. [Applause.]

A great many people misstate what it was made for anyhow. They think that it was primarily made to help somebody else. It was primarily made for our own defense, and in a secondary way to help other people. The gentleman from Massachusetts asks if we would arbitrate the Chinese immigration question. No; and we never will. If I had my way I would shut out the entire Asiatic gang [applause], and I have always voted for every measure toward shutting them out. He asked if we would agree to arbitrate certain other great questions, questions of peace and war. No! But there are a whole multitude of questions of minor character that could be submitted to courts of arbitration with great advantage. People were accustomed to making fun of The Hague Conference. The Hague Conference did a great deal of good. It did not prevent this stupendous war, and there may be wars in days to come, although I hope not. I hope we will never be engaged in another one, and my own opinion is that if we attend strictly to our own business we never will. [Applause.] I do not believe there is a nation on earth that has little enough sense to attack us, I do not care a straw which one it is; and I have abiding faith that if one of them does attack us it will get licked in the end. [Applause.] I am not in favor of a great standing Army or a Navy that is going to overawe the world, but I am in favor of reasonable preparedness by land and sea—particularly by sea. There was a little of piety and much of wisdom in Oliver Cromwell's order to his Ironsides: "Put your trust in God but keep your powder dry." He certainly knew what he was talking about. I told Chairman HAY originally that if he would bring in an Army bill which was reasonable I would stick to him through thick and thin to the last ditch, and I did, although in order to do so and keep faith with him, I voted against one amendment I was very much in favor of. I told Chairman PADGETT the same thing, and I am going to do it. I am going to vote for his bill no matter what happens.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. CLARK of Missouri. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. GARDNER. Mr. Chairman, will the gentleman yield to me at some time during his time?

Mr. CLARK of Missouri. Yes; I think the gentleman better ask his question now.

Mr. GARDNER. The gentleman from Missouri calls attention to the fact that a great many matters can be arbitrated. We know that now. Does the gentleman from Missouri think there ought to be an international army and navy back of the international court?

Mr. CLARK of Missouri. To tell you the truth, I have not studied much about that. This does not provide for any international army or navy. I will tell you what I am in favor of about this thing. I do not believe that the great nations of the earth can stand very much longer this piling up of armaments by land and sea [applause]; that the nation-bankrupting process must come to an end; and the only way that you can bring it to an end is to have an international conference on the subject. It may prove futile at first; you may have to have a half dozen; but the only way that you are ever going to disarm all the nations is to do it by percentages. What would be the sense in asking Germany to disarm without asking France, England, Russia, and the rest to do the same thing? What would be the wisdom in asking England to disarm without asking the rest to do likewise? If they will cut these armaments down in proportion, they will be just as strong when they get through and reach the minimum, or what Capt. Hobson loved to call the "irreducible residuum"—I think that was his phrase. They would be relatively as strong as they are now. We have demonstrated in the last few weeks by the Army bill and the Navy bill and other bills which we have passed, that we propose to be reasonably prepared, and if any rash nation forces a war on us, we will see to it that it gets what it comes for and plenty of it.

I favor the Hensley proposition over the Bennet proposition because the Hensley proposition proposes that this conference shall be after the trans-Atlantic war closes. The Bennet proposition would have it right away. There is no more sense in calling a conference as long as this war rages to undertake to make peace or establish peace or prepare for peace or disarmament than there would be in undertaking to fly to the moon. They would make fun of us; they would laugh in our face; and they would do nothing at all except go on killing each other. We can afford to make this suggestion looking to disarmament. If they reject it, all well and good; we can not help it; but we can afford better than any other people under the sun to make the suggestion. We are not around seeking quarrels and fusses and fights and wars with other people. We are the richest Nation on the globe. We have the largest homogeneous population of all the nations. We are unafraid. In the interest of peace we can afford to lead the way.

The gentleman from Massachusetts [Mr. GARDNER] made another queer suggestion, and that was that if we went into this business, this court, or whatever you please to call it, and destroyed all of the battleships and the battle cruisers and other war vessels, because England has a larger merchant marine than anyone else on the face of the earth she could put some guns on her merchant vessels, and she would be stronger than she is now, relatively. Mr. Chairman, as sure as the night doth follow out the day, other people are going to increase their merchant fleets. We are; and we have started in to do it.

We can put guns on a merchant ship just as easily as Great Britain can, and so can the South American and Central American States and the neutral States of Europe and all the States and countries of the world. Arming merchantmen is a game that two—indeed, several—can play. My judgment is, giving it for what it is worth—and it is not much, because I do not know much about military affairs—when this over-seas war closes the belligerent nations of Europe now engaged in war will be so completely worn to a frazzle that they will not want to war with us or anybody else for the next quarter of a century. [Applause.] This is a good naval bill, and this is the best section in it. [Applause.]

Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. CLARK of Missouri. Under the leave to extend my remarks I here insert two short articles which I recently wrote for the National Sunday Magazine—one on "The Monroe Doctrine"; the other on "The Aftermath":

THE MONROE DOCTRINE.

Certain dilettante statesmen, writers, and orators—more philanthropic than patriotic—from time to time vociferate with great positiveness that the Monroe doctrine is obsolete, dead, and should be abandoned. According to these prophets of a New Evangel, the Monroe doctrine was good enough for such old fogies as Jefferson, Monroe, Adams, Lincoln, and Cleveland, and was all right for the stagecoach period of the Re-

public but is entirely too slow and narrow for strictly up-to-date folks in the age of electricity and flying machines.

On the contrary, the Monroe doctrine is the only proposition the American people ever agreed on. About the tariff, finance, internal improvements, and everything else they differ—about several they differ violently and in an unseemly manner—but about the Monroe doctrine all real lovers of our country of whatever persuasion, religious or political, agree. They rightly consider it far and away America's most important contribution to the code of international law, and they regard it as the political life preserver of the Western World—which it is. Consequently, they are justly proud of it and will defend and uphold it under all circumstances and at any cost.

It enabled the Central and South American Republics to maintain their independence. Under it Secretary Seward ran Louis Napoleon, Emperor of the French, out of Mexico at a time when he was the most powerful monarch on earth, when his arms glittered from China to Peru. Under it Cleveland shook his fist in the face of the British lion and forbade him to lay his paw on little Venezuela. We had no Navy then worth mentioning, but Johnnie Bull let us have our way. These are two of the proudest chapters in our history—chapters dear to the American heart.

Abandon the Monroe doctrine! By no manner of means. Obsolete! it is possessed of its pristine strength. It will be maintained in full force and effect. It will grow with our growth and remain forever a blessing to mankind from Vancouver to the Straits of Magellan. This is a plain, unvarnished statement of the sentiments of 100,000,000 American citizens.

What is this Monroe doctrine which we forced into the code of international law? Jefferson stated it—at least the germ of it—when in one of his letters he said that in order to preserve our own independence of the Central and South American countries it might be necessary to actually establish a line betwixt the Eastern and Western Hemispheres, with a distinct understanding and agreement that no gun of a power of the Eastern Hemisphere should ever be heard in the Western Hemisphere and vice versa. That is a much stronger statement of the American position than the one formulated by his friend, neighbor, and political pupil, James Monroe, the last of the Virginia dynasty. John Quincy Adams was Monroe's Secretary of State, and there is a disposition to filch from the great Viriginian the honor of being the father of his own doctrine and to confer it upon his renowned New England Secretary of State, who needs no borrowed honors to confirm his fame. But I do not believe that that scheme will work, and it will forever remain the Monroe doctrine in the minds and hearts of the people. The chances are the Mr. Secretary Adams formulated it—clothed it with proper language, a performance in which he was a master artist—but the idea was Monroe's.

In his annual message of 1823, he stated it in these words:

"We owe it, therefore, to candor and to the amicable relations existing between the United States and those powers (European powers) to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonies or dependencies of any European power we have not interfered and shall not interfere. But with the Governments who have declared their independence and maintained it, and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing them, or controlling in any other manner their destiny, by any European power in any other light than as the manifestation of an unfriendly disposition toward the United States. In the war between those new Governments and Spain we declared our neutrality at the time of their recognition, and to this we have adhered, and shall continue to adhere, provided no change shall occur which, in the judgment of the competent authorities of this Government, shall make a corresponding change on the part of the United States indispensable to their security."

That is the Monroe doctrine. Most assuredly it was a modest statement. We were a modest people then; but we have outgrown that modesty, and the doctrine has kept pace with our growth and strength until it means what Cleveland said it meant in our squabble with Great Britain touching the Venezuelan question; that is, that in political matters we are supreme in the Western Hemisphere.

The nations of the Old World have never liked the Monroe doctrine. At the time it was proclaimed to a startled world Great Britain pretended to like it, but she has made more than one attempt to violate it.

Aaron Burr said: "Whatever is boldly asserted and plausibly maintained is law!" And while Old World Governments did not take kindly to the doctrine, they knew that we boldly asserted it, and they believed we would maintain it even at the cannon's mouth. So with much shaking of heads and fists, with many savage objurgations as to American upstarts across the sea they concluded to let us have our way. It was a wise conclusion. It was, as Westerners would say, "A ground-hog case."

Monroe's statement of his doctrine is terse, succinct, clear as crystal. It seems to me that nobody with two ideas above a Hottentot can mistake its meaning, and yet perhaps no state document in all the hoary registers of time has been so misconstrued. Many well-informed persons appear to think that it constitutes us a sort of universal constable—a meddler-in-general in the affairs of all the Governments of the Western Hemisphere. A more astounding or pernicious misconception never entered the mind of man.

That interpretation of the Monroe doctrine would keep us in hot water continually and get us into all sorts of trouble. It would cost us the lives of thousands of the flower of American youth, to say nothing of hundreds of millions of dollars.

The clear intent of the Monroe doctrine—and all there is to it—is to warn the nations of Europe against any attempt on their part to set up their system of Government—which evidently meant the monarchical system—in this hemisphere.

How, then, does it happen that we interfered in Cuba, San Domingo, Nicaragua, and Haiti, and may be forced to interfere in Mexico?

Of course, all sane people hope we will not be forced so to do. By what right have we interfered with the affairs of these countries? Simply to protect the lives and property of American citizens and, in an altruistic spirit, to protect the people of those countries against themselves.

We interfered in Cuban affairs and did a great and noble work. We took over the financial affairs of San Domingo and they have had no trouble since; but we have never meddled with their quarrels or their wars.

For our own protection, for the protection of the Haitians themselves, and to maintain the Monroe doctrine without resort to war with European nations, we should, if we can, make some such arrangement with the Haitians that we have with Cuba. It would be better for us, better for Haiti, better for the world, than the utter chaos which has prevailed for a century in that beautiful and fertile island country.

We have sometimes interfered to preserve American lives and American property, and perhaps may be compelled to do so again, for the vast majority of Americans are determined that our foreign policy everywhere shall be such as to make the sentence "I am an American" a safe passport in every country under the sun.

—

THE AFTERMATH.

It goes without saying that free speech is one of our most priceless heritages—and one that always has been and must be jealously safeguarded. But the tendency of the American people to confuse free speech and loose talk has never been more pronounced than at the present time. Its rampant indulgence is at once disquieting and amazing, concerning itself chiefly, of course, with the European-Asiatic-African war and the aftermath thereof.

It is with the aftermath of the war that the following observations are concerned. The prophets of disaster are in their element when making themselves and other timid folks miserable by conjuring up the dire calamities that will befall the United States at the close of the trouble across the seas. They can not deny our present unprecedented prosperity, in which everybody ought to take pleasure, but which many inconsiderate thinkers and talkers seem to take as a personal grievance. They are the skeletons at our feast and prophesy adversity with an unction which shows that they hope for the evils which they foretell.

Item: While admitting most reluctantly that every factory of every sort in all this spacious land is running overtime and making profits unheard of till now, they solemnly asseverate that so soon as the overseas war ends Europe will ruin all American manufacturers by the simple process of dumping her surplus wares upon us. Who can sanely accept or be disturbed by such a preposterous conclusion? Who can believe that at the close of this war Europe will happen to have a surplus of anything except ruin and sorrow with which to jeopardize American prosperity and the welfare of the Republic? Anybody who thinks carefully and has a modicum of vision must foresee that Europe, instead of being burdened with a surplus of wares and merchandise, being in fact afflicted with a painful shortage in respect to such, will, when the war is over, be busy trying to supply wares and merchandise to its own people.

Item: Many of our people view with grave apprehension the prospect of a vastly increased immigration into this country when peace is established beyond the seas, which is another figment of imagination. The chances are that the immigration into this country for a decade, perhaps for a generation, will be negligible, for good and sufficient reasons. Because so many have been killed, crippled, or incapacitated by disease, by exposure in camp, on the march, or in the field, the prospect is that every man or woman desiring employment at home will be able to find it at a higher wage than heretofore. Therefore and thereby the temptation to emigrate from their old homes and seek a new country, particularly this one, will be diminished. Many persons seem to think that the only reason why immigrants come to America is because they desire to live in a Republic. No doubt that is the reason why many do come hither, but many others—a majority perhaps—come because of the greater rewards for labor, whether skilled or unskilled, whether of brain or of brawn. It is confidently submitted that both these motives are rational and honorable. These two classes embrace the bulk of the immigrants to American shores, not to mention the comparatively few who flee from religious or political persecutions and others who, like the Knight of La Mancha, come in quest of ventures. It is safe to say that 95 per cent of all who emigrate from Europe leave the land of their birth with regret, a regret inherent in human nature itself and honorable to the human heart.

It is also safe to say that if the rewards of toil are even approximately equal in their own country and in another, most folks the wide world over prefer to stay in their native land, amid the scenes of childhood, and in company with kindred and friends. It is not to Americans alone that the song, "Home, Sweet Home," appeals, but to all the peoples of the earth.

When this stupendous conflict closes laborers of every kind will be so scarce in the belligerent countries that wages are as certain to rise in them as the sun is to shine; and just as wages increase, so emigration will decrease. It is bound to be so. It can not be otherwise.

Not more than two cases need be advanced to sustain the conclusion as to reduced immigration into this country.

The first mighty army of our immigrants came from Ireland, because of the hard conditions prevailing at home, particularly as to religious and political freedom, education, rents, and ownership of land. Almost exactly in proportion as conditions have improved in Ireland the Irish have ceased to emigrate—for no people are more ardent lovers of their native land.

Following the vast Irish immigration came that of the Germans—a vaster still. Until some 30 or 40 years ago our principal supply of immigrants came from Germany. When the present war began, the great stream of German immigrants had dwindled almost to the vanishing point. What was the reason for this shrinkage? It is clear that it was because the great industrial awakening of Germany—one of the most astounding phenomena of modern times—gave employment at home to hundreds of thousands at higher wages in new kinds of work. That was among the chief of the herculean labors Bismarck performed for his country. Germans found employment at home at more remunerative wages than were obtainable prior to the great industrial awakening, and the number of immigrants into this country from the Fatherland grew constantly smaller year by year, until it practically ceased altogether.

I repeat, that that was one of the main benefactions which Bismarck wrought for Germany, for it made her one of the foremost manufacturing and exporting nations of the globe. And the truth is that no statesman or leader of men ever worked more persistently and industriously at any self-imposed task than Kaiser Wilhelm II has labored to increase the manufactures and exports of Germany.

Query: If improved conditions as to the rewards of labor in Ireland and Germany, whence so many of our most desirable immigrants came in the earlier day, diminished the emigration from those countries, why is not the same result likely to happen in the present warring nations?

So it seems that instead of our country being swamped by a tremendous host of immigrants, the Anti-Immigration Society is likely to find itself in the condition of Othello, for its "occupation will be gone."

Mr. PADGETT. Mr. Chairman, I ask for a vote on the amendment.

Mr. BENNET. Mr. Chairman, I ask for one moment to close debate on my amendment.

Mr. MANN. Will that close debate?

Mr. BENNET. I have no objection to debate being closed. I understand the gentleman from Massachusetts [Mr. GARDNER] is going to offer an amendment to strike out the clause.

Mr. MANN. Mr. Chairman, I ask that debate on this pending amendment close in two minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that debate on the pending amendment close in two minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. BENNET. Mr. Chairman, when the gentleman from Missouri [Mr. CLARK] and myself were both Members of the Sixty-first Congress he sat down and read this amendment of mine. He favored my amendment and helped get it through the House. If my amendment did what he thinks it does I would be against it myself. Now I want the gentlemen of the committee to listen to it. It says:

That a commission of nine members be appointed by the President of the United States to consider the expediency of utilizing existing international agencies for the purpose of limiting the armaments of the nations of the world by international agreement and of constituting the combined navies of the world an international force for the preservation of universal peace and to consider and report upon any other means to diminish the expenditures of government for military purposes and to lessen the probabilities of war.

Why, we would be crazy if we proposed to call an international conference in the midst of this war conflagration. This is for the purpose of getting ready for the conference which the gentleman from Missouri and I both agree is going to come, which will be forced by the awful cost of war and the burden of taxation.

The CHAIRMAN. The time of the gentleman has expired; all time has expired. The question is on agreeing to the amendment offered by the gentleman from New York.

The question was taken, and the amendment was rejected.

Mr. GARDNER. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 100, line 10, strike out all down to line 15 on page 101.

Mr. SISSON rose.

Mr. MANN. Mr. Chairman——

Mr. SISSON. I desire to state to the gentleman that I have not opened my mouth during this debate, and this is one item in which I am interested.

Mr. MANN. How much time does the gentleman desire to take?

Mr. SISSON. I do not think I will desire more than five minutes, but if I should want a minute or two more I should dislike very much to be cut off.

Mr. MANN. We will give it to the gentleman. Mr. Chairman, I ask unanimous consent that debate on the amendment close in five minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that debate on the pending amendment close in five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. SISSON. Mr. Chairman, the gentleman from Alabama [Mr. OLIVER] wants to make a unanimous-consent request.

Mr. OLIVER. Mr. Chairman, I ask unanimous consent to have inserted in the RECORD an address delivered by Admiral Benson, Chief of Naval Operations, before the graduating class at Annapolis, which is full of information touching very important provisions in this bill.

The CHAIRMAN. The gentleman will have to do that in the House.

[Mr. SISSON addressed the committee. See Appendix.]

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was rejected.

Mr. SISSON. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. PADGETT. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. FITZGERALD, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 15947) making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes, and had come to no resolution thereon.

LEAVE OF ABSENCE.

Mr. BURKE, by unanimous consent, was granted leave of absence for two weeks on account of illness in his family.

EXTENSION OF REMARKS.

Mr. PADGETT. Mr. Speaker, I wish to submit a request for unanimous consent that everyone have leave to print for five legislative days upon the naval bill.

The SPEAKER. The gentleman from Tennessee [Mr. PADGETT] asks unanimous consent that all gentlemen have the right to extend their remarks in the RECORD for five legislative days on the naval appropriation bill.

Mr. MOORE of Pennsylvania. Reserving the right to object, I ask the gentleman to let that request go over until to-morrow. Let us dispose of it to-morrow.

Mr. PADGETT. Let us dispose of it to-night.

Mr. MOORE of Pennsylvania. If the gentleman insists, I shall object to it now. Let us see how to-morrow works out.

Mr. McKELLAR. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the rural-credits question.

The SPEAKER. Is there objection?

There was no objection.

Mr. FESS. Mr. Speaker, I ask unanimous consent to print in the RECORD an address delivered at Canton, Ohio, on Memorial Day, to the McKinley Post, by my colleague, Representative DAVID A. HOLLINGSWORTH.

The SPEAKER. The gentleman from Ohio asks unanimous consent to extend his remarks in the RECORD by printing a speech made to the McKinley Grand Army Post at Canton, Ohio, on Memorial Day by his colleague, Mr. HOLLINGSWORTH. Is there objection?

There was no objection.

Mr. OLIVER. Mr. Speaker, I ask unanimous consent to insert in the RECORD a speech delivered by Admiral Benson, Chief of Naval Operations, before the graduating class at Annapolis to-day.

The SPEAKER. The gentleman from Alabama asks unanimous consent to extend his remarks in the RECORD by printing a speech delivered by Admiral Benson at Annapolis. Is there objection?

There was no objection.

Mr. MUDD. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the naval appropriation bill.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. CALDWELL. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the naval appropriation bill.

The SPEAKER. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD on the naval appropriation bill. Is there objection? [After a pause.] The Chair hears none.

Mr. DECKER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the naval appropriation bill.

The SPEAKER. Is there objection?

There was no objection.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 1059. An act to provide for the payment for certain lands within the former Flathead Indian Reservation, in the State of Montana; to the Committee on the Public Lands.

S. 1550. An act to authorize the establishment of fish-cultural stations on the Columbia River or its tributaries in the State of Oregon or the State of Washington; to the Committee on the Merchant Marine and Fisheries.

S. 1746. An act for the relief of Delilah Siebenaler; to the Committee on Claims.

S. 4526. An act authorizing the Arikara, Gros Ventre, and Mandan Tribes of Indians, of the Fort Berthold Reservation, N. Dak., to submit claims to the Court of Claims; to the Committee on Claims.

S. 3539. An act for the relief of John L. Moon; to the Committee on Claims.

S. 798. An act for the relief of Kate Canniff; to the Committee on Claims.

S. 147. An act for the relief of John W. Cupp; to the Committee on Claims.

S. 28. An act for the relief of George T. Hamilton; to the Committee on War Claims.

S. 4810. An act for issuance of a patent for certain Government land to Benjamin F. Robinson and John Dows; to the Committee on the Public Lands.

S. 4807. An act for the relief of James W. Cross; to the Committee on Claims.

S. 4368. An act for the relief of D. A. Barbour and Andrew P. Gladden; to the Committee on Claims.

S. 3533. An act for the relief of Mike G. Womack; to the Committee on Claims.

S. 5851. An act to extend the time for constructing a bridge across the Eastern Branch of the Elizabeth River in Virginia; to the Committee on Interstate and Foreign Commerce.

S. 5425. An act to standardize lime barrels; to the Committee on Coinage, Weights, and Measures.

S. 5805. An act permitting the Riverview Ferry Co. to construct, maintain, and operate a bridge across the Yellowstone River in the State of Montana; to the Committee on Interstate and Foreign Commerce.

S. 4594. An act to validate certain declarations of intention to become citizens of the United States; to the Committee on Immigration and Naturalization.

S. 6239. An act authorizing the Commissioner of Navigation to document as vessels of the United States two dredges built of American material and owned by James Stewart & Co. (Inc.), a citizen of the United States; to the Committee on Interstate and Foreign Commerce.

ADJOURNMENT.

Mr. PADGETT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 53 minutes p. m.) the House adjourned until Friday, June 2, 1916, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Treasury, transmitting copy of a communication from the president of the Board of Commissioners of the District of Columbia submitting estimates of urgent deficiencies in appropriations required for the service of the fiscal year ending June 30, 1916 (H. Doc. No. 1186); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication from the Secretary of the Navy submitting an estimate of deficiency in the appropriation for "Pay, miscellaneous, fiscal year 1913," to pay the New York Telephone Co., for rental of telephones at the New York Navy Yard, $94.50 (H. Doc. No. 1187); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. IGOE, from the Committee on the Judiciary, to which was referred the bill (H. R. 15158) to amend the Judicial Code, to fix the time when the annual term of the Supreme Court shall commence, and further to define the jurisdiction of that court, reported the same without amendment, accompanied by a report (No. 794), which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and a resolution were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. MILLER of Delaware, from the Committee on Claims, to which was referred the bill (H. R. 14528) for the relief of W. W. Finn, reported the same with amendment, accompanied by a report (No. 792), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 8698) for the relief of William W. Danenhower, reported in lieu of said bill H. Res. 252, accompanied by a report (No. 793), which said resolution and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 7485) granting a pension to Lee Allen; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 15177) for the relief of Leander Parker; Committee on Invalid Pensions discharged, and referred to the Committee on Military Affairs.

A bill (H. R. 14396) granting a pension to Eliza J. Reed; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and resolutions were introduced and severally referred as follows:

By Mr. STEDMAN: A bill (H. R. 16171) increasing the limit of cost for the purchase of a site for the erection of a public building at Mount Airy, N. C.; to the Committee on Public Buildings and Grounds.

By Mr. STOUT: A bill (H. R. 16172) to define the qualifications of Representatives in Congress; to the Committee on Election of President, Vice President, and Representatives in Congress.

By Mr. JOHNSON of Kentucky: A bill (H. R. 16173) to protect the hungry, the naked, the sick, and the dead in the District of Columbia from extortion, and for other purposes; to the Committee on the District of Columbia.

By Mr. REAVIS: A bill (H. R. 16174) to fix standard sizes for baskets or other containers for small fruits, berries, vegetables, and other agricultural products, and for other purposes; to the Committee on Coinage, Weights, and Measures.

By Mr. FESS: A bill (H. R. 16175) providing for the acquisition of a site and the erection thereon of a public building for the city of London, Madison County, Ohio; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 16176) providing for the acquisition of a site and erection thereon of a public building for the city of Marysville, Union County, Ohio; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 16177) providing for the acquisition of a site and erection thereon of a public building for the city of Lebanon, Warren County, Ohio; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 16178) providing for the erection of a public building for the city of Urbana, Champaign County, Ohio; to the Committee on Public Buildings and Grounds.

By Mr. SHOUSE: A bill (H. R. 16179) authorizing the Secretary of War to donate to the city of Lyons, in the county of Rice and State of Kansas, two bronze or brass cannon or field-pieces, with their carriages; to the Committee on Military Affairs.

By Mr. WM. ELZA WILLIAMS: A bill (H. R. 16180) to prohibit the giving or receiving of tips or other gratuities; to the Committee on Interstate and Foreign Commerce.

By Mr. SMALL: A bill (H. R. 16181) to provide for the erection of a public building at Edenton, N. C.; to the Committee on Public Buildings and Grounds.

By Mr. KETTNER: A bill (H. R. 16182) for the purchase of a site for a public building at Santa Ana, Orange County, Cal.; to the Committee on Public Buildings and Grounds.

By Mr. McCULLOCH: A bill (H. R. 16183) to create a United States Tariff Commission, to define its powers and duties, and for other purposes; to the Committee on Ways and Means.

By Mr. McKELLAR: A bill (H. R. 16184) to reduce the tax on oleomargarine; to the Committee on Agriculture.

By Mr. DUPRÉ: A bill (H. R. 16185) to give the consent of the Congress to the construction of a bridge across the Mississippi River near and above the city of New Orleans, La., and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. BELL: Resolution (H. Res. 251) authorizing the Doorkeeper to employ additional labor for folding speeches; to the Committee on Accounts.

By Mr. HULL of Iowa (by request): Resolution (H. Res. 253) for adopting the Decalogue and Jesus' rule as standard measure for laws and regulations of the Government of the United States; to the Committee on Alcoholic Liquor Traffic.

By Mr. COX: Resolution (H. Res. 254) asking the belligerent nations to agree to an armistice; to the Committee on Foreign Affairs.

By Mr. STEPHENS of Texas: Joint resolution (H. J. Res. 233) to officially recognize a floral emblem for the United States of America; to the Committee on the Library.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. BEALES: A bill (H. R. 16186) granting a pension to Mary A. Hemler; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16187) granting an increase of pension to Isaac Myers; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16188) granting an increase of pension to Mary A. Wilhelm; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16189) granting an increase of pension to Morris W. Hackman; to the Committee on Invalid Pensions.

By Mr. FIELDS: A bill (H. R. 16190) granting a pension to Carrie S. Wright; to the Committee on Invalid Pensions.

By Mr. HARRISON: A bill (H. R. 16191) granting a pension to Georgia Gentry; to the Committee on Invalid Pensions.

By Mr. HOUSTON: A bill (H. R. 16192) granting an increase of pension to Nancy J. Frame; to the Committee on Pensions.

By Mr. JOHNSON of South Dakota: A bill (H. R. 16193) granting an increase of pension to William Mitchell; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16194) granting an increase of pension to Richard A. Woodall; to the Committee on Invalid Pensions.

By Mr. KETTNER: A bill (H. R. 16195) granting a pension to Mrs. Augusta Schreiner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16196) granting a pension to Agnes Perry Wilson; to the Committee on Pensions.

By Mr. KIESS of Pennsylvania: A bill (H. R. 16197) granting a pension to Catharine Keen; to the Committee on Invalid Pensions.

By Mr. LIEBEL: A bill (H. R. 16198) granting a pension to Annie H. Hastings; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16199) for the relief of James Tweed; to the Committee on Military Affairs.

By Mr. MAGEE: A bill (H. R. 16200) granting an increase of pension to John A. Jaynes; to the Committee on Pensions.

By Mr. OAKEY: A bill (H. R. 16201) granting a pension to Fred G. Kasimir; to the Committee on Pensions.

By Mr. POWERS: A bill (H. R. 16202) granting a pension to Bertha Shackelford; to the Committee on Pensions.

By Mr. SMITH of Idaho: A bill (H. R. 16203) granting an increase of pension to Charles Richter; to the Committee on Invalid Pensions.

By Mr. TINKHAM: A bill (H. R. 16204) granting a pension to Mary A. Bowen; to the Committee on Pensions.

By Mr. WM. ELZA WILLIAMS: A bill (H. R. 16205) granting a pension to Joseph K. Bellemey; to the Committee on Pensions.

By Mr. WILSON of Illinois: A bill (H. R. 16206) granting a pension to Carl B. Traver; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ASHBROOK: Evidence to accompany House bill 6125, for relief of Charles W. Bryant; to the Committee on Invalid Pensions.

By Mr. BORLAND: Petition of sundry citizens of Kansas City, Mo., regarding execution by English Government of Padrias H. Pearse and others in Ireland; to the Committee on Foreign Affairs.

By Mr. CAREW: Petition of the Indianapolis (Ind.) Board of Trade favoring passage of the Pomerene bill-of-lading bill; to the Committee on Interstate and Foreign Commerce.

By Mr. DOOLING: Petition of National Automobile Chamber of Commerce, relative to data regarding production of petroleum; to the Committee on Ways and Means.

By Mr. FOCHT: Evidence in support of House bill 12140, for relief of Caroline Smith; to the Committee on Pensions.

By Mr. GARDNER: Petitions of various citizens of Beverly, Mass., favoring the passage of the Webb-Smith national prohibition resolution; to the Committee on the Judiciary.

By Mr. GREENE of Vermont: Petition of George W. Peck, jr., and others, of first congressional district, against the passage of House bill 13048, to create a juvenile court; to the Committee on the Judiciary.

Also, petition of Dr. E. F. Johnson, of Orwell, Vt., against passage of House bill 13778, to exclude from the mails certain publications; to the Committee on the Post Office and Post Roads.

By Mr. HAMLIN: Papers to accompany House bill 15408, a bill to pension John E. Opedyke; to the Committee on Invalid Pensions.

By Mr. HOLLINGSWORTH: Memorial of Ohio Yearly Meeting of Friends, against increase in Army; to the Committee on Military Affairs.

Also, memorial of J. G. Battelle, against legislation to prevent use of scientific efficiency methods in industrial operations; to the Committee on Labor.

By Mr. KETTNER: Petition of E. L. M. Tate, director California State Board of Health, of Sacramento, Cal., protesting against Senate resolution disqualifying the Surgeon General from holding office in or becoming a member of any medical or private health association; to the Committee on Appropriations.

Also, petition of J. H. Smith and Hon. George Puterbaugh, 742 Second Street, San Diego, Cal., favoring House bill 386, creating Civil War volunteer officers' list; to the Committee on Military Affairs.

Also, petition of C. E. Lamb, of Big Pine, Cal., favoring House bill 9216, providing eight-hour workday for railroad agents and telegraphers; to the Committee on Labor.

Also, petition of F. D. Teall, 2931 Thorn Street, San Diego, Cal., protesting against the Shields water-power bill; to the Committee on Military Affairs.

Also, petition of R. C. Brinkerhoff, of Riverside, Cal., protesting against the juvenile-court bill; to the Committee on the District of Columbia.

Also, petition of Levi S. Taylor and Edith D. Hopkins, of Pasadena, Cal., protesting against increase in Army and Navy; to the Committee on Military Affairs.

By Mr. LIEBEL: Papers to accompany House bill 16198, for relief of Annie H. Hastings; to the Committee on Invalid Pensions.

By Mr. LINTHICUM: Petition of Baltimore (Md.) Federation of Labor, favoring passage of employers' liability act, House bill 10318; to the Committee on the District of Columbia.

Also, petition of Pattern Makers' Association, of Baltimore, Md., favoring House bill 11168, relative to leave of absence for employees of navy yards and arsenals; to the Committee on Naval Affairs.

By Mr. LOBECK: Memorial passed by the temperance committee of the People's Society of Christian Endeavor of Castellar Presbyterian Church, of Omaha, Nebr., petitioning Congress to pass the Barkley and Sheppard bills, prohibiting liquor traffic in the District of Columbia; to the Committee on the District of Columbia.

Also, memorial of Temperance Society of Christian Endeavor, of Omaha, Nebr., petitioning Congress to prohibit the sale of intoxicants in Porto Rico; to the Committee on Insular Affairs.

By Mr. LONDON: Petition of the Workmen's Circle Sixteenth Annual Convention, at New York City, protesting against the agitation for military preparedness and against the introduction of military training into schools, "transforming them into military barracks instead of institutions for the mental development of the young"; to the Committee on Military Affairs.

By Mr. MATTHEWS: Evidence in support of House bill 16139, a bill for the relief of John S. Conkright; to the Committee on Military Affairs.

By Mr. NOLAN: Petitions of California Federation of Women's Clubs, favoring woman suffrage; to the Committee on the Judiciary.

Also, petitions of California Federation of Women's Clubs, favoring S. 5408, to create a women's division in the Department of Labor; to the Committee on Labor.

By Mr. O'SHAUNESSY: Memorial of mass meeting of citizens of Providence, R. I., favoring Dyer resolution relative to execution of Irish prisoners by English Government; to the Committee on Foreign Affairs.

Also, petition of Committee of Ten, Rhode Island Branch National Metal Trades Association, Beakman & Smith, Providence, R. I., against antiefficiency rider to naval appropriation bill; to the Committee on Naval Affairs.

Also, memorial of Rhode Island State Federation of Labor, favoring employers' liability act, House bill 10318; to the Committee on the District of Columbia.

By Mr. SCULLY: Petition of United Hatters of North America, Local No. 4, of Orange, N. J., relative to appropriation for purchase of campaign hats for United States Army; to the Committee on Military Affairs.

Also, petition of Colonial Dames of America, favoring preparedness; to the Committee on Military Affairs.

Also, memorial of convention of Mental Hygiene Societies of the United States, relative to division of mental hygiene in the United States Public Health Service; to the Committee on Interstate and Foreign Commerce.

By Mr. SINNOTT: Petition of citizens of Carson and Halfway, Oreg., against law enforcing the observance of a religious institution, etc.; to the Committee on the Judiciary.

Also, petition of citizens of Rye Valley, Oreg., against House bill 13048, to create a juvenile court in the District of Columbia; to the Committee on the District of Columbia.

By Mr. SMITH of Idaho: Memorial of Wendell (Idaho) Grange, No. 82, against limiting the weight of parcel-post pack-

ages to 50 pounds; to the Committee on the Post Office and Post Roads.

By Mr. SNELL: Petition of T. S. Hanmer, B. L. Hanmer, E. M. Hanmer, Herman A. James, Jacob Daniels, Allen Farr, Mrs. Elizabeth Farr, L. A. Harding, William La Bounty, J. E. Corey, Charlotte Beck, A. B. Moore, Mrs. Phebe Gray, Vernon Lamoy, Berton H. Farrell, D. A. Farrell, M. E. Henry, M. R. Wood, Mrs. Liggett, P. M. Light, Charles Collins, Aaron Weinstock, S. Weinstock, A. J. Foster, and Ernest Foster, all of Saranac Lake, N. Y., protesting against the passage of House bill 6468 and House bill 491, known as the Fitzgerald and Siegel bills; to the Committee on the Post Office and Post Roads.

Also, petition of Theo. S. Hanmer, B. L. Hanmer, Truman Hanmer, William La Bounty, J. E. Cory, A. B. Moore, Mrs. Phebe Gray, Berton H. Farrell, D. A. Farrell, M. E. Harney, Mary R. Wood, Mrs. Liggett, P. M. Light, L. Weinstock, Aaron Weinstock, A. J. Foster, and Ernest Foster, all of Saranac Lake, N. Y., protesting against House bill 652; to the Committee on the District of Columbia.

By Mr. STINESS: Petition of Livermore & Knight Co., of Providence, R. I., against bill to discontinue the Taylor system in Government shops; to the Committee on Labor.

Also, petition of sundry citizens of Providence and Kent Counties, R. I., favoring national prohibition; to the Committee on the Judiciary.

Also, memorial of a mass meeting of citizens of Providence, R. I., favoring Dyer resolution relative to treatment of Irish prisoners by English Government; to the Committee on Foreign Affairs.

By Mr. WALSH: Petition of 200 citizens of New Bedford, presided over by Charles Mitchell, in meeting assembled on May 22, petitioning for the speedy passage of Webb-Smith resolutions (H. J. Res. 84 and 85), proposing amendment to the Constitution prohibiting beverage traffic in intoxicating liquors; to the Committee on the Judiciary.

By Mr. YOUNG of North Dakota: Petition of Dakota conference of the Evangelical Association, favoring national prohibition; to the Committee on the Judiciary.

SENATE.

FRIDAY, *June 2, 1916.*

The Senate met at 11 o'clock a. m.

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we seek Thy guidance and blessing for the duties of this day that we may be prepared for every issue with that spiritual equipment that will give us the authority of those who dwell in communion with God and who are the exponents of God's will. Thou hast not separated Thyself from us even in our smallest interests, and Thou art with us to guide us in our larger national life. Do Thou take charge of us this day that we may perform Thy will and that all that we do may be in accordance with Thy law. Grant us the grace that comes from God. Bring every emotion of our hearts into subjection to Thy will. For Christ's sake. Amen.

The Journal of the proceedings of the legislative day of Wednesday, May 31, 1916, was read and approved.

PETITIONS AND MEMORIALS.

Mr. CHAMBERLAIN presented a memorial of sundry citizens of Alsea, Oreg., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

He also presented a petition of sundry citizens of Salem, Oreg., praying for national prohibition, which was referred to the Committee on the Judiciary.

Mr. REED. I present resolutions adopted at a meeting of certain prominent Irish-American citizens of Kansas City, Mo., regarding the execution by the English Government of Padriac H. Pearse, provisional president of Ireland, and his compatriots. Accompanying the resolutions is a letter from Hon. Frank P. Walsh, chairman of the executive committee, transmitting the resolutions to me. I ask that the letter and accompanying resolutions be printed in the RECORD.

There being no objection, the letter and accompanying resolutions were ordered to be printed in the RECORD, as follows:

KANSAS CITY, MO., *May 29, 1916.*

Hon. JAMES A. REED,
United States Senate, Washington, D. C.

DEAR MR. REED: We have the honor to hand you herewith resolutions adopted at a meeting of our citizens regarding the execution by the English Government of Padriac H. Pearse, provisional president of Ireland, and his compatriots upon charges of fomenting rebellion.

The resolutions were unanimously adopted by the 4,000 men and women attending the meeting, which was held in this city upon May 21, 1916.

The committee would be pleased if you will present the resolutions to Congress.

Very truly, yours,

FRANK P. WALSH,
Chairman Executive Committee.
MAURICE J. MCNELLIS,
Secretary.
D. V. KENT,
FRANCIS C. DOWNEY,
WILLIAM P. HARVEY,
M. A. FLYNN,
JOHN J. O'CONNOR,
RICHARD J. HIGGINS,
WILLIAM E. LYONS,
JOHN NANGLE,
Members Executive Committee.

At the sacred altar of human liberty, before whose portals the flame of Irish freedom has burned for centuries, the blood of our race has been reconsecrated to its loftiest and finest ideal.

THE ESTABLISHMENT OF THE IRISH REPUBLIC.

England has again shocked the world with a series of barbaric crimes against civilization in the cruel murders of Patrick H. Pearse, James Connolly, Thomas McDonagh, and their brave compatriots.

These latest iniquities should receive the condemnation of lovers of liberty everywhere.

These men, the very flower of Irish manhood, were slain for the assertion of the identical principles written into the American Declaration of Independence by Thomas Jefferson and vindicated by the sword of the immortal Washington.

In the sublime effort which cost them their lives they represented an unconquered race in a state of war against an invading and oppressive enemy, and, as prisoners of war, were entitled to the treatment which truly civilized governments extend to captured foes.

It is repellant to every human ideal that any people should be oppressed by force or their nationality suppressed. Efforts to do so are of the primal causes of war.

Ireland's struggle for freedom has persisted through the generations, kept alive by the indomitable courage and deeply implanted traditions of her sons and daughters.

She has never surrendered her unity of purpose, national ideals, or customs, and has ever preserved a racial tongue. These things constitute the deathless soul of a nation.

Unvanquished, unafraid, her children have ever clung to their righteous ambition to take that place in the world of nations which is the divine heritage of an autonomous and invincible race.

We, therefore, as American citizens, enter our solemn protest against this latest atrocity of the English Government and its wanton violation of the humanities in the cowardly assassination of these Irish statesmen and soldiers, and call upon the President and Congress to use the powerful influence of America to prevent massacres of like character.

We also earnestly demand, in case it becomes the duty of our Government to select mediators to bring about peace in Europe, that the Republic of Ireland be represented with the other nations, to the end that free government may be established there and the holy cause of democracy advanced throughout the world.

As loyal citizens of a neutral country, we desire to offer a historic precedent for our action here to-day by reminding our fellow citizens of the fact that after the Declaration of American Independence was proclaimed Benjamin Franklin went to Europe to plead the cause of the American "rebels" of that day and ask assistance.

In his wisdom he first went to Dublin. The Irish Parliament was then in session. He was granted the privilege of addressing that body, and then and there the Irish Legislature passed a resolution indorsing the Declaration of Independence, and thus went on record as the first legislative body on earth that did indorse it.

PORT OF NOYES, MINN.

Mr. NELSON. From the Committee on Commerce I report back favorably without amendment the bill (S. 5645) for the establishment of Noyes, in the State of Minnesota, as a port of entry and delivery for immediate transportation without appraisement of dutiable merchandise. It is a very short bill, and I ask unanimous consent for its present consideration.

There being no objection, the bill was considered as in Committee of the Whole. It extends the privileges of the first and seventh sections of the act approved June 10, 1880, governing the immediate transportation of dutiable merchandise without appraisement to the port of Noyes, in the State of Minnesota.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CALLING OF THE ROLL.

Mr. KERN. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hollis	Overman	Stone
Brady	Jones	Page	Sutherland
Brandegee	Kern	Reed	Thomas
Chamberlain	La Follette	Saulsbury	Thompson
Clark, Wyo.	Lane	Sheppard	Townsend
Culberson	Lea, Tenn.	Simmons	Vardaman
Curtis	Lodge	Smith, Ariz.	Warren
Dillingham	Myers	Smith, Ga.	Works
Fall	Nelson	Smith, Md.	
Fletcher	Newlands	Smith, S. C.	
Gallinger	Norris	Sterling	

Mr. TOWNSEND. The senior Senator from Michigan [Mr. SMITH] is absent on important business. He is paired with the junior Senator from Missouri [Mr. REED]. I desire this announcement to stand for the day.

Mr. SUTHERLAND. My colleague [Mr. SMOOT] is unavoidably absent from the Senate. I make this statement to stand for the day.

Mr. KERN. I desire to announce the unavoidable absence of my colleague [Mr. TAGGART]. This announcement may stand for the day.

Mr. GALLINGER. I will announce the unavoidable absence of the Senator from Maine [Mr. BURLEIGH] on account of illness and allow this announcement to stand for the day.

The VICE PRESIDENT. Forty-one Senators have answered to the roll call. There is not a quorum present. The Secretary will call the roll of absentees.

The Secretary called the names of the absent Senators, and Mr. PITTMAN and Mr. WILLIAMS answered to their names when called.

Mr. BANKHEAD, Mr. SHAFROTH, Mr. HARDWICK, and Mr. BROUSSARD entered the Chamber and answered to their names.

Mr. KERN. Mr. President, I move that the Sergeant at Arms be directed to request the attendance of absent Senators.

The VICE PRESIDENT. The question is on the motion of the Senator from Indiana.

The motion was agreed to.

The VICE PRESIDENT. The Sergeant at Arms will execute the order of the Senate.

Mr. CHILTON and Mr. O'GORMAN entered the Chamber and answered to their names.

The VICE PRESIDENT. Forty-nine Senators have answered to the roll call. There is a quorum present.

Mr. KERN. Mr. President, I move that further proceedings under the call be dispensed with.

The motion was agreed to.

FEDERAL EMPLOYEES' COMPENSATION.

Mr. SUTHERLAND, from the Committee on the Judiciary, to which was referred the bill (S. 2846) to provide compensation for accidental injuries to employees of the United States resulting in disability or death, reported it with amendments and submitted a report (No. 515) thereon.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SMITH of Maryland:

A bill (S. 6276) granting a pension to Mary Battle; to the Committee on Pensions.

By Mr. NORRIS:

A bill (S. 6277) granting an increase of pension to Elizabeth C. Henderson; and

A bill (S. 6278) granting an increase of pension to Clementine M. Denslow; to the Committee on Pensions.

By Mr. JAMES:

A bill (S. 6279) for the relief of William Harold Kehoe; to the Committee on Military Affairs.

By Mr. SHAFROTH:

A bill (S. 6280) granting an increase of pension to Mary H. Trimble; and

A bill (S. 6281) granting an increase of pension to Martha R. Hitchcock; to the Committee on Pensions.

By Mr. GALLINGER:

A bill (S. 6282) granting an increase of pension to Melissa L. White (with accompanying papers); and

A bill (S. 6283) granting an increase of pension to Ellen H. Croggan (with accompanying papers); to the Committee on Pensions.

By Mr. O'GORMAN:

A bill (S. 6284) to carry out the findings of the Court of Claims in the case of Florine A. Albright; to the Committee on Claims.

A bill (S. 6285) authorizing the settlement of certain outstanding liabilities of the Government by the issue of new drafts upon the return of drafts heretofore issued, and providing for settlement of the lost drafts representing said liabilities; to the Committee on Finance.

FLAG DAY IN THE DISTRICT OF COLUMBIA.

Mr. SMITH of Maryland. Mr. President, I introduce a joint resolution making Wednesday, the 14th day of June, 1916, a legal holiday in the District of Columbia, and I ask unanimous consent for its present consideration.

The joint resolution (S. J. Res. 139) making Wednesday, the 14th day of June, 1916, a legal holiday in the District of Columbia was read twice by its title.

The VICE PRESIDENT. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, which was read, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That Wednesday, the 14th day of June, 1916, to be known and celebrated as Flag Day, is hereby made a legal public holiday in the District of Columbia.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

AMENDMENT TO DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. LANE submitted an amendment proposing to appropriate $1,500 in aid of the Columbia Polytechnic Institute for the Blind in the District of Columbia, intended to be proposed by him to the District of Columbia appropriation bill (H. R. 15774), which was referred to the Committee on the District of Columbia and ordered to be printed.

REVOLT IN IRELAND.

Mr. STONE. Mr. President, by direction of the Committee on Foreign Relations, I report back favorably with amendments Senate resolution No. 196, submitted by the senior Senator from Indiana [Mr. KERN], and I ask unanimous consent for the present consideration of the resolution.

The VICE PRESIDENT. The Senator from Missouri asks unanimous consent for the present consideration of the resolution. Is there objection?

Mr. SUTHERLAND. What is the resolution, Mr. President?

The VICE PRESIDENT. It is a resolution which was before the Senate yesterday, having been reported from the Committee on Foreign Relations by the Senator from Missouri [Mr. STONE], and subsequently withdrawn. The resolution will be read as proposed to be amended.

The Secretary read the resolution (S. Res. 196, Rept. 516), as follows:

Whereas it is represented that at the time of the recent revolt in Ireland there were, and are yet, many American citizens in districts in which martial law was proclaimed and in which armed conflicts occurred, and whereas the relatives and friends in this country of such American citizens whose safety has been thus endangered are apprehensive lest their lives and property have been imperiled: Therefore be it

Resolved, That the Secretary of State be, and is hereby, requested to cause inquiry to be made as to the safety and well-being of American citizens in Ireland, and what steps, if any, may be necessary and proper, consistently with the recognized law of nations, for the safeguarding and protection of their lives and property.

Mr. KERN. Mr. President, I hope unanimous consent will be given for the present consideration of the resolution.

The VICE PRESIDENT. Unanimous consent is asked for the present consideration of the resolution. Is there objection?

There being no objection, the Senate proceeded to consider the resolution.

Mr. FALL addressed the Senate on affairs in Mexico. After having spoken for some time, he said:

If the Senator from Indiana desires to have me suspend for the purpose of passing this resolution, I will do so, and continue my remarks on the appropriation bill.

Mr. KERN. I should be very glad if the Senator would do so.

The PRESIDING OFFICER (Mr. OWEN in the chair). The question is on agreeing to the resolution as amended.

The resolution as amended was agreed to.

AFFAIRS IN MEXICO.

Mr. FALL. Mr. President, I shall vote for the adoption of this resolution. As to the necessity for its passage, I do not propose to give my own conclusions at this time. That there is and has been, however, necessity for the Congress of the United States, and particularly this branch of the Congress, to inform itself upon foreign matters generally and upon the treatment accorded American citizens in foreign countries, I have had no doubt for at least four years.

For more than four years, Mr. President, I have been insisting that it was the duty of the Senate of the United States to inquire into the treatment of American citizens in other countries, and particularly in the so-called Republic of Mexico, and that it was its duty, after investigation, failing action by the administration, to take steps to adopt the necessary means to protect citizens where their protection should be granted; that it was the duty of the Congress of the United States to suggest methods for the proper protection of the citizens of this country, and I am of the same conviction now.

I might refer back to a discussion in this body occurring in August two years ago, in which one of the Senators on the other side of the Chamber expressed himself very strongly upon this question, and during which discussion he asked of other Sena-

tors why it was that the question of the treatment of Americans in Mexico and the question of the conditions existing in Mexico were treated so tenderly in this body, and why those conditions and the treatment of our citizens there were not proper subjects of inquiry. I am here to ask the same question to-day. I am going to take the time of the Senate, Mr. President, to point out the conditions existing in Mexico, but before doing so, I am going to invite the attention of the Senate to the attitude of the administration with reference to Mexican conditions.

On August 27, 1913, the President of the United States came before the Congress of the United States and delivered a message upon Mexico. I have a printed copy of that message, and I am going to read into the RECORD extracts from the message, for the purpose of showing to the Senate and to the people of the United States the conception then entertained by the President of the United States as to the proper attitude of this Government with reference to Mexico and why this Government occupied a peculiar position with reference to Mexico. The President then said:

> The Government of the United States does not stand in the same case with the other great Governments of the world with respect of what is happening or what is likely to happen in Mexico. We offer our good offices not only because of our genuine desire to play the part of a friend, but also because we are expected by the powers of the world to act as Mexico's nearest friend.

He concluded his message by referring to the same subject again, and said:

> I am happy to say that several of the great Governments of the world have given this Government their generous moral support in urging upon the provisional authorities of the City of Mexico the acceptance of our proffered good offices in the spirit in which they were made. We have not acted in this matter under the ordinary principles of international obligation. All the world expects us in such circumstances to act as Mexico's nearest friend and intimate adviser. This is our immemorial relation toward her. There is nowhere any serious question that we have the moral right in the case or that we are acting in the interest of a fair settlement and of good government, not for the promotion of some selfish interest of our own. If further motives were necessary than our own good will toward a sister Republic and our deep concern to see peace and order prevail in Central America, this consent of mankind to what we are attempting, this attitude of the great nations of the world toward what we may attempt in dealing with this distressed people at our doors, should make us feel the more solemnly bound to go to the utmost length of patience and forbearance in this painful and anxious business.

We find, then, that on August 27, 1913, the President of the United States finally announced that this Government had a peculiar special interest in the troubles existing in Mexico, an interest peculiar to no other country; and that, aside from our own personal or peculiar interest in Mexico, we were expected by the great countries of the world to deal with the Mexican problem. We find the announcement made that the other great countries of the world had agreed to leave to the United States the settlement of the Mexican question, and, inferentially, to abide by what this Government might do.

Mr. President, up to August 27, after the inauguration of President Wilson, no government was recognized in Mexico. Huerta, under the forms of the constitution of that Republic, was the legal President of Mexico. Revolutions were in existence then against the administration of Huerta, as they have been continuously existing in Mexico against one man or another; and the leader of one of the revolutionary parties was the present de facto head or chief of Mexico, Mr. Carranza. Up to August 27, and after that date—nearly a year after—Huerta controlled the City of Mexico and the greater portion of the Mexican Republic. On the northern tier of States the so-called constitutionalists, recognizing generally Carranza as their chief, controlled some of the ports of entry on the border of this country and Mexico and partially controlled some of the States.

The Congress of the United States had, prior to this time, passed an act empowering the President of the United States, by proclamation, to prevent the export from this country to Mexico of arms and ammunition. The President of the United States had refused, from the time of his inauguration up to August 27, to enforce the arms-embargo act against Huerta, but had enforced it against Carranza, although he had refused to recognize the Huerta government. He had not only enforced the arms embargo against Carranza up to that time, and not enforced it against Huerta, but, although refusing to recognize the Huerta government, the President of the United States had himself turned over to the Huerta government arms and ammunition through the military arm of the Government.

In June of that year Carranza at Matamoras had 128 machine guns and other guns, seized on this side of the line by the officers of the United States under the embargo act. Again, in the latter part of June or the 1st of July, the Constitutionalists had driven Huerta's forces across the boundary line from Sonora into Arizona at Naco and at Nogales, after fierce fighting. The Mexican troops were interned on this side. Some of them were returned by this Government to points in control of Huerta, and allowed again, over the protest of the Constitutionalists, who had driven them across the line, to join Huerta's army. Others were not allowed to go back to Mexico, because of protests of two Senators who are now Members of this body, and because of the action of the then governor of Texas in refusing to allow Huerta troops to be disembarked from the trains at the union station in El Paso, and compelling the military forces of the United States to take them to the military reserve at Fort Bliss. But the Ojeda troops and the Kosterliski troops, driven across by the Constitutionalists, taking refuge on this side, surrendered their arms and ammunition, machine guns and cannon; and I called the attention of the Senate of the United States then to the fact that these arms and this ammunition were sent back into Mexico and delivered to the Huerta authorities by order of the Government of the United States, although the Huerta government was not recognized.

A different policy was inaugurated in August after the receipt of this message by the Congress. The President of the United States had extracts from his message telegraphed to the American consuls and diplomatic officers throughout the Republic of Mexico. On August 27, 1913, the date of the message, the following telegram was sent. This is an official paraphrase of the official document furnished me by the State Department:

> The consul general was informed by the Secretary of State that the President had directed him, in view of the possibility of increased activity on the part of contending factions, to warn Americans to leave Mexico. The consul general was told that the Government of the United States would assist them in every possible way, and that for those who were near seaports ships would be provided; also that financial assistance would be furnished to those in need of it. The consul general was instructed to notify all officials, military or civil, exercising authority, that they would be held strictly responsible for any harm done to Americans. The consul general was instructed to furnish a copy of the telegram to the American Embassy at Mexico City, and the department had the same telegram repeated to all American consulates in Mexico.

Again, on the same day, another telegram repeating portions of the President's message was sent to the consul general in the City of Mexico and to the other consular officers south of the northern tier of States, with the statement that the consular office at Mexico City need not undertake to repeat to the northern tier of States the warning contained in that telegram and the statement that all officials, military and civil, wherever they might be, would be held strictly responsible for injuries to Americans, but that the Government of the United States itself would, directly from Washington, notify the consulates in the northern tier of States, at Nogales, Hermosillo, Ciudad Juarez, Guadalajara, Nuevo Laredo, Matamoros, and other places.

Mr. President, I will refer a little later to the action of the President of the United States following this message and these telegrams of August 27. At the present moment I am going to call the attention of the Senate to the fact that having changed his policy of "watchful waiting," the President of the United States made various announcements, both as to his change of policy and as to the reasons therefor and as to what he proposed to do with reference to Mexico and as to the character of government which he proposed to see established in that Republic. In his special message to which I have just referred, he stated to Mr. Huerta what he must do, and the character of government which President Wilson expected to see established in Mexico. Quoting from his message, I read:

> America in particular—America north and south and upon both continents—waits upon the development of Mexico; and that development can be sound and lasting only if it be the product of a genuine freedom, a just and ordered Government founded upon law. * * * Mexico has a great and enviable future before her, if only she choose and attain the paths of honest constitutional government.

Again and again has the President referred to Mexico and as to what he proposed to do with Mexico along the same line. In the same message he uses time and again the expression "a constitutional government" and a government "on constitutional lines."

In his message to Congress on December 2, 1913, with reference to Mexico, the President expressed himself as follows:

> We are the friends of constitutional government in America; we are more than its friends, we are its champions, because in no other way can our neighbors work out their development in peace and liberty. Mexico has no government.

In the same message he says:

> We shall not, I believe, be obliged to alter our policy of watchful waiting. And then, when the end comes, we shall hope to see constitutional order restored in distressed Mexico by the concert and energy of such of her leaders as prefer the liberty of their people to their own ambitions.

Again, in his special message of April 20, 1914, the President said:

> If we are to accept the tests of its own constitution (Mexico's) it has no government.

The President was interviewed by one of the writers of this country well known to the public, and the interview was published in the Saturday Evening Post on May 23, 1914. Mr. President, I read with great interest a word picture of the President of the United States drawn by that facile writer, Samuel Blythe, as the President sat with his long white fingers interlaced, gazing through the windows of the White House onto the grounds, with a look in his eyes that struck Mr. Blythe, I presume, at least, as some evidence of statesmanship, The President said, as quoted by Mr. Blythe:

In any event we shall deem it our duty to help the Mexican people, and we shall continue until we have satisfactory knowledge that peace has been restored, that a constitutional government is reorganized, and that the way is open for the peaceful reorganization of that harassed country.

Again, the President addressed the loyal members of his party in Indianapolis on January 9, 1915, and among a few other things said:

Until the end of the Diaz reign 80 per cent of the people of Mexico never had a "look in" in determining who should be their governor, or what their government should be.

Then he proceeded to say that we should let them alone; that it is not your business, not mine, not his, not the business of any man in the United States as to what the Mexicans should do. He continued by saying that they had a right to spill as much blood as they desired to spill.

On June 18, 1914, there was a meeting of the delegates of the A B C powers—Argentina, Brazil, and Chile—with Justice Lamar and Mr. Lehmann, delegates appointed by the President of the United States, at Niagara Falls, for the purpose of considering the difficulties between this country and Mexico. That convention was attended by the Huerta delegates, Robassa and others, but was not attended by the Carranza delegates. Through the American delegates an invitation was extended to Carranza to send delegates, in order that the matters in dispute between the so-called constitutionalists and the Huertaists might be considered and settled at the same time. In the invitation so extended, speaking after consultation, as they said, with Mr. Bryan, Secretary of State, and the President of the United States, the American delegates said that the purpose was to bring that war—Mexico's civil war—to a close; that to restore peace and constitutional government was the aim of the President of the United States.

On June 2, 1915, the President issued a statement to the American people in which he said that the policy or want of policy heretofore pursued would necessarily be changed, and that he proposed to invite all the leaders of the different factions in Mexico to a conference, and that failing an agreement by these leaders it would then become the duty of the United States to act as it saw fit in restoring order in Mexico. I quote from this message:

But neither do they (the people of the United States) wish to see utter ruin come upon her (Mexico), and they deem it their duty as friends and neighbors to lend any aid they properly can to any instrumentality which promises to be effective in bringing about a settlement which will embody the real objects of the revolution, constitutional government, and the rights of the people. * * * It is time, therefore, that the Government of the United States should frankly state the policy which, in these extraordinary circumstances, it becomes its duty to adopt. It must presently do what it has not hitherto done or felt at liberty to do, lend its active moral support to some man or group of men * * * who can rally the suffering people of Mexico to their support in an effort to ignore, if they can not unite, the warring factions of the country, return to the constitution of the Republic so long in abeyance, and set up a government at Mexico City which the great powers of the world can recognize.

Later the President of the United States invited the A B C powers of the Latin America, together with other Latin American countries both north and south, to join with us in the effort to bring about peace in Mexico. A consultation was held and a joint note was forwarded signed by the Secretary of State of the United States and by the representatives of each of those countries. It was forwarded to each of the leaders in Mexico and of various factions. The statement joined in by the United States I shall read:

We, the undersigned, believe that if the men directing the armed movements in Mexico—whether political or military chiefs—should agree to meet, either in person or by delegates, far from the sound of cannon and with no other inspiration save the thought of their afflicted land, there to exchange ideas and to determine the fate of the country—from such action would undoubtedly result the strong and unyielding agreement requisite to the creation of a provisional government, which should adopt the first steps necessary to the constitutional reconstruction of the country—and to issue the first and most essential of them all, the immediate call to general elections.

Mr. President, the answer of Mr. Carranza to this joint note reads in part:

The First Chief * * * can not consent that the interior affairs of the Republic be handled by mediation or by any initiative of any foreign government.

Shortly thereafter he was notified that he would be recognized as the First Chief in Mexico, or, as he styles himself, as the Chief Depository of the Executive Power.

The reason for the action of the President of the United States in recognizing Mr. Carranza under these circumstances, and in the face of the refusal of Mr. Carranza to accept the invitation either of this country or the joint invitation of this country and the Latin-American countries—the reason for his recognition after such a refusal in the face of our declared purpose, in the event he so refused, has been a matter of interest undoubtedly to people throughout the entire Union, as it has to a large majority, I may say, of the people of Mexico.

So a resolution was offered in this body January 6, 1916, as the Senate had no official notice that there had been any recognition of any government in Mexico, asking the President of the United States if there was a recognized government; and if so, what it was, how it was constituted, whether it was a constitutional government, and the reasons for its recognition.

The last word the Senate had upon the subject was that there was no government in Mexico, and that the whole and the sole purpose of this administration was to see a constitutional government restored immediately in Mexico, and an immediate call issued for a free election. The resolution passed the Senate unanimously, and a month and 11 days afterwards an answer to this resolution was sent into the Senate, and it has been lying before this body since February 17.

Mr. President, I may say that prior to my entering this body, and since that time, the study of foreign affairs, particularly in the relation of this country to Latin-American countries, has been a subject of great interest to myself from time to time, and as I could I have availed myself of the opportunity to examine the state papers, and, of course, in doing so, incidentally I have examined the state papers of this Government in correspondence with other Governments aside from the Latin-American Governments. I want to make the statement now, Mr. President, that this answer to the resolution is the most remarkable state paper every filed in the archives of the Senate of the United States, or ever filed in the archives of this Government or in any other department. Never in the history of diplomacy was such a State document given publicity.

Remember that the President, and the President joined by the representatives of other countries at his invitation, had notified all the leaders of Mexico that they must confer and must settle their difficulties; that they must agree upon some man who could be recognized by other Governments, or that the Government of the United States would upon its own initiative act. At that time Francisco Villa was one of the leaders of the contending factions in Mexico, and until after the recognition of the Carranza Government he was a very powerful factor in the affairs of Mexico. The President of the United States indorsed in his letter of transmittal the answer prepared by his Secretary of State to the Senate resolution.

The report of the Secretary of State has my approval.

WOODROW WILSON.

Mr. Lansing undertakes to go into the history of the troubles in Mexico to a limited extent, but he refers to the statement of the President of the United States of June 2, 1915, from which I have read, and which I have just repeated, directed to the leaders of the factions and notifying them that in the event of their failure to obey his instructions then he would act of his own initiative. Among all the State documents of all the countries of the world, as I have said, this is unique. The answer is that Mr. Carranza was recognized and this country insisted no longer upon a conference. He refers to the statement sent out jointly by this country and the Latin-American countries. He does not include in this remarkable statement the answer of Carranza, but he refers to it.

The attempt to bring the factions together for a conference failed.

Here are the reasons for the recognition of Carranza, in so far as you are able to judge from the report indorsed by the President of the United States:

Substantially all the commanders and others in authority who were associated with Gen. Villa replied directly and independently, in varied language, accepting the suggestion for a conference. On the other hand, all the commanders and others in authority who were affiliated with Gen. Carranza replied briefly to the effect that the appeal had been referred to Gen Carranza, whose superior authority they acknowledged, and who would make such reply as he deemed proper. The inference to be drawn was plain. On the one hand, there seemed to be no central organization among the Villista forces, while, on the other hand, submission to a central authority was evidenced in the replies of the Carranzistas. The unity and loyalty of the Carranzistas appeared to indicate the ultimate triumph of that faction, especially as the Carranzista forces were then in control of approximately 75 per cent of the territory of Mexico.

The Secretary of State in making that last statement was going into a field of which he knew and knows nothing. Every paper which he has prepared and every utterance which he has made upon Mexican matters simply establishes the fact that he knows nothing whatsoever of Mexican conditions. The Secretary of State may be competent to deal with diplomatic matters; he is going far afield when he undertakes to judge of facts and conditions as they exist in Mexico. But as an exhibit, as the substantial statement, with reference to the answer of the Carranzista chiefs or leaders, he files a document prepared by Mr. Arredondo, ambassador designate of Mexico to the United States at Washington. On page 22 of this remarkable so-called message of the President of the United States will be found Mr. Arredondo's naive statement as to the leaders, who the leaders are, and refers to their action in referring our note for answer to Mr. Carranza; and one statement I think will convince the Senate at least as to how easy it was to secure exactly the kind of answer that was desired by Mr. Carranza from any of these gentlemen who so answered.

I am not going to read all the names of the officials, the governors, and so forth, who answered. They are in Spanish, and it would be difficult for the stenographer to write them out; but a long list of 27 or 28 governors and military leaders is given, who had "just been appointed" by Mr. Carranza, who answered that—

All of the above leaders of the constitutionalist army and governors who have been just appointed recognize the first chieftainship of Mr. Carranza and his authority as the depository of the executive power of the nation, as they have recently stated it when replying to the note addressed to them by the Secretary of State of the United States and the American diplomatic representatives.

In other words, the Villa leaders banded together against Carranza replied separately, Gen. Angeles, Gen. Raoul Madero, and the other leaders accepting the invitation of the Government of the United States to meet on American soil or elsewhere and to agree to form such a government as the President of the United States said they must form, and the leaders of Mr. Carranza just appointed by him, with the exception of possibly two or three, all answered that Mr. Carranza would answer for them, and Mr. Carranza declined the invitation, and therefore we recognize Mr. Carranza.

Now, let us see. The President, as I have shown you by his own words, written and spoken, which I have quoted and are of record, has said to the people of the world—the people of Latin America, the people of Mexico, the people of the United States—what he proposed to do with Mexico, the character of government which he proposed to adopt—a government formed under the constitution of Mexico as it exists, a government prepared to call an immediate election for the Presidency. The President's words sounded well to the people of the United States, and the people of the United States are loyal to the President of the United States, whoever he may be, and are ready to accept his statements at their face value.

You have heard Mr. Wilson; now let us hear Mr. Carranza. The Secretary of State has refused to furnish the reports of the consular agents of the United States or of our representatives in Mexico; he has refused to furnish to the Senate of the United States at its request the reports of the Brazilian minister made while he was acting for the United States in Mexico; he has refused to furnish to us for our information the reports of such men as Duval West, whom we in the Southwest know to be a man worthy of belief, honest, sincere, and courageous, and whom we know to be the only man whom the President of the United States has ever sent into Mexico who has personally gone through the by-ways and highways of Mexico and has visited the camp of practically every man in revolution in Mexico who has not been simply a hanger-on around the court of Carranza or of Villa, but who, raised on the border, knowing something of Mexican conditions, competent to ascertain for himself exactly the conditions as they existed at the moment, went to Carranza and to the different Carranza leaders, went to Villa and to the different Villa leaders in their camps, and went to Zapata and interviewed Zapata himself and his individual leaders in the States of Guerrero and Morelos; and his report is refused to the Senate of the United States, as I have said. Yet, unfortunately for the consistency of the administration, they have forwarded with this message the papers prepared by Arredondo, the ambassador designate. Among those are the decrees of Mr. Carranza, setting forth the character of government which he proposes to establish and which he has established.

In the first place, he gives to the President of the United States and to the people of the world, by a decree, a statement of his authority for assuming the supreme power in Mexico. This is "Inclosure No. 4 E, declaration to the nation," and is signed "V. Carranza, First Chief of the Constitutional Army and Depository of the Executive Power of the Republic of Mexico." This becomes an official document in the files of the Senate of the United States by virtue of its accompanying the message of Mr. Lansing and of its receiving the indorsement of the President of the United States as explaining his action. Mr. Carranza, as will be found on page 30, says:

Then I, as governor of the State of Coahuila, and in obedience to the constitutional provisions, articles 121 and 128 of our fundamental charter, assumed the representation of the Republic in the terms in which the constitution itself vests me with this right, and supported by the people which rose in arms to regain its liberty.

Carranza quotes the constitution as the basis of his title, and I shall quote it here, and then I shall follow with other quotations showing his "respect" for the constitution of his country. The provision reads:

Every public officer, without exception, prior to his taking possession of his charge, shall render an oath that he will sustain the constitution and the laws emanating therefrom. This constitution shall not fail in force or vigor, even though on account of rebellion its observance may be interrupted. In the case that pursuant to a public disturbance a government contrary to the principles sanctioned by the constitution may be established, as soon as the people regains its freedom, its observance shall be reestablished, and, according to it and to the laws which by virtue of it may have been enacted, those who may have figured in the government emanated from the rebellion shall be tried, as well as those who may have cooperated in the movement.

Mr. Carranza says to the President of the United States that he assumed authority to lead a rebellion against Huerta by virtue of article 121 and of article 128, which, combined, I have just read, and which he quotes for our information as the basis of his title, and which of itself says that, even in cases of rebellion, the constitution as it exists shall be reestablished the moment that peace is restored. This is the basis, remember, of Mr. Carranza's title as indorsed to us by the President of the United States.

Senators, another decree setting forth the character of Mr. Carranza's government which he proposes to establish in Mexico, standing firmly upon the constitution of 1857, is also indorsed to us officially by the President of the United States in this message, and you will find it set forth on pages 28 and 29.

Now, bear in mind the character of government which the President of the United States has said in every utterance upon the subject that he proposed to establish in Mexico; bear in mind that he said to Huerta, "Because you have not established this character of government, we will not recognize you; you must get out, and you must not become a candidate for election as the President of Mexico under your constitution, because you have violated the constitution." Remember that Mr. Huerta was elected under the forms of the constitution as the constitutional President of the Republic of Mexico. During his entire régime law and order were enforced wherever he had jurisdiction in the Republic; the constitution was not suspended in any district over which he had control in Mexico; the laws of Mexico were not abrogated in any precinct or in any State or in any portion of the Federal Republic over which he had jurisdiction; he stood by the constitution of Comonfort, Lerdo de Tejada, and Juarez.

This man Carranza places himself upon the constitution and appeals to the people of the world for recognition, and here is what he tells the President of the United States that he proposes to do; and despite all the fair words and phrases so eloquently expressed by the President of the United States in public speeches, in messages to the Congress of the United States, and in quoted interviews in the press of the United States, this is what Carranza has done. Reading from page 28 of the President's message, we find Carranza saying:

That, therefore, in accordance with the most general sentiments among the leaders of the constitutionalist army, the governors of the States, and of other collaborators of the revolution, and interpreting the needs of the Mexican people, I, Venustiano Carranza, have seen fit to decree the following.

Article 2 provides:

ART. 2. The first chief of the revolution and depository of the executive power of the Republic shall enact and enforce, during the struggle, all the laws, provisions, and measures tending to meet the economic, social, and political needs of the country, carrying into effect the reforms which public opinion demands as indispensable for the establishment of a régime which will guarantee the equality of Mexicans among themselves, agrarian laws favoring the creation of small landowners, the suppression of latifundia or large landholders, and the restoration to townships of the lands illegally taken from them; fiscal laws tending to establish an equitable system of taxation on real estate; laws tending to improve the condition of the rural laborer, the workingman, the miner, and, in general, of the working classes; the establishment of municipal freedom as a constitutional institution; bases for a new system of organization of the army; amendments of the election laws in order to insure the effectiveness of suffrage; organization of an independent judicial power, in the federation as well as in the States; revision of the laws relative to marriage and the civil status of persons; provisions guaranteeing the strict observance of the laws of reform; revision of the civil, penal, and commercial codes; amendment of judicial procedure for the purpose of expediting and causing the effectiveness of the administration of justice; revision of

laws relative to the exploitation of mines, petroleum, water rights, forests, and other natural resources of the country, in order to destroy the monopolies created by the old régime and to prevent the formation of new ones; political reforms which will insure the absolute observance of the constitution of Mexico—

The only place, I may interject, where the constitution of Mexico is referred to——

Mr. SUTHERLAND. Will the Senator read that again?

Mr. FALL. Certainly.

Political reforms which will insure the absolute observance of the constitution of Mexico and, in general, all the other laws which may be deemed necessary to insure for all the inhabitants of the country the effectiveness and full enjoyment of their rights and their equality before the laws.

Article 3.——

Mr. SUTHERLAND. Mr. President, before the Senator passes from that, let me ask him a question. Am I correct in understanding that by that article Gen. Carranza has not only assumed the complete executive power, but has taken unto himself the entire lawmaking power of the Republic of Mexico?

Mr. FALL. And the judicial power. The Senator is correct.

Mr. SUTHERLAND. That would follow, because under the power to make laws he would have the power to deal with the judiciary.

Mr. FALL. If the Senator will allow me to read a little further, I think that will be made plain.

Mr. SUTHERLAND. So that the effect of it is, that Gen. Carranza has assumed a complete dictatorship?

Mr. FALL. Not only that, but, as I shall show you by his own words, sir, he proposes to have a constitutional convention formed by himself which will transform these laws into constitutional precepts. He proposes to form a constitution for Mexico composed of the laws which he says he proposes to enact.

Mr. WORKS. Mr. President——

Mr. FALL. I yield to the Senator.

Mr. WORKS. I should like to ask the Senator at what date and in what connection this decree was issued by Carranza?

Mr. FALL. It was issued at Vera Cruz after we turned Vera Cruz over to Mr. Carranza. After we had refused to recognize Huerta; after we had allowed Carranza to go into the City of Mexico, and then had turned Vera Cruz over to him and were acting as his friend, he issued this decree.

Mr. WORKS. But it was issued before the recognition of the Carranza government?

Mr. FALL. Long before; and is the basis used by Mr. Lansing in his message for his answer to the questions propounded by the Senate as to whether there was a constitutional Government in Mexico, and what assurances this Government had received that the constitution would be observed and that the laws would be enforced in Mexico. This is the answer.

Mr. SUTHERLAND. Mr. President, may I ask the Senator from New Mexico another question?

Mr. FALL. Certainly.

Mr. SUTHERLAND. The Senator from New Mexico is probably better informed about the conditions in Mexico, not only than anyone else in the Senate but than anyone else in the country, and I have great regard for his opinion upon Mexican matters. This would seem to dispose of all of the powers—legislative, executive, and judicial—by vesting them in Gen. Carranza, so far as the Federal Government is concerned. Now, I ask the Senator from New Mexico whether or not, as a matter of fact, in substantially all of the States of Mexico similar occurrences have taken place with reference to the governors, and if it be not a fact that Mexico to-day, both as to the Federal Government and as to the various State governments, has ceased to be a country governed by law, and is governed by special edicts issued by Carranza and by the various governors in the various States?

Mr. FALL. The Senator has stated the condition correctly. Not only has the constitution of every State been set aside, but Mr. Carranza declared to us that he was going to set it aside, as I shall show further along.

Mr. WORKS. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from California?

Mr. FALL. Yes.

Mr. WORKS. I should like to ask the Senator to what extent the laws of Mexico are being executed and enforced by the courts?

Mr. FALL. There are no courts in the Republic of Mexico in operation, except that several months ago Mr. Carranza appointed—I think under some decree of his own—three judges, with certain jurisdiction, probably, for the federal district of Mexico, and in his decree he prescribed the oath which they should take. It was not that they should support the constitution and laws of the Republic, but that they should support the "plan of Guadalupe" and the decrees of Carranza; but that judicial forum is not in operation—it is simply a court in name.

Mr. WORKS. Is it not true that all offenses and alleged crimes, whether of a military or civil character, are summarily tried by court-martial and the parties charged executed, without any decree or judgment of a court?

Mr. FALL. Undoubtedly, sir.

Mr. SUTHERLAND. Not only is that so, but have not decrees been issued of such character that acts already past have been declared offenses and men have been punished to the extent of being executed under such ex post facto decrees?

Mr. FALL. Undoubtedly, sir. Ostensibly a court-martial tries offenses. In a few instances what we would know as a court-martial does take cognizance of offenses; but, as a general thing, in ninety cases out of a hundred, what they call court-martial proceedings resulting in the death penalty, simply mean the order of some one chieftain sitting behind a table to a squad of soldiers to "take this man out and shoot him." I have said in 90 per cent of the cases that is true; I will say that this is the procedure in 99 per cent of the cases; that Mexico has been devastated; that many of her best men have been put to death; and some of her best blood has been spilled in exactly this way.

I have here before me, and I intended to call attention to it a little later, but I will do so now, a translation of all the proceedings in the court-martial of Garcia Granados in the City of Mexico immediately after notice of the intention to recognize V. Carranza by this Government. Garcia Granados was known as a lawyer, a writer, and a statesman of wide reputation; possibly not in this country, but in Europe particularly he was known as a law writer, an author, and a statesman of the very highest character. Unfortunately for himself he had accepted a cabinet position as secretary of Gobernacion, as they call it, in Huerta's cabinet. That was his only offense. It was shown by the testimony which I have that immediately upon the seizure of Pino, Suarez, and Madero he resigned. It was shown by the undisputed testimony—no evidence was offered to contradict it—that his whole effort had been to bring peace to his distracted country; that he was acting with Huerta simply in an attempt to bring about a government in Mexico; and that, his efforts failing, he resigned and retired to the privacy of his home. Immediately upon notice being given that Carranza would be recognized, Garcia Granados was arrested and tried before a court-martial. The prosecuting attorney only asked, after the trial was over, that he might be found guilty and that the sentence might be two years' confinement. He was found guilty, and he was shot in less than 24 hours.

Mr. NORRIS. What was the charge?

Mr. FALL. That he had been a member of Huerta's cabinet—the cabinet of a man recognized by all the great powers of the world as the president of Mexico.

Mr. NORRIS. Was that offense made a crime by some decree of Carranza?

Mr. FALL. It was made a crime by virtue of these court-martial proceedings. Not only was this fate visited upon Garcia Granados, but in 1914, when Carranza entered the City of Mexico, his followers shot down members of the senate, members of the house, members of the Congress of the Republic of Mexico, and great statesmen, until the streets ran with blood.

Carbajal begged this Government to prevent Carranza going into the City of Mexico until satisfactory assurances had been given that murders would not be committed; that his wrath would not be visited upon those who had not supported him. This Government failed to seeure such assurance.

But, Mr. President, I want to read a little further from this remarkable statement of Mr. Carranza. I had not completed it. Astonishing as it may appear to the Senator from Utah [Mr. SUTHERLAND], who is a lawyer, and the other Senators present here, Mr. Carranza did not stop with article 2 as to what he was going to do.

ART. 3. In order to continue the struggle and to carry into effect the reforms referred to in the preceding article, the chief of the revolution is hereby expressly authorized to convene and organize the constitutionalist army and direct the operations of the campaign; to appoint the governors and military commanders of the States and to remove them freely; to effect the expropriations on account of public utility which may be necessary for the distribution of lands, founding of townships, and other public services—

Expropriations, as I presume you understand, are confiscations—

to negotiate loans, issue obligation against the national treasury, indicating the property which shall guarantee them; to appoint and remove freely Federal employees of the civil administration and of the States and to fix the powers of each of them; to make, either directly or through the chiefs he may appoint, requisitions for lands, buildings, arms, horses, vehicles, provisions, and other elements of war; and to

create decorations and decree recompenses for services rendered to the revolution.

The Senate wanted to know whether the President of the United States had any assurances that a free and constitutional election was to be held; because, I may say, having known something of the introduction of the resolution to which this message is an answer, that it was worded with reference to the declaration of the President.

In answer, Mr. Lansing cites this decree and other decrees or letters to the same effect, and says that we have assurances of early elections, or of immediate elections. You will recall that in all the President's expressions he has insisted upon "immediate and free elections." Let us see the character of the elections:

ART. 4. Upon the success of the revolution, when the supreme chieftainship may be established in the City of Mexico and after the elections for municipal councils in the majority of the States of the Republic, the first chief of the revolution, as depository of the executive power, shall issue the call for election of congressmen, fixing in the calls the dates and terms in which the elections shall be held.

Now, the promise is that after the success of the revolution, and after the supreme chieftainship may be established in the City of Mexico, municipal elections shall be called.

Mr. WORKS. Mr. President——

Mr. FALL. I yield to the Senator from California.

Mr. WORKS. But those elections were to be held, not under the laws of Mexico as they existed, and which I suppose provided for these elections, but under the orders and decrees of Carranza?

Mr. FALL. Entirely. The Senator is correct. The constitution and the laws are set aside. All State officers are discharged. All civil and federal officers of the entire Republic of Mexico, so called, are ousted, and he fills their places. All the State officers and governors are ousted, and he appoints persons to take their places. He changes the law not only of the Federal Government but of the States. He has not only done that, sir, but I can say to you now, in passing—and I might as well make the statement now—that he has changed boundary lines. The State lines are fixed in the constitution of Mexico. The boundary lines of every State and every Federal Territory are fixed by constitutional enactment, and can only be changed by constitutional amendment in the manner provided for the amendment of the constitution of Mexico; and this man has arbitrarily changed the boundary lines of subdivisions of Mexico. Not only, sir, has he discharged all State officials and ignored the constitution and the laws, but he has actually merged and changed States and Territories by arbitrary decrees, and fixed new lines.

Mr. NORRIS. Then these elections that are going to be held will be held under the supervision of men that he has put into office, I presume?

Mr. FALL. Precisely. Not only that, but note the promise and then recall the facts. Where is the "government" established in the Republic of Mexico to-day? Can you now understand some reason for Mr. Carranza's not establishing the Government in the City of Mexico, which is in his control? The promise is that when order shall be established and the supreme chieftainship established in the "City of Mexico" he will proceed to call municipal elections. He has never established the supreme chieftainship in the "City of Mexico," but he has declared the city of Queretaro as the capital of the Republic. As the Senator has well suggested, Mr. Carranza proposes to appoint the municipal officers. He proposes to see, then, that the municipal elections are held, and that, after that is done, he will call congressional elections in the different States; and then what shall be done?

Mr. WORKS. Mr. President, in that connection I think it should be borne in mind that all of these things are to take place under the regulation of Carranza himself.

Mr. FALL. Not only that, but he assumes the power, of course, to arrange the congressional districts, to apportion the representation in the different States and in the National Congress. He selects the election officers. He nominates the candidates. He will have his own men elected. He will name every congressman who is elected in the entire Republic of Mexico.

Mr. SUTHERLAND. Mr. President, is it true that the conditions which the Senator from New Mexico describes prevail in some of the States where peaceful conditions exist?

Mr. FALL. There is not a State in the Republic of Mexico where peaceful conditions exist.

Mr. SUTHERLAND. There are some States where there is no conflict between——

Mr. FALL. There is not a State in the Republic in which there is not armed conflict to-day.

Mr. TOWNSEND. Mr. President, if I understand correctly, what the Senator from New Mexico is giving to the Senate is the reasons which the President of the United States sends to the Senate for his recognition of Carranza as first chief of the Republic of Mexico?

Mr. FALL. Yes.

Article 5 of this remarkable document:

Once the federal congress has been installed, the chief of the revolution shall render an account before it of the use he may have made of the powers with which he is vested hereby.

Now, allow me to interject that he is "vested hereby" by the chief of the revolution. This is a revolving government, you understand. The powers with which V. Carranza is hereby vested are hereby vested in V. Carranza by V. Carranza. This document is signed simply by V. Carranza and his chief clerk of the department of the interior, Adolf de la Huerta.

ART. 5. Once the federal congress has been installed, the chief of the revolution shall render an account before it of the use he may have made of the powers with which he is vested hereby, and he shall especially submit the reforms made and put into effect during the struggle, in order that congress may ratify them, amend them, or supplement them, and to the end that those which it may see fit may be raised to the rank of constitutional precepts, before the reestablishment of constitutional order.

Now, you understand, Mr. Carranza has appointed his congress. Then he goes before the congress with all of the decrees and the orders and the laws, and so forth, which he has enacted during what he calls the preconstitutional period. He presents these laws and orders and decrees to his congress. They may either ratify them, amend them, or supplement them. They can not reject them under his decree. They may ratify, they may amend, they may supplement, and then they become constitutional precepts.

Mr. WORKS. And the Senator might say, in that connection, that if they do not follow out his directions they will be stood up against a wall and shot.

Mr. FALL. Precisely.

Mr. SUTHERLAND. Let me ask the Senator one more question. Can the Senator from New Mexico tell us whether the President of the United States recognized Carranza because of these matters which the Senator has so graphically described, or in spite of them?

Mr. FALL. I have had an idea, at times, that Carranza was a man after the heart of the President of the United States. When I noticed, for instance, section 7 of the Post Office appropriation bill, vesting absolute and arbitrary powers in the Postmaster General, and when I have seen some other arbitrary acts and investments of power, and when I have seen the Congress of the United States whipped into line at various times and made to reverse themselves and do exactly what the gentleman in the White House has commanded, I have thought at times that he recognized Carranza because Carranza was a man after his own heart. I have thought it possible, sir, that if the President of the United States had the power to form a Government, this is possibly the character of Government which he would form.

After congress has elevated into constitutional precepts the decrees of Mr. V. Carranza, adopted by Mr. V. Carranza by virtue of the power vested in Mr. V. Carranza by Mr. V. Carranza, then the federal congress, under article 6—

shall convene the people to the election of president of the Republic, and as soon as this takes place the first chief of the revolution shall deliver to the president-elect the executive power of the nation.

Mr. President, I think I can safely say that so far as I have established the truth of the statement I have made, that this was the most remarkable document which could be found by searching the archives of any department of this Government. Certainly nothing like it has ever been known in the history of the diplomacy of this or any other civilized country.

Mr. NORRIS. Mr. President——

Mr. FALL. I yield to the Senator from Nebraska.

Mr. NORRIS. If the Senator intends to take it up later, I do not care to have him answer my question now; but for fear he has forgotten it, I want to call his attention to the fact that earlier in his remarks he made reference to a report made to the State Department by a Mr. West, whom the President, as I understand, had sent into Mexico to get information before he acted on the recognition of anybody. The Senator has said that that report from Mr. West was not sent to the Senate. I should like to ask the Senator if he has any knowledge of the report made by Mr. West, and whether it is true that Mr. West was sent there for the purpose of getting information?

The Senator has stated that Mr. West made the most thorough investigation of anybody who was sent into Mexico, and that he went into all the camps of all the belligerents and all the

factions. If the Senator can give us some information about his report, I wish he would do so.

Mr. FALL. I will say, in answer to the question of the Senator, that Mr. West is a high-toned, honest, sincere, loyal gentleman; that in so far as I personally know he has never given a copy of his report to anyone. I will say, upon my own authority, knowing Duvall West, knowing the conditions in Mexico, that his report must have been to this effect in substance, that Mexico was socially, politically, and financially bankrupt; that none of these leaders were worthy of recognition; and that as in any other bankruptcy the only method to pursue was to appoint a receiver.

Mr. President, here is Mr. Arredondo's statement, furnished October 7, 1915, after he was notified by this Government that Carranza would be recognized. He was here in Washington at the time, and he knew what form of law would continue in force, what government would continue in force in Mexico.

Mr. NORRIS. May I ask the Senator before he leaves the question of Mr. West if Mr. West made a report?

Mr. FALL. He made a report.

Mr. NORRIS. Has the State Department declined to send in the document?

Mr. FALL. It has declined. It has declined to send any of the documents or data asked for by the Senate of the United States. I read the approval of the President upon this document. Mr. Arredondo states:

The declarations issued to the Nation on December 14, 1914, and June 11 of the present year—

That I have been reading from—

clearly define the political program of the provisional constitutionalist Government which will be continued until the conditions of the country may permit the holding of general elections and the installation of a general congress.

I am reading from page 23 of the message. There was no time fixed, there was no promise given as to any period at which this unconstitutional, arbitrary, autocratic government is to cease—this government constituted by the joint efforts of Venustiano Carranza and Woodrow Wilson.

Mr. President, I have here among many other documents a copy of the bill of rights of the Mexican constitution. I want to say that statesmen and writers on constitutional government whom I have read have pronounced the Mexican constitution to be the most progressive written constitution ever adopted by any nation. I am going to ask that this extract from the constitution of Mexico on the "rights of man" may be printed as a part of my remarks.

The PRESIDING OFFICER (Mr. HUGHES in the chair). Without objection, permission will be granted.

Mr. GALLINGER. I will ask the Senator if it is lengthy?

Mr. FALL. I think it would require a very short time to read it. Possibly I had better read it for the information of the Senate. I think it would be very enlightening.

Mr. GALLINGER. My thought was that it ought to be read.

Mr. FALL. Then I withdraw the request for its publication without reading, and I will read it now, so that it may come in sequence. May I ask the Secretary to read it? It will relieve me for a few moments.

The PRESIDING OFFICER. Without objection, the Secretary will read as requested.

The Secretary read as follows:

[From the Mexican Constitution.]

Modern Constitutions (Dodd, Vol. II, pp. 40 to 46).

TITLE I.

SECTION 1. THE RIGHTS OF MAN.

ARTICLE 1. The Mexican people recognize that the rights of man are the basis and the object of social institutions. Consequently they declare that all the laws and all the authorities of the country should respect and maintain the guaranties which the present constitution established.

ART. 2. In the Republic all are born free. Slaves who set foot upon the national territory shall recover, by that act alone, their liberty, and shall have a right to the protection of the laws.

ART. 3. Instruction shall be free. The law shall determine what professions require a diploma for their exercise and what requisites are necessary to obtain such diplomas.

ART. 4. Everyone shall be free to engage in any honorable and useful profession, industrial pursuit, or occupation suitable to him and to avail himself of its products. The exercise of these liberties shall not be hindered except by judicial sentence when such exercise injures the rights of a third party, or by executive order issued in the manner specified by law, when it offends the rights of society.

ART. 5. No one shall be obliged to perform personal work without just compensation and without his full consent (unless the work be imposed as a penalty by the judicial authority).

(With respect to public services, the following only shall be obligatory, under provisions which shall be established by law: Military service, the electoral functions, municipal offices, and service upon the jury; all of these, except military service, shall be gratuitous as well as obligatory.)

The State shall not permit the execution of any contract, covenant, or agreement which has for its object the (abridgment), loss, or irrevocable sacrifice of the liberty of man, whether by reason of labor, education, or religious vows.

(The law, therefore, does not recognize monastic orders, nor may it permit their establishment, whatever may be the denomination or the object for which it may be sought to create them.) Nor shall any agreement be permitted by which a man agrees to his own proscription or exile. (As amended Sept. 25, 1873, and June 10, 1898. The change in the first clause and the addition of the second clause were made in 1898. The other changes were made in 1873. For the relation of church and State, see additions to the constitution of Sept. 25, 1873.)

ART. 6. The expression of ideas shall not be the object of any judicial or administrative investigation, except in case it attacks morality, the rights of a third party, provokes some crime or misdemeanor, or disturbs public order.

ART. 7. The liberty to write and to publish writings on any subject whatsoever is inviolable. No law or authority shall establish previous censorship, or require authors or printers to give bond, or restrict the liberty of the press, which shall have no other limits than respect for private life, morality, and the public peace. Crimes which are committed by means of the press shall be judged by the competent tribunals of the Federation or by those of the States or of the Federal District and the Territory of Lower California, in accordance with the penal laws. (As amended May 15, 1883. The last sentence originally read "Crimes of the press shall be judged by one jury which determines the facts, and by another which applies the law and designates the punishment.")

ART. 8. The right of petition, exercised in writing in a peaceful and respectful manner, is inviolable, but in political matters only citizens of the Republic may exercise it. To every petition a written answer shall be returned by the authority to whom it may have been addressed, and the latter is obliged to make the result known to the petitioner.

ART. 9. No one shall be deprived of the right peacefully to associate or unite with others for any lawful purpose, but only citizens of the Republic may assemble in order to take part in the political affairs of the country. No armed assembly shall have the right to deliberate.

ART. 10. Everyone shall have the right to possess and carry arms for his security and legitimate defense. The law shall designate what arms are prohibited and the punishment to be incurred by those who carry them.

ART. 11. Everyone shall have the right to enter and leave the Republic, to travel through its territory, and to change his residence, without the necessity of a letter of security, passport, safe conduct, or other similar requisite. The exercise of this right shall not affect the legitimate power of the judicial or executive authorities in cases of criminal or civil responsibility.

ART. 12. There are not nor shall there be recognized in the Republic titles of nobility or prerogatives or hereditary honors. Only the people, legally represented, may decree recompenses in honor of those who have rendered or may render eminent services to the country or to humanity.

ART. 13. In the Mexican Republic no one shall be judged by special laws or by special tribunals. No person or corporation shall have privileges or enjoy emoluments which are not in compensation for a public service and are not established by law. Martial law may exist only for crimes and offenses which have a definite connection with military discipline. The law shall determine with absolute clearness the cases included in this exception.

ART. 14. No retroactive law shall be enacted. No one shall be judged or sentenced but by virtue of laws made prior to the act, and exactly applicable to it, and by a tribunal which shall have been previously established by law.

ART. 15. Treaties shall never be made for the extradition of political offenders, or for the extradition of petty offenders who may have been slaves in the country where the offense was committed; nor agreements or treaties by virtue of which are altered the guaranties and rights which this constitution grants to the man and to the citizen.

ART. 16. No one shall be molested in his person, family, domicile, papers, or possessions, except by virtue of a written order from a competent authority, which shall establish and set forth the legal grounds for the proceeding. In cases where one is detected in the commission of an offense, any person may apprehend the offender and his accomplices, placing them without delay at the disposal of the nearest authorities.

ART. 17. No one shall be arrested for debts of a purely civil character. No one shall exercise violence in order to enforce his rights. The tribunals shall always be prompt to administer justice, which shall be gratuitous, judicial costs being consequently abolished.

ART. 18. Imprisonment shall take place only for crimes which deserve corporal punishment. In any stage of the proceedings in which it shall appear that such a punishment can not be imposed upon the accused he shall be set at liberty under bail. In no case shall the imprisonment or detention be prolonged for failure to pay fees or any other pecuniary charge.

ART. 19. No detention shall exceed the term of three days, unless justified by a warrant, showing the cause of imprisonment and having the other requisites established by law. The mere lapse of this term shall render liable the authority that orders or consents to such detention and the agents, ministers, wardens, or jailers who execute it. Any maltreatment in the apprehension or in the confinement of the prisoners, any hardishp which may be inflicted without legal ground, or any tax or contribution in the prisons is an abuse which the laws should correct and the authorities severely punish.

ART. 20. In every trial the accused shall have the following guaranties:

I. That the grounds of the proceedings and the name of the accuser, if there shall be one, be made known to him.

II. That his preliminary examination be made within 48 hours, counted from the time he may be placed at the disposal of the judge.

III. That he be confronted with the witnesses who testify against him.

IV. That he be furnished with all the information on record, which he may need for his defense.

V. That he be heard in his defense, either personally or by counsel, or by both, as he may desire. In case he should have no one to defend him, a list of official counselors shall be shown to him, in order that he may choose one or more to act as his counsel.

ART. 21. The imposition of penalties properly so called shall belong exclusively to the judicial authority. The political and administrative authorities shall only have power to impose, as corrective measures, fines to the extent of $500, or imprisonment to the extent of one month, in the cases and in the manner which the law shall expressly determine.

ART. 22. Punishments by mutilation and infamy, by branding, flogging, the bastinado, torture of every kind, excessive fines, confiscation of property, or any other unusual or extraordinary penalties shall be forever prohibited.

ART. 23. The penalty of death for political offenses is abolished. With reference to other offenses, the penalty of death shall only be imposed in case of treason during a foreign war; parricide; homicide with treachery, premeditation, or advantage; arson; selling or forcing another into involuntary servitude; highway robbery; piracy; and grave offenses of a military character. (As amended, May 14, 1901.)

ART. 24. No criminal case shall have more than three trials. (I. e., trial before the court of first instance, and two trials on appeal.) No one shall be tried twice for the same offense, whether by the judgment he be acquitted or condemned. The practice of suspending trial is abolished. ("Absolver de la instancia," to suspend proceedings, usually because of insufficient evidence, it being possible to have a new trial upon the same charge; practically the same as the nolle prosequi of English law.)

ART. 25. Sealed correspondence sent through the mails shall be free from any examination. The violation of this guaranty is an offense which the law shall punish severely.

ART 26. In time of peace no soldier may require quarters, supplies, or other real or personal services, without the consent of the owner. In time of war he may do so, but only in the manner prescribed by law.

ART. 27. Private property shall not be taken without the consent of the owner, except for a public purpose, and upon previous indemnification. The law shall determine the authority which may make the condemnation and the conditions upon which it may be carried out.

Religious corporations and institutions, whatever may be their character, denomination, duration, or object, and civil corporations when they are under the patronage, direction, or administration of religious organizations or of ministers of any religious denomination, shall have no legal capacity to acquire or administer any real property other than the buildings destined immediately and directly to the service and object of such corporations and institutions, nor shall they acquire or administer funds secured upon real estate.

Corporations and civil institutions which are not included within the above restrictions may acquire and administer, besides the buildings referred to, immovable property and funds secured upon immovable property which they may require for their support and purposes, under subjection to the requirements and limitations of a Federal law which shall be passed by the Congress of the Union. (As altered by amendment of May 14, 1901. This amendment restricted the powers of religious corporations and extended the powers of civil corporations; it repeals, by implication, art. 3 of the additions to the constitution of Sept. 25, 1873. See additions to the constitution of Sept. 25, 1873, for relations of church and state.)

ART. 28. There shall be no monopolies nor exclusive privileges of any kind, nor prohibitions under the guise of protection to industry. The only exceptions to this shall be those relative to the coining of money, to the mails, and to the privileges which, for a limited time, the law may grant to inventors or to the perfecters of some improvement.

ART. 29. In cases of invasion, grave disturbance of the public peace, or in any other cases which may place society in great danger or distress, only the President of the Republic, with the concurrence of the council of ministers and with the approbation of the congress of the union, and in the recess thereof of the permanent committee, may suspend the guaranties established by this constitution, with the exception of those which protect the life of man; but such suspension shall be made for a limited time by means of general orders, and shall not be limited to a particular individual.

If the suspension should take place during the session of congress that body shall grant the authorizations which it deems necessary in order that the executive may properly meet the situation. If the suspension should take place during the recess, the permanent committee shall convene the congress without delay, in order that it may grant such authorizations.

Mr. FALL. Mr. President, the bill of rights as contained in the Mexican constitution which has just been read has been set aside by V. Carranza by virtue of the authority vested in him by V. Carranza, as have also been set aside all the other provisions of the Mexican constitution and all the laws of the Mexican Republic. The Government is one purely by decree. The officers of the Federal Government, I repeat, all over the Republic, where they can find room or where their opponents will allow them to remain, are appointed by Carranza. The governors of the States, whether in the States or not, are appointed by Carranza. They issue decrees wherever they may be, although probably not in the capitals of the States to which they are assigned. Some of them issue a decree, as it is claimed, by virtue of the authority vested in them by V. Carranza; but others issue decrees—as, for instance, the governor of Tamaulipas on the 14th of January issued a decree prohibiting barter, sale, and commerce of any kind in real property, and so forth, in the State of Tamaulipas "by virtue of the power vested" in him by Pablo Gonzales.

Gonzales is the general in command in the department of the City of Mexico. Other governors, whether in their States or not, issue decrees affecting property rights, rights of foreigners and others in their States by virtue of the authority vested in themselves by themselves. Some recognize Carranza; some ignore Carranza. The majority issue a decree by virtue of the authority vested in them by V. Carranza when the decree, they think, will be peculiarly unpopular. When it is one the operation of which might inure to their own personal benefit and will be directed against a class of society which has no voice, they issue it by virtue of the authority vested in themselves by themselves. They ignore Carranza, in other words, when it suits them to do so. They refer to Carranza as authority when it is convenient for them so to do.

But remember, when Madero was elected President every State officer was elected at a general election held under the constitution and in full force, and although in the 27 States governors were elected there is not a governor so elected now serving in the entire Republic of Mexico. Where there is a State in such a condition political or social that Carranza can place a governor in the capital, he places him there by his own arbitrary power vested in himself by himself. There is not an elective officer remaining in the Republic of Mexico. During the Madero administration a congress was elected under the provisions of the constitution. Where is that Congress? During the Huerta administration a congress was elected under call made under the terms of the constitution. Where is that congress?

Under the provisions of the Mexican constitution, differing from ours, when congress is not in session what is known as a permanent legislative committee is always in session, composed of a certain number of senators and a certain number of members of the house. So congress is never out of existence in Mexico. Where is that permanent committee?

I have just read in the bill of rights of the Mexican constitution that no rights of man can be affected by decree. It must be done by following the provisions of the constitution; and if attempted to be done by executive order the action must be ratified by the Congress of Mexico, and if the congress is not in session it must be ratified by the congressional legislative committee, which is always in session.

No contract, concession, so called, franchise, or any other governmental agreement with individuals or with other governments, no appointment of an ambassador can be lawful except by congressional action in Mexico. Arredondo is no ambassador. The Mexican constitution directly prohibits the appointment of this man Arredondo as ambassador to the United States. He could not be appointed except by the action of the Mexican Senate. Such treaty as was proposed to be made following the lines of the old Indian treaty, where the troops of Mexico might cross to this side in the pursuit of Indians and the troops of this country might go into Mexico in pursuit of Indians, must be made by consent of the senate. No such treaty, not even a temporary agreement, can be made under the Mexican constitution by the Executive. It is a question as to whether it can be so made here in the nature of a protocol, though custom has established that it may; but under the Mexican constitution the execution of such protocol without the prior consent or ratification of the senate is prohibited. It is not silent, as is our Constitution, upon the subject.

Mr. WORKS. Mr. President——

The PRESIDING OFFICER (Mr. GALLINGER in the chair). Does the Senator from New Mexico yield to the Senator from California?

Mr. FALL. I yield to the Senator.

Mr. WORKS. And when we make contracts of that kind with Carranza, we ourselves are violating the constitution of Mexico?

Mr. FALL. We ourselves are violating the constitution of Mexico, and inviting upon ourselves the natural disasters which may ensue if we enter into any character of binding agreement with that country. Under the present condition of affairs existing there such agreement may be violated with impunity by any subsequent Mexican Government or by the present Mexican Government at any time. It may also involve us with foreign countries at any moment, and I may say that some of our actions have already had that tendency.

Mr. President, I am hurriedly going through this record referring to a few other matters which are set forth in this answer to the Senate resolution and which were referred to in the resolution itself.

For instance, the Government of the United States was called upon to state what assurances it had as to either the ability or the desire of the Carranza government to protect American citizens before the recognition of Carranza, which was the time, as it would appear to a man of ordinary common sense, to secure such assurances. What assurances were demanded or secured? I have heretofore read the assurances, but I do not think that a Member of the Senate can recall them now. On page 32 you will find the assurances set forth in the decree of Mr. V. Carranza. That decree reads:

First. The constitutionalist government shall afford to foreigners residing in Mexico all the guaranties to which they are entitled according to our laws—

Mr. Lansing refers to that statement as the assurance obtained for the protection of American citizens in Mexico—an absolute ignoring of the treaty provisions and treaty rights of American citizens; not even a reference to them.

Since 1831 this country has had a solemn treaty with Mexico, under which special protection is guaranteed in their houses, in their homes, and in their business, to American citizens either temporarily or permanently in the Republic of Mexico. The Senate of the United States asked of this administration what assurance they had of either the desire or of the ability of the Mexican Government, which they were constituting, to

regard these treaty rights and to safeguard the interests of the people of the United States. The answer is flippantly given in the words of V. Carranza himself—not that they will respect any treaty, but simply that—

The constitutionalist government shall afford to foreigners residing in Mexico all the guaranties to which they are entitled according to our laws.

What laws? Not the constitution of Mexico, that is set aside; not according to the constitution of any State in the Republic, those constitutions are abrogated; not according to the laws as we have known them, as enforced by that old lawgiver Juarez, and as they have been enforced down to the present time; not the laws of States nor the laws of the Republic passed by the lawmaking bodies, but the laws of Venustiano Carranza, as embodied in his decrees. This is the assurance that our Government has satisfied itself with in the face of the demand of the Senate of the United States to know what the administration has done toward protecting the citizens of the United States in the Republic of Mexico. Since this answer was prepared and sent, 18 of our citizens have gone to their death at Santa Ysabel, and not one thing has been done to avenge their murder or to demand assurances for the future safety of Americans except the punitive expedition, caused by the murder of Americans on this side, to which I shall refer a little later.

In passing now, however, and while it is fresh in my mind, I may call the attention of the Senate to the fact that, with 14,000 American troops in Mexico, they are there under strict orders which will prevent their arresting one man guilty of the murder of Watson and his companions, unless that man happened to be in the raid on Columbus. No authority is vested in our troops in Mexico, although they might encounter those bloody-handed murderers, to cause an arrest or demand punishment, unless the same party happened to be one of those who followed Villa onto the United States soil on March 9. This is the answer given to the request of the Senate of the United States to know, before constituting this Government in Mexico, what have you done to secure the treaty rights and the protection of American citizens? They send us, under the indorsement of Woodrow Wilson, back to the Senate the statement that V. Carranza has said that he will protect American citizens as is provided under his laws. That is the assurance of this great Government of 100,000,000 people, with two billions of the money of its people invested in Mexico, with nearly 500 of its citizens murdered in Mexico, with its women raped in Mexico, with 5,000 of its citizens driven from the soil of Mexico at the muzzles of guns held by bandits, with the Congress of the United States appropriating $100,000 to keep those poor people from starving to death when they were brought to this side—with those conditions existing in Mexico, we receive this assurance from the President of the United States. This is his answer; this is what he has done.

We asked the President what provision he had arranged for as to the payment of claims for damages already done by the loss of life or the destruction of property, or otherwise, to our citizens in Mexico. We are answered in this same expression of V. Carranza, we have the assurance, we are referred to the same statement, following the words which I have just read:

And shall amply protect their lives, their freedom, and the enjoyment of their rights of property, allowing them indemnities for the damages which the revolution may have caused to them, in so far as such indemnities may be just and which are to be determined by a procedure to be established later.

This, we are told, is what this Government has done in constituting a Government in Mexico to secure reparation for damages done American citizens on Mexican soil. Ah, truly this administration can be congratulated upon its methods in protecting American citizens by words, at any rate.

But, Mr. President, I am reading from the record; this is the statement to which we are referred by Mr. Lansing, indorsed by Mr. Wilson, made solemnly to the Senate of the United States in answer to a respectful question; and yet at that time and since 1913 they have had on file in the State Department a pledge from Carranza as to the payment of these claims and as to how the payment was to be made. They have ignored it. This Government, in dealing with him and in recognizing him, has ignored and discharged him and relieved him from his pledge. They have accepted, in other words, the pledge of June 11; 1915, and discharged him from the pledge contained in his decree of May 10, 1913. On that date he pledged to this Government by this decree—a duplicate was filed in the State Department and is there now, and this copy was furnished me on the same date by the Carranza authorities here—this Government, instead of doing its duty and providing for the reparation for damages done Americans, has discharged this man from his solemn pledge to this country—solemn and specific, because at that time they wanted something; because they wanted help in this body and elsewhere; and they made this pledge for the purpose of securing assistance or, at least, that they might to some extent close the mouth of the opposition; and they furnished me for that reason with this duplicate of the decree, which they filed in the State Department:

ARTICLE I. The right of all nationals and foreigners to claim payment for damages suffered during the revolution of 1910 or during the period embraced between the 21st of November, 1910, and May 31, 1911—

Note the dates—

is hereby recognized.

That goes back to the inception of the Madero revolution; it brings it up to the date of the Carranza revolution, and then goes beyond it, as I will show you.

ART. II. An equal right is also recognized on the part of nationals and foreigners to claim for damages which they may have suffered during the present struggle or from and after the 19th day of February of the present year, until the restoration of the constitutional order.

ART. III. The same right on the part of foreigners to claim payment for damages suffered by revolutionay forces or groups during the period embraced between the 31st of May, 1911, and the 18th day of February of the current year, is recognized.

I ask Senators here to pay attention to the wording of this decree, because I am going to call your attention in a moment to other matters in connection with it.

ART. IV. As soon as the first chief of the constitutionalist forces shall arrive at the capital of the republic, and in accordance with the plan of Guadalupe, assumes the executive power, he will name a commission of Mexican citizens who shall be charged with the receipt, examinatien, and liquidation of the claims for damages suffered during the periods fixed in Articles I and II of this decree.

ART. V. At the same time that the said commission is named, as provided in the preceding article, the first chief of the constitutionalist forces, in accord with the diplomatic representative of, or commissioner especially designated by, the government of the foreigners who have suffered damage will proceed to name a mixed commission, composed of an equal number of Mexicans and foreigners, the latter of the same nationality as the claimants, in order that they may receive, examine, and liquidate the claims presented, in accordance with the provisions of the three first articles of this decree.

Now, sir, when Watson and his associates were shot down and representatives of their suffering families, American citizens, came on here to the State Department and asked what was going to be done, and whether this Government would request or demand of the Mexican Government payment for the lives of their loved ones, they were told, first, "We do not know; we have the matter under consideration as to whether legally, we having recognized Carranza, we can hold Carranza responsible for the death of the people who went to their death at the hands of Pablo Lopez or some one else not recognizing Carranza."

Mr. WORKS. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Mexico yield to the Senator from California?

Mr. FALL. I yield.

Mr. WORKS. These pledges which were made sound very nice, and, if they were made by anybody having authority, they might be of some consequence; but I suppose the Senator recognizes the fact that they are not worth the paper they are written on, because nobody has any authority to bind the Republic of Mexico by any promise of that kind under present conditions. Is it not a fact that the whole trouble with this matter, so far as our dealing with that country is concerned, is that there is not any government down there to deal with at all? We are dealing all the time with people who have no authority to bind the Republic itself.

Mr. FALL. Mr. President, we have made a government there, and, in so far as we are concerned, we are estopped from saying that Mexico has not a government. We have made it.

Mr. WORKS. The Senator says we have made a government down there, but it is hardly in conformity with the constitution of the Republic.

Mr. FALL. It is in absolute violation of the constitution.

Mr. WORKS. Yes; and therefore it is no government at all. We certainly have no authority to establish a government in Mexico.

Mr. FALL. But we have said from August 27, 1912, that we were going to do it; the President of the United States said that he was going to do it, and he stated what kind of government he was going to set up.

Mr. WORKS. Then, it is an attempt to do something that neither this Government nor that one has any authority or power to do.

Mr. FALL. Very well, sir. As to the Senator's statement that these words sound well, do they not sound better, may I ask the Senator, than the words of this instrument which has now been substituted by this Government in lieu of them?

Mr. WORKS. Of course, they sound better, and, if there was any authority to make those promises, they would be better, but what I wanted to bring to the attention of the Senator is

that there is nobody under existing conditions to make any promise that is binding and that every effort of our Government to deal with any such assumed power as that is absolutely futile.

Mr. FALL. Unless, Mr. President, by some miracle this so-called government in Mexico, or its successor, will eventually become a successful constitutional government, in which event the acts of the so-called existing government would probably be enforceable against such successor.

Mr. WORKS. I question that. I do not believe that any government which may be established in the future would be bound in any way; it might accept it, and take some action that would make the government bound from that time on, but certainly it would not be bound by virtue of this document.

Mr. FALL. Mr. President, I do not think that when one government deals with another the doctrine of ultra vires, which is applicable to the case of corporations and their officials, would apply to governmental acts. I think that, inasmuch as this Government has recognized Mr. V. Carranza as chief depository of the de facto government of Mexico, it is the duty of this Government to hold Mr. V. Carranza absolutely to account for anything that he may do, or which may be done under him against American citizens, and to make him carry out his pledges with reference to the payment of damages.

Mr. WORKS. That may be done by force of arms. It is the only way that it can be done. You can not enforce it as a contract or a treaty or anything of the sort.

Mr. FALL. Well, Mr. President, you can not enforce any other treaty or contract between nations except by the method provided for in the treaty itself, by agreement thereafter to arbitrate difficulties or by the sword.

The point that I am making, Mr. President, is this: That the claimants are told that there is a question in the mind of the governmental authorities here as to whether Carranza can be held responsible. There would be no question if they took this document, Mr. Carranza's contract, because that provides that as to any damages done to anyone during the entire course of the revolution he will be responsible. It makes no difference who did the damage or whether the act was committed by one side or the other. They have waived that. Now, they question his responsibility under this new agreement which they have accepted. Not only that, but they have waived the agreement entirely as to a mixed commission; they have waived the responsibility entirely under his contract and have accepted simply his statement that he would see that claimants were paid damages according to his laws, which he himself enacts.

The department was asked another question, which they have answered, I judge, in a facetious spirit. The Secretary of State has put within quotation marks a word which was intentionally used in phrasing the resolution. The question was asked, What assurance the Government of Mexico had given, if any, as to the protection of foreigners and citizens in their religious rights, in the right to worship freely in their houses or in their churches? I say that apparently this expression used in the resolution was treated facetiously by the Secretary of State.

Evidently he did not know what the treaty with Mexico upon that subject was. He did not know that the rights which are referred to are guaranteed by treaty with Mexico, and that those rights have been construed by the greatest lawyer, the greatest lawgiver and enforcer and constitutional statesman that Mexico has ever produced, not only while he was chief justice of Mexico, but while he was President of Mexico, Benito Juarez. He himself passed upon the question of, I think, the ninth section of the treaty of 1831, carried into the treaty of 1848, and referred to in the treaty of 1854, with reference to the right of religious worship, of burial, and so forth. There was a wording in this section which might be construed as protecting Mexicans in the United States in a different way than citizens of the United States in Mexico should be protected with reference to their right to religious worship in their own houses or in their chapels. Juarez went on record in a written answer, in which he said that article second of the treaty of 1831, which prescribed that the contents of this instrument were intended to be based on a mutual understanding, was sufficient to make those treaty obligations mutual also, and that, therefore, American citizens were entitled to the same protection which we had more clearly set forth we would extend to Mexican citizens in the United States in their right to worship. We asked if the Carranza government had promised anything with reference to securing the right of the free exercise of religious observances, and so forth, provided for in the treaty; and we were again referred to the prepared answer of Mr. Arredondo and Mr. Carranza. The department says in its answer "We have received these assurances, as you will see from the accompanying documents." Very well, let us see what the accompanying documents are.

You have read something of the restrictions upon monastic orders as contained in the bill of rights of Mexico. Following the Mexican constitution there was passed what are known as the "laws of reform," providing just how church property could be held and what property could be used by the church, and restricting it to cathedrals, their churches, and so forth, and the necessary ground upon which they were situated. During the Maximilian revolution, as the clerical party had been of assistance to Maximilian and the French in the war, the church property was confiscated in Mexico; and in confiscating the property, so as to readjust conditions, the Government of Mexico confiscated not only the landed property generally, but confiscated the cathedrals themselves. Then, under the laws of reform, which we hear referred to so often by loyal Carranzistas, the cathedrals and the churches were ceded back to the Catholic clergy; the houses of worship were given back, granted by the State, and became the property of the Catholic Church.

Now, Mr. Lansing says he has received assurances as to the protection of citizens in the exercise of their worship, and so forth, and the protection of the priesthood in Mexico. I should like some Senator to tell me what would be the answer if a dictator or a President or a Congress in the United States were to enact a law to provide that no clergyman in the United States should be allowed to take any part in political matters of any kind or character, whether the woman-suffrage question, whether a great moral issue, such as prohibition, or whatever it might be—that he should not be allowed to take part in the discussion of any such matter where it was in politics.

What would be the consequence? How long would a government last in this country under those conditions? And yet the great leader of the Carranza party—I might say the brains of the Carranza party, the man who has represented them continuously in this country and is now acting as minister of finance, in an attempt to satisfy the people of the United States as to the error of statements that had been made with reference to the action of the Carranzistas in regard to religion in Mexico—Mr. Cabrera, issues a pamphlet on what he calls "The religious question in Mexico," and in closing he says:

> However, here is what we intend to do and here is what must be done—

This is what they are prohibiting in Mexico now—

> The intervention of the clergy in political matters.

They construe that to mean that if any priest takes part in anything of a public nature or of a private nature which one of their leaders chooses to class as a political matter, whether it is a question of closing a saloon in the city of Juarez or any other question, then he is guilty of entering into politics and the penalty is exile from his country or that he be shot, as has been done time and time again.

I hold no brief to speak for the Catholic Church in Mexico or anywhere else, but I want to say to you now, without fear of being accused of bringing religion into this discussion, that the Catholic Church in the Republic of Mexico has stood for law and order and peace and against murder and brigandage and outrage and robbery and devastation. It has stood for peace and law and order as all religion everywhere stands for peace and law and order in every country. It is for this reason that those women who have been giving their lives without recompense for nursing the sick in Mexico and to educating the young have been borne, outraged, to maternity hospitals and delivered of children born in the arms of lust. It is by excuses of this kind that Dieguez, one of Carranza's great leaders, has since Carranza's recognition stabled his horses in the churches of Sonora and of Sinaloa and has driven the priests from their homes and into the United States.

It is on a theory of this kind—because the Catholic Church stands there for law and order—that one of its bishops was shot down in Matamoras, after being robbed, because he could produce no more money with which to ransom himself. It is because they are against bandits and murderers that they are being hounded to death and their women driven from Mexico after being outraged and their priests and their teachers driven from the Republic. And then Carranzistas publish throughout the length and breadth of this country—and some innocent people take them at their word—that they are sending 50 educators on to the United States to study the public-school system in this country that they may inaugurate it in Mexico!

Why, Mr. President, that old Indian, Porfirio Diaz, instituted a school system in the Republic of Mexico which carried the public schools out among the Tarahuamaris and into the most inaccessible part of the Sierra Madres; which carried them among the Mayas of Yucatan, who had never been conquered

by any race, and who yet admitted his school system among them. He inaugurated a school system under which, in the State of Chihuahua, in 1910, there were 22,000 children in the public schools alone in daily attendance out of a total population of 327,000 people, mostly Indians, in an enormous State, and scattered over hundreds of miles. They had 22,000 children in daily attendance, two normal schools educating teachers, two agricultural colleges, one technical school, one school of arts and sciences; the State supporting 60 of its normal graduates in postgraduate courses in the colleges of France, of Germany, and of England. To-day there is scarcely a school running, and for four years the doors have been closed; and yet for over two years out of this time in that State of Chihuahua, Carranza, either through Villa or now through himself, has been in supreme command and claims that the State is absolutely under his jurisdiction.

Now, Mr. President, the Government of the United States, through its Secretary, said to this Congress, inferentially, at any rate, that they had received satisfactory assurances from the Carranza government as to the protection of the religionists in Mexico; and yet they filed as an exhibit here this same decree of June 11, 1915, in which Venustiano Carranza says:

Temples shall continue to be the property of the nation, according to laws in force, and the constitutionalist government shall again cede for the purposes of worship those which may be necessary.

He has taken over every church in Mexico which was granted under the laws of reform, and he now says that in his good pleasure, when he has a constitutional government established in Mexico, they will then cede the necessary churches as places of worship. These are "satisfactory assurances"! They may be.

Mr. President, we have recognized Mr. Carranza. I have shown you what the President has said he was going to do about the recognition and the establishment of a constitutional government in Mexico. I have shown you what he has done, as compared with what he has said—that the Government of Mexico is established, by the documents which he has sent to the Senate, to be the most autocratic government ever known in the history of the civilized or uncivilized world. Never did Peter the Great or any Czar of Russia hold in his hand the absolute power vested in Venustiano Carranza by himself to set aside the marriage ceremony, to control the right of marriage, to control the right of religious worship, to prevent religious worship, to control the houses of worship, to set aside State constitutions, to set aside a Federal constitution, to set aside all State laws and all Federal laws, to set aside the legally elected congress of his Republic, to ignore it, to ignore the legislative committee appointed under the constitution of his country, to ignore every elected officer in every State in the Republic, to appoint governors and all other officers at his own sweet will, to abolish courts and establish courts-martial, to try men for civil offenses by military courts such as I have explained to you in passing, and to sentence them and execute them by shooting at his own sweet will; and never, certainly, was such a government, founded upon such declared intentions and principles, recognized by this Government in our history. And yet the President of the United States, after all his declarations as to what he should do, has recognized Carranza and put him in power in Mexico, so far as he could, in the face of Carranza's declaration as to the kind of government he would establish; and the President has then sent, in answer to the Senate resolution, the declarations of Carranza as a reason for his recognition!

Mr. President, I have not been in the habit of injecting politics into any discussion which I have ever engaged in in the Senate; but I say here that if the people of the United States could understand the record of this administration in Mexico, Mr. Wilson would never again be President of this Republic.

Now, let us see. Why should we have picked Mr. Carranza? We did refuse him arms and ammunition, while giving them officially and in a governmental capacity to Mr. Huerta up to August, 1913. Let us see what Mr. Carranza has done for us—how he has treated this Government. Possibly, by looking back, we may ascertain what actuated the administration here in the recognition of Carranza, if anything, aside from what they have set forth in this report.

The first official or semiofficial act of ours with reference to Carranza was, as I recall it, in connection with the murder of the Englishman, Benton. We called for an explanation. Great Britain was requesting us to do something. We undertook an investigation, and we were notified by V. Carranza that he was in command, that Villa was only a leader under him, and that he himself would conduct any such investigation as was necessary. We were offered at one time the right to send physicians into Mexico in order that the body of Benton might be exhumed and examined by physicians to ascertain the method by which he met his death. My recollection is now that that examination was finally definitely refused by Mr. V. Carranza, at that time his headquarters being in Sonora. We then notified Mr. Carranza that we had been requested by foreign governments to have our consuls deal with him in representing the interests of their nationals—for instance, Great Britain in the Benton matter. Mr. Carranza notified the Government of the United States that our consuls could not represent any other government unless such government accredited them as its own consuls to him. Rebuff No. 1.

In assisting Mr. Carranza—or, as the President of the United States much more eloquently and effectively puts it, in serving humanity—by seizing Vera Cruz, we, of course, incurred the displeasure of Mr. Huerta, but naturally we expected the approbation of Mr. Carranza. We received that of Mr. Villa, one of our pets at that time, and we were notified by Mr. Carranza that he objected very seriously to our occupation of any portion of the sacred soil of Mexico, and that he should object to our retention of it. I am going to call attention to this occupation of Vera Cruz and the evacuation of Vera Cruz a little bit later as I go along; but I simply want to emphasize now the number of times that we have requested anything of Carranza, and to show to the Senators here that never in any single instance yet has Carranza agreed to anything we have requested of him—never. Never has he approved of any action of ours; and he has emphatically expressed not only his disapproval of our actions in the past, but his dissent from our views and his refusal to grant our requests at all times.

The Niagara conference was called. Mr. Huerta went before the conference with his delegates. Mr. Carranza refused to go. Then the agents of this Government, Justice Lamar and Mr. Lehmann, presented what they understood should be done in the interests of the Carranzistas to bring about peace. We have never received from the administration any account of what took place at this Niagara conference. I stated here in a speech at one time that certain impressions, at least, were made throughout Latin America and in Mexico as to what had been agreed upon, and it caused no particular manifestation of interest, but certainly no denial from any authoritative source. I want to read into the RECORD some of the statements that were made to Carranza and to the Mexican people and to the Latin Americans at that time.

There was a protocol signed by the representatives of this Government and the representatives of Huerta and by the representatives of Argentina, Brazil, and Chile as to what they should confer about and what should be done and publicity given through the public press, and in signed statements sent out by our officials.

The text of the protocol signed at Niagara Falls the 25th of June, 1914, was as follows:

ARTICLE 1. The provisional government referred to in protocol 3 shall be constituted by agreement of the delegates representing the parties between which the internal struggle in Mexico is taking place.

Huerta agreed that our delegates and Huerta's delegates should submit to mediation their case, not only as to the dispute between the United States and Huerta, but as to the troubles in Mexico and as to the constitution of a government in Mexico as between the Huertistas and the Carranzistas. Carranza refused to send delegates, although we had asked him to do so, and were acting in good faith, as I will show you. Huerta agreed, and the protocols were signed as to what should be considered.

The three mediating Governments agree on their part to recognize the provisional government organized as provided by section A of the protocol.

Then there was a discussion, and our eminent statesmen entered into it and combated some of the objections made by the Huertistas to the methods by which the government was to be established in Mexico, which I shall read you:

The decision to leave for future settlement the question of the withdrawal of the American armed forces from Vera Cruz was due to a difference between the Government of the United States and Mexico and expressed by their delegates.

That was waived.

President Wilson, it was made known, contended that any agreement on the subject should provide that the American troops should not be withdrawn until after constitutional elections had been held throughout Mexico and a new President installed in office.

This was as to the evacuation of Vera Cruz. We were not going to evacuate Vera Cruz at all until after a constitutional election had been held and a new President elected in the Republic of Mexico.

The Mexican delegates combated this proposal on the ground that if American troops remained in Mexico for the period favored by President Wilson, the accusation might properly be made that they were kept in Mexico to influence the elections.

I am quoting all of this from the official proceedings.

As neither side was willing to recede from its position, it was agreed that consideration of the question of the withdrawal should be postponed until after the effort had been made to have the Huerta and constitutionalist delegates settle their differences under the method proposed by the mediators."

Before they got to the point of signing the agreement as to the settlement of difficulties between the contending factions in Mexico and as to the settlement of the difficulties between ourselves and Huerta, Messrs. Lamar and Lehmann, the American delegates, gave out an official statement, in which they said that after consultation with Mr. Bryan and President Wilson himself they issued their statement. I quote:

If those selected by the mediators—

They had been discussing a plan of mediation—

to administer the provisional government have the confidence of the constitutionalists—

The Carranzistas—

a long step will have been taken toward the pacification of Mexico without furnishing any occasion for alarm to those Mr. Rabasa represents—

Mr. Rabasa represented the Huerta element—

for if the plan is accepted both by Gen Huerta and Gen. Carranza, the cessation of arms follows, and a provisional government is established to maintain order, to protect life and property, to call an election at which every qualified voter may cast his ballot for the President of his choice.

I may say here that the Carranzistas insisted that unless it was agreed upon beforehand that a Carranzista should be recognized as the President pro tempore, they would not take any part in the conference. The American delegates were met by the Huertista delegates with the proposition that a neutral man should be agreed upon, not a member of either party. The Carranzista unofficial delegates were in communication with our official delegates all the time, and our delegates were voicing their objections. They insisted that a Carranzista should be appointed President pro tempore, and recognized by this Government.

There was then discussed the method of holding an election, and the American delegates suggested a bipartisan plan—that is, that the Carranzistas should appoint certain-named parties as members of the cabinet, the Government to be composed in that way of the two factions.

The effort, therefore, should be, not to find a neutral—

This is the statement of the American delegates—

but one whose attitude on the controlling issues would make him acceptable to the constitutionalists, while his character and conduct would make him acceptable to the other party. Such a man, and only such a man, can reasonably be expected to have the confidence and respect of the entire country.

In answer to the contention that there could be no fair election conducted by a provisional government of which a constitutionalist was provisional president, the answer of the Americans calls attention to the fact that in the past the elections in Mexico "have been under the supervision of a single cabinet minister representing the dominant party." By analogy the next election should be supervised by only one officer representing the dominant constitutionalist party. The American plan seeks to avoid the just criticism against that method, and contemplates that this, the most important election in the history of Mexico, shall be supervised by the representatives of both parties. It is wholly incorrect to assume that thus supervised it would be unfairly conducted, and you may rest assured that all the influence the United States can legitimately use will be exerted to secure an honest election.

This is all a quotation. You will see that while watchfully waiting, while allowing them to spill their blood, while refusing to have anything to do with Mexico, while notifying our political adherents in Indianapolis that we had nothing to do with this Government, we were outlining the entire plan of government and holding consultations with representatives of the different factions as to how elections should be held, and just what should be done, and stating that we would use our influence to see that these bipartisan methods were carried out; and in every instance Carranza rejected every proposition which was made to him. In every instance where he has been called upon to agree with Huerta, to agree with Villa, to agree with the others, the others have invariably accepted the suggestions of the United States Government and he has invariably scornfully rejected them.

I referred a while ago, in another connection, to the fact that when Carranza sought, after this Niagara conference, to enter the City of Mexico after Huerta had left by way of Puerto Mexico, Carbajal, who was left in charge of the city, requested this Government to demand of Carranza assurances that general amnesty should be proclaimed in the City of Mexico before he was allowed to enter the city. Why? Why, Senators, because following what they understood to be the general agreement, although the party himself was not named in the Niagara conference—they could not agree on the party—but understanding this protocol to mean a certain thing, Huerta agreed to leave Mexico and surrendered every garrisoned city and every soldier in it and no longer attempted to prevent the placing of the country entirely in the hands of the Carranzistas. No further resistance was made. When he marched out he turned the City of Mexico over to Carbajal, who was suggested by all parties as a neutral, as a man not either a Huertista or a Carranzista; and he, a high-toned, educated gentleman, called upon the Government of the United States to assure protection to the people of the City of Mexico against the lust and the bloodthirstiness of Carranzistas; and we intimated to him that we would like to have his promise to that effect, and he refused to give it.

As I said, we occupied Vera Cruz, and then we evacuated Vera Cruz. I want to call your attention to what occurred just before the evacuation of Vera Cruz. I read to the Senate here on one occasion a speech made by Col. Isaguirre, of what was known as the "Benito Juarez" Brigade of the Constitutional Army," at Parral on the 16th day of September, 1914. I have here a translation of that speech. I do not propose to read it again, but I will say that in that speech Col. Isaguirre pointed to Gen. Monclovio Herrera and Gen. Luis Herrera, whose name you have recently read in the public press in connection with certain matters that are going on, and made the statement that because of the threats of Monclovio and Luis Herrera, V. Carranza had demanded of us the evacuation of Vera Cruz immediately and had finally given us until the 30th day of September in which to evacuate that city.

The statement was made openly, and it was printed because of the demand of Monclovio and Luis Herrera that it should be published. Luis Herrera is the same man who is now reported in the public press to be leading a large portion of the Carranza forces immediately to the south of Pershing's command and to be issuing proclamations to Mexicans to come to him and to eject the American troops from Mexican soil. At that time his spokesman declared "death to the Americans" and "death to the Puritan Wilson" if the demand for the evacuation of Vera Cruz by the 30th day of September was not carried out.

What did we do? We did not get out on the 30th of September, but let us see what the official record shows.

Now, what do we find? September 22, 1914, Robert Lansing, Acting Secretary of State of the United States of America, sent a telegram to the Brazilian minister at the City of Mexico. In this telegram there are other matters referred to which I am going to call to the attention of the Senate in a moment, but there is reference made in that telegram or in the letter here of the Secretary of State to the effect that intimation had been given to Mr. Carranza on the 15th day of September that we were preparing to evacuate Vera Cruz. On the 22d this message was sent:

Certain rumors have reached this Government as to actions which may possibly be taken by the authorities at Vera Cruz after its evacuation, namely:

The exaction of further payments of duties on merchandise which has passed through the customhouse since American occupation and on which the duties have been paid. The exaction of further payments of local and municipal taxes paid since American occupation, such as license fees, property taxes, street taxes, etc. The imposition of fines or other penalties upon Mexican citizens, who have been employed in connection with the civil government of the city since American occupation.

You are requested to call these subjects to the attention of Gen. Carranza and state to him that this Government, while it does not give credence to these rumors, as such actions would be manifestly unjust, considers that to avoid possible improper conduct by subordinates and to allay apprehension at Vera Cruz it is hoped that Gen. Carranza will give a specific assurance in regard to each subject that the rumored action will not be permitted.

You will please intimate to Gen. Carranza the advisability of giving these assurances in definite form and as soon as possible in order that there may be no delay in carrying out the proposed evacuation of Vera Cruz by the American forces.

Mr. NORRIS. Who sent that?

Mr. FALL. Robert Lansing.

Mr. NORRIS. To whom?

Mr. FALL. To the Brazilian minister for communication to V. Carranza on the 22d day of September.

Mr. STERLING. The demand was made for the evacuation on the 30th of September.

Mr. FALL. The demand as stated was that not later than the 30th of September we were to evacuate Vera Cruz. It will be seen, if I were to reread all these documents, that there is an intimation here that the first note had been sent about the 15th of September by us that we were now ready to agree to their request and would evacuate. Delays occurred caused by this, that we had collected 2,000,000 pesos in imports while holding the port of Vera Cruz. We had collected certain street taxes and sanitary taxes in the city of Vera Cruz. Mr. V. Carranza, on being notified that on the 15th of September we proposed to get out of there, notified the people of Vera Cruz that they would have to repay to him all the taxes which

they had paid to the Americans until then, and that he would hold the officials upon their "personal responsibility." Personal responsibility means in Mexico something more than a mere law suit.

Now, I may as well comment upon this phase of the matter at this time, showing again where not in one instance, but in every possible instance, without any hesitation whatsoever, Carranza *has not only* rejected our requests, but has rejected them in the most open and insulting manner that it was possible for him to exhibit. The Government of the United States said in this telegram that Mr. Carranza should give assurances that these taxes would not be reassessed and collected and that if he did not give these definite assurances at once delay in our evacuation might ensue. We did not say that we would not get out, but that he should give this assurance:

You will also please call to Gen. Carranza's attention the fact that there is in Vera Cruz a large number of so-called refugees, among them many priests and nuns, who came there because of apprehension as to their personal safety while civil strife prevailed in Mexico. This Government earnestly hopes that Gen. Carranza will be willing to announce that the Mexican central authorities will not countenance or permit any wanton mistreatment of these people, but will assure them that protection which an enlightened and orderly Government affords to individuals within its jurisdiction.

ROBERT LANSING,
Acting Secretary of State.

I am going to ask in connection with my remarks that this telegram, as contained on page 46, and the answer of the Brazilian minister, embodying the answers of Carranza and Aguilar and Dominguez, appearing on pages 46, 47, and 48, may be printed in connection with my remarks.

The PRESIDING OFFICER. Without objection, that order is made.

The matter referred to is as follows:

SECRETARY OF STATE TO THE BRAZILIAN MINISTER IN MEXICO.

DEPARTMENT OF STATE,
Washington, September 22, 1914.

The BRAZILIAN MINISTER, *Mexico:*

Certain rumors have reached this Government as to actions which may possibly be taken by the authorities at Vera Cruz after its evacuation, namely:

The exaction of further payments of duties on merchandise which has passed through the customhouse since American occupation and on which the duties have been paid. The exaction of further payments of local and municipal taxes paid since American occupation, such as license fees, property taxes, street taxes, etc. The imposition of fines or other penalties upon Mexican citizens, who have been employed in connection with the civil government of the city since American occupation.

You are requested to call these subjects to the attention of Gen. Carranza and state to him that this Government, while it does not give credence to these rumors, as such actions would be manifestly unjust, considers that to avoid possible improper conduct by subordinates and to allay apprehension at Vera Cruz it is hoped that Gen. Carranza will give a specific assurance in regard to each subject that the rumored action will not be permitted.

You will please intimate to Gen. Carranza the advisability of giving these assurances in definite form and as soon as possible in order that there may be no delay in carrying out the proposed evacuation of Vera Cruz by the American forces.

You will also please call to Gen. Carranza's attention the fact that there is in Vera Cruz a large number of so-called refugees, among them many priests and nuns, who came there because of apprehension as to their personal safety while civil strife prevailed in Mexico. This Government earnestly hopes that Gen. Carranza will be willing to announce that the Mexican central authorities will not countenance or permit any wanton mistreatment of these people, but will assure them that protection which an enlightened and orderly Government affords to individuals within its jurisdiction.

ROBERT LANSING,
Acting Secretary of State.

BRAZILIAN MINISTER IN MEXICO TO THE SECRETARY OF STATE.

MEXICO CITY, MEXICO, *November 10, 1914.*

SECRETARY OF STATE, *Washington, D. C.:*

November 10—11 a. m.—Acting secretary for foreign relations, who is now in Cordoba, State of Vera Cruz, with Carranza, invited me this morning to have a telegraphic conference over the wire of the foreign office, during which he transmitted the following note, with request that same be transcribed to you at once:

"CORDOBA, *November 10, 1914.*

"Mr. MINISTER: Referring to your excellency's note, dated the 2d instant, relative to the evacuation of Vera Cruz by forces of the United States of America, by order of the first chief of the constitutionalist army in charge of the executive of the union, I have the honor to inform your excellency as follows: The chamber of commerce and the owners of real estate at the port of Vera Cruz, as well as the employees who have served in several capacities in the administration of the port during American occupation, have addressed themselves to the first chief of the constitutionalist army in charge of the executive, through the governor and military commander of the State, stating that the taxpayers will be satisfied with such resolutions of the national Government as may be later passed by it in reference to the collection of fiscal dues as have been paid to the American authorities who have been in exercise in the port; also, that the employees are disposed to submit themselves to such disposition as the Mexican authorities may see fit. The first chief of the constitutionalist army in charge of the executive is now of the attitude assumed by the chamber of commerce, the owners of the city real estate, and the above-mentioned employees, and of his considering so fit for the welfare of national interests, has been pleased to issue, under date of the 8th and 9th instant, the following decree:

"'Venustiano Carranza, first chief of the constitutional army in charge of the executive power of the United States of Mexico, using of the extraordinary authority in me vested, and considering that the chamber of commerce and the majority of owners and administrators of real estate at the port of Vera Cruz have addressed the executive in my charge, renouncing the protection asked for in their behalf by the United States Government before expecting the evacuation of Vera Cruz, stating categorically that they will abide by all the just decisions which the Mexican Government may render in reference to the collection of fiscal dues previously collected by foreign authorities, and because I consider it convenient to the national interests, I have seen fit to decree as follows:

"'ARTICLE 1. On the occupation of Vera Cruz by the Mexican authorities no exaction will be made from the inhabitants of the port for the payment of taxes or any other contributions of federal character which may have previously been paid to the foreign authorities which temporarily occupied the port.

"'ART. 2. In order to be entitled to the privilege granted by this decree it will be sufficient for interested persons to present to the tax collector's office the receipts showing that such payments were made to the authorities established during the occupation of Vera Cruz by the American forces.'

"And I have to inform you of the above for its immediate publication and due observance.

"V. CARRANZA."

CONSTITUTION AND REFORMS,
General Headquarters at Cordoba, November 8, 1914.

The second decree reads as follows:

"Venustiano Carranza, first chief of the constitutionalist army in charge of the executive power of the United States of Mexico, by virtue of the extraordinary faculties in me vested, and considering, firstly, the Mexican and foreign employees who have served the authorities established in Vera Cruz during its occupation by American forces have addressed this first office of the constitutionalist army through the governor and military commander of this State, stating of their own accord that they only recognize the national government as entitled to resolve the questions of interior order such as refer to the punishment or portion of persons who, as themselves, have served the foreign authorities; secondly, that they expressly declared that they will be agreeable to the decisions that the national government may render in regard to them in order that they may not be considered as an obstacle for the eminently patriotic act of obtaining a speedy evacuation of Vera Cruz; and, thirdly, that the spontaneous and patriotic attitude of such employees has made them deserving of an amnesty for such penalties as they might have incurred, in I have seen fit to issue the following decree:

"'General amnesty is hereby granted to all persons who may have served as employees in the several branches of the public administration that in a de facto manner have exercised control temporarily during the occupation of Vera Cruz by American forces.'

"And I communicate the above to you so that you may in turn make it known to the Federal and local authorities of the Republic for its immediate publication and strict observance.

"V. CARRANZA.

"CONSTITUTION AND REFORMS,
"General Headquarters at Cordoba, November 9, 1914."

Gen. Candido Aguilar, as military governor of the State of Vera Cruz, has to-day issued the following decree:

"The government in my charge is obligated to dispense its protection to such persons as may have paid the fiscal dues in the port of Vera Cruz to the American authorities, and that such protection should be made extensive to the new collection of such dues a second time as have been paid, it being so considered in equity, and considering that a large majority of the residents of said port recognize that the Mexican Government is the only one which ought to protect them, they place themselves under its protection as an act of pure patriotism. For the above considerations, I have seen fit to decree as follows:

"'ARTICLE 1. Upon the evacuation of Vera Cruz by the American forces and its occupation by the Mexican authorities, no exaction will be made from the inhabitants of the port for either municipal or State dues such as may have been previously paid by them to the foreign authorities who occupied the port.

"'ART. 2. In order to be able to enjoy the benfits granted by this decree, it will be sufficient to present to the respective collectors' offices the receipts showing the payments made to the functionaries of the administration which had control of affairs during American occupation.'

"Therefore I order that the above be published, circulated, and duly complied with.

"Issued at Cordoba on the 10th day of November, 1914.

"GEN. C. AGUILAR.
"J. DOMINGUEZ,
"Assistant Secretary of the Government."

"In view of the fact that the Mexican Government has issued the decrees which I have had the honor to transcribe to you above, the causes pointed out by the Government of the United States of America for the continued occupation of the port of Vera Cruz have disappeared. In consequence the first chief of the constitutionalist army in charge of the executive of the union, trusts that, as offered in your note of November 2, the Government of the United States of America will not delay any longer the evacuation of Vera Cruz and will proceed at once to evacuate the port.

"I protest to you, Mr. Minister, the assurances of my highest consideration.

"ISIDRO FABELA.

"CONSTITUTION AND REFORMS."

CARDOSO DE OLIVEIRA.

Mr. FALL. I will merely say now in passing that Carranza simply refused to pay any attention to our request. He negotiated privately with the people themselves and finally, in November—and that is the reason why we deferred our evacuation of Vera Cruz until November—he notified the Brazilian minister that he would himself take up the matter as to taxes. He paid no attention to our messages; and as the people of the city of Vera Cruz had agreed with him in writing by a deputation that they would abide by any decision he might make as to the transaction and throw themselves on his mercy, feeling that in the goodness of his heart he would not collect the taxes from them, he made no reference to our representation, ignoring our demands and absolutely remaining silent upon the question.

We never reiterated the request as to whether he would or would not grant protection to the nuns and priests referred to.

The Brazilian minister was so much insulted, as I have heard, by this and other answers which we accepted when he had insisted upon protecting the honor of this great country and in this and other matters having incurred the displeasure of Venustiano Carranza that he left Mexico.

Now, I want to call attention to the fact that only this telegram of September 22 and the Brazilian minister's note, with inclosures of November 10, is included in this document, but the correspondence between the 22d day of September and November 10 is not included. If that had been included, I dare say light would have been thrown on the action of Mr. Carranza and upon some of the acts through which the Brazilian minister became persona non grata in the City of Mexico. But they refused to send it in. The Brazilian minister's report was one of the matters which they refused to send in, except that they selected out this portion and eliminated all the previous correspondence, all the correspondence on this particular matter between the 22d of September and November 10.

The Brazilian minister, you note here, without commenting upon the conditions, simply transmits this reply, which we accept as satisfactory without comment.

I have referred to certain matters with reference to Carranza's action after he went first into the City of Mexico. I have referred, for instance, to the death of Garcia Granados later by court-martial. I do not remember whether I impressed upon the Senate at the time or not that the proceedings of the court-martial were published in the Mexican Herald, a great daily paper owned by an American, Paul Hudson, and published in the City of Mexico. It is the greatest paper published north of the Panama Canal and south of our borders. I do not know whether the Mexican Herald is running to-day. It was suppressed absolutely by the Carranza Government because of its publication of the court-martial proceedings in the Granados case and the publication of other matters which the Carranza Government construed as not reflecting favorably upon them. There was a great property taken away from this American, and a fair newspaper published in the City of Mexico was suppressed.

Now, why did we recognize Carranza? Let us see what the records say about the conditions there at the time Carranza was recognized. I read from the November, 1915, number of the Red Cross Magazine. I read first the preliminary remarks by the editor in an article entitled "The Mexican Situation."

At the request of Gen. Carranza and with the advice of the American Department of State, which was consonant with the request, the American Red Cross discontinued its relief activities in both southern and northern Mexico October 8, and Special Agents Charles J. O'Connor and J. C. Weller, whose enterprise, hardihood, and efficiency in relieving the starving populace have brought them much praise, have been withdrawn. As it developed, the State Department advice in advocacy of the withdrawal of the Red Cross representatives presaged the formal recognition of the Carranza organization.

SUFFERING THIS WINTER.

Announcement of the decision to recognize Gen. Carranza and his forces was made October 9.

It was made informally about September 28 and again informally October 9, and the formal recognition ensued on the 19th of October.

At this time, just as was the case a month previous, many deaths were occurring daily from starvation and the country as a whole was in a pitiable plight, economically and industrially. It has been devastated from end to end and so impoverished and demoralized that under the most favorable conditions it would be possible only slightly to alleviate the widely extended suffering which will be forced upon the Mexican people during the ensuing winter. Gen. Carranza's assurance that the situation will be cared for, therefore, has not wholly dispelled the feeling of sincere regret on the part of the American Red Cross over relinquishing its part of the relief work.

It is hard, for instance, to leave a locality where many thousands of families, mothers and babes predominating, have been absolutely dependent for sustenance upon small portions of nourishing vegetable soup which we have daily distributed. Half-famished mothers with skeleton babies at their breasts have besought the Red Cross agents in the name of all that is holy to do something for their little ones—to save them if they could not save the mothers—and there have been many formerly well-to-do persons, not of the peon class, who have been among the pitiful petitioners for Red Cross aid.

Approximately $50,000 has been expended during this last American Red Cross relief campaign in Mexico. This means that numerous carloads of food supplies have been shipped into Mexico via Vera Cruz and the Texas border and under the personal supervision of trained Red Cross representatives and responsible local committees of Americans and Mexicans have been distributed among hundreds of thousands of wholly destitute and emaciated Mexican noncombatants. It means that in Mexico City alone, under the very competent direction of Mr. O'Connor, a chain of free-soup stations was operated for over a month and that 26,000 families were supplied daily at the height of the distribution—

This is in the City of Mexico—

It means that whole families were rescued from the necessity of trying to stomach the putrifying flesh of dead domestic animals found in the streets of Mexico City; that peon families could desist for a time from picking for morsels of waste food in rubbish heaps; that they could leave off the rôle of human carrion crows amid the offal of the slaughterhouses. It means that thousands of families in Monterey, Monclova, and Saltillo were given a little respite from a diet of prickly or cactus pears, mesquite beans, and other wild products of northern Mexico's prairies, where Special Agent Weller, like Mr. O'Connor, endeared himself to the civilians and took many personal risks in their behalf.

Reading from page 352—

There are details in reports which have come to American Red Cross headquarters from Mexico which would tax the credulity of many Americans, and their publication would not contribute to the improvement of conditions. There have been happenings in the experiences of our agents which have been amazing and disheartening, but these may be forgotten in the interest of a hoped-for cessation of hostilities and the consequent measurable lessening of misery.

Now, Mr. President, the Senate of the United States requested these reports upon which this editorial is founded and they were refused, although they are on file in the department.

I might be able to supply a gap if I chose to do so with relation to at least one. I could show from the report of the agent of whom the editor speaks so highly, who was operating in the north in September, that his train with the Red Cross emblazoned on the side—that train with the Red Cross upon it was, on September 5, attacked by from 800 to 1,400 of Carranza's forces and the Red Cross flag torn from the train and stamped under the feet of the soldiers. The Red Cross agent himself in this official report which the Department of State refuses to give us—the Senate of the United States, although I know that the receipt of it was acknowledged by the State Department—this Red Cross agent himself said that at the time those Carranza soldiers bade him good bye they told him that they would meet him in San Antonio, bearing out the statement made by the Red Cross agent and by other responsible people, that the leaders of the Carranza movement in the States of Coahuila and Tamaulipas were behind all the depredations and were inciting the murders which were being committed and have been committed in the past at Brownsville and this side of the river in Texas.

I am going to quote from Mr. Weller. This is confidential information, but I have permission to quote from the latter part of this report made on the 28th of September, and it will show, among other things, that the advice to the President of the United States from the Red Cross agent was that Venustiano Carranza should not be recognized.

I say without fear of denial that if the Duvall West report were furnished here it would show that the tenor of his advice was not to recognize Carranza. I do not care to go too far, nor in the heat of an argument or in the excitement of the moment to make statements where I have not documentary evidence, as I have had, as the Senate will bear me out, with reference to every statement which I have made here. I will not allow myself to be led into a discussion of some of the matters which are impressed upon me as possibly influencing this administration to recognize Carranza in the face of the report of every consul in Mexico, except possibly Carranza's partner in the milk business, Mr. Silliman, in the face of the Red Cross report, despite the West report, despite Paul Fuller's report, despite the Brazilian minister's report. I defy Mr. Lansing to produce those reports and with them refute my statements.

I am going to read just a little quotation from the report of the Red Cross agent of September 28, which, as I said, is on file in the State Department:

In conclusion, I only regret that some of our higher-up Government officials could not have been with me to see the brand of individuals that are now in control of the situation in Mexico. They do not represent any of the good element in Mexico. They are lawless and have no more idea of patriotism than a yellow dog. They are mentally incapable of handling the situation. Gen. Ellisondo, in command at Monclava, and also in command of a district larger than Massachusetts, is a boy of 24 years old, uneducated and absolutely irresponsible. Gen. Zuazua, formerly classed as a saloon bum around Eagle Pass, a lieutenant colonel in command of a territory as big as Rhode Island, was sent to the Mexican Army some 15 years ago, having been arrested for stealing horses and cattle.

You understand that under the Mexican laws a man convicted and sentenced to work in the salt mines is given his preference of serving in the Mexican Army. This gentleman was sentenced to serve in the Mexican Army for 15 years for cattle stealing, and he is one of the Carranza leaders in Mexico.

These are not the exceptions, but the rule of the character of the men who now dominate one of the richest States in northern Mexico. This fact is largely due to Carranza, who has allowed them to do as they please, and they have no respect whatever for him, each man ruling his district as he sees fit. I do not find any difference between the Carranza faction and the Villa faction, with the exception that Pancho Villa seems to have a better control over his men. It is rumored throughout the Carranza troops that Obregon and Villa are about to launch against Carranza.

That was the rumor there in September.

Having been in personal contact with both factions, I believe that it would be a crime to turn loose this some 200,000 bandits, thieves, and scapegoats on the country. They are rotten with disease and have been divorced from all ideas of ever working again. They will disperse

in small bands, and a reign of terror, which no leader such as Carranza will have the strength or power to overcome.

I repeat, that if Carranza is given control of the country that it will be only a short time until another movement is launched to eliminate Carranza from the situation.

Mr. President, I am going to close in a short time, but I want to call your attention to some of the conditions existing now in the Republic of Mexico. First, as to the financial condition of Mexico. I am sorry that I can not get into the RECORD photographs of some of the Carranza money in existence in the Republic of Mexico.

I will say that as nearly as it is possible for the Mexican bankers or others who know or who should know or are supposed to know something about the subject, that there has been an issue of something over $2,000,000,000, during the Carranza revolution, of money, so-called, and circulated throughout the Republic. I have, I think, five samples here. [Exhibiting.] I may say, Mr. President, that they have all been repudiated, but one, and there is still a billion dollars of unrepudiated currency according to Carranza's own statement. One of those issues known as the provisional issue is now being taken up or they are now attempting to take up with another provisional issue.

Carranza currency to-day is worth something like 2 cents Mexican upon the dollar.

I am going to quote from a statement, to me very significant, showing the conditions in Mexico, and I want to say that this statement was made by a foreigner residing in Mexico for 35 years or more, a banker, a representative in former times at least of large business interests, a man whom I have personally known for 28 years. I am going to quote to you one or two rather significant statements from this man. I vouch for the authenticity, but of course I shall hide the identity. He is writing advising another party requesting information with reference to Mexico.

Please do not make the same error as other Americans do—

This was to an American—

Please do not make the same error as other Americans do; the Mexican affair has come down to the point to pay debts and the pressing debts of the Mexican Government are in Europe and not in the United States.

The present Mexican bunch has been living from looting and robbing for the last five years, and their object is to continue to do so; and none of them recognizes the necessity that debts have to be paid sooner or later, and with the pressing need for money of the European people after the war—

Now, remember, this is a foreigner; he is not an Englishman, and he has been an official representative of his Government in Mexico—

Mexico has to pay, and if she can not or will not the European nations as a unit may force the United States to either intervene and restore the property to the legitimate owners, hold the oil fields as a guaranty for advances, or some other serious happenings may take place.

He says further:

The Government bond issues, bank stocks, mortgage bonds of Mexico, amounting to $450,000,000 Mexican money Government bonds, $500,000,000 railroad bonds, $270,600,000 bank stocks, $58,800,000 mortgage bonds, and $50,000,000 irrigation bonds, and if you add to these figures other stocks held in Europe—

Principally, as he says, in France, Belgium, Germany, Holland, and England; largely in France, Belgium, and Holland—

other stocks held in Europe, as Dos Estrellas Mining Co., Fabrica de Papel San Rafael, Cia. de Fomento y Bienes Raices, the Northwestern Road, and many others, which were considered first class, you have the proximate amount of foreign holdings, and while I do not want to say that every share or bond is held abroad, still we can figure that at least three-fourths was sold to foreigners, and I do not believe that in the United States are many of these securities, as the American investments consist principally of mining, oil, land, ranch, smelter, railroad stocks, etc., all of which are not included in my above statement.

The holders of the above-mentioned securities will not wait until the present rulers are pleased to pay, and as 70 per cent of the import duties are already pledged as security to cover the payment of the foreign government debts, amounting to $450,000,000—

And I may say, Mr. President, that he does not, in speaking of the 70 per cent already pledged, take into consideration that the other 30 per cent was pledged by Huerta to secure the bonds issued. It was placed in this country by J. P. Morgan, and in Holland and in France by French bankers, amounting to something like $68,000,000. So the entire import duties of Mexico are absolutely pledged to the payment of these foreign debts—

on which not a cent has been applied since the time of Huerta, you can figure yourself that there is no other remedy to straighten out the Mexican affairs, except by intervention or by the appointment of a foreign commission, handling the Mexican finances.

I inclose you a statement written by an able man under the heading, "Mexican banking institutions suffer," from which you will see that the shares of some leading Mexican institutions were worth in September, 1910, Frs. 1,041,205,180 and in December, 1915, Frs. 155,584,460, showing a loss of Frs. 855,620,720, and as these companies were the best ones how much have been shrinking others of less prominence.

This shows a decrease of more than $200,000,000 in the value of these bank stocks alone.

I am not going much further, Mr. President, along this line, except to call your attention to the fact that on the Mexican National Lines—that is, the railroads running from Laredo, from Saltillo, and from Eagle Pass, down through Torreon, toward the City of Mexico and in that direction, known as the Mexican National Lines, and that part of the Mexican Central, particularly south of Chihuahua, comprising over 7,000 miles of road—on that road in 1910 there were 729 locomotives; there are less than 139 now that can be used. There were 18,492 freight cars. There are now 3,400, which are just hanging together, and which in some cases can be used at this time. The balance of them were not taken out of the country; they were not moved out, but were burned or destroyed. My correspondent further says:

All passenger cars are either totally destroyed or have to be rebuilt. Two-thirds of the ties on 7,000 miles of road have to be replaced, and nearly all railroad bridges have to be rebuilt; the stations and freight houses and telegraph equipment are gone; the repair and machine shops are mostly destroyed.

When the European Governments recognized Huerta they backed the recognition up with giving him arms and making him loans, which the Carranza people refused to recognize as a national debt; and for that reason the European bankers and bondholders will not give the present outfit one cent of credit nor show them any leniency. Now, we have to see whether Uncle Sam will back up his recognition by giving them money.

* * * * * * *

The Carranza government has issued about 1,000,000,000 pesos paper money, with which they pay employees, soldiers, etc., and as most of them commence to strike, refusing to take this money, Carranza has a job on hand to satisfy the people.

Mr. President, how are they now raising money, and what are they doing? They have increased the mining taxes in the Republic of Mexico more than 10 times. They have compelled the cotton growers—this may appeal to some of the southern Senators—they have compelled the cotton growers in the Torreon district of Mexico to sell them their cotton at $16 per bale, payable in Carranza currency, upon the declared statement which they published, that they proposed to protect the cotton factories in purchasing the cotton at the price which the Government paid for it, so that the poor people could get the benefit of the reduced price of clothing, and that thus this beneficent Government was going to improve and ameliorate the condition of the poverty stricken in Mexico.

What did they do and what are they doing in Mexico to-day? Commandeering the cotton and paying $16 a bale for it in this currency that you see here, and then demanding of the cotton factories, the Mexican manufacturers, the payment of $48 in gold per bale. When they can not get the gold they ship the cotton to foreign markets and put the gold in their pockets.

What are they doing on the Yaqui River and on the Fuerte, where Americans have gone in, established irrigation plants, opened magnificent farms, and are growing great crops of alfalfa? They have commandeered for this year the entire crops of alfalfa growing on those farms, which is worth $28 a ton in gold in Guaymas, to be paid for in "officios," as they call them. They have refused to allow these parties to graze their own stock on their own alfalfa fields, and have compelled them to ship them out, because they have commandeered every grain of corn in the entire State. They ship it out from this starving population and put the gold which they receive for it into their own pockets. Across the river, in the State of Sinaloa, there are yet stores of corn.

No American nor Mexican in the State of Sonora, across the line, can purchase corn from the State of Sinaloa. The people are actually in a starving condition. As I shall explain to you in a few moments, they are eating maguey, which is causing their death from dropsy. Why? Because the right to ship corn out of Sinaloa, or to ship any other food product, is the exclusive privilege of certain Carranza leaders or favorites of his military leader, Obregon, and you pay duty to those patriots. No producer can sell corn except to these privileged ones, and no producer can sell corn to you or to anyone else unless you first pay these leaders for a permit. Then they gather up these products and ship them abroad or ship them to California or some other foreign market for gold.

Why, Senators, shortly before Carranza was recognized—and I defy you to go to the State Departemnt and examine the archives there and then deny that they have there official evidence of the statement which I shall make—just shortly prior to the recognition of Carranza the conditions were such that we were feeding 26,000 people a day through the Red Cross. Mothers were coming with their little children at their breasts and begging us to give the children, at least, something to eat, even if the mothers had to die. At that time Venustiano Carranza himself or through adherents shipped 37,000 tons of foodstuffs through the port of Vera Cruz alone and got the golden dollars for it and put them in his pocket. I say the official information of that is on file in the State Department of this

Government; that we knew of it or should have known when we recognized him.

I myself saw three carloads of potatoes, the last shipped out from the Guerrero district by Mexican officials and sold in El Paso, Tex., to put gold into their own pockets, while the people who raised those potatoes were starving and living on roots or dying. If this Government does not know these conditions, it is because its officials will shut their eyes and their ears.

Why, sir, I know that they have on file in the State Departments reports from the State of Zacatecas—even very recent reports—that in great districts in that State, where a great deal of corn and other food crops are raised, that the Carranzistas have seized every grain of corn and every particle of food from the people of that district and that those people are dying daily because they have been compelled to eat the rusted roots and leaves of the maguey plant, which causes dropsy within a short time and death within three or four weeks. Those reports are on file with the State Department. I know that they have heard from the great State of San Luis Potosi, from Vera Cruz, and from other States and cities, rich and thriving and prosperous cities in Mexico, and that they know that in those States, and in San Luis Potosi particularly, the people from the outlying districts, who have been by the soldiers robbed of every grain of corn and of every particle of food, are moving away, hunting for something to eat, digging in the rubbish or lying in gutters and starving; there are dying children and old, haggard women following around after a sack of corn being convoyed by soldiers for soldiers' use, that they may pick up a few fallen grains for food.

I say to you, Senators, in all seriousness and in all earnestness, that the Christian world does not know what condition exists in Mexico to-day; that the Armenian hardships and horrors, which we have had pictured to us and which have been written of in the press, do not compare with those existing in the Republic of Mexico to-day under the beneficent Carranza Government.

I say, sir, that the object of Carranza now is to drive every American out of the Republic of Mexico, and that, if he is allowed to continue as he has commenced, he will attain that object in a very short time.

You have noticed in the press, possibly, references within the last few days to some of the decrees, particularly one from the State of Vera Cruz, which was protested against by our citizens there. I have one of the decrees, Mr. President, and I will ask to have printed, in connection with my remarks, this translation of the Vera Cruz decree of January 16, 1916, which is being complained of by our citizens at Tampico; and I want to say, Senators, that this decree complained of is one of the most moderate decrees issued by Carranza or any of those under him in authority.

The PRESIDING OFFICER. Without objection, the matter referred to by the Senator from New Mexico will be printed in the RECORD.

The decree referred to is as follows:

[Translation from El Dictamen, Vera Cruz, Jan. 16, 1916.]

LOOKING TOWARD THE SOLUTION OF THE AGRARIAN PROBLEM—THE ESTABLISHMENT OF THE MEXICAN ON HIS LAND—PERSONS EXECUTING CONTRACTS OF PURCHASE OF LAND SHALL BE CONSIDERED MEXICANS WHATEVER BE THEIR ORIGINAL NATIONALITY.

Gen. Candido Aguilar, governor of the State of Vera Cruz, to the inhabitants thereof, know ye:

That using the faculties with which I am invested, and—

Whereas the reasons and motives of this government in issuing the decree No. 3 in Tuxpam, August 3, 1914, still subsist, by reason of which this said decree still responds to a social necessity and should be maintained in vigor; and

Whereas the fundamental principle that inspired said decree demands that it be made general in two ways: Amplification so that it shall cover not only the contracts to which it refers, but also all those covering any land within the limits of the State, and also generalization to cover lands situated not only in the caontones stated in said decree, but within the area of the State; and

Whereas to effectively give sanction to the fundamental disposition in the decree in question, it is necessary to establish not only the indirect penalties of confiscation and others fixed thereby, but also to create a civil sanction by virtue of which the lack of authorization which it decrees must be obtained for the execution of contracts referred to may affect the existence of rights and obligations arising from such contracts for which it is necessary to give to the authorization referred to the legal character of a formality extraneous to the contracts, but thus constituted an element thereof necessary for its validity in accordance with civil legislation; and

Whereas in the practice of the application of the decree above mentioned it becomes necessary to adopt regulations to clear up some of its precepts and to fix the administrative steps which must be followed to obtain the authorization prescribed by this decree: Now, therefore, I have seen fit to decree the following:

ARTICLE 1. No contract of sale, lease, mortgage, quit rent, or of any other character covering any land situated within the boundaries of the State of Vera Cruz, or which affects directly or indirectly such lands, shall be made, unless the parties shall previously obtain the authorization of the State government thereto.

ART. 2. The owners or possessors of lands situated within the limits of the State who have acquired rights of any sort whatsoever to such lands by virtue of any contract of the nature mentioned in the foregoing article shall not cede, transfer, or alienate to third persons or to companies in return for stock or in any other manner the lands or rights acquired by virtue of such contracts, nor the contracts themselves, without previously obtaining the authorization of the State government thereto.

ART. 3. For all legal effects, it is declared that the authorization referred to in the foregoing articles is a formality extraneous to the contracts in question, but necessary for its validity. Therefore the contracts lacking this formality are null, shall produce no legal effects of any sort whatsoever, give rise to no rights, obligations, or rights of action whatsoever, between the contracting parties not to or against third parties, and can not be inscribed in the public property register.

ART. 4. To obtain the authorization referred to in articles 1 and 2 hereof, the contracting parties shall apply in writing to the State government, where the administrative file in the matter shall be made up with the following proceedings:

I. With the petition (solicited), properly complying with the terms of the law, shall be presented the document that sufficiently proves the legal personality of the petitioner, a draft of the contract proposed to be entered into, with the stipulations and clauses that have met with the agreement of the parties, and maps of the lands in question.

II. When the State government shall deem necessary, it shall also demand the exhibition of the title deeds covering the land.

III. The State government may direct that there be carried out on the land in question direct inspection, examination, and check of documents and other proceedings necessary to identify the realty, establish in a clear manner the rights the parties have therein through anterior deeds or by virtue of the contract itself, and, in general, to provide against doubts or differences in the interpretation and compliance with the contract.

IV. The State government shall refuse its authorization if the contract shall appear unjust or prejudicial to any of the parties thereto, when the development to be carried on thereunder redounds exclusively to the benefit of the unnationalized companies to the prejudice of the Mexican citizens, when (the contract in question) tends to solidify the predominance of foreign capital, constituting a menace to the integrity of the progress of the nation, or in any other cases when the contract is against the true interests of the State.

V. The State government shall add to, suppress, and modify the clauses of the proposed contract presented for authorization in accordance with the provisions of the foregoing article, notifying the parties in writing. The parties may then appear again with such observation as they may deem opportune, and so continue till an agreement is reached.

VI. Authorization shall be granted on the understanding that when the contract is executed it shall be strictly in accord with the terms of the proposed contract presented and the modifications which have been deemed pertinent.

VII. When the contract shall be finally executed in public document or private deed, it shall begin with a literal repetition of the officio of the State government granting its authorization, without which requisite the contract shall fall within the prescriptions of article 3 of the decree.

ART. 5. Contracts executed up to now, without the authorization referred to in this decree, and in which it does not appear that this lack is due to bad faith on the part of the parties thereto, shall fall within the prescriptions of article 3, but all such contracts may be revalidated with the approval of the State government.

ART. 6. Such approval shall be granted in cases in which previous authorization would be granted, and by the proceedings mentioned in article 4, with the following modifications:

I. A true copy of the executed contract shall accompany the petition.

II. In order to introduce therein the modifications agreed upon and to insert the officio providing the authorization, the parties shall execute a complementary public or private deed, which shall form an integral part of the text of the original contract, which shall serve for all legal effects, it being understood that without the complementary contract, the original shall fall within the prescriptions of the third article hereof.

ART. 7. If bad faith shall appear in the execution of contracts made without the authorization provided for by this decree, such contracts shall fall within the prescriptions of article 3 hereof, and the lands covered thereby shall be forthwith confiscated, but rights shall be reserved for those who may enjoy them, to proceed against those persons who may be responsible civilly or criminally.

* * * * * * * *

ART. 10. The persons in charge of public registries who shall register contracts falling within the provisions of this decree which shall not contain the officio of authorization of the State government shall be suspended for two years.

ART. 11. For the effects of the law it is hereby declared that all persons who take part directly or indirectly in the execution of contracts referred to in this decree, shall be considered to be Mexicans, whatever their nationality or origin, and may not in any case allege the defense of foreign citizenship nor ask protection or aid from foreign diplomatic or consular officers, nor from the Governments of other countries, nor have any more rights than the laws of the country concedes to Mexicans.

ART. 12. In the proper department of the State government there shall be kept a registry book, in which shall be noted the authorizations or refusals thereof, granted under this decree, and in it the contracts whose authorization has been solicited shall be copied in full.

ART. 13. The authorizations referred to by this decree shall not incur any tax whatsoever, and shall be granted without cost to the parties.

Transitory articles. This decree shall have effect from the date of its publication.

Given in the city of Vera Cruz, January 15, 1916.

C. AGUILAR,
The Governor of the State.
MANUEL GARCIA JURADO,
The Secretary General of the Government.

Mr. FALL. I say, sir, that there is in existence to-day, although it is not being enforced, a decree issued by Carranza in 1913, or under his authority by Mytorena, by which no Mexican or American can sell to another Mexican or American any real estate in the State of Sonora, and prohibiting thereafter all foreigners owning any such property in the entire State. That is, of course, in contravention of our treaty engagements, as under the treaty our right to do business with

them and to hold real estate is set forth and protected. We say nothing; we make no protest when a decree is issued by Carranza violating every treaty right of Americans. Not one word of protest is uttered by this Government. A protest may be made as to the injustice of the decree, but we never have called their attention to a violation of the treaty. We do not seem to know that we have any treaties with Mexico.

Why, Mr. President, I have amongst the papers at my office decrees issued by different governors and decrees of Carranza issued in the City of Mexico, or by Pablo Gonzales in the City of Mexico, by which the price of flour, sugar, corn, coffee, and other articles sold at the grocery stores is fixed, and the value of Carranza money which they must take in payment of those articles is fixed by the same decree. I can show you also, sir, a jail full of violators of such decrees. People have been placed in Mexican prisons because, Carranza money having gone down since the time the prices were fixed from 5 cents to 2 cents, it required twice as much Carranza money to pay for the same goods, and those demanding full payment were put in the penitentiary for it. They are now serving their sentences and are lucky not to have been shot, for the penalty of the violation of any of his decrees is, in the discretion of Carranza, death.

These decrees are in existence all over the entire Republic. By decree after decree the attempt has been made to fix the value of money, and at the same time to obtain favor with the people by fixing the price at which they can purchase goods. The most absurd and farcical attempt—or pretense only of an attempt to conduct government—that has ever been known in the history of the world is that now being made under Venustiano Carranza in Mexico. They have confiscated property; they have forfeited all agreements and all contracts of every kind which would prevent them from achieving their desires or their ends or interfere with them in any way.

They have doubled all the taxes on real estate in the State of Chihuahua, and I want to show you how it affects the people who live on the agricultural land. In the State of Chihuahua to-day, remember, almost all agricultural land is owned in small lots. The people of Chihuahua were followers of old Benito Juarez under Luis Terrazas, a great landowner, who is now held up as a horrible example, but who was the first man who ever made a stand against the French in Mexico, the man who rallied the mountaineers of Mexico to his assistance, who drove Maximilian's troops out of the State, and enabled Juarez to make his headquarters in the city of Chihuahua, and from there conduct his campaign against the French. In recognition of their services Juarez gave to those people community grants, dividing the land up into severalty, granting agricultural holdings, and vesting in each family a certain piece of land, which was to be theirs, and remains theirs, or the property of their descendants, to-day.

Now, sir, the original revolution in Mexico, which broke out in Chihuahua, called the Madero revolution, was not a revolution against the Diaz government; it was the Orozco revolution of the small landowners against the taxing power of the State of Chihuahua, because under the laws the agricultural lands were taxed, while the grazing lands, belonging to the large landowners, did not pay a proportionate part of the taxes. Under the laws milch cows, work horses, oxen, and every plow, every implement, were taxed. That tax the large landowners escaped, because they did not follow agricultural pursuits. These were the people who revolted against the laws then taxing them.

I have here a telegram from the governor of Chihuahua doubling all land taxes on those people, whom this beneficent government of Carranza is helping, issued on February 13, 1916. I took the trouble myself to obtain a copy of the telegram.

Mr. President, I ask to have printed in the RECORD the Mytorena decree, to which I have referred.

The PRESIDING OFFICER. Without objection, permission is granted.

The decree referred to is as follows:

DECREE NO. 9.

ARTICLE I. Dating from the publication of this decree, Mexican citizens are prohibited from selling landed property situated within the jurisdiction of the State to foreigners or foreign companies, with the exception of mining properties, which may be acquired by persons of whatever nationality.

ART. II. Mexican citizens are prohibited from bequeathing, donating, reverting, or mortgaging landed property to foreigners or foreign associations of whatever kind, unless it be in a special case and under prior consent from the executive of the State.

ART. III. Every contract for more than a year of lease, mortgage, conditional rental (anticresis), rural partnership, etc., of real or personal property located in the State shall only be entered into by Mexican citizens with foreigners or foreign companies with the authority of the executive of the State.

ART. IV. The sale, reversion, pawn, loan, etc., made to foreigners, foreign companies or associations, of products of the State, with the exception of those pertaining to mining and for a value of more than $500, can not be effected without the intervention of the executive.

Mr. FALL. Mr. President, I have referred to the political conditions in the various States and also to the conditions as to starvation and the financial condition of the Republic, and I am going to close now very soon. I have called attention to the various cases in which Mr. Carranza has refused even to consider suggestions made to him by this Government, and I am going to call attention now to another case.

After the raid upon Columbus the President of the United States sent our military forces south of the border, and the public were told that negotiations were proceeding from time to time, from day to day, and from week to week for the use of the Mexican railways, in order that supplies might be carried to our troops. A great deal of mystery was maintained around the State Department concerning this proposition. One day we were going to have the railroads and the next day we were not going to have them. Negotiations are still pending, however, but the Mexican Government, from which we had all our news at that time, and from which we are yet obtaining our news with reference to our troops in Mexico, had no such hesitancy. I have in my hand an edition of a Spanish paper published at El Paso City, Tex., known as El Paso Del Norte, and I have here, under date of April 6, as printed in this paper across the entire head of it, a telegram from the secretary of foreign relations in the City of Mexico, Mr. Aguilar. I will make a rough translation, as the telegram is in Spanish, in order that it may go into the RECORD:

QUERETARO, MEXICO, *April 6.*

EL PASO DEL NORTE, *El Paso, Tex.:*

In The Opinion—

That is a newspaper—

which is published in this city, and in other daily papers of different sections of the country, as, also, in the American press, is continued the publication of the statement that the Mexican Government has permitted that of the United States to transport by rail supplies destined for the American troops. Serve us by contradicting such statement, as it is false, for the Mexican Government has not granted permission for the American Government to use the railroads with the object of transporting supplies destined for its troops, nor for any other purpose.

AGUILAR,
Secretary of Relations.

That is only another instance of the attitude of the so-called Mexican Government. After recognition, when we were sending the punitive expedition, as we stated distinctly in assistance of the Carranza government, and not in opposition to it, when a railroad belonging to private parties ran directly to the points reached by our troops, when they had to cross the railroad two or three times pursuing their course, the owners of the road offered to turn over to the United States the rolling stock, but the Mexican Government refused to allow it to be used for any such purpose; it has refused from that day to this, and still continues to refuse.

Not only that, Mr. President, but I assert that I myself saw the official orders issued by the Mexican authorities to the authorities of that road not to transmit to them again any requests from us upon their personal responsibility; that is, at the risk of being backed up against an adobe wall and shot. I saw further the official documents served upon them to the effect that if they did not take charge of that portion of their road running from the city of Chihuahua west toward Madero and operate it immediately it would be confiscated, and that the entire road from El Paso south would also be confiscated.

What was the condition? Why, sir, by the American Government Americans had been ordered out of there; by the Carranza government Americans had been told to get out of there, and the trouble with the Mexicans themselves was that they could not operate the road, and it would have been necessary for us to take Americans in there to operate the road. It was impossible to do so without protection. This is the portion of the road upon which 18 Americans were killed in what is known as the Santa Ysabel massacre.

Why, sir, in this very district of Zacatecas, of which I was speaking a while ago, where starvation and death are the rule, there is one mine 1,800 feet deep, with over a hundred miles of underground work done by Americans. When I first went into that district, sir, 35 years ago, the average wage of the Mexican was 15 cents per day. To-day his wage is $1.50 to $3, or was before this revolution. Notice has been served upon the American owners of that mining property that if they do not open it up for work within 30 days the Carranza Government will take charge of it and proceed to operate it as a Government project. The same notice has been served as to all the other mines in the State of Zacatecas, and the same notice has been served as to the mines all over the Republic of Mexico, with the exception of two or three States. The foreign owners of those mines may have 40 days in which to open them for work—and this notice was dated 10 days ago—and if they are not opened up with a full complement of labor within 40

days from the date of the decree they will be confiscated, and the Government will take them over.

The Government will take them over! What will they work them with? Will they drive the Mexican miners at the muzzle of their rifles to the mouths of the shafts, and pay them 2 cents a day in money of this character—paper money? What will they live on? Why, Mr. President, Mexico is in a starving condition. The population of Mexico have nothing to eat. Everything is seized for the soldiers. The excess above the immediate necessities of the soldiers is shipped out of the country for gold for some official.

Mr. President, I do not see why our Government has seen fit, through some of its departments, at least to refrain from giving publicity to conditions as they exist in Mexico. I do not know why the Secretary of State should have thought it necessary to send in an incorrect list of Americans whom he claimed had been killed in Mexico when the Senate had not asked for any such list in this last resolution. There is not a word in this resolution which he was answering asking for any list of Americans who had been killed in Mexico.

I do not know why the Secretary of State should have seen fit arbitrarily to classify those Americans who have been killed. I do not know why he should have seen fit to indorse a statement that has been made, and is made repeatedly, to avoid responsibility by some Mexican, that a certain American was killed by an Indian. Why, sir, I want to tell you that the average Yaqui Indian is a 200 per cent better man than the average leader in the Carranza government—more truthful, more honest, more dependable, and more friendly to the Americans. I do not know why it is that, for instance, about the 16th of April I saw a telegram—because I watch those things—from the State Department to the effect that along the west coast of Mexico everything was all quiet and nice, and they mentioned Mazatlan. There was a telegram published from the consul at Mazatlan, saying: "Everything is all right; there is no trouble down here," when on that same day, written from Mazatlan on the 12th day of the month, I had a letter conveying to me information as to the death of Burke, Davidson, Wallace, and Roderigo at the hands of Mexicans, when they were getting out of the country because they had been warned by the Indians that the Mexicans were going to kill them. Their bodies were delivered to the American consul and buried by the American colony of Mazatlan, and the State Department took pleasure in publishing a telegram, on the same day that I got this letter written from there on the 12th, to the effect that everything was quiet at Mazatlan. It was—the quiet of the graveyard for Americans at Mazatlan.

Now, sir, what are we going to do? Is the President of the United States going to submit to this insult which has just been handed him by Mr. Carranza? Or, after taking a week to think it over, will he show any proper American resentment at the insult? I refer to it because there is a statement in the published article on this subject, that in its note the Mexican Government—

> regrets to remark that the acts of the American military authorities are in absolute conflict with the above statements, and is constrained to appeal to the President, the Department of State, the Senate, and the American people, to the end that once and for all time the true political tendency of the United States toward Mexico be defined.

In this note, Mr. President, the statement is baldly made, so that anyone can read it who desires, that the President of the United States is playing politics with Mexico, to Mexico's detriment; that our action in keeping the troops down there is for home consumption; that our action there apparently, they claim, has something to do with the conventions which are to be held here in a short time. A more insulting document was never forwarded by one government to another or by any individual to a government. But the same influence which secured the recognition of Mr. Carranza may secure forgiveness, as it has in the past, for his continued exhibitions of antipathy and hostility to the United States. But what are we going to do?

Why, Mr. President, I have been in my seat here in the Senate and I have seen Senators rise in this body when Mexico and the outrages upon American citizens were referred to, and heard them proceed to abuse Americans and American interests. I have not only known that to be done in this body but I have known it to be done through the press, and I have known it to come recently from the administrative department of the Government in a public statement, to the effect that there were sinister influences, that there were liars attempting to cause trouble between this Government and the Mexican Government for their own selfish ends, that they might make money out of it.

Why, Mr. President, the "selfish" American capitalists and the "self-seeking" American mechanic and the "selfish" American mine laborer, at so much per day, and the "selfish" American spike driver and tracklayer have made civilization in Mexico. They had civilized Mexico until the time came when the muckrakers of this country were able to secure through an administration such action as by its intermeddling in the affairs of Mexico would overthrow civilization itself, and do away with the labor of the last 35 or 40 years and the results of the investment of American capital in Mexico. Why, Americans and foreigners have built every foot of railroad in the Republic of Mexico. They have constructed and they own every mile of copper wire in the Republic. They own three-fourths of the entire taxable property in the Republic of Mexico. Only 25 per cent of it belong to Mexican citizens. They pay the taxes. They support the government. They develop mines. They build factories. They build railroads. They build electric lines. They build and operate the street railroads. Every enterprise in the Republic of Mexico to-day of any consequence whatsoever or that was of any consequence up until four or five years ago, was built and operated by foreigners, not by Mexicans.

I have heard the descendants here of those who took pride at one time in the fact that American citizens were engaged in extending civilization throughout the corners of the earth—I have heard the descendants of those people, if not lineal descendant, at any rate, official successors, say that the Americans going across the line as Watson and his companions went to Santa Ysabel were almost criminals, because their action might result in causing some little trouble to some Secretary of State of the United States.

I have heard that statement made by Senators here; and when it was made my thoughts went back a few years to the time when there was a Senator here who knew something about the western people. I thought of the speeches that were made in this body at that time by Thomas H. Benton, of Missouri, when he, as an American, took pride in the fact that through the efforts of Crockett and of Bowie and of Travis and of Sam Houston and of the Burlesons and the Edwardses and the Austins and those whose names will always be a part at least of Texas history, a Lone-Star flag was raised on the southwestern border of this country; and they were not "criminals" because they had gone across the line, although their action did result, finally, in a foreign war. Their names are engraved, or those of some of them, upon a monument in such an epitaph as history has never written before: "Thermopylae had its messenger of defeat. The Alamo had none." And I can remember, through reading, when old Benton rose here and talked about those who raised the bear flag on the western coast, and carved the empire of California from that of Mexico, and who then were not afraid to defend it against the attacks of Great Britain and her Navy under Admiral Seymour, when he undertook to drive Fremont from Monterey. At that date, thank God, there was not an American who would call these men criminals, although they brought on a war with one country and defied the "Mistress of the Seas."

I say that those people living at Columbus, those people who have been carrying civilization into Mexico, are of the same blood, the same bone, the same sinew as those who raised aloft the Lone-Star flag on the one coast and the bear flag on the other, and added an empire to this country. I glory, sir, in the memory of those men, and in the fact that Missouri furnished a man who was willing and able to rise in his place in this Chamber and call attention to the fact that these were Americans, and who would have disdained to sit silent in his seat and allow them to be attacked as criminals by a President of the United States or anyone else.

I say to you, sir, that the American citizen is worthy of protection in Mexico or out of it; that the policy of this administration has been not only to ignore its duty in that respect but to place the American in Mexico at the mercy of every little petty tyrant, with the knowledge that even when damages were sought some subservient official of the State Department would cast doubt upon the proposition as to whether the heirs of that murdered American were entitled to even a few paltry dollars for damages.

Mr. President, I have finished.

During the delivery of Mr. FALL's speech,

The PRESIDING OFFICER (Mr. HUGHES in the chair). The hour of 1 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The SECRETARY. A bill (H. R. 10484) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1917, and for other purposes.

The PRESIDING OFFICER. The Senator from New Mexico is entitled to the floor.

NEW YORK STATE BAR ASSOCIATION (S. DOC. NO. 454).

Mr. O'GORMAN. Mr. President——

Mr. FALL. I yield to the Senator from New York.

Mr. O'GORMAN. With the courtesy of the Senator from New Mexico I desire to state that some months since, at the request of the Bar Association of the State of New York, I submitted a resolution that a pamphlet, entitled "Second Report of the Committee on the Duty of Courts to Refuse to Execute Statutes in Contravention of the Fundamental Law," might be printed as a Senate document. The Committee on Printing favorably passed on the request, and I have deferred pressing the matter until now because of the desire expressed by one of my colleagues that he wished to be heard at the time I would make the request. He has advised me that he has no desire to speak on the subject, and I ask unanimous consent for the immediate consideration of the resolution.

The PRESIDING OFFICER (Mr. GALLINGER in the chair). Is there objection?

There being no objection, the resolution (S. Res. 116) was read, considered by unanimous consent, and agreed to, as follows:

Resolved, That the pamphlet submitted by the Senator from New York [Mr. O'GORMAN] on January 26, 1916, entitled "Second Report of the Committee on the Duty of Courts to Refuse to Execute Statutes in Contravention of the Fundamental Law," submitted to the New York State Bar Association, be printed as a Senate document.

SERVICE IN HAITI.

Mr. HITCHCOCK. Mr. President——

Mr. FALL. I yield to the Senator from Nebraska.

Mr. HITCHCOCK. I ask the Senator to yield to me that I may submit a report from the Committee on Foreign Relations.

From the Committee on Foreign Relations I report back favorably without amendment the bill (H. R. 12835) to authorize and empower officers and enlisted men of the Navy and Marine Corps to serve under the Government of the Republic of Haiti, and for other purposes. I ask unanimous consent for the present consideration of the bill. (S. Rept. 518.)

The PRESIDING OFFICER. Is there objection?

Mr. JONES. Does the bill require any of our officers or men to serve there without their consent?

Mr. HITCHCOCK. No; this is necessary legislation to carry out the treaty with Haiti which was recently ratified by the Senate. An emergency exists for rather urgent action in the selection of new officers of the local constabulary. The House of Representatives has already passed the bill. It was favorably reported from the Committee on Naval Affairs of the Senate yesterday, and to-day it was considered by the Committee on Foreign Relations, to which it had been referred in order that it might have proper attention from that committee.

Mr. JONES. My recollection from hearing it read yesterday was that it authorizes the enlistment of our officers and men in the Haitian service.

Mr. LODGE. It does not.

Mr. JONES. It does not require them at all?

Mr. HITCHCOCK. Under section 10 of the treaty the United States is permitted to furnish the officers for their local constabulary. They are officers of our Regular Army.

Mr. JONES. Suppose one of our officers should refuse to serve, would he be liable to the penalties for insubordination or anything of that kind?

Mr. HITCHCOCK. No; of course it is a purely voluntary matter, being service outside of the country.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Nebraska for the present consideration of the bill?

There being no objection, the bill was considered as in Committee of the Whole, and it was read, as follows:

Be it enacted, etc., That the President of the United States be, and he is hereby, authorized, in his discretion, to detail to assist the Republic of Haiti such officers and enlisted men of the United States Navy and the United States Marine Corps as may be mutually agreed upon by him and the President of the Republic of Haiti: *Provided*, That the officers and enlisted men so detailed be, and they are hereby, authorized to accept from the Government of Haiti the said employment with compensation and emoluments from the said Government of Haiti, subject to the approval of the President of the United States.

SEC. 2. That to insure the continuance of this work during such time as may be desirable, the President may have the power of substitution in the case of the termination of the detail of any officer or enlisted man for any cause: *Provided*, That during the continuance of such details the officers and enlisted men shall continue to receive the pay and allowances of their ranks or ratings in the Navy or Marine Corps.

SEC. 3. That the following increase in the United States Marine Corps be, and the same is hereby, authorized: Two majors, 12 captains, 18 first lieutenants, 2 assistant quartermasters with the rank of captain, 1 assistant paymaster with the rank of captain, 5 quartermaster sergeants, 5 first sergeants, 5 gunnery sergeants, and 11 sergeants.

SEC. 4. That the following increase in the United States Navy be, and the same is hereby, authorized: One surgeon, 2 passed assistant surgeons, 5 hospital stewards, and 10 hospital apprentices, first class.

SEC. 5. That officers and enlisted men of the Navy and Marine Corps detailed for duty to assist the Republic of Haiti shall be entitled to the same credit for such service, for longevity, retirement, foreign service, pay, and for all other purposes, that they would receive if they were serving with the Navy or with the Marine Corps.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

After the conclusion of Mr. FALL's speech,

FEDERAL RESERVE BOARD—INTERSTATE COMMERCE COMMISSION.

Mr. OWEN. Mr. President, the hour is growing late, and I understand it will be agreeable to the chairman of the Committee on Post Offices and Post Roads to have the unfinished business temporarily laid aside.

There is a bill relating to the amendment of the Federal reserve act, and which affects the system substantially, which passed the House on May 5, and which has been reported from the Committee on Banking and Currency for a good many days now, and I should like very much to have it disposed of. It is not very long. Recommendations on this subject were made by the Federal Reserve Board, and I believe the bill has the unanimous approval of the Committee on Banking and Currency. I know of no objection to the proposed amendment.

If it be agreeable to the Senator from Alabama to lay aside the unfinished business temporarily, I should like to make a motion to proceed to the consideration of that bill.

Mr. BANKHEAD. Mr. President, of course I am very anxious to have the Senate proceed with the consideration of the Post Office appropriation bill, but I realize the fact that it will perhaps be impossible to make any progress with the bill this afternoon. I am exceedingly anxious to accommodate Senators who have matters they wish to dispose of, and therefore I am willing to make a request to lay aside the unfinished business temporarily in order to give Senators an opportunity to dispose of the matters in which they are interested.

The PRESIDING OFFICER. Is there objection to laying aside the unfinished business temporarily?

Mr. WARREN. Mr. President, may I ask the Senator from Oklahoma whether this is a matter which is likely to lead to debate?

Mr. OWEN. I think not.

Mr. NEWLANDS. Mr. President, I have been waiting here all the afternoon hoping to get an opportunity to ask unanimous consent for the consideration of a bill reported from the Interstate Commerce Committee, providing for an increase in the membership of the Interstate Commerce Commission and the division of that membership into branches or divisions. It is a matter which has been brought to my attention by the President as being one of urgent importance and also by a committee of the Interstate Commerce Commission, who declare that the dispatch of business by that commission urgently requires not only the increase in its membership but the division of that membership into branches, so that each branch of three can separately consider the questions that heretofore have been considered by the entire commission. It seems to me a matter of such urgency that I will ask the chairman of the Committee on Banking and Currency whether he can not yield to that urgency.

The PRESIDING OFFICER. Without objection, the unfinished business will be temporarily laid aside.

Mr. OWEN. Mr. President, I think the bill referred to by the Senator from Nevada will undoubtedly lead to debate. A change in the Interstate Commerce Commission, I should think, would undoubtedly lead to debate.

Mr. NEWLANDS. It will lead to debate, because I understand that the Senator from Wisconsin [Mr. LA FOLLETTE] is opposed to the bill and will resist it. I have given that Senator notice this afternoon that I would bring it up for consideration, and I shall feel bound to send word to him that we have it under consideration; but it is a matter of such urgency that I should like to have it disposed of if possible.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Oklahoma that the bill he has indicated be now taken up by the Senate?

Mr. WARREN. While I do not object, I wish to say, with reference to a bill which is likely to follow it, that it seems to me rather late in the day to act on a bill which must lead to debate. I have a very small matter—a local one from my State—that will lead to no debate that I hope to bring up after the Senator has finished, and I hardly feel like consenting to taking up both of those matters ahead of it. I make no objection, however.

Mr. NEWLANDS. I wish to say that the proposal of the Senator from Oklahoma will also lead to debate, because I have in view some amendments to the Federal reserve act which I should like to insert, and I think——

Mr. OWEN. I decline to yield further.

The PRESIDING OFFICER. The Senator declines to yield further. Is there objection to the request of the Senator from Oklahoma?

Mr. NEWLANDS. I object, Mr. President.

Mr. OWEN. I move that the Senate proceed to the consideration of the bill (H. R. 13391) to amend an act approved December 23, 1913, known as the Federal reserve act, by adding a new section.

Mr. NEWLANDS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Oklahoma moves that the Senate proceed to the consideration of House bill 13391, to amend the Federal reserve act. The Senator from Nevada raises the question of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gore	Nelson	Smith, Ga.
Brady	Harding	Newlands	Smith, Md.
Brandegee	Hollis	Norris	Sterling
Chamberlain	Husting	Overman	Sutherland
Chilton	James	Owen	Thomas
Clark, Wyo.	Jones	Page	Thompson
Culberson	Kern	Reed	Townsend
Curtis	La Follette	Shafroth	Underwood
Dillingham	Lane	Sheppard	Vardaman
Fall	Lea, Tenn.	Shields	Warren
Fletcher	Lee, Md.	Simmons	Williams
Gallinger	Lodge	Smith, Ariz.	

The PRESIDING OFFICER. Forty-seven Senators have answered to their names—less than a quorum.

Mr. KERN. Let the list of absentees be called.

The PRESIDING OFFICER. The list of absent Senators will be called.

The Secretary called the names of absent Senators, and Mr. MYERS answered to his name when called.

Mr. BANKHEAD entered the Chamber and answered to his name.

The PRESIDING OFFICER. Forty-nine Senators have answered to their names. A quorum of the Senate is present. The question is on the motion of the Senator from Oklahoma that the Senate proceed to the consideration of House bill 13391, to amend the Federal reserve act.

Mr. NEWLANDS. Mr. President, I move as a substitute for that motion that——

Mr. OWEN. Mr. President, I make the point of order that the Senator can not move a substitute for my motion.

The PRESIDING OFFICER. The point of order is sustained. The question is on the motion made by the Senator from Oklahoma to proceed to the consideration of the bill the title of which has been stated.

Mr. NEWLANDS. Is the motion debatable?

The PRESIDING OFFICER. It is debatable.

Mr. NEWLANDS. I wish to state to the Senate that if this motion is defeated, I shall then move to take up the bill (H. R. 308) to amend the act to regulate commerce, as amended, and for other purposes. This bill amends section 24 and section 17 of the interstate-commerce act. It adds to the Interstate Commerce Commission two members, making nine in all. It provides for the division of the commission into three branches, so that each branch can enter upon the work that now occupies the attention of the entire commission.

The Interstate Commerce Commission is overloaded with work. The members of that commission are overworked. The business of regulating the great transportation interests of the country is lagging behind. This matter has become so important that a committee from the Interstate Commerce Commission called upon the President and urged that this particular subject of legislation should not be included within his recommendations that general matters of legislation relating to the amendment of the interstate-commerce act should be referred to a special joint commission or committee. He informed them that it was never his intention that this particular legislation should come within the purview of his recommendation, and wrote the chairman of the Interstate Commerce Committee of the House and the chairman of the Interstate Commerce Committee of the Senate stating that fact and urging the necessity of immediate action upon the matter which the Interstate Commerce Commission has had so much at heart.

Bills were therefore introduced in the House and in the Senate—in the House by the chairman of the Interstate Commerce Committee, Mr. ADAMSON, and in the Senate by myself. The matter was fully considered in the House by the Interstate Commerce Committee, a unanimous report was made, and the bill passed the House. That bill has been under consideration by the Senate Interstate Commerce Committee and it was reported favorably. I will read the letter from the President relating to this subject.

Mr. OWEN. Mr. President, I make a point of order against the Senator's comments, in that they are not addressed to the subject matter before the Senate.

Mr. NEWLANDS. I am endeavoring to show the importance of this measure.

The VICE PRESIDENT. The Chair has heretofore remarked that now and then in the Senate of the United States remarks are not strictly to the question in hand, but they are always in order.

Mr. OWEN. I move that the remarks of the Senator are immaterial and void. [Laughter.]

Mr. NEWLANDS. Mr. President, I will proceed. [Laughter.] The letter is as follows:

THE WHITE HOUSE,
Washington, February 14, 1916.

MY DEAR SENATOR: I had a call the other day from Mr. McChord, chairman of the Interstate Commerce Commission, during which I found that he was very earnestly in favor of the early passage of a bill authorizing the commission to divide itself into sections for the facilitation and more thorough treatment of its work, and that in this desire he was speaking for his colleagues of the commission. He wanted to know whether I thought that the passage of such a bill at this time would be inconsistent with my advice to Congress in my annual message to withhold further railway legislation until a thorough inquiry could be made by a special commission into the whole subject of railway regulation for the purpose of seeing in what direction we should next turn. I told him that it did not seem to me at all inconsistent with that advice, and that I was thoroughly in favor of the bill allowing the commission to divide itself into sections, because it was a merely administrative improvement and would, in my opinion, be a very vast improvement, not affecting at all any of the essential matters of legislative regulation. I promised him that I would write you to this effect, and I take advantage of this opportunity to urge very warmly the immediate consideration of the measure, which, I believe, is already formulated, for conferring this authority on the commission.

Cordially and sincerely, yours,

WOODROW WILSON.

Hon. FRANCIS G. NEWLANDS,
United States Senate.

Now, before the Senate committee appeared Hon. Edgar E. Clark, a member of the Interstate Commerce Commission, and I will read a few extracts from his urgent appeal for immediate action upon this subject:

Commissioner CLARK. Mr. Chairman, the commission has found that the volume of work demanding its attention has grown to such an extent that it is physically impossible for anyone to satisfactorily keep up with all of it. The theory of the law is that the commission shall act as a commission, and that the commission is responsible for all that it does, and its orders must be entered by a majority, at least, of the commission. We have discussed for some time every idea promising some relief which has occurred to us or been suggested by anyone else to our knowledge, and we have finally concluded that this arrangement would give some relief and work out more satisfactorily than any other that has been suggested.

This bill contemplates the addition of two members to the commission. We had some little difference of thought ourselves as to whether or not that was enough, but finally decided that two would suffice, and it was desirable to ask for as small an increase as possible, as we are all agreed that no addition to the number of commissioners would give any relief whatever unless it were coupled with authority for us to subdivide into groups of commissioners, each group to exercise the jurisdiction and power of the commission in the matter especially delegated to it.

Mr. OWEN. Mr. President, I rise to a point of order.

The VICE PRESIDENT. The Senator will state the point.

Mr. OWEN. Under Rule IX "a motion to proceed to the consideration of any other bill on the calendar" shall be decided without debate, and the Senator is out of order under Rule IX, which I have read.

Mr. NEWLANDS. To what rule does the Senator refer?

Mr. OWEN. Rule IX, on page 12:

Each of the foregoing motions shall be decided without debate.

I have made a motion to proceed to the consideration of House bill 13391.

Mr. NEWLANDS. I have an impression that the Chair decided that debate is in order.

The VICE PRESIDENT. The Senator from Oklahoma will observe that Rule IX applies to the interim between the consideration of morning business and the hour of 2 o'clock. There is no way to stop the Senator from Nevada from talking.

Mr. GALLINGER. If the Senator from Nevada will permit me, the occupant of the Chair at that time did not understand that the Senator had moved to proceed to the consideration of another bill, but that he was debating the motion to take up a certain bill.

Mr. NEWLANDS. Mr. President, I am proceeding in order.

The VICE PRESIDENT. That is correct. The Chair does not understand that the Senator has completed his remarks.

Mr. NEWLANDS. I will state that the suggestion has been made that I should yield for a motion for an executive session. If such a motion is made, I will not stand in the way of it. Continuing Mr. Clark's statement:

To enlarge the commission without that proviso would simply mean nine men to discuss and agree instead of seven, and would, we think, take more time and make matters worse—in that light, I mean.

Now, as we think, the primary purpose of this act and the primary purpose of the work of the commission was to deal with questions of transportation charges, the reasonableness of rates, and questions of unjust discrimination or undue preference. The law provides that when

a complaint is made to the commission the commission shall inform the carrier of it, and unless the carrier satisfies the complaint the commission proceeds with the hearing.

The law in that respect seems to recognize the fact that there would be many instances in which the carrier would satisfy the complaint without formal hearing, and as we have gone along with our work of that character and trying to keep up with the increase of it and trying to administer it in such ways as are most expeditious and most economical, both to the Government and to the parties to the controversies, we have established three dockets.

Mr. OWEN. Mr. President, I make the point of order that on page 95, Jefferson's Manual, "no one is to speak impertinently or beside the question, superfluously, or tediously."

Mr. NEWLANDS. Mr. President, I am giving the reasons why this bill should not be considered, and I am giving the reasons why House bill 308 should be considered—reasons of great urgency; reasons affecting the dispatch of public business; reasons affecting serious consequences to the national service unless the bill is passed by to-morrow, for after to-morrow we must take up only consent matters for a period of nearly three weeks.

I wish to say that I have been waiting here for days in order to present this bill; that the chairman of the Interstate Commerce Committee of the House has been over here urging its passage; and that the members of the Interstate Commerce Commission are awaiting its passage with a view to a quick dispatch of the public business.

Mr. KERN. If the Senator will allow me, I should like to ask him whether he thinks a bill of this importance can be discussed properly and intelligently within the time named by him? Does he think that there would be any possibility of passing such a bill through the Senate between now and the time when the unanimous-consent agreement becomes operative?

Mr. NEWLANDS. We would have to-morrow for its consideration.

Mr. KERN. Does not the Senator understand that the bill will involve discussion, and considerable discussion?

Mr. NEWLANDS. I do not know. If it appeals to others as it has appealed to me, I assume that it will pass most expeditiously. I have never known a bill of greater merit. I have never known a bill of greater urgency in my experience as chairman of the Interstate Commerce Committee. I am urging it in good faith as a means of enabling the Interstate Commerce Commission to discharge the duties imposed upon it by law.

Mr. GALLINGER. Mr. President, the Senator is urging it in good faith at a bad time.

Mr. NEWLANDS. I may suggest that a motion to consider any bill at this time may be regarded as being urged at a bad time, but it is the only time within which I have had an opportunity, though I have been waiting an opportunity for days to present this measure. I regard it as a measure of the very greatest importance.

Mr. President, the usefulness of the Interstate Commerce Commission and the confidence of the public itself in it rest upon its ability to transact the business that comes before it, to dispatch that business with a due consideration of the evidence and the law, and to dispatch it as quickly as the proper presentation of the facts and the law will permit. That commission has been tied up for a long period of time by its constantly increasing burdens. Congress has year after year increased the jurisdiction of the commission without giving it the facilities for the rapid transaction of its business. Here is a proposal under whch we will divide the commission into three divisions so that the commission can do three times the work within a given time that it is now doing.

I appeal to the good sense and the judgment of the Members of the Senate to support me in my efforts to have the bill considered.

Mr. OVERMAN. Will the Senator yield for a motion for an executive session?

Mr. NEWLANDS. I yield for that purpose.

SPEECH BY HON. CHARLES A. TOWNE (S. DOC. NO. 456).

Mr. CHILTON. Before the motion is made I should like to ask unanimous consent to have printed as a public document the speech of Hon. Charles A. Towne, former Senator of the United States, made at Elko, Nev., May 19, 1916.

The VICE PRESIDENT. Without objection, it is so ordered.

EXECUTIVE SESSION.

Mr. OVERMAN. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After six minutes spent in executive session the doors were reopened.

RELIEF OF SYRIANS.

Mr. CHILTON submitted the following resolution (S. Res. 209), which was read and referred to the Committee on Foreign Relations:

Whereas the attention of the people of the United States has been directed to the helpless situation in which many of the Syrians in the Mount Lebanon district have been placed, and that many thousands have perished from hunger and exposure; and

Whereas thousands of citizens of the United States, in practically every State of the Union, were either born in Syria or are the children of Syrians born in that country, and that thousands of American citizens are related by blood and affinity to many of the said suffering and helpless people; and

Whereas the people of the United States have demonstrated their sympathy for the suffering people on all sides in the great European war, having helped in a practical way the people of Belgium, Serbia, Ireland, Poland, and others, as becomes a nation which is neutral in this war and on friendly terms with all the belligerents: Therefore be it

Resolved, That, appreciating the sufferings of the Syrian people, it is suggested that the President of the United States set aside a day upon which a direct appeal to the sympathy of all American citizens shall be made and an opportunity shall be given for our public-spirited people to contribute to a much-needed fund for the relief of the Syrian people.

ADDRESS BY EDWIN M. BORCHARD (S. DOC. NO. 455).

Mr. LA FOLLETTE. Mr. President, I have a copy of an address delivered at the Lake Mohonk conference on international arbitration, May 18, 1916, by Edwin M. Borchard, formerly assistant solicitor, Department of State, which I ask may be printed as a public document.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. CURTIS. I move that the Senate adjourn.

The motion was agreed to; and (at 4 o'clock and 23 minutes p. m.) the Senate adjourned until to-morrow, Saturday, June 3, 1916, at 12 o'clock meridian.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 2, 1916.

REGISTERS OF THE LAND OFFICE.

Joseph Oker to be register of the land office at Helena, Mont.

Henry Alexander Porter to be register of the land office at Vancouver, Wash.

POSTMASTERS.

ARIZONA.

Don C. Babbitt, Mesa.

Alexander G. Krembs, Stevens Point.
Gilbert C. Roberts, La Farge.

HOUSE OF REPRESENTATIVES.

FRIDAY, *June 2, 1916.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

We bless Thee, Almighty God, our heavenly Father, for a united country, strong in its material, intellectual, moral, and spiritual resources. Keep us, we beseech Thee, in touch with Thee, that we enter not into temptation and misuse the gifts with which Thou hast so abundantly blessed us, but lead Thou steadily onward and upward, that our influence may go out for good to all the world. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had passed with amendments bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 14864. An act to alter and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from the Central Pacific Railroad, in California, to Portland, in Oregon," approved July 25, 1866, as amended by the acts of 1868 and 1869, and to alter and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from Portland to Astoria and McMinnville, in the State of Oregon," approved May 4, 1870, and for other purposes.

The message also announced that the Senate had passed joint resolution of the following title, in which the concurrence of the House of Representatives was requested:

S. J. Res. 137. Joint resolution authorizing the Commissioners of the District of Columbia to make special regulations for the occasion of the National Capital preparedness parade on the 14th day of June, 1916, and for other purposes incident to said parade.

The message also announced that the Senate had insisted upon its amendments to the bill (H. R. 14864) to alter and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from the Central Pacific Railroad, in California, to Portland, in Oregon," approved July 25, 1866, as amended by the acts of 1868 and 1869, and to alter and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from Portland to Astoria and McMinnville, in the State of Oregon," approved May 4, 1870, and for other purposes, had asked a conference with the House on said bill and amendments thereto, and had appointed Mr. CHAMBERLAIN, Mr. THOMAS, and Mr. STERLING as the conferees on the part of the Senate.

The message also announced that the Senate had passed without amendment bill of the following title:

H. R. 12835. An act to authorize and empower officers and enlisted men of the Navy and Marine Corps to serve under the Government of the Republic of Haiti, and for other purposes.

EXTENSION OF REMARKS.

The SPEAKER. With the consent of the House, the Chair wants to make a very brief statement. The remarks that I made here yesterday, eked out by printing two short articles in a magazine, ought to have gone in the back of the RECORD as an extension of remarks, and I so marked the manuscript. If there is any difference in the obligation of the Members of the House to pay attention to the rules and regulations, the Speaker is more under obligations than anbody else. I am sorry that this occurred.

Mr. GARNER. Mr. Speaker, I want to ask unanimous consent to extend my remarks in the RECORD by printing the address delivered by the Secretary of the Treasury at Raleigh, N. C., on the 31st ultimo.

Mr. MANN. It has been printed twice already in the RECORD.

Mr. GARNER. Then I do not care to extend my remarks. But this is such a good document that I thought it ought to be reprinted.

Mr. STAFFORD. The Secretary of the Treasury is being overworked nowadays.

NAVAL APPROPRIATION BILL.

Mr. STEPHENS of Nebraska. Mr. Speaker, I ask unanimous consent——

Mr. MANN. I ask for the regular order, Mr. Speaker.

The SPEAKER. The gentleman from Illinois asks for the regular order, and the regular order is that the House resolve itself automatically into Committee of the Whole House on the state of the Union for the further consideration of the naval appropriation bill. The gentleman from New York [Mr. FITZGERALD] will please take the chair.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15947, the naval appropriation bill, with Mr. FITZGERALD in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15947, the naval appropriation bill, which the Clerk will report.

The Clerk read the title of the bill, as follows:

A bill (H. 15947) making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes.

Mr. KEATING. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Colorado offers an amendment, which the Clerk will report.

Mr. MANN. Mr. Chairman, there was one amendment that was passed over. What has become of it?

Mr. PADGETT. I was looking for the information that was requested from the department. I will present it when I get the information.

The Clerk read as follows:

Amendment by Mr. KEATING: Page 32, line 6, strike out "$142,000" and insert "$167,000: *Provided*, That the Secretary of the Navy in his discretion may expend $25,000 of said appropriation for the purchase of a dairy herd for the Naval Hospital at Las Animas, Colo."

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the proposition.

The CHAIRMAN. The gentleman from Wisconsin reserves a point of order on the amendment.

Mr. KEATING. Mr. Chairman, the naval hospital at Las Animas, Colo., is one of seventeen naval hospitals, and the only one which is devoted to the care and treatment of tubercular patients. As most of the Members of this House probably understand, one of the great needs of such an institution is a sufficient and a reliable milk supply. The Secretary of the Navy, in a letter to the chairman of the Committee on Naval Affairs, has set forth the case on behalf of the Las Animas Hospital, and with the indulgence of the committee I will read the letter. The Secretary says:

NAVY DEPARTMENT,
Washington, April 14, 1916.

MY DEAR MR. PADGETT: The desirability of establishing at the naval hospital, Las Animas, Colo., a herd of milch cows to furnish pure milk for our consumptives from the officer and enlisted personnel there under treatment for consumption has been strongly brought to my attention by the reports from the commanding officer (Medical Director Barber) and others interested in this work.

Milk is the most important food for consumptives, and at present the milk supply is obtained from various small herds owned by farmers in the vicinity of Las Animas. This milk supply is carefully watched by the medical officer at Las Animas, and in general a sufficient and fairly high-standard product is obtained, but, of course, at a very high price.

The medical officer in command, Medical Director George H. Barber, United States Navy, is an unusually competent and well-equipped man for the work, and feels that if he could buy a small strip of land for pasturage and fodder and build the simple structures necessary for

housing the herd he could save between eight and ten thousand dollars a year and obtain a milk supply of the finest quality. The milk supply for this hospital during the past year cost $12,506.86. He states that he is able to purchase a small group of tough Holstein heifers with one or two blooded bulls at a very reasonable price, and from this start would breed the necessary increase to give a herd of sufficient size to furnish the adequate supply. Medical Director Barber besides being a doctor is a graduate of an agricultural college, and is an authority on agricultural questions in this section, so that I feel that he could successfully handle the problem.

When you realize that Congress makes no appropriation for the maintenance of this hospital, and that it is almost entirely supported from the naval hospital fund, which comes from the pay of the men, it would seem that the Congress could not do less than furnish them a supply of pure milk.

It is estimated that an appropriation of $25,000 for this purpose would cover all expenses and in a short time would save at least $8,000 a year on the item of milk.

The plan seems to me proper, just, and ultimately economic, and if you agree with me I would suggest that this item be added to the appropriation bill as follows:

"Naval hospital, Las Animas, Colo.: For the establishment of a dairy farm, including the purchase of land and stock and the erection of buildings, $25,000."

Sincerely, yours, JOSEPHUS DANIELS.

Hon. LEMUEL P. PADGETT, M. C.,
Chairman Committee on Naval Affairs,
House of Representatives, Washington, D. C.

Mr. Chairman, this naval hospital, like other naval hospitals, is maintained by contributions from the sailors and marines in the service of the United States. Every sailor—from Admiral Dewey down to the humblest coal passer on a man-of-war—contributes so much every month to the maintenance of these hospitals.

The Las Animas Hospital is a monument to the work of the Bureau of Medicine and Surgery of the Navy. Originally President Roosevelt transferred the Fort Lyon Military Reservation, in Colorado, to the Navy Department, and through the contributions from the men of the Navy they have built up this great institution for the care of tubercular patients, practically without cost to the Government. But of late, owing to the action of the Secretary of the Navy in changing the method of assessing fines on sailors and marines, the receipts of the hospital fund have been very materially decreased. Prior to the present administration, when a sailor or a marine was fined the money was immediately turned into the hospital fund. Secretary Daniels has established a regulation by which when a man is fined the money is set aside, and if when his term of enlistment expires he can secure an honorable discharge, the entire amount is returned to him. If he can secure an ordinary discharge, then one-half of the fine is returned to him. If he is dishonorably discharged, the fine is turned back into the hospital fund.

Mr. MANN. Mr. Chairman, will the gentleman yield for a question?

Mr. KEATING. Yes.

Mr. MANN. Will this involve the purchase of land?

Mr. KEATING. The amendment does not provide for the purchase of land. The original suggestion was that they should buy some dry land in the immediate vicinity for pasturage.

Mr. MANN. I understand the amendment does not; but will the land, if it is purchased, have to be paid for by the Government or out of the hospital fund?

Mr. KEATING. Under the amendment, if they purchase any land, they would have to pay for it out of the hospital fund.

Mr. MANN. Under this amendment; but still it is quite certain that if we buy the herd, and we have to pasture them, we will have to provide pasturage out of some fund.

Mr. KEATING. I presume that is true.

Mr. MANN. And I doubt whether the naval-hospital fund would warrant the purchase of land out of that fund. I do not know how much the Government owns there.

Mr. KEATING. About 600 acres, and when Dr. Barber was in Washington he told me that his plan contemplated the purchase of about 100 acres of what we know as dry land in Colorado, pasture land, which is not irrigated. The Government's land is very valuable.

Mr. MANN. I know the situation there. It takes a good deal of acreage for pasturage. This is at Las Animas.

Mr. KEATING. Yes. Dr. Barber estimated it would take 100 acres.

Mr. MANN. I can assure the gentleman that 100 acres will not go very far toward pasturing a $25,000 herd of cattle.

Mr. KEATING. That was the estimate Dr. Barber gave to me.

Mr. MANN. The gentleman evidently obtained a misunderstanding.

Mr. KEATING. I do not think I did.

Mr. MANN. It would require a great deal more land than that.

Mr. KEATING. The gentleman must remember that they have 600 acres there where they grow alfalfa and other feed for cattle, and the herd would not be compelled to live off the dry land.

Mr. MANN. I supposed that they used the 600 acres.

Mr. KEATING. They cultivate it, and they raise alfalfa and other crops. You can raise almost anything at that point in Colorado. They have about 600 acres of good irrigated land. Dr. Barber is a curious combination. He is an expert agriculturist, as well as a physician, and he takes a great deal of pride in this farm.

Mr. TALBOTT. What is the size of the herd?

Mr. KEATING. The estimate here is $25,000.

The CHAIRMAN. The time of the gentleman from Colorado has expired.

Mr. MANN. Mr. Chairman, unfortunately, I have had to know something about tuberculosis. There is no cure for tuberculosis by ordinary methods. Medicine does not have any material effect, practically, and the only chance for cure is fresh air and good food. They have fresh air in great quantity out in Colorado, and they do not have the good food unless it is supplied in some way. In general there is nothing more important in the way of good food for tubercular patients than milk and eggs; and if we have a hospital, as we have out there, for those who are afflicted with tuberculosis, having acquired the disease while in the Navy, and we send them out there for possible cure or maintenance, it seems quite appropriate that we should provide those patients with good food, with the hope that they may be able to recover. I have no doubt they do the best they can now, and that probably is very good, in the way of the purchase of milk, but I have no doubt that they could do much better if they acquired a herd of cattle of their own—milch cattle—over which they would have perfect control. I hope the amendment may be agreed to.

Mr. FOSTER. Mr. Chairman, I hope the gentleman from Wisconsin [Mr. STAFFORD] will not insist upon the point of order to this important amendment.

Mr. STAFFORD. I hope the gentleman will advance some reasons that have not yet been advanced why the Government should go into the dairy business. I believe it is subject to a point of order.

Mr. FOSTER. Mr. Chairman, I suggest, in justification of the amendment, that here is a hospital, located out there for the treatment of those boys in the Navy who may be unfortunate in contracting what everyone knows to be one of the worst diseases with which the human family has to contend, and, as has been said, the treatment largely, if it is to do any good, must be out in the open air, with plenty of proper and nourishing food. Buying milk, as I understand they have to do, from different dairies in the community is not the best way of securing pure milk for sick people.

Members of this House, no doubt many of them, have gone out to the Soldiers' Home, located in the north part of the city, and have seen the beautiful herd of cattle which they have there which furnishes milk for the soldiers who retire from the service and go into that home. No one can help but admire what is being done there, and I am sure as much can be done for the hospital in Colorado as is done for the Soldiers' Home here in the city of Washington. I think this amendment an important one, because it does give to these people who have control of the supply of milk an insurance that they will have a pure supply for food for these people. I think it is important, and I think a great naval bill, when we are spending this year more than $269,000,000 for preparedness, we should not forget those who are in the service and are unfortunate enough to have contracted this disease. I hope the gentleman from Wisconsin may see his way clear to withdraw the objection to the amendment and permit it to go through.

Mr. STAFFORD. Mr. Chairman, no reason has been advanced here so far——

Mr. PADGETT. Will the gentleman permit me to make a suggestion?

Mr. STAFFORD. Just one moment—why these inmates can not obtain good milk from private parties.

Mr. PADGETT. Will the gentleman permit me to state to him that down here at Annapolis they supplied the Naval Academy with milk purchased in the market, and they had epidemics of all kinds of stomach and bowel diseases and typhoid fever and other troubles, so that the condition became alarming. A commission was appointed to investigate, and after a great deal of investigation they found it was traceable to the milk. Thereupon Congress authorized the establishment of a dairy at Annapolis, which has been operating several years, and disease has been reduced marvelously, almost to a minimum, and the results accomplished have many, many times justified the wisdom of Congress in establishing a dairy at Annapolis.

In addition to that it has proved an economic investment, and for that reason I hope that the gentleman will not insist on his point of order.

Mr. STAFFORD. Mr. Chairman, I decline to yield further. We are all acquainted with the management and control of educational institutions. Most of us have attended them and have eaten in the commons managed by college authorities. The condition that the gentleman has stated existed at Annapolis was the fault of the supervisory officials in not analyzing the milk and getting the proper certification from private purveyors. I stated yesterday that this bill was becoming a public-building bill, and now it is sought to make it an agricultural and dairy-herd bill. I insist on the point of order. I do that because there are a great number of gentlemen here who have a number of amendments yet to offer. I would like to have this discussed for an hour or two, but we have not the time. I call the Chair's attention to the Manual, page 366, paragraph 822. I make the point of order that it is new legislation. It is admitted by the proponent of the amendment that the appropriation is necessary to purchase land additional to that now existing, and I direct attention to section 822, which reads as follows:

Appropriations for new buildings at Government institutions have sometimes been admitted when intended for the purposes of the institution; but later decisions, in view of the indefinite extent of the practice made possible by the early decisions, have ruled out propositions to appropriate for new buildings in navy yards and other establishments. Appropriations for new schoolhouses in the District of Columbia, for new Army hospitals, for new lighthouses, armor-plate factories, and for additional playgrounds for children in the District of Columbia have also been held not to be in continuation of a public work.

This amendment I repeat, Mr. Chairman, is intended to purchase additional land to that owned by the Government, an additional institution connected with the existing hospital.

The CHAIRMAN. The amendment states that the purpose is to purchase a dairy herd.

Mr. STAFFORD. The letter the gentleman read said that it would be necessary to purchase additional land, and he has admitted that it would be necessary to purchase additional land.

The CHAIRMAN. The Chair can not go outside of the amendment, and it does not take a farmer to know that a dairy herd does not consist of land.

Mr. STAFFORD. The proponents of the amendment have admitted to the House that the purpose of the amendment is to acquire additional land.

The CHAIRMAN. The Chair is prepared to rule. The paragraph already provides for the "purchase of and feed for horses and cows." This amendment provides for a dairy herd, and the Chair thinks that where cows are authorized to be purchased money to purchase a dairy herd is clearly in order. The Chair overrules the point of order.

Mr. CRISP. Mr. Chairman, I hope this amendment will be adopted. I have had some experience, and my experience is personal, with this particular disease. A little over two years ago my physician in Washington told me that I had a spot on my lungs and I ought to go West. At that time I had rather have been shot, for I thought that the disease was a loathsome and incurable one. I then weighed about 110 pounds. My colleagues will recollect how I looked.

I went to Colorado and spent seven months at Colorado Springs. If my colleagues could see, as I saw out there, the thousands of people who were seeking health, I am sure they would be glad to do anything to extend and hold out a helping hand. It is the one disease that depends on fresh air and nourishing food for recovery. I spent three months in bed out on a sleeping porch in a tuberculosis sanitarium, and my diet consisted largely of milk and raw eggs, nourishing food, and I learned, Mr. Chairman, that the only chance for people afflicted with that disease for recovery was fresh air, nourishing and pure food.

This amendment tends to insure to the inmates of this naval hospital pure food, essential to their recovery. I can testify to the beneficial effect of the Colorado air if you will aid it by nourishing, pure food. I know that I have recovered from my affliction, and it was due to the Colorado air plus pure food. I hope with all my heart that this amendment will be adopted, for it is a step toward supplying the inmates of the naval hospital with pure food. [Applause.]

Mr. BENNET. Mr. Chairman, I do not think I will take more than a moment to testify as to the value of this particular hospital. When I was in Congress before, a midshipman who had been appointed to Annapolis by my predecessor contracted tuberculosis of the leg. He was sent to this hospital at Las Animas, and I followed, as a layman, the course of treatment that they gave and also submitted it to physicians. I was impressed at the time with the skill and care that the inmates of the hospital were given. Everybody who knows anything about tuberculosis patients knows that they require a great deal of milk. Anybody who knows anything about the West knows that it is difficult to get it. This is an amendment which, though paternalistic, is in the nature of progress, and for the benefit of humanity, and I sincerely hope that there will not be a single vote against it in the whole House.

Mr. HOPWOOD. Mr. Chairman, I had a very similar experience to the one just related by the gentleman from New York. A young man in my district went to West Point. He was about 6 feet in height, weighing nearly 200 pounds, and was put on the football team; he was a magnificent specimen of physical manhood. Yet he contracted tuberculosis there. There was no hereditary taint in his family. He is at present being treated in the hospital in New Mexico.

So while I am against paternalism and against Government ownership generally, yet I think a herd of cows to give good milk for these young men we have in the Government service would be a splendid thing, particularly where they have already contracted this disease and are at the hospital to be taken care of and cured if possible. So in this case I hope that every Member present will vote for this amendment. [Applause.]

Mr. O'SHAUNESSY. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Rhode Island? [After a pause.] The Chair hears none.

Mr. KINKAID. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

Mr. McCRACKEN. Mr. Chairman, I make the same request.

Mr. SNYDER. Mr. Chairman, I desire to extend my remarks in the RECORD.

Mr. FOSTER. These remarks will be upon the bill?

The CHAIRMAN. On the bill.

Mr. WHALEY. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to these requests? [After a pause.] The Chair hears none.

The question was taken, and the amendment was agreed to.

Mr. PADGETT. Mr. Chairman, yesterday we passed over an amendment with reference to an appropriation for a shop, and so forth, at Norfolk. The amendment offered provided for a shop and facilities, and I understand that the amendment is for a shop, and I wish to offer a substitute for the one I offered yesterday.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent to withdraw the pending amendment and offer the following as a substitute. The Clerk will report it.

The Clerk read as follows:

Page 21, line 16, after the figures "500,000" insert: "One structural shop to cost not to exceed $1,000,000, $400,000. Salvage and tools, $50,000."

Mr. MANN. Mr. Chairman, reserving the right to object for a moment, how long will this take?

Mr. PADGETT. Only a few minutes.

Mr. MOORE of Pennsylvania. Mr. Chairman, I would like to be heard on this amendment.

Mr. PADGETT. Mr. Chairman, I ask unanimous consent that the letter I have from the Secretary be read. That is all I desire to state in this connection.

Mr. MANN. Mr. Chairman, I withdraw the point of order.

The CHAIRMAN. Is there objection to the request of the gentleman to withdraw the previous amendment and substitute this? [After a pause.] The Chair hears none.

Mr. MOORE of Pennsylvania. Mr. Chairman, I desire recognition at the proper time.

The Clerk read as follows:

NAVY DEPARTMENT,
Washington, June 2, 1916.

DEAR CONGRESSMAN: I can not emphasize too strongly the imperative necessity for the efficiency of the Navy of the inclusion in the pending naval bill of the item recommended by the Secretary of the Navy in his letter to the chairman of the Naval Committee of May 22, which provides for a structural shop at the Norfolk Navy Yard, at a cost not to exceed $1,000,000, of which $450,000 is to be made immediately available.

The total destruction by fire of the ship-fitters' shop at Norfolk has made this a matter of the greatest importance; and unless the item is included in the bill, not only will the completion of the destroyer to be built at that yard be indefinitely delayed, but repairs to such battleships as are assigned to that station will be a matter of great difficulty; and the delays that will ensue, owing to the lack of facilities and a ship-fitters' shop, will, in all probability, prevent the dreadnaughts from being repaired after the summer maneuvers in time to take part in the winter maneuvers at Guantanamo. You can well understand what a serious blow to the efficiency of the fleet this would be and the just criticism to which we would be exposed if we had failed to provide proper facilities for this work.

The strategic position of the Norfolk Navy Yard makes it one of the most important naval stations that we have, and the shortsighted policy of past years which has prevented us from having proper buildings and equipment at that place has always seemed to me an amazing instance

of inefficiency and maladministration. Even had the fire not occurred, if we are to have an up-to-date and proper shore equipment for our fleet, which is as vitally necessary as the fleet itself, we would be compelled to replace the ancient and dilapidated structures at Norfolk, many of them built before the Civil War, with buildings fitted for modern machinery at the earliest possible moment.

Realizing this, the department, after the most careful investigation, and remembering always the necessity for the most strict economy, has prepared plans for the development of the yard. These plans include a new building for the ship-fitters' shop, located near the dry dock, and containing bays for the boiler shop, blacksmith shop, sheet-metal and pipe-fitting shop, and mold loft. All of these shops at present are so ill fitted for their purpose as to make the cost of work at Norfolk greater than it should be, and merely as an economical proposition proper shops would pay for themselves many times over. It would be the most foolish kind of penny-wise and pound-foolish policy to attempt the erection of a mere temporary shed of the same kind to replace the building destroyed by fire.

The appropriation asked for is extremely moderate when the facilities that it will afford are considered; and it is obviously wise, now that the immediate necessity of some kind of a ship-fitters' shop has arisen, to erect at the same time the permanent building designed for that purpose and which is to include the other obsolete shops, so that the general plan for a proper yard at this point can be carried out. Therefore I feel sure the Congress will not hesitate to include the appropriation.

In addition to this amount, an amount of $50,000, to be immediately available, has been asked for to cover the salvage of the tools partially destroyed or seriously injured by the fire. I trust you will urge upon Congress the importance of the construction of this building, which is as much needed if we desire real preparedness, as new ships, and which, owing to the fire, can not be longer delayed.

Very truly, yours,

FRANKLIN D. ROOSEVELT,
Acting Secretary of the Navy.

Hon. E. E. HOLLAND, M. C.,
House of Representatives.

Mr. MANN. Mr. Chairman, will the gentleman yield for a question?

Mr. PADGETT. Yes, sir.

Mr. MANN. What is now being built at this navy yard?

Mr. PADGETT. Vessels; I think they are set out in the report, but I could not tell the gentleman offhand.

Mr. MANN. Well, the Secretary says a destroyer, which can not be completed owing to the lack of this building, and that it is very necessary to have this building in order to get an early completion of the destroyer. What I wanted to ask was, in view of the fact that this building is to cost a million dollars and that only $400,000 of that is to be used next year from next July, when do they expect to start the work again on that destroyer?

Mr. PADGETT. I do not know of any other, except that one destroyer.

Mr. MANN. Very well; then they will not commence work on that destroyer again, according to the Secretary's letter, for two and a half years. Does anybody call that speeding up? What they need over there in the Navy Department is some kind of a logician, so as not to mix their dates and say they want to build a building in order to finish a destroyer hurriedly, and then only propose to appropriate two-thirds of the cost of the building to be used for the next year and two months. That is neither logic nor sense.

Mr. MOORE of Pennsylvania. Mr. Chairman, I desire to speak on the amendment. I wish some one would tell us when this fire at Norfolk took place.

Mr. HOLLAND. The 18th of May.

Mr. MOORE of Pennsylvania. Of the present year?

Mr. HOLLAND. Yes, sir.

Mr. MOORE of Pennsylvania. Mr. Chairman, I wish to express my great pleasure at being able to indorse a proposition that comes from Norfolk, even though it comes at an unusual time and under extraordinary circumstances, when other propositions that ought to be taken care of are not provided for in this great bill.

I am glad also to observe that the Secretary of the Navy has such a fine regard for details at this particular juncture as to send us a letter three or four pages in length about the necessity for this million-dollar building at Norfolk, although the chairman of the committee admitted yesterday that the building burned at the Philadelphia Navy Yard three of four years ago has not yet been restored. It must be a matter of a great deal of satisfaction to all to see how gentlemen who are in power take care of their own.

The Speaker of the House, in the discussion of the flood bill the other day, indicated that the time had come for good Democrats to take care of their own, and it is wise in this day and generation of power, perhaps, that they should take care of their own. I am inclined to agree somewhat with the gentleman from Kentucky [Mr. THOMAS] that to the "victor belong the spoils," and that while the spoils hold out we who have the power ought to go out and get the spoils.

Now, here is an opportunity under the stress of preparedness to replace an old burned building that was worth a few thousand dollars by one that is to cost a million dollars. You are going to do it in order "to speed up the Navy" by appropriating $400,000 now, but you are smart enough to provide that you shall get the remaining $600,000 from some other administration. You are taking care of your own and you are doing it while you are in power. I think it is best that you should do it now, lest the chance may not come again.

Now, everything the Secretary says about the Norfolk Navy Yard is substantially true. It is a splendid navy yard. It does have some old and dilapidated buildings that antedate the Civil War. That is true, and there ought to be a reconstruction of some of those buildings, but it is true also that the Secretary of the Navy has been familiar with this fact since he has been in power, for he has not overlooked other improvements at the Norfolk Navy Yard.

However, I am for it. I want to see the yard built up. Geographically it is one of the most important naval stations along the Atlantic coast. I hope it will be restored to great power and usefulness as a navy yard, and I hope you will continue to build it up under this present administration, so that it will be all ready for us when we come back into power next year. I want to indorse my friend from Virginia [Mr. HOLLAND], who has been active in getting this appropriation. We of other yards have not been able to get letters like this for similar projects. We were not able to get letters for projects in the rivers and harbors bill even from the President. So, let the good work go on while you have the power. The letter-writing plan is a good one. Evidently somebody got a letter to put the Cooper River into the naval bill. You remember we could not get it into the rivers and harbors bill. It was all booked to go into the rivers and harbors bill, but there was a hitch somewhere. It was left to the gentleman from South Carolina [Mr. WHALEY] to find a way, just as love is sure to do, and $175,000 for the sole purpose of dredging a river goes smoothly into the naval bill. No wonder the gentleman from Tennessee [Mr. PADGETT], the able chairman of this committee, prefers to move under a rule that prevents points of order against any paragraph in his bill. No wonder gentlemen want to agree to have no debates in the House but their own, when these matters, based upon departmental letters, are covered in their bill.

Mr. Chairman, I am for this appropriation in Norfolk. I am glad they got it. I am glad the Secretary saw the necessity for it, and I compliment the gentleman from Virginia for his activity in that regard.

Mr. PADGETT. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto close in three minutes.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent that all debate on the pending amendment be closed in three minutes, two minutes to go to the gentleman from Michigan [Mr. KELLEY] and one to the gentleman from Illinois [Mr. BRITTEN]. Is there objection? [After a pause.] The Chair hears none. The gentleman from Illinois is recognized for one minute.

Mr. BRITTEN. Mr. Chairman, I hope this amendment will prevail. It is up to the House to develop that yard in every way possible. It is one of the few very good yards in the naval service. I want to call to the attention of the House the suggestion in the Secretary's letter regarding this amendment as being as important to the service as two battleships would be. That side of the House defeated the two-battleship amendment on the floor of the House. I suppose that my good friend from Virginia [Mr. HOLLAND] brings in this amendment in lieu of the two battleships that you gentlemen kept out of this great national-defense bill. You all appear willing to appropriate in special directions on land, but you are equally strong against appropriations for the sea.

Mr. KELLEY. Mr. Chairman, the navy yard at Norfolk is one of the most important navy yards on the Atlantic coast. It is particularly important because of the fact that from Norfolk south there is practically no yard where large ships of the Government can be repaired. For a good many hundred miles from Norfolk, clear around to the South as far as New Orleans, we have no yards at which there is a dock large enough to take care of the dreadnaughts of the fleet.

Now, it has been said a good many times by military experts that probably if we ever have a naval war it is more than likely that it will take place somewhere in the Caribbean Sea, near the entrance of the Panama Canal. Norfolk would be the nearest yard in which ships disabled in such a battle could be repaired.

Now, we have put in this bill an appropriation for another dock at Norfolk. The old yard there is not adequate and should be thoroughly reorganized and built up around this new dock which we are going to put in. This building, to replace the one recently burned, can be added in harmony with the

new plan for grouping buildings at the Norfolk yard. The buildings are old, the machinery is old, in the Norfolk yard, and the Government should at the earliest possible moment take such steps as will make it one of the leading yards of the country. And I hope the amendment to erect this building will prevail.

The CHAIRMAN. The Chair understands the gentleman from Tennessee [Mr. PADGETT] asks unanimous consent to withdraw an amendment offered yesterday and offer in lieu thereof——

Mr. MANN. That was agreed to this morning.

Mr. PADGETT. That was agreed to, as I understand.

The CHAIRMAN. The question, then, is on the amendment offered by the gentleman from Tennessee.

The question was taken, and the amendment was agreed to.

Mr. PADGETT. Mr. Chairman, I want to correct some totals. On account of the hospital amendment and this amendment it makes it necessary to correct the totals.

The CHAIRMAN. The gentleman from Tennessee offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 21, line 17, strike out "$792,000" and insert "$1,142,000."

The amendment was agreed to.

The CHAIRMAN. The Clerk will report the next amendment offered by the gentleman from Tennessee.

The Clerk read as follows:

Page 29, line 6, strike out "$6,674,975" and insert "$7,124,975."

The amendment was agreed to.

The Clerk read as follows:

Page 32, line 25, strike out "$859,500" and insert "$884,500."

The amendment was agreed to.

Mr. MOORE of Pennsylvania. Mr. Chairman, I have 15 or 16 amendments. I ask unanimous consent that I may present them seriatim under the five-minute rule.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. MOORE] states that he has 15 or 16 amendments.

Mr. BRITTEN. I object, Mr. Chairman.

The CHAIRMAN. The gentleman from Illinois [Mr. BRITTEN] objects. The Clerk will report the first amendment offered by the gentleman from Pennsylvania [Mr. MOORE].

The Clerk read as follows:

Amendment by Mr. MOORE of Pennsylvania: "Page 11, line 6, after the word 'California,' in line 5, strike out the word 'namely'; also, on the same page, line 24, after the word 'Island,' strike out the word 'namely.'"

Mr. MOORE of Pennsylvania. Mr. Chairman, I ask unanimous consent that I may proceed for 20 minutes.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to proceed for 20 minutes. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

Mr. MOORE of Pennsylvania. Mr. Chairman, we have reached a point in our parliamentary procedure in the House where attention should be called to what we may term "government by rule"—the constant changing of the existing rules by which we are supposed to be governed in the House to suit the convenience of the party in power, whatever that party may be. Instead of following the regular rules which we have laid down for our guidance here, we have recently come to be governed by special rules, brought in without notice on special occasions, for special purposes, to the great prejudice of the order of the House and of every working Member who desires to do his full duty by his constituents and the country, and, I may also add, to the prejudice of our Government, since much of the legislation that slips through the House by reason of special rules and the lack of interest of Members, because of their knowledge of the power and effect of special rules, is a reproach to the Government.

I want to enter my protest against this tendency to "government by rule" or even by unanimous agreement. As one Member of the House I am inclined to feel that the power of the individual Member should be exercised more often than it is with respect to these special rules and agreements made for the conduct and operation of business without previous notice.

What is the present situation? We have a rule here, under which the Navy bill is being crowded through, more drastic than any rule brought in within my knowledge. It puts it within the power of 21 men to practically control the business of the House; not that those 21 men are not efficient or are themselves to be unduly criticized, but that this special-rule practice if continued will ultimately put all power in one committee, or in any small group of men, to transact the business for the entire body of 435 Members.

I protest not only against this kind of "government by rule," but I protest also in favor of the right of the individual Member to be heard, whether he happens to be upon the committee bringing in a bill or not. I have no personal interest in anything in this bill, of course, but the people whom I represent have, and it is important that their Representative should have his right to speak for them preserved. In effect, all Members not upon the committee have been barred from offering amendments to the bill until the last few hours. Under the special rule, or the agreement, committee amendments have had precedence for five days. Observe how anomalous this is. The chairman of the committee, the gentleman from Tennessee [Mr. PADGETT], who, by the rule and partly by an agreement, entered into between himself and the minority members of the committee, holds the floor and the power here, comes from a district where no ships are built and where the Navy does not penetrate, while I, who have been thus far denied the right to offer amendments, come from a district bordering a river upon which we build the greatest number of the ships of the navy, as well as of merchant ships, and where we produce most of the workmen and material; but up to the present time, five days having been devoted to general debate and to amendments coming solely from the committee, the minority and the majority side alternating, there are but two hours left in which I or other individual Members of the House of 435 in number, may have an opportunity to offer an amendment or be heard on any proposition under the five-minute rule. With a number of gentlemen waiting to offer amendments and others desiring to discuss them, it is apparent the rule will foreclose some of them.

Now, I have great respect for the members of this committee on both sides, but I submit that being upon a committee, sitting as this committee has done, apart from the House, for four months, saturating itself with the business that comes before it, commendable and laborious as that may be, does not give the committeeman the exclusive right to dispose of the public funds or to come upon this floor and absorb all the time for discussion, taking away from the great mass of Members their right to be heard upon questions vitally affecting their constituents.

Although this committee has been in session three or four months, taking an enormous amount of testimony, hearing the statements of admirals for and admirals against the provisions of the bill, it was still divided when it came upon the floor. Under the special rule it practically ignored the Members of the House but went on fighting the battle over again here just as it must have done in the committee room. It seems to me that we are the judges of these committees when they come upon the floor. After they have had a fair chance to present their case on either side there should be an opportunity for other Members of the House, who may have greater interests at stake than they have and who may look upon some of their findings from a different viewpoint. I suppose that is a part of our business.

The gentleman from Tennessee, however, is naturally a little jealous of his bill. I admire him personally and count his friendship worth while, but he ought not to be so zealous in forcing his bill as to prevent an ordinary amendment here and there though it comes apart from the exclusive precincts of the committee room.

Is the bill subject to criticism? Yes; in many particulars. There are 50 different items that I have marked which might be the subject of inquiry upon this floor. There are items relating to Government ownership, to the expenditure of money for the erection of factories and of foundries to go into competition with private business; items for the appointment of commissions, and officials to be chosen by the President and the Secretary of the Navy, without regard to the civil-service law. I am not prejudiced in their favor.

There are provisions here which increase the power of the administrative body; they might be the subject of discussion if we could take them up separately and discuss them on the floor. But the gentlemen who operate under the rule have covered their tracks. They bring in their bill carrying an item for dredging the Cooper River in South Carolina; for these commissions and Government-owned industries to which I have referred. Why, they have even introduced some agricultural items. All these would be subject to a point of order if we could reach them, but the rule settles the business. Points of order will not lie. We must swallow all these items, including the Government armor-plate plant, because the special rule establishes their right. They may be wrong, but we have to accept them. The rule makes the point of order useless. We take the provisions without reading them separately and without amendment, and we make extravagant appropriations in special instances, because we are compelled to do it under the rule. Vote the bill up with its bad features or vote it down with the good.

There is no recourse under the rule. Hence, the ordinary procedure in this House does not prevail, and the committee becomes an autocracy which the body of the House must follow at the pleasure of the committee.

They have provided for advertising here—advertising in various forms. Why not discuss that? One of the great troubles we have with the young men who go into the Navy is that they are frequently deceived as to the kind of service they are going to perform, and the first thing we know Members of Congress are appealed to to get them released from a service which they did not comprehend. We provide for advertising here, to lure them on. It is well known that the Navy is undermanned, and the reason commonly ascribed is that we do not pay the enlisted man enough to keep him happy. Yet we are providing sums of money, and have no time for an explanation of it, to induce young men who may look at our alluring pictures, to believe they may lie under the green trees and loll upon the green grass and take life easy in foreign countries if they join the Navy. How quickly some of them are undeceived. Why not talk about this?

Here is a provision of the bill that might be considered on the floor, if we could get at it—the pay of the enlisted men. I think we should pay the rank and file in the Navy, as well as the Army, more than we do. The gentleman from Tennessee [Mr. PADGETT] was rather blunt the other day when I asked him what was the pay of the enlisted men in the Navy. He brushed it aside and would not answer. Now, I ask you gentlemen, what is the pay of the enlisted man in the Navy? One gentleman responds, "Fifteen dollars a month." Another gentleman responds, "Sixteen dollars a month." What is it? Who knows; and if it is $15 a month or $16 a month, what young man with any spirit about him is going to join the Navy and become one of Winston Churchill's groomsmen to an officer if he gets only $15 or $16 a month? [Applause.] I do not mean to be ungenerous to those in authority, for I am a firm believer in discipline, but I likewise believe in fair pay for military or naval service. If I had the opportunity I would move to make the minimum pay of the enlisted man $20 per month, but I am precluded from making that motion.

When we look at the bill and find that we are taking care of the officers, increasing the upper end of the force along the line, and that we are paying to officers substantially half as much as we pay to all the 65,000 enlisted men provided for in the Navy, is it any wonder that young men do not enlist in the ranks? Is it any wonder that the complaint goes abroad that our ships are undermanned? It might be well if we had a chance to discuss these matters, but the committee has monopolized the time.

I have not time to go into all the things suggested by this bill. I would like to have some of my amendments considered, and shall hope to save some time for them. The one I have offered is a simple one, but it shows the risk we assume in having thrust upon us here a bill of a hundred pages without the opportunity of reading it paragraph by paragraph. I challenge any 10 men in this House to rise and say that they have read this bill paragraph by paragraph. I challenge them to say whether, since the bill was read in full, without interruption, under the rule, they have been able to discuss 10 separate paragraphs apart from those that were brought in by the committee. My little amendment is of a clerical nature; it strikes out two superfluous words in the text. They would certainly have been observed if the bill had been read in the regular way. In due course I propose to offer several amendments to this bill, although I realize that the limit of time has been fixed and the hour for the guillotine to fall is near at hand.

If I get the chance, I propose to make an inquiry with regard to the Cooper River, and shall inquire why that paragraph is in the bill. I am glad it is here, but it is a dredging proposition and a subterfuge in a naval bill. The dairy business is also in the bill. There are three or four Agricultural Department items in the bill. Have you discovered them? They are there. We are also providing for specialists and experts in the naval bill, very much as we did in the Agricultural bill, to be appointed by the Secretary. We must not mention it, under the rule. We are providing a little money, not much comparatively, for preparedness camps. We might inquire about that, but there is no time. Who has discussed these questions?

Then, we are going to put up $1,500,000 for an experimental laboratory, and the people who are to be employed are to be appointed by the Secretary of the Navy. For what reason do we authorize a limit of cost of $1,400,000 for a Government projectile plant, and where is it to be located? How many men are to be employed? Who is to appoint them? What are their salaries? Is it to be done as it was in the Agricultural bill? Of course a few more officeholders will not hurt. You have created 30,000 of them in three years. Let us have a few more before you go out! Is that the idea? Is that the program? I do not know why we should not have an opportunity to discuss these things.

Then we are going to change the furlough system. How many have thought about that? One half of your trouble today is your inability to get young men out of the Navy after some of them have tired of it. You can not get them out in some instances except by purchase. Yet that furlough system is to be changed. It may be good or it may be bad, but why do we not have an opportunity to discuss it upon this floor?

Yes, gentlemen, a little claim has crept into this bill. Capt. Crapo of the United States Navy got mixed up on $360 somewhere down in Key West, Fla. If any ordinary Member had presented that claim through a bill, he would have had to go to the Committee on Claims and wait until his hair was gray before he recovered. But observe, under the rule, no point of order will hold, and Capt. Crapo gets his money in the naval bill. A short cut to justice. I congratulate the captain. I wish we could do that in other instances, but I am not surprised that gentlemen who succeed in this way under a rule do not want to have these bills discussed in the open in the same way that other bills are discussed on this floor.

Then we come to the reserves—a very important matter, but what do we know about them? We are going to have six different kinds of reserves. The boys who have yachts and those who are to march in the great preparedness parade, with the President in the lead, on foot. We are going to have six different kinds of them. Great Scot! One hundred and fifty thousand of them in New York last week; how many of them in Washington I do not know, but I do know that actual enlistments all over the United States of men equipped for real fighting have not exceeded 7,000 for the Navy since the 1st of January last. A splendid thing this reserve may be for the yachting boys who walk the upper deck of a 40-foot sloop. [Laughter.] But why does not the committee discuss it?

The bill provides that if you join this naval reserve in one form or another, the fact that you want to get a public place will not interfere. There is to be no prejudice against those who join the reserve if they apply for a public job. I want to amend the bill by suggesting that after they get a public job—and 30,000 good Democrats have been placed during the last three years—there would be no prejudice against them if they joined the reserve [laughter and applause on the Republican side], but I may not have a chance to introduce that amendment.

Now, on page 51, it is provided that the members of the naval reserve shall "be issued" a distinctive badge. I do not like that language. I want to amend by providing that members shall not "be issued," but shall "receive," a distinctive badge, and so forth. But there is no chance now, under the rule and the accompanying agreement, to make any correction of that kind.

These boys are also to get a "uniform gratuity." Whether it is a "gratuity" that is to be uniform or a gratuity that is to purchase a uniform I can not make out. [Laughter.] I do not like the word "gratuity." I want to move to strike it out. I do not think these boys are asking for charity. If they are worth anything, they would not like that term. I would strike out "gratuity" and substitute the word "allowance."

There are many other things in the bill that might be improved upon if we had a chance to read and amend it, but what is the use? We are specializing legislation by rule.

Now, as to these yachts: As I understand it, they are to be used for the naval service. The Government is going to have a chance to buy them, and it is to be left to the Secretary of the Navy, whoever he may be, to take them when he wants them, at a price. That is the proposition. We took some of them under pressure about the time of the Spanish War. Let us buy these floating batteries; they may be useful in time of peace, if we get the inside waterways where we can use them. [Laughter.]

Mr. MADDEN. Will the gentleman yield?

Mr. MOORE of Pennsylvania. If the gentleman will be brief.

Mr. MADDEN. There is a provision in the bill authorizing the Secretary of the Navy to sell the colliers and troop ships at 50 per cent of the original cost.

Mr. MOORE of Pennsylvania. The Secretary, whom I like personally, has broad powers; but we are working under a rule. I agree with the gentleman; we ought to have had a chance to discuss that.

Mr. MADDEN. The owner of the Dollar Line bought vessels for $238,000 and sold them for $1,350,000.

Mr. MOORE of Pennsylvania. This is a good time to sell to the Government. Now, gentlemen, we have heard a good deal about the plucking board, or used to, and whether it should be revoked. Have you heard about it in this bill? The officers that

they retired have all been put back in this bill. Maybe it is a good thing; but why should not we have had some explanation of it?

Do you know the President is given authority practically to take over the railroads in time of emergency and force the Government freight through? Why does not the committee let us know about this? If the President had only put an embargo on the munitions we sent into Mexico, perhaps they would not have been turned upon us to-day—but, of course, there is no opportunity under the rule to discuss that.

We are changing the limit of cost of repairs to battleships from $200,000 to $300,000 in this bill. Why do we do that? That is a pretty large sum to spend without specifications. Or am I in error about it? The committee does not say.

We are also going to spend a million dollars for propelling engines without knowing much about it. Yes; we are going into new business all along the line. Private business interests will please take notice, if Members of Congress do not, that we are quite close to Government ownership.

Oh, yes; we are also fixing up retirement before 50 years of age. Having attained 50 years myself, I would be glad to be retired at one-third of my salary. [Laughter and applause.]

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

The question is on the amendment offered by the gentleman from Pennsylvania.

The question was taken; and on a division (demanded by Mr. MOORE of Pennsylvania) there were—ayes 63, noes 15.

So the amendment was agreed to.

Mr. BYRNES of South Carolina. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment by Mr. BYRNES of South Carolina: Page 21, after line 19, insert the following as a new paragraph:

"Marine recruiting station, Port Royal, S. C.: For a new building for the naval hospital and for necessary changes in existing buildings and other equipment, $15,000."

Mr. MANN. Mr. Chairman, I reserve a point of order on that.

Mr. BYRNES of South Carolina. Mr. Chairman, I recognize that the amendment in the form in which it is offered is subject to the point of order, but I have offered it in that form because if the proposition should be voted upon upon its merits I think it ought to provide for a new building instead of an extension and improvement of the old building. I ask the attention of the Naval Committee for the reason that this proposition has not been submitted to that committee. It was not submitted to them by me for the reason that it was not called to my attention until about a week or 10 days ago. It was not submitted to them as an estimate from the Navy Department for the reason that the Secretary decided not to submit a supplemental estimate, and his original estimate had been forwarded to the Naval Committee before the matter was called to his attention.

At Port Royal, S. C., the property owned by the Government was formerly used as a disciplinary barracks. Last year the department decided to transfer the detentioners from Port Royal to Portsmouth, N. H., and they established at Port Royal the marine recruit depot. This is the only station along the Atlantic coast where marines are recruited and trained. According to Gen. Barnett, the average number of men at this marine recruit depot is 800. The hospital which was adequate when the property was used as a disciplinary barracks, with an average attendance of only 350 or 400 men, has proven entirely inadequate now that an average of 800 men are located at this place. A gentleman from my district happened to visit this property about three weeks ago, and he wrote me describing conditions as so pitifully inadequate that I wrote to the Secretary of the Navy and to the Surgeon General and asked whether or not his description was correct. Both the Surgeon General and the Secretary stated that he had correctly described the conditions, and that the only reason they had not asked the committee to furnish this appropriation to construct this hospital is that the matter was called to their attention after they had submitted their formal estimates. I want to call to the attention of this House what the surgeon in charge of the hospital at the marine depots says about the conditions:

In every direction there is lack of sufficient space.

(a) The one ward necessitates the care of medical, surgical, and venereal patients in one room.

(b) The mess hall is too small for the tables necessary to feed patients and Hospital Corps.

(c) There is no storage space for reserve supplies of beds, mattresses, tents, medical and commisssary stores, etc.

(d) There are not adequate quarters for the Hospital Corps. Four men have beds in the building and six must sleep in tents. Nor do they have sufficient bathing and toilet facilities.

(e) There are no quarters for the civilian employees who live on the grounds. They now occupy tents.

(f) There is no recreation or lounging space for convalescent patients.

(g) There is no place where an X-ray apparatus might be set up, and this is a crying need.

(h) There is no provision for disinfection of mattresses or bedding of patients ill with contagious disease or for the destruction of vermin that are constantly arriving with recruits.

(i) The dental office is too small. There is no place for men waiting their turn in the dentist's chair to remain under cover.

(k) The heating of the hospital is absolutely inadequate. Because of the lack of steam pressure we can not have steam sterilization in the operating room.

Some of these defects might be remedied in the present institution if we had another building put up that would give space for b, c, d, e, f, and g. It is understood, however, that such a building can not be erected without the specific authority of Congress. Even in such a case the hospital would still be a makeshift.

One item of prime importance must be considered during the coming summer—the heating plant. It is impossible to get a pressure of more than 10 pounds at the beginning of the hospital heating circuit from the central heating plant. The operating room is at the other end of the circuit and gets no steam at all. In winter it can not be used for operating purposes unless the steam is shut off from the rest of the station. Consequently we have had to return to the use of stoves wherever provision has been made for chimneys into which a stovepipe can be run. Should the building mentioned in the preceding paragraph be constructed, there would be still more need for an adequate steam supply. How it is to be obtained without a separate plant for the hospital I do not know.

Mr. KELLEY. Mr. Chairman, will the gentleman yield?

Mr. BYRNES of South Carolina. Yes.

Mr. KELLEY. I would like to know whether or not the naval authorities down there submitted this request to the Navy Department; and if so, what action was taken by the department.

Mr. BYRNES of South Carolina. I intend to come to that.

The CHAIRMAN. The time of the gentleman from South Carolina has expired.

Mr. BYRNES of South Carolina. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BYRNES of South Carolina. Mr. Chairman, that statement was furnished to Gen. Barnett, and he wrote me as follows, under date of May 23:

Referring to your letter of the 12th instant, concerning the construction of a hospital at Port Royal, S. C., I have the honor to inform you that I have conferred with the Bureau of Medicine and Surgery concerning the matter, and concur in the statement of the Secretary of the Navy to the effect that an appropriation of $15,000 is required for new buildings for the naval hospital at Port Royal and for necessary changes in existing buildings and their equipment.

Gen. Barnett, the Commandant of the Marine Corps, wrote me this, and here is the reason why it was not submitted to the committee:

No appropriation has been requested of Congress to cover this matter, for the reason that it was not brought to our attention until after the estimates for the current year had been sent in, nor has an estimate been obtained as to the amount of money involved in making the necessary changes. The matter has this day, however, been referred to the commanding officer at Port Royal for this information, and when it is received you will be immediately informed in the premises.

In addition to that, Gen. Barnett stated in his letter that he had visited this station and corroborated in every particular the report of the Surgeon General in charge of the marine recruit depot there. The Secretary of the Navy, in replying, stated, as did the Surgeon General, that the matter was not called to his attention until after they had submitted to the Naval Committee their estimates for the Marine Corps. He says:

It has been the intention of the department that next year's estimates should, if necessary, include an item for the improvement and enlargement of the naval hospital, and the Surgeon General believes, after careful consideration, that $15,000 would cover the cost of the new buildings to be added to those already existing, and of the few necessary changes which would be made in the present buildings and their equipment.

That brings the question to this House. The House is informed of the conditions; that one ward with eight beds is supposed to care for a body of 1,000 men; that if more than eight are sick, they are placed in tents with no facilities for heating them in the winter and no facilities for properly screening them in the summer. If the station is to be continued, and it is to be continued, because you are voting $85,000 in this bill for the maintenance of the station, then it is certainly criminal to say that we are going to invite the young men of this country to enlist in the Marine Corps, send them to this station, and if any one of them shall be so unfortunate as to become sick he is to be placed in a hospital where they have but one ward for eight men, with no provision to heat it, and no provision to properly care for them as the physician says they should be cared for. I submit the matter to the House. The Surgeon General says the appropriation is necessary now; Gen. Barnett says the appropriation is necessary now. The amount is only $15,000. It is unfair to ask a man to enlist in the Marine Corps and to tell

him, "If you get sick, you can have the consolation of knowing that the Secretary says that next year Congress will be asked to appropriate for a hospital; and if you continue sick long enough, we will appropriate $15,000 next year, the building will be erected in about 18 months, and then if you are still sick you will have the opportunity of being properly cared for. I submit that this is an imperative matter. It is better to take a part of the $85,000 provided in this bill for the improvement of some of the buildings at that station and apply it to the hospital than for any other purpose. A well man can get along, but a sick man must have care, and this great Government should not allow its recruits to be placed in a station where, according to the physician in charge, if he is sick, he can not be properly cared for. I think this is a matter that should appeal to the judgment of the Naval Committee and this House, and I confidently ask the adoption of this amendment. [Applause.]

Would the gentleman from Illinois yield for a question? I want to ask if the gentleman intends to insist on his point of order so that I may offer an amendment providing for an enlargement of the present hospital, though I think it proper that the amendment should go through in this form.

Mr. MANN. I was about to ask the gentleman whether the department had recommended it?

Mr. BYRNES of South Carolina. The Surgeon General recommended it. Gen. Barnett recommended it, and Secretary Daniels says it should be built.

Mr. MANN. To whom does he say that?

Mr. BYRNES of South Carolina. In his letter to me. I simply called it to his attention.

Mr. MANN. Does not the gentleman think the Secretary of the Navy or these officials in matters of this sort should follow the law and the rules not only of good sense but the rules of the House and communicate to the Committee on Naval Affairs?

Mr. BYRNES of South Carolina. If the gentleman will wait one second, I attempted to explain that a moment ago.

Mr. MANN. I heard the explanation.

Mr. BYRNES of South Carolina. The Secretary says the matter was not called to his attention until after the estimate was submitted for this station, and that is the reason he had not submitted it.

Mr. MANN. We adopted an amendment this morning of $400,000 to replace a building burned since this communication as read was sent in.

Mr. BYRNES of South Carolina. That is true.

Mr. MANN. It came through the proper channel, and the Navy Department wanted it and estimated for it. That was subject to the point of order, but it went through.

Mr. BYRNES of South Carolina. May I say this to the gentleman——

Mr. MANN. Does not the gentleman think if such a situation of affairs exists down there as described by the local officers, if they had done their duty and called it to the attention of the Navy Department, and if the department had considered it was their duty they would have called it to the attention of the Committee on Naval Affairs, or at least the chairman of the Committee on Naval Affairs?

Mr. BYRNES of South Carolina. I say it was his duty. I did not go to Secretary Daniels and ask him to write the chairman of the Naval Committee. I believe that if I had gone down and asked for a letter from the Secretary he would have given it, but the point I make is this: I say, in view of Gen. Barnett's letter, the Surgeon General's letter, and the local surgeon's letter, it is a matter that should appeal to the discretion of this House regardless of the fact that the Secretary says that if they will wait another year he will ask for a hospital, and to tell the men in the meantime if they continue sick long enough they will have the accommodations in 18 months, but in the meantime they must be put in tents.

Mr. MANN. The gentleman knows the House itself can not be well informed about all of these things. That is what we have a committee for, and where the Navy Department wants a thing they ought to make a request through the proper channel. The gentleman from South Carolina is not at fault. I do not know whether the Navy Department is at fault, but it is at fault if the thing is required, and they ought to have asked for it.

Mr. BYRNES of South Carolina. I agree with the gentleman, and now I submit this to the gentleman, that when the Surgeon General asks for it, when Gen. Barnett tells us from his personal supervision it is required and the local surgeon says it is required, when the Secretary does not ask for it but says it came in too late this year, but he will ask for it next year, I think it is necessary and that it must appeal to this House. We know from these statements what the conditions are. Gen. Barnett and Surg. Gen. Braisted state them. Secretary Daniels can not know anything except what they tell him. We have all the information Secretary Daniels could possibly have. He has to base his recommendation upon their statements, and they say it is necessary. He said it is necessary and he will ask for it next year.

Mr. MANN. While that is true, I served a while on a committee that dealt with lighthouses, and in the early days every year they asked for ten or fifteen million dollars for lighthouses. We would call them before the committee and they would back down nine-tenths and say they did not need it. It was asked for because somebody asked for it, and the Navy Department officials are very much the same, and under officials; they like to be accommodating.

Mr. BYRNES of South Carolina. I will say to the gentleman the only way I became interested in this is a friend of mine visited this station and called this condition to my attention, and said he did not believe it possible for this Government to maintain a hospital in the condition that was. I thought the statement was severe and I wrote the department asking for information, and in reply the Secretary said that every statement of my correspondent was substantially correct.

Mr. MANN. It ought not to depend upon whether a Member of Congress happens to know about something concerning his district. It is the duty of the Navy Department, if such a condition is called to their attention, to submit it and bring it to the attention of Congress and not depend on somebody interesting a Member of Congress.

Mr. BYRNES of South Carolina. I agree with the gentleman.

Mr. MANN. I do not say they did not perform their duty; I do not know.

Mr. BYRNES of South Carolina. But the gentleman and I agree to this: That the local physician performed his duty; that Gen. Braisted performed his duty; that Gen. Barnett performed his; and if you want to say the Secretary did not, we have a duty ourselves, regardless of the Secretary's statement that it is necessary and it should be asked for next year. Does not the gentleman think, in view of every responsible officer having charge of this matter testifying to the condition, we have a duty to perform, and in order to discharge that duty we ought to furnish a hospital to take care of these sick men now in that recruiting station?

Mr. MANN. If the statement is correct, they did not call this matter to the attention of the proper official in time for him to make the estimate——

The CHAIRMAN. The time of the gentleman has expired.

Mr. BYRNES of South Carolina. Will the committee grant me one more minute? I wish to make myself clear to the gentleman. Gen. Barnett did call it to the attention of Secretary Daniels, and the papers from which I read here are merely a memorandum, not furnished to me, but furnished by the local surgeon to Gen. Braisted and the memorandum furnished by Gen. Barnett to Secretary Daniels. Gen. Barnett wrote me, inclosing a copy of the memorandum which had been furnished.

Mr. MANN. When was that furnished?

Mr. BYRNES of South Carolina. The date is about two or three weeks ago.

Mr. MANN. But these conditions have existed for a long time.

Mr. BYRNES of South Carolina. If the gentleman will wait one second. The memorandum is dated May 4. The letter of Secretary Daniels states:

> The disciplinary barracks established there several years ago has recently been succeeded by the United States Marine Corps recruit depot, and its establishment and recent growth were of too late a date for the department to include in its estimates for the fiscal year 1917 (prepared some months ago) and definite recommendations as to the increase in the facilities for hospital care of marine recruits.

Because he had prepared his estimates for the marine depot some months ago he said that he did not include or furnish a supplementary estimate based on the memorandum furnished him some time in April.

Mr. MANN. The memorandum should have been dated last summer if the conditions existed.

Mr. BYRNES of South Carolina. Assuming that that is so, and the local surgeon ought to have done it, I submit that the gentleman ought to agree with me when Gen. Barnett corroborates the local surgeon as to the necessity of providing the hospital.

Mr. MANN. I think it would have been wiser to have the Committee on Naval Affairs examine and cross-examine to find out whether they are correct or not. I do not assume statements made by officials in that way are correct, because from experience I find many times they are not correct, but when gentlemen go up before the Committee on Naval Affairs and are examined they find out what the facts are. This is mere ex parte statement.

Mr. BYRNES of South Carolina. I submit that it is corroborated.

The CHAIRMAN. The time of the gentleman from South Carolina has expired.

Mr. MANN. I must insist on the point of order.

The CHAIRMAN. The Chair sustains the point of order.

Mr. BYRNES of South Carolina. Mr. Chairman, I wish to offer another amendment.

The CHAIRMAN. The gentleman from South Carolina offers another amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BYRNES of South Carolina: Page 21, after line 19, insert as a new paragraph the following:

"Marine recruiting station, Port Royal, S. C.: For enlarging and improving hospital and for necessary equipment, $15,000."

Mr. MANN. I reserve a point of order. I would like to have the amendment reported again.

The CHAIRMAN. Without objection, the amendment will be again reported.

The amendment was again reported.

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. CULLOP. Did not the gentleman from Illinois reserve a point of order?

Mr. MANN. I reserved the point of order, and I shall not press it.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

Mr. LENROOT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Wisconsin offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. LENROOT: Page 98, line 22, after the word "expended" insert:

"*Provided*, That not less than 44 of said 47 submarines shall be constructed upon the general design of hull and equipment of such submarines in commission prior to the date of beginning construction of said 44 submarines as the President shall find to be most serviceable and efficient."

Mr. LENROOT. Mr. Chairman, I lay no claim to having any special knowledge of this general subject All that I know about it I have gained from reading the hearings. But from such reading of the hearings I am impressed, as I think every Member of the House must have been impressed, with the fact that one of the very serious objections to the present plan of securing an adequate submarine force is that there is altogether too much experimentation; that we are building in blocks of five, six, eight, and nine submarines under one contract when we have no assurance and do not know that a single one of those will be efficient, practicable, or serviceable.

Now, by amendment, the House has provided for 50 submarines. The bill as it now stands provides that 3 of said 50 submarines shall have an approximate tonnage of 800 tons. That is for the purpose of allowing the department to experiment with the 800-ton submarines. But as to the 47 still provided for there is no restriction whatever upon the department, and they may continue in the future to build the entire 47 of a type and design that they do not know will be efficient and practicable; and the purpose of my amendment is that it will permit them to construct 3 of the 47 for experimental purposes, but 44 of the 47 must be built of the general design as to hull and equipment of those already built and in commission and tested at the time of the beginning of their construction.

Now, Mr. Chairman, the Secretary of the Navy in his testimony before the committee testified as follows, on page 3641:

We have more or less trouble with all submarines. I think that is due to two things: First, to the fact that about the time we build a submarine, and it functions pretty well, when we build the next number—say, the A submarine comes along pretty well, and then, when we order the B class, we think we want it to be better.

Mark the words:

We make the next one of larger proportions, and make three or five or seven of that type before we have tried one of them. I think we ought to standardize the best and build a number of them, and then always be building one or two or three of a larger and better type, and when that better is completed and has functioned perfectly, then give the contract for more of that perfected standard type.

And that, Mr. Chairman, is exactly what my amendment proposes, namely, to carry out this recommendation of the Secretary, which must appeal to every reasonable and sensible man. And the necessity for this amendment is that although the Secretary says he thinks it ought to be done, the fact is the department is not doing it, has not been doing it, and has been letting contracts in groups of five and six and seven, as the Secretary says, without knowing that a single one of them, when completed, will be practical, whereas they ought not to build more than a very few of such a character, and the others should be built of standard and tested types.

Mr. COX. I think the gentleman's amendment has a lot of merit, but will it not conflict with the amendment which the House put on the bill the other day requiring these submarines to be completed within a year?

Mr. LENROOT. Not in the least. My amendment provides merely that they shall be of the type prior to the beginning of the construction of these.

Mr. COX. As I understand the gentleman's amendment, he would construct one, two, or three as a standard?

Mr. LENROOT. No. I would take as the standard for these 43 those already in commission, but permit them to go on to complete 3 or 6 for a standard for the future to experiment with, but not wait for these 47.

Mr. COX. Then the gentleman would hold in abeyance the building or construction of the 44?

Mr. LENROOT. No. We already have one type in commission that we could build all of these 47 of the 450-ton type after. We could have 47 and let the contract to-morrow, because we have demonstrated that they are practical and certain.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. THOMAS. Mr. Chairman, I ask unanimous consent to address the House for 10 minutes.

The CHAIRMAN. The gentleman from Kentucky [Mr. THOMAS] asks unanimous consent to address the House for 10 minutes. Is there objection?

There was no objection.

Mr. THOMAS. Mr. Chairman, I have noticed from time to time in the newspapers that some astronomers believe that Mars is inhabited, and that the time will come when we will be enabled to communicate with the inhabitants of that planet. If an inhabitant of Mars could be transported to this Hall, or could have been here during the discussion of this bill and could have listened to the fiery and untamed warriors who have discussed this bill, and who will never enlist in any army—it makes no difference what bill may be passed—that inhabitant would be compelled to believe that the United States is now in a state of actual war with all the nations of the world.

Why, gentlemen, a great many who have discussed this bill have gotten themselves absolutely into a white heat. It was painful to hear them, and a great many of them made such contortions of countenance that I absolutely thought while they were speaking they must have the appendicitis. [Laughter.]

It reminds me of a story, all this hysteria, and it is nothing but hysteria; it reminds me of the story of two Irishmen who came from a country district of Ireland to New York. They obtained a room along the street. They never had seen any fire engines, Pat and Mike. Mike went to bed; Pat took a seat by the window to look out upon the street and see the sights. Directly a fire engine came puffing down the street, emitting smoke and sparks and fire. Pat hallooed to Mike, who had gone to sleep. He said, "Mike, wake up; wake up!" But Mike did not wake up. Directly another fire engine came down the street, emitting flames and smoke, and Pat went over to Mike and shook him. He says, "Mike, wake up; wake up! They are moving hell, and two loads have already gone by." [Laughter.]

So, gentlemen, it seems to me that these people who are so vigorously for preparedness are moving hell to get as big an appropriation as possible for navies and soldiers that this country does not need any more than a wagon needs five wheels. [Laughter.]

Now, we are a Nation over a century and a quarter old. Besides the Civil War we have engaged in four wars, and we began every one of them. No nation has ever yet attacked the United States, but the United States has begun every war that we have engaged in, and has been successful in every war through the bravery and the patriotism and the courage of the volunteer soldiers. [Applause.]

Mr. Speaker CLARK stated to you yesterday, in discussing this bill, that if any nation attacked this country we would lick it in the end. Gentlemen, I say we can do better than that; with the volunteer soldiers of this country we can do better than that. If any nation attacks us, we will lick it in both ends. [Laughter.]

We fought the Revolutionary War and all these other wars without these big armaments and great armies. This whole thing, gentlemen, in my opinion, is the result of an agitation by the most powerful, the best organized, and the best financed lobby in the history of the American Congress. We are having preparedness parades all over the country. One such parade is to be held in the Capital City of Washington, in which the school children of this city will march, you may say be compelled to march. What do they know about preparedness? You

want to teach them war, I suppose. You want to teach them how to fight.

I see many gentlemen who not two years ago were "little Army," men, were "little Navy" men, who did not believe in taxing the people of this country, as you will have to do for all of these soldiers and all these ships and all these armaments, now gone, as it were, crazy with this hysteria, and are wanting the people taxed to the limit for these purposes. Who is going to attack us? Is Germany, is France, is England, is Russia, is Austria? Oh, no. They can not. When they get through with one another over there they will be like the traditional Kilkenny cats. There will be nothing left of them but the tips of their tails, and they will not be able to attack us. It is all stuff, gentlemen.

Let me tell you, there has never yet a wave dashed so high but what it receded, and this hysteria will recede. You want all these large appropriations. What does that mean? It means taxes. Who pays the taxes? The people who labor and who produce things in this country are the ones who ultimately will pay these taxes. You can not have these things without them. That wave will recede, and you will hear from the tax-burdened people against keeping up a useless Army and Navy. [Applause.] I thank you, gentlemen.

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

Mr. DALLINGER. Mr. Chairman, I move to strike out the last word.

Mr. DUPRÉ. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. DUPRÉ. Is the amendment still pending?

The CHAIRMAN. It is.

Mr. PADGETT. I want to speak to the amendment.

Mr. DALLINGER. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Massachusetts moves to strike out the last word.

Mr. DALLINGER. Mr. Chairman, every great nation ought at all times to be prepared, for preparedness in its broadest and truest sense means the development of the nation to the highest point of efficiency in every line of human endeavor. Particularly in this great crisis of the world's history should we as citizens of the great Republic of the Western Hemisphere see to it that our country is prepared physically, intellectually, and morally to fulfill the great destiny for which it was created and for which it has been miraculously preserved throughout its history by Divine Providence. For to us has been committed the great trust of preserving and handing down unimpaired to those who shall come after us the priceless heritage of a representative democracy in the midst of the greatest test which that conception of Government has ever undergone. God grant that we may not be tried in the balance and found wanting!

The problem of physically preparing ourselves to resist any attack that may be made on us by a foreign foe is a many-sided one. It involves not only the provision for an adequate standing army supplemented by such training and disciplining of our people as will insure a sufficiently large volunteer force in case of emergency, which has been done, as many of us fear, only too imperfectly; but it also includes a complete system of coast fortifications as provided for, in part at least, by the bill reported by the Committee on Appropriations and now on the Union Calendar; and, above all, it involves the immediate construction and equipment of an up-to-date Navy, complete in all its branches and sufficiently powerful to meet and destroy either on the Atlantic or Pacific Ocean any hostile fleet that may seek to attack us before such fleet can get within striking distance of any part of our coast.

It is not my purpose to present to the House any statistics. That has already been done in the published reports of the hearings before the Committee on Naval Affairs. We who are intrusted with the appropriation of the people's money are not in a position of our own knowledge to determine what constitutes an adequate naval force or the amount of money that such an establishment will cost. We must in such matters rely upon the naval experts, who have been educated at the public expense and who have devoted their lives to a scientific study of naval matters. These experts tell us that in order to properly defend our shores against attack we ought to have two fleets, one on the Atlantic and one on the Pacific. They also tell us that at the present time we have about two-thirds of a fleet. That is the situation in a nutshell. Under these circumstances it is our plain duty to immediately appropriate a sufficient sum to provide our country with the naval establishment it ought to have.

Mr. Chairman, I am aware that there are many estimable people like the gentleman from Kentucky [Mr. THOMAS] who are opposed to any additional appropriation for military or naval purposes. I must confess, however, that I can not understand their point of view. None of these people would for one moment seriously advocate doing away with either police or fire protection in the communities in which they live, and every one of them would urge that whatever police and fire protection their respective communities have should be adequate to the needs of those communities. They take this position not because they believe in encouraging either crime or conflagration but because as good citizens they desire to prevent both of those evils. Moreover, in addition to paying their taxes for the support of the police and fire departments, they also take out burglary and fire insurance policies and cheerfully pay the annual premiums not because they expect to have their property stolen or destroyed by fire but in order that they may be reimbursed in case either or both of these catastrophies should occur. Now, precisely the same common sense and prudence that makes necessary the maintenance of police and fire departments by our municipalities, and the payment of taxes and insurance premiums by the individual citizens, demands that the Nation shall make adequate provision for the protection of the lives and property of its citizens, and if we are to continue to make any appropriation at all for the national defense, then that appropriation should be adequate for the purpose. It has been well said that the Navy is our first line of defense, and that first line should be so powerfully equipped and manned that no other nation or combination of nations will venture to attack us. And, however large the cost of providing such an adequate line of defense may seem to be, it is a mere drop in the bucket compared with the material wealth of this country, to say nothing of the priceless lives of our people and the maintenance of our free institutions which were won for us at so great a cost. In short, ordinary business prudence would demand an adequate provision for national defense even if patriotism and love of country were things of a bygone age.

Previous to the outbreak of the European war many of us believed that the dawn of universal peace was at hand and that a general conflict of all the European nations such as occurred a century ago, when this Republic was in its infancy, was impossible. The getting together of the nations at The Hague, the negotiation and ratification of numerous treaties of arbitration, and the formation of peace societies throughout the world, certainly furnished some foundation for such a belief. How rudely that belief has been shattered! Here in the twentieth century, relatively far more defenseless than we were a century ago, we are confronted with the same problems as to the rights of neutrals on the high seas that our forefathers wrestled with in the days when the Berlin and Milan decrees of the French Emperor and British Orders in Council well nigh drove our commerce from the ocean. And I wish to call the attention of the gentleman from Kentucky to the fact that then, with a peace-loving President, war came, and we paid dearly for being unprepared. Let us profit by the experience of the past.

But the construction, equipment, and maintenance of an adequate Navy, the building of a complete system of coast defenses, and suitable provision for a sufficient military force of Regulars and Volunteers, constituting, respectively, our first, second, and third lines of defense, necessary as they are, do not tell the whole story of national preparedness. They must be supplemented by the wise and systematic improvement of our great coastwise harbors; the construction of a comprehensive and scientific system of national highways; the coordination of our railroad systems and our great industrial plants; the creation of an adequate merchant marine by a wise system of Government subsidies as practiced by every other great nation; the encouragement of American agriculture and manufacturing by wise legislation, so that this great country of ours, like Germany, may be able to produce everything our people need in case of emergency; the settlement of industrial disputes by arbitration and conciliation; the effective national regulation of our great corporations; the prohibition of child labor; the establishment of a comprehensive system of vocational education as proposed by a bill reported by our Committee on Education; the suppression of vice and intemperance; in short, the systematic development not only by legislation but by the cooperation of all our educational, social, and religious forces, of a nation of industrious, efficient, happy, and Godfearing men and women prepared for any emergency that may come.

Mr. Chairman, I said at the beginning that to us had been committed the great trust of maintaining and preserving the great principles of free popular government. But in the per-

formance of that trust there is reserved to us a still greater service to mankind, and that is the welding together into one nation of men and women of every race and creed under the sun, and thus realizing the great ideal of human brotherhood that was first given to the world by the great founder of Christianity Himself. In working out this tremendous task, in the words of President Monroe, we must consider any attempt on the part of European military despotism to extend its pernicious system to any part of this hemisphere as dangerous to our peace and safety and to the peace and safety of the human race. We are a peace-loving people. We seek no quarrel with any nation. The nations of the Old World can have no war with us unless they themselves are the aggressors; but it is a duty we owe to ourselves and to humanity to be at all times prepared to resist such aggression.

In this great task of preparation let us cast aside all partisan considerations and all sectional jealousies. Let us acquit ourselves like men who realize the solemn duty of the hour—the duty that we owe to our beloved country and to mankind. [Applause.]

Mr. CALLAWAY and Mr. ABERCROMBIE rose.

The CHAIRMAN. For what purpose does the gentleman from Alabama [Mr. ABERCROMBIE] rise?

Mr. ABERCROMBIE. I ask unanimous consent to address the House for 10 minutes.

The CHAIRMAN. The Chair recognizes the gentleman from Texas [Mr. CALLAWAY], a member of the committee.

Mr. CALLAWAY. Mr. Chairman, I ask unanimous consent to address the committee for 15 minutes, in reply to these questions that have just been discussed.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to address the committee for 15 minutes. Is there objection?

Mr. DUPRÉ. Reserving the right to object, I want to suggest that opportunity to offer amendments will close at 2 o'clock, and some of us want to offer serious amendments, and it does seem that gentlemen should not take so much time at this particular juncture.

Mr. MOORE of Pennsylvania. Reserving the right to object, I want to make this statement, that I have at least 14 amendments, and they are serious amendments, to offer to this bill. There has been no opportunity to offer them up to this time. Gentlemen who voted for this rule to force upon us this sort of legislation ought to give us a chance, now that we are in Committee of the Whole, to offer our amendments.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

Mr. MANN. I thought the gentleman from Alabama [Mr. ABERCROMBIE] made his request first.

Mr. MOORE of Pennsylvania. I object.

The CHAIRMAN. Objection is heard. The Chair recognizes the gentleman from Texas [Mr. CALLAWAY].

Mr. MANN. We can not hear what the Chair says.

The CHAIRMAN. The gentleman from Texas has the floor.

Mr. MANN. Well, while he has the floor, the Chair stated that objection was made.

The CHAIRMAN. But he is entitled to speak for five minutes.

Mr. MANN. I thought the gentleman from Alabama [Mr. ABERCROMBIE] was recognized.

The CHAIRMAN. No; the gentleman from Alabama was not recognized. The gentleman from Texas is recognized.

Mr. CALLAWAY. Mr. Chairman, five minutes is no time for a man to speak on a great question.

Mr. MANN. The Naval Committee is getting all the time anyhow.

Mr. CALLAWAY. I will say to the gentleman from Illinois that I have not said a word on this bill since the general debate closed, not a word, and have not asked for time before.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. CALLAWAY. And I have been very serious about this unmitigated outrage from the beginning to the end.

Mr. MOORE of Pennsylvania. That is all I wanted the gentleman to say. He is a member of the committee and has had no chance to speak. I hated to object to the gentleman's request to have his time extended, but we are all in the same boat under this infernal rule that was passed, which prevents debate.

Mr. CALLAWAY. Nearly everything that is done in this House is "infernal," so this rule has not been out of the ordinary——

Mr. MOORE of Pennsylvania. Under the present administration that is true.

Mr. CALLAWAY. The gentleman from Massachusetts [Mr. DALLINGER], who just addressed the House, could not understand the viewpoint of the people who object to adding every amendment that in his judgment will properly prepare this country. I have been listening to these preparedness advocates and watching their parades in the different cities of the country, and reading their advertisements in newspapers for six or eight months, and I have never heard one man nor have I seen where one of them has outlined what in his judgment would prepare this country as the advocates of preparedness want it prepared.

Now, he says, we want a police in this country, and that none of us would object to the establishment of a police in the city of New York or Washington or any other place, although they object to a police in the Army and Navy. There is no comparison at all. We establish a police to keep people from disturbing the peace, to keep down difficulties. We do not establish a police in the city of New York to fight against the police in the city of Boston, and then build up the two police forces against each other and give one guns bigger and stronger and better than the other, and equip the other better than the one, and build them on the theory that ultimately they must come together. If we did it in that way, we would be considered, as we are nationally, a set of fools and dupes in the hands of manufacturers of gunpowder and guns and ships and munitions of war. That is what we are. [Laughter and applause.]

What would you think of the people of Chicago or the people from the gentleman's town, Boston, should they go to building a police force, not to keep down a crime here and a crime there, but building up the force in Boston larger than the force in Chicago, and building it bigger and stronger, and then Chicago getting additional force larger than that in Boston, and then Boston getting equipment larger than that of Chicago, and so on, with the idea of their coming against each other? What do these munition representatives ask? That we should arm and equip ourselves against England, and then England arms and equips and builds boats against us, Germany builds boats and strengthens her navy, Russia builds up against Japan, and Japan against Italy, all increase armaments of war against each other. That is no police at all.

There have been some who can not generate a thought——

The CHAIRMAN. The time of the gentleman has expired.

Mr. CALLAWAY. Mr. Chairman, I ask for five minutes more.

Mr. MANN. Reserving the right to object, can not we close debate on this amendment?

Mr. PADGETT. I want to address myself to the amendment, and I want five minutes.

Mr. MANN. It is most time to close debate on amendments, and there are several other amendments to be offered.

Mr. CALLAWAY. Mr. Chairman, I ask for 10 minutes more.

Mr. MANN. It is now only 55 minutes when the time for filing amendments ceases.

Mr. PADGETT. I only want 5 minutes.

Mr. MANN. Mr. Chairman, I ask unanimous consent that debate on this amendment close in 10 minutes—5 minutes to go to the gentleman from Texas [Mr. CALLAWAY] and 5 minutes to the gentleman from Tennessee [Mr. PADGETT.]

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois? [After a pause.] The Chair hears none.

Mr. CALLAWAY. Mr. Chairman, they say they want it as an insurance, to insure the country against war. I never heard anyone recommend an insurance company when the insurance company had universally failed. This insurance company that they propose is an insurance company that was proposed in Germany, England, France, Russia, and Japan, and what has that insurance company done in the way of maintaining peace. It is an unqualified bankrupt from the standpoint of an insurance against war. It does not keep peace; on the contrary, it has brought war, and the scientific men which munition representatives say we should listen to say it was obvious to them when the countries began competitive building that it would bring war. They have not only not kept peace but they have brought war. Insurance companies do not insure that you will not have a fire, but if you do have fire they pay the loss. But these establishments we build up grind our faces from the time we start until we conclude the building, are a continuous burden, and when they get to the war the burden only gets greater and broader, more intense, and the death and carnage wider in exact proportion as you have respectively prepared what you choose to denominate insurance. [Applause.]

They say that the experts tell us that we should have a fleet in both oceans. They did not tell us any such thing. The experts told us that it was the naval policy of every country on earth to keep their fleet together. None of them advocated that we should split the fleet and that we needed to have part of it in the Atlantic and part in the Pacific. They did tell us that they

never would split the fleet until we got so much that we would not need all of it, and then we could send a part of it to the Pacific as wholly unnecessary to operate in conjunction with the balance. England, the greatest naval power on earth, has one base of operations for her fleet. She operates it all together, and so does every other nation. You never would split a fleet in two and put a part of it in the Atlantic and a part of it in the Pacific.

These munition representatives mention another thing, and I admit that men that have no judgment about human nature could have had dreams of that sort before war broke out. A lot of fellows stood here on the floor and said that we would never have another war—that universal peace was coming. From the time Adam and Eve were placed in the Garden of Eden until this good hour human nature has never changed, and it will never change, I take it, on down the ages yet to come; but I will tell you what you can do. You can use common sense with human nature. You can bring about a general disarmament, and take a ship off for each country that is now building instead of putting a ship on for each country that is now building, and by percentages disarm the nations of the earth. They will be relatively as strong as they are now. All the tacticians say that relative strength is the thing that counts, and these nations will be in the same position, each toward the other, after they have been disarmed down to what is a mere police power, governing their immediate territories, and we will be better off from the standpoint of financial burden, better off from the standpoint of danger of attack, and better off from every conceivable standpoint of national welfare. [Applause.]

Mr. PADGETT. Mr. Chairman, I rise to speak in opposition to the amendment offered by the gentleman from Wisconsin [Mr. LENROOT]. The amendment would seek to have 44 of the 47 boats constructed after the type and like some one of the submarines we now have in commission.

Mr. LENROOT. Mr. Chairman, will the gentleman yield?

Mr. PADGETT. Yes.

Mr. LENROOT. In commission at the time of the construction of the boats?

Mr. PADGETT. I understand; but assuming that we will begin construction in a short time or in a few months, it would be existing types. In the first place, I want to call attention to the fact that there are two and only two concerns in this country that build submarines. The effect of this amendment, if adopted, might be to force all of these submarines to be given to one concern or to be constructed according to the type of one concern. They have patents that they control and that might put the Government in the position of having competition destroyed as between the two companies that construct submarines.

Mr. LENROOT. Mr. Chairman, will the gentleman yield?

Mr. PADGETT. Yes.

Mr. LENROOT. I would like to ask the gentleman what value there is in competition if one company can not build an efficient submarine to compete with another one that does?

Mr. PADGETT. They might both build efficient submarines; but one individual might take up the idea that a submarine of one type was, in his judgment, a little bit or a shade or something better than the other, and the other one would be shut out when the bids were made. It could not be made. Then the bidding would be limited to one concern.

Mr. LENROOT. The gentleman will observe that my amendment states only the general design and equipment. It does allow for and permit these shades the gentleman speaks of.

Mr. PADGETT. The gentleman says of a type.

Mr. LENROOT. General design.

Mr. PADGETT. When they take a type, that cuts out the other.

Mr. LENROOT. I do not say "type." "Design" is the word I used.

Mr. PADGETT. The design marks the type, and we have two types.

Again, the department might have almost perfected improvements in design and type that might vary from the existing type or design that is in commission. This amendment, if adopted, would preclude the adoption and the use of a type or a design or an improvement that was almost perfected at the time that they went into the work. Then, again, we do not know when the war in Europe will end. We do not know what information we will get from that source. There may be opened up to us improvements and benefits that would be invaluable. The limitations we have put in the bill as to cost and the general usefulness will be sufficient, and the department will build according to the types we have, using the improvements and the best suggestions and information available at the time.

Mr. SWITZER. Mr. Chairman, will the gentleman yield?

Mr. PADGETT. Yes.

Mr. SWITZER. Why should we authorize the construction of 50 of these particular submarines, when we do not know just what sort of submarine we want constructed?

Mr. PADGETT. I submitted that question to the House when the matter was under consideration, and the Committee of the Whole decided that we should build 50.

Mr. SWITZER. Does the gentleman not think we had better experiment with 20 first?

Mr. PADGETT. I am accepting that conclusion, and I am asking that we do not tie up and limit this to one particular thing, which may force us to put all of these boats into the hands of one or the other of these builders and shut out competition.

The CHAIRMAN. The time of the gentleman from Tennessee has expired. All time has expired. The question is on agreeing to the amendment offered by the gentleman from Wisconsin.

The question was taken, and the amendment was rejected.

Mr. SLOAN. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 77, line 26, after the word "each," insert:

"*Provided further*, That hereafter the Secretary of the Navy shall in lieu of the mental examination heretofore provided by him accept the certificate or diploma of any university, college, academy, or high school in good standing in any State, and duly accredited by the highest educational authority of such State, and in which institution of learning the course of study shall include advanced study of at least four years above the grade commonly known as the eighth grade, and wherein the passing grade for each study shall be at least 75 per cent."

Mr. PADGETT. Mr. Chairman, on that I reserve the point of order.

Mr. SLOAN. Mr. Chairman, I thank the chairman of the committee for reserving the point of order. I should be pleased if he does not make it. I think under the legislation which we now have, which can properly be called legislation by "rule and rider," we ought to have the benefits as well as the burden of the system. Well did the gentleman from Kentucky [Mr. THOMAS] refer to Mars when he was looking for a figure of speech, instead of selecting Neptune as the god or planet properly to be referred to in connection with this naval bill.

This bill covers everything except the seas. I regard its most important proposition to be the basis of the Navy, and the basis of our Navy is the academy at Annapolis. In the military bill we recognized the close relation between the public and general private school systems and the military arm of the Government. More than that the military authorities of West Point have heretofore taken in part the step which I here propose. Further, when we added 50 per cent to the number of midshipmen allowed to Congressmen I challenged attention on the floor of the House of this feature to the chairman of the Naval Committee, and made a plea in behalf of the school system of the United States, as opposed to the three or four special private institutions which propose no other function than cramming at large expense the youthful minds of Annapolis and West Point candidates. I am opposed to giving the keys to Annapolis to three or four special private institutions of this country, and for that reason I propose this amendment. [Applause.]

It is un-American, it is unfair, for us to make an appropriation which now approaches $300,000,000, and leave it in the mouths of three men who represent three institutions to say to the young men, especially those who live a great distance from Washington, if you would become a member of this great Annapolis institution pass through our doors or leave hope behind. We have in this country 567 great universities and colleges, public, sectarian, and private general educational institutions. We have high schools and academies to the number of 11,551, normal schools 235, amounting in all to 12,317. Yet it is the boast of these three or four institutions that the young men who would enter Annapolis Academy must go through their institutions or stand meager show for admission.

I have no doubt those special schools are good institutions, presided over and conducted by excellent gentlemen, but there is something more that ought to be considered. I do not know that there is anything seriously wrong. But the permission of this condition of affairs to continue is a direct indictment against the advanced public, sectarian, and private school systems of the United States.

Mr. SMITH of Michigan. Will the gentleman yield?

Mr. SLOAN. Briefly.

Mr. SMITH of Michigan. Can the gentleman tell why they will accept a certificate at West Point which they will not accept at the Naval Academy?

Mr. SLOAN. I asked the chairman of the committee on a former occasion in this House why they did not and would not do that. I thought that probably this Naval Committee, legislating, as it is, by "rule and rider" to the extent it is, would

attempt to liberalize the admission to the academy and connect the American school system with the American Navy.

Mr. BROWNING. Will the gentleman yield?

Mr. SLOAN. For a brief question.

Mr. BROWNING. I desire to say to my friend from Michigan [Mr. SMITH] that, in my opinion, I do not think this is by legislation. It is by regulation of the department and not by legislation.

Mr. SLOAN. It is by regulation, and that is why I submit this amendment, which would require the head of the Naval Department to accept in proper cases the certificates or diplomas of standard or leading educational institutions of this country.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SLOAN. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Nebraska asks unanimous consent to proceed for five minutes. Is there objection?

Mr. MANN. Will debate then be closed?

Mr. PADGETT. I shall make the point of order at that time.

Mr. LINTHICUM. Mr. Chairman, reserving the right to object, I would like to say I have been waiting for several days to get five minutes, and I have not been able to get a minute. I do not want to be mean about this thing, but I do think we ought to have a chance.

The CHAIRMAN. There is a request for unanimous consent pending. The gentleman from Nebraska asks unanimous consent that he may proceed for five minutes.

Mr. MANN. Mr. Chairman, I ask unanimous consent that all debate on this amendment close at the end of five minutes.

Mr. PADGETT. I am going to make the point of order. I have reserved the point of order and it is subject to the point of order, and I will make it at the end of five minutes.

Mr. DOWELL. Mr. Chairman, I desire to ask the gentleman a question.

Mr. SLOAN. I yield briefly.

Mr. DOWELL. Is it not true that at West Point any high-school graduate is admitted?

Mr. SLOAN. No; that is not technically correct. They do accept——

Mr. DOWELL. They are accepted at West Point.

Mr. SLOAN. West Point does accept school grades under certificate or diploma from certain schools which come under the designation of the proposed amendment as applying to Annapolis.

Mr. DOWELL. Does this amendment correspond to the admission to West Point?

Mr. SLOAN. Not precisely. I desire to say that in February, 1915, 268 young men took examinations——

Mr. CLINE. Will the gentleman yield?

Mr. SLOAN. I do.

Mr. CLINE. Is there any affiliation of high schools connected with West Point, or schools recognized as——

Mr. SLOAN. They do recognize certain schools; yes.

Mr. CLINE. But not to pass a student out of the high school into the academy. The Adjutant General told me this morning that there are no recognized high schools from which a graduate was admitted to West Point, except upon an examination and the option of the party having charge.

Mr. SLOAN. I have spoken of the rules of admission briefly, and they are accessible to all. The following is a statement of the rules of admission to West Point by other than the "examinations." These rules are now in force:

Par. 65. Admission by certificate: The academic board will consider and may accept in lieu of the regular mental examination:

(1) A properly attested certificate (Form I) that the candidate is a regularly enrolled student in good standing, without condition, in a university, college, or technical school accredited by the United States Military Academy, provided that the entrance requirements of the course he is pursuing require proficiency in subjects amounting to not less than 14 units of the list given below.

If attendance at college extends over a semester, a full record of academic work at the college, giving subjects taken and grades attained in each, must accompany the certificate; if attendance at college extends over less than a semester and the candidate was admitted to college by certificate, a certificate (Form II) from the preparatory schools, giving a full record of studies taken and grades attained must accompany the college certificate. If a scrutiny of the certificate submitted shows low grades the certificate will be rejected.

A certificate indicating enrollment in or admission to an institution at any other time than that specified in the college register for regular admission or enrollment will not be accepted.

(2) A properly attested certificate (Form II) that the candidate has graduated from a preparatory school or public high school accredited by the United States Military Academy, provided that he has in his school work shown proficiency in subjects amounting to not less than 14 units of the list given below.

If a scrutiny of the certificate submitted shows evidence of low grades or of graduation at an irregular date, the certificate will be rejected.

(3) A properly attested certificate (Form III) from the college entrance examination board that the candidate has shown proficiency in the examinations set by the board in subjects amounting to 14 units from the list given below. If a scrutiny of the certificate submitted shows low grades, the certificate will be rejected.

In the February, 1915, examinations there were 268 young men examined for Annapolis. Of these a total of only 95 passed. Of these, 51 came through three privately conducted special schools, all located at Annapolis or Washington. From the more than 12,000 schools of the United States outside of these, as well as numerous private tutors, there were left just 44 to enter. In April, 1915, there were 620 young men examined. Of these only 200 passed, and of those who passed 93 came through three schools, leaving 107 for all the other schools and tutors of the United States. In February, 1916, the total number examined for Annapolis was 1,216. The total number passed 452. Number passed through these three special schools 160, leaving 292 only from the body of the country. In April, 1916, examinations there were 227 examined, 99 passed 128 failed. Of those passed, 42 were from the three special schools, all others 57. Taking total number examined in 1915 and 1916, to wit, 2,331; total passed, 842, or 36 per cent, or about 3 out every 8. Of those drilled at the three special schools and examined, about 85 per cent passed, or about 6 out of 7. Of those from all other schools, public, sectarian, private, as well as from private tutorship, about 25 per cent examined passed, or about 1 out of 4. Hundreds of State and sectarian universities, numerous colleges, public and private, doing excellent work in the cause of advanced education, thousands of public high schools, supported by State and local taxation, which enable young men to obtain a liberal education while under the home rooftree, all of no avail; the mental sausage mill with a compilation of former questions and problems submitted, with perhaps a discernment of weight given to slight errors, and the gravity extended special forms of expression by examiners heretofore and now can boast that they can give three or more chances for success to one if preparation be made in any branch, public, private, or sectarian, of our excellent educational systems. And all this in the face of the fact that the country is looking to our educational institutions, great and small, for the larger number of our accomplished officers and trained and disciplined men for our national defense. Yet the gentleman who heads the Naval Committee says he proposes to make the point of order. I admit that it is subject to the point of order just as a large part of this whole naval bill would have been subject to the point of order had it not been for a special rule; yet if the gentleman who heads this committee desires to make that point of order against the school system of the United States and in favor of three privately conducted special institutions, let him do it and take that responsibility. Yes, this amendment is subject to a point of order, to wit, that it is new legislation proposed on an appropriation bill. But for the "rule and rider" system used in this bill, the armor-plant provision of this bill must go out, and accompanying it many other provisions, including many millions of dollars appropriated, which would make the bill look more like a real naval bill and less like a combination of public-building and river and harbor measures.

The young men of the United States in the body of the continent, coming, for instance, 1,000, 1,500, or 2,500 miles to be examined, do so at a large expense. The ordinary boy who is ambitious to become an admiral in the Navy later on has not the means, and sometimes does not have a friend who will send him here to Washington or Annapolis at large expense.

Mr. HILL. You do not propose to cut off the examination that is held now, but simply to add the certificate?

Mr. SLOAN. Simply to add the certificate; that the Secretary of the Navy and those under him shall have the power to do it.

Mr. HILL. There are a lot of boys who could not afford four years in high school and college, but who should have the chance to stand on such preparation as they could get otherwise.

Mr. SLOAN. My purpose is not to cut off any opportunity. I would like to extend it to the tens of thousands of boys and young men in the United States who are attending some branch of our school system throughout the United States, so that our American Naval Academy would be regarded as a public and national institution and not a local affair to be patronized and taken advantage of only by those who by reason of their nearness can take the chance of coming down here for their examination or attendance at school. So far as I am concerned, I do not think that any special private school during the few months it has the young man under its control can make a great

seaman or do much toward developing a naval officer. [Applause.]

The CHAIRMAN. The time of the gentleman from Nebraska [Mr. SLOAN] has expired.

Mr. SLOAN. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. PADGETT. Mr. Chairman, I make a point of order against the amendment offered by the gentleman from Nebraska [Mr. SLOAN].

The CHAIRMAN. The Chair sustains the point of order.

Mr. LINTHICUM. Mr. Chairman, I ask unanimous consent to address the committee for five minutes.

The CHAIRMAN. The gentleman from Maryland asks unanimous consent to address the committee for five minutes. Is there objection?

Mr. MOORE of Pennsylvania. May I ask the gentleman if he is going to offer an amendment.

Mr. LINTHICUM. I do not intend to offer an amendment.

Mr. MOORE of Pennsylvania. You want to speak to the bill for five minutes?

Mr. LINTHICUM. For five minutes; that is all.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. LINTHICUM. Mr. Chairman, I have heard a great deal said in this committee about the hysteria in the country for preparedness; and some seem to think it will not last. I do not agree with this view. I know that the people of this country will never feel safe again until there is provided and maintained an adequate Army and Navy and a large reserve force. I wish to say to the committee—and I do not propose to take many minutes in saying it—that I have always stood for a large Army and a very large, substantial Navy, the latter second alone to that of Great Britain. I feel that in a democratic government like ours, where the government rests with the people, it is the duty of Representatives elected by them to carry out their wishes in matters of legislation and government.

In my district the sentiment is overwhelmingly for preparedness—for very substantial preparedness—and for that reason I voted for a larger Army than the bill gives—2 additional battleships and to construct 50 submarines instead of 20. I felt then, as I do now, that I was voicing by my vote the views and wishes of my constituents.

As additional proof and to show conclusively that the sentiment is strong in my district and in the State of Maryland, and particularly in Baltimore City, I desire to call attention to a campaign the Baltimore Sun recently conducted in which it asked the people, "Are you in favor of preparedness?" The Sun stated what the War College had recommended for the Army and what the General Board of the Navy had recommended for the Navy. They also asked the people whether they were in favor of a universal military system and stated definitely the Swiss system, and in reply to that request there were 9,732 ballots cast. The total for preparedness out of the 9,732 was 8,591 and against it 781. In other words, 91 per cent of all the people who voted out, of nearly 10,000, voted for adequate preparedness in line with what the War College and the Naval Board have recommended. In the city of Baltimore they were stronger for preparedness than they were in the counties. In the city the percentage was 95 in favor of preparedness. In the counties it was 75 per cent in favor.

Now, I merely bring these figures before the committee to show the sentiment in the State of Maryland, which adjoins the capital here, as it were, and particularly in my district, in the city of Baltimore. This balloting was carried on with absolute fairness. The number of men recommended for the Army and the number of ships recommended for the Navy was distinctly stated, and the people voted with a full knowledge of what the vote stood for. Eighty-seven per cent voted in favor of a universal military system in line with the Swiss system. And you might like to know that the women voted strongly in favor of preparedness and a universal military system. Eight to one of them voted for preparedness and six to one for universal service.

Now, Mr. Chairman, I do not want to take any more time, but I ask leave to extend my remarks in the RECORD by inserting therein the articles from the Baltimore Sun to which I have referred.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. HULBERT. I would like to ask the gentleman how many people participated in this canvass?

Mr. LINTHICUM. Ninety-seven hundred and thirty-two.

Mr. HULBERT. And what percentage of the people who participated were registered voters?

Mr. LINTHICUM. The article does not state.

Mr. HULBERT. I would like to say to the gentleman——

The CHAIRMAN. The time of the gentleman from Maryland has expired.

Mr. LINTHICUM. The following are the articles to which I have referred:

ARE YOU IN FAVOR OF PREPAREDNESS?

The Sun wants to know what its readers think about national defense.

Adequate military preparedness, in the opinion of the Army War College, means a Regular Army of 281,000 men, with a regular reserve, bringing the total number of soldiers available at home at the outbreak of war up to 500,000. In addition, it thinks there should be 500,000 more men ready to take the field at the outbreak of war, with sufficient training to enable them to meet a trained enemy within three months' time. The War College proposes a program which will take eight years to organize fully an army of this size.

Adequate naval preparedness, in the opinion of the General Board of the Navy, means the construction within the next five years of 10 dreadnaughts, 6 cruisers, 10 scouts, 50 destroyers, and 67 submarines, with appropriate subsidiary craft.

The Swiss Army system, generally regarded as the model universal military system for democratic countries, requires military service of all physically fit male citizens. Each Swiss youth in his twentieth year must spend from 60 to 90 days, according to the branch of the service to which he is assigned, in a training camp. After that, for 11 years he must spend 11 days annually in camp to refresh his training. During the next 12 years he must spend 11 days each alternate year in training.

With these definitions in mind—

Are you in favor of preparedness?

Are you in favor of universal military service?

The Sun would like to know what its readers think, and to that end asks them to cut out and mark the ballot below and mail it or bring it to the Sun, Baltimore:

For preparedness	
Against preparedness	
For universal service	
Against universal service	

Name ——— ———,
Address ——— ———.

[From the Baltimore Sun, June 2, 1916.]

NINETY-ONE PER CENT VOTED FOR DEFENSE—RESULT OF THE SUN'S POLL SHOWS AN OVERWHELMING SENTIMENT FOR NATIONAL PREPAREDNESS—9,732 BALLOTS WERE RECEIVED—UNIVERSAL SERVICE A CLOSE SECOND, WITH MORE THAN 87 PER CENT—25 STATES WERE HEARD FROM—WOMEN STRONGLY IN FAVOR.

More than 91 per cent of the nearly 10,000 persons who were enough interested in the subject voluntarily to send their ballots to the Sun are in favor of preparedness for national defense, and more than 87 per cent are in favor of universal military service, most of them according to the Swiss system.

The result is perhaps as surprising to the Sun as to any others, especially the percentage in favor of universal service, for, like England, America has always heretofore been wedded to the volunteer system and very loath to adopt any form of conscription or compulsory enlistment.

About four men voted to every woman, which was rather disappointing, but the composite decision of the women was rather astonishing. They voted nearly 8 to 1 for preparedness and about 6 to 1 for universal service, and a great many of them insisted that women should be trained to do their part in case of war as well as men—that service should be really universal.

BALLOTS STILL COMING IN.

Hundreds of ballots are still being received every day, but as the averages have not differed materially at any time since the beginning, and as there is no prospect that they will, it has been decided to announce the result now.

The Sun believes that this vote is fairly representative of public opinion, at least east of the Alleghanies. It was, in the first place, entirely voluntary. No effort was made by the Sun outside of the invitation in its own columns to get any person whatever to vote, and, of course, no effort to influence any vote. The fact that nearly 10,000 should have accepted the invitation, more than half of them expending postage for the privilege, shows the widespread interest in the subject.

In the second place, a great majority of the ballots came singly or in little batches of two, three, or half a dozen. A few batches of votes came from big business houses, but it was noticeable that in these different opinions were expressed, the averages differing very little from the general averages. A few bundles of pacifist votes also came, chiefly from the counties of Maryland. There was some evidence that a little organized effort was being made on both sides, but it did not appreciably affect the result. The Sun believes that it was a spontaneous and representative expression of public sentiment.

It was remarkable how evenly the trend of opinion ran. On no single day were the votes received anything but overwhelmingly in favor of preparedness and universal service, and the same may be said of every hundred votes cast. All through the counting the averages showed surprising consistency.

VOTES FROM 25 STATES.

Votes were received from 25 States, besides the District of Columbia, and from Americans in Canada and Cuba. Among the voters were a great proportion of the most prominent men in Maryland, but the large majority of the votes came from the plain people, many of them workingmen of little education. They came from every sort and condition of men and women, the millionaire and the ditch digger, the club woman and her cook, the Sons and Daughters of the American Revolution and the Colonial Wars, and the recently arrived immigrant, from the rampant Roosevelt man and the no less earnest Wilson admirer. The electorate was remarkably representative, apparently, and that is

why the Sun is so confident that the result plainly indicates popular opinion.

The total number of votes received was 9,732. The total for preparedness was 8,591, and against it 781. The total for universal service was 8,186, and against it 1,055. This was divided as follows: Men for preparedness, 7,307; against, 572; for universal service, 6,632; against, 811. Women for preparedness, 1,644; against, 209; for universal service, 1,554; against, 244.

The votes were divided according to localities, as follows: From Baltimore and its suburbs (including all Baltimore County), 7,169; from the balance of the State, 1,542; Virginia, 375; West Virginia, 295; District of Columbia, 156; Pennsylvania, 53; North Carolina, 45; New Jersey, 22; New York, 20; Delaware, 14; South Carolina, 6; Massachusetts, 5; Michigan, 4; Alabama, 4; Texas, 2; Florida, 2; Illinois, 2; Ohio, 2; Tennessee, 2; Maine, 1; Arizona, 1; Montana, 1; Kentucky, 1; Oregon, 1; Georgia, 1; Arkansas, 1; Rhode Island, 1; Canada, 3; and Cuba, 1.

CITY STRONGEST FOR DEFENSE.

The strongest sentiment in favor of preparedness was shown in Baltimore City and suburbs, as was natural, and the strongest pacifist sentiment was disclosed in the vote from the counties of Maryland, but it did not vary greatly. In the city the vote was probably about 95 per cent in favor of preparedness, and in the counties it was fully 75 per cent, although the vote was not divided and tabulated in that way. Virginia was stronger for preparedness than the counties of Maryland and a little weaker on it than West Virginia and North Carolina. All were strongly in favor of both propositions.

The whole object of the Sun's effort to get this poll was to test public sentiment on one of the most momentous and interesting questions before the American people. The support given Henry Ford in the Middle West and the noise made by pacifists and "hyphenates" all over the country led many persons to the conclusion that Americans had become imbued with the peace-at-any-price idea; that they had lost their patriotism and become cowardly and timid and lazy and not disposed to defend their country. The Sun wanted to find out for its own and its readers' benefit. The result ought to be a conclusive answer to the question.

That every effort has been made to make the poll as absolutely fair and uninfluenced as possible and the result correctly ascertained ought to go without saying. For some reason the antipreparedness people have shown a disposition to be angry and insulting. A sample of this was received yesterday, which reads as follows:

"How much graft does the allies' American press and preparedness pay the Baltimore Sun? By what and whose authority does the Sun undertake to act as sponsor for the American Nation? Who will believe the Sun's lies in this matter?

"PATT."

As the Sun does not know who the writer is nor his address, his vote could not be counted, but a number of similar epistles have actually been registered in the pacifist result.

DOUBTERS MAY HAVE RECOUNT.

In this connection the Sun wishes to say that the ballots have been preserved, and if a respectable committee of pacifists who doubt the Sun's honesty in the matter would like to have a recount it can be easily arranged so that the committee may itself count them.

It has not always been easy to get at the exact sentiments of the voters. A good many voted in favor of the Swiss system and against preparedness. These were counted as marked, although it seemed that the vote against preparedness was the result of misunderstanding. Many voted only for universal service, and these were counted for preparedness as well. Many others voted simply against preparedness, and these were counted against the universal service as well. It was believed that in doing this the real sentiments of the voters could be best obtained.

If any very large number of ballots is received hereafter, or if they change materially the percentages as given, a supplementary announcement of the change and the results will be made, but this is not expected.

Mr. ABERCROMBIE. Mr. Chairman, I ask unanimous consent to be allowed to address the House for 10 minutes.

The CHAIRMAN. The gentleman from Alabama asks unanimous consent to address the committee for 10 minutes. Is there objection?

Mr. MOORE of Pennsylvania. Reserving the right to object—I do not intend to do so—I wish to observe that while I still have 14 amendments to introduce to this bill but 28 minutes remain which may be used for that purpose under the rule. I shall not object.

Mr. MANN. Reserving the right to object, there is still a large number of amendments which we desire to offer on this side, some of them committee amendments—that is, from the Republican members of the committee—which have been in print and which have not been offered; and there are a number of individual-Member amendments. It is quite evident that we shall not get a chance to offer them all and discuss them, anyhow, and the gentleman from Alabama [Mr. ABERCROMBIE] is such a fine gentleman that I have not the heart to object.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama [Mr. ABERCROMBIE]? [After a pause.] The Chair hears none. The gentleman is recognized for 10 minutes.

[Mr. ABERCROMBIE addressed the committee. See Appendix.]

Mr. PADGETT. Mr. Chairman, I have an amendment to correct a total, made necessary by the adoption of an amendment.

The CHAIRMAN. The gentleman from Tennessee offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. PADGETT: Page 29, line 6, strike out "$7,124,975" and insert "$7,139,975."

The CHAIRMAN. Without objection, the amendment is agreed to. [After a pause.] The Chair hears no objection.

Mr. BRITTEN. Mr. Chairman, I have an amendment I desire to offer.

Mr. MOORE of Pennsylvania. Mr. Chairman, I have a right to discuss the amendment of the gentleman from Tennessee.

The CHAIRMAN. It is too late.

Mr. MOORE of Pennsylvania. When an amendment is offered, is it not the right of a Member to discuss it?

The CHAIRMAN. The Chair said, without objection, the amendment would be agreed to, and no gentleman objected. The amendment came from the committee. It is now a quarter to 2, and only 15 minutes remain.

Mr. MOORE of Pennsylvania. That is the trouble, Mr. Chairman. But when the Clerk reports an amendment is it proper for a gentleman to rise in his place and offer to discuss it?

The CHAIRMAN. The Chair stated that, without objection, the amendment would be agreed to, and nobody objected, and the Chair recognized the gentleman from Illinois [Mr. BRITTEN].

Mr. MOORE of Pennsylvania. I submit that I addressed the Chair.

The CHAIRMAN. The time is limited.

Mr. MOORE of Pennsylvania. I realize that the time is limited. That is the trouble.

The CHAIRMAN. The gentleman from Illinois [Mr. BRITTEN] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BRITTEN: Strike out lines 23 and 24, on page 21.

Mr. BRITTEN. Mr. Chairman, I think this is the very first amendment that has been offered in the House attempting to take something out of this bill. Every amendment offered so far during the consideration of the bill has been with a view to increasing the bill. My amendment provides for striking out lines 23 and 24, which read as follows:

Dredging Cooper River, approach to navy yard, Charleston, S. C., $175,000.

Just above these two lines is a paragraph which includes $12,000 for the dredging around the navy yard, which the committee decided was really necessary. This item appropriating $175,000 was not at all considered. No hearings were held upon it, and it is an amount that was requested of the Committee on Rivers and Harbors for insertion in their bill and refused. How it got into our bill I do not know. It is ill becoming to say "I told you so," but——

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. BRITTEN. Not now. A little later, please, I shall be glad to yield. But some three or four months ago Admiral Stanford, Chief of the Bureau of Yards and Docks, came before our committee and surely opened our eyes. The last Congress and the Congress preceding that had appropriated $150,000 in each Congress, making a total of $300,000, for a berthing place for torpedo boats at Charleston. Now, experts tell us that the Charleston Navy Yard can be used to very good advantage as a base for destroyers or as a base for light-draft vessels. No expert in the history of the Charleston Navy Yard has ever said that it was properly situated, water facilities considered, for a battleship yard. The original appropriation of $150,000 was made on March 4, 1913. A few days later the honorable Josephus—the right honorable Josephus Daniels—became Secretary of the Navy.

Mr. MADDEN. Will the gentleman yield for a question there?

Mr. BRITTEN. Just a question.

Mr. MADDEN. I should like to know why my colleague uses the term "right honorable Josephus Daniels," when almost everybody whom you hear speak about him thinks he is always wrong? [Laughter.]

Mr. BRITTEN. The reason is obvious. The honorable Josephus Daniels came into office directly after March 4, and on March 7—just think of it, three days later—he started to grind out letters changing the construction of this 1,610-foot wharf for the berthing of torpedo boats and light-draft vessels, and they finally cut it down to 287 feet, but they made it 56 feet wide. Well, Admiral Stanford was asked, "Why make it 56 feet wide?" He said the department wanted it that way. What for? After two days of argument we finally got them to admit that they had changed the construction in order to make it a berthing place for battleships; and I said at that time, "Just as sure as you gentlemen are sitting here, you will see a paragraph inserted in the next naval bill"—there was no other indication of it at that time—"changing that yard from a smallship yard to a battleship yard." And here it is, $175,000. If they stop dredging for a year around the Charleston yard, they would not have any water at all. It would silt up. Now, they

have changed the berthing place from a wharf to take care of light-draft vessels to one 56 feet wide to take care of battleships. But they could not get a battleship up there, and naturally they must provide the $175,000 for this dredging project.

If this project was rejected in the rivers and harbors "pork" bill as without merit, the House can not consistently insert it now.

Mr. PADGETT. Mr. Chairman, with reference to this amendment I beg to say that the House will recollect that it was fully and thoroughly considered in the House when the river and harbor bill was under consideration, and it presented a very strong case. An appeal was made to the House, and from the temper of the House at the time I was satisfied that could it have been entertained in the river and harbor bill the House would have accepted it. There was an understanding that no new project would be taken on to the river and harbor bill and thus it could not be taken as an amendment. The Secretary of the Navy said to the committee that this was so urgent and so necessary that he hoped that the Naval Committee would report it as an item in their bill.

Mr. BRITTEN. When did the Secretary say that to the committee?

Mr. PADGETT. At one of the hearings.

Mr. BRITTEN. The matter was never considered until the last day.

Mr. PADGETT. When the Secretary was before the committee he stated that it was urgent, and he hoped the committee would insist upon it and include it in their report.

Mr. BRITTEN. I wish the gentleman would find that for me in the hearings.

Mr. PADGETT. The situation is this: We have an investment of eight or nine million dollars, as I remember it, in the navy yard at Charleston. The general part of the river out to the open sea is good except that there are two small bars and a sharp curve. It is necessary to dredge out the bars that run across the channel and also to cut a little off the bend of the obstruction so as to make it wider. That is why it is included here.

Admiral Benson wrote a letter which I inserted in the RECORD when the matter was under consideration in the river and harbor bill, calling attention to the urgency of this matter. The gentleman from South Carolina, Mr. WHALEY, fully presented the matter and explained the details, and I am sure that the House remembers it, and that it is in order to make efficient and to make serviceable and available the navy yard that we have there with an investment of seven or nine million dollars. I ask the committee to vote down the motion and retain the provision in the bill.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Illinois.

The question was taken, and the amendment was rejected.

Mr. DUPRÉ. Mr. Chairman, I offer the following amendment.

Mr. MOORE of Pennsylvania. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MOORE of Pennsylvania. Is it proper to recognize two gentlemen from the same side in succession?

The CHAIRMAN. The Chair has just recognized the gentleman from Illinois [Mr. BRITTEN], a Member on the Republican side, and has now recognized the gentleman from Louisiana on the Democratic side.

The Clerk read as follows:

Page 47, after line 9, insert a new paragraph, as follows:
"That of the naval constructors, 12 shall have the rank of captain and 12 the rank of commander: *Provided*, That promotions in rank herein provided for shall take place immediately upon the passage of this act and be effective from the date of approval thereof."

Mr. MANN. Mr. Chairman, I reserve a point of order.

Mr. PADGETT. I make the point of order against the amendment, Mr. Chairman.

Mr. DUPRÉ. Mr. Chairman, I realize that the point of order is good, and I will not press it.

The CHAIRMAN. The Chair sustains the point of order.

Mr. MOORE of Pennsylvania. Mr. Chairman, I offer the following amendment, which I send to the Clerk's desk.

The Clerk read as follows:

Page 99, line 22, after the figures "$47,366,860," insert the following:
"*Provided*, That no part of this appropriation shall be applied to the purchase in foreign countries of hulls and outfits of vessels and machinery of vessels, if the same can be procured in the United States."

Mr. PADGETT. I make a point of order against the amendment, Mr. Chairman.

The CHAIRMAN. The Chair overrules the point of order.

Mr. MOORE of Pennsylvania. Mr. Chairman, I want to appeal particularly to those Members of the House who believe in American products. This paragraph provides for the expenditure of $47,000,000 for hulls and outfits of vessels and machinery of vessels heretofore authorized, and so forth. We are told that it is the custom of the department, under certain laws that have recently been passed, to buy some supplies, particularly machinery, of foreign countries. To our very great shame it has occurred that bunting to be made into the American flag has been purchased in foreign countries. I am not going to debate this question at great length, because there are only a few minutes remaining, but the problem is, Shall we permit the Government to buy these things abroad when they can be bought at home and thus encourage American industries? Mr. Chairman, I ask for a vote.

Mr. PADGETT. Mr. Chairman, I just simply ask that that be voted down for the reason that it is very often necessary. That would prevent purchase even in case of emergency.

Mr. MOORE of Pennsylvania. Oh, I beg the gentleman's pardon. It provides only against foreign purchases where goods can be purchased in the United States.

Mr. PADGETT. It is the policy that Congress abandoned several years ago, and I see no reason why we should return to it now. I ask for a vote.

Mr. MANN. Mr. Chairman, in the minute that remains I just want to say to the Republican side of the House, as a matter of convenience, that after the vote upon the naval bill the Republican Members of the House are entitled to be absent until and including a week from to-morrow on account of the Republican convention.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Pennsylvania.

The question was taken; and on a division (demanded by Mr. MOORE of Pennsylvania) there were—ayes 105, noes 109.

Mr. MOORE of Pennsylvania. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chair appointed Mr. PADGETT and Mr. MOORE of Pennsylvania to act as tellers.

The committee again divided; and there were—ayes 146, noes 149.

So the amendment was rejected.

Mr. BENNET. Mr. Chairman, I offer the following amendment as a new section, to come at the close of the bill, which I send to the desk and ask to have read.

The Clerk read as follows:

At the end of the bill insert:
"SEC. —. Investigation concerning medals of honor: A board, to consist of five general officers on the retired list of the Navy, shall be convened by the President within 60 days after the approval of this act for the purpose of investigation and reporting upon past awards of issues of the so-called congressional medal of honor, by or through the Navy Department; this with a view to ascertain what medals of honor, if any, have been awarded or issued for any cause other than distinguished conduct by an officer or enlisted man in action involving actual conflict with an enemy by such officer or enlisted man, or by troops with which he was serving at the time of such action. And in any case in which said board shall find and report that said medal was issued for any cause other than that hereinbefore specified the name of the recipient of the medal so issued shall be stricken permanently from the official medal-of-honor list. It shall be a misdemeanor for him to wear or publicly display said medal; and if he shall still be in the Army, he shall be required to return said medal to the Navy Department for cancellation. Said board shall have full and free access to and use of all records pertaining to the award or issue of medals of honor by or through the Navy Department. The actual and necessary expenses of said board and its members shall be paid out of any appropriations available for contingent expenses of the Navy Department."

Mr. PADGETT. Mr. Chairman, I make the point of order against the amendment.

The CHAIRMAN. The Chair sustains the point of order.

Mr. BRITTEN. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk proceeded to read the amendment.

Mr. PADGETT (interrupting the reading). Mr. Chairman, enough of the amendment has been read to show that it is subject to a point of order, and I make the point of order.

The CHAIRMAN. The Chair sustains the point of order.

Mr. MANN. Mr. Chairman, I ask unanimous consent that the amendment may be printed in the RECORD in full.

The CHAIRMAN. Is there objection?

There was no objection.

The amendment is as follows:

After line 12, on page 5, insert the following:
"That there is hereby established a council of national defense, consisting of the President of the United States, who shall be ex officio president of the council, the Secretary of State, who shall preside in the absence of the President, the Secretary of War, the Secretary of the Navy, the chairman of the Committee on Appropriations of the Senate, the chairman of the Committee on Foreign Relations of the Senate, the chairman of the Committee on Military Affairs of the Senate, the chairman of the Committee on Naval Affairs of the Senate, the chairman of

the Committee on Appropriations of the House of Representatives, the chairman of the Committee on Foreign Affairs of the House of Representatives, the chairman of the Committee on Military Affairs of the House of Representatives, the chairman of the Committee on Naval Affairs of the House of Representatives, the Chief of the General Staff of the Army, an officer of the Navy not below the rank of captain to be designated by the Secretary of the Navy, the president of the Army War College, and the president of the Navy War College.

"SEC. 2. That the chairmen of the several committees of the Senate and House of Representatives herein named shall act as members of the council until their successors have been selected.

"SEC. 3. That said council shall report to the President for transmission to Congress a general policy of national defense and such recommendation of measures relating thereto as it shall deem necessary and expedient.

"SEC. 4. That said council shall meet at least once in each calendar year on such date or dates as it shall fix: *Provided*, That in time of war said council shall meet only upon the call of the President of the United States: *Provided further*, That special meetings may be called by the president of the council: *And provided further*, That the council may summon for consultation at any of its meetings any citizen of the United States, and upon request by the council the Secretary of War and the Secretary of the Navy shall order any officer of the Army, Navy, or Marine Corps to appear before the council for consultation.

SEC. 5. That for carrying out the purposes of this act there is hereby appropriated, out of any funds in the Treasury not otherwise appropriated, the sum of $20,000, to be available until expended, and to be expended upon vouchers signed by the president of the council: *Provided*, That all necessary expenses of the chairmen of committees of the Senate and of the House of Representatives, when called to attend meetings of said council when Congress is not in session, and the necessary expenses of all persons summoned shall be paid from this appropriation, upon approval by the president of the council."

Mr. PADGETT. Mr. Chairman, I move that the committee do now rise and report the bill to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. FITZGERALD, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 15947) making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes, and had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. PADGETT. Mr. Speaker, I move the previous question on the bill and amendments to final passage.

Mr. FITZGERALD. The rule provides that.

The SPEAKER. Is a separate vote demanded on any amendment?

Mr. BUTLER. Mr. Speaker, I demand a separate vote on the amendment providing for a Government armor-plate plant.

The SPEAKER. Is a separate vote demanded on any other amendment?

Mr. PADGETT. Mr. Speaker, I do not demand any.

The SPEAKER. The vote will be taken on the remaining amendments in gross. The question is on agreeing to the amendments.

The question was taken, and the amendments were agreed to.

The SPEAKER. The question is on the amendment referred to by the gentleman from Pennsylvania, providing for the construction of a Government armor plant, which the Clerk will report.

The Clerk read as follows:

On page 17, after line 14 insert as a new paragraph the following:

"The Secretary of the Navy is hereby authorized and directed to provide, either by the erection of a factory or by the purchase of a factory, or both, for the manufacture of armor for the vessels of the Navy; said factory or factories to have an annual capacity of not less than 20,000 tons of armor; to be located at a place or places approved by the General Board of the Navy, with especial reference to considerations of safety in time of war; and the sum of $11,000,000 is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to be immediately available, for the purposes of this paragraph. And if the United States owns no suitable site, or sites, authority is hereby given to acquire by purchase, condemnation, or gift such site or sites as may be necessary. The expenditures for drafting, technical, expert, and clerical assistance necessary shall be paid from the appropriation herein made.

"The Secretary of the Navy shall keep accurate and itemized account of the cost per ton of the product of such factory or factories and report the same to Congress in his annual report."

Mr. MANN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 236, nays 135, answered "present" 3, not voting 60, as follows:

So the amendment was agreed to.

The Clerk announced the following pairs:

For this vote:

Mr. DAVENPORT with Mr. BROWNE.

Mr. BARNHART with Mr. MILLER of Minnesota.
Mr. CARLIN with Mr. ANDERSON.
This vote (for armor plant):
Mr. SEARS (for armor plant) with Mr. KEARNS (against armor plant).
Mr. WALKER (for armor plant) with Mr. COOPER of West Virginia (against armor plant).
Mr. GLASS (for armor plant) with Mr. SLEMP (against armor plant).
Mr. GRAY of Alabama (for armor plant) with Mr. GRAY of New Jersey (against armor plant).
Mr. BURNETT (for armor plant) with Mr. SUTHERLAND (against armor plant).
Mr. BURKE (for armor plant) with Mr. MOSS of West Virginia (against armor plant).
Mr. FLOOD (for armor plant) with Mr. ROGERS (against armor plant).
Mr. WATSON of Virginia (for armor plant) with Mr. DYER (against armor plant).
Mr. JONES (for armor plant) with Mr. MOONEY (against armor plant).
Mr. SLAYDEN (for armor plant) with Mr. MCKINLEY (against armor plant).
Mr. HAY (for armor plant) with Mr. ANTHONY (against armor plant).
Mr. KEY of Ohio (for armor plant) with Mr. MILLER of Pennsylvania (against armor plant).
Mr. DAVIS of Minnesota (for armor plant) with Mr. PAGE of North Carolina (against armor plant).
Mr. SAUNDERS (for armor plant) with Mr. PARKER of New York (against armor plant).
Mr. GREGG (for armor plant) with Mr. STEENERSON (against armor plant).
Mr. BRUMBAUGH (for armor plant) with Mr. FAIRCHILD (against armor plant).
Mr. CONRY (for armor plant) with Mr. MCFADDEN (against armor plant).
Mr. MONTAGUE (for armor plant) with Mr. MOORES of Indiana (against armor plant).
Mr. SPARKMAN (for armor plant) with Mr. GRIEST (against armor plant).
Mr. HUMPHREYS of Mississippi (for armor plant) with Mr. MATTHEWS (against armor plant).
Mr. CANTRILL (for armor plant) with Mr. LANGLEY (against armor plant).
For to-day:
Mr. BURGESS (for armor plant) with Mr. CANNON (against armor plant).
Until further notice:
Mr. CLARK of Florida with Mr. FULLER.
Mr. OLNEY with Mr. SMITH of Minnesota.

Mr. ROGERS. Mr. Speaker, I voted "no." I am paired with the gentleman from Virginia, Mr. FLOOD, and I desire to withdraw my vote and answer "present."

The name of Mr. ROGERS was called, and he answered "Present."

Mr. CANTRILL. Mr. Speaker, I am paired with the gentleman from Kentucky, Mr. LANGLEY. If he were present, he would vote "no." I desire to withdraw my vote of "aye" and answer "present."

The name of Mr. CANTRILL was called, and he answered "Present."

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read the third time, and was read the third time.

Mr. BROWNING. Mr. Speaker, I am opposed to this bill in its present shape and shall vote against it. I therefore move to recommit the bill to the Committee on Naval Affairs with instructions to report the same back to the House forthwith with the following amendments.

The SPEAKER. The Clerk will report the instructions.

The Clerk read as follows:

Mr. BROWNING moves to recommit the bill to the Committee on Naval Affairs with instructions to report the same back to the House forthwith with the following amendments:

Page 8, line 19: Strike out the figures "$862,000" and insert in lieu thereof the figures "$904,000."

Page 8, line 24: Strike out the figures "$174,670" and insert in lieu thereof the figures "$194,340."

Page 9, line 25: Strike out the figures "$1,428,000" and insert in lieu thereof the figures "$1,638,000."

Page 36, line 21: Strike out the words "sixty-one thousand five hundred" and insert in lieu thereof the words "sixty-five thousand."

Page 36, line 22: After the first word, "men," insert the following: "and the President is hereby authorized to enlist, in his discretion, and from time to time, such additional men as the needs of the Navy may require not to exceed a total authorized strength of 82,762 men."

Page 36, line 23: Strike out the figures "$27,563,988.50" and insert in lieu thereof the figures "$28,436,488.50."

Page 37, line 8: Strike out the figures "$46,876,246.86" and insert in lieu thereof the figures "$47,748,746."

Page 67, line 9: Strike out the figures "$8,848,933.85" and insert in lieu thereof the figures "$9,088,508.85."

Page 82, line 4: Strike out the word "seven" and insert in lieu thereof the word "eight."

Page 82, line 6: Strike out the figures "$1,328,749" and insert in lieu thereof the figures "$1,377,849."

Page 88, line 4: Strike out the word "seventeen" and insert in lieu thereof the word "eighteen"; also strike out the word "seventy-two" and insert in lieu thereof the word "eighty."

Page 88, line 5: Strike out the first word "sixty-five" and insert in lieu thereof the word "seventy-four"; also strike out the second word "sixty-five" in said line and insert in lieu thereof the word "seventy-three."

Page 88, line 6: Strike out the words "three hundred" and insert in lieu thereof the words "three hundred and forty-two"; also in said line strike out the words "five hundred" and insert in lieu thereof the words "five hundred and seventy-eight."

Page 88, line 7: Strike out the first word "thirty" and insert in lieu thereof the word "thirty-seven"; also in said line strike out the words "two thousand" and insert in lieu thereof the words "two thousand five hundred and forty."

Page 88, line 20: Strike out the figures "$3,434,582.52" and insert in lieu thereof the figures "$3,509,850.52."

Page 90, line 2: Strike out the figures "$56,000" and insert in lieu thereof the figures "$59,000."

Page 90, line 25: Strike out the figures "$5,331,406.30" and insert in lieu thereof the figures "$5,458,774.30."

Page 91, line 15: Strike out the figures "$1,150,068.90" and insert in lieu thereof the figures "$1,195,068.90."

Page 92, line 5: Strike out the figures "$926,423.50" and insert in lieu thereof the figures "$996,073.50."

Page 92, line 11: Strike out the figures "$217,092.66" and insert in lieu thereof the figures "$220,692.66."

Page 93, line 13: Strike out the figures "$713,648.78" and insert in lieu thereof the figures "$810,002.78."

Page 94, line 13: Strike out the figures "$459,711.65" and insert in lieu thereof the figures "$492,156.65."

Page 95, line 3: Strike out the figures "$39,246" and insert in lieu thereof the figures "$42,246."

Page 95, line 15: Strike out the figures "$107,512" and insert in lieu thereof the figures "$121,048."

Page 97, line 7: Strike out the figures "$654,345" and insert in lieu thereof the figures "$692,845."

Page 97, line 9: Strike out the figures "$4,469,048.49" and insert in lieu thereof the figures "$4,771,133.49."

Page 97, line 16: Strike out the figures "$9,800,454.79" and insert in lieu thereof the figures "$10,229,907.79."

Page 97, line 20: Strike out the word "five" and insert in lieu thereof the word "six."

Page 97, line 25: After the word "each" insert "said battle cruisers to be constructed within 24 months from the date of signing contract."

Page 98: At the top of said page and before the words "Four scout cruisers," etc., insert a new paragraph, as follows:

"Two first-class battleships, to be of identical design in all respects as the battleships *Tennessee* and *California* authorized to be constructed in the act making appropriations for the naval service for the fiscal year ending June 30, 1916, approved March 3, 1915, to cost, exclusive of armor and armament, not to exceed $10,500,000 each; said battleships to be constructed within 24 months from the date of signing contract."

Page 98, line 1: Strike out the word "four" and insert in lieu thereof the word "six."

Page 98, line 5: After the word "each" insert "said scout cruisers to be constructed within 15 months from the date of signing contract."

Page 98, line 6: Strike out the word "ten" and insert in lieu thereof the word "twenty-eight."

Page 98, line 9: After the word "each" insert "said destroyers to be constructed within 15 months from the date of signing contract."

Page 98, line 17: After the word "each" insert "said submarines to be constructed within 15 months from the date of signing contract."

Page 98, line 20: After the word "each" insert "said submarines to be constructed within 12 months from the date of signing contract."

Page 98, line 21: Strike out the figures "$4,257,000" and insert in lieu thereof the figures "$9,387,000."

Page 99, line 3: Strike out the word "one" and insert in lieu thereof the word "two."

Page 99, line 4: Insert after the figures "$1,265,000" "said fuel ship to be constructed within 15 months from the date of signing contract."

Page 99, line 6: After the figures "$2,600,000" insert "said ammunition ship to be constructed within 15 months from the date of signing contract."

Page 99, line 7: After the figures "$2,250,000" insert "said hospital ship to be constructed within 15 months from the date of signing contract."

Page 99, after line 7, insert:

"One transport, to cost not to exceed $2,450,000; said transport to be constructed within 15 months from the date of signing contract.

"One supply ship, to cost not to exceed $2,230,000; said supply ship to be constructed within 15 months from the date of signing contract.

"One destroyer tender, to cost not to exceed $1,950,000; said destroyer tender to be constructed within 15 months from the date of signing contract.

"One repair ship, to cost not to exceed $2,600,000; said repair ship to be constructed within 15 months from the date of signing contract."

Page 99, line 22: Strike out the figures "$47,366,860" and insert in lieu thereof the figures "$73,133,852."

Page 100, line 4: Strike out the figures "$30,707,000" and insert in lieu thereof the figures "$44,196,689."

Mr. PADGETT. Mr. Speaker, I move the previous question upon the motion to recommit.

The previous question was ordered.

Mr. MANN. On the motion to recommit I ask for the yeas and nays.

The SPEAKER. The gentleman from Illinois [Mr. MANN] demands the yeas and nays on the motion to recommit.

The yeas and nays were ordered.

The question was taken; and there were—yeas 183, nays 189, answered "present" 4, not voting 59, as follows:

ANSWERED "PRESENT"—4.

Britt	Cantrill	Rogers	Slayden

NOT VOTING—59.

Anderson	Burke	Conry	Dyer
Anthony	Burnett	Cooper, W. Va.	Fairchild
Barnhart	Cannon	Davenport	Flood
Brumbaugh	Carlin	Davis, Minn.	Fuller
Burgess	Clark, Fla.	Doughton	Glass
Glynn	Kearns	Montague	Sears
Godwin, N. C.	Key, Ohio	Mooney	Sherwood
Gray, Ala.	Langley	Moores, Ind.	Slemp
Gray, N. J.	Lindbergh	Morgan, La.	Smith, Minn.
Gregg	McFadden	Moss, W. Va.	Sparkman
Griest	McKinley	Olney	Steenerson
Hay	McLemore	Page, N. C.	Sutherland
Henry	Matthews	Parker, N. Y.	Walker
Humphreys, Miss.	Miller, Minn.	Sabath	Watson, Va.
Jones	Miller, Pa.	Saunders	

So the motion to recommit was rejected.

The Clerk announced the following additional pairs:

On this vote:

Mr. GLYNN (in favor) with Mr. OLNEY (against).

Mr. BRITT (in favor) with Mr. DOUGHTON (against).

Mr. KEARNS (in favor) with Mr. SEARS (against).

Mr. SUTHERLAND (in favor) with Mr. BURNETT (against).

Mr. Moss of West Virginia (in favor) with Mr. BURKE (against).

Mr. LANGLEY (in favor) with Mr. CANTRILL (against).

Mr. CANNON (in favor) with Mr. BURGESS (against).

Mr. MATTHEWS (in favor) with Mr. HUMPHREYS of Mississippi (against).

Mr. GRIEST (in favor) with Mr. SPARKMAN (against).

Mr. MOORES of Indiana (in favor) with Mr. MONTAGUE (against).

Mr. MCFADDEN (in favor) with Mr. CONRY (against).

Mr. FAIRCHILD (in favor) with Mr. BRUMBAUGH (against).

Mr. STEENERSON (in favor) with Mr. GREGG (against).

Mr. PARKER of New York (in favor) with Mr. SAUNDERS (against).

Mr. DAVIS of Minnesota (in favor) with Mr. PAGE of North Carolina (against).

Mr. MILLER of Pennsylvania (in favor) with Mr. KEY of Ohio (against).

Mr. ANTHONY (in favor) with Mr. HAY (against).

Mr. MCKINLEY (in favor) with Mr. SLAYDEN (against).

Mr. MOONEY (in favor) with Mr. JONES (against).

Mr. DYER (in favor) with Mr. WATSON of Virginia (against).

Mr. ROGERS (in favor) with Mr. FLOOD (against).

Mr. COOPER of West Virginia (in favor) with Mr. WALKER (against).

Mr. SLEMP (in favor) with Mr. GLASS (against).

Mr. GRAY of New Jersey (in favor) with Mr. GRAY of Alabama (against).

Until further notice:

Mr. CLARK of Florida with Mr. FULLER.

Mr. CARLIN with Mr. ANDERSON.

Mr. DAVENPORT with Mr. SMITH of Minnesota.

Mr. BARNHART with Mr. MILLER of Minnesota.

Mr. SLAYDEN. Mr. Speaker, I wish to withdraw my vote, being paired with the gentleman from Illinois, Mr. MCKINLEY. The Clerk has announced the pair. I voted "nay," and I wish to withdraw that vote and answer "present."

The name of Mr. SLAYDEN was called, and he answered "Present."

Mr. ROGERS. Mr. Speaker, I voted "yea." I am paired with the gentleman from Virginia, Mr. FLOOD, and I desire to withdraw my vote and answer "present."

The name of Mr. ROGERS was called, and he answered "Present."

Mr. CANTRILL. Mr. Speaker, I am paired with the gentleman from Kentucky, Mr. LANGLEY. I voted "nay," and I wish to withdraw that vote and answer "present."

The name of Mr. CANTRILL was called, and he answered "Present."

Mr. MANN. I wish to ask for a recapitulation of the vote if the gentlemen are through voting.

The SPEAKER. The gentleman from Illinois [Mr. MANN] asks that the vote be recapitulated, and the Clerk will so proceed. All gentlemen will take their seats and refrain from conversation.

The vote was recapitulated.

The SPEAKER. The Clerk will call my name.

The name of Mr. CLARK of Missouri was called, and he voted "nay."

Mr. BRITT. Mr. Speaker, I was not acquainted with it at the time, but I understand the gentleman from North Carolina, Mr. DOUGHTON, understands that we are paired. Therefore I withdraw my vote of "yea" and wish to answer "present."

The name of Mr. BRITT was called, and he answered "Present."

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the passage of the bill.

Mr. PADGETT. Mr. Speaker, on that I demand the yeas and nays.

Mr. MANN. Mr. Speaker, pending the calling of the roll, I ask unanimous consent for a moment.

The SPEAKER. The gentleman from Illinois asks unanimous consent for one minute before the roll is called. Is there objection? [After a pause.] The Chair hears none.

Mr. MANN. I just wanted to say, Mr. Speaker, after this roll call gentlemen can leave—those who want to hurry away.

Mr. PADGETT. Mr. Speaker, at this time I desire to ask unanimous consent that all Members shall have five legislative days in which to extend their remarks in the RECORD on this bill.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that all Members shall have five legislative days in which to extend their remarks on the bill. Is there objection?

Mr. BROWNING. Reserving the right to object, Mr. Speaker——

Mr. PADGETT. Does the gentleman want it longer?

Mr. BROWNING. No. I want to ask the gentleman a question. Does that include those who have already asked for and obtained unanimous consent?

Mr. PADGETT. Yes; everybody.

Mr. BROWNING. Can they not have additional time?

The SPEAKER. The Chair will decide that. Those who have already got the right to extend their remarks can still retain it.

Mr. PADGETT. They are asking for 10 days, Mr. Speaker.

The SPEAKER. The gentleman from Tennessee changes his request and asks that all Members shall have 10 legislative days in which to extend their remarks on the bill. Is there objection?

There was no objection.

The SPEAKER. The Clerk will call the roll. Those in favor of passing this bill will answer "yea" when their names are called; those opposed will answer "nay."

The question was taken; and there were—yeas 363, nays 4, answered "present" 7, not voting 60, as follows:

YEAS—363.

So the bill was passed.

The Clerk announced the following additional pairs:

On the vote:

Mr. HUMPHREYS of Mississippi (for) with Mr. MATTHEWS (for).

Mr. FLOOD (for) with Mr. ROGERS (for).

Mr. WALKER (for) with Mr. COOPER of Wisconsin (for).

Mr. CONRY (for) with Mr. MCFADDEN (for).

Mr. STEPHENS of Mississippi (for) with Mr. LANGLEY (for).

Mr. BRUMBAUGH (for) with Mr. FAIRCHILD (for).

Mr. GREGG (for) with Mr. STEENERSON (for).

Mr. SLAYDEN (for) with Mr. MCKINLEY (for).

Mr. SAUNDERS (for) with Mr. PARKER of New York (for).

Mr. PAGE of North Carolina (for) with Mr. DAVIS of Minnesota (for).

Mr. GLASS (for) with Mr. SLEMP (for).

Mr. GRAY of Alabama (for) with Mr. GRAY of New Jersey (for).

Mr. WATSON of Virginia (for) with Mr. DYER (for).

Mr. JONES (for) with Mr. MOONEY (for).

Mr. SPARKMAN (for) with Mr. GRIEST (for).

Mr. MONTAGUE (for) with Mr. MOORES of Indiana (for).

Mr. BURGESS (for) with Mr. CANNON (for).

Mr. BURKE (for) with Mr. MOSS of West Virginia (for).

Mr. BURNETT (for) with Mr. SUTHERLAND (for).

Mr. SEARS (for) with Mr. KEARNS (for).

Mr. DAVENPORT (for) with Mr. SMITH of Minnesota (for).

Until further notice:

Mr. WEBB with Mr. MILLER of Pennsylvania.

Mr. ROGERS. Mr. Speaker, I voted "aye." I am paired with the gentleman from Virginia, Mr. FLOOD. I desire to withdraw my vote and answer "present."

The SPEAKER. The Clerk will call the gentleman's name.

The Clerk called the name of Mr. ROGERS, and he answered "Present."

Mr. MOORE of Pennsylvania. Mr. Speaker, I voted "aye." I desire to withdraw that vote and answer "present."

The SPEAKER. The Clerk will call the gentleman's name.

The Clerk called the name of Mr. MOORE of Pennsylvania, and he answered "Present."

The result of the vote was announced as above recorded.

On motion of Mr. PADGETT, a motion to reconsider the vote whereby the bill was passed was laid on the table.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. POWERS, indefinitely.

To Mr. HOWELL, indefinitely, on account of important business.
To Mr. CANNON, for 10 days, on account of illness in his family.

OREGON & CALIFORNIA RAILROAD LAND GRANTS.

Mr. FERRIS. Mr. Speaker, I ask unanimous consent to take up the conference report on the bill (H. R. 14864) to alter and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from the Central Pacific Railroad, in California, to Portland, in Oregon," approved July 25, 1866, as amended by the acts of 1868 and 1869, and to alter and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from Portland to Astoria and McMinnville, in the State of Oregon," approved May 4, 1870, and for other purposes, disagree to the Senate amendments, and agree to the conference asked for.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent to take up the conference report on the bill H. R. 14864, disagree to the Senate amendments, and agree to the conference asked for.

Mr. MANN. Is that the Oregon-California land-grant bill?

Mr. FERRIS. Yes.

The SPEAKER. Is there objection?

There was no objection; and the Speaker announced as the conferees on the part of the House Mr. FERRIS, Mr. TAYLOR of Colorado, and Mr. LENROOT.

BRIDGE ACROSS THE FOX RIVER, ILL.

Mr. COPLEY. Mr. Speaker, I ask that the bill (S. 6073) granting the consent of Congress to George Fabyan to construct a bridge across the Fox River be taken from the Speaker's table and passed.

Mr. ADAMSON. There is a similar House bill on the calendar, reported from the committee.

Mr. COPLEY. Yes. This is identical with the bill H. R. 12775, which has been reported favorably by the committee.

The SPEAKER. The Clerk will report the bill.

The Clerk read the bill as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to George Fabyan, and his successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Fox River, at a point suitable to the interests of navigation, at or near Geneva, in the county of Kane, in the State of Illinois, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. The question is on the third reading of the Senate bill.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The SPEAKER. Without objection, the House bill, H. R. 12775, of similar tenor, will be laid on the table.

There was no objection.

On motion of Mr. COPLEY, a motion to reconsider the vote whereby the Senate bill was passed was laid on the table.

DISTRICT COURT IN COLORADO.

Mr. TAYLOR of Colorado. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill H. R. 13765 and concur in the Senate amendments.

The SPEAKER. The gentleman from Colorado asks unanimous consent to take from the Speaker's table the bill H. R. 13765 and concur in the Senate amendments. The Clerk will report the bill by title.

The Clerk read as follows:

A bill (H. R. 13765) to amend section 73 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.

The Senate amendments were read.

The SPEAKER. Is there objection?

There was no objection.

The Senate amendments were concurred in.

The title of the bill was amended to correspond to the text.

LEAVE TO EXTEND REMARKS.

Mr. GRAY of Indiana. Mr. Speaker, I ask unanimous consent to extend my remarks on the subject of agriculture.

The SPEAKER. The gentleman from Indiana asks unanimous consent to extend his remarks on the subject of agriculture. Is there objection?

There was no objection.

Mr. WALSH. Mr. Speaker, I ask leave to extend my remarks on the rural-credits bill.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent to extend his remarks on the rural-credits bill. Is there objection?

There was no objection.

Mr. LIEB. Mr. Speaker, I ask unanimous consent to extend my remarks on the Agricultural bill.

The SPEAKER. The gentleman from Indiana asks unanimous consent to extend his remarks on the Agricultural appropriation bill. Is there objection?

There was no objection.

FINANCIAL RELATIONS OF THE DISTRICT OF COLUMBIA AND THE UNITED STATES.

Mr. CANTRILL. Mr. Speaker, I ask unanimous consent to present a resolution from the Committee on Rules which was unanimously agreed upon by the committee.

The SPEAKER. If it is a report from the Committee on Rules, it does not require unanimous consent.

Mr. MANN. That depends. What is the resolution?

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 229.

Resolved, That the Committee on the District of Columbia, or any subcommittee thereof which the chairman of the committee may appoint, be, and the same hereby is, empowered to investigate and inquire into the condition of the financial relations between the District of Columbia and the United States, as well as to the correctness of the books and accounts relative thereto, whether those books or accounts be kept by the United States or by the District of Columbia.

Said committee hereby is empowered, further, to examine and investigate the books and accounts of any officer or employee (past or present) of the District of Columbia, or of any other person having business dealings or transactions with the District of Columbia.

And said committee hereby is empowered, further, to inquire into and investigate the official conduct, acts, omissions, and doings of any officer or employee (past or present) of the District of Columbia.

And said committee hereby is empowered, further, to inquire into and investigate the books, accounts, and affairs of any public utility or common carrier doing business or operating in the District of Columbia, including any ice manufacturer, any market-house company or corporation, any market company, any taxicab or motor vehicle company, the Washington Terminal Co., any cold-storage or warehouse company, and any person, company, or corporation dealing in meats or other provisions in the District of Columbia.

For the purposes above set out the said committee is hereby empowered, in its discretion, to send for and compel the attendance of persons and the production of books and papers before it; and the chairman, or acting chairman, may administer oaths or affirmations.

Mr. MANN. I have no objection to that.

Mr. STAFFORD. Mr. Speaker, will the gentleman yield?

Mr. CANTRILL. I yield to the gentleman from Wisconsin.

Mr. STAFFORD. I wish to inquire whether the committee considered placing any limitation as to time on the authority that this rule vests in the District Committee? When this matter was presented to the House some time ago, I thought it was proper to have it referred to one of the committees of the House, as no time limit whatsoever was included in the resolution. This resolution, as I understand it, gives authority for all time to the Committee on the District of Columbia to make the investigations referred to.

Mr. CANTRILL. I desire to say to the gentleman from Wisconsin that when this resolution was originally before the Committee on Rules an amendment was suggested by the Committee on Rules, and that the resolution be reintroduced in the form in which it has been read by the Clerk. This was done, and there was practically no opposition or discussion of the resolution as it now stands, because it met the views of the Committee on Rules, so far as the appropriation was concerned.

Mr. STAFFORD. The gentleman's reply does not answer the inquiry that I propounded.

Mr. CANTRILL. The resolution will speak for itself.

Mr. STAFFORD. I wish to inquire whether the committee considered placing any limitation of time on the activities of the committee, so far as these investigations were concerned.

Mr. CANTRILL. The only discussion of the resolution in the Committee on Rules was what I have stated.

Mr. STAFFORD. I will ask the gentleman's personal opinion, whether he does not believe there should be some time limit on the authority of the committee, supervising these general activities.

Mr. KITCHIN. I would suggest that the authority of the Committee on the District of Columbia could not last any longer than the present Congress, because the committee itself will die with the Congress. The committee is bound to make its report to this Congress, if it makes any report at all.

Mr. CANTRILL. In the showing made by the chairman of the District of Columbia Committee [Mr. JOHNSON of Kentucky] before the Committee on Rules he showed that he had recovered for the Government of the United States something like a million and a half of dollars that had been due the Government for some time. That was the result of the previous investigation, and he stated that he was of the opinion that he could recover about a half million dollars now due the Government if he was allowed under this resolution to continue the investigation. The amount of money appropriated heretofore to make the investigation having been expended, he desired to continue it. The

appropriation will be attended to by the Committee on Accounts, and the action of that committee will have to be agreed to by the House before any money can be appropriated for the continuance of the investigation.

Mr. STAFFORD. I was under the impression that the very commendable work that the Committee on the District of Columbia had been doing——

Mr. CANTRILL. I think the gentleman from Kansas [Mr. CAMPBELL] will bear me out in the statement that all the members of the Committee on Rules were under the impression that this investigation should continue. Action on this resolution was taken over a month ago, and we have been waiting patiently to get it before the House at a time when it would not interfere with general legislation.

Mr. CAMPBELL. One question that arose in the committee about the matter was as to whether or not the resolution that was then pending before the committee was the same as the resolution under which the investigation had been proceeding before, and it was discovered that the only difference was that the resolution that was before the committee was not privileged, because it made an appropriation of some $10,000. That feature was taken from the resolution, and then the resolution stood exactly as it did under the authorization that had been made in the former Congress.

Mr. STAFFORD. If the gentleman will yield further, as I was saying, or about to say, when interrupted by the gentleman from Kentucky, from my slight investigation of this subject I understood that most of this work had been completed, and that it was not necessary to authorize the continuation of the work until the end of this Congress. I should like to inquire of my distinguished friend from Kansas whether he considered that phase of the subject, that there should be some time limit placed on the authorizations provided in this resolution?

Mr. CAMPBELL. There was no suggestion made by the chairman of the Committee on the District of Columbia or anyone else as to how long it would take.

Mr. STAFFORD. Was it understood that these people should be employed until the end of the present Congress?

Mr. JOHNSON of Kentucky. If the committee dies with the Congress, of course its authority will end at the same time.

Mr. CANTRILL. It can not continue any longer than the present Congress.

Mr. STAFFORD. I understood that the very commendable work of the distinguished gentleman from Kentucky was almost completed and could be finished before the end of the Congress.

Mr. CANTRILL. It was the view of the Committee on Rules that the Committee on the District of Columbia had done very commendable work in recovering nearly a million and a half of dollars, and that it should be allowed to continue. I am glad that it is the view of the gentleman from Wisconsin also that the work of the committee was commendable.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

On motion of Mr. CANTRILL, a motion to reconsider the last vote was laid on the table.

SENATE JOINT RESOLUTION REFERRED.

Under clause 2 of Rule XXIV, Senate joint resolution of the following title was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

S. J. Res. 137. Joint resolution authorizing the Commissioners of the District of Columbia to make special regulations for the occasion of the National Capital preparedness parade on the 14th day of June, 1916, and for other purposes incident to said parade; to the Committee on the District of Columbia.

BOY SCOUTS OF AMERICA.

The SPEAKER laid before the House the bill H. R. 755, an act to incorporate the Boy Scouts of America, and for other purposes, with Senate amendments.

The Senate amendments were read.

On motion of Mr. GARD, the Senate amendments were agreed to.

EXTENSION OF REMARKS.

Mr. FESS. Mr. Speaker, I ask unanimous consent to extend in the RECORD my remarks on the importance of public documents in Washington and the necessity of an archive building to house them.

The SPEAKER. The gentleman from Ohio asks unanimous consent to extend his remarks in the RECORD on the value of public documents in Washington and the necessity of an archive building to house them. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 28 minutes p. m.) the House adjourned until to-morrow, Saturday, June 3, 1916, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Treasury, submitting an estimate of appropriation for continuation of post-office building at New Haven, Conn. (H. Doc. No. 1188); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Secretary of the Treasury, submitting an estimate of appropriation for additional quarantine station at New Orleans, La. (H. Doc. No. 1189); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. DECKER, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 208) to regulate the interstate use of automobiles and all self-propelled vehicles which use the public highways in interstate commerce, reported the same without amendment, accompanied by a report (No. 795), which said bill and report were referred to the House Calendar.

Mr. ADAMSON, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 15955) extending certain privileges of canal employees to other officials on the Canal Zone and authorizing the President to make rules and regulations affecting health, sanitation, quarantine, taxation, public roads, self-propelled vehicles, and police powers on the Canal Zone, and for other purposes, including provision as to certain fees, money orders, and interest deposits, reported the same with amendment, accompanied by a report (No. 796), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on the Judiciary was discharged from the consideration of the bill (H. R. 15903) for the relief of the Bluff City Railway Co., damaged by collision of barge with wharf house belonging to said company, and the same was referred to the Committee on Claims.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills were introduced and severally referred as follows:

By Mr. CASEY: A bill (H. R. 16207) to establish in the Department of Labor a division to be known as a Woman's Division; to the Committee on Labor.

By Mr. SHERLEY (by request): A bill (H. R. 16208) designating the American mountain laurel the national flower of the United States; to the Committee on the Library.

By Mr. WHEELER: A bill (H. R. 16209) authorizing the Secretary of War to donate condemned cannon and balls; to the Committee on Military Affairs.

By Mr. MEEKER: A bill (H. R. 16210) to establish a station for the study of the mentally handicapped children in the schools; to the Committee on Education.

By Mr. HICKS: A bill (H. R. 16211) to authorize the purchase of a site for a public building at Flushing, Long Island, N. Y.; to the Committee on Public Buildings and Grounds.

By Mr. GRAHAM: A bill (H. R. 16212) to confer jurisdiction on the Court of Claims; to the Committee on the Judiciary.

By Mr. HEATON: A bill (H. R. 16213) authorizing the Secretary of War to donate to the borough of New Philadelphia, Schuylkill County, in the State of Pennsylvania, three bronze cannon or fieldpieces; to the Committee on Military Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. ANDERSON: A bill (H. R. 16214) granting a pension to James A. Shequin; to the Committee on Invalid Pensions.

By Mr. ASHBROOK: A bill (H. R. 16215) granting a pension to Margaret Perry; to the Committee on Invalid Pensions.

By Mr. COLEMAN: A bill (H. R. 16216) granting a pension to Anna K. Rhoades; to the Committee on Pensions.

By Mr. CULLOP: A bill (H. R. 16217) granting an increase of pension to Francis Ham; to the Committee on Invalid Pensions.

By Mr. EAGAN: A bill (H. R. 16218) for the relief of Philip Schmidt; to the Committee on Military Affairs.

By Mr. FIELDS: A bill (H. R. 16219) for the relief of William Harold Kehoe; to the Committee on Military Affairs.

By Mr. GARDNER: A bill (H. R. 16220) for the relief of First Lieut. Albert K. C. Palmer, United States Army; to the Committee on Claims.

By Mr. GOOD: A bill (H. R. 16221) granting an increase of pension to Eleanor F. McKeen; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16222) granting an increase of pension to Alexander B. Sloan; to the Committee on Invalid Pensions.

By Mr. KENNEDY of Rhode Island: A bill (H. R. 16223) granting a pension to George H. Cheek; to the Committee on Invalid Pensions.

By Mr. KREIDER: A bill (H. R. 16224) granting an increase of pension to J. Harrison Rennard; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16225) granting an increase of pension to Peter Hauer; to the Committee on Invalid Pensions.

By Mr. LAFEAN: A bill (H. R. 16226) granting an increase of pension to Leah Snyder; to the Committee on Invalid Pensions.

By Mr. McCRACKEN: A bill (H. R. 16227) granting a pension to William H. I. Lorton; to the Committee on Invalid Pensions.

By Mr. McKINLEY: A bill (H. R. 16228) for the relief of Edward N. McCarty; to the Committee on Claims.

By Mr. MAHER: A bill (H. R. 16229) granting an increase of pension to Mary Power; to the Committee on Invalid Pensions.

By Mr. SHERLEY: A bill (H. R. 16230) granting an increase of pension to Leila O. Eldridge; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16231) granting an increase of pension to Harriet Cardwell; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16232) granting an increase of pension to Prudence Metcalf; to the Committee on Pensions.

Also, a bill (H. R. 16233) granting an increase of pension to Mary K. Peterson; to the Committee on Invalid Pensions.

By Mr. STEELE of Pennsylvania: A bill (H. R. 16234) granting a pension to Lottie Beeman; to the Committee on Invalid Pensions.

By Mr. WILSON of Florida: A bill (H. R. 16235) granting a pension to Ethel Maura Robards; to the Committee on Pensions.

By Mr. SLEMP: A bill (H. R. 16236) granting an increase of pension to Joseph L. Bostwick; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ASHBROOK: Evidence to accompany House bill 14672, for relief of Mary Ladd; to the Committee on Invalid Pensions.

By Mr. CAREW: Memorial of the Colonial Dames of America, favoring national defense; to the Committee on Military Affairs.

By Mr. CURRY: Petition of 9 citizens of Lodi, Cal., against passage of bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

Also, petition of Elmore M. Billings and Calistoga Grape Protective Association, of California, against certain features of the proposed wine tax, etc.; to the Committee on Ways and Means.

By Mr. DAVIS of Texas: Petition of the Cuero (Tex.) Commercial Club, favoring the Bankhead good-roads bill; to the Committee on Roads.

By Mr. DILL: Petition of the East End Book Club, of Spokane, Wash., urging the establishment of a Federal motion-picture commission for the efficient and economical censorship of motion-picture films, so far as the jurisdiction of the Federal Government over the District of Columbia and the Territories and interstate commerce permits; to the Committee on Education.

By Mr. DILLON: Memorial of South Dakota State Luther League, favoring national prohibition; to the Committee on the Judiciary.

By Mr. HAYES: Memorial of Ladies' Missionary Society of Ventura, Cal., against sale, etc., of liquors in Porto Rico; to the Committee on Insular Affairs.

By Mr. HUMPHREY of Washington: Petition of First Baptist Church of Everett, Wash., favoring Federal motion-picture commission; to the Committee on Education.

By Mr. McCRACKEN: Petition of citizens of Idaho Falls, Idaho, favoring bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. MAGEE (by request): Petition of sundry citizens of New York, favoring national prohibition; to the Committee on the Judiciary.

By Mr. PHELAN: Petition of 72 citizens of Lynn, Mass., favoring Christian amendment to the Constitution; to the Committee on the Judiciary.

Also, petition of 110 citizens of Lynn, Mass., favoring national prohibition; to the Committee on the Judiciary.

By Mr. STINESS: Petition of Rhode Island State Branch, American Federation of Labor, favoring House bill 10318; to the Committee on Labor.

SENATE.

SATURDAY, *June 3, 1916.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we lift our hearts to Thee for the inspiration for every day's work. Thou hast not separated Thyself from the affairs of men. Thou hast honored us by calling us to be coworkers together with God. In our relation to Thee any service we try to render is glorified because it may be referred to Thy will and we may be conscious that we are working out a divine program. Grant us Thy grace and guidance this day. We ask for Christ's sake. Amen.

NAMING A PRESIDING OFFICER.

The Secretary (James M. Baker) read the following:

UNITED STATES SENATE,
Washington, D. C.

To the Senate:

The Vice President being absent from the Senate, and the undersigned being also necessarily absent therefrom, he, as President pro tempore of the Senate, hereby names the Senator from Alabama, Mr. JOHN H. BANKHEAD, to perform the duties of the Chair on the 3d day of June, 1916; this substitution not to extend beyond an adjournment.

JAMES P. CLARKE,
President pro tempore of the Senate.

Mr. BANKHEAD thereupon took the chair as Presiding Officer and directed the Secretary to read the Journal of yesterday's proceedings.

The Journal of yesterday's proceedings was read and approved.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by E. P. Taylor, jr., one of its clerks, announced that the House had passed the bill (S. 6073) granting the consent of Congress to George Fabyan to construct a bridge across the Fox River.

The message also announced that the House agrees to the amendments of the Senate to the bill (H. R. 755) to incorporate the Boy Scouts of America, and for other purposes.

The message further announced that the House agrees to the amendments of the Senate to the bill (H. R. 13765) to amend section 73 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.

The message also announced that the House disagrees to the amendments of the Senate to the bill (H. R. 14864) to alter and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from the Central Pacific Railroad, in California, to Portland, in Oregon," approved July 25, 1866, as amended by the acts of 1868 and 1869, and to alter and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from Portland to Astoria and McMinnville, in the State of Oregon," approved May 4, 1870, and for other purposes, agrees to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. FERRIS, Mr. TAYLOR of Colorado, and Mr. LENROOT managers at the conference on the part of the House.

PETITIONS AND MEMORIALS.

Mr. FLETCHER. I present a letter in the nature of a petition from W. S. Whitten, secretary of the Lincoln Commercial Club of Nebraska, which I ask may be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD as follows:

LINCOLN COMMERCIAL CLUB,
Lincoln, Nebr., May 24, 1916.

Hon. DUNCAN U. FLETCHER,
United States Senate, Washington, D. C.

MY DEAR SENATOR FLETCHER: Following an address delivered by Hon. Benjamin J. Rosenthal, vice president of the National Business League of America, before the members of the Lincoln Commercial Club at luncheon to-day, the inclosed resolution was unanimously adopted at a special meeting of the board of directors and is submitted for your information and with the hope that you will find it consistent to support the Alexander shipping bill mentioned therein. We understand the bill is now before the Senate for consideration.

Yours, very truly,

W. S. WHITTEN, *Secretary.*

—

LINCOLN, NEBR., *May 24, 1916.*

Resolution adopted at a special meeting of the board of directors of the Lincoln Commercial Club, 12 o'clock m., Wednesday, May 24, 1916:

"*Resolved*, That as an effective measure to establish a United States shipping board for the purpose of encouraging, developing, and creating a naval auxiliary and naval reserve, and a merchant marine, to meet the imperative requirements of the commerce of the United States with its Territories and possessions, and with foreign countries, and for other purposes, the board of directors of the Lincoln Commercial Club of Lincoln, Nebr., in conference assembled, this 24th day of May, 1916, hereby indorses the shipping bill, H. R. 15455, introduced in the Sixty-fourth Congress, first session, May 8, 1916, by Mr. ALEXANDER, and passed by the House of Representatives May 20, 1916.

Mr. TOWNSEND. I present a memorial of sundry citizens of Waldron, Mich., and in this connection I desire to state that I have received many similar memorials in the form of telegrams and letters protesting against the passage of what is known as section 7 of the Post Office appropriation bill. I simply desire to say that when the House bill came to the Senate it contained this provision—there were no protests filed. I received no protests until after the bill had been reported. Now the protests are coming in numerously and I desire to present this one and have it printed in the RECORD as a sample of the numerous memorials which I am receiving on the same subject.

The PRESIDING OFFICER. Without objection, it is so ordered.

The memorial referred to is as follows:

Resolutions adopted by citizens of Waldron at Decoration Day assembly in honor of the Grand Army of the Republic.

Whereas the House of Representatives has passed the Post Office appropriation act containing section 7, which section may be invoked to exclude from the United States mails any newspaper or other publication, at the option of the Postmaster General, and believing such section 7 to be decidedly un-American: Therefore be it

Resolved, That we, the people of the village of Waldron and of the township of Wright, Hillsdale County, Mich., in public assembly on Decoration Day, view with alarm the passage of said section 7 of the Post Office appropriation act by the House of Representatives, and hereby protest against said measure being passed by the Senate; and we hereby call upon our Senators to use their influence at once against any and all such measures.

Resolved, That the chairman of the day be authorized to appoint five citizens as a committee, who are authorized to sign this protest on behalf of the Decoration Day assembly, and that copies be sent to each of our Senators and to the President.

JACOB H. WEAVER.
R. H. SMITH.
N. FOGLESANG.
ALFRED WILSON.
PAUL BERLIN.

Mr. KERN presented the memorial of Hon. John B. Stoll and 40 other citizens of South Bend, Ind., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

Mr. MYERS presented a memorial of sundry citizens of Corvallis and Victor, in the State of Montana, remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

Mr. HARDING presented a memorial of sundry citizens of Stillwater, Ohio, remonstrating against an increase in armaments, which was ordered to lie on the table.

Mr. PHELAN presented memorials of sundry citizens of California, remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which were ordered to lie on the table.

He also presented a petition of Camp No. 770, United Confederate Veterans, of Los Angeles, Cal., praying for the enactment of legislation to grant pensions to Confederate veterans of the Civil War and to the widows of such veterans, which was referred to the Committee on Pensions.

He also presented a petition of the Master Painters and Decorators' Association of the State of California, praying for the enactment of legislation to prevent fraud in the manufacture of paint, which was referred to the Committee on Interstate Commerce.

Mr. CURTIS (for Mr. PENROSE) presented a petition of the Board of Trade of Philadelphia, Pa., praying for the enactment of legislation to provide uniform bills of lading in interstate and foreign commerce, which was referred to the Committee on Interstate Commerce.

Mr. GALLINGER (for Mr. BURLEIGH) presented a memorial of sundry citizens of South Durham, Me., remonstrating against an increase in armaments, which was ordered to lie on the table.

He also (for Mr. BURLEIGH) presented a petition of sundry citizens of Dover and Foxcroft, in the State of Maine, praying for national prohibition, which was referred to the Committee on the Judiciary.

COMMENCEMENT EXERCISES AT ANNAPOLIS, MD. (S. DOC. 460).

Mr. TILLMAN. Mr. President, I went to Annapolis yesterday to attend the commencement exercises. I heard three very fine speeches, all short and to the point. I consider them so valuable that I think they deserve better preservation than the newspapers will give them.

I ask unanimous consent for the printing as a public document of the addresses of President Wilson, Secretary Daniels, and the superintendent of the academy, Capt. Eberle.

The PRESIDING OFFICER. Such will be the order, without objection.

SPEECH BY SECRETARY M'ADOO (S. DOC. NO. 457).

Mr. SIMMONS. I ask unanimous consent to have printed as a public document a speech delivered by the Secretary of the Treasury, Mr. McAdoo, before the Chamber of Commerce at Raleigh, N. C., Wednesday, May 31, 1916.

The PRESIDING OFFICER. Is there objection to the request of the Senator from North Carolina?

Mr. GALLINGER. What was the subject that was discussed, I will ask the Senator?

Mr. SIMMONS. It has no title. It is a discussion of a number of very important public questions by the Secretary of the Treasury.

Mr. GALLINGER. Mr. President, I do not know when we are going to stop, probably we never will, loading down the CONGRESSIONAL RECORD with speeches delivered outside. The Secretary of the Treasury has occupied a great deal of space during the present session of Congress; but, of course, I know that it is not gracious to object. So I simply content myself by expressing the hope, which I have expressed so often, that the time will come when the CONGRESSIONAL RECORD will be practically a record of what occurs in the Senate.

Mr. SIMMONS. I did not ask that it be printed in the RECORD; I asked that it be printed as a public document.

Mr. GALLINGER. That is better.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

JOHN F. CONSIDINE.

Mr. SUTHERLAND. Mr. President, there is a short bill on the calendar reported from the Committee on Claims, which I should like very much to have passed. I think there will be no objection to it. I ask unanimous consent for the consideration of the bill (S. 2852) for the relief of John F. Considine.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported from the Committee on Claims with an amendment, in line 5, to strike out "$5,000" and insert "$2,000," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury is hereby authorized and directed to pay, out of any funds in the Treasury not otherwise appropriated, the sum of $2,000 to John F. Considine, a former employee of the United States under the Reclamation Service at Yuma, Ariz., for injuries received by him in the course of such employment which resulted in permanent and total physical disability.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

AMENDMENT OF SEAMEN'S ACT.

Mr. FLETCHER. I ask unanimous consent for the consideration of the bill (H. R. 13112) to amend section 14 of the seamen's act of March 4, 1915. It is a House bill passed there and unanimously approved by the Committee on Commerce of the Senate. It is rather important that action should be taken at once because there are boats being built that are subject to present regulations which are not fair, and all concerned want to change them. Under the present law a boat under 400 feet in length must carry 12 lifeboats. There is no provision under the existing law for a boat 300 feet, 200 feet, or 100 feet in length. In other words, a boat 100 feet in length must have 12 lifeboats, which, of course, is an oversight in the law.

The bill provides that for vessels under 100 feet in length the minimum of buoys shall be 2; for vessels under 200 feet in length the minimum number of buoys 4, two of which shall be luminous; for vessels more than 200 feet and under 300 feet in length the minimum number of buoys shall be 6, of which 2 shall be luminous; and for vessels 300 feet and under 400 feet in length the minimum number of buoys shall be 12, of which 4 shall be luminous. So the bill would amend the present law only in respect to boats less than 400 feet in length.

Mr. GALLINGER. I inquire if it is the so-called seamen's law that the bill proposes to amend?

Mr. FLETCHER. It proposes to amend section 14 of the seamen's law in that respect.

Mr. GALLINGER. Sometime ago I introduced an amendment, which went to the Committee on Commerce. I presume it has not been looked at. It proposes an amendment to that law which I think is very important—much more important than the one the Senator suggests. I hope the committee will look at it some time.

Mr. FLETCHER. I shall be very glad to do my part in that respect.

Mr. THOMAS. I wish to ask if the proposed measure is satisfactory to the senior Senator from Wisconsin [Mr. LA FOLLETTE]?

Mr. FLETCHER. It is.

Mr. LANE. I should like to ask the Senator if he has consulted the senior Senator from Wisconsin and had the measure carefully analyzed? This is quite an important matter, Mr. President.

Mr. FLETCHER. I have gone over it with the Senator from Wisconsin.

Mr. LANE. If you had been out at sea in a storm where you had your life at stake, the Senator would feel quite an interest in the subject, I assure him; just as much interested as in his life. I should like to know if the bill is circumscribed with means of safety and means of getting out of the way from a sinking boat in a storm?

Mr. FLETCHER. It is simply to cure an oversight in the seamen's law in not providing for small boats now being constructed under the law. The department will have to require them to put on more life buoys and life lines than they can hold or carry. This is simply to amend that defect in the law. I conferred with the Senator from Wisconsin about it yesterday, and he understands it thoroughly. It is agreeable to him and to everybody concerned.

Mr. UNDERWOOD. Mr. President, I have no objection to the Senate considering the bill, but there is an order of business that we do not reach when recesses are taken. Before we take up a disputed matter that might raise the point of no quorum, I shall object until the procedure in regular order of the Senate has been gone through with, so that we may introduce bills that we may desire to present.

Mr. FLETCHER. If this will lead to any debate, I will not press it.

Mr. UNDERWOOD. I will object for the present until after the regular order.

The PRESIDING OFFICER. The Senator from Alabama objects. Reports of committees are in order.

CHOCTAW AND CHICKASAW INDIANS.

Mr. OWEN, from the Committee on Indian Affairs, to which was referred the bill (S. 5427) referring certain claims against the Choctaw and Chickasaw Nations of Indians to the Court of Claims, reported it with amendments and submitted a report (No. 519) thereon.

COMMAND OF THE AIR.

Mr. PAGE, from the Committee on Printing, to which the subject was referred, reported a resolution (S. Res. 210) providing for the printing as a Senate Document the manuscript submitted by the Senator from Texas [Mr. SHEPPARD] on May 9, 1916, entitled "Command of the Air."

Mr. FLETCHER. I ask unanimous consent for the present consideration of the resolution.

Mr. UNDERWOOD. Is it in order to consider resolutions until after the call for the introduction of bills?

The PRESIDING OFFICER. Only by unanimous consent.

Mr. UNDERWOOD. I object.

The PRESIDING OFFICER. Objection is made and the resolution will go to the calendar.

COUNCIL OF CROW INDIANS.

Mr. LANE. I introduce a joint resolution and ask for its immediate consideration. It will not lead to discussion, I think.

Mr. GALLINGER. Let the resolution be read.

The joint resolution (S. J. Res. 140) calling upon the Secretary of the Interior to permit the Crow Indians to convene in general council was read the first time by its title.

Mr. GALLINGER. The rule provides that bills and joint resolutions shall be referred to the appropriate committee. I trust that this will take the usual course.

The PRESIDING OFFICER. Such will be the order.

Mr. GALLINGER. The Committee on Indian Affairs.

Mr. LANE. The Committee on Indian Affairs have already had this matter under discussion. A majority, I think, who were present at the meeting were willing to grant the request. These people are here upon this mission and desire to start back to their tribe to-night with the authority of this body to hold an open general council upon their tribal affairs which do not interfere in any way with the prerogatives of this body. It is the opportunity and a chance to consider their own affairs free from interference, which they want, which is the high privilege of every human being or ought to be and is without prejudice to anyone else. That is all I am asking of the Senate, to give these people consent to meet in council free from interference, to consider their own affairs. I am sure when Senators understand it they will grant it.

Mr. GALLINGER. When the committee reports the joint resolution in due form I apprehend there will be no opposition to it. There will not be on my part, but we ought not to depart from the usual method of doing business and convert the Senate into a town meeting. I insist that there shall be a report.

Mr. LANE. If the Senator will allow me, I will state that this matter has already been referred to the committee, and I feel at liberty to introduce a resolution giving these people a voice in their affairs. We have had it under consideration. It has been referred there, and now these people are asking permission and the members of the committee who were present freely granted it and none opposed, so far as I know, to merely hold a council, a meeting among themselves, to decide what they wish—to express an opinion, if you please. They have no other right on earth as to what will be done with their property. I hope the Senator from New Hampshire will withdraw his objection.

The PRESIDING OFFICER. The Senator from New Hampshire objects. The joint resolution will have to go to the committee.

Mr. JONES. I wish to suggest to the Senator from Oregon, in order to have the bill reported now, that he poll the committee and then report it.

Mr. LANE. The chairman of the committee has asked me to present it, and the members are not here. They have gone. The chairman has consented to it and asked me to introduce it.

Mr. GALLINGER. I will ask the Senator if he feels at liberty—in view of what the committee has done, that he is authorized—to report the bill from that committee?

Mr. LANE. Yes; absolutely and in good faith.

Mr. GALLINGER. If the Senator takes the responsibility of reporting it from the committee, I will then not object.

The PRESIDING OFFICER. The Senator from New Hampshire withdraws his objection. The joint resolution will be read.

The joint resolution was read the second time at length, as follows:

Whereas the tribe of Crow Indians of Montana are in possession of a large tract of land in that State which it is desired by some to open to settlement to the whites; and

Whereas the Bureau of Indian Affairs is opposed to the opening of the said Crow Indian Reservation for that purpose; and

Whereas certain Crow Indians have respectfully requested that they may be allowed to hold a general council of all the members of that tribe, free from interference by either of the contending parties, in order to secure an unbiased opinion of the said Crow Indians upon the question of the disposal of their tribal lands: Therefore be it

Resolved, etc., That the Secretary of the Interior is hereby respectfully directed to permit the said Crow Indians to hold a general council of all the members of that tribe and to make provision that no person or persons who desire the opening of the reservation nor members or officers of the Indian Bureau who oppose the opening of it shall attend such council nor influence in any way the conduct of said council or its findings and that permission to attend said council shall be freely granted to all members of the tribe of Crow Indians who desire to do so.

Mr. LANE. Mr. President, if there is any question about the joint resolution, I ask that it be referred to the Committee on Indian Affairs.

Mr. SUTHERLAND. Mr. President, before the joint resolution goes to the committee I wish to make a single observation about it. It seems to me that it is somewhat remarkable. Here is a resolution which is called a "joint resolution." A joint resolution is, of course, an act of legislation. This is a resolution which apparently requests the Secretary of the Interior to do something. If we are to legislate, we ought to direct him to

do the thing. To request an officer of the Government to do something is not a legislative act.

Mr. LANE. I wished to be polite; I wished to be considerate of his feelings. I am willing to direct him and to command him, if you please; but what was the Senator's suggestion?

Mr. SUTHERLAND. That such a resolution, if it is an act of legislation, should direct the Secretary of the Interior.

Mr. LANE. I accept the Senator's suggestion and will insert the word "direct" instead of "request," so as to make it a direction to the Secretary of the Interior. I desire that the resolution be referred to the Committee on Indian Affairs.

The PRESIDING OFFICER. The joint resolution will be referred to the Committee on Indian Affairs.

Mr. LANE subsequently said: I wish to submit a Senate resolution and have it referred to the Committee on Indian Affairs. It is a resolution calling on the Secretary of the Interior to permit the Crow Indians to convene in general council.

There being no objection, the resolution (S. Res. 212) was referred to the Committee on Indian Affairs, as follows:

Whereas the tribe of Crow Indians of Montana are in possession of a large tract of land in that State which it is desired by some to open to settlement to the whites; and

Whereas the Bureau of Indian Affairs is opposed to the opening of the said Crow Indian Reservation for that purpose; and

Whereas certain Crow Indians have respectfully requested that they may be allowed to hold a general council of all the members of that tribe, free from interference by either of the contending parties, in order to secure an unbiased opinion of the said Crow Indians upon the question of the disposal of their tribal lands: Therefore be it

Resolved, That the Secretary of the Interior is hereby respectfully directed to permit the said Crow Indians to hold a general council of all the members of that tribe and to make provision that no person or persons who desire the opening of the reservation nor members or officers of the Indian Bureau who oppose the opening of it shall attend such council nor influence in any way the conduct of said council or its findings and that permission to attend said council shall be freely granted to all members of the tribe of Crow Indians who desire to do so.

NATIONAL CAPITAL PREPAREDNESS PARADE.

Mr. CHAMBERLAIN. Mr. President, Mr. William A. Gude, as chairman, and Mr. Charles J. Columbus, as secretary, of the committee representing the National Capital preparedness parade committee, have requested me to invite the Senate to participate with them in the parade on the 14th instant. I take pleasure in behalf of that committee in extending the invitation to the Senate.

OREGON & CALIFORNIA RAILROAD LAND GRANTS.

Mr. CHAMBERLAIN. Mr. President, I wish to call the attention of the Senate to the fact that the conferees of the two Houses on the Oregon & California Railroad land-grant bill have about come to a final agreement and will be ready to report to the Senate in a little while. I ask the indulgence of the Senate that we do not adjourn for a short time; at least not until the conferees can submit their report. I did not know but that the Senate might finish its business and adjourn before I could submit the report.

Mr. CLARK of Wyoming. That will be all right.

COMMITTEE ON PUBLIC LANDS.

Mr. MYERS. Mr. President, I ask unanimous consent for the immediate consideration of Order of Business No. 449, being Senate resolution 190. The resolution has been favorably reported from the Committee on Contingent Expenses, and provides for the temporary allowance of additional clerical help for that committee merely for a short time. It will take the Senate only a minute to grant it or to refuse it. I ask for the consideration of the resolution now.

The PRESIDING OFFICER. The Chair will say to the Senator from Montana that there has been a general objection raised against the consideration of any other business until the routine morning business shall have been disposed of. In a few minutes the Senate will reach the point at which the Senator's request would be in order.

Mr. MYERS. I thought the order of introduction of bills had been concluded.

The PRESIDING OFFICER. It has not yet been concluded.

Mr. MYERS. Very well. I withdraw the request.

The PRESIDING OFFICER. The introduction of bills and joint resolutions is in order.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. UNDERWOOD:

A bill (S. 6286) to confer jurisdiction on the Court of Claims; to the Committee on the Judiciary.

By Mr. DILLINGHAM:

A bill (S. 6287) for the relief of Joseph Eubor (with accompanying papers); to the Committee on Military Affairs.

A bill (S. 6288) to amend section 2172 of the Revised Statutes of the United States; to the Committee on Immigration.

By Mr. SHAFROTH:

A bill (S. 6289) granting an increase of pension to Lucy J. Muchmore; to the Committee on Pensions.

By Mr. STERLING:

A bill (S. 6290) granting an increase of pension to George C. Stearns (with accompanying papers);

A bill (S. 6291) granting an increase of pension to Oscar M. Dreibelbiss (with accompanying papers); and

A bill (S. 6292) granting an increase of pension to Austin Ormanson (with accompanying papers); to the Committee on Pensions.

By Mr. FLETCHER:

A bill (S. 6293) for the relief of Mrs. Nellie E. Stockton; to the Committee on Claims.

A bill (S. 6294) granting a pension to Ethel Maura Robards; to the Committee on Pensions.

By Mr. JONES:

A bill (S. 6295) granting an increase of pension to James H. Colby (with accompanying papers); to the Committee on Pensions.

By Mr. BORAH:

A bill (S. 6296) granting an increase of pension to Mary F. Ewing; and

A bill (S. 6297) granting a pension to Mrs. George Rowland (with accompanying papers); to the Committee on Pensions.

By Mr. PHELAN:

A bill (S. 6299) for the relief of Mary Jordan, widow of Dennis Jordan; to the Committee on Claims.

A bill (S. 6300) granting consent to the county of Madera, Cal., and its successors and assigns, the right to construct a dam across the San Joaquin, Fresno, and Chowchilla Rivers; to the Committee on Commerce.

By Mr. GALLINGER (for Mr. BURLEIGH):

A bill (S. 6301) granting an increase of pension to William H. H. Knight;

A bill (S. 6302) granting a pension to Nettie C. Kimball; and

A bill (S. 6303) granting an increase of pension to Thompson S. Ford; to the Committee on Pensions.

By Mr. CHILTON:

A joint resolution (S. J. Res. 141) retiring Dr. Charles Lee Baker on pay; to the Committee on Military Affairs.

EXHIBITION OF NATURAL RESOURCES.

Mr. WORKS. Mr. President, I am about to introduce a bill the object and purpose of which I desire very briefly to explain. It may be remembered that I have heretofore urged upon the Senate the wisdom and propriety of acquiring the property along Pennsylvania Avenue upon which to construct all Government buildings. I believe that sooner or later this will be done. The bill that I am now offering is intended to authorize the acquisition of certain property in the city of Washington to be used by the States in the construction of State buildings to be used as exposition buildings, in which to exhibit their products and resources and to be made the headquarters of each and all of the States in the National Capital.

The property to be acquired as provided by the bill commences on New York Avenue at Fifteenth Street and extends along New York Avenue on both sides east to Massachusetts Avenue, thence along that avenue to New Jersey Avenue to the Capitol Grounds and the new Capitol Park, consisting of 35 squares and parts of squares. Thus, if Pennsylvania Avenue shall be acquired and Government buildings constructed thereon and the plan I am now offering is carried out, we shall have an almost continuous circle of Government and State buildings and parks from the Treasury Building to the Capitol and return to the Treasury.

In addition to this, the bill provides for the acquisition of additional ground near the water front, to be used for the construction of Government buildings in which to make exhibits of the products and industries of the National Government, and for such general purposes as Congress may provide. This covers the ground between B and E Streets on both sides of the United States Naval Museum of Hygiene from Eighteenth Street to Twenty-seventh Street, consisting of 26 squares and fractions of squares.

I submit, to accompany the bill, two maps on which are delineated in red the several squares intended to be acquired. For the most part the property proposed to be taken is comparatively inexpensive and cheaply improved.

I am not offering the bill with any expectation or desire that it shall be considered at this session of Congress. To make it effective and to accomplish the purpose intended the hearty cooperation of the States must be had.

The chief object of the bill is to create and perpetually maintain in the National Capital an exposition where the products, resources, and industries of every State in the Union and of the National Government may be exhibited, and where all who come to Washington may see gathered in one place the magnificent and varied resources of the country and at the same time improve and beautify the Capital. I sincerely hope that the matter may be taken up earnestly by the States and the Government, and that some time this or some better plan may be adopted to bring about this much-desired object.

Mr. President, I ask that the bill and accompanying maps be referred to the Committee on Public Buildings and Grounds.

The bill (S. 6298) authorizing the purchase of grounds for the accommodation of public buildings belonging to the Government and to the several States, to be used for the permanent exhibition of the natural resources, arts, and industries of such States and of the National Government, and for other purposes, was read twice by its title, and, with the accompanying maps, referred to the Committee on Public Buildings and Grounds.

Mr. WORKS. I ask that the bill may be printed in the RECORD for the information of the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill introduced by Mr. WORKS June 3, 1916, and referred to the Committee on Public Buildings and Grounds, is as follows:

A bill (S. 6298) authorizing the purchase of grounds for the accommodation of public buildings belonging to the Government and to the several States, to be used for the permanent exhibition of the natural resources, arts, and industries of such States and of the National Government, and for other purposes.

Be it enacted, etc., That in order to make provision for the erection and maintenance of public buildings by the several States of the Union, within the District of Columbia, and the Government, the following parcels of land shall be, and are, designated and set aside for this purpose, and those parcels of land not already owned in whole or in part by the Government of the United States shall be purchased under the direction of the President of the United States, or taken for public use by due process of law, namely:

All blocks numbered 634, 633, 632, 631, 630, 629, 628, 627, 626, 625, 569, 567, 565, 564, 563, 562, 529, 528, 518 N., 518 S., 517, 516 N., 516 S., 485, 484, 484 W., 452, 427, 403, 373, 372, 344, 343, 318, 317, 327, 326, 251, 223, part of 252, and part of 222, according to the official plat of the city of Washington, upon which to construct State buildings as hereinafter provided.

Also blocks Nos. 12, 12 S, 21, 22, 60, 61, 62, 83, 84, 87, 87 E, 88, 104, 123, 124, 125, 128, 128 N, 144, 145, 146, and 147, according to the official plat of the city of Washington, upon which to construct Federal buildings as hereinafter provided.

SEC. 2. That any and all streets and alleys intersecting the said land so to be acquired as aforesaid may, at such time as the President may deem necessary or expedient, be by Executive order vacated and become and constitute a part of the tract of land so provided to be acquired as aforesaid and subject to such other and further division and subdivision for the purposes of buildings or use as streets, alleys, passageways, or avenues as may be or become necessary in connection with the enjoyment of all of the said lands hereinbefore mentioned for public purposes.

SEC. 3. That the Secretary of the Treasury, subject to the Executive order of the President, shall be authorized to purchase or acquire said land or any part thereof as soon as practicable at such price as may be fixed by agreement between the said Secretary and the respective owners of said lands and premises, not exceeding the actual cash value thereof, and the payments therefor shall be made to respective owners of such lands upon the requisition of the Secretary of the Treasury, with the approval of the President, upon a release and conveyance of said lands to the United States, by good and sufficient deeds so conveying the same after the title of the grantor of said lands shall have been examined and approved in writing by the Attorney General of the United States.

SEC. 4. That in the event of a failure to agree upon the price of said land or any part thereof, between the owner of said land and premises and the Government of the United States, the Attorney General of the United States is hereby authorized and empowered to commence and prosecute proceedings for the condemnation of said lands and premises in the Supreme Court of the District of Columbia at any general or special term thereof, and to prosecute such proceedings in condemnation in the manner heretofore provided in the statute. That upon the final determination of such proceedings in condemnation, the Secretary of the Treasury is authorized and directed to make payment of the sum of money adjudged to be proper compensation on said land and premises so condemned out of the moneys hereinafter provided to be appropriated for such purpose.

SEC. 5. That in condemnation proceedings so instituted and prosecuted as aforesaid the value of the land and the value of the buildings or improvements thereon shall be separately estimated.

SEC. 6. That the Secretary of the Treasury is hereby authorized to issue, at his discretion, 50-year 4½ per cent bonds to the equivalent amount of the cost of such land acquired under this act.

SEC. 7. That all land designated herein as blocks Nos. 634 to part of 222, and acquired under this act, is hereby put at the disposal of the several States of the Union, as soon as any such State or States shall have made appropriations to erect thereon within a period of 10 years, suitable public buildings for the permanent exhibition of the natural resources, arts, and industries of said State or States, such buildings to be designed under the direction of a board, as provided in section 8; and the other blocks above described shall be used for constructing thereon Government buildings as herein provided.

SEC. 8. In order to carry out the provisions of this act, the President is authorized to appoint a commission consisting of the chairmen of the following committees of the Senate, namely, Industrial Expositions, Library, Manufactures, Mines and Mining, Public Buildings and Grounds; and the chairmen of the following committees of the House, namely, Industrial Arts and Expositions, Library, Mines and Mining, Public Buildings and Grounds, to act by and with the advice of the United States Commission of Fine Arts. The commission shall apportion the land so designated and hereby set apart for that purpose, among the several States in groups of States or in severalty as may best meet the needs of the several States.

SEC. 9. The commission shall serve without pay, except the necessary traveling expenses of the commission shall be paid out of this appropriation. The commission may employ expert assistance of architects, sculptors, and landscape gardeners to formulate plans so that the public buildings erected thereon may form a harmonious group and be in conformity with the public buildings of the National Capital.

SEC. 10. That for the purpose of making preliminary plans for carrying this act into effect, the sum of $10,000, or as much thereof as may be necessary, is hereby appropriated from any money in the Treasury not otherwise appropriated, and the sum of $1,000,000 to be made available for the purchase of land as soon as 10 States have made the necessary appropriations for the public buildings to be erected thereon, and the designs for which have been approved by the said Commission of Fine Arts.

NAVAL MANAGEMENT AND DISCIPLINE.

Mr. THOMAS. Mr. President, I desire to give notice that on Monday, the 19th day of June, at the close of routine morning business, I shall address the Senate regarding some features of naval management and discipline under the present administration.

DEVELOPMENT OF WATER POWER.

Mr. SHIELDS. Mr. President, there have been many comments in the press of the United States concerning Senate bill 3331, for the improvement of navigation and the development of water power in navigable streams, passed by the Senate March 8 last, some of which are favorable and some unfavorable. These comments are in part editorial and in part communications from men familiar with the subject matter of the bill, and some are resolutions of business men's associations in regard to the same.

I have received copies of newspapers containing many of these criticisms, and I ask that the editorials and communications here presented be printed in the RECORD.

The PRESIDING OFFICER. Without objection, such will be the order.

The matter referred to is as follows:

[From the Merchant and Manufacturer, Nashville, Tenn., March, 1916.]

TO UTILIZE NAVIGABLE WATERWAYS.

The Shields bill to regulate the construction of dams across navigable waterways, which passed the Senate recently, now goes to the House. Much interest had been manifested in this measure, which authorized the construction, maintenance, and operation of dams after obtaining the permit of the Secretary of War. Diversion structures and accessory works are permitted for the development and improvement of the navigation and for water power or other purposes in and along any of the navigable waters of the United States. The primary object of the bill is to allow of the development of water power. Where the power to be developed is used or to be used for a public utility the grantee must be a municipal corporation or a political subdivision or other agency of the State, a public-service agent of a State, or a public-utility corporation created and organized under the laws of a State or of the United States, authorized to furnish water, heat, or electrical energy for public or private use, and whose rates or charges and service shall be subject to regulation by the laws of the State or a duly constituted commission or other agency. Where the State has not made provision for such corporations the qualifications of the grantee thus prescribed shall not apply, and no transfer of any permit or the rights granted shall be made without the approval of the Secretary of War.

The bill requires plans and specifications of construction and maps of proposed location to be approved by the Secretary of War and the Chief of Engineers, and no change in such plans or specifications shall be made without the approval of these officials. The navigation facilities are required to be preserved at least equivalent to those existing prior to construction of the dam, etc., without expense to the United States, in accordance with plans and specifications approved by the Secretary of War, and in case such navigation facilities are not a part of the original construction, and the United States shall deem them necessary, the grantee shall convey to the United States such land and right of way as may be required for such facilities. The grantee shall also reimburse the United States for the cost of any investigation necessary for the approval of plans and for supervision or construction, and shall pay to the United States reasonable charges in consideration of the benefits accruing and to accrue to grantees. The right to use the public lands is granted by certification of the Secretary of War. In case of contesting applicants the permit shall be granted to the contestant judged best fitted for expediting and realizing the maximum useful development. The Secretary of War shall have, before granting the permit, the report and advice of the Chief Engineer. Control of the level above and below the dam is subject to the rules and regulations of the Secretary of War, and such lights and other signals and such fishways as may be prescribed shall be established under penalty for noncompliance.

The grantee is liable for all damages resulting from construction and operation, and when the grantee is a public-service agent of the State, a municipal corporation, or a political subdivision of the State it may acquire the right to use or damage lands or property of others necessary for construction, maintenance, and operation by the exercise of the right of eminent domain in the district courts of the United States. The permit shall continue for 50 years, and after the expiration of that time until revoked or until compensation shall be made to grantee for its property. After expiration the United States may take over all the property of the grantee dependent in whole or in part upon the rights hereunder granted upon paying the fair value of the property. In the determination of this value no value shall be claimed or allowed for the rights hereunder granted. All charges, rates, and service shall be subject to the laws of the State within which the service is rendered. Where any part of said power shall enter into interstate or foreign commerce, jurisdiction is conferred upon the Interstate Commerce Commission.

Any grantee failing or refusing to comply with any of the provisions of the act or any conditions under it is to be deemed guilty of a misdemeanor and fined not exceeding $1,000 for each offense, in addition to other penalties fixed by law. Work must be begun within two years after the permit is granted, and the grantee shall have in commercial operation such part of it as the Secretary of War shall determine from time to time. If any dam or other part of the work be not completed within the time fixed by the Secretary of War, or if construction shall not be begun in the appointed time, proper proceedings shall be instituted for the revocation of the grant. The Secretary of War may lease to any applicant having the capacity of grantee surplus water from any dam or structure built by the United States on such terms as deemed for the best interest of the United States and reasonable and fair to both parties, preference being given to a municipal corporation, a political division of the State or a public-service agency, provided the plans of the same are deemed by the Secretary of War adapted to conserve and utilize in the public interest the navigation and water resources of the region.

The act does not affect the rights of any person, company, or corporation as to the construction, maintenance, or operation of any structures heretofore constructed or begun under permit of the Secretary of War and chief of engineers or other authority lawfully granted, but any conflicting provisions concerning these must be governed by the provisions of this act. Any person, company, or corporation having the capacity of grantee now constructing or operating any structures herein specified under authority heretofore granted, may obtain from the Secretary of War upon application a permit in accordance with the provisions of this act. The act does not apply to irrigation or power dams or grants for municipal corporations affecting the approved or erected under the jurisdiction of the Secretary of War of the United States.

It is specified that works constructed and maintained under this act shall not be owned, leased, controlled, or operated by any device or in any manner so that they form part of or in any way effect any combination in the form of an unlawful trust or monopoly, or any conspiracy to limit the output of electric energy, or in restraint of trade with foreign nations or between two or more States or Territories, or within any one State or Territory, in the generation, sale, or distribution of electric energy.

The right to alter, amend, or repeal this act is reserved, but no grantee under this act who shall have exercised rights under it shall not be deprived of any of his rights by such repeal, amendment, or alteration, all rights and the prosperity used under it being considered the prosperity of the grantee, until after the expiration of the 50 years.

—

[From the Chattanooga Times, May 9, 1916.]

SHIELDS WATER-POWER BILL.

There seems to be reason for believing that the Shields bill releasing water power now tied up and of no use to the country because the Government plays a sort of dog-in-the-manger policy—refusing free concessions to private enterprise and declining itself to develop the same—may become law, even the conservationists who have been opposing it having at last agreed that it is not such a bad law, after all. The objection made to it that it gives away in perpetuity rights that ought to be kept in trust for the future generations of the country has been overcome for the very simple reason that the proposed bill does not give away the rights in perpetuity at all; it simply authorizes the Government to dispose of any power sites under its control to private parties for 50 years, at the end of which time the Government may itself take over the property at a fairly appraised valuation and use the same in any way it shall deem best for the benefit of the public. Every possible safeguard, it would seem, has been thrown about the measure so as to prevent the exploitation of the public and the abuse of public rights. We are quite sure that if States and municipalities had been as careful in granting their franchises to railroads and public-utilities corporations as the provisions of the Shields bill is in protecting the rights of the people, there would never be any outcries against exorbitant charges, excessive rates, and gross discrimination, such as have been practiced by those operating railroads, water plants, telephone exchanges, etc., all of which are supposed to be creatures of and therefore the servants of the public.

The strongest argument for the passage of the Shields or a similar bill to the same purpose is that millions of dollars are ready for investment in plants having for their purpose the development of electrical power through the use of the inland waters of the country. Senator SHIELDS has said that if this bill should become law the development along the Tennessee River would within the next few years add immeasurably to the wealth of the country and become a most powerful agency in promoting the industrial development of the States through which it passes. As it is, few men of wealth are willing to undertake such development hedged about as they would be under present rules and regulations governing running streams under control of the Government.

We should say that, while conserving agencies for the benefit of coming generations is a duty upon the present Government, something is due those who are now on the scene of activity and whose energies and activities are being directed to the projection of enterprises and the development of resources the full benefits of which will extend long beyond the time of their natural lives, and which will therefore become rich heritages for those who shall come after them.

—

[From the Knoxville Journal and Tribune, Mar. 18, 1916.]

DEVELOPMENT ENCOURAGED BY THE SHIELDS BILL.

A special correspondent of the Baltimore Manufacturers' Record writes from Washington for that publication at some length concerning what is expected if the Shields bill, which has passed the Senate by a more than 2 to 1 vote, and is now pending in the House of Representatives.

This is a bill of which Senator JOHN K. SHIELDS is the author, and who did more than any other one man in securing favorable consideration in the Senate. The purpose of the bill is water-power development for industrial purposes.

Among other things stated in the correspondence printed in the Manufacturers' Record, attention is called to this paragraph:

"It is known that a number of big electrochemical plants for making saltpeter and nitric acid from the air have been planned by private enterprise, and will be built as soon as the Shields bill becomes a law, thereby making it possible to finance such undertakings. At the present time the United States, as has been pointed out repeatedly in these columns, is wholly dependent for its supply of nitrates upon the deposits of Chile. The Chilean Government collects a high tax upon every ton of nitrate exported. If the present bill goes through the House as it has gone through the Senate, it will mean the early establishment of a large plant for the manufacture of chemicals essential to the making of explosives and agricultural fertilizers."

At this particular time, when the subject of preparedness for national defense is uppermost in the minds of so large a proportion of the American people it seems incomprehensible how there can be any opposition to this bill becoming a law. When it came to a vote in the Senate the opposition was comparatively slight, but the bill reached a vote only after a long siege of hard and patient work on the part of its author.

Were the United States to become involved in a war with a nation that has a strong navy, it might soon become impossible to procure nitrates from Chile, and without the nitrates it would be impossible to make the explosives that are a necessity in war.

But the developments that are to follow the enactment of this bill into a law make possible necessities regarding agriculture in time of peace. The way will be open to the manufacture of fertilizers without limit as to quantity and from sources that are inexhaustible. If the productive capacity of the soils is to be maintained and increased fertilizers are a necessity, and if the Shields bill becomes a law there need be no end to the supply. And the supply for the South will be made in the South.

It is confidently believed that the enactment of the Shields bill into law will be followed by the early development of water powers aggregating as much as 15,000,000 horsepower and it is estimated that it would reduce coal consumption as much as 100,000,000 tons a year. Engineers have estimated that the development of the water power under the provisions of this bill, when it becomes a law, will mean a saving of $700,000 a day in fuel bills.

If nothing else than preparedness were considered, the House of Representatives should without delay concur in the action of the Senate. But more than that is involved. The bill promises development that will add beyond conception to the development and prosperity of the South and of the whole country.

—

[From the Memphis Commercial-Appeal, Apr. 3, 1916.]

THE SHIELDS BILL.

The bill offered by Senator SHIELDS and passed in the Senate by a vote of 46 to 22 has been greatly misunderstood.

The bill provides for developing navigation and utilization of the water power of the country.

It is not the purpose of the bill, in any way, to obstruct navigation. On the other hand Senator SHIELDS has embodied in his bill special provisions for the protection of navigation and for the improvement of navigable streams.

It was Gifford Pinchot who inaugurated the fight against the measure. Mr. Pinchot has become a crank of late. He has ideas. Any man is entitled to have ideas of his own, but he should at least apply them in a considerate way. Gifford Pinchot, ever since the days of Roosevelt, has been an extreme conservationist and he is opposed to the Shields bill because he feels that it will ruin the rivers of the country, will rob many streams of their natural beauty, and will obstruct navigation.

The United States, as well established by numerous decisions of the United States Supreme Court, has no property interest in the waters and beds of navigable rivers, but merely the police power to regulate commerce upon them, usually exercised in the way of removing obstructions and making improvements for the passage of commercial vessels. The States of the Union have control of the waters of rivers subject to the paramount authority of the United States for navigation purposes.

The riparian owners have the right to use the waters for all purposes so that they do not destroy the navigable capacity of the streams and after use allow them to pass on to the proprietors below.

These rights are recognized and respected in the bill offered by Senator SHIELDS.

It has been reported that President Wilson was decidedly opposed to the bill. Here again a mistake has been made. After reading the bill President Wilson declined to oppose it.

If the future navigation of present navigable streams would be interfered with there would be substantial grounds for opposition and the House of Representatives would be justified in defeating the measure, but inasmuch as the future safety of such streams is specifically provided for, there can be no logical reason offered for opposing the Shields bill now pending before the House.

—

[From the Johnson City Staff, Mar. 3, 1916.]

THE SHIELDS BILL.

United States Senator JOHN K. SHIELDS is to be congratulated on putting through the Senate one of the most important pieces of constructive legislation that has come to a vote in many sessions—the bill which enables the Secretary of War to grant 50-year permits for the building of dams and water-power plants on navigable streams.

This is the first vote taken by the Senate on a general water-power development measure in the eight years that the subject of conservation of natural resources has been under consideration in Congress. Two water-power bills passed the House last year and died in the Senate.

Senate leaders and military authorities urged the Shields bill as a vital feature of the preparedness program. It is estimated that there is 60,000,000 horsepower of natural energy in the navigable streams of the United States, of which nine-tenths is flowing to waste. These great water powers have been locked out of us up to now, as a special act of Congress has been necessary for each power plant, and it has been impossible to pass workable acts for the development of large water powers.

Senator SHIELDS announced in the Senate that the passage of this bill would be followed by early development of water powers aggregating 15,000,000 horsepower, or a volume of electricity equal to that produced by a coal consumption of 100,000,000 tons a year. Engineers estimate that development of this amount of water power equals a saving of $700,000 a day in coal bills.

It is known that a number of big electrochemical plants for making saltpeter and nitric acid from the air have been planned by private enterprise, and will be built as soon as the Shields bill becomes a law and makes it possible to finance these undertakings. These chemicals are essential to the manufacture of explosives and agricultural fertilizers, and at present the United States is wholly dependent for its supply upon the nitrate deposits of Chile. The Chilean Government collects a high tax upon every ton of nitrate exported. There is at

present not a single atmospheric nitrogen plant in this country, although Europe has 1,200,000 horsepower of hydroelectricity devoted to this use, and Germany is making 600,000 tons of saltpeter a year in such establishments for military and agricultural uses.

A few years ago Congressman SELLS told the Staff that it was his ambition to have located in the first district several of these plants, and it begins to look now like he will realize his ambition, for the passage of the Shields bill opens the door of opportunity.

Under the terms of the Shields bill the Secretary of War is authorized to grant permits for dams and power plants where he believes the building of such dams will improve navigability of streams. Dams are to be built without cost to the Government, and the grantees are to provide and operate locks, gates, sluice ways, etc., all without cost to the Government. Permits may be granted to individuals, political subdivisions of States, cities, or other municipal corporations, or to public-utility corporations. Intrastate business and rates of companies operating under the act are to be regulated by the States, the interstate service and rates by the Interstate Commerce Commission.

All plans for dams and works are to be approved by the War Department, as being the most adaptable plans for improvement of navigation and fullest development of waterpower possibilities. The grantee is to pay a rental for public lands used and a charge for rights and privileges in use of water, these rentals and charges to be fixed at the discretion of the Secretary of War, and the money received from same to go into a special fund in the United States Treasury, to be used for further improvement of waterways. Actual construction work on any project is to be begun within two years of the granting of the permit, and the works are to be completed within such reasonable time as the Secretary may prescribe. For failure to complete the works as directed, or for violation of the provisions of the act, or noncompliance with regulations or orders of the War Department, the grantee is subject to heavy cash penalties or to revocation of the grant.

Permits are to be granted for 50 years, after which time the Government may either extend the original lease, make a new grant, or upon one year's notice take over the property upon payment of its fair value, this value to be determined by mutual agreement or by the Federal courts, and not to include any allowance for any rights granted by the Government. The bill also provides that no value of rights granted by the Government shall be allowed in fixing rates to consumers. Dams, locks, and other structures used primarily for improving navigation are to be exempt from taxation.

Municipally owned dams and power plants for irrigation or for supplying power for municipal purposes are to be given preference in making leases for surplus water powers in the streams. The bill does not apply to water power on small streams and creeks used for grist mills, sawmills, etc.

The measure contains a drastic antimonopoly clause, providing that no dam or works constructed under its provisions shall be owned, leased, controlled, or operated "by any device or in any manner so that they form part of or in any way effect any combination in the form of an unlawful monopoly, or form the subject of an unlawful constraint or conspiracy to limit the output of electrical energy or in restraint of trade."

Although the war talk has prevented it from attracting any considerable public attention, the Shields bill has for several weeks been the subject of one of the most interesting debates on conservation of natural resources that has ever been held in the Senate.

Senator SHIELDS has served in the Senate only a brief time, but during that period he has displayed qualities of leadership and constructive statesmanship which have delighted his friends and confounded his enemies. That he should have sponsored such an important piece of legislation so early in his senatorial career, his admirers believe, presages a large career of service to the State and to the Nation.

—

[From the Knoxville Sentinel, Apr. 15, 1916.]

MR. PINCHOT'S OBJECTIONS.

Mr. Gifford Pinchot is very much frightened over the passage of the Shields water-power bill in the Senate and its prospective passage in the House. Mr. Pinchot has written the editor of the Sentinel two letters denouncing the Shields bill. He has also written the selfsame letters to all the other leading newspapers of the country. Mr. Pinchot's second letter, just to hand, excitedly says:

"The iniquitous Shields bill, giving away the water powers on our navigable streams, about which I wrote you on February 15, has been driven through the Senate, but it has not passed the House. There is still a good chance not only to stop this raid on public property but to pass a fair and honest water-power bill in its place."

We are very deeply interested in the development of cheap power, for not only is it the great economic need of the future, on which the comfort and happiness of unborn millions will hinge, but it is an urgently needed present development to unlock the exhaustless resources stored up by nature in our hills and valleys and streams and the very air we breathe. We have studied the Shields bill, and it seems to guard in every way that words can express the production of cheap power. There is no compensation exacted by the Government of the power companies for the harnessing and use of the water power, but there is every provision possible made to restrict them from extorting an unfair profit from their investment. If the proposed law is such as to induce capital to develop the power and yet require it to supply it at a reasonable profit resulting in giving the people cheap power, it seems to us that this, being the one thing most universally desired, would be the best form of compensation for the use of the people's property in our navigable streams

Mr. Pinchot has been before the country as a conservationist for many years now, but if he has ever benefited the people through his propaganda we are unaware of it.

The Montgomery Advertiser, which is also one of the recipients of Mr. Pinchot's excited correspondence, says in reply:

"In order that Mr. Pinchot may have no illusions as to the stand of the Advertiser and the people of this section on the Shields bill, we will inform him that if there was any doubt as to how the Congressman of this district stood upon the measure the editor of the Advertiser would sit down and write him the strongest letter he could compose urging him (the Congressman) to use every means he honestly could to secure the Shields bill's passage, so that we could free and develop our paralyzed resources.

"Representing the sentiment of his district, the second district Congressman is friendly to the Shields bill. In fact, every Member of Congress from this State and the two United States Senators are stanch supporters of the measure, which promises to open to development at last our great water-power resources."

We are frank to confess that we have more confidence in our Democratic Congress and administration than we have in Mr. Pinchot, and we prefer to trust our judgment and theirs as to the merits of the bill rather than follow Mr. Pinchot's visionary lead, which has resulted in nothing practical.

—

[From the Knoxville Journal and Tribune, Feb. 2, 1916.]

THE DEVELOPMENT OF WATER POWER.

The bill introduced in the Senate by Hon. JOHN K. SHIELDS, the purpose of which is the development of water power, is one eminently worthy of consideration in connection with national preparedness. The world is just entering a new epoch in industrial development. It is the beginning of an era when the wonderful powers of electricity are going to be adapted to the use of mankind.

As we understand—we have not seen a copy of the bill—it provides for cooperation between the Government and private capital in the erection of dams on navigable streams for hydroelectric purposes. The Government can well afford, while retaining control of navigable streams for the purpose of navigation, to at the same time give its consent to the use of such streams in a manner not to interfere with navigation, but also for power to drive machinery.

Attention has before been called to what is being done in fixing nitrates in the atmosphere, and in that way obtaining an article in the making of explosives that can now be had only from Chile. In case of a war with a foreign nation that source of supply might be cut off, and then this country would no longer be in a position to make its own ammunition. It has also been demonstrated that nitrogen, by means of electric furnaces, may be had from the atmosphere for making fertilizers.

The bill introduced by Senator SHIELDS is one showing that our Senator is keeping abreast of the time, and it should become a law. It was seen by those who read this paper yesterday that Senator UNDERWOOD, of Alabama, made a strong speech in favor of the bill.

A dispatch, printed also yesterday morning, told of a bill introduced by Hon. R. W. AUSTIN, of this district, favoring the erection of a factory in the neighborhood of Knoxville for making munitions of war. The bill may show that Representative AUSTIN is alive to the interest of his district—that he is always—but it also calls attention to the fact that in building such factories it is wiser and safer to have them at interior points away from the coast.

—

[From the Nashville Banner, Apr. 24, 1916.]

THE WATER-POWER BILLS.

The New York Evening Post calls attention to the opposition from two extreme sources to the water-power bills pending in Congress. The greater part of the water power in the United States available for transmission into electricity is in the mountain regions of the far West, and is largely within Government reservations. There is a great impatience within that region for the development of water power, and the opposition to delays in removing Government restriction partakes of the obstreperous western temperament.

The two water-power bills before Congress, as is generally known, are the Shields bill, that provides for the construction of dams across navigable rivers, and the Ferris bill, that regulates the development of water power on public lands. To this latter bill there is violent opposition in the Rocky Mountain States, which would be the chief scene of its operation. In that region the whole idea of Federal regulation is antagonized. Colorado, Wyoming, Idaho, Utah, and Montana, along with Oregon, want to be let alone to deal with water power on the public domain included within their territory precisely as they see fit. Senator SHAFROTH, of Colorado, asserts that the aim of the Ferris bill is to "confiscate" water power belonging to the States; and he virtually served notice that the handful of Senators from the Rocky Mountain States would not permit any bill of the kind to come to a vote in the Senate.

Mr. Gifford Pinchot, nominally of Milford, Pa., a man born the possessor of a great fortune, who calls himself a professional "forester," and takes a dilletante interest in the conservation of natural resources, represents both the Shields and the Ferris bills as being fraught with iniquity and, for reasons, or alleged reasons, entirely opposite to those that have stirred the people in the Rocky Mountain States to such vigorous protest against any sort of governmental interference that would restrict the rapid development of the great water-power resources of that region.

Considering both of these attitudes, the New York Evening Post, a very judicious and high-class journal that could hardly be suspected of undue leaning toward schemes promoted by sharks, says:

"Our own belief is that anyone who, even approaching the water-power bills with a prejudice against them, gives them a close study, will find that they have a great deal to commend them. In their general aim they appear to be along the lines of Secretary Lane's recommendations. That is, they regulate, they restrict, they provide safeguards, yet they permit of development on a commercial basis. Doubtless a keen lawyer might find lurking perils in phraseology. A layman will suspect some. It is possible that the true and large interests of national conservation are endangered by one paragraph or another. We freely admit this, though our own examination of the bills does not disclose the alleged glaring defects. But our purpose at present is neither to defend not attack the bills as they stand. What we would urge is that the whole subject be given fair consideration in Congress and by the press; that the minds of those interested be brought together; and that the great need of reasonable legislation on this subject be not lost sight of in angry controversies over details. The United States is lagging behind in hydroelectric development; and the chief reason is that for six or eight years we have been laboring in vain to secure laws under which this neglected national work can be done. It will be a severe reproach to Congress if it fails to give due weight to this branch of national preparedness and does not hammer out workable bills, fair to all concerned, before it adjourns."

The Ferris bill doesn't materially affect the South. There are no Government reservations of consequence in this section containing great water powers, but the Shields bill that has to do with the damming of navigable streams is of close concern to southern interest and has been quite generally and earnestly approved in this section and in other parts of the country where conditions are similar to those in the South. All southern Senators except two, one from Tennessee and one from Texas, voted for it.

Only one Tennessee paper, so far observed, has been responsive to Mr. Gifford Pinchot's contention about the matter, and the motives that stir this journal are so obviously different from the idealism that moves Mr. Pinchot, they so plainly proceed from personal spite and individual

jealousy, having really no regard to either the merits or faults of the bill, that the opposition is of little consequence.

The gist of the matter lies in the two last sentences of the extract here reproduced from the comments of the New York Evening Post. Congress should do something to put the United States abreast of the world in this important matter and not allow the development of the country's resources to be hampered and retarded by useless legal restriction and the protests of sentimentalists.

The laws controlling our rivers were made with the sole view to navigation and without a thought of hydroelectric power, that promises to revolutionize industry and transportation, that means economic progress, and that the country must have if it is going to keep pace with the rest of the world.

Canada and Norway have both attracted capital that first sought investment in the United States, but went elsewhere because of the legal obstructions growing out of the use of streams in this country.

Tennessee should be proud to have a Senator broad enough to give thought and purpose to constructive legislation looking to the material progress of the Nation.

—

[From the Chattanooga News, Mar. 9, 1916.]

BILL MEANS MUCH TO CHATTANOOGA—SENATOR SHIELDS CONGRATULATED ON ACHIEVEMENT—LOCAL MANUFACTURERS AND BUSINESS MEN ELATED—$50,000,000 WILL BE EXPENDED IN BACK YARD OF CHATTANOOGA.

Telegrams of congratulations were sent Senator JOHN K. SHIELDS Thursday by President Fred Arn, of the manufacturers' association; President Huston, of the chamber of commerce; Vice President Z. C. Patten, jr., of the same organization, and other citizens, expressing gratification at the passage of his river bill through the Senate Wednesday.

According to local manufacturers and capitalists, there will be $50,000,000 spent in the "back yard of Chattanooga," meaning at Muscle Shoals, as a result of the passage of the bill. They think there is no doubt of its passage through the House, and are regarding the Muscle Shoals development as already a certainty.

Twenty millions will be spent by the Federal Government at the shoals as a result of the bill's passage. Thirty-millions of private capital will be added to that. There will be a nitrate plant, and much surplus power delivered to Chattanooga, being an inducement of great pulling power for more great manufacturing plants to locate themselves in Chattanooga, and the consummation of one of Chattanooga's most fervent hopes will be realized—year-around navigation on the Tennessee River.

The expenditure of the Government's $20,000,000 will come about as a result of the adoption of the General Army Staff plans for the building of a nitrate plant. Muscle Shoals is the only available inland site for such a plant, and with the building of the dam and power plant there the Government will have power already furnished ready for use.

Regarding the building of the dam, financiers have been ready for several years to erect it at any time the Government would allow them to do so. They have not only been ready, but anxious, and it is expected that very little time will elapse before tangible developments will be under way.

—

WASHINGTON, *March 9, 1916.*

The Shields water-power bill, after several weeks of filibuster on the part of its opponents, passed the Senate yesterday by a vote of 46 to 22, and now it goes to the House for consideration. In the closing hours of the conflict between the friends of conservation and the supporters of the plan to grant public rights for private privileges there was exhibited intense feeling among those who debated the question, and especially on the part of those who protested against the passage of the bill were there uttered harsh terms and exhibited feeling of resentment. When the bill was placed on its passage some of the leading opponents of the measure denounced it in severe terms as a giving away of rights that should be forever guarded and preserved by the Government.

—

[From the Knoxville Sentinel, Mar. 11, 1916.]

SHIELDS WATER-POWER BILL.

It seems to us that the two vital interests involved in the Shields water-power bill as it passed the Senate, the offering of inducements for the development of water powers to generate hydroelectric power and guarding against the confiscation through monopoly of the people's interest in these far-reaching and all-important natural resources, have been served.

The two important objections offered by Mr. Pinchot and the other conservationists of Mr. Pinchot's way of thinking are that the Shields bill gives to the power interests the use of the power on navigable streams without compensation, and that it would create a monopoly in the use of these.

The present situation is that these vast potential resources of industrial activity and creative wealth are going to waste without doing either the people or the interests any service because of nonuse.

The provisions of the bill as passed appear to us to obviate both of the Pinchot objections. It is not provided that the power interests shall directly compensate the Government for the water-power rights, but the granting of these are so hedged about by governmental supervision, regulation, and control, with State commissions and the Interstate Commerce Commission given power to regulate rates in the interest presumably of both the power companies and the consumers, that the most valuable consideration must accrue to the people in cheap and abundant electric power to serve all the vast and varied industrial and domestic needs that this agency is destined to take care of in the future.

It is true, we think, that the conferring of these great water-power rights, under the discretion of the Federal Government, will insure to the power interests well-nigh incalculable profits, but the mutual profit to the public will doubtless foot up greater still, while without the inducement to the power interests to invest their capital and enter upon the enterprise, nobody will be benefited, since the power interests decline to venture their capital in it under existing laws.

"The bill is primarily framed in the interest of the consumers," Senator SHIELDS states. "It provides for cheap power by which fertilizers and many necessaries of life can be produced and furnished to the people cheaper than is now done with power produced by steam. It contains an express provision prohibiting a development from constituting a part of a monopoly or a conspiracy in restraint of trade, supplemental to the prohibitions of the Sherman antitrust law. It gives the public-service commissions of the State where the plant is located jurisdiction to fix and regulate the rates charged to the consumers for the hydroelectricity and power produced, except when it enters into interstate commerce, and then jurisdiction is vested in the Interstate Commerce Commission.

"Instead of giving the power companies anything which can be used for exploitation of the public, this bill, by retaining to the Government the title in the power site, closes the door to any stock watering or financial chicanery which might serve as an excuse for high rates or charges. Under this bill capital is offered certainty of tenure and reasonable terms which will assure development, the public is amply protected by provisions insuring low rates and only fair profits, and the whole country will benefit by the use of a now neglected and disused resource which will conserve the fuel supply."

The measure thus guarded and hedged about in the interest of the people has rightly been declared to be a great piece of constructive legislation, and the passage of the bill in the Senate by more than a 2 to 1 vote is an achievement of which Senator SHIELDS may well be proud, in view of the fact that it is the result of quiet, persistent, intelligent, and sustained work amid the hurly-burly of a session of Congress which has had much to do with wars and rumors of war.

The Sentinel heartily joins with other friends of Senator SHIELDS in extending congratulations to him for the success of his measure in the Senate and our best wishes for its similar success in the House.

—

[From the Nashville Banner, Mar. 18, 1916.]

THE WATER-POWER BILL.

President Wilson, in a letter to Representative KENT, of California, has said: "I agree with you that it is better to let water power run to waste than to settle the question of its use in the wrong way." This has been seized upon by some of the so-called conservationists as an indication that the President is opposed to the Shields water-power bill as it passed the Senate, and may veto it if it passes the House. The language used by the President in this letter doesn't warrant that conclusion, and if he should take that course it would not necessarily follow that he was right. His infallibility as yet has not been established.

There is, of course, a wrong way in which the question concerning the use of water power might be settled, but it doesn't follow that the President considers the provisions of the Shields bill in that light. The President ignored the extravagant protest made to him by Mr. Gifford Pinchot on the subject, and that is as strong an indication of his position relative to this specific measure as was the generalized expression quoted from the letter to Congressman KENT.

In Sweden and all over the world, except, temporarily, perhaps, in those unfortunate lands involved in war, water power for the manufacture of electricity and atmospheric nitrogen is being rapidly developed. Capitalists eager to invest in such enterprises in the United States have gone in preference to Canada, because of legal restraints in this country. The United States wishes to keep abreast of the world in this important particular, and there should be no unreasonable delay in beginning.

The hope of the development and growth of southern industry lies largely in the new uses to be made of water power. The South for many years has lagged painfully in industrial progress, largely through sentimental reasons and because of too much adherence to the teachings of political doctrinaires; it should not suffer any longer impediments of this kind if they can be avoided.

There is in Tennessee more than a million horse power in water power that needs legislation like that embodied in the Shields bill to facilitate its development.

There are immense possibilities in the Mussel Shoals of the Tennessee River, within easy reach of Nashville, awaiting development that should not be delayed.

If work of this kind is accomplished, it must be in the main through the agency of private capital seeking profitable investment. Monopolies and franchise grabbing are evils to be always considered. The Shields bill, it is understood, contains adequate provisions for the protection of the public interest in that regard. It is baneful sentimentality that would obstruct needed industrial progress through mistaken ideas of conserving public rights in natural resources that the public is never going to develop through its own agencies.

—

BUSINESS MEN'S CLUB, MEMPHIS.

Resolution adopted by the Business Men's Club Chamber of Commerce, Memphis, Tenn., at a regular meeting of the board of directors, May 19, 1916.

Resolved, That the Business Men's Club Chamber of Commerce of Memphis, an association representing the commercial and agricultural interests of Memphis and the prosperity and comfort of a population of 200,000, hereby indorses the Shields bill as passed by the Senate, free from impractical provisions that so disastrously have prevented water-power development in recent years, and hereby respectfully urges upon the House of Representatives the immediate passage of this bill; and be it further

Resolved, That a copy of this resolution be mailed by the secretary of this association to every Senator and Congressman from the State of Tennessee, and to every commercial and agricultural association with whom this association is in correspondence or affiliation.

[From the Nashville Banner.]

PINCHOT'S ATTACK ON SHIELDS BILL DRAWS FIRE OF SENATOR UNDERWOOD, WHO CHAMPIONS THE MEASURE.

[By Jesse S. Cottrell.]

WASHINGTON, *February 2.*

Gifford Pinchot, former Chief Forester of the United States, and the leading spirit in the ultraconservative school of conservation, is out in an attack of what is known as the Shields water-power bill, introduced in the Senate by Senator JOHN K. SHIELDS, and designed to develop the water powers of the country, with ample protection afforded for all interests involved.

Tennessee and Alabama are perhaps more deeply concerned about the fate of the Shields bill than any other States, owing to the million dollars awaiting Federal permission by such legislation, as proposed in the Shields bill for investment in the South. Senator OSCAR W. UNDERWOOD has replied to Mr. Pinchot's criticism as follows:

"Mr. Pinchot's objections to the Shields bill, it seems to me, are based largely upon a misunderstanding of the actual provisions of the bill. One of his main objections is based on the idea that if the bill passes

it will enable great corporations to monopolize the water power of the country. If it is true that there is a monopoly of the water powers of the United States to-day, which I do not recognize to be a fact, the failure to pass legislation only makes that monopoly more secure in its actual vested interest, because competition is throttled by the failure to develop the water powers on the navigable streams of the United States.

"There has been no development of the water powers on navigable streams under existing legislation in the last decade; and if the obstructionists who have endeavored to prevent legislation that will bring about the development of the water power of the navigable streams of the country would succeed in their efforts to block legislation, there would be no relief from the monopoly they complain about. The Shields bill does not grant rights or privileges to anyone, but merely places in the hands of the Secretary of War, acting through the Government engineers, the right to grant permits to build dams for the purpose of aiding navigation and the production of hydroelectric power on such terms as the Government, in its wisdom, shall agree to.

"I am not prepared to agree to a statement that implies that our Government, acting through the Secretary of War and the engineers of the United States, would agree to permits that would continue or produce a monopoly of the hydroelectric power of this country.

"I can not at this time go into a complete analysis of the Shields bill, but I am of the opinion that anyone who will read the bill and compare it with Mr. Pinchot's statement will find that there are very few of the statements by Mr. Pinchot that are sustained by the provisions of the bill."

—

[From the Nashville Banner, Nashville, Tenn., Mar. 14, 1916.]

WATER POWER.

For many years the South has been admonished that its greatest need is the development of its natural resources, and the admonition had its basis in self-evident fact. In so far as the South has been favored by nature, no portion of the globe is more liberally endowed with great advantages and possible wealth.

In so much as this region has been backward and not materially abreast of other portions of the country—some of them less favored by nature—the reason was that its resources were undeveloped. It is not necessary here to consider those reasons. They came in most part of past conditions and circumstances that are now being rapidly overcome.

One thing that affords much promise for the utilization of the South's great natural resources is the immense use to which water power under advanced methods may be put, and the facilities the South possesses for meeting the demand for the application of this power to manufacturing and other extensive purposes in consonance with the progress of the day.

The Shields bill that recently passed the United States Senate and is now pending in the National House of Representatives has for its purpose the facilitating of that work, and it received the votes of all the southern Senators except two—LEA of Tennessee and SHEPPARD of Texas. The senior Senator from Tennessee did not explain his vote, but it was in keeping with his usual personal antagonism to his colleague, the junior Senator, who was the author and chief advocate of the bill.

The Banner approved the passage of this bill on its merits without regard to who advocated or opposed it, and it is on its merits that it will and should be considered by the country.

Mr. Gifford Pinchot, an impractical enthusiast, whose inherited wealth has enabled him to spend time and money in quixotic exploitations, has scattered a circular letter broadcast over the country in opposition to the Shields bill. He first put his objections in the form of a letter to President Wilson, that the Chief Executive ignored and the news associations refused to handle. Then it was put in the form of a circular and widely disseminated. The Banner received a copy some weeks ago. Yesterday it was reproduced in the Tennessean and American.

The Shields bill was introduced at the last session of Congress and was favorably reported by the Commerce Committee in that body. It was not reached on the calendar, but was reintroduced at the present session of Congress. It was again unanimously recommended for passage by the Commerce Committee and passed by the Senate by a substantial majority.

Mr. Pinchot's extravagant assault on the measure was without practical effect on the Senate. The local publication of his letter had probably an ulterior purpose that is also likely to fail.

The Shields bill authorizes companies and corporations, with preference to municipalities and public-utility companies, to build dams in navigable streams for power-development purposes without resort to Congress, but plans must be submitted to the Secretary of War and his permission obtained before the work can proceed. He may impose certain conditions, including the construction of locks and dams and other facilities for navigation, at the expense of the company undertaking the work. The permit is limited to 50 years, and may be forfeited sooner by violation of its terms. At the end of 50 years the property may be taken over by the Government and re-leased under then existing laws.

It is further provided that the business and property of the company making the development shall be subject to the laws of the State wherein located, and the charges and rates for water and power shall be regulated by the States and be subject to State taxation after the manner of other public-service corporations.

These salient features of the bill destroy the Pinchot contention that the measure is in the interest of monopoly and would make possible the unjust seizure of public rights by greedy corporations.

The provisions of the bill apply to the country at large, of course, but the South has a peculiar interest in its provisions, and Tennessee may specially benefit by what it makes possible. It is estimated that east Tennessee alone has water power in the aggregate of 1,000,000 horsepower which can not be developed under existing laws.

There is at the Muscle Shoals, in the Tennessee River, a water-power possibility of over 600,000 horsepower. This is in northern Alabama, but in easy reach of Nashville and other Tennessee cities, for which it could furnish hydroelectric power.

The development of the Muscle Shoals might also be used for the fixation of atmospheric nitrogen used in the manufacture of fertilizer and high explosives. The annual importation of nitrogen into this country from Chile amounts approximately to $21,000,000. The Muscle Shoals is said to be the finest location in the United States for a plant for producing atmospheric nitrogen.

Capitalists seeking locations for water-power development have been going to Canada for the location of their plants because of unfavorable restraints on such investment in this country that the Shields bill would remove.

So far from creating a monopoly, the bill would lend such facility to investments of this kind as to destroy monopolies now existing. It is said, in fact, that the chief opposition to the measure has come from those who control existing water-power plants in the Northwest and who are afraid of the competition it would make possible.

While the public rights are properly safeguarded and conserved, every possible facility and encouragement should be given to the investment of capital in enterprises of this character. The progress it would bring is not to be impeded by men imbued with political animosities, seeking personal revenge, nor by the vagaries of fanciful idealists, or yet by egotistic sentimentality that exploits itself for the sake of notoriety.

—

[From the Chattanooga Times, Chattanooga, Tenn., Mar. 16, 1916.]

THIS CITY TO GET BENEFIT—RIVER MAY BE IMPROVED AS AN INCIDENT TO PREPAREDNESS—MANY COMPLIMENTS PAID SHIELDS FOR HIS VICTORY—COMMERCIAL AS WELL AS MILITARY IMPORTANCE CONNECTED WITH PROJECT FOR ESTABLISHING NITROGEN PLANT AT MUSCLE SHOALS.

Having just returned from Washington, a local business man and manufacturer gives the following impressions gathered at the National Capital:

One of the members of the brigade post committee made a very interesting report, giving some information gathered at Washington which is welcome news to those interested in the development of this section.

Among other things he commented on the fact that while in Washington last August he found very few Members of Congress who happened to be there and very few citizens throughout the North and East who had much interest in the question of the fixation of nitrates from the air. Only a few who had made a study of this condition abroad and who were familiar with what it had meant to Germany in the past 12 months were talking, only in a general way, about the nitrate needs of this country. Since that time a tremendous volume of literature has been compiled and distributed throughout every State in the Union and placed in the hands of every Member of Congress, until now the entire country is alive to the fact that something must be done to free this country from its dependence on Chile.

Certainly anyone who spends time in Washington will not fail to hear from almost every quarter compliments paid to the fine manner in which Senator SHIELDS conducted the fight for his general dam act. And certainly one less skilled in a parliamentary way than Judge SHIELDS would have been far less successful. This act, having met all the so-called "conservation opposition" that was possible, and coming through with such a tremendous majority, practically insures its passage through the House; but much more difficulty would have been experienced had not the general feeling been so strong for power developments to meet the requirements of the Government, which made everyone feel kindly to any measure that looked to the utilization of this waste energy and the applying of it in some practical way.

URGENT FEATURE OF THE PREPAREDNESS MOVEMENT.

Two significant things happened last week which have been noted in the press, but their significance was especially realized by those who have been in direct touch with the affairs in Washington. One was the meeting in New York of the Naval Advisory Board and the report of Dr. W. R. Whitney, of Schnectady, N. Y., who had been delegated to make a report on the production of nitrogen from the air. His report was unanimously approved, and, among other things, were these significant statements: That the Naval Advisory Board should urge President Wilson to take such steps immediately as might be necessary to create a commission, preferably from the Departments of Agriculture, Interior, War, and Navy, to make effective immediately such plans as might be necessary for the Government production of nitrogen from the air, further stressing the fact that it is not only immediately vital from the standpoint of "preparedness," but equally important from an economic standpoint in making adequate fertilizer for the farmers at a reasonable price. The commission was urged to plan immediately for the utilization of water powers in working out the proposed plant or plants. The next day there appeared from the Government press, Report No. 297, from Mr. HAY, as chairman of the Committee on Military Affairs, together with a report on the hearing before that committee, on ways and means for increasing the efficiency of the Military Establishment of the United States. This report is one of 24 pages, and while it deals with all phases of "preparedness" the following paragraph stands out paramount in the entire report:

"The bill also provides for the authorization of the plan for the manufacture of nitrogen in order to supply the country with powder to make it independent in time of war of every foreign source of nitrogen. This committee considers this question of the first importance in the consideration of preparedness for national security."

Following this, in small type, six pages are devoted to the arguments and data in favor of such a proposed measure. With this report coming from the Military Affairs Committee, backed by the sentiment in the Senate, as evidenced by the Shields bill, also coupled with the report of the Committee on Agriculture, emphasizing the nitrogen interest as of first importance from the agricultural standpoint, it almost seems that the bill authorizing the appropriation for an air-nitrogen plant would be passed quickly and by an overwhelming majority.

BETTER WATERWAY AT CHATTANOOGA IN PROSPECT.

While the proposed measure will not designate Muscle Shoals as the location for this plant, it is a fact that the Government engineers have not made a report on any other adequate location and almost all of the prominent dailies throughout the country have published the statement that when this bill was passed it would mean the immediate designation of Muscle Shoals and immediate work on the large dam at that point. This would then leave but two smaller dams, which would be entirely incidental, and of course they would be provided for at an early date through the Rivers and Harbors Committee of the House and the Commerce Committee of the Senate; in fact, one of the most influential United States Senators made the statement that the very importance of the Tennessee River would not even require another visit from a delegation, as they would be put through as soon as work could begin without any fight.

When it is considered that only a small proportion of the power will be necessary for Government use and a large proportion will be utilized for industrial purposes, all of which or a great part of which can be economically utilized here in Chattanooga, the passage of this measure will mean the biggest development for the South that has ever come

our way; and, coupled with all, it gives us at least 6 feet in the Tennessee River from Chattanooga to Paducah 12 months in the year.

—

[From the Nashville Banner, Mar. 2, 1916.]

IMPRACTICAL MR. PINCHOT.

Hon. G. E. Condra, chairman of the executive committee of the National Conservation Congress, has disavowed the right of ex-Chief Forester Gifford Pinchot to speak for the congress.

Mr. Pinchot is very active in opposition to water-power bills now pending in Congress. Very officious would likely be the more appropriate term. In the administration of the office of Chief Forester he proved himself an impractical enthusiast and his continued voluntary work in the cause of conservation is of the same character.

Conservation is a proper principle, but Mr. Pinchot would retard industrial development and prevent the utilization of the water powers of the country, now so extensively undertaken, or projected, for the purpose of producing electricity. The practical sense of the country doesn't accord with Mr. Pinchot's theories.

Hydroelectric power promises much for industrial progress, but Mr. Pinchot would retard or prevent its development by private capital for corporate uses. He calls that the appropriation of public rights for private use. Yet such rights would be of small benefit to the public as long as they are not utilized and under existing economic conditions they can't be utilized, or assuredly are not likely to be utilized except by the investment of capital to which the enterprise promises profit.

The public domain and what pertains thereto should be carefully conserved for the public benefit. There has likely been much wastefulness of this kind in the past. In many instances the public possibly has been robbed to glut private greed. The public interest should be well guarded against that manner of rapacity, but the public interest also demands development and it would be folly to impede it through the quixotic ideas on the subject Mr. Pinchot seems to entertain.

—

[From the Morristown Gazette, Morristown, Tenn., Mar. 15, 1916.]

WATER-POWER DEVELOPMENT.

The Shields bill that has passed the Senate and is now ready to go before the House will, if it becomes a law, not only render farmers and planters independent of Chile's present monopoly in nitrates, commonly called saltpeter, but will cheapen the fertilizer 50 per cent, and also greatly aid the Government in the manufacture of explosives by the use of the nitrogen fixation plant, which would obtain its means of operation from the waterways that capital will be encouraged to develop. The numerous streams and tributaries that are at the present time allowed to waste their colossal energy and might in the useless condition which they have so long been kept will be harnessed to water wheels and various other mechanical inventions of late years and made to furnish the same amount of horsepower, or a volume of electricity equaled to that produced by a coal consumption of 100,000,000 tons a year, thereby saving, it is estimated, $700,000 a day in coal bills. The Shields bill, while it encourages capital to aid in the development of water power and the rivers, at the same time provides that the Government will not relinquish supervision over the same. It was due to the untiring efforts on the part of Senator Shields that this bill was passed, it being opposed by such clever parliamentarians and able debaters in the Senate as Senators REED, CUMMINS, and WALSH. The vote of 46 to 22 makes it evident at a glance that Tennessee's eminent statesman won a victory of no small importance in the United States Senate.

—

KNOXVILLE BOARD OF COMMERCE, KNOXVILLE, TENN.

Whereas this whole Appalachian section is much interested in the development of hydroelectric plants and in the preservation and conservation of the watersheds involving the permanency of our water-courses; and

Whereas we recognize in the so-called Shields water-power bill, which was recently passed by the United States Senate, a broad, comprehensive, and statesmanlike treatment of the subject of the construction of dams across navigable waters: Therefore be it

Resolved, That we heartily approve of said bill as passed by the Senate and recommend the same to our Congressman in the lower branch of the Government: And further

Resolved, That we congratulate Senator SHIELDS on the splendid statesmanship shown by him in the preparation of this measure and in successfully engineering it through the upper branch of Congress.

—

[From the Knoxville Journal and Tribune, Apr. 14, 1916.]

KINDLY ADVICE UNAPPRECIATED.

The editor is in receipt of a fatherly sort of a letter from a distinguished citizen and patriot warning him and the country against the iniquities of the Shields water-power bill. The letter is from Gifford Pinchot, who carried upon his broad shoulders the national interests of conservation.

It was very kind of Mr. Pinchot to write the letter, and in writing it he meant it for our and the country's good. It may be congenital obtuseness on our part, but we have to confess we don't see the danger lurking in the Shields bill as it is seen by the ever-watchful Pinchot eye.

We happen to be one of those who believe the time has come when this country should take advantage of its water power in the promotion of our industries. The fact has been developed that through the use of such power, electricity may be generated at a reasonable cost, and in that way electric motive power may be applied to many inestimable uses.

We are living at a time when one of the subjects more discussed than any other is that of preparedness for national defense. Preparation for national defense means, along with other things, facilities for manufacturing munitions of war. Explosives can not be made without nitrogen, our supply of which is shipped all the way from Chile. But through the use of electric power we may procure our nitrogen, taking it from the atmosphere.

By that process we may add largely to our supply of fertilizers, something the farmers of the country need if they are going to keep up and add to the productivity of their soil.

We are truly sorry that we do not see in the Shields bill the iniquities as Mr. Pinchot sees them, and while grateful to him for his gratuitous advice, as we see it, we can not work ourselves up to the point of agreeing with the great conservationist.

[From the Nashville Banner, Apr. 18, 1916.]

HYDROELECTRIC POWER.

An example of the great use to which hydroelectric power will be put in the future is afforded by the Chicago, Milwaukee & St. Paul Railroad. That corporation will operate 440 miles of track, from Harlowton, Mont., to Avery, Idaho, with that manner of power. One hundred and fifteen miles of the route is now in operation.

This line will be along what is known as the backbone of the continent, in the region of the Great Divide, at an altitude of 6,300 feet.

The trains will be pulled by heavy electric tractors that will displace steam locomotives, and the power will come mainly from the great falls of Montana. At several other points the energy of mountain streams transformed into electricity will add to the power supply.

The electric tractors employed on this road are described as veritable leviathans. They weigh 284 tons, with a length of 112 feet 8 inches. They draw heavier trains at a higher speed than the steam locomotives, and over steep grades. Each is said to be more than 10 per cent more powerful than the modern Mallet engine.

The electric engines are smokeless and comparatively noiseless. They are more efficient and much cheaper than the coal-burning locomotives.

Hydroelectric power is going to work wonders in transportation and industry, and there should be no unreasonable impediments to its speedy development wherever it is available.

—

[From the Chattanooga News, May 9, 1916.]

The National Conservation Congress indorsed the Shields water-power bill by a vote of 116 to 39. The bill has been much maligned. It is by no means a "grab" measure, and the rights of the public are fully protected. It will develop the waterways. At a time when measures having to do with waterways are classed by the thoughtless as "pork," it is a welcome sign when the Conservation Congress realizes that true conservation means making the best uses of the forests and waterways for the public and not, as many believe, keeping hands off of waterways and forests.

—

[From the Chattanooga News, Mar. 10, 1916.]

SHIELDS BILL IN THE HOUSE.

The Shields bill, which has passed the Senate and which Senator SHIELDS declares will be followed, if enacted, by early development of water powers aggregating 15,000,000 horsepower, or a volume of electricity equal to that produced by a coal consumption of 100,000,000 tons a year, and meaning the saving of $700,000 a day in coal bills, will have a hard fight in the House.

Under the Shields bill the Government will have strict supervision of development of water power. While capital is encouraged to help develop the water power and the rivers, the Government does not relinquish supervision. The rentals are to be converted into funds for improving the waterways. The development of the water powers will center interest of the people on the waterways and will force the Government to give the waterways at least halfway adequate treatment.

Some of the strong points of the Shields bill show the manner in which its enactment might bring about the development of waterways throughout the country. Under its terms the Secretary of War is authorized to grant permits for dams and power plants where he believes the building of such dams will improve navigability of streams. Dams are to be built without cost to the Government, and the grantees are to provide and operate locks, gates, sluiceways, etc., all without cost to the Government. Permits may be granted to individuals, political subdivisions of States, cities, or other municipal corporations, or to public-utility corporations. Intrastate business and rates of companies operating under the act are to be regulated by the States, and interstate service and rates by the Interstate Commerce Commission.

All plans for dams and works are to be approved by the War Department as being the most adaptable plans for improvement of navigation and fullest development of water-power possibilities. The grantee is to pay a rental for public lands used and a charge for rights and privileges in use of water, these rentals and charges to be fixed at the discretion of the Secretary of War, and the money received from same to go into a special fund in the United States Treasury to be used for further improvement of waterways. Actual construction work on any project is to be begun within two years of the granting of the permit, and the works are to be completed within such reasonable time as the Secretary may prescribe. For failure to complete the works as directed, or for violation of the provisions of the act, or noncompliance with regulations or orders of the War Department, the grantee is subject to heavy cash penalties or to revocation of the grant.

Permits are to be granted for 50 years, after which time the Government may either extend the original lease, make a new grant, or upon one year's notice take over the property upon payment of its fair value, this value to be determined by mutual agreement or by the Federal courts, and not to include any allowance for any rights granted by the Government. The bill also provides that no value of rights granted by the Government shall be allowed in fixing rates to consumers. Dams, locks, and other structures used primarily for improving navigation are to be exempt from taxation.

Leading Chattanoogans, through the News, expressed themselves as gratified at the passage of the measure in the Senate. It is believed that the Shields bill will open the way for the full realization of the great Muscle Shoals plan.

—

[From the Knoxville Journal and Tribune, Apr. 17, 1916.]

PINCHOT'S PEN.

The Montgomery Advertiser is another paper whose editor is in receipt of a letter written "on some elegantly embossed stationery" by Gifford Pinchot, who seems to have taken upon himself the task of telling all editors of the "iniquities" of the Shields water-power bill. Three of these have been recently received by the editor of the Journal and Tribune.

Mr. Pinchot, be it known, is about the only man left to look after the conservation interests in this country of ours. But he does not seem to have the influence with the editors he thinks he should have. The editor of the Montgomery Advertiser is one of the stiff-necked ones, and makes reply to the letter in the unsympathetic paragraph here copied:

"In order that Mr. Pinchot may have no illusions as to the stand of the Advertiser and the people of this section on the Shields bill, we

will inform him that if there was any doubt as to how the Congressman of this district stood upon the measure, the editor of the Advertiser would sit down and write him the strongest letter he could compose urging him, the Congressman, to use every means he honorably could to secure the Shields bill's passage, so that we could free and develop our paralyzed resources."

—

[From the Chattanooga News, Feb. 28, 1916.]

THE SHIELDS BILL.

A hot fight is being waged on the Shields bill to provide for leasing of water-power sites on navigable waters to private interests. The measure may be so amended as to satisfy the conservations leaders, who are opposing it.

The Shields bill applies only to navigable streams. It will not interfere with the conservation of small streams and creeks.

Recently in defense of his bill Senator SHIELDS said:

"Speedy development of 150,000,000 horsepower now flowing to waste in the navigable rivers of the United States will follow the enactment of this bill into law. This power is equal to that now generated by steam plants which are now consuming over 100,000,000 tons of coal annually, at a cost of approximately $250,000,000 a year, or $700,000 a day.

"These unused water powers can not be developed until this legislation has been enacted, because present laws do not offer terms which will induce the investment of the hundreds of millions of dollars that must be put into the dams, wheel pits, power houses, and transmission lines. In the United States to-day there is not a single plant in operation for the fixation of atmospheric nitrogen and the production of cynamide and nitric acid, while Europe, with no better average water powers than ours, is utilizing more than 1,000,000 horsepower in these wonderful new electro-chemical industries. This in itself is the complete proof that American investors will not put their money into water-power development and dependent new industries under the present laws."

He declares the bill is primarily framed in the interest of the consumers; that it provides for cheap power by which fertilizers and many necessaries of life can be produced and furnished to the people cheaper than is now done with power produced by steam; that it contains an express provision prohibiting a development from constituting a part of a monopoly in restraint of trade, supplemental to the prohibition of the Sherman antitrust law. He says, also, that it gives the public service commission of the State where the plant is located jurisdiction to fix rates and regulate the rates charged to consumers for the hydro-electricity and power produced, except where it enters into interstate commerce, and then jurisdiction is vested in the Interstate Commerce Commission.

Senator SHIELDS says:

"Instead of giving the power companies anything which can be used for exploitation of the public, this bill, by retaining to the Government the title in the power site, closes the door to any stock-watering or financial chicanery which might serve as an excuse for high rates or charges. Under this bill capital is offered certainty of tenure and reasonable terms, which will assure development, the public is amply protected by provisions insuring low rates and only fair profits and the whole country will benefit by the use of a now neglected and disused resource which will conserve the fuel supply.

"The United States has no property interest in the waters and beds of navigable streams. These belong to the States and the riparian proprietors. The Supreme Court of the United States has frequently held that the United States has no proprietary interests in navigable streams, but solely the police power to improve and regulate them for navigation under the commerce clause of the Constitution. But the present laws prohibit the use of them without consent of Congress. This bill authorizes the Secretary of War to give such consent after full examination of the proposed improvement and the navigable resources of the stream upon such conditions as he may require, including the construction of locks and all other navigation facilities, at the expense of the company making the improvement."

In other words, it is the opinion of Senator SHIELDS that his bill will greatly encourage just such developments as that at Hales Bar. The dam, locks, and other navigation facilities were built by Mr. Brady at his own expense. Advocates of the Shields bill think it will facilitate the Muscle Shoals development, which will be the third largest power development in the United States, and will furnish power for the treatment of the great phosphate resources of Tennessee, greatly reducing the cost of rendering it into condition to be used as fertilizer, by a process much cheaper than the present treatment by sulphuric acid.

In spite of Senator SHIELDS's strong defense of the bill, it is said that there is a large lobby in its favor—and this arouses distrust in the measure as to its power to protect the interests of the people against the trusts. Legislation which will bring development of the water power and improvements for the navigable streams is greatly to be desired. Wilson, Lane, and others have recommended it. It should be such legislation as will fully protect both the interests of the public and the investors. The Government is showing an inclination to fail in its duty to the waterways. Certainly the water power resources of the country have hardly been tapped.

Whether the Shields bill offers sufficient protection to the public or not, it will show the way for a measure which will fill the requirements.

—

[From the Knoxville Journal and Tribune, Mar. 10, 1916.]

THE SHIELDS WATER-POWER BILL.

This important measure, of which Senator JOHN K. SHIELDS is the author, was passed by the Senate Wednesday by a vote of more than two to one. As passed it is substantially as at first written by Senator SHIELDS. No amendment was adopted that did not meet with the approval of the Tennessee Senator.

As has before been stated in this paper, the bill provides for the erection of dams on navigable streams for the purpose of furnishing water power for industrial purposes. Licenses for such dams may be had from the Secretary of War. Ample protection is made against monopoly, and the interests of the Government and the public are safeguarded. The opposition to the bill was engineered chiefly by Gifford Pinchot, who for some years past has presumed to have a commission from Deity, or words to that effect, to take charge of all conservation interests in the country.

Senator SHIELDS has been complimented for the skill and ability with which he has managed his bill, the final vote after weeks of discussion bearing testimony to that.

It is something of a coincidence that on the same day the bill was passed in the Senate the Naval Consulting Board of the United States, in session at New York, adopted a resolution requesting Secretary Daniels to urge the President to create a commission to make effective the synthetic production of nitrogen in this country.

While the subject of preparedness for national defense is uppermost in the minds of the American people, the fact will not be overlooked that we are now and have been dependent upon Chile for a supply of the nitrates. In case of a war of invasion such a supply from that source would be in danger of obstruction, cut off, and then the Nation would be out of material for use in the manufacture of explosives.

Such a risk as that need not be taken, and the Shields bill, if it passes in the House and becomes a law, will facilitate the production of our own nitrates by the use of water power. What is proposed by the Naval Consulting Board will be accomplished through the Shields law.

—

[From the Chattanooga Times.]

SHIELDS WATER-POWER BILL.

There seems to be reason for believing that the Shields bill releasing water power now tied up and of no use to the country, because the Government plays a sort of dog-in-the-manger policy—refusing free concessions to private enterprise and declining itself to develop the same—may become law, even the conservationists who have been opposing it having at last agreed that it is not such a bad law after all. The objection made to it, that it gave away in perpetuity rights that ought to be kept in trust for the future generations of the country, has been overcome, for the very simple reason that the proposed bill does not give away the rights in perpetuity at all; it simply authorizes the Government to dispose of any power sites under its control to private parties for 50 years, at the end of which time the Government may itself take over the property at a fairly appraised valuation and use the same in any way it shall deem best for the benefit of the public. Every possible safeguard, it would seem, has been thrown about the measure, so as to prevent the exploitation of the public and the abuse of public rights. We are quite sure that if States and municipalities had been as careful in granting their franchises to railroads and public-utilities corporations as the provisions of the Shields bill is in protecting the rights of the people there would never be any outcries against exorbitant charges, excessive rates, and gross discrimination, such as have been practiced by those operating railroads, water plants, telephone exchanges, etc., all of which are supposed to be creatures of, and therefore the servants of the public.

The strongest argument for the passage of the Shields or a similar bill to the same purpose is that millions of dollars are ready for investment in plants having for their purpose the development of electrical power through the use of the inland waters of the country. Senator SHIELDS has said that if this bill should become law the development along the Tennessee River would within the next few years add immeasurably to the wealth of the country and become a most powerful agency in promoting the industrial development of the States through which it passes. As it is, few men of wealth are willing to undertake such development hedged about as they would be under present rules and regulations governing running streams under control of the Government.

—

[From the Chattanooga Times.]

SHIELDS WATER-POWER BILL.

The Shields water-power bill pending in Congress has been attacked by Mr. Gifford Pinchot and others on the ground that it opens up the way for selfish personal interests to absorb all the water power of the country, thus putting the people in the grip of a merciless trust. In brief, the bill, which gets its name from the author, Senator JOHN K. SHIELDS, of this State, repeals the Federal statute providing that in order to build dams for water power or other structures across or in navigable streams an act of Congress granting the right must be passed. The Shields bill restores the right to grant the privilege to the State wherein the water power sought to be developed is situated and to the riparian owners, a right that prevailed until a few years ago. The provision of the present law can be well illustrated by a reference to the procedure necessary to the building of the Hale Bar Lock and Dam and the Market Street Bridge. The purpose of the Shields bill is to make such enterprises possible without a congressional enactment.

It is stated that the War Department has indorsed the measure and that the public welfare requires it, since under existing laws the development of the water-power resources of the country is practically impossible. The Shields bill authorizes companies and corporations, with preference to municipalities and public utility companies, to build dams in navigable streams for power-development purposes without resort to Congress, after having first submitted their plans and obtained the approval and permit of the Secretary of War, upon certain conditions that he may impose, including the construction of locks in the dams and other facilities for navigation at the expense of the developing company. The permit will continue for a term of 50 years, unless sooner forfeited for violation of its terms, at which time the property may be taken over by the United States and re-leased under then existing laws.

Other safeguards are included in the measure which, it would seem, ought to satisfy the most sensitive reservationist, since it is made practically impossible for any company or trust to exploit the people or deprive them of their rights, either by exorbitant charges or combination in restraint of the free use of navigable streams for purposes of transportation. It is pointed out by Senator SHIELDS that the passage of this act is necessary to the full development of the wonderful resources of the Tennessee River, and it is suggested that on its passage may depend the erection of an enormous plant near Mussel Shoals for the generation of hydroelectricity for the fixation of atmospheric nitrogen used in the manufacture of fertilizer and high explosives, all of which is now almost exclusively imported from Chile at an annual expenditure of $21,000,000.

If, as seems to be the case from the documents accompanying the copies of the bill sent to this office, the public rights are securely safeguarded and the avenues for the development of the country's resources are thereby opened up without harm to the welfare of the people or the abridgment of the Government's authority over navigable streams, the passage of this measure would at once stimulate development of water-power resources all over the country, and especially along the Tennessee River, the waters of which, it is stated, are susceptible of developing more than a million horsepower of electrical energy. We have not noticed that under the present law anything more than trouble and delay have been occasioned, for Congress has generally granted such rights as have been asked; the Shields bill will, therefore, only facilitate the

developments necessary to make the Tennessee potential in the building up of the sections through which it runs.

—

[Herman B. Walker, in Memphis Herald, Memphis, Tenn., Mar. 29, 1916.]

WATER-POWER DEVELOPMENT—SHOULD RECEIVE THOROUGH DISCUSSION—THE HERALD WILL HAVE ABLE ARTICLES UPON THE SUBJECT.

WATER-POWER DEVELOPMENT ASSOCIATION,
Washington, D. C., March 29, 1916.

EDITOR THE MEMPHIS HERALD:

There are two great conservation bills before Congress, the passage of which means so much to the economic welfare of the United States that they are entitled, I believe, to your careful consideration and earnest support. These are the bills for enabling and encouraging development of the unused water powers in the navigable streams and in the public domain. Because of widespread misinformation and misunderstanding concerning the water-power business, and because of misapprehension in many minds as to the kind of legislation necessary to bring about water-power development, there is danger that these bills may be passed in such form as will defeat their main purpose and actually discourage water-power development instead of encouraging it.

NOT MANY NEW DEVELOPMENTS.

To secure water-power development by private enterprise, terms and conditions must be such as will attract investment. With Europe impoverished by war, development must be financed here, and water-power securities must compete with other forms of investment. Under present laws, for several years past, water-power development in the United States has been practically at a standstill. A few comparatively small powers have been developed in the West, in the national forests and national parks, in localities where growth of city utilities or need for irrigation, or both, have created a high-priced market, or where conditions have otherwise been exceptionally favorable. No large hydroelectric plants have been built in recent years. Recent reports of the Forest Service show that the average size of power plants built in the national forests under the present revocable permit system is less than 6,000 horsepower, and that permits have been issued for large developments, aggregating more than 1,500,000 horsepower, of which none has been built or is being built. I know from personal investigation that efforts to finance these larger plants have failed, and that they can not be built under present laws.

NEW LAWS NECESSARY TO STIMULATE WATER-POWER DEVELOPMENT.

In 10 years past, only eight water-power plants, aggregating less than 140,000 horsepower, have been built upon our navigable streams under the general dam act of 1906 and 1910. President Wilson, Secretary Lane, and committees of both Houses of Congress, after careful study, have announced their belief that new laws are necessary to stimulate water-power development.

During the past 10 years, 1,200,000 horsepower of hydroelectricity has been developed in Europe for use in atmospheric nitrogen establishments, of which we have not one in this country. A number of large enterprises of this nature have been planned in recent years, in the South and West, but they can not be financed under our present laws. The stagnation in water-power development is not only wasting unnecessarily our fuel supply, but is preventing the establishment of new industries and putting the brakes on national prosperity. One large factory with $2,000,000 invested in buildings and machinery especially designed for making water wheels was shut down for 10 months last year, and has exactly one small wheel at present under construction. It is estimated that more than 2,500 engineers in the United States, formerly employed in hydraulic construction, are now out of work.

OUR DEPENDENCY ON FOREIGN COUNTRIES.

We are talking of military preparedness, but are wholly dependent upon foreign supplies of saltpeter from which to make nitric acid, an essential in the manufacture of explosives. Our farmers are paying tribute to the Chilean monopoly on every pound of nitrates used in agricultural fertilizers. Capital will not build the water powers necessary to the establishment of electrochemical industries which would give us military, agricultural, and industrial independence, because present laws do not guarantee security of investment or offer hope of reasonable return. It is believed by men who know the practicable side of the subject that the Shields bill, and the Ferris bill as amended in the Senate, will offer this needed incentive to investment, and that their passage will be closely followed by extensive development.

SENATOR SHIELDS'S BILL INDORSED.

The Shields bill received the full indorsement of Lindley M. Garrison, former Secretary of War, whose testimony on the subject before the House Committee on Interstate and Foreign Commerce should be carefully read by every citizen interested in the conservation of water powers. An editorial in the Outlook of February 9, 1916, states clearly and forcibly the features of legislation necessary to protect puolic rights. All of these features are included in both the Shields bill and the Ferris bill as amended by the Senate Committee on Public Lands.

Both of these bills retain to the public all title in water rights and power sites, where these are now publicly owned, granting only permits or leases for use for 50 years, at the end of which period the Government may take over all parts of the plants dependent for their usefulness upon the leases or permits, at a fair value to be decided by mutual agreement, or by the Federal courts. No allowance is to be made for an unearned increment or value in any lands or rights granted or leased by the Government or acquired by condemnation under any powers conferred by the acts. During the leasing period, intrastate service and rates are fixed by the Interstate Commerce Commission.

On the ground that use is the highest form of conservation of water powers, and to discourage speculation, leases and permits are to be revocable if development is not made within a reasonable time. A moderate rental for public lands used is to be paid by the power companies; also a Federal charge for the benefits derived from Government storage of water. Any attempt to make these powers a source of large Government revenues would naturally add to cost of development and to power prices, which would discourage use, since the lower cost of construction and the greatly increased efficiency of steam plants make their competition with the average water power very close.

NO WATER-POWER TRUST.

There is talk of a water-power trust. Actually, no such thing exists. It is that there is a limited number of water powers and that it is not generally possible to have competition between one water power and another. Some of our biggest and best water powers are located in the mountains of the West, remote from cities. They can be and should be utilized for creating cheap power for irrigation, for electrification of railroad trunk lines, and for great chemical and manufacturing industries to make available the ores and minerals in these waste regions. Present laws, however, are prohibitive of development for such uses. This leaves the corporations operating public utilities in the cities as the largest users of power, and for these reasons the utility corporations naturally control a large percentage not only of the developed water power but also of the steam power of the country.

WILL CONSERVE FUEL SUPPLY.

There is nothing abnormal or alarming about this situation, excepting in the fact that so much coal and oil and so little water power is being used to generate electrical current. So far as the control of water powers by the utility corporations is concerned, it means simply, and only, that what water powers are to be used at all they must be used for supplying power within the zone of economical transmission. Where the use of a water power will reduce the cost of power and conserve the fuel supply, shall we leave it unused because the most beneficent use can be made by a corporation which, under State and municipal charters, with which Congress can not interfere, controls the distributing system supplying the natural market for power?

Distribution of power, with other public utilities, is considered by most economists to be a natural monopoly, a service that can be better and more economically rendered by monopoly than by competition. President Van Hise, of the University of Wisconsin, in his book on the subject, points out that the generation and distribution of power is a natural monopoly and should be recognized and treated as such. Experience has shown that monopoly in the power business increases diversity of use of current, resulting in increased load factor, and consequent reduction of unit cost. Shall we refuse to allow the use of water powers to the corporations controlling natural monopolies and attempt to force unnatural and uneconomic competition in the distribution of power? Shall we, in blind prejudice, compel these corporations because their business is a natural monopoly to go on burning coal and oil where they could reduce the cost of their power by using water power?

Suppose these power companies were all burning wood, that the Government controlled coal supply, and that to substitute coal for wood under the power-house boilers would cheapen cost of power. Who would be so foolish as to propose that these companies, because they held local franchises giving them control of the natural monopoly of the power business, should not be allowed to burn coal, or that the Government should fix the price of coal so high that it would be cheaper for them to go on burning wood and denuding the forests? Still this is the attitude of some men who are trying to scare the country with a water-power-trust bugaboo and who are urging that water-power development should be discouraged by high rentals or taxes on use of water rights and power and dam sites.

There are a few sections where utility corporations having a monopoly of present water-power development are opposing this legislation because they do not want further development that would lead to the establishment of new industries, increase demand for power, upset the conditions they now enjoy, and possibly bring about reduction in power prices.

AS TO UTILITY CORPORATIONS.

Utility corporations and power companies are all subject to State regulation as to their rates and service. The pending bills make companies operating under them subject to Federal regulation where the States do not exercise this power. The cheaper the cost of their power, the lower rates they will naturally be compelled to offer to consumers. Under the proposed legislation the power companies will not have the opportunity to capitalize or exploit any unearned increment or monopoly value in what is now public property, because they will not be given any title or any rights extending beyond the leasing period, in such property. How, then, can the public be anything but benefited by permitting the power companies to develop maximum power at minimum cost?

The sole purpose of this association is to secure a full presentation to the public of the whole truth about water powers and the water-power business. We believe that knowledge of all the facts will result in legislation on which will lead to use of these important sources now largely in disuse. Will you not make a careful investigation of the water-power situation and of water-power legislation for yourself, and aid us to present the whole truth to your readers so that Congress may be guided by intelligent public opinion and conclusions based on full information? By all means, let us have free discussion and criticism of legislation, but let the criticism be based on knowledge and understanding of the facts and actuated by intelligent wish to make legislation beneficially constructive. Let's get away from personalities and prejudices and consider this whole subject on its merits and demerits.

Sincerely, yours, HERMAN B. WALKER.

—

[From the Memphis Herald, Mar. 8, 1916.]

Senator SHIELDS'S water-power bill that is about to pass Congress, ranks among the most important legislation that will come up at this session. It is hand in hand with national preparedness that is sweeping the country and that is bound to come to secure our safety as well as to provide our people with enormous facilities for industries that will never be built without this conservation. Tennessee will pick up rapidly under its provisions, and sections that have slumbered for years will revive and become the most thrifty of the State.

The wonder is that we have not had this water-power under control long ago. East Tennessee is the most lovely part of the State for habitation. Its streams flow down the mountains in rollocking waves, and with such power it is strange we haven't made effort to bring it into use before.

As a conservation measure there is a great deal more to be said in its favor than can possibly be said against it. The water power available is said to be much larger than all the power—water, steam, electric, and every other kind now in use in the United States. The conservation of coal alone, that is being consumed yearly to an alarming extent, will outweigh all argument against it by the conservationists.

Senator SHIELDS has done one big thing for his State that will perpetuate his name. Read in another column what benefits are to be derived from it.

—

[From the Chattanooga News, Mar. 30, 1916.]

Chief Conservationist Gifford Pinchot has not been able to arouse much interest against the Shields water-power bill, which has passed the Senate. There are two reasons for this. In the first place, the country is not now interested in matters of this kind. In war attention is with difficulty directed to such subjects. In the second place,

undeveloped regions of the country like the South can not see that corporations which are willing to invest the immense sums necessary for such plants ought to be penalized. We need the water-power development through here. At the Muscle Shoals a plant may be installed which would make us independent of Chile in the matter of nitrates. This is most important for agriculture, not to speak of the incidental protection in case of war. The grants of franchises under the proposed legislation are limited to 50 years. We doubt if those who invest would make any undue profit. There should be no abandonment of the principle of conservation, but we are inclined to the belief that much of the criticism of this bill is unreasonable.

—

[From the Tennesseean, Apr. 22, 1916.]

THE SHIELDS BILL.

Though its office of publication is not at "Table Mountain," the Peoria Journal is a "Truthful James" sort of newspaper when it discusses public questions. The Journal is a Democrat, but it is not blind to the faults of Democrats. It has this to say of the Shields water-power bill:

"Users of plain language have described the Shields conservation bill, which lately passed the Senate by a vote of 48 to 22, as a plain steal by special privilege. The bill grants absolutely free water rights on public domains for 50 years to corporations, with a perfunctory provision that the Government may 'buy back' from such corporations at the end of this period—a provision of which there is no possible likelihood of enforcement.

"It is regarded as impossible for the bill to get through the House, however, and even should it do so President Wilson will undoubtedly veto it, following the precedent of Taft and Roosevelt with regard to similar measures. The discouraging thing is that the vote on the Shields bill shows up the Senate as still the stronghold of privilege in matters where public and private interests conflict."

The Journal puts the matter in words that are a mite plainer than most papers have used, but the substance of what it says has been said in practically every well-informed newspaper of the United States that is free from corporate influence. It is to be hoped that the bill will be defeated in the House and that the President will not be confronted with the necessity of vetoing it. It will be a sad commentary upon Congress if for the third time it shows so little devotion to the interests of the people as to pass a bill that gives their rights into the hands of monopoly.

—

CHAMBER OF COMMERCE,
San Antonio, Tex., May 12, 1916.

Senator SHIELDS, *Washington, D. C.*

DEAR SIR: I have the honor to report to you that at a meeting of the board of directors of the San Antonio Chamber of Commerce held on May 9, 1916, the Shields bill was formally indorsed by this body, and we are notifying our Congressman and Senators to that effect. You are at liberty to use this letter as proof of the fact.

Very truly, yours,

JOHN B. CARRINGTON,
Secretary-Manager.

—

Resolution of Gadsden Chamber of Commerce, Gadsden, Ala.

Whereas 60,000,000 undeveloped horsepower in the rivers and streams of the United States now go to waste because their development is financially impossible under our present laws; and

Whereas cheap electrical power for the treatment of our limestone, phospate, and mineral resources, for the operation of light, heat, and power plants in areas now closed to electrical competition, for the manufacture of nitrogen from the air on a scale to lessen the cost of our farm fertilizers and to insure us an adequate ammunition supply in time of war, and for reducing the cost of power in manufacturing of every description now waits upon a change in our present laws; and

Whereas water-power development, under vigilant regulation by National and State authorities, insuring absolute freedom from monopoly or restraint of trade, and forfeiture in event of failure to develop, and termination of the Government franchise at the end of 50 years, and the payment of compensation to the Government for any use of Government property and land, is fully secured in the Shields bill recently passed by the Senate of the United States and now pending in the House of Representatives: Therefore be it

Resolved, That the Chamber of Commerce of Gadsden, an association representing the commercial and agricultural interests of Gadsden, upon whose welfare depends the livelihood of many thousands of employees and the prosperity and comfort of a population of some 50,000 now comprised within the commercial and agricultural districts of Etowah County, hereby indorses the Shields bill as passed by the Senate, free from impractical provisions that so disastrously have prevented water-power development in recent years, and hereby respectfully urges upon the House of Representatives the immediate passage of this bill; and be it further

Resolved, That a copy of this resolution be mailed by the secretary of this association to every Senator and Congressman from the State of Alabama and to every commercial and agricultural association with whom this association is in correspondence or affiliation.

MAY 8, 1916.

—

[From the Times, Buffalo, N. Y., Mar. 15, 1916.]

One of the most important measures, from a commercial standpoint, which has come up in Congress during the present session is the bill which tied up the Senate for upwards of a week and which was finally passed a day or two ago, known as the waterway bill, which was introduced by Senator SHIELDS of Tennessee. The Senator who was the author of this bill announced in the Senate that the passage of this bill would be followed by early development of water powers aggregating 15,000,000 horsepower, or a volume of electricity equal to that produced by a coal consumption of 100,000,000 tons a year. Engineers estimate that development of this amount of water power equals a saving of $700,000 a day in coal bills. And not only does this measure apply to all of the streams in the States of the West, where the United States owns or controls the lands not yet patented, but it applies with equal force to the older States in which there are navigable rivers, over which Congress has authority because of the improvements which may have been made in the past.

The measure contains a drastic antimonopoly clause providing that no dam or works constructed under its provisions shall be owned, leased, controlled, or operated "by any device or in any manner so that they form part of or in any way effect any combination in the form of unlawful monopoly, or form the subject of any unlawful constraint or conspiracy to limit the output of electrical energy or restraint in trade."

—

[From the National Magazine, Boston, Mass.]

Some one has said that the water-power bills pending in Congress mean as much to the future of the United States as did the Panama Canal legislation. The great possibilities in the development of new industries, settlement of new country, and creation of increased prosperity, for which these measures offer hope, would seem to prove this assertion. After 10 years of conservation of natural resources by undevelopment it seems that reasonable-minded and progressive men in public life have finally concluded that conservation by use is more desirable.

Of the men who have been in the spotlight in urging legislation that will bring about water-power development, Franklin K. Lane, of the Interior Department, and former Secretary of War Lindley M. Garrison have been conspicuous. With knowledge of western needs and an optimistic belief in the future of the West, Secretary Lane's activities in behalf of conservation legislation have been wholly along constructive lines.

Senator JOHN K. SHIELDS, of Tennessee, the father of the Shields bill for authorizing construction of water-power plants in navigable rivers, is a lawyer and jurist whose views on legal questions, especially those relating to the subject considered by his bill, are regarded by his colleagues as authoritative.

The press of the South is generally enthusiastic over the possibilities of development and prosperity that are likely to follow in the wake of the passage of the Shields bill. There is keen public interest in the passage of the bill introduced by Senator HENRY L. MYERS, of Montana, for leasing water-power sites in the public domain. These two bills, fathered and urged by these men who know the South and West, are heralded as new proclamations of industry and prosperity for creating new empires within the boundary of the Nation.

[From the Times-Star, Cincinnati, Ohio, Mar. 13, 1916.]

SHIELDS BILL AROUSES OLD QUARREL AS TO NATURAL RESOURCES—GIFFORD PINCHOT WILL RESIST PASSAGE IN THE HOUSE OF THE SENATE BILL—PREPAREDNESS AMONG THE ARGUMENTS USED.

[By Gus. J. Karger, staff correspondent.]

WASHINGTON, *March 13.*

Overshadowed by the stirring developments in the field of international interest, but little has been done to call public attention to the passage in the United States Senate, after prolonged debate, of the Shields bill authorizing the Secretary of War to grant 50-year permits for the building of dams and water-power plants on navigable streams—a question which some years ago stirred certain citizens of the Republic to a high pitch of excitement that manifested itself in loud exclamations of murder, police, and stop thief. As a chapter in the years-old controversy between conservationist—who took his position in favor of maintaining the resources of this country for the generations to come—and the bitterly denounced "anticonservationist," who favored exploitation of some of them in favor of the folks already here, the disputes with reference to reasonable water-power regulation stood in a class by themselves.

For about eight years the subject of conservation of natural resources has been under consideration in the United States Senate, and this is the first time in that period that a vote has been taken on a general water-power development measure. Two water-power bills passed the House last year, and both died in the Senate. And now that the Senate has at last taken action the result is so unsatisfactory to the old-line conservationists of the Gifford Pinchot stripe that predictions already are freely made that this action will be undone by the adverse verdict of the House of Representatives.

FIFTY-YEAR PERMITS.

The Shields bill authorizes the Secretary of War to grant permits for dams and power plants to be constructed where their presence will improve the navigability of streams. Dams must be built without cost to the Government, and the grantees are required to provide and operate locks, gates, sluiceways, etc., also without cost to the Government. Permits may be issued to individuals, political subdivisions of States, cities, and other municipal corporations, or the public-utility corporations. Intrastate business and rates of companies operating under the act are to be regulated by the States, interstate service and rates by the Interstate Commerce Commission. The grantee must pay a rental for public lands used, and a charge for rights and privileges in use of water, to be fixed by the Secretary of War. Permits are to be for a term of 50 years, after which the Government may extend the original lease, make a new grant, or on a year's notice take over the property on payment of its fair value. The bill contains an antimonopoly clause, described as "drastic" by its supporters, providing that no dam or works constructed under its provisions shall be owned, leased, controlled, or operated "by any device or in any manner so that they form part of or in any way affect any combination in the form of unlawful monopoly, or form the subject of any unlawful constraint or conspiracy to limit the output of electrical energy or in restraint of trade."

PART OF PREPAREDNESS.

The Shields bill was urged by some of the Senate leaders and by military authorities as a vital feature of the preparedness program. Expert estimates locate 60,000,000 horsepower of natural energy in the navigable streams of the United States, and 54,000,000—nine-tenths—is flowing to waste. This waste has been locked up against the use of man, because a special act of Congress was required for the establishment of each proposed power plant, and because it was found impossible to devise workable and satisfactory acts for the development of large water powers. By passing a development measure of general application, Senator SHIELDS, of Tennessee, announced in the Senate, water powers aggregating 15,000,000 horsepower would be assured at once, releasing a volume of electricity equal to that produced by a coal consumption of 100,000,000 tons a year. Such a development as that, according to engineers' estimates submitted, would equal a saving in coal bills of $700,000 a day. Electrochemical plants for making saltpeter and nitric acid from the air—the very bedrock of military preparedness—to be constructed on a huge scale by private enterprise, are said to be contingent on final enactment of the Shields bill. For the chemicals in question, essential to the manufacture of explosives and agricultural fertilizers, the United States

at present is dependent upon the nitrate deposits of Chile, whose Government collects a high tax on every ton of nitrate exported. Although Europe has 1,200,000 horsepower of hydroelectricity devoted to the uses of atmospheric nitrogen plants, not a single such establishment is to be found in the United States. Germany alone manufactures 600,000 tons of saltpeter annually for its military and agricultural uses. Electrification of railroads, manufacture of iron and steel in electric furnaces, and extensive irrigation development in the West, are among the benefits promised by the cheapening of electricity through the utilization of vast water powers.

SENATORS WERE SATISFIED.

They were well satisfied with their work, were the Senators behind the bill, and they succeeded in passing it through the Senate by a vote of 46 to 22. But Gifford Pinchot has girded his loins for a fresh fray, and, as far as the House is concerned, there is rough sledding ahead for the Shields bill. It is full of jokers, its opponents declare, and it is designed for the sole and exclusive benefit of the Water Power Trust. Still full of the peculiar jargon of enthusiastic exaggeration which marked his former campaigns, Mr. Pinchot screams out that "no worse assault on the rights of the people has been committed in Congress for many years than the passage of the Shields water-power grabbing bill. The water-power monopolists won. The people lost because a majority of their representatives in the Senate went back on them."

It is a special-interest bill, he says, "the most serious attack upon conservation since the effort to turn Alaska over to the Guggenheims was blocked in 1910." The Shields bill, he charges, gives the use of enormously valuable public property to the water-power interests, without compensation. "Ostensibly," he says, "it provides for a method of restoring its own property to the public at the end of 50 years. As a matter of fact, it has been so drawn as to make it practically impossible for the people to take their own water powers back into their hands."

Therefore he wants the measure defeated in the House. "Not even the international situation," he says, "important as it is, should be allowed to obscure this great domestic issue. The people sometimes forget their own interests, but the grabbers never do."

CLAPP, CLARKE of Arkansas, HARDING, KERN, POMERENE, SHAFROTH, and the other Senators who voted for the bill, please write.

—

[From the Baltimore (Md.) News, May 10, 1916.]

A CONSERVATIONIST "SPLIT"—COMMON SENSE AND REASON FINALLY GOT AWAY WITH A MAJORITY OF THIS CONGRESS.

The annual conservation congresses have usually been rather wild and woolly bodies, but, as the members finally began to learn something about the subject which they met to consider—of which at first they were almost totally ignorant—reason and common sense began to assert themselves, until finally a majority of the Congress has indorsed the principle of the Shields bill in opposition to the enthusiasts, headed by Gifford Pinchot. And the principle of that bill is what any unbiased person would adopt who has carefully read and digested the testimony given at the extensive hearings on the subject which were held two years ago.

The conditions of the Shields bill are such that the possible water powers on navigable streams are likely to be developed. Those demanded by Pinchot and his following would probably postpone their development indefinitely.

Falling water is nothing more than an opportunity to apply to beneficial use power that is being wasted. The opportunity is, of course, essential, but the dam, the power house, the distribution system, and the customers are all equally essential, and can only be got in the expectation of profit. And the necessary cost of these elements, which only hope of profit can secure, is so great that if any considerable charge is made for the use of opportunity the total cost will in many, perhaps most, cases be prohibitive.

Hydroelectric power competes everywhere with steam, and unless it can be delivered at as low a cost per unit as steam power can be furnished it can not be sold, and so will not be developed. In much of the East, where coal is abundant and cheap, it is only in occasional instances that hydroelectric power can compete. In the West, where water power is most abundant, fuel costs more and hydroelectric development can be more general.

The text of the Shields bill is not available, but it appears to be drawn in contemplation of fact and not of vain imaginings. It probably contemplates 50-year leases at such a charge for opportunity as will not prevent use, with the right of the Government to take over the enterprise at expiration of the lease, repaying only actual cost of whatever is furnished by the Government, and "fair value" at the time for all land, structures, and rights not supplied by the Government. And in an extensive hydroelectric system the cost of the property not supplied by the Government would be so enormous that there is no probability that it will ever be taken over.

All proposed legislation on this subject assures regulation of service and prices by public authority. If there is no State commission, there will be Federal regulation until a State commission is created. No grant of rights in perpetuity is contemplated.

This is the measure that the Pinchot element opposes—on what ground is not clear.

—

[From the Times, Glens Falls, N. Y., Apr. 24, 1916.]

PINCHOT'S MISSTATEMENTS.

In a recent letter to newspaper editors opposing the passage of water-power legislation Gifford Pinchot, president of the National Conservation Association, makes at least two misstatements of fact.

As one reason for his opposition to the Shields General Dam Act he repeats a previous misstatement that the Shields bill proposes to give away water-power sites in perpetuity.

The Shields bill provides that after the end of a term of 50 years the original grantee shall continue in possession until the United States, upon two years' notice, proceeds to take over the plant for its own use or for other disposition. In a recent lengthy explanation of his position on this question Mr Pinchot says that this provision, coupled with the fact that Congress would have to approve the Government acquisition of such a plant, constitutes a perpetual grant, arguing that it would be "practically an impossibility to induce Congress to pass an act terminating the grant."

Naturally the taking over of any water-power or other utility property or the initiation of any governmental ownership enterprise which involved a large expenditure of money would have to be done by act of Congress. Even though it were put in the discretion of the President or any other executive officer to negotiate for such a purchase, the appropriation necessary to complete it would have to be made by Congress, so that this argument seems to have very little weight. If it were desirable to divest Congress of the right to have the final word in such a matter, it is difficult to see how it can be done.

In this connection it is interesting to note that the language of the Shields bill concerning recapture of a power plant is almost identical with that of the Ferris bill passed by the House, with Mr. Pinchot's entire approval and commendation.

The language of the Shields bill is "that at any time after the expiration of said 50 years the United States may terminate the rights hereunder granted," etc.

The recapture clause in the Ferris bill is "that the United States shall have the right after the expiration of the lease to take over the properties," etc.

Instead of making a perpetual grant, the Shields bill proposes a grant for a minimum term of 50 years which shall be indeterminate after that period, and indeterminate grants of public rights or franchises are generally looked upon as peculiarly advantageous to public rights and interests.

Mr. Pinchot also gives as a reason for opposing the Shields bill the fact that it proposes to make power grants without compensation to the Government. He says, "There is no reason why the water-power corporations should not pay for what they get. The rest of us do."

Although Mr. Pinchot may not admit it, there is an excellent reason why power companies should not pay rental for grants or leases of water powers or power sites. The only reason for developing water powers is to generate cheap power. The cheaper this power, the greater will be its development and use. Regulation of rates provided for by the Shields bill guarantees that these cheaper rates will reach and benefit the consumer. Even if there were no provision for regulation, it is a fact that no power user will buy water power if he can make power cheaper by steam, and every cent added to the cost of generating power, from whatever source, must be paid by the consumer. To charge the power companies rental or taxes for use of water power or power sites means only to add an item of expense which regulating commissions will have to allow for in fixing rates to the consumer. Instead of there being no reason why power companies should not be charged for rentals, there really is no good reason why they should be charged for such use of public property.

In the same letter Mr. Pinchot declares the Myers bill dealing with water power on public lands to be "an undesirable substitute" for the Ferris bill passed by the House, and, in connection with this, he makes the completely unjustified and erroneous statement that this bill "gives the public water power away in perpetuity."

The Myers bill not only does not do this, but it does provide as fully and carefully for recapture of the property as does the Ferris bill. It also makes specific provision for a moderate rental charge for public lands used to be paid by the lessee on the basis of the amount of power developed.

—

[From the Washington State Weekly.]

Two regions of the world stand preeminent in the possibilities for water-power development—the United States and the Scandinavian Peninsula. One of these regions is making progress in that direction; the other is not.

Norway and Sweden are utilizing their water powers. We are allowing ours to run to waste. We should conserve fuel and manufacture nitrogen, but we have run riot in idle resources and buy our nitrates.

And there is only one reason why we do this.

It is too much Pinchot.

The disgruntled, unhappy, socialistic ex-forester blighted Alaska just as it was entering upon a period of what would have been marvelous development. Industrial activity ceased, and stagnation settled down upon a land rich in natural resources. And that stagnation grows deeper and gloomier as the years go on.

But he is not satisfied with what he has done. He must add to his record of desolation.

So he settled down upon Congress to further spread his propaganda. This time it is in opposition to water-power development.

The Shields bill is the thing he attacks. It was drawn to open the way to make use of idle and wasting water powers under Government control; but the control does not meet Mr. Pinchot's theory of what constitutes control. He denounces it as "a serious attack upon public resources," and urges that the Shields bill "gives to the power interests" something to which they are not entitled.

All of this is typical Pinchot phrase-making, mere generalizations that do not rise even to the dignity of academic conservation. It is pinheadism reduced to a point; flub-dub, pure and simple; Pinchot at his best, or worst, whichever you like, or whichever way you look at him.

This country has water power, but it is for the most part idle water power. It is capable of development; can be made of service and of use only when harnessed and put to work.

The Shields bill proposes to put it to work under Government control and regulation. Pinchot insists that it is better for all concerned for this water power to remain idle than to be put to use unless it is used in conformity with his untried and unproved theory.

But Gifford Pinchot has accumulated a lot of purely theoretical knowledge, and because of his grandfather's foresight, energy, and marked faculty of acquisition, and because of Gifford Pinchot's own dogmatism, the grandson is capable of an unlimited capacity for interference, and he is using that capacity to his utmost.

That the Shields bill has not become law—that a start has not yet been made to utilize the greatest waste now imperiling this country and a start made toward practical conservation and away from the purely theoretical—is all the fault of Gifford Pinchot.

The Shields bill is a start in the right direction. It provides for development. It places water-power control with the War Department. It provides for 50-year, instead of indeterminate, franchises. It gives the same rights to municipal corporations or to political subdivisions of States that it grants to private corporations, companies, or associations. There is no discrimination. And no transfer of any such rights can be made by any grantee without the approval of the Secretary of War, which is to say, the Government.

It provides for compensation for power used and for lands occupied by any grantee, and specifically gives to the people the right to claim damages occasioned by the use of water power where injury to property rights occurs. And it specifically reserves to the Government the authority to terminate the rights granted at the end of the 50-year franchise period.

But this doesn't suit Mr. Pinchot for some reason. His attacks, addressed to the people through the Scripps papers, principally, have consisted of vague general charges. He has been asked to state specifically which, if any, of these provisions is wrong, and how and under what provisions any right or thing of value has been "given to the power interests" in a manner not compatible with sound public policy. To this invitation he has not responded.

The Shields bill opens the way to development under Government supervision and control. It may not be perfect. Few things are. But this is a new departure. The way has not been pioneered. A little experience will beat a whole lot of theory from inexperienced dreamers.

Congress should pass the Shields bill, and the President should approve it. This will open the way to development, and do it now.

An adequate theory of control can be worked out in the light of experience.

That the country can safely leave to the future, as the future alone can solve the problem.

In the meantime why pay any attention to Pinchot? He doesn't know what he is talking about.

—

[From the Financial World, Apr. 1, 1916.]

WATER-POWER LEGISLATION—AN UNFORTUNATE CONDITION EXISTS WHICH HAS RESULTED IN RESTRICTING DEVELOPMENT OF WATER POWERS.

From an association formed for the development of our water-power resources, and which has its headquarters at the National Capital, the information is gleaned that only eight water-power plants, with a capacity of 140,000 horsepower, have been built upon our navigable streams during the last 10 years.

What feeble progress this is in the direction of the production of cheap power can be judged when the giant strides Europe has made in the same period are considered. In Europe in the last 10 years more than 1,200,000 horsepower of hydroelectric energy has been developed. To-day in this country capital is frightened away from water-power development, notwithstanding that we count ourselves rich in such undeveloped resources. Further, we are told that more than 2,500 engineers are idle in the United States simply because the extreme defenders of conservation of our natural resources are obsessed with the fear that if private capital were allowed a free hand in developing our water power it would result in establishing a water-power trust which in turn would take from the American people one of their greatest natural heritages.

The obstructionists do not put forth any energy in efforts to induce Congress to develop these resources, but are satisfied to let all the available water go to waste. This is no way to conserve our rapidly shrinking fuel supplies. At present there are two bills before Congress which, if too great restrictions are not added, could be depended upon to encourage the development of our water-power resources, provided they are passed. One is the Shields bill and the other the Ferris bill. The latter has been materially amended since last summer. Both measures confer upon the Government the right of regulation and supervision and yet make it inviting enough for capital to embark upon such ventures in the full belief that it will be properly rewarded. As long as the Government is assured that it does not lose control over our rivers and lakes, but is simply leasing for a term of years the use of the water to private corporations, and is further vested with the authority through the Interstate Commerce Commission to control rates charged to consumers, it would appear that the interests of the public are fully safeguarded. But capital can not be expected to venture into projects unless it is promised a fair return.

Either the Government will have to develop our undeveloped water power or private capital; it will not develop itself. That is a foregone conclusion.

—

[From the Oregonian, Portland, Oreg., Mar. 29, 1916.]

THE PINCHOT HUE AND CRY.

Because the Senate, in passing the Shields bill for development of water power on navigable streams, has shown due respect for the rights of the States and has made due provision for the attraction of capital to this class of investment, Gifford Pinchot and his entire pack of conservation fanatics have started in full cry after the Senate. Professing an ardent desire for development of water power, but determined that it shall be developed only on terms which they dictate, the Pinchotites falsely charge that by the terms of this bill the interests of the people are sacrificed and that the power sites are delivered to the water-power trust, which has no existence except in their diseased imaginations. They falsely declare that the Shields bill obliges the people to pay rates upon, and the Government in case of recapture to pay for, unearned increment in the value of power plants arising from the privileges granted by the Government. The fact is that the bill specifically provides that no such value shall be paid for in recapture. Rates for power are to be regulated by the States, none of which make allowance for that which has cost the power companies nothing.

The Shields bill was passed as a substitute for the Adamson bill, passed by the House at the last session. The Adamson bill required the consent of Congress to each individual dam-site lease, which would be a serious obstruction to any development. It contained no requirement that grantees must first comply with State, water, and other laws. The recapture provision allowed only actual cost of land, depreciated value of structures, and nothing for expenditure on making the business a going concern.

The Shields bill authorizes the Secretary of War to grant permits without going to Congress for confirmation in each case. Grants can be made only where operation will be subject to public regulation. The Secretary may require, as conditions of the permit, the construction of locks, booms, sluices, etc., and free power for operation of the same, or may later require free grant of land and right of way and free power for such structures to be erected by the Government. The grantee is to pay the cost of investigation and of Government supervision over construction, also reasonable charges for benefits accruing from headwater improvements by the Government.

There is to be no gift of public land, for which the Government might afterwards be required to pay full value, including unearned increment, as the Pinchotites allege. The grantee may use public land which is to be withdrawn from entry for the purpose, but for its use he must pay "such reasonable charges, based upon its value, as may be fixed by the Secretary of War," who is to be guided by the State laws governing condemnation of land.

A provision which arouses the ire of those who wish to inaugurate complete Federal control in disregard of the rights of the States is that which requires the Secretary of War to give preference to the one among contending applicants who has first acquired water rights and who has otherwise complied with State laws. The grantee must first obtain the State's consent to the power development. This regard for State jurisdiction is evidently prompted by knowledge that Federal jurisdiction over water is limited to its use for navigation and can only be applied to power so far as the latter is incidental to improvements for navigation. One of the earliest decisions of the United States Supreme Court declared that, even if a State had entered into an express stipulation surrendering its jurisdiction over other uses of water to the Government, "such stipulation would have been void and inoperative, because the United States have no constitutional capacity to exercise" such jurisdiction. A long and unbroken line of decisions has maintained the same principle.

—

[From the Manufacturers' Record, Mar. 16, 1916.]

WATER-POWER DEVELOPMENT ENCOURAGED BY SHIELDS BILL—FIRST FAVORABLE LEGISLATION TO BE PASSED BY CONGRESS IN RECENT YEARS—GREAT NITRATE PRODUCTION POSSIBLE IF BILL BECOMES LAW.

WASHINGTON, D. C., *March 11.*

With but few exceptions, all the Senators from the South and Southwest voted for the passage of the Shields water-power bill, which received approval after a two years' fight in the Senate by a vote of 46 to 22. Although 60,000,000 horsepower of water has been going to waste ever since the discovery of America, the present Shields bill is the first active step taken to encourage the investment of capital in the harnessing and use of these great resources for the benefit of all the people.

Senator SHAFROTH, of Colorado, just before voting for the bill in the Senate, made the following statement, which correctly describes the situation:

"We passed in 1906 a law for the purpose of producing water-power development. No water-power development took place. Why? Because the terms of the law were too rigid. In 1910 we passed another act so as to let water-power development be made, but no such development took place, because the terms were too severe. Consequently up to this time nothing has been done in the way of water-power development, and some of the Senators have been putting on amendments, or trying to put them on in this bill, so as to make it the same as the others, so that there will be no water-power development under this bill. This bill provides that before a company does anything it must provide to improve navigation to the extent of millions of dollars, which the Federal Government gets for nothing. Is it possible that this can be described as a monopoly scheme? Is it possible that companies will put up a large amount of money unless they are permitted at least to recoup the amount they have advanced? It seems to me that when we take into consideration the provisions of this bill, especially the provision that all rates shall be subject to regulation by the utilities commissions of the States, we have as nearly perfect a bill of this kind as we can get, and therefore it seems to me that from these views and from the view that we can get development this bill ought to pass."

Following the passage of the bill, in an effort to have the Ferris power bill for the development of water power on the public lands of the United States made the unfinished business of the Senate, Senator MYERS, of Montana, made this statement:

"The Shields bill has very little to do with the West. It has nearly all to do with the streams of the South. We all know that nearly all of the power that is going to be developed under the bill which has just been passed, if it becomes a law, will be developed in the Southern States—in the South—whereas the power which will be developed in the bill which I want to call up will be developed nearly altogether in the West."

While this statement was challenged by Senator WILLIAMS, of Mississippi, who pointed out that there are vast water-power resources in New England, in Pennsylvania, in Delaware, and on the nonnavigable streams in the Middle West, there is no doubt that the South will benefit materially if the bill passed by the Senate goes through the House and receives the approval of President Wilson.

The Shields bill authorizes the Secretary of War to grant 50-year permits for the building of dams and water-power plants on navigable streams. Senator SHIELDS, of Tennessee, the author of the bill, announced in the Senate that the passage of it would be followed by early development of water powers aggregating 15,000,000 horsepower, or about one-fourth of the amount that is going to waste, or a volume of electricity equal to that produced by a coal consumption of 100,000,000 tons a year. Engineers estimate that the development of this amount of water power will mean a saving of $700,000 a day in coal bills.

It is known that a number of big electrochemical plants for making saltpeter and nitric acid from the air have been planned by private enterprise and will be built as soon as the Shields bill becomes a law, thereby making it possible to finance such undertakings. At the present time the United States, as has been pointed out repeatedly in these columns, is wholly dependent for its supply of nitrates upon the deposits of Chile. The Chilean Government collects a high tax upon every ton of nitrate exported. If the present bill goes through the House as it has gone through the Senate, it will mean the early establishment of a large plant for the manufacture of chemicals essential to the making of explosives and agricultural fertilizers.

Under the terms of the Shields bill, the Secretary of War is authorized to grant permits for dams and power plants where he believes the building of such dams will improve the navigability of streams. Dams are to be built without cost to the Government, and the grantees are to provide and operate locks, gates, and sluiceways without cost to the Government. Permits may be granted to individuals, political subdivisions of States, cities, or other municipal corporations or a public-utilities corporation. Intrastate business and rates of companies operating under the act are to be regulated by the States, and interstate service and rates by the Interstate Commerce Commission.

All plans for dams and works are to be approved by the War Department as being the most adaptable plans for the improvement of navigation and fullest development of water-power possibilities. The grantee is to pay a rental for public land used and a charge for rights and privileges and use, these rentals to be fixed at the discretion of the Secretary of War, and the money received from the same to go into a special fund in the United States Treasury to be used for further improvement of waterways.

The chief fight in the Senate was over the provisions for terms to be granted for 50 years, after which time the Government may either extend the original lease, making a new grant, or upon one year's notice take over the property upon payment of its fair value, this value to be determined by mutual agreement or by the Federal courts, and not to include any allowance or any rights granted by the Government. This

particular provision was in line with the suggestion of former Secretary of War Garrison, as outlined a month ago exclusively in the Manufacturers Record.

Electrification of railroads, manufacture of iron and steel in electric furnaces, and extensive irrigation developments in the West are among the benefits expected to be derived from the utilization of large water powers for the generation of cheap electricity. Some of the southern newspapers, recently misled by the sweeping generalities of statements issued by Gifford Pinchot, have presumed that the bill passed by the Senate does not preserve all the rights of the people. As a matter of fact, the bill preserves all such rights. The Government gives a franchise, but in return the investors in water-power development spend millions of dollars to make streams navigable for the benefit of the Government, without a dollar of expense to the United States. The very fact that the power will be developed will be of vast benefit to the people, in that it will lower the national coal bill and provide cheaper fertilizers. It will produce a national asset in providing the nitrates needed for national defense.

—

[From Current Opinion, June, 1916.]

THE BIG PROBLEMS OF WATER-POWER POLICY IN THE UNITED STATES.

In a subsequent number Current Opinion will present a symposium on water power by the leading engineers of the country. Only the opinions of practical operators will be given. Meantime, some considerations may be noted.

The St. Paul Railroad has electrified 450 miles of its mountain line. A director of the railroad, and also president of the power company, testified: "The railroad will pay for its power $550,000 a year. It is now paying for coal over the same area $1,750,000. On another section of road the payment for water power is $96,000 as against $270,000 for coal. These figures are for the hard mountain grades."

With such testimony there is only one inference possible. Within a few years all the railroads which can will use hydroelectric power.

It is estimated that there are 20,000,000 tons of nitrogen above each square mile of the earth's surface. Yet we are paying $75 a ton for Chilean nitrates and spend yearly on Chilean nitrates $21,000,000. Chile's nitrate beds will be exhausted by 1923. At that time the United States will be compelled to take the nitrogen supply from the air.

In Europe 1,200,000 hydrohorsepower are used to extract nitrogen from air. In the United States up to 1915 not a horsepower was used for that purpose. It took the war to waken us. England is about to establish a nitrogen plant in Iceland. Capital would have established such plants in the United States, but bonds could not be financed on short-term permits.

The fertilizers sold to the farmers of the United States cost $170,000,000 a year. Why not manufacture our own fertilizers? The United States uses only 28 pounds of fertilizer an acre. European countries use 200 pounds. American crop returns are lower than European returns by half.

Of the bills before Congress the Shields bill is an act to regulate the construction of dams across navigable waters. It provides that the Secretary of War is authorized to grant permits for dams and power plants where he believes the building of such dams will improve the navigability of streams. Dams are to be built without cost to the Government, and the grantees are to provide and operate locks, gates, sluiceways, etc., all without cost to the Government. All plans for dams and works are to be approved by the War Department. The grantee is to pay a rental for public lands used and a charge for rights and privileges in the use of water. These rentals and charges are to be fixed at the discretion of the Secretary of War, and the money received therefrom is to go into a special fund in the United States Treasury to be used for the further improvement of waterways. Permits are to be granted for 50 years, after which time the Government may either extend the original lease, make a new grant, or upon two years' notice take over the property upon payment of its fair value, to be determined by mutual agreement or by the Federal courts.

The Ferris bill is "to provide for the development of water power and the use of public lands in relation thereto, and for other purposes." It would be practically impossible to finance under it. With the amendments that have been adopted by the Senate committee the bill should be, generally speaking, a workable measure. It provides for the leasing of public lands for a period of 50 years "for the purpose of constructing, maintaining, and operating dams, water conduits, reservoirs, power houses, transmission lines, and other works necessary or convenient to the development, generation, transmission, and utilization of hydroelectric power." Upon three years' notice after the expiration of any lease the United States may take over the properties which are dependent in whole or in part for their usefulness on the continuance of the lease by paying their full value, which is to be determined by mutual agreement between the Secretary of the Interior and the lessee, or by proceedings instituted in the United States district court for that purpose. The Secretary of the Interior is authorized to specify in the lease and to collect charges or rentals for all lands leased, which charges are to be based on the value of the land, to be determined by the amount of horsepower to be developed, but which shall not in any event exceed the sum of 25 cents per developed horsepower.

On the merits of these bills there is the widest possible divergence of opinion. Mr. Forbes, of Harris & Forbes, who has probably marketed as many water-power bonds as any other man in America, says:

"The passage of those two bills along the lines indicated should make possible the development of many of the great unused water powers of the United States."

He says frankly our rigorous laws have hitherto hindered water-power development in the United States.

Gifford Pinchot, who led the fight against the water-power interests six years ago, says of the very same bills:

"The Shields bill gives to the power interests without compensation the use of water power on navigable streams. The amount of water power these streams will supply is larger by far than all the power of every kind now in use in the United States. It pretends to but does not enable the people to take back their own property at the end of 50 years, for in order to do so under the bill the Government would have to pay the unearned increment and to take over whole lighting systems of cities and manufacturing plants. Private corporations are authorized to seize upon any land they choose to condemn.

"The Ferris bill, relating to national forests, was a good bill as it passed the House. As reported in the Senate it encourages monopoly by permitting a corporation to take as many public water-power sites as it may please. The corporation could not be kept from fastening on Grand Canyon. The bill takes the care of water power in national forests from the Forest Service and gives it to the Interior Department. The water-power legislation is too favorable to the men who control through 18 corporations more than half the total water power used throughout the United States."

The main crux of the argument with the public is how to obtain cheap power, for cheap power means cheap fertilizer, cheap munitions, cheap light, cheap heat, cheap freight, cheap paper. That, rather than posterity, is the crux of necessity now.

—

[From the Manufacturers' Record, Mar. 16, 1916.]

VAST INDUSTRIAL ENTERPRISES THAT ARE PLANNED FOR ALABAMA—DEVELOPMENTS THE ALABAMA POWER CO.'S NEW $100,000,000 MAY SECURE—NITRATE PLANTS AS A MEASURE OF NATIONAL PREPAREDNESS—DEMANDS THAT BAN ON INDUSTRIES BE REMOVED.

[By Albert Phenis.]

With $100,000,000 of new capital assured the Alabama Power Co. for the development of its various water-power sites on the rivers of Alabama, as announced in the Manufacturers' Record of last week, bewildering possibilities of industrial expansion for the Birmingham district and all of Alabama are brought into view. In a letter from James Mitchell, president of the Alabama Power Co., to the Manufacturers' Record the statement was made that the entire amount of $100,000,000 had been arranged for through an issue of bonds, and that while only $4,000,000 would be utilized at this time, and this for the addition of duplicate units to the hydroelectric power plant in operation at Lock 12, Coosa River, and an auxiliary steam plant of 20,000 kilowatts capacity, the remaining $96,000,000 would be at command for further hydroelectric developments as the demands for power were manifested.

No more interesting or important development could be made at this time than that of the Alabama Power Co.'s site at Muscle Shoals, on the Tennessee. Four years ago the company had set aside funds for the construction of a dam at Lock 18, on the Coosa, a few miles down the stream from Lock 12. A plant of equal size of that at Lock 12 was proposed, and in addition foreign money had been pledged for the construction there of a cyanamid plant to cost $3,000,000. Mr. Frank S. Washburn, vice president of the Alabama company, a scientist, engineer, and capitalist, is at the head of a cyanamid plant at Niagara Falls, Ontario, and is entirely familiar with the commercial and chemical sides of the methods of extracting nitrogen from the air for use in the manufacture of nitric acids for fertilizers and likewise for explosives. It was no promoter's dream, therefore, this plan to build a cyanamid plant at the proposed water-power development at Lock 18.

President Taft vetoed the congressional measure granting the right to build a dam at Lock 18—a concession to the same influence that is now flooding newspaper offices with attacks on the present Shields bill and that was described by ex-Secretary Garrison at a recent committee hearing as not a "conservationist" but a "reservationist"—one which desires to prevent the development of any natural resource that would prove beneficial to any of the people who are now on earth. As a consequence the dam at Lock 18 was not built and never has been built, and the $3,000,000 of foreign money that would have secured the completion long ago of a cyanamid plant on the Coosa near Birmingham left the country and was used to expand the cynamid plant at Niagara, beyond the Canadian border.

Thus, there is no plant in this country, outside of the recently opened one at Nitrolee, S. C., where nitrogen is extracted from the air. This country is almost wholly dependent on Chile for its nitrates—a supply that would at once be cut off in case of war against the United States—and in times of peace there is a dependence on Chile for fertilizer materials that is a burden and an enormous expense.

The vital necessity of a plant for getting nitrates from the air has become apparent to everyone who has given the most superficial study to the subject of preparedness. Without synthetic nitrates Germany would have been prostrate early in the war—had there been a war. Not a pound of Chilean nitrates has been imported into Germany since the war began, and yet there is no scarcity of nitrates, for explosives or for fertilizers, thanks to the extraordinary development that has been made there in the extraction of nitrogen from the air.

A realization of the utterly helpless condition in which the United States would find itself as to explosives if at war with any important power has finally aroused the country to the necessity for a great plant to extract nitrogen from the air. The naval consulting board urges such a plant, and the recently reported Army appropriation bill of Congress specifically recommends it.

Since the unanswered and unanswerable argument was made by the Manufacturers Record that no scheme of preparedness that did not provide for munition plants—nitrate factories and all—in the interior of the country, away from the vulnerable, easily captured seaboard centers, could be anything but an idle dream, it is a matter of common agreement that a synthetic nitrogen plant should be located in the zone of the great water-power sites of the South.

The greatest undeveloped water power in the South is that at Muscle Shoals, in the Tennessee River near Florence, Ala. This has often been referred to as the logical site for a great cyanamide plant.

That such a development was in mind when the Alabama Power Co. financed its recent $100,000,000 loan is indicated by the company's previous efforts to establish such a plant, and also by the statement of one familiar with the company's plans that the building of the Muscle Shoals Dam would mean the expenditure of $50,000,000 in dam, power plant, factories, and all.

The sites owned by the Alabama Power Co. include a number on the Coosa River, one on the Tallapoosa, one on Little River, and the one at Muscle Shoals. When all are fully developed the total capacity would be approximately 1,000,000 horsepower. The capitalization of the company is $50,000,000.

The present completed plant at Lock 12 has about 20,000 horsepower capacity. It supplies power and light to companies and individuals in Birmingham and a number of neighboring cities in Alabama.

Officials of the company believe that Birmingham is certain to become a greater industrial center than Pittsburgh. The center of the richest mineral section in the world, with more coal than Europe contains, and with coking coal, iron ore, and limestone in such phenomenal proximity as can nowhere else be found, there are also water-power possibilities in Alabama sufficient in themselves to attract great industrial development. In addition to an increasingly large installation of electrochemical plants and other industries not now known to Birmingham, it is the belief of the company that Birmingham ought to be the center of gravity for the cotton industry of the country. As sellers of power it is the announced purpose of the company to secure users of large units of power, and it thus becomes their business to develop the community by every possible means.

With the passage of the Shields bill in the United States Senate by a large majority, there is hope that this Congress will finally pass some measure that will make it possible to bring about water-power development in the South. There has been complete stagnation in that line for several years.

Incidental to this stagnation, which has held up development projects not only in the South, but all over the country as well, the manufacturers of hydroelectric machinery have voiced a protest against conditions that interfere with their activities. Such manufacturers, representing an investment of at least $200,000,000 and employing 50,000 workmen, met in New York last week and effected an organization that will work for any measure that will bring about a resumption of water-power development. Some 40 companies were represented at the meeting, and it was announced that 500 or 600 more had declared their purpose to join. Among the companies represented at this meeting were the Allis-Chalmers Manufacturing Co., of Milwaukee; American Rolling Mill Co., of Mansfield, Ohio; American Smelting & Refining Co., Anaconda Copper Co., Archbold-Brady Co., Syracuse; Buffalo Foundry & Machine Co., Gould Manufacturing Co., of Seneca Falls; James Leffel & Co., Springfield, Ohio; Locke Insulator Manufacturing Co., Victor, N. Y.; General Electric Co., Ohio Brass Co., Springfield, Ohio; Pelton Water Wheel Co., San Francisco; Pittsburgh High Voltage Insulator Co., Platt Iron Works, Dayton, Ohio; S. Morgan Smith Co., York, Pa.; Standard Underground Cable Co., Pittsburgh; R. Thomas & Sons Co., Wellman, Seaver, Morgan Co., East Liverpool, Ohio; Westinghouse Electric Manufacturing Co.

The organization proposes to maintain offices in Washington and to carry on a campaign of publicity and education in the effort to foster an industry of large magnitude and public importance, and thereby solve one of the problems of national preparedness in the only way it can be solved—by getting nitrates from the air by electricity instead of paying Chile millions of dollars every year in times of peace, with the certainty of having the nitrate supplies cut off in time of war.

[From the Journal of Electricity, Power, and Gas, Mar. 18, 1916.]

THE SHIELDS BILL.

After four weeks' debate the Shields navigable-stream water-power bill has passed the Senate by a vote of 46 to 22 and now goes to the House. That this notable result has been attained, notwithstanding the distractions incident to war and preparedness, should be a matter of congratulation to everyone interested in the development of our latent water powers, which, like a sleeping giant, need but be put to work to create new wealth and support new peoples on lands now disused. This is the most notable congressional recognition of western needs to date.

The Shields bill as it passed the Senate is a splendid, practical measure. It will permit of the harnessing of water power in many parts of the country. Nor is this all. While Congress is not likely at the present session to make any great appropriations for the improvement of rivers and harbors, the great hydroelectric developments made possible by the enactment of this measure will make many rivers navigable far into the interior by private capital instead of by public taxation.

Briefly stated, the bill gives authority to the Secretary of War to approve a 50-year permit for the construction, maintenance, and operation of dams and accessory works for the development of water power if, in his judgment, navigation will be benefited, public purposes best served, and conservation of water resources promoted. It provides that navigation facilities shall at least be equal to those existing prior to the new construction, that reasonable charges for the privilege and reasonable costs of Federal investigation shall be paid, and that a reasonable rental be paid for public lands occupied, the "reasonableness" to be determined by the Secretary of War, who is also to formulate all regulatory measures.

It is believed that this bill fully protects the public interest and yet provides sufficient incentive to justify the power developer in soliciting private funds. If passed by the House, this bill should usher in an era of low-head power developments exceeding in capacity the high-head plants which have already made the West preeminent electrically. The power thus released for human utilization will make possible many irrigation and reclamation projects as well as materialize plans for electrochemical and electrometallurgical industries. Its probable enactment will mark an epoch in this electrical age.

With the Shields bill yet to pass the House and the Myers modification of the Ferris bill yet to pass the Senate, only half the action necessary to provide needed relief has been taken. Vigorous agitation against both these measures is being conducted by Gifford Pinchot and his followers, who seem to look upon these measures as a means of rescuing themselves from political obscurity. It is a fact greatly to be regretted that matters so vital to the economic progress of the West are at the mercy of politicians, who apparently value their own preferment above the common welfare.

—

[From the Daily Missoulian, Missoula, Mont., Mar. 19, 1916.]

WASTED WATER POWER LEAVES NATION MINUS POWDER SUPPLY.

Sensational charges involving America's pitiful lack of ingredients for explosives are stirring the Senate of the United States. Developments of the last few days have brought out the fact that the United States is absolutely dependent on foreign countries for the bases of all its explosives.

The revelation of actual conditions is regarded as the most important development up to date in the preparedness situation. Senators are saying there is little use to provide fortifications, big guns, or even more battleships, if our powder supply runs out. The keen edge of interest has been whetted by cables revealing the tremendous use of explosives in the present war, especially at Verdun.

In spite of efforts to keep this critical national situation secret from the public—or rather from agents of foreign countries—disclosure of the facts has just been made in the Senate debate on water-power legislation. The reason for the revelation is that the passage of two bills—the general dam bill introduced by Senator SHIELDS, of Tennessee, and the bill for leasing power sites on the public domain, introduced by Senator MYERS, of Montana—open the way for Uncle Sam to make his own nitrates for explosives right at home by taking nitrogen from the atmosphere through water power without asking leave of any foreign nation.

Senator SHIELDS, who is responsible for making public the situation, declares that in the event of a blockade of certain seaports "our ships, forts, and troops would have silently to surrender after the small reserve stores of nitric acid and saltpeter had been ultized, because there would be no powder left and nothing to make it of."

There has been no denial of Senator SHIELDS's charge.

WILL REDUCE FERTILIZER PRICES.

Besides making the United States independent in its supply of what the big guns eat, the pending legislation will, if passed, reduce the price of the farmers' fertilizer by supplying cheaper nitrates. It would also immediately open the way for cheap power for a multitude of other purposes.

The proposed measures are not political. They are regarded as not only an essential part of the "preparedness" program, but also as an urgent economical necessity. President Wilson has urged legislation to unlock the Nation's water powers to use. Secretary of the Interior Lane has indorsed the Myers bill for power-site leases in the public lands. Former Secretary of War Garrison urged strongly the need for passing the Shields bill. Other prominent men have given their approval to these conservation measures. One of the few sources of strong opposition is reported to be certain groups of big corporations, which now have a monopoly of power in their territory and which are opposing development which might lead to competition and possible reduction in power prices.

Congress has been talking about water-power legislation for eight years, but has done nothing, while water powers running to waste are said by Government experts to represent energy equal to that generated by an annual coal consumption of more than 100,000,000 tons. More than a million horsepower of hydroelectricity in Europe is devoted to varied industries, experts say but there is not one such establishment in the United States.

Engineers, bankers, chemists, business men, and others who know the practical side of the water-power business have told congressional committees that the reason America has none of these new industries and the reason why 70 per cent of our water powers are running to waste is because the present laws do not offer terms upon which American investors are willing to put their money into these enterprises. Pending legislation, they say, will, if passed, furnish the necessary incentive to capital.

Water-power development has been practically at a standstill in the United States for years, not only making development impossible but injuring existing industries. Manufacturers of hydraulic and electrical equipment have told congressional committees that they are "hard hit." One Philadelphia plant, with $2,000,000 invested in buildings and machinery for making water wheels, and normally employing more than a thousand men, was shut down for 10 months last year. Twenty-five hundred engineers, heretofore employed in building dams and power plants, are said to be out of work. Thousands of men would also be employed if construction on water-power plants were not held up.

Those in charge of the legislation say they are encouraged greatly over the letters that farmers and other citizens are writing to their Senators and Congressmen in favor of these bills.

—

[From New York Evening Post, Mar. 16, 1916.]

THE WATER-POWER BILLS.

The public business at Washington is in a very backward state. Senator UNDERWOOD declared on Monday that in all his congressional experience he had never known the appropriation bills to be so delayed. The Senate has not yet passed a single one. Indeed, but one has been reported to it. Representative MANN uttered a warning in the House yesterday on the need of settling down to the really important legislation of the session. He said it was time to drop "chicken-feed" bills and buckle to on the big measures. But there ought to be some way of stopping also the flow of "chicken-feed" speeches. The Senate had a dreary three or four hours of them on Monday, all on the question of what should be the next order of business. It finally voted by a narrow majority to take up the Ferris water-power bill, which passed the House on January 8. Having thus exhausted itself in deciding what to do next, the Senate did nothing and adjourned.

One water-power bill was passed by the Senate on March 8. It is the so-called Shields bill. This has to do with the construction of dams "across navigable waters," with incidental development of power. The Ferris bill, which the House passed and which is now, much amended, before the Senate, regulates the development of water power on public lands. To it there is violent opposition in the Rocky Mountain States, which would be the chief scene of its operation. In that region the whole idea of Federal regulation is antagonized. Colorado, Wyoming, Idaho, Utah, and Montana, along with Oregon, want to be let alone to deal with water power on the public domain included within their territory precisely as they see fit. Senator SHAFROTH, of Colorado, asserts that the aim of the Ferris bill is to "confiscate" water power belonging to the States. And he virtually served notice that the handful of Senators from the Rocky Mountain States would not permit any bill of the kind to come to a vote in the Senate. There could hardly be a more brutal and defiant way of setting up the Senatorial privilege of unlimited debate and endless obstruction against the national principle of conserving natural resources and regulating their use.

The power bills have been sharply attacked from the other end of the line. Mr. Gifford Pinchot has denounced them as the worst "grab" by the corporations ever attempted. Representative KENT, of California, has bitterly condemned them, and has received a letter from President Wilson expressing the opinion—a right and just opinion—that it would be better to let the water go on running to waste than to part with its use and control on improper terms. But the whole question is, obviously, whether the terms proposed are improper. To the Ferris bill, as it passed the House, Mr. Pinchot gave his certificate of approval. It contained the provision for 50-year leases, which even extreme conservationists now agree to be necessary. As the bill has been amended by the Senate committee, however, Mr. Pinchot assails it, along with the Shields bill, as the sum of all villainies. His charges are very general, not to say vague. They do not rest upon a line-by-line reading of the bills with specifications just where the iniquity lies. The measures should be carefully scrutinized, of course, and if there are valid objections to any given clauses these should be changed or stricken out. But indiscriminate clamor should not prevent Congress or the public from giving attention to the solid merits of the bills.

Our own belief is that anyone who, even approaching the water-power bills with a prejudice against them, gives them a close study, will find that they have a great deal to commend them. In their general aim they appear to be along the lines of Secretary Lane's recommendations. That is, they regulate, they restrict, they provide safeguards, yet they permit of development on a commercial basis. Doubt-

less a keen lawyer might find lurking perils in phraseology; a layman will suspect some. It is possible that the true and large interests of national conservation are endangered by one paragraph or another. We freely admit this, though our own examination of the bills does not disclose the alleged glaring defects. But our purpose at present is neither to defend nor attack the bills as they stand. What we would urge is that the whole subject be given fair consideration in Congress and by the press; that the minds of those interested be brought together, and that the great need of reasonable legislation on this subject is not lost sight of in angry controversies over details. The United States is lagging behind in hydroelectric development, and the chief reason is that for six or eight years we have been laboring in vain to secure laws under which this neglected national work can be done. It will be a severe reproach to Congress if it fails to give due weight to this branch of national preparedness and does not hammer out workable bills, fair to all concerned, before it adjourns.

—

[From St. Louis Globe Democrat, Mar. 10, 1916.]

SHIELDS WATER-POWER BILL.

The decisive vote of the Senate in favor of the Shields water-power bill was a victory for the school of conservation which believes that the water should be used for power as soon as possible, so as to conserve coal and petroleum. The resolutions committee of the Fifth National Conservation Congress estimated that the country could save $200,000,000 a year on fuel by prompt development of hydroelectric power. There is another and smaller school of conservation, of which Mr. Pinchot is the most prominent personality, which is chiefly interested in keeping the water-power sites out of private hands. This school has gloried in the defeat of previous bills, but has done nothing toward utilizing water power. It has saved waterfalls from use, but has let the country pay its excessive annual toll for steam power.

The long debate in the Senate revealed that the principal question is whether the Government or State shall be permitted to take over a plant at the end of 50 years at the actual value then, determined by agreement or condemnation proceedings, or whether it shall pay only what the plant has actually cost. There is no agreement to take it over at all. The investor is asked to make the venture. If he loses money, it is hopelessly lost. If he builds up a valuable property he must sell out, if the Government wishes to buy, for what the site costs now, with his actual expenditures added. It is a "heads I win and tails you lose" proposition. Nobody favors Government or State ownership now. The Government merely asks an option, which can be exercised if the experiment is successful.

The bill provides for control of charges by State and Federal authorities. Every reasonable safeguard is provided to prevent abuse. The sites must be acquired at actual value, under the various State laws. There is no bonus or grant, such as Congress voted the railways for the development of the great West. A slight monopolistic feature is almost unavoidable, but the bill prohibits improper practices as well as discriminatory charges. The critics of the bill offer no constructive alternative. They would merely load the bill down with such amendments that capital would not take the risk. If they have their way, they should entitle their act "An academic theory as to how water power might be developed if capital could be induced to invest in the experiment."

—

[Editorial from the Evening Post, New York, Friday, May 5, 1916.]

That the National Conservation Congress should have indorsed the Shields bill by a vote of 116 to 39 is a severe blow to Pinchot, Garfield, and other extreme conservationists. There was no division upon principles, but merely upon the interpretation of the Shields measure. The majority of the Conservation Congress plainly thought that its provisions could be accepted literally and in good faith. It meant what it said in giving the Government the right to take over private water-power plants on navigable streams at the end of 50 years at actual valuation. But ex-Secretary of the Interior Garfield was certain that the bill "turns over to private monopoly public power in perpetuity. The 50-years' limitation as proposed is nothing more than a mere fiction." The minority resolutions held that power sites should not be disposed of in perpetuity, but retained in Federal control. The majority made much of the fact that the Senate, after careful debate, had not seen in the bill the "mere fiction" of which Garfield spoke; and an even weightier consideration is that Secretary Lane has not done so. Upon details of the measure there may be disagreement, but its guaranty of a 50-years' tenure seems necessary to invite capital into a risky field.

—

[From the Ottumwa Courier, Mar. 14, 1916.]

SHIELDS WATER-POWER BILL.

The Shields water-power bill authorizing the Secretary of War to grant permits for the building of dams and power plants on navigable streams is about ready for a vote in the United States Senate. This will be the first vote taken in the Senate on a general water-power measure in the eight years that the subject of conservation of natural resources has been under consideration in Congress. Two water-power bills passed the House last year and died in the Senate.

Senate leaders and military authorities urge the Shields bill as a vital feature of the preparedness program. It is estimated that there is 60,000,000 horsepower of natural energy in the navigable streams of the United States, of which nine-tenths is flowing to waste. These great water powers have been locked out of use up to now, as a special act of Congress has been necessary for each power plant, and it has been impossible to pass workable tracts for the development of large water powers.

Senator SHIELDS, of Tennessee, announced in the Senate that the passage of this bill would be followed by early development of waterpowers aggregating 15,000,000 horsepower, or a volume of electricity equal to that produced by a coal consumption of 100,000,000 tons a year. Engineers estimate that development of this amount of water power equals a saving of $700,000 a day in coal bills.

It is known that a number of big electrochemical plants for making saltpeter and nitric acid from the air have been planned by private enterprise, and will be built as soon as the Shields bill becomes a law and makes it possible to finance these undertakings. These chemicals are essential to the manufacture of explosives and agricultural fertilizers, and at present the United States is wholly dependent for its supply upon the nitrate deposits of Chile. The Chilean Government collects a high tax upon every ton of nitrate exported. There is at present not a single atmospheric nitrogen plant in this country, although Europe has 1,200,000 horsepower of hydroelectricity devoted to this use, and Germany is making 600,000 tons of saltpeter a year in such establishments for military and agricultural uses.

Electrification of railroads, manufacture of iron and steel in electric furnaces, and extensive irrigation developments in the West are among other benefits expected to be derived from the utilization of large water powers for generation of cheap electricity.

Under the terms of the Shields bill the Secretary of War is authorized to grant permits for dams and power plants where he believes the building of such dams will improve navigability of streams. Dams are to be built without cost to the Government, and the grantees are to provide and operate locks, gates, sluiceways, etc., all without cost to the Government. Permits may be granted to individuals, political subdivisions of States, cities, or other municipal corporations, or to public-utility corporations. Intrastate business and rates of companies operating under the act are to be regulated by the States and interstate service and rates by the Interstate Commerce Commission.

Municipally owned dams and power plants for irrigation or for supplying power for municipal purposes are to be given preference in making leases for surplus water power in the streams. The bill does not apply to water power on small streams and creeks used for gristmills, sawmills, etc.

The measure contains a drastic antimonopoly clause, providing that no dam or works constructed under its provisions shall be owned, leased, controlled, or operated "by any device or in any manner so that they form part of or in any way effect any combination in the form of unlawful monopoly, or form the subject of any unlawful constraint or conspiracy to limit the output of electrical energy or in restraint of trade."

—

[From the Albany Argus, Mar. 13, 1916.]

DEVELOPING WATER POWER.

The bill for development of water power, which has now passed the Senate after four weeks of debate, differs in many respects from the measure passed in the House several weeks ago, and so materially that it is designated as the Shields bill, after the name of the Tennessee Senator mostly responsible for it. Gifford Pinchot is up in arms against it, characterizing it as "the most serious attack upon conservation since the effort to turn Alaska over to the Guggenheims was blocked in 1910."

That this is an extravagant statement is obvious from comparison of its provisions with those of the House bill which Pinchot approved in behalf of the conservationists and which was framed in the main along the lines recommended by Secretary Lane. The two Houses in smoothing out the differences in conference will, if we are not mistaken, find merits worth adoption in both bills.

In essential purpose the two bills are the same in that they would provide for the early development of some 18,000,000 horsepower from navigable streams that are under Federal jurisdiction, so that Uncle Sam's consent is necessary for their utilization for this purpose. The harnessing of their power would mean a saving yearly of 100,000,000 tons of coal, for which $250,000,000 is spent. The points of difference deal with the question of how far it is necessary or safe or just to go in inducing private enterprise and capital to take hold of the development work. Under the Senate bill leases of water-power sites may be secured from the Secretary of War to run for 50 years and, if the Government at the end of that time wishes to take over the plants, a "fair value" must determine the price which the Government will pay to the private owners. The element of "unearned increment," which might be great in that time, is the subject of the chief dispute. Critics of the Senate bill insist that if this feature stands water-power companies might be able to get "too fat a thing" in selling out to the Government.

In the main the business done by the companies will be an intrastate one; so it is provided that it shall be regulated by the public utility commissioners of the States themselves, the interstate business alone being left to regulation by the Interstate Commerce Commission of the United States. This again is attacked as giving the advantage to the companies in the States where they can control the commissions—a very usual line of argument for centralizing power, without stopping to think what of evil as well as good could be within reach of a body wherein all control is concentrated. Moreover, could a pretense be erected that would stand for stretching the Federal arm into such a business exclusively within the borders of a single State?

One-half of the water power now in public use is controlled by 18 great companies and though full monopolization is hardly to be feared there are tendencies in that direction, especially because of the influence of the great supply companies, and they would be likely to be strengthened under centralized supervisory control. All hands are agreed that regulatory power is needed over such a utilization for private profit of great natural resources. The dispute is simply as to which is the fairest and most effective way of exercising it.

Much was made in the argument on the bill of the need of securing great water powers for the extraction of nitrogen from the air, as Germany is doing, as a part of a policy of "preparedness," because of the need of that element for gunpowder. The House Army bill includes a provision for this purpose. But the need for the works of peace and for the elimination of enormous needless cost for our industries is manyfold greater.

—

[From the Electrical Age, March, 1916.]

WATER-POWER DEVELOPMENT.

The investigation of the country's water-power development by the Department of Agriculture, which we abstract on another page, at least establishes certain points as being true for the time. It shows that the public service companies account for about one-fourth of the total primary electric power of the country and about half of the developed water power. It also shows that 68 per cent of the total public service company power is in the hands of about 85 corporations, of which 6 control one-fourth, and that these corporations are closely related as to holdings and ownership.

All this is not very new and could have been pretty closely forecasted by anyone conversant with the facts. But a feature of the report that has caused some comment is that which shows that the development of water powers during the three years just passed has been three times as great as that of steam power, and that the development in the Mountain and Pacific Coast States has been over twice as rapid as that of the country at large.

As these Western States contain nearly three-fourths of the country's total water power, it is to be expected that the principal development would take place here. That this fact has been brought out by the report is not particularly comforting to many of the opponents of the existing laws, whose efforts in Congress resulted in its making. It has

been persistently claimed that the present laws relating to the development of water power on public lands were throttling the progress of the country, particularly of the western country. This view has been behind much of the agitation about water power and has had credence in high places. It has been expressed by the President, Secretary of the Interior Lane, and most committees that have investigated the matter.

At first glance it would seem that there is no ground for the belief that public-land water-power development has been checked. On the contrary, the report calls the present situation in the West an "overdevelopment." Its conclusion is that not only has the present régime fostered the investment of capital in water power but that it has gone too far and overstimulated it.

Is this opinion based on the fact that electrically generated water power per capita in the States in question is from 120 horsepower per 1,000 inhabitants in the Mountain States to 160 in the Pacific States as against 30 for the country at large? If so, it is apparent to some that it stands on a poor foundation.

If a reason is sought for the fourfold production of water power per capita in the West as compared with that of the rest of the country, it is not to be found in the enticements to capital offered by the existing laws and regulations. It lies, figuratively and actually, much deeper—it is to be found in the lack of coal out there.

If this section of our country is to progress industrially it must progress by means of oil power and water power and in spite of lack of coal power. That electrically generated water power there is more than fourfold that of the country at large is so because of the demand for cheapest power available in that section—nothing else.

For this reason all will not agree with those who are satisfied with the present state of affairs. Why should not the preponderance of water power per 1,000 inhabitants in the West be fivefold or tenfold greater than for the country at large? In many places the actual excess cost price of coal as compared to the average cost for the country at large approaches that proportion. Therein lies the real reason of hydroelectric development.

In the Eastern and Central States the coal mine is still actively competing with water power. In the West the latter has the advantage. And, from all points of view, it is probable that the actual effect of the present laws on this subject has been to hold back legitimate growth. Hence the persistent efforts that are being made to reform them.

Sound regulation of these resources demands that there should be no unnecessary clog to needed developments. If there are features of the existing laws that have this effect, then the growth of water-power use, as shown, has progressed in spite of these adverse factors. If they are removed, none can deny that it will be all the better for the industry.

The legislation now pending in Congress is drawn, for the most part, with this in mind and its passage may be expected to improve the situation as regards the terms imposed on capital seeking investment in this field.

[From the Age-Herald, Birmingham, Ala., Mar. 13, 1916.]

ALABAMA WILL REAP BOUNTIFUL HARVEST IF SHIELDS BILL IS ENACTED INTO LAW—BANKHEAD AND UNDERWOOD OVERWHELMED WITH CONGRATULATIONS ON ITS PASSAGE BY SENATE—MEASURE WILL HIT SHOALS IN HOUSE, ADVOCATES FEAR—WILL BE OPPOSED BY THE SO-CALLED CONSERVATIONISTS—SHOULD SAVE HUNDRED MILLION TONS OF COAL ANNUALLY.

[By Hugh W. Roberts.]

WASHINGTON, *March 12.*

Judging from the fact that Senator BANKHEAD and Senator UNDERWOOD have been overwhelmed by the unanimous congratulation of citizens of the Tennessee Valley, it is evident that Alabamians believe that as a result of the passage of the Shields dam bill a great blessing will be in store for the State.

The measure, after a long, hard fight, passed the Senate by a big majority. It will encounter shoals in the House. It is opposed by the so-called conservationists, although Senator SHIELDS contends that as the development of latent water power will prevent the consumption of 100,000,000 tons of coal per annum, the advocates of the bill are the real conservationists.

At any rate, the idea obtains that if the bill is eventually enacted into law all streams in Alabama capable of generating power will be developed, and that the State as a result will be immeasurably enriched. All dams constructed by individuals or corporations will cost the Government nothing and must be an aid to navigation. The individual or corporation constructing the dam retains a lease without taxation for 50 years.

THE BILL'S TERMS.

Under the terms of the bill the Secretary of War is authorized to grant permits for dams and power plants where he believes the building of such dams will improve navigability of streams. Dams are to be built without cost to the Government, and the grantees are to provide and operate locks, gates, sluice ways, etc., all without cost to the Government. Permits may be granted to individuals, political subdivisions of States, cities, or other municipal corporations, or to public-utility corporations. Intrastate business and rates of companies operating under the act are to be regulated by the States, and interstate service and rates by the Interstate Commerce Commission.

All plans for dams and works are to be approved by the War Department as being the most adaptable plans for improvement of navigation and fullest development of water-power possibilities. The grantee is to pay a rental for public lands used, and a charge for rights and privileges in use of water, these rentals and charges to be fixed at the discretion of the Secretary of War, and the money received from same to go into a special fund in the United States Treasury to be used for further improvement of waterways. Actual construction work on any project is to be begun within two years of the granting of the permit, and the works are to be completed within such reasonable time as the Secretary may prescribe. For failure to complete the works as directed, or for violation of the provisions of the act or noncompliance with regulations or orders of the War Department, the grantee is subject to heavy cash penalties or to revocation of the grant.

FIFTY-YEAR PERMITS.

Permits are to be granted for 50 years, after which time the Government may either extend the original lease, make a new grant, or upon one year's notice take over the property upon payment of its fair value, this value to be determined by mutual agreement or by the Federal courts, and not to include any allowance for any rights granted by the Government. The bill also provides that no value of rights granted by the Government shall be allowed in fixing rates to consumers. Dams, locks, and other structures used primarily for improving navigation are to be exempt from taxation.

Municipality-owned dams and power plants for irrigation or for supplying power for municipal purposes are to be given preference in making leases for surplus water powers in the streams.

The measure contains a drastic antimonopoly clause, providing that no dam or works constructed under its provisions shall be owned, leased, controlled or operated "by any device or in any manner so that they form part of or in any way effect any combination in the form of an unlawful monopoly or form the subject of any unlawful constraint or conspiracy to limit the output of electrical energy or in restraint of trade."

—

[From the San Diego Tribune.]

SOME OF THE FALLACIES OF PINCHOT CONSERVATION.

In an open letter to Gifford Pinchot, president of the National Conservation Association, from the water-power development association, it is shown that under the kind of restriction and high rentals in the present laws, approved by the Pinchot conservationists, development has practically come to a standstill; and that no large powers have been or are being developed in the national forests and the public domain.

It is also shown that under the present general dam laws, which do not offer terms attractive to capital, only eight dams and water-power plants, with a total development of less than 140,000 horsepower, have been built on navigable streams in the last 10 years.

And in this same period water powers in Europe have had the greatest area of development known to history.

Under the restrictive policies of the United States, for 10 years past, not a single electrochemical plant using water power has been built in this country, while in the same years Europe has developed more than a million horsepower of hydroelectricity devoted to fixation of atmospheric nitrogen alone. Restrictive laws and water-power failures in this country have so discouraged investment that some of our largest power enterprises of recent years have been compelled to seek financial aid abroad.

Every kilowatt of electricity produced by water power is the approximate equivalent of 2 pounds of coal saved for future consumption.

Ever dollar added to the cost of water-power development adds to the cost of supplying power to the consumer, decreases the possibilities of production of power cheap enough upon which to build great new enterprises, lessens the margin of economy between generating power by water and by steam, and diminishes the number of water powers that can be economically and profitably developed, in like manner and extent diminishing the hope of conserving the fuel supply.

Pinchot charges that the Shields bill just passed by the Senate does not protect public rights, because at the end of 50 years, in buying the plants, the Government would be compelled to take over transmission and distributing systems dependent upon the water powers for their value; in other words, Mr. Pinchot would have the Government discourage investment in such utilities by destroying the value of the properties at the end of 50 years.

If the Government bought the generating plant and not the distributing system, the entire scheme would be "up in the air," for Mr. Pinchot in his objection makes no provision for the use or disposition of the power.

He probably intends that the whole cost of the plant shall be amortized, and the property turned over to the Government free of cost at the end of the period, but evidently he does not take into consideration that the amortization cost would have to be added to the power prices, and would operate to discourage water-power development in the same manner and for the same reasons as would the imposition of any other form of rental or taxation adding unnecessarily to the cost of power.

Use is the highest form of conservation of water power; but Mr. Pinchot either doesn't know that or refuses to admit it.

The entire Pinchot scheme of conservation is demagogic and sophistical.

Pinchot probably knows better, but it does not suit his personal or political purposes to have it right and for the best interests of the country and posterity.

—

[Editorial from the Engineering Record of Apr. 8, 1916.]

THE SHIELDS BILL.

For years this journal has been urging the need for Federal legislation which would encourage the rapid development of our wasting water powers. As is well known the only form of permit which can be secured now is revocable at any time. Under this provision capital has been deterred from water-power investment. So patent is the present unfavorable situation, so apparent is it that true conservation demands the utilization of energy now being wasted, that the demand for suitable legislation is heard from every quarter. Year after year measures have been introduced. Much time has been consumed in hearings, yet always the pressure of legislation has resulted in the measures dying with the termination of the sessions. In the fall of 1913 the National Conservation Congress met in Washington to discuss the question. The water-power committee brought in not only majority and minority reports but also a set of "unanimous recommendations," which had the support of the entire committee. These recommendations, too, were the burden of the majority and minority reports, which differed from each other and from the "unanimous recommendations" in minor respect only—and chiefly in the emphasis which the minority report laid on the danger of water-power monopoly. An examination of the Shields bill, side by side with these recommendations, shows that each of them has been embodied in the Shields bill, save only that which provides that the Government should reserve the right of receiving a compensation for the power granted. It is the omission of such a reservation which has brought forth the chief opposition to the measure. As to this matter there is ground for argument. The only reason for demanding such a clause is that the State public-service commissions, to which the bill gives the right of regulating interstate rates, might be subservient to the wishes of the water-power companies. Rates might thus be set which would fail to return to the public its share of the water-power benefits. With our present experience in regulation, however, the danger is rather that the attitude of the commissions toward the companies will be inimical. Where power is transmitted across State boundaries the Interstate Commerce Commission would control the rates. The real injustice to the public would come, in the opinion of this journal, in cases where a power was granted for the use, exclusively or in large part, of a single industry. And this would

apply whether the industry received the grant directly or through a subsidiary. Where a power is so granted, the company may get an inordinate return and the public nothing. There should be a clause in the bill, therefore, which would allow the Government to lay a tax on that part of the power used by a grantee proprietor whenever power so used exceeds 40 per cent of the total generated. With this addition the Shields bill should meet the hearty approval of thinking citizens. So amended it would adequately protect the interests of the public, and make it possible to attract investors. The bill should then receive favorable action in the House.

—

[From the Washington Post, May 7, 1916.]

VAST POWER WASTED—STREAMS CAN DO WORK OF NEARLY TWO BILLION MEN, SAYS LANE—NEW INDUSTRIAL ERA SEEN—HAMPERING LAWS BLAMED FOR LOCKING UP COUNTRY'S RESOURCES—PREDICTION MADE THAT WEST WILL RIVAL EAST AS STEEL AND IRON PRODUCER—NITRATES FOR STARVED LAND.

[By Franklin K. Lane.]

We are living to-day in the dawn of an age in which power is the basis for our material progress. The productive abilities of our 100,000,000 people are increased by the use of probably 125,000,000 horsepower of mechanical energy, not including the animal power furnished by 30,000,000 horses and mules. When applied to industrial uses 1 electrical horsepower does the work of 10 men without tiring. That is, 1 electrical horsepower, continously operated, does as much work as 30 men working in eight-hour shifts.

Conservation of human labor goes hand in hand with utilization of mechanical energy, and utilization of that form of energy most cheaply and least wastefully developed accomplishes the maximum in freeing man from muscular toil and increasing his productivity. In the last decade we have harnessed for our utilities and industrial needs something like 6,000,000 horsepower of water. This means, in terms of human energy, that streams which before that time flowed on in waste are now doing work equivalent to the labor of 180,000,000 men working eight hours a day.

POWER OF 1,800,000,000 MEN.

This accomplishment stands for real progress, but, as compared with our possibilities, it is not such progress as we should have obtained. Although we are utilizing to-day 6,000,000 horsepower of water, we are annually, daily neglecting and wasting 10 times that amount, largely because of our inapplicable laws, since most of the water powers not in use are under Government control, and the present laws do not adequately make provision for their fullest development and use.

There is in nonuse in the United States enough water power to equal, if harnessed to the wheels of industry, the daily labor of 1,800,000,000 men, or 30 times our present adult population.

We are depleting our fuel supply in the manufacturing sections of the East and Middle West, while in the far West are mountains of undeveloped raw materials adjacent to unused water powers whose development would mean the establishment of great new industries in new manufacturing centers.

FARMS DENIED FERTILIZER.

We are robbing our farm lands of fertility and failing to realize the utmost of our agricultural opportunities because of our dependence upon foreign sources of high-priced supplies for chemical plant foods or fertilizers, while mountains of phosphate rock, lime, and lignite in the West await only the magic touch of atmospheric nitrogen extracted and fixed with the aid of cheap hydroelectricity to furnish a low-priced and plentiful supply of fertilizing elements.

Millions of acres of lands rich in plant foods lie arid and waste in the western country which can be converted into fertile and productive farms, gardens, and orchards merely by pumping onto them the waters of the streams flowing through them. This miracle of making the desert bloom awaits for accomplishment only the laws which will permit capital and enterprise to engage in the harnessing of these streams so that they can pump themselves onto the thirsty soil.

To conserve these vast natural resources is the greatest attainment to which the statesmanship of our day can apply itself.

To be truly prepared for war is to be fully prepared for peace.

More than 40 per cent of the potential water power of the United States lies in the comparatively narrow strip bounded by the Cascade Mountains and Sierras in the east, the Pacific Ocean in the west, Canada in the north, and Mexico in the south. Some of these water powers, now unused, are among the cheapest in the world. Long-distance, high-voltage transmission has almost annihilated distance in making hydroelectricity available in this great western empire.

NEW INDUSTRIAL ERA.

Development will open to the West an industrial era of such possibilities as have been almost undreamed of. Iron deposits are here in abundance, which, with fluxing and reducing materials at hand and cheap hydroelectric power as the agency for reduction, may make the Pacific coast a competitor with the Ohio Valley in the production of special grades of pig iron and the manufacture in electrical furnaces of high-grade steels.

Also at hand are the materials for the manufacture of such steel alloys as ferromanganese, ferrochrome, ferrosilicon, ferrotungsten, ferromolybdenum, and others. Here are rare metals—barium in the form of sulphate and carbonate, zince and copper, gold and silver—all awaiting the magical touch of the cheap electrical potentiality in our wasted stream flow.

—

[From the Investment News (Chicago), Apr. 1, 1916.]

WATER POWER DEVELOPMENT MEANS GREATER PROSPERITY FOR UNITED STATES—AS PRIVATE CAPITAL ALONE CAN BE PROCURED, IT SHOULD BE ENCOURAGED TO INVEST AND NOT FRIGHTENED AWAY BY LAWS PROHIBITIVE AND INIMICAL; PURPOSES OF SHIELDS AND FERRIS BILLS; AN HONEST PRESENTATION OF THE SUBJECT.

[By Herman B. Walker, Washington, D. C.]

One of the greatest problems before Congress to-day is the adequate handling of the water resources of this country. The following article prepared by Herman B. Walker, of the Water Power Development Association, outlines in temperate and judicial language the purpose of the legislation sought and the benefits to be derived from a safe, sane, and sensible development of the water power of the Nation.—Editor.

There are two great conservation bills before Congress, the passage of which means so much to the economic welfare of the United States that they are entitled, I believe, to careful consideration and earnest support. These are the bills for enabling and encouraging development of the unused water powers in the navigable streams and in the public domain. Because of widespread misinformation and because of misapprehension in many minds as to the kind of legislation necessary to bring about water power development, there is danger that these bills may be passed in such form as will defeat their main purpose, and actually discourage water-power development instead of encouraging it.

To secure water-power development by private enterprise terms and conditions must be such as will attract investment. With Europe impoverished by war, development must be financed here, and water-power securities must compete with other forms of investment. Under present laws, for several years past, water-power development in the United States has been practically at a standstill. A few comparatively small powers have been developed in the West, in the national forests and national parks, in localities where growth of city utilities or need for irrigation, or both, have created a high-priced market, or where conditions have otherwise been exceptionally favorable. No large hydroelectric plants have been built in recent years. Recent reports of the Forest Service show that the average size of power plants built in the national forests under the present revocable-permit system is less than 6,000 horsepower, and that permits have been issued for large developments aggregating more than 1,500,000 horsepower, of which none has been built or is being built. I know from personal investigation that efforts to finance these larger plants have failed and that they can not be built under present laws.

In 10 years past only eight water-power plants, aggregating less than 140,000 horsepower, have been built upon our navigable streams under the general dam acts of 1906 and 1910. President Wilson, Secretary Lane, and committees of both Houses of Congress, after careful study, have announced their belief that new laws are necessary to stimulate water-power development.

POWER DEVELOPMENT IN EUROPE.

During the last 10 years 1,200,000 horsepower of hydroelectricity has been developed in Europe for use in atmospheric-nitrogen establishments, of which we have not one in this country. A number of large enterprises of this nature have been planned in recent years in the South and West, but they can not be financed under present laws. The stagnation in water-power development is not only wasting unnecessarily our fuel supply, but is preventing the establishment of new industries and putting the brakes on national prosperity. One large factory, with $2,000,000 invested in buildings and machinery especially designed for making water wheels, was shut down for 10 months last year and has exactly one small wheel at present under construction. It is estimated that more than 2,500 engineers in the United States formerly employed in hydraulic construction are now out of work.

We are talking of military preparedness, but are wholly dependent upon foreign supplies of saltpeter from which to make nitric acid, an essential in the manufacture of explosives. Our farmers are paying tribute to the Chilean monopoly on every pound of nitrates used in agricultural fertilizers. Capital will not build the water powers necessary to the establishment of electrochemical industries which would give us military, agricultural, and industrial independence because present laws do not guarantee security of investment or offer hope of reasonable return. It is believed by men who know the practical side of the subject that the Shields bill and the Ferris bill as amended in the Senate will offer this needed incentive to investment, and that their passage will be closely followed by extensive development.

The Shields bill received the full indorsement by Lindley M. Garrison, former Secretary of War, whose testimony on the subject before the House Committee on Interstate and Foreign Commerce should be carefully read by every citizen interested in the conservation of water powers. An editorial in the Outlook of February 9, 1916, states clearly and forcibly the features of legislation necessary to protect public rights. All of these features are included in both the Shields bill and the Ferris bill as amended by the Senate Committee on Public Lands.

FEATURES OF BILLS BEFORE CONGRESS.

Both of these bills retain to the public all title in water rights and power sites, where these are now publicly owned, granting only permits or leases for use for 50 years, at the end of which period the Government may take over all parts of the plants dependent for their usefulness upon the leases or permits at a fair value, to be decided by mutual agreement or by the Federal courts. No allowance is to be made for any unearned increment or value in any lands or rights granted or leased by the Government or acquired by condemnation under any powers conferred by the acts. During the leasing period intrastate service and rates are to be subject to State regulation, and interstate service and rates by the Interstate Commerce Commission.

On the ground that use is the highest form of conservation of water powers, and to discourage speculation, leases and permits are to be revocable if development is not made within a reasonable time. A moderate rental for public land used is to be paid by the power companies; also a Federal charge for the benefits derived from Government storage of water.

—

[From the News, Birmingham, Ala., Mar. 14, 1916.]

THE SHIELDS BILL—LET US BE FAIR IN OUR ATTITUDE.

A good deal has been said in disparagement of the Shields bill that would permit the development of waterways by private capital. Most if this criticism has originated, it may be said, from localities that would not be directly benefited by streams far distant. Much of this criticism, too, has come from sources quite blind to the good of any utility, no matter how carefully supervised by Federal, State, or municipal authorities, that is developed by private capital. Private capital, to some mentally blind persons, is a thing worse than the black plague—a fearsome scourge meant only to rob poor persons of their daily bread. It is true that private capital at times has made malefactors of some corporations. It is the nature of great unrestricted power, unless properly regulated, to drift into deviltry.

There is a cropping out here and there of the old bitterness against private capital in any shape or form that would even suggest a hastening of the illiteracy campaign. It would appear that some persons who criticize the Shields bill that has just passed the Senate are not well informed as to the purposes of the dam building which that bill would permit, nor the regulation of these privileges, nor the safeguarding of the people's interests, which are a part of it.

Under the Shields bill the Federal Government will have the strictest supervision of all water-power development.

Dams are to be built without cost to the Government, and the grantees are to provide and operate locks, gates, sluiceways, etc., all without cost to the Government.

Intrastate business and rates of companies operating under the act are to be regulated by the States and interstate service and rates by the Interstate Commerce Commission.

The grantee is to pay a rental for public lands used and a charge for rights and privileges in use of water, these rentals and charges to be fixed at the discretion of the Secretary of War, and the money received from same to go into a special fund in the United States Treasury to be used for further improvement of waterways.

For failure to complete the works as directed or for violation of the provisions of the act or noncompliance with regulations or orders of the War Department, the grantee is subject to heavy cash penalties or to revocation of the grant.

Permits are to be granted for 50 years, after which time the Government may either extend the original lease, make a new grant, or, upon one year's notice, take over the property upon payment of its fair value, this value to be determined by mutual agreement or by the Federal courts, and not to include any allowance for any rights granted by the Government.

The bill also provides that no value of rights granted by the Government shall be allowed in fixing rates to consumers. Dams, locks, and other structures used primarily for improving navigation are to be exempt from taxation.

That last paragraph may irk the tempers of some folk who believe the companies that spend millions on the improvement should be heavily taxed for the privileges granted by the Government. The point is debatable. The attitude assumed in such an argument is that the people are giving something away and receiving nothing back. The argument is stereotyped, of course. It is assumed by those who, like the miser, look on their unused gold and gloat over the thought of what they could do with it if they chose to go on a high lonesome and blow it in. There are those of poetical temperament, who protested against the use of Niagara Falls, who would prefer to have the scenery remain, rather than devote the power of those falls to the service of men; those who would rather the river would babble over sharps and shingles to the end of the journey rather than let it be utilized to create great wealth for the people.

Now, this is all very well. The News is strong in the opinion that these privileges should be well paid for, and that in addition to the rentals and land charges specified in the bill the companies should be taxed, and taxed commensurately with the value of the development. But this matter was thrashed out long before the bill was introduced, and it was found that the owners of capital, considering the vast expenditures necessitated for the work, could not see their way clear to paying taxes. With that knowledge, the Shields bill was framed. The bill passed the Senate. A similar bill will be disposed of in the House, and the News trusts in a similar fashion.

Whatever those charges for land rents and water privileges may be, they will be diverted to water-power developments—perhaps to production of nitrogen on an immense scale. In the case of Muscle Shoals, which will be greatly benefited by such a development, the commercial development of Alabama is a quite natural concomitant. Greater pay rolls will follow in the path of such privileges on the Alabama and Tennessee Rivers.

No good argument has been presented against this—none that can be attributed to anything greater than congenital prejudice, a thing which Alabama must get over with if it would properly develop its latent wealth. If the companies that go to work and spend millions in this development get immensely rich in the course of years, that, too, is all right.

Let us not be selfish. Let us all be as liberal and fair as our training and vision will allow us to be.

—

[From the Monitor, Concord, N. H., Mar. 23, 1916.]

The Shields water-power bill, which administration Democrats have just succeeded in driving through the Senate is denounced by Gifford Pinchot as something most outrageous. And Pinchot declares that President Wilson was fully informed of the evil character of the measure and refused to lift a finger in opposition to it. The logical conclusion of this should be that Pinchot, with all whom he can influence, will unite with the Republican Party to defeat Wilson's reelection. But Pinchot is always more prolific of language than of logic in political affairs.

—

[From the Sentinel, Milwaukee, Wis., May 9, 1916.]

WATER-POWER OBSTRUCTION.

By a vote of 116 to 39 the National Conservation Congress has indorsed the Shields bill and thus such conservation impossibilists as Messrs. Garfield and Pinchot have been hit hard in the house of their friends.

If these somewhat monomaniacal gentlemen were to have their way water-power conservation would simply amount to a Government veto on water-power development.

Owing to such fanatical, unprogressive, incredibly stupid legislation, only 10 per cent of the country's enormous available water power is utilized. By imposing such impossible terms that capital can not be induced to enter the precarious field of water-power development, our immense potential source of hydroenergy is almost entirely undeveloped.

The Government can not develop it. Private capital alone can develop it. Unless the Government gives private capital a chance to develop it on reasonable terms, it will remain undeveloped.

Nothing can be more asinine, more wasteful in terms of national resources, than this governmental policy of sheer dog-in-the-manger obstruction.

Irrigation, reclamation of millions of acres of arid lands, railway electrification, great projects in the substitution of hydroenergy that would conserve the Nation's coal supply—all will be indefinitely held up, to the immense loss and detriment of the country unless the stupid and reactionary legislative shackles are removed from the water-power development opportunities.

It is most encouraging to find that the National Conservation Congress recognizes this.

Let the public interest be protected, and well protected, by all means.

But it certainly is not protecting the public interest so to legislate that our magnificent water-power resources remain as undeveloped as they were when the Indians and the buffaloes roamed the country. It is precisely the reverse.

Give American energy and capital a fair chance, and a fair chance is all they ask or are entitled to.

—

[From the Inquirer, Philadelphia, Pa., May 5, 1916.]

REAL CONSERVATION WINS.

Gifford Pinchot, former Secretary of the Interior Garfield, and other sentimentalists received a body blow at the meeting of the National Conservation Congress in Washington. These gentlemen, who have lived long in the East and have plenty of money, can not understand how anyone can oppose their own special views without being utterly given over to the devil of materialism. Their idea of conservation is to stop the use of all of the natural resources of the country. It is about as practical as to urge a man to keep depositing all his money in bank with the distinct understanding that it can not be drawn out for a hundred years.

The majority of conservationists in the Congress are not of that sort. They want the best possible use made of our resources and to this end have indorsed the pending Shields bill in Congress, which will release the pent-up water power of the country and put it to work. They have an interest in posterity, but they are also interested in living people. Pinchot et al. are of the opinion that this is going to give a great money devil control over the lives and fortunes of people in the West. If so, the people involved are quite satisfied. They would rather see water power at work pumping water over desert lands, which will blossom like the rose, sending light, heat, and power of various kinds to benighted sections, than that the present condition should continue.

Pinchot managed to tie up many of the resources of the West—coal, iron, pasture lands, water power, timber, etc., so that practically no progress has been made for a decade. It is a revolt from his academic and unworkable methods which has brought the real conservationists to action. The Shields bill looks to releasing water power under normal restrictions. It means much to the people of the West, where conditions depend so much on the activity of man to make nature more kindly. Such conservation as Pinchot desires, if undertaken a century ago, would have blocked the development of this country. The Western Commonwealths have no desire to be butchered to make a holiday for their great-great-grandchildren.

—

[From the American, Waterbury, Conn., Apr. 14, 1916.]

MR. PINCHOT'S WEAKNESS.

Gifford Pinchot writes another letter to the newspapers—some of which print it—on the subject of the giving away by the Government of vast water powers. The Shields bill, which has just passed the Senate, Mr. Pinchot says, gives to water-power interests water power equivalent to twice the mechanical power of every kind now used in the United States—enough to meet the needs of 200,000,000 people. But the bill has not passed the House, and he says it can be defeated. He calls attention to another substitute bill in the House which he considers just as bad, and to two other bills, either in the House or Senate, which are not fit substitutes. He recommends especially the Ferris bill, which has twice passed the House but got no further. He is afraid that in the conference between the two Houses, if different bills pass each House, the water-power interests will be able to bring their powerful influence to bear and obtain what they seek.

The present is a great opportunity for interests which know what they want and have the means of going after it. We don't know the merits of these different measures. Heretofore we have taken Mr. Pinchot's word for it. He was almost the original of the advocates of conservation of land, forests, water power, and whatever else was in danger of being wasted But his zeal so led him away from general to personal causes, and he has shown himself so untrustworthy in his judgment and so hasty in some of his words and actions that we don't know how far he is speaking as the unselfish, self-sacrificing friend of the people and defender of their rights, or as the partisan in politics, the radical in theories, and the zealot whose enthusiasm confuses his common sense.

We have got to trust Congress to deal with this question, because the great popular forces which Mr. Pinchot was once able to rally behind him are now distrustful of him, and, furthermore, are so interested in one or two other vital things as to exclude questions like this, where the terms are not perfectly distinct. Still further, the public has seen some harmful results of the interference of government with private business which was brought on in a considerable degree by Mr. Pinchot's past activity, and for the time being at least is inclined to give private enterprise a chance for its life, with the risk, of course, that it will take the lives of competitors and the property of the people.

—

[From the American, Waterbury, Conn., Mar. 9, 1916.]

STOPPING STRANGULATION.

What has been called the "heavy hand of strangulation" has been laid on all water-power production, but it especially affects the Northwest. The hard times are still along the Pacific coast and in that general region. One reason given by those who live there is that all private initiative is so controlled by Government or State regulation that capital can not be found for investment in new enterprises.

And no wonder. Take the State of Oregon. There are thousands upon thousands of horsepower running to waste there. A water-power company can not obtain a license from the Government that is not revocable on some excuse or other by a bureaucratic official in Washington. There is no appeal to the courts against this official. One company which did venture out into that field is said to have had a $10,000,000 investment taken away from it, and it was obliged to charge off that amount because of this bureaucratic system. What evidently is needed is that private capital be allowed to develop this water power for a given term of years without revocation, except on a court decision of the license.

This is the privilege which is granted in the so-called Shields bill which has just passed the Senate. The bill provides for the development of water power in a navigable water by providing capital, the license, issued by the Secretary of War, giving the grantee the right to operate the power for 50 years, when the plant reverts to the Government upon payment of a fair value to be determined, in the last resort, by the courts. Of course, all such water-power privileges are under the control of the Interstate and the State Commerce Commissions. This is all those interested in the development of water power have been fighting for, and if the bill now goes through the House it will raise the heavy hand of strangulation which has prevented a very necessary development.

—

[From the Engineering News, New York, May 11, 1916.]

FEDERAL PERMITS FOR WATER-POWER DEVELOPMENT.

The National Conservation Association at its meeting in Washington last week voted by a large majority to approve the Shields bill, which authorizes the Government to grant fifty-year permits for the development of water power on navigable rivers. Under this bill the development of the power will be under Government supervision and the rates charged by any company which develops power will be subject to regulation by the authorities of the State in which the plant is located.

The Shields bill has been opposed by Gifford Pinchot and his associates on the ground that it is too generous in its terms to the companies which develop the power and especially that the companies receiving the permits should pay some compensation to the Government in addition to that provided in the bill. Mr. Pinchot's theory is unquestionably sound, but the difficulty lies in its practical application. It sounds reasonable to say that, if the Government is to sell or lease valuable property it should get the best price the property will bring rather than give it away. But how could a price be fixed which would be fair both to the Government and the people who invest their money in water-power development? It is easy to say that the price should be such as will leave a fair return to the company on its capital invested plus suitable compensation for the risk involved and a reward for the enterprise and industry necessary to organize the corporation and carry the work into effect.

The difficulties of carrying any such ideal plan into effect are insuperable. No engineer or financier is wise enough to predict in advance with any considerable degree of accuracy what will be the annual net earnings (or losses) of a great water-power enterprise five years, ten years, or twenty years from the date of its establishment. Unless such an estimate could be made, how would it be possible to appraise the different water-power sites and determine their present-day value or what would be a fair rate of compensation for their use? It might be possible of course, to fix by law or executive order a certain rate of compensation for all Federal water-power leases; but under such a plan only the most favorable power sites would be developed and the others would remain idle.

Everyone agrees that it is to the interests of all parties concerned and especially desirable for the conservation of our coal and oil resources that water-power development should again go forward on a large scale. The Government itself obviously can not go into the business of power development, and it ought therefore to encourage private corporations to carry forward this work and to do so at the earliest possible date.

It is this general view of the matter, we take it, that influenced the National Conservation Association at its recent meeting to reverse its action of three years ago and approve a more liberal policy toward the development of water power.

—

[From the Nation, New York City, May 1, 1916.]

That the National Conservation Congress should have indorsed the Shields bill by a vote of 115 to 39 is a severe blow to Pinchot, Garfield, and other extreme conservationists. There was no division upon principles, but merely upon the interpretation of the Shields measure. The majority of the Conservation Congress plainly thought that its provisions could be accepted literally and in good faith. It meant what it said in giving the Government the right to take over private water-power plants on navigable streams at the end of 50 years at actual valuation. But ex-Secretary of the Interior Garfield was certain that the bill "turns over to private monopoly public power in perpetuity. The 50 years' limitation as proposed is nothing more than a mere fiction." The minority resolutions held that power sites should not be disposed of in perpetuity, but retained in Federal control. The majority made much of the fact that the Senate, after careful debate, had not seen in the bill the "mere fiction" of which Garfield spoke; and an even weightier consideration is that Secretary Lane has not done so. Upon details of the measure there may be disagreement, but its guaranty of a 50 years' tenure seems necessary to invite capital into a risky field.

—

[From the World, New York City, May 5, 1916.]

Now that the Conservation Congress has approved the Senate bill for the leasing of water-power sites for a term of years, it is possible that sorely needed legislation on the subject will not be much longer delayed. A good many leaders in the movement for the preservation of the natural resources of the Nation have proceeded on the theory that rivers, mines, and forests could not be saved if they were used, and those who have disagreed with them have been denounced as no better than horse thieves. The conversion of the Conservation Congress itself to the contrary idea is a welcome sign of progress.

—

[From the Ledger, Columbus, Ga., Mar. 12, 1916.]

SHIELDS WATERWAY BILL.

The Ledger is impressed with the scope and apparent meaning of the Shields bill, which passed the Senate a few days ago.

Senator SHIELDS claims much for his measure, which, if enacted, he says, will be followed by early development of water powers aggregating 15,000,000 horsepower, or a volume of electricity equal to that produced by a coal consumption of 100,000,000 tons a year, and meaning the saving of $700,000 a day in coal bills, will have a hard fight in the House.

Under the Shields bill the Government will have strict supervision of development of water power. While capital is encouraged to help develop the water power and the rivers, the Government does not relinquish supervision. The rentals are to be converted into funds for improving the waterways. The development of the water powers will center interest of the people on the waterways and will force the Government to give the waterways at least half way adequate treatment.

Some of the strong points of the Shields bill show the manner in which its enactment might bring about development of waterways throughout the country. Under its terms the Secretary of War is authorized to grant permits for dams and power plants where he believes the building of such dams will improve the navigability of streams. Dams are to be built without cost to the Government and the grantees are to provide and operate locks, gates, sluiceways, etc., all without cost to the Government. Permits may be granted to individuals, political subdivisions of States, cities, or other municipal corporations, or to public-utility corporations. Intrastate business and rates of companies operating under the act are to be regulated by the States, and interstate service and rates by the Interstate Commerce Commission.

A brief synopsis of the provisions of the measure, as carried in Friday's Ledger, indicates that it is the thing for the country at this time.

—

[From the Herald, Bristol, Conn., Mar. 17, 1916.]

The water-power bill, which has long been under discussion in the Senate, has at last been passed. It permits the construction of electric plants on navigable streams, subject to apparently very mild restrictions. As adopted the bill permits the construction of dams on navigable streams under licenses issued by the Secretary of War and gives grantees the right to operate such plants for 50 years, after which time the Federal Government may take over the plant, giving two years' notice and paying a value to be determined. Regulation of rates and service is left to the States in which the plants are located. This is a tremendously important piece of legislation, and if it becomes a law will give the new Secretary of War plenty of opportunity to exercise his legal talents. All, we believe, agree that the water powers now going to waste should be utilized to a considerable extent. But it is even more necessary to safeguard the rights and interests of the people. A really cheap and abundant electric current is a boon to any section and its utilization for a great many purposes is only a question of price to the consumer.

—

[From the Republican, Springfield, Mass., Mar. 16, 1916.]

SHIELDS WATER-POWER BILL.

The Shields water-power bill, passed by the Senate, is not without merit, since it would provide for the early development of 15,000,000 horsepower, more or less, now flowing to waste in the navigable streams of the United States. As Senator Shields has said, this water power is equivalent to 100,000,000 tons of coal consumed annually, at a cost of $250,000,000. Navigable streams are under the control of the United States Government and no power development in them is possible without the Government's consent. That these vast water powers should be utilized is universally admitted.

All the more reason exists for developing them now that the national danger involved in the cutting off of the supply of nitrates from abroad has followed the European war. Hitherto the indispensable nitrates used in the manufacture of gunpowder and explosives have come from Chile. It has been said very truly that—

"American farmers are paying over $21,000 a day in taxes to support the Government of Chile, in the form of export duties levied by that country upon saltpeter and nitrate of soda, while American business enterprises and capital, ready to establish the electro-chemical industries which will afford a competitive supply and lower prices, stand by helpless, bound and chained by archaic laws and conditions created before the invention of the steam turbine or the discovery of these new sciences and industries."

Nitrogen plants are needed in this country. The blockade forced the establishment of such plants in Germany and Germany now gets its nitrogen from the air. Mr. Pinchot himself has urged the speedy development of our water powers, "because without electricity generated from water power we can not manufacture nitrates and nitrates are the basis of gunpowder." The United States Government can establish its own nitrogen plants, of course. The House Army bill has a section providing for a Government plant "for the fixation of atmospheric nitrogen by the development of water power, or any other means." But the interests of the entire country comprehend much more than its military interests and, as a whole, they require the utilization of water power wherever it can be made commercially available.

The Shields bill is undoubtedly framed so as to make this field of development attractive to private capital. Leases of water-power sites on navigable streams may be secured from the Secretary of War to run for 50 years and, if the Government at the end of that time wishes to take over the plants, a "fair value" must determine the price which the Government will pay to the private owners. That an unearned increment might figure largely in the valuations 50 years hence is not impossible, and the bill is criticized as being too favorable to the water-power corporations in that particular. The debate in the Senate disclosed a group of Senators who unsuccessfully attacked the measure along this line.

—

[From the Record Herald, Chicago, Ill., Mar. 31, 1916.]

TIME TO GET TO WORK.

Two water-power bills are pending in Congress. The Shields, dealing with dams and power development on navigable streams, has been passed by the Senate. The Ferris, regulating the development of water power on the public lands, has passed the House and is before the Senate with many amendments.

To the latter there is violent opposition in the Rocky Mountain States, which wish to be "let alone" in dealing with water power on the public domain, which they seem to think "belongs" to them. Of course, it belongs to the whole Nation. Yet Senator SHAFROTH, of Colorado, has virtually threatened that he and his colleagues of these States will "talk it to death."

The bills may not be perfect, but in their general aim they appear to be along the lines of Secretary Lane's recommendations. It will be difficult to convince any reasoning mind that Mr. Lane would sanction a "corporation grab," though that is the charge now made against the Ferris bill by Gifford Pinchot, who has thus reversed the approval he gave the bill as it left the House.

The purpose here is neither to condemn nor uphold the bills as they stand. It is to urge that they be given full and fair consideration and that the great need of reasonable legislation be not lost sight of in acrid controversies over details. Also that no undue respect be given to the new-born affection of the Rocky Mountain region for "State rights."

The country is lagging woefully in hydroelectric development for the lack of laws under which this neglected national work can be done. Congress will fail in an important branch of national preparedness if it does not hammer out workable legislation. We have been talking about the subject for nearly a decade. It is time to agree on some plan and get to work.

—

[From the Ledger, Tacoma, Wash., May 5, 1916.]

WATER-POWER LEGISLATION.

The Shields water-power bill has been approved by the National Conservation Congress over the protest of Gifford Pinchot. In the debate charges were made and denied that the bill is backed by water-power "interests." Even if the bill be supported by men who are ready to engage in hydroelectric development, it does not necessarily follow that it is a bad measure. The merits or demerits of the bill should be considered on their own account, for it is probably true that no bill would command the united support of either Congress or citizens.

The Shields bill passed the Senate a few weeks ago and went to the House, where the Adamson bill was reported as a substitute. Like the Shields bill, the Adamson bill provides for 50-year permits, but the Adamson bill contains additional restrictions. For example, the grantee could not sell to one consumer more than 50 per cent of the power developed without the consent of the Secretary of War, nor could the grantee sell to a distributing company without similar consent.

Both the Shields and Adamson bills contain clauses designed to prevent combinations to fix prices or control markets.

Under the Shields bill prices of power would be regulated by the States in which the plants are situated. The Adamson bill is the same in this regard, but whereas interstate rates would, under the Shields bill, be regulated by the Interstate Commerce Commission, under the Adamson bill they would be regulated by the Secretary of War.

The Shields and Adamson bills relate to navigable streams, which are under the supervision of the Secretary of War. They contemplate the construction of dams, and where dams are constructed the grantees are required at their own expense to construct and operate canals and locks to preserve navigation.

The Adamson bill's provisions in regard to valuation of a plant at the end of 50 years, should the Government decide to take it over, are considered more specific.

It is reported that $100,000,000 is ready for investment in hydroelectric development should Congress make a law encouraging it. One proposed project on a large scale is planned for the Columbia River in eastern Washington.

The passage of the Shields bill in the Senate and the approval of the bill by the National Conservation Congress indicate that Gifford Pinchot's extreme views are not approved, and while the several changes may be yet made, it is probable that a bill favorable to power development of navigable streams will soon become a law.

There are also pending in Congress measures for the development of power on lands owned by the Government. The House and Senate have passed measures that differ, but the prospects are that the two branches will reach a compromise.

—

[From the News, Salt Lake City, Utah, Mar. 9, 1916.]

WATER-POWER DEVELOPMENT.

The so-called Shields bill, which passed the United States Senate yesterday, has no immediate and direct interest for the people of Utah, though indirectly it is of great importance to them, in connection with the rest of the country, as signalizing a break through the outer fortifications of the ultraconservationists. The measure provides for the development of water power by private capital in navigable streams—and of such waters there are practically none in this State. But its passage by a two-to-one majority in the upper House of Congress is a welcome indication that other measures of similar import will find more favor than has been the case in the past and that some of the country's resources, which certain radicals have determined shall be locked up indefinitely for the purported use of posterity, may be made serviceable for the utilitarian citizenship of the present.

With the wise and reasonable conservation of natural resources the best sentiment of the West is in true accord. No one now favors wastefulness or the monopolistic seizure of public property for private gain. On the other hand, there is no justice or statesmanship in leaving this property or these resources absolutely unused; and it is this extreme view, as represented in the policies which eastern theorists have caused to prevail, that excites the impatience of the growing West. The people of this imperial section are willing that grants and licenses and permits and privileges be safeguarded in every possible way in the public interest, but they are not willing that, provided all this is done, there shall be no use whatever of benefits which nature has placed within their reach, merely because of a fantastic fear that future generations will otherwise be robbed. The men of to-day are of opinion that the more and the better they build and utilize their advantages the more pleasant and prosperous will be the homes of their children Mr. Gifford Pinchot and others of his school may consider this vain and foolish self-conceit, but it is the popular view just the same.

So the passage of the Shields bill is a cause of satisfaction. It is not a perfect measure; certain amendments which were proposed the News would have liked to see accepted. Furthermore, it has not yet encountered the tempestuous treatment of the lower House. But it marks a victory—partial, at least—and its further progress through the stages of legislation will be watched with the concern which its importance deserves.

—

[From the Duluth Herald, May 12, 1916.]

THE WATER-POWER BILLS.

The general public probably is not in a position to judge finally of the Shields bill, the ostensible purpose of which is to make it possible to develop water power to the profit of the country. It hears Pinchot, Garfield, and others condemn it as too liberal to capital and unduly generous at public expense with a great national resource, and naturally it has its doubts about whether or not the bill should become a law.

Probably the biggest help the bill has had yet is its indorsement by the National Conservation Congress by a vote of 116 to 39. To a very large extent this indorsement offsets the doubt raised by the more radical conservationists. Probably it will do away with most of the fear that has been felt of the results of the measure if it is enacted into law. There lie the water powers, latent and undeveloped. It is to the interest of the country that they be developed and put to use. Unless the Nation itself is in a position to go into the power business and develop them itself, it must look to private capital to do it. And private capital will hardly do it unless reasonable permanence and possible profit are assured. It is possible to assure these things without jeopardizing the public interest; and the sole question is whether or not the Shields bill accomplishes this. The National Conservation Congress says it does, and unless the congress has been suddenly dominated by greedy interests its word has the weight of authority

Mr. Pinchot and Mr. Garfield are earnest, honest conservationists, and their word also carries the weight of authority. But they are extremists, and clearly it is possible for extremists to stand for such an ironclad protection of the national interest as to make it practically impossible for capital to get through it with any prospect of profit.

For our part, while we would like to see the provision regulating rates made stronger than it is, and not so much dependent on local authority which in some States is practically nonexistent, on the whole the bill seems fairer than Mr. Pinchot's construction would lead one to think it. It is of the highest importance that the development of water power be made possible. Water power is the last great public resource remaining, and in time to come it will prove the greatest of all; therefore the public interest should be carefully conserved. The Shields bill does not conserve the public interest quite so fully as we should like to see, but perhaps it is impossible to conserve it better without driving away capital and locking up the water powers for an indefinite period. The provision limiting franchises seems more definite and satisfactory than Mr. Pinchot thinks it is, and because this assures against giving away this resource for all time the Shields bill in something like its present form probably should be passed.

—

[From the Journal, Minneapolis, Minn., Mar. 22, 1916.]

SOLVING THE WATER-POWER PROBLEM.

The passage of the Shields water-power bill by the Senate gives ground for the hope that the House will solve the knotty problems involved by also passing the bill.

For eight years there has been a practical Federal embargo on the construction of water-power dams in navigable waters. This came about through President Roosevelt's declaration that he would sign no special water-power bills that did not provide specifically for the right of the Government to fix a charge, and for a definite limitation in time of the rights conferred.

This action forced Congress to consider general legislation covering the whole subject. But the two Houses have never been able to get together, and important water-power development has thus been greatly hampered.

The Shields bill recognizes two sorts of dams—those built by the Government to improve navigation, like the High Dam below Minneapolis, and those built by State-chartered corporations. As to the first sort, the bill provides that the Government may lease the power incidentally generated, preference being given to municipal or other public corporations. Complete control over all other dams is given to the individual States, subject only to the Government's superior right to protect navigation. In case of the transmission of hydroelectric power over State boundaries the Interstate Commerce Commission has control of rates.

The only legal authority the Government has over water powers—except where it owns the land and riparian rights and builds the dam itself—springs from its constitutional right to regulate navigation. The ultraconservationists, led by Gifford Pinchot, have insisted that the Government take advantage of this right to assume complete control over all water-power improvements in navigable streams.

But the Senate—giving heed especially to the legal and practical arguments of Senator KNUTE NELSON, who has made exhaustive studies of the whole complicated question—has voted to turn the regulation of rates, the fixing of franchises, and other supervision over to the individual States, to whom it rightfully belongs. Many of the States already have utility commissions ready for the task, and, once the question is settled the others will create similar bodies.

The Shields bill will settle only half of the water-power problem. It will help the older States of the East and South to push much-needed water-power development. Legislation must still be perfected to define the process by which development of powers in the public-land domain of the Western States may be made.

It will be noted that in the bill passed Senator NELSON has provided for the granting of authority to the Secretary of the Treasury to lease the power generated by Government dams, like the High Dam, preferably to public corporations. This provision, if it becomes law, will remove the last obstacle to the use of the High Dam power by the university and the Twin Cities. * * *

—

[From the Ione News, Ione, Wash., Mar. 17, 1916.]

The Colville Examiner says the passage of the Shields bill by Congress means "activity on the banks of streams where now fishermen and woodticks have sole possession" and reads into it an increased prosperity of the whole Columbia Basin. Everyone seems to realize something of the wide range of benefits to be derived from extensive power development on the Pend Oreille save poor old short-sighted Spokane, and there the hammer will be handy by until the Washington Water Power has been handed all the fat contracts it can fill for years to come and they consider it safe to let some one else in to take care of the lesser business. And, still, Spokane stands to win large stakes on the development of Z Canyon, though she can't see it; if she did there might be some aid offered by the city's press, its chamber of commerce, some of its clubs, and perhaps even its illustrious Senator, MILES POINDEXTER. Spokane never misses a chance to promote anything when there is a sure thing of getting ten dollars back for every one spent.

—

[From the Evening Wisconsin, Milwaukee, Wis., Apr. 24, 1916.]

Herman B. Walker, writing in the interest of the Water Power Development Association, calls attention to a serious misstatement which is in circulation with reference to the Shields bill, now before Congress. This is that the bill proposes to give away water-power sites in perpetuity, whereas, on the contrary, it provides that after the end of a term of 50 years the original grantee shall continue in possession until the United States, upon 2 years' notice, proceeds to take over the plant for its own use or for other disposition. Another criticism of the bill is that it proposes to make power grants without compensation to the Government. Mr. Walker submits that there is an excellent reason why water-power companies should not pay rental for grants or leases of water powers or power sites. The only reason for developing water powers is to generate cheap power. The cheaper this power the greater will be its development and use. Regulation of rates provided for by the Shields bill guarantees that these cheaper rates will reach and benefit the consumer. Even if there were no provision for regulation, it is a fact that no power user will buy water power if he can make power cheaper by steam, and every cent added to the cost of generating power, from whatever source, must be paid by the consumer. To charge the power companies rental or taxes for the use of water power or power sites means only to add an item of expense which regulating commissions will have to allow for in fixing rates to the consumer. Instead of there being no reason why power companies should not be charged for rentals, there really is no good reason why they should be charged for such use of public property.

—

[From the Spokesman-Review, Spokane, Wash., Apr. 23, 1916.]

RESENTS FIGHT ON SHIELDS BILL—EDITOR READING SEES INLAND EMPIRE PROSPERITY IF WATER POWER IS DEVELOPED—UNITED STATES IS FALLING BEHIND—EUROPE NOT SO HAMPERING ON CAPITAL—NATIONAL-DEFENSE MONEY NEEDED HERE.

To the EDITOR OF THE SPOKESMAN-REVIEW:

In a Spokane evening paper of April 7 there appears an editorial on the likelihood of the lower House of Congress defeating the Shields water-power bill, and the tone of the editorial is in justification of their action, if they should do so. Three reasons are offered in this editorial

why it would be quite as well for the inland empire were the Shields bill not passed, and I would like to enter against these a brief argument.

It is stated the bill is against the welfare of the public in that at the end of the 50-year least the Government will have to go through a difficult process to obtain title to the properties should they wish to take over the ownership of the power sites, as the bill provides. Is it proper that ownership to an enterprise built up by private investment of at least $10,000,000 should come through any other process than one which would assure justice and equity to the property holders as well as the public? And as the Government would be called upon to determine the value of an exceedingly small number of such power sites, scattered over an indefinite range of years, could it ill afford to spend whatever time was necessary to determine such values with absolute certainty, though it required some time and care to do so? Consider how much time and expense is now being spent on making a valuation of the railroads. The effort on the part of the Government to secure a reversion of title to these plants will not begin to compare in tediousness and complexity with what investors are called upon to go through with to secure title to the bare sites under present conditions.

NOT ENOUGH RETURN TO UNCLE SAM.

The second assertion is that a sufficient compensation is not returned to the Government. By whom would this compensation be returned to the Government? By anyone but the consumer—the public for whom the Spokane paper asks protection? Will not rental fee be charged, together with cost of operation, upkeep, and so on, when the Government determines what the proper rate will be for the power concerns, which develop these power sites in the public domain, to place upon their electric current?

Must we disregard tax returns upon new millions invested, as well as tax returns on an extent of correllated developments about which we know nothing? Must we lay aside the consideration of increased income to wage earners now idle and the building up of regions now a barren waste?

EUROPE GOING AHEAD OF US.

The last statement is that development of these powers will come without new legislation. Not so, if past history is a criterion. In refutation let me repeat the statement which is made upon eminent authority that less than 140,000 horsepower has been developed during the last 10 years on navigable streams in the United States. During this 10-year period Europe made its greatest advancement in water-power development—the United States could not, because capital was not available for so precarious an investment as our laws had made water-power development. Europe developed in one year, on an average, nearly as much as we did in all 10 years.

The average size of power plants installed under the present revocable grant in the national forests was 6,000 horsepower. Is there any use to talk electrochemical or electrometallurgical processes and hitch them to 6,000-horsepower dam sites? Permits for a total of 1,500,000 horsepower were granted in the United States during that 10 years, but none of them were built. That doesn't look as though development would take place without new legislation.

The Secretary of War says this country needs facilities for producing nitric acid more than any other single need, perhaps, as a matter of defense. Then why quibble about whether it will be easy or hard to secure a reversion of title to the Government in 50 years, so long as it will be possible to do so? Why not bring some of the national-defense money to the inland empire, since it is the cheapest place the Government can spend it for manufacturing ammunition? What is the reason our inland empire press is so active against the biggest hope we have, the Pend Oreille Valley?

ARNOLD READING,
Editor Ione News.

IONE, WASH., *April 11.*

—

[From the Spokesman-Review, Spokane, Wash., Mar. 3, 1916.]

ALLEN FAVORS SHIELDS BILL—IONE CITIZEN WANTS WATER POWER DEVELOPED SPEEDILY.

To the EDITOR OF THE SPOKESMAN-REVIEW:

It seems to me the inland empire is strangely silent over the water-power-development controversy being fought out in Congress.

This district, perhaps more than any other in the United States, is rich in water-power possibilities, large and small, directly affected by the proposed legislation. It is stated by people who think they know that two great powers—Priest Rapids and Z Canyon—are slated for immediate development in case of favorable legislation. This would mean immediate expenditure of many millions and would create business opportunities this district has been sighing for for many a day.

Most of us have taken blindly the opinion of Mr. Pinchot that the Shields bill is "iniquitous" and that the rights of the public are forever lost if that bill goes through.

I have carefully read and studied the Shields bill, and it seems to me to provide in very simple language for the taking over of the power plants at the end of 50 years at a reasonable price, if the Government shall at that time think it advisable to do so, and a very important point is that the Government is in no sense obliged to do so unless conditions shall then make it seem wise to do so.

In regard to the rental power companies should pay for using the water, it seems to me that if they are obliged to pay a rental of, say, $1 per year per horsepower that that would be fair, and enrich the Public Treasury considerably. But, on the other hand, they will simply add that dollar in their bill to the manufacturer who buys the power from them. The manufacturer will add that dollar and another two or three to the price of his goods. And the "ultimate consumer" will pay another indirect tax in just the same manner that we now do when we sweeten our coffee or smoke a cigar. So why does that point make any real difference to us?

Mr. Pinchot is probably a brilliant theorist, but he has never done this district any large amount of good by his beautiful theories, and if his opposition to the development of the water powers should mean the delay of even one year in development (especially now, when the time seems to have come when the capital is ready to invest) he will have accomplished more waste, more harm and loss than any German submarine had done to date in that length of time.

RAYMOND ALLEN.

KENNEWICK BACKS SHIELDS MEASURE—COMMERCIAL CLUB SENDS MESSAGE TO SENATORS URGING SUPPORT OF POWER BILL—NEW PROJECTS ARRESTED—FINANCIERS SAY PRIVATE CAPITAL WILL NOT BE INVESTED UNTIL BILL BECOMES LAW.

KENNEWICK, WASH., *March 2.*

The commercial club in a special session last night passed a resolution favorable to the Shields navigable stream power measure now pending in the Senate, and sent telegrams to Senators POINDEXTER and JONES urging them to support the bill without amendments.

It was reported at the meeting that the bill would be passed upon within the next few days and that the securing of its passage was of the utmost importance to eastern Washington development.

The bill, unlike the Jones bill, deals alone with navigable streams; it provides for a tenure of permit of 50 years without power taxation, whereas the present laws only provide for 10 years, and places a tax on the power developed. It was brought out at the meeting by men interested in irrigation and power development that to secure the investment by private capitalists in the power projects of eastern Washington it was essential the bill be passed.

Local people are interested in securing the development of the power sites at Priest Rapids in the Columbia and Five Mile Rapids in the Snake.

[From the Manufacturer, Baltimore, Md., May 4, 1916.]

MR. PINCHOT'S WATER-POWER ACTIVITIES SIZED UP.

It is interesting to note that at least one leading paper in the South, the Montgomery Advertiser—possibly there may be a good many others—is able to size up Mr. Gifford Pinchot's so-called conservation work at about its full value. Nothing but the minus sign is able to express it. Mr. Pinchot has unfortunately been able to do this country an immense amount of harm, because in the day when he most flourished the country was obsessed with the idea that everything put out in the name of "reform" was the final word of goodness and perfection.

The country has of late been coming to its senses. Some of the fever of hysteria which produced more or less incapacity to think straight and to see straight has been losing its hold. The mob spirit has been dying out, fortunately for the welfare of the Nation, and as the mob spirit and the hysteria which prevailed pass away Mr. Pinchot and those of his ilk become objects of ridicule instead of being objects of worship, as they were for a while when, under the delusion which was sweeping over the country, newspapers and the public generally were ready to swallow all of the legislative decoctions prescribed by these doctors of know-it-all.

The Government very properly endeavors to lessen the evils of the patent-medicine business and of food adulteration by its pure-food act. The majority of reputable newspapers are more and more inclined to refuse patent-medicine advertisements on the ground that many of these medicines are a curse rather than a blessing to those who by broad advertising are fooled into swallowing them. It is a pity that the Government can not in some such way, not contrary to human rights, regulate the mental poison which is so vigorously ladled out to the country, and it is a pity that the newspapers who refuse to accept many patent-medicine advertisements are still willing to give their space free to the poison which emanates from the factories of misinformation, prejudice, and hatred, and which has been taken in such large doses by many of our people to the great injury of their minds and their souls and the twisting and distorting of their mental faculties and the permanent injury of the whole country.

We are glad to see that the Montgomery Advertiser fully understands the situation, and in a recent issue, under the heading of "Mr. Pinchot and our water power," touches up this would-be regulator of all human affairs as follows:

"We have received on some elegantly embossed stationery a neat letter from our regular correspondent, Mr. Gifford Pinchot. You remember, of course, the brothers Pinchot—Amos and Gifford?

"They are the brothers of means who had one rip-roaring time during the radical days of the Roosevelt administration. Gifford, the letter writer, was in the conservation department under the Roosevelt and later under the Taft administrations until he resigned himself out of the Taft administration. What a time the two brothers had in the mad, glad days of 1912! Nobody except the colonel made quite so much noise during the battling at Armageddon.

"Mr. Gifford Pinchot, in his correspondence with the Advertiser, reveals himself as the jealous guardian of the conscience of the country on the issue of conservation. In his last letter he tells us excitedly:

"'The iniquitous bill giving away the water power on our navigable streams, about which I wrote you on February 15, has been driven through the Senate, but it has not passed the House. There is still a good chance not only to stop this raid on public property but to pass a fair and honest water-power bill in its place.'

"Again the frightened watchman on the tower exclaims:

"'I am asking for your help once more to get the House to pass a good bill and then to stand by it, no matter what the conference may do. If the House stands firm, the people will win this fight; but the House needs to know that the people are behind it.'

"In order that Mr. Pinchot may have no illusions as to the stand of the Advertiser and the people of this section on the Shields bill, we will inform him that if there was any doubt as to how the Congressman of this district stood upon the measure, the editor of the Advertiser would sit down and write him the strongest letter he could compose, urging him, the Congressman, to use every means he honorably could to secure the Shields bill's passage, so that we could free and develop our paralyzed resources.

"Representing the sentiment of his district, the second district Congressman is friendly to the Shields bill. In fact, every Member of Congress from this State and the two United States Senators are staunch supporters of the measure which promises to open to development at last our great water-power resources.

"Mr. Pinchot's propaganda falls upon stony ground in Montgomery and in this section. We have not forgotten that Mr. Pinchot's views prevailed when President Taft was induced to veto the bill for the development of Lock 18 on the Coosa River. The ideas of Mr. Pinchot and his group of theorists so influenced the administration that the President blocked the plans already under way for the building of that dam a few miles above Wetumpka.

"By that veto Montgomery lost cheap electrical power for every purpose; a possible manufacturing development was halted. What is

more, and what is clear and definite, Montgomery lost the nitrate plant for the building of which arrangements had already been made. The option on the land for the site of this building had been secured, and the structure itself was being planned.

"It is difficult to conceive of any enterprise which would have meant more in material and commercial terms than this nitrate factory. It would have been established in the center of one of the great agricultural sections of the country, and farming would have been greatly accelerated. The unforseen war came on. If we had had a nitrate plant in this city it would probably have been quadrupled to meet the increased demand for nitric acid for the making of explosives.

"The bill was vetoed. The promised capital was frightened out of Alabama. The nitrate plant was built in Canada, which country does not seem to be infested with well-intended but harmful agitators. Canada has a plant employing hundreds, perhaps thousands, of men, the output of which is bringing money from all sections of the world; and Montgomery is left with a bad taste in her mouth.

"Mr. Pinchot can employ his energy to better purposes elsewhere. We have had an object lesson here. What we want throughout Alabama is the development of our vast water-power resources. We would have the Government do it if the Government were willing. But if the Government can not and will not develop it, then we want the Government to give the chance to men who are willing and able to do it.

"The Creek Indians inaugurated our present policy toward water-power development. They used the rapids for fishing and hunting; and for unnumbered years the Coosa has tumbled over its rocky bottoms, useless to mankind. Mr. Pinchot may favor a continuance of the policy of the Creek Indians; we do not."

—

[From the Oregonian, Portland, Oreg., Apr. 28, 1916.]

PINCHOT BLOCKS THE TRACK.

Gifford Pinchot continues his propaganda in favor of legislation which will hasten Federal control of water power and which will exact a rental that must surely be paid by the consumer. He sends to newspapers all over the United States letters denouncing the Shields bill and all other bills which do not coincide with his views and grossly misrepresenting their provisions.

In a letter received recently by an Oregon newspaper he says of the Shields bill:

"This bill turns over to the power interests water power equivalent to twice the mechanical power of every kind now used in the United States, or enough to meet the needs of 200,000,000 people. This it does in perpetuity, although pretending to limit the grant to 50 years."

It does no such thing. It authorizes the Secretary of War to grant permits for 50 years, to continue beyond that period only until he grants a new permit to a new lessee or until the Government takes over the plant. If water power is to be developed, to whom should it be turned over but to the water-power interests? The bill provides for strict regulation of rules and service by the States, in which that authority is vested by the Constitution. The water-power interests will be unable to use their privilege to the public injury if the people elect competent and faithful public servants.

Mr. Pinchot commends the House substitute to the Shields bill as making no perpetual grant, but he says:

"Nevertheless, it is not yet a good bill. For example, it gives away the public water powers without compensation. There is no reason why the water-power corporations should not pay for what they get. The rest of us do."

The House bill does not give away the public water powers without compensation, nor does the Shields bill. Both bills intrust the water powers to lessees for development for the public interest under restrictions which would prevent the companies from including in their charges to the public any allowance for the use of that which costs them nothing. If the power interests are compelled to pay compensation, the amount they pay will be added to the rates which they charge to the public. The States would sanction that addition; if they did not, the power companies would be unable to obtain capital and the water power would remain undeveloped. By insisting on a charge for water-power leases, Mr. Pinchot proposes to place a burden on the public, not on the power companies. The only effect on the latter would be to limit the possibility of their developing power by enhancing the cost of production and consequently the rates paid by the consumer and the available market.

Any charge for the water rights should be made by the States, not by the Federal Government. The jurisdiction of the United States is limited to the safeguarding of navigation; subject to that limitation, the jurisdiction of the States is indisputable, having been upheld by the United States Supreme Court for a century.

The only true statement in Mr. Pinchot's letter is this:

"What the people need is water-power development on equitable terms without further delay."

It is preceded, however, by the false statement that "in the last eight years the water-power interests have killed eight water-power development bills that were fair both to the corporations and to the public." Those bills were unfair to the corporations, the public, and the States. They imposed impossible terms on investors and burdensome charges on the public; they usurped the sovereignty and confiscated the property of the States. The delay has been caused by the insistence on these conditions by the Pinchot fanatics. If Congress will push Mr. Pinchot off the track, the water-power train can go ahead. He is the obstructionist.

—

[From the Oregonian, Thursday, May 4, 1916.]

TURNING AGAINST PINCHOT.

Proof accumulates that the sober common sense of the people is turning away from the extremes of restriction and Federal control which characterize the Pinchot conservation policy. The first striking proof is the passage by the Senate of the Shields bill for development of water power on navigable streams. The latest is the indorsement of that bill by the majority of a committee of the water-power congress, in face of determined opposition from Mr. Pinchot and his adherents.

The turn of the tide against Mr. Pinchot can safely be ascribed to his fanatical insistence on certain legislation and to his absurd denunciation of all opposition as arising from certain selfish private interests. The Shields bill is the best example of Mr. Pinchot's incapacity to find merit in any measure which does not square with his views or to find virtue in any man who does not entertain those views. That bill is not the bill of either party to the conservation controversy, nor even of the Senator whose named it bears. It was practically drafted by the Senate itself and is the work of reasonable men, whose leanings varied, but who were united in the desire to facilitate development and at the same time to protect the public interest.

This is apparent from a study of the vote on its final passage. It was supported by 27 Democrats and 19 Republicans and was opposed by 14 Democrats and 8 Republicans. There was no partisanship in that vote, and there was no sharp alignment for and against it of men who have opposed and favored the policy hitherto advocated by the conservation congress. There were in the majority 17 Democrats from the South who were doubtless prompted to support the bill by its careful regard for the rights of the States, but it commended itself both to Senator SHAFROTH, of Colorado, one of the stanchest western champions of those rights, and to Senators WALSH and MYERS, of Montana, who have upheld Federal control. Senator CLAPP, who has upheld the Pinchot cult, appears among the Republicans of the majority side by side with Senators JONES and SMOOT, who have rejected that cult. The minority against the bill includes such out-and-out Federalists as Senators CHAMBERLAIN and LANE among the Democrats and Senators GRONNA, CUMMINS, KENYON, LA FOLLETTE, and NORRIS among the Republicans, but it also includes Senators BORAH and WORKS, who have been the severest critics of the Pinchot idea. The fair inference is that the bill does not please extremists of either camp, but satisfies the moderate, reasonable men of both.

The unfounded character of Mr. Pinchot's attacks on the bill is shown in an open letter which the Water Power Development Association has addressed to President Wilson urging him to use his influence in its favor. That association is composed of manufacturers of machinery and other material used by power companies, and is interested in settlement of the question through the injury done to the business of its members by suspension of development. It pronounces "wholly untrue" Mr. Pinchot's statement that the Shields bill "gives the use of enormously valuable public property to the water-power interests without compensation." It admits that no Government tax for revenue purposes is imposed, but it shows that upon demand of the Secretary of War a grantee under the bill is required without expense to the United States to construct "a lock or locks, booms, sluices, or other structures for navigation purposes, in accordance with plans, specifications, and conditions approved by the Secretary of War and made a part of such permit."

In case navigation facilities are not made a part of the original construction, whenever the United States deems them necessary the grantee must deed the necessary land free of cost and give free right of way and free power for operation and also must pay reasonable charges for the benefits accruing from headwater improvements constructed by the Government. In the case of one plant already constructed under existing law the holder deeded to the Government a canal and lock which had cost $2,000,000. That is very material compensation.

It was charged by Mr. Pinchot that the bill made it "practically impossible for the people to take their own water powers back into their hands." The bill limits permits to 50 years, and provides that at any time after that period the Government may recapture the plant upon giving two years' notice, either for its own use or for a new grantee. That provision is almost identical with the one in the Ferris bill, which Mr. Pinchot indorses.

The statement that the bill "interposes every possible legal delay between the violation of a Government permit and the chance of effective enforcement" is met by citing the provisions imposing a fine of $1,000 for every violation of the law, of the conditions of a permit, or of a War Department regulation, giving United States district courts summary jurisdiction in such cases and authorizing revocation of permits in case of persistent violation.

Mr. Pinchot must have been blind when he said the bill "fails to require the necessary publicity and uniformity of accounts, and so makes the effective supervision of water-power corporations impossible." Section 7 authorizes the Secretary of War "to provide rules and regulations for uniform accounting, to examine all books and accounts, to require them to submit statements, representations, or reports, annual or special, including full information" as to every detail of their business.

The bill does not, as Mr. Pinchot says, give "to the water-power interests the right to condemn or take any land they choose," for the Secretary of War must first be satisfied regarding the qualifications of the grantee and the appropriateness of the project.

Against the bill it is also alleged that it "forces the people, when they take back the public property whose use they have granted, to pay the unearned increment on land condemned or otherwise acquired by the grantee." The bill clearly provides that "no value shall be claimed by or allowed to the grantee for the rights hereunder granted," which are the public property in question. For other property, which includes not only land condemned or otherwise acquired but all improvements made thereon the bill requires the Government to pay "the fair value." Even the single-tax theory, of which Mr. Pinchot is a devotee, would not deny fair value for the improvements. The only unearned increment remaining in question would be that attached to land acquired by purchase or gift from private parties. To appropriate to the community this part of a power company's property without applying the same principle to all other property would be manifestly unjust, especially as the increased value would be the direct result of the company's improvements.

In approving the Shields bill the majority of the Conservation Congress committee has approved a measure which conforms to the sound principle of conservation with use. In opposing that bill, Mr. Pinchot has shown himself possessed of the egotistical fixed idea that his way is the only right way. That marks him as a fanatic who is unworthy of attention.

—

NATIONAL CONSERVATION CONGRESS,
Washington, May 4, 1916.

The report of the water power nitrophosphate committee made to this convention upon the subject of water-power development adopted by a vote of 116 to 39, contains a statement in these words:

"We have full faith in the sovereign power of the Government, and believe that orderly conduct in water-power matters can be served by precisely the same methods as have so long proved effectual in the orderly conduct of the ordinary police matters. There are those who would impose upon the development of water power advance penalties for the presumptive doing of wrong. They consist of limitations in operation, in market and in property title. They promise confiscation of property, unrestrained taxation, and speculative securities. In the sovereign control of water power as in the sovereign control of everything else, the guilty should be punished and the innocent should be encouraged, but the progress will be made by assuming at the outset that the innocent will soon become the guilty, and therefore all should be placed under restrictions that make success impossible.

"Summing up the whole matter and having due regard for the present vital needs for power development as related to national defense, the cost of food, and our comfort and convenience in all departments of life, we believe that our duty will not be completed unless we make definite and concrete recommendations as to the future. This course does not necessarily involve participation in political issues or any unwarranted interference with legislative procedure. There are before Congress two water-power bills which comprise the best thought of the day and represent a reasonable common ground upon which all may safely stand for the present at least.

"In view of the acute necessities of the present, we urge such action by the Congress of the United States as will result in immediate water-power development, and inasmuch as H. R. 408, as reported by Mr. MYERS, chairman of the Committee on Public Lands of the United States Senate, with amendments, on March 14, 1916, rendering available water powers on public lands, and S. 3331, as passed by the United States Senate on March 8, 1916 (commonly knowns as the "Shields" bill), relating to navigable streams, contain provisions adequately safeguarding the interests of the public and the rights of investors, we hereby indorse both of these measures in principle and express the hope that they may be speedily enacted into law."

BY THREE-TO-ONE VOTE SHIELDS BILL RECEIVES INDORSEMENT OF CONSERVATION CONGESS.

WASHINGTON, D. C., *May 4.*

By indorsing the measure on a test vote, which resulted in a 116 to 39 victory, the Shields water-development bill, which recently passed the Senate by more than a two-to-one vote, now bears the official approval of the National Conservation Congress. Gifford Pinchot, who at the last congress three years ago, defeated a proposal somewhat similar, vainly fought this action. Charges that the convention was packed by the power interests were made and denied. The vote, 116 to 39, came after the divided committee report had been debated. The minority report opposed indorsement of any legislation and demanded a declaration of principles, holding that power sites shall be retained by the Government and that all water-power development shall be under public control.

The Pinchot delegates charged that the congress had been called to create sentiment favorable to the Shields and Myers bills, and that it did not represent the true conservation sentiment of the country. Mr. Pinchot declared special interests were trying to mold the congress into a lobby for water-power legislation. "This shows to what lengths the interests are prepared to go to further legislation to serve their own particular interests."

Mr. Pinchot's argument was badly shattered when it was demonstrated on a rising vote that of the 116 delegates who voted to indorse the Shields water-power bill 32 only were either directly or indirectly interested in the development of water power. This effectually set at rest the accusation that the water-power interests had "packed" the convention.

—

[From the Post, Washington, D. C., May 5, 1916.]

THE WATER-POWER CONTROVERSY.

Why is it whenever the ideas of the restrictionists in the school of conservation are rejected at a conservation convention the cry is invariably raised that the majority was subservient to the "water-power monopoly"? At the present convention of the National Conservation Congress a committee assigned to draw up resolutions returned a majority report approving of the Shields and Myers bills for the development of water power. The Shields bill was passed in the Senate by a majority of more than two to one. It is hardly conceivable that so large a majority of the United States Senate could have come under the influence of the so-called "water-power monopoly."

Yet the approval of the Senate bill by the committee of the National Conservation Congress was immediately denounced by Mr. Pinchot and Mr. Garfield as a surrender to "the interests." The vote of the convention itself indorsing the Senate bills was 116 to 39. A list prepared to show the number of men in the convention identified with various power interests certainly does not account for any considerable portion of the 116 degelates who voted in favor of the Senate bills and against the restrictionists' ideas of conservation.

There is no charge that the delegates who voted against Mr. Pinchot were elected or appointed in a manner different from the procedure in the case of the delegates who supported Mr. Pinchot. The organization formed by Mr Pinchot many years ago should not be abandoned, as the former Chief Forester says it ought to be, merely because real conservationists are now taking part in its deliberations.

The water-power interests deserve no special consideration. When various interests advocate the expenditure of millions of dollars of the Government's money for a nitrate factory, to be run by private interests, short shrift should be given to them. But the followers of Mr. Pinchot should not cry "wolf" every time their ideas are rejected in a convention presumably made up by honest men divided merely by differences of opinion as to the best way to serve the public.

CALIFORNIA & OREGON RAILROAD LAND GRANTS.

Mr. CHAMBERLAIN submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill H. R. 14864, entitled "An act to alter and amend an act entitled 'An act granting lands to aid in the construction of a railroad and telegraph line from the Central Pacific Railroad, in California, to Portland, in Oregon,' approved July 25, 1866, as amended by the acts of 1868 and 1869, and to alter and amend an act entitled 'An act granting lands to aid in the construction of a railroad and telegraph line from Portland to Astoria and McMinnville, in the State of Oregon,' approved May 4, 1870, and for other purposes," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1 and 6.

That the House recede from its disagreement to the amendments of the Senate numbered 4, 5, and 10, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: Omit the matter inserted by said amendment, and on page 9 of the bill, in line 11, after the word "residing," insert the following: "whether such lands shall be of class 2 or class 3 and"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"The timber on lands of class 2 shall be sold for cash by the Secretary of the Interior, in cooperation with the Secretary of Agriculture, or otherwise, to citizens of the United States, associations of such citizens, and corporations organized under the laws of the United States, or any State, Territory, or District thereof, at such times, in such quantities, and under such plan of public competitive bidding as in the judgment of the Secretary of the Interior may produce the best results: *Provided*, That said Secretary shall have the right to reject any bid where he has reason to believe that the price offered is inadequate, and may reoffer the timber until a satisfactory bid is received: *Provided further*, That upon application of a qualified purchaser that any legal subdivision shall be separately offered for sale such subdivision shall be separately offered before being included in any offer of a larger unit, if such application be filed within 90 days prior to such offer: *And provided further*, That said timber shall be sold as rapidly as reasonable prices can be secured therefor in a normal market.

"The Secretary of the Interior shall as soon as the purchase price is fully paid by any person purchasing under the provisions of this section issue to such purchaser a patent conveying the timber and expressly reserving the land to the United States. The timber thus purchased may be cut and removed by the purchaser, his heirs or assigns, within such period as may be fixed by the Secretary of the Interior, which period shall be designated in the patent; all rights under said patent shall cease and terminate at the expiration of said period: *Provided*, That in the event the timber is removed prior to the expiration of said period the Secretary of the Interior shall make due announcement thereof, whereupon all rights under the patent shall cease.

"No timber shall be removed until the issuance of patent therefor. All timber sold under this act shall be subject to the taxing power of the States apart from the land as soon as patents are issued as provided for herein."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment as follows: On page 9 of the bill, in lines 1 and 2, strike out the words "by the Secretary of the Interior"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment as follows: After the comma inserted at the beginning of said amendment, strike out the words "after which" and in lieu thereof insert the word "thereafter"; and, on page 14 of the bill, in line 5, omit the period after the words "United States"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "Twenty-five per cent of the remainder shall be paid to the State treasurer of the State in which the land is located, to be and become a part of the irreducible school fund of the State; 25 per cent shall be paid to the treasurer of the county for common schools, roads, highways, bridges, and port districts, to be apportioned by the county courts for the several purposes above named; 40 per cent shall be paid into, reserved, and appropriated as a part of the fund created by the act of Congress approved June 17, 1902, known as the reclamation act; 10 per cent shall become a part of the general fund in the Treasury of the United States; and of the balance remaining in said Oregon and California land-grant fund, from whatsoever source derived, 25 per cent shall be paid to the State treasurer of the State in which the land is located, to be and become a part of the irreducible school fund of the State; 25 per cent shall be paid to the treasurer of the county for common schools, roads, highways, bridges, and port districts, to be apportioned by the county courts for the several purposes above named; and the re-

mainder shall become a part of the general fund in the Treasury of the United States"; and the Senate agree to the same.

GEORGE E. CHAMBERLAIN,
C. S. THOMAS,
THOMAS STERLING,
Managers at the conference on the part of the Senate.

SCOTT FERRIS,
E. T. TAYLOR,
I. L. LENROOT,
Managers at the conference on the part of the House.

The report was agreed to.

SELECTION OF LIEU LANDS BY WYOMING.

Mr. WARREN. Mr. President, has morning business closed?

The PRESIDING OFFICER. It has not. The introduction of bills and joint resolutions is still in order. If there be none, concurrent and other resolutions are in order. If there be no concurrent or other resolutions, the morning business is closed.

Mr. WARREN. Mr. President, I have a short bill, which is entirely local in its nature, applying to the State of Wyoming, which I think will lead to no discussion. I ask unanimous consent for its present consideration. I refer to order of business 411, being Senate bill 4282.

The PRESIDING OFFICER. The Senator from Wyoming asks unanimous consent for the present consideration of a bill, which the Secretary will read by title.

The SECRETARY. A bill (S. 4282) to permit the State of Wyoming to relinquish to the United States lands heretofore selected, and to select other lands from the public domain in lieu thereof.

Mr. SIMMONS. Mr. President, if the bill does not lead to debate I shall not object.

Mr. WARREN. I do not expect the bill to lead to debate. It is a matter which the State of Wyoming desires and one which the Interior Department has approved and which the Committee on Public Lands has unanimously approved.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Wyoming?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Public Lands with amendments, in section 1, page 2, line 16, after the word "unappropriated," to insert "unreserved, nonmineral," and in line 21, after the word "held," to insert:

Provided, That the total area of lands so reconveyed and selected under the provisions of this act shall not exceed 100,000 acres, and that selections shall be restricted to lands not heretofore sold by the State: *And provided further*, That such selections shall be made within a period of three years from the date of the approval of this act.

So as to make the section read:

That upon the delivery to the Secretary of the Interior by the State of Wyoming of its properly executed and duly recorded deed or deeds conveying to the United States of America in fee simple any lands heretofore selected by and certified to said State in satisfaction of the grant by the United States of America to said State for the erecting of public buildings at the capital of said State; for university purposes in said State; for an agricultural college in said State; for the establishment, maintenance, and support in said State of the insane asylum in Uinta County; for the penal reform or educational institution in Carbon County; for the penitentiary in Albany County; for the fish hatchery in Albany County; for the deaf, dumb, and blind asylum in Laramie County; for the poor farm in Fremont County; for the hospital for miners who shall become disabled or incapacitated to labor while working in the mines of the State; for public buildings at the capital of the State; for State charitable, educational, penal, and reformatory institutions, and indemnity school lands, under the provisions of an act entitled "An act to provide for the admission of the State of Wyoming into the Union, and for other purposes," approved July 10, 1890, the said State shall be authorized and permitted to select, from the unappropriated, unreserved, nonmineral public lands of the United States in said State, an equal number of acres so reconveyed by said State to the United States, in the same manner, for the same purposes, and subject to the same conditions and limitations under which the lands so reconveyed were selected and held: *Provided*, That the total area of lands so reconveyed and selected under the provisions of this act shall not exceed 100,000 acres, and that selections shall be restricted to lands not heretofore sold by the State: *And provided further*, That such selections shall be made within a period of three years from the date of the approval of this act.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

STATEMENT OF APPROPRIATIONS AND EXPENDITURES.

Mr. SIMMONS. Mr. President, I desire to submit certain tables and explanatory statements relating to appropriations and expenditures of the Government during the fiscal years 1907 to 1916, inclusive, which I ask may be printed without reading.

The PRESIDING OFFICER. Such will be the order, without objection.

The matter referred to is as follows:

Total of all appropriations, including estimated permanent annual, which includes sinking-fund requirements, and postal, payable from postal revenues.

Year.	Amount.	Increase.	Decrease.
1907	$881,953,644		
1908	919,163,823	$37,210,179	
1909	1,006,431,727	87,267,904	
1910	1,044,433,623	38,001,896	
1911	1,039,550,017		$4,883,006
1912	1,022,759,949		16,790,668
1913	1,021,349,991		1,409,958
1914	1,098,602,066	77,252,075	
1915	1,122,471,919	23,869,253	
1916	1,114,490,704		7,981,215

Increases in appropriations.

FIVE YEARS UNDER REPUBLICAN PRESIDENT, SENATE, AND HOUSE.

Period.	Increase amount.	Percentage.
1907 to 1912	$140,806,305	16
Average annual	28,161,261	3.2

TWO YEARS UNDER REPUBLICAN PRESIDENT AND SENATE AND DEMOCRATIC HOUSE.

1912 to 1914	$75,842,117	7.4
Average annual	37,921,058	3.7

TWO YEARS DEMOCRATIC PRESIDENT, SENATE, AND HOUSE.

1914 to 1916	$17,888,638	1.4
Average annual	7,944,319	.7

NOTE.—It must be noted that the appropriations made for the fiscal year 1914 were based upon estimates prepared and submitted to the Congress by Secretary of the Treasury MacVeagh. The estimates were the largest submitted for over 45 years, amounting to $823,410,000, exclusive of the postal appropriations. The appropriations based upon these estimates were made by the Taft administration and prior to March 4, 1913, the date of the inauguration of the present administration. The total appropriations for 1914, exclusive of postal, amounted to $812,283,000—being $11,200,000 less than the estimates, but was the largest appropriated for any one year in over 45 years. The present administration did not disburse $86,100,000 of the appropriations of $812,283,000 for 1914.

In the above table the postal appropriations, payable from postal receipts are included. This is hardly fair. The receipts from postal revenues are increasing rapidly, on account of the extension of the regular Postal Service and of the Parcel Post Service. This appropriation simply covers these receipts and they are not included in the net ordinary receipts of the Government.

TOTAL, EXCLUSIVE OF POSTAL.

The following table shows the total appropriations of the Government, not including postal, nor the sinking-fund requirement.

Year.	Amount.	Increase.	Decrease.
1907	$632,510,567		
1908	648,625,764	$16,115,197	
1909	723,710,542	75,084,778	
1910	748,287,759	24,577,217	
1911	733,725,390		$14,562,369
1912	703,125,486		30,599,904
1913	689,938,602		13,186,884
1914	751,597,940		
1915	744,977,032		6,620,908
1916	739,522,065		5,454,967

Annual increase.

Period.	Amount.	Percentage.
Republican—1907 to 1912	$70,614,919	11.2
Average yearly	14,122,984	2.2
Republican President and Senate, Democratic House—1912 to 1914	48,472,454	6.9
Average annual	24,238,227	3.4
	Decrease.	*Decrease.*
Democrats—1914 to 1916	12,075,875	1.6
Average yearly	6,037,938	.8

Summary of appropriations.

[Average annual increase in appropriations.]

Period.	Total appropriations.	Per cent.	Total, less postal and sinking-fund requirements.	Per cent.
Five years of Republican power in all branches of the Government, 1907 to 1912	$28,161,000	3.2	$14,122,000	2.2
Two years of Republican power and Democratic House, 1912 to 1914	37,921,000	3.7	24,236,000	3.4
Two years of Democratic power in all branches of the Government, 1914 to 1916	7,944,000	.7	*Decrease.* 6,038,000	*Decrease.* .8

That is, the total appropriations for the years 1907 to 1912, when the Government was under full control of the Republican Party, increased annually at the rate of $28,161,000, or 3.2 per cent.

For the years 1914 to 1916, when the Government was in the hands of the Democrats, the increase was at the rate of $7,944,000, or seven-tenths of 1 per cent per year.

Comparing the total appropriations, after deducting the postal, the changes were as follows:

Years 1907 to 1912, an annual increase of $14,123,000, or 2.2 per cent, and for the years 1914 to 1916, an annual decrease of $6,038,000, or eight-tenths of 1 per cent.

The annual increase in the population of the United States is a trifle less than 2 per cent, which is much greater than the average annual increase of all appropriations under the present administration, and smaller than that for the Republican years shown above. This proves by the appropriations that the present administration is more economical than were the two preceding ones.

Total ordinary disbursements of the United States, exclusive of all postal expenditures.

[Page 238, Financial Report, 1915.]

Year.	Disbursements.	Increase.	Decrease.
1900	$480,483,013		
1901	505,012,591	$24,529,578	
1902	468,788,705		$36,223,886
1903	503,320,103	34,531,398	
1904	525,735,290	22,415,187	
1905	548,294,837	22,559,547	
1906	536,732,131		11,562,706
1907	544,075,746	7,343,615	
1908	608,214,350	64,138,604	
1909	642,823,382	34,609,032	
1910	651,209,779	8,386,397	
1911	654,137,998	2,928,219	
1912	652,985,769		1,152,229
1913	681,743,337	28,757,568	
1914	700,763,167	18,511,153	
1915	724,763,167	24,508,677	
1916 (estimated)	725,000,000	236,833	

Annual increase.

Period.	Total.	Average annual.	Per cent average annual.
1907 to 1912	$108,910,023	$21,782,005	4.00
1912 to 1914	47,268,721	23,634,360	3.62
1914 to 1916	24,745,510	12,372,755	1.76

The increases in the net ordinary expenditures, exclusive of postal deficiencies, are as follows:

Period.	Amount.	Percentage.
1915 over 1912	$71,777,000	11
1915 over 1913	43,020,000	6.3

Compare these increases with the following increases covering similar periods:

Period.	Amount.	Percentage.
1909 over 1906	$106,091,000	19.8
1909 over 1907	98,747,000	18.1
1910 over 1907	107,135,000	19.7
1910 over 1908	42,996,000	7

The above increases in ordinary disbursements at normal times show greater increases than those under the present administration under extraordinary and war-time expenditures.

If to the total ordinary disbursements be added the other disbursements of the Government, except those for the Postal Service payable from postal receipts, we have as follows:

DISBURSEMENTS.

Net ordinary disbursements, together with payments on account of the Panama Canal and the public debt, which includes the excess of redemption of the national-bank-note fund, we have as the total disbursements, less the postal, above referred to, but including postal deficiencies:

Fiscal year.	Disbursements.	Increase of 1915.	Percentage.
1915	$760,634,000		
1913	727,233,000	$33,401,000	4.6
1912	698,451,000	62,183,000	8.9

Compare former similar disbursements and their increases: 1909 over 1906, $175,842,000, or 21.8 per cent; 1909 over 1907, $131,743,000, or 31.5 per cent.

The total disbursements, including all for the Postal Service, were as follows:

Fiscal year.	Disbursements.	Increase of 1891.	Percentage.
1891	$532,708,747		
1889	476,753,378	$55,955,369	11.7
1888	395,482,191	137,226,556	34.7

From 1888 to 1891 the increase in disbursements was more than one-third of the total disbursements for the year 1888. Take a more recent period:

Fiscal year.	Disbursements.	Increase.	Percentage.
		1909.	
1909	$956,678,801		
1907	793,086,892	$163,591,909	20.6
1906	738,379,773	218,299,028	29.6
		1908.	
1908	885,031,733		
1906	738,379,773	146,651,960	19.8
1905	724,010,170	161,021,563	22.2

TOTAL DISBURSEMENTS.

Compare these former increases in disbursements—

	Per cent.
1891 over 1888	34.7
1891 over 1889	11.7
1906 over 1905	22.2
1908 over 1906	19.8
1909 over 1906	29.6
1909 over 1907	20.6

with the following increases:

1915 over 1912	10.9
1915 over 1913	5.9

That is, taking the two periods, the increases from 1889 to 1891, from 1906 to 1908, and from 1907 to 1909, and comparing them with the increase from 1913 to 1915, we find the rate of increase for the last period only about one-third of the average for the other three periods; that is, 5.9 per cent, as compared with the average of 17.4 per cent.

For the three-year periods the comparison is as 10.9 per cent to an average of 28.8 per cent. On which side is the extravagance?

The following shows the postal disbursements and their increases:

Fiscal year.	Total disbursements.
1888	$55,751,214
1889	60,044,531
1891	[1] 70,673,558
1905	167,[illegible]91,842
1906	180,[illegible]95,077
1907	191,214,388
1908	[2] 204,366,704
1909	[3] 223,063,445
1912	248,312,211
1913	263,136,244
1915	[4] 293,884,758

[1] Increase over 1888, $14,922,344, or 26.7 per cent.
[2] Increase over 1905, $36,464,862, or 21.8 per cent.
[3] Increase over 1906, $42,457,368, or 23.5 per cent.
[4] Increase over 1912, $45,572,547, or 18.3 per cent.

That is, in spite of the enormous increase in the work performed by the Postal Service on account of the parcel post, etc., the rate of increase has fallen, as shown above.

Principal increases in United States expenditures—Increase fiscal year 1915 over 1913 and 1912.

[Disbursements for total civil establishment.]

Year.	Disbursements.	Increase over.
1912	$173,824,989	$33,345,000
1913	170,829,673	36,340,000
1915	207,169,824	

Increase in total civil establishment:

	1915 over 1913.	1915 over 1912.
Amount	$36,340,000	$33,345,000
Per cent	21¼	19½

Made up as follows:

Executive proper:		
Relief of American citizens in war zone	$2,499,000	$2,499,000
Department of State:		
Representing interest foreign governments	271,000	271,000
Payments to Panama	250,000	250,000
Treasury Department:		
Customs debentures and drawbacks	2,978,000	2,950,000
Internal revenue, expense of collection	1,080,000	1,195,000
Refunds and reliefs	1,429,000	1,709,000
War-risk insurance	726,000	726,000
Salaries, etc., under new Federal reserve law and preparing and issuing notes	637,000	637,000
Maintenance of public buildings	617,000	617,000
Panama-Pacific Exposition	357,000	357,000
Public Health Service, including epidemic diseases	538,000	691,000
Interior Department:		
Construction Alaskan Railway	573,000	573,000
Enlarging Capitol Grounds		1,110,000
Reclamation fund	5,483,000	3,110,000
Post Office Department:		
Deficiencies in postal receipts paid from the Treasury	5,609,000	5,068,000
Department of Agriculture:		
Salaries and miscellaneous	1,656,000	1,192,000
Foot-and-mouth disease	3,416,000	3,416,000
Plant Industry expenses	1,114,000	1,348,000
Forest Service	733,000	1,009,000
Hog-cholera investigation	343,000	343,000
Land for protection of watersheds, etc	241,000	1,026,000
Independent bureaus and offices:		
Interstate Commerce Commission	2,146,000	2,402,000
Salaries, etc., Federal Reserve Board	296,000	296,000
Commissions	381,000	560,000
District of Columbia	379,000	261,000
Total above	33,792,000	33,518,000

From the above it is evident that the principal increases of expenditures were as follows:

Executive proper: About two and a half million dollars for the relief of American citizens in the war zone.

Department of State: Something over one-half a million dollars for representing the interests of foreign Governments in belligerent countries, and a payment to the Government of Panama, under the treaty made with that country under a Republican administration.

Treasury Department: About $3,000,000 paid back as debentures or drawbacks under the administration of the customs. The drawbacks cover almost this entire increase, and these are the refunds of duty paid on foreign merchandise used in manufacturing goods that are then exported. This increase simply shows an increase in our manufacturing and exporting business. Something over two and a half millions of dollars increase in the internal-revenue expenses, etc. About one and one-eighth millions of this was caused by the increased business of the bureau, as shown below:

Total collections—Fiscal years.

	Amount.	Increase over 1912.
1912	$321,615,895	
1913	344,424,454	$22,808,559
1915	415,681,024	94,065,129

That is, the increased cost was about 1¼ cents for each additional dollar collected:

The remaining one and a half millions, approximately, were in refunds and reliefs, governed by the laws and not by the administration.

Something over a half million dollars was the increase in expenses of the Public Health Service, used in fighting epidemic diseases and in successfully coping with the hookworm, pelagra, etc.

Nearly three-fourths of a million dollars increase by way of expenses and losses of the War Risk Bureau. Their receipts from premiums amounted, for the same period, to over one and three-fourths million dollars.

About three-fourths of a million dollars as salaries, etc., under the Federal reserve bank act and the expense of preparing and issuing the bank notes authorized by that act.

Something over one-third of a million dollars for the Panama-Pacific Exposition and nearly two-thirds of a million dollars for the maintenance of public buildings to which this administration fell heir. The following shows the number of public buildings completed and occupied June 30:

1912	779
1915	967

An increase, 1912 to 1915, of 24 per cent in the number of public buildings and only about 10 per cent in the cost of maintenance.

INTERIOR DEPARTMENT.

About one-half a million dollars was expended in building a railway in Alaska and an increase of about five and a half millions over 1913 and three and one-eighth millions over 1912 on account of the reclamation fund. This reclamation work was started by a former administration, and these expenditures were necessary.

POST OFFICE DEPARTMENT.

Something over $5,000,000 increase was paid out of the Treasury to meet deficiencies in the Postal Service. This increase was caused by the extension of this service proper, and also of the parcels-post system, which is proving so beneficial to the people of the country. In previous years this expenditure has been as follows:

1905	$15,065,000
1906	12,673,000
1907	7,629,000
1908	12,888,000
1909	19,501,000
1910	8,496,000
1915	6,637,000

DEPARTMENT OF AGRICULTURE.

Something over $3,000,000 was expended in stamping out the foot-and-mouth disease, which threatened to ruin our dairy and cattle industry.

Something over one-third of a million dollars was spent in seeking ways of successfully fighting hog cholera and kindred diseases.

Something over three and a half millions increase has been expended in salaries and expenses for the department proper, the Bureau of Plant Industry, and the Forest Service. The farmers insist upon this valuable work being done.

About one-fourth of a million increase over 1913 and about one million increase over 1912 has been expended in the acquisition of land for the protection of watersheds and navigable streams—something that should have been attended to heretofore, when land was cheaper.

INDIVIDUAL BUREAUS AND OFFICES.

About two and one-fourth million dollars increase has been expended upon the Interstate Commerce Commission, necessitated by the enlargement of the scope of its duties.

Nearly one-third of a million dollars increase has been expended in salaries, etc., of the Federal Reserve Board.

Nearly one-half a million increase has been expended in paying the expenses of the various commissions now in being, such as the Industrial Relations Commission, etc.

DISTRICT OF COLUMBIA.

About one-third of a million dollars increase in the expenses of the District of Columbia.

These increases foot up from thirty-three and one-half to about thirty-four millions of the total increase under this head, of about thirty-three to thirty-six million dollars.

Other ordinary expenditures:

	Total expenditures.	Increase 1915 over—
1912	$480,728,975	$43,501,000
1913	511,941,033	12,288,000
1915	524,229,935	

TABLE I.—*Principal increases.*

	1913 over 1913.	1915 over 1912.
Increase in other ordinary disbursements	$12,289,000	$43,501,000
Per cent	2.4	9
Under War Department:		
Quartermaster Corps	$5,036,000	$5,833,000
Pay of Army		3,519,000
Subsistence of Army		1,527,000
Ordnance Department	616,000	1,093,000
Militia	5,086,000	4,310,000
National parks	585,000	585,000
Expenses of interned Mexicans	350,000	350,000
Rivers and harbors	5,371,000	11,280,000
Under Navy Department:		
Increase in Navy	9,927,000	9,560,000
Bureau of Construction and Repair	2,133,000	1,329,000
Bureau of Steam Engineering	3,221,000	1,688,000
Bureau of Supplies and Accounts	6,464,000	8,541,000
Pay of the Navy	4,550,000	5,169,000
Indian Service:		
Support of Indian schools	51,000	642,000
Miscellaneous expenses	1,182,000	640,000
Trust funds	860,000	257,000
Pensions		10,797,000
Total of above	43,432,000	67,126,000

The difference between these totals and those above is that there were many decreases in these disbursements; that is, while from 1913 to 1915 the gross increases shown above were over forty-three millions, the net increases were only a little over twelve millions.

An examination of the items above shows the largest increases were in the nature of an increased Navy, and for increasing over military and naval efficiency.

TABLE II.—*Principal decreases in ordinary disbursements other than for civil establishments.*

	1915 for 1913.	1915 for 1912
MILITARY ESTABLISHMENT.		
Military posts	$1,042,000	$1,424,000
National homes for disabled soldiers	688,000	729,000
NAVAL ESTABLISHMENT.		
Bureau of Yards and Docks	203,000	2,679,000
Bureau of Equipment	7,680,000	8,224,000
Bureau of Navigation	97,000	352,000
Bureau of Ordnance	4,695,000	2,778,000
General account of advisers	5,453,000	7,617,000
Pensions	10,697,000	
Total of above decrease	30,555,000	23,803,000
Total of above increase	43,432,000	67,126,000
Net increases above	12,877,000	43,323,000

This shows that the above principal increases and decreases account for nearly all the actual changes, 1915 from 1913 and 1912.

Mr. SIMMONS. Mr. President, I desire to make a brief statement explanatory of the tables which have been presented.

The first of these tables contains a statement of total appropriations, including Postal Service and sinking-fund requirements, covering the period I have named. All of these appropriations and the estimates therefor were made under Republican administrations except those for the fiscal years 1915 and 1916.

An examination of these appropriations will show that there has been a progressive increase in appropriations during this period.

An analysis of these tables will show that from 1907 to 1912, under a Republican President, Senate, and House, there was an average annual increase of $28,161,261, an increase of 3.2 per cent. It will show that from 1912 to 1914, under a Republican President and Senate and Democratic House, the annual average increase was $33,921,058, an increase of 3.7 per cent; and it will show that from 1914 to 1916, under a Democratic President, Senate, and House, the average annual increase was $7,944,319, an increase of only 0.7 per cent.

In passing, I call attention to the fact that while the money appropriated for the fiscal year 1914 was expended under the Wilson administration, the estimates therefor and the appropriations were made during the Taft administration. The amount actually expended in that year was $86,000,000 less than the amount appropriated.

The next table presented by me is a table of the total appropriations, not including the Postal Service and sinking-fund requirement for the same fiscal years embraced in the first table. An examination of this table will show that during the fiscal years from 1907 to 1912, under a Republican President, Senate, and House, the average annual increase was $14,122,984, the percentage of increase being 2.2 per cent. It will show that from 1912 to 1914, under a Republican President and Senate and a Democratic House, there was an average annual increase of $24,238,227, being an increase of 3.4 per cent. It will show that from 1914 to 1916, under a Democratic President, Senate, and House, instead of an increase there was an average annual decrease of $6,037,938, being a decrease of 0.8 per cent.

The annual increase in our population is less than 2 per cent, which is very much greater than the annual average increase of our appropriations under the present administration, and considerably smaller than that for the Republican years shown in these tables.

The next table I have presented embraces the total ordinary disbursements of the Government, exclusive of postal expenditures, from the years 1900 to 1916. This table will show that for the fiscal years from 1907 to 1912, when the Republicans had control of all branches of the Government there was an average annual increase in disbursements of $21,782,005, or an increase of 4 per cent. It will show that from 1912 to 1914, with a Republican President and Senate and a Democratic House, there was an average annual increase of $23,634,360, or an increase of 3.62 per cent. It will show that from 1914 to 1916, under a Democratic President, House, and Senate, there was an average annual increase of only $12,372,755, or an increase of 1.76 per cent.

One of the tables submitted contains a statement of the increases and decreases, respectively, in the expenditures for the fiscal year 1915 as compared with those of 1913 and 1912 and the net increase for the fiscal year 1915 over 1913 and 1912.

Mr. CURTIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from Kansas?

Mr. SIMMONS. I am through. I will yield the floor to the Senator from Kansas.

Mr. CURTIS. I desire to ask the Senator from North Carolina a question.

Mr. SIMMONS. Very well.

Mr. CURTIS. I wish to ask the Senator if he has included in his statement the $25,731,229 of urgent deficiency appropriations which have been made at this session of Congress to cover deficits in the appropriations made by the last session of Congress?

Mr. SIMMONS. To what $25,000,000 does the Senator refer?

Mr. CURTIS. I refer to the $25,000,000 appropriated in the four urgent deficiency bills which have been passed at this session of Congress.

Mr. SIMMONS. I think that that amount is included, but I would not say definitely because these tables——

Mr. CURTIS. Mr. President——

Mr. SIMMONS. Let me finish my statement. I will not say definitely about it, because I did not myself prepare these tables. They were prepared for me by one of the actuaries of the Treasury Department, and I assume that he has included in the tables all that it is proper to include in making the comparisons.

Mr. CURTIS. Mr. President, I desire to state that in the usual statements furnished by the department the deficiency appropriations are not included until the next year; and I think that if the Senator will examine his figures he will find that he is $25,000,000 short.

Mr. SIMMONS. I assume, Mr. President, that when the actuary of the Treasury is asked to make a financial statement, and he makes it, he includes in the statement all the items that are proper to be included in making the comparison.

ADDITIONAL CLERK TO COMMITTEE ON PUBLIC LANDS.

Mr. CLARK of Wyoming. Mr. President——

Mr. MYERS. Mr. President, I ask unanimous consent for the present consideration of Senate resolution 190, providing for temporary clerical help. I will say to the Senator from Wyoming [Mr. CLARK] that if he wishes to make any remarks in reply to the Senator from North Carolina at this juncture, I will yield to him.

Mr. CLARK of Wyoming. Oh, no.

Mr. MYERS. Then I ask immediate consideration for that measure

The PRESIDING OFFICER. The Senator from Montana asks unanimous consent for the present consideration of a resolution, which will be read by the Secretary.

The resolution (S. Res. 190) was read, as follows:

Resolved, That the Committee on Public Lands be authorized to employ an additional clerk, at a salary of $100 per month, for a period lasting until the end of the present session of the Sixty-fourth Congress, the same to be paid out of the contingent fund of the Senate.

Mr. SHAFROTH. Mr. President, the Committee to Audit and Control the Contingent Expenses of the Senate looked into that matter very thoroughly, and believe that the resolution ought to be agreed to.

The resolution was considered by unanimous consent and agreed to.

AMENDMENT TO THE RULES.

Mr. SMITH of Georgia. Mr. President, I desire to call the attention of the Senate to Senate resolution 195. As it has reference to the procedure of the Senate, and the report of the Committee on Rules upon a proposed amendment to the rules, I thought probably the Senate might be glad to consider it. I want to say that in bringing it to the attention of the Senate it will not be my purpose to press it if there is serious opposition.

There have been proposed amendments to the rules introduced a number of times looking toward some limitation of debate; and the Committee on Rules finally took up that subject, and worked over and presented this as a substitute for a number of those rules. We harmonized on this rule, and I believe it was the unanimous view of all present. There may have been a member of the Rules Committee not present; but it having met with such general favor in the Committee on Rules, I thought perhaps it might meet with the same general favor in the Senate.

I do not think this is a desirable time or a proper time to press such a matter over serious opposition. If we should take it up now for consideration, and serious opposition should develop, I would ask the Senate to lay it aside, because I would not try to pass a rule so important for the Senate if it developed serious opposition.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

Mr. LODGE. Mr. President, I do not know that I have any objection to the passage of the rule, but it seems to me that a change of this character in the rules ought to be considered with a full Senate present. The Senate is very thin to-day.

Mr. SMITH of Georgia. Even if we do not come to a vote to-day, does not the Senator from Massachusetts think it might be well for us to consider it for a while, in order that it may get in the minds of Members of the Senate, even if we eventually lay it aside? I do not think we can transact any business to-day to which there is serious opposition. I fear that a call for a quorum would break up the Senate. Quite a number of Senators are away. I thought we might consider it, and if any Senator wishes to lay it aside a little later, that would be done.

Mr. LODGE. I do not think I have any objection at all to the rule.

Mr. SMITH of Georgia. We will make some progress if we consider it.

Mr. JONES. Mr. President, I do not think a measure of this character ought to be brought up at this time, when we expect to adjourn at the close of this day, and without a quorum of the Senate present. A proposition involving cloture in the

Senate is certainly a very important one, and I do not think it ought to come up, and I shall have to object myself.

The PRESIDING OFFICER. Objection is made.

VOCATIONAL EDUCATION.

Mr. SMITH of Georgia. Mr. President, then I will not press that resolution over objection; but I ask unanimous consent to consider Senate bill 703. I do not think anybody will object to that. That is the vocational-education bill.

Mr. JONES. Mr. President, let us take up matters to which there is no objection. I have not any objection to that bill, but——

Mr. SMITH of Georgia. If the Senator interposes no objection to taking up this bill, I will lay it aside in order to yield to him later.

Mr. JONES. Why not let us pass a few little local matters and then take it up?

Mr. SMITH of Georgia. I am willing to yield for that purpose.

Mr. OVERMAN. Mr. President——

Mr. SMITH of Georgia. Just one moment. I think we can certainly discuss somewhat the vocational-education bill to-day and let the Senators present know just what is in the bill. I doubt whether any Senators will study it beyond those who are here. The Senator from Vermont [Mr. PAGE] and I can call attention to the details of the bill.

WYOMING NATIONAL FOREST.

Mr. CLARK of Wyoming. Mr. President, I ask unanimous consent for the present consideration of a purely local bill, Senate bill 5751.

The PRESIDING OFFICER. The Secretary will state the title of the bill.

The SECRETARY. A bill (S. 5751) authorizing the addition of certain lands to the Wyoming National Forest, Wyo.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which has been reported from the Committee on Agriculture and Forestry with an amendment, to strike out lines 9 to 12, inclusive, on page 1, in the following words:

Sixth principal meridian and base, State of Wyoming, township 25 north, range 116 west, sections 9 to 15, inclusive, and sections 22, 23, and 24

And to insert:

Sections 9 to 15, inclusive, and sections 22, 23, and 24, all in township 25 north, range 116 west, sixth principal meridian.

So as to make the bill read:

Be it enacted, etc., That any lands within the following-described areas found by the Secretary of Agriculture to be chiefly valuable for the production of timber or the protection of stream flow may be included within and made a part of the Wyoming National Forest by proclamation of the President, said lands to be thereafter subject to all laws affecting National Forests:

Sections 9 to 15, inclusive, and sections 22, 23, and 24, all in township 25 north, range 116 west, sixth principal meridian.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

PENSIONS AND INCREASE OF PENSIONS.

Mr. GALLINGER. Mr. President, on yesterday the Senate placed itself on record as being in favor of making Flag Day a holiday in the District of Columbia—a very gracious and patriotic thing. I now rise to ask that the pension bills on the calendar be considered by unanimous consent, so that before we part we may pay a little tribute to the men who defended the flag when it needed defense.

The PRESIDING OFFICER. Is there objection to the request of the Senator from New Hampshire?

Mr SMITH of Georgia. I did not hear it, Mr. President.

Mr. OVERMAN. I did not hear it, either.

The PRESIDING OFFICER. The Senator from New Hampshire requests that the pension bills on the calendar be considered.

Mr. OVERMAN. Will the Senator yield to me to get through a little resolution?

Mr. GALLINGER. Oh, certainly; I yield.

STATUE OF HON. ZEBULON BAIRD VANCE.

Mr. OVERMAN. I ask present consideration for the resolution which I send to the desk

The resolution (S. Res. 211) was read, considered by unanimous consent, and agreed to, as follows:

Resolved, That exercises appropriate to the reception and acceptance from the State of North Carolina of the statue of Zebulon Baird Vance, erected in Statuary Hall in the Capitol, be made the special order for Thursday, June 22, 1916, after the conclusion of the routine morning business.

Mr. OVERMAN. I send to the desk a notice, which I ask to have read.

The SECRETARY. The Senator from North Carolina [Mr. OVERMAN] gives notice that on Thursday, June 22, 1916, immediately upon the conclusion of the routine morning business, he will ask that the business of the Senate be suspended in order that there may be held appropriate exercises for the reception and acceptance from the State of North Carolina of the statue of Zebulon Baird Vance, erected in Statuary Hall in the Capitol.

PENSIONS AND INCREASE OF PENSIONS.

Mr. GALLINGER. Now, Mr. President, I will ask that my request be put.

Mr. SMITH of Georgia. Mr. President, I should like to know what the request of the Senator from New Hampshire is.

The PRESIDING OFFICER. The request of the Senator from New Hampshire is that the pension bills on the calendar be now considered.

Mr. SMITH of Georgia. I object to that, Mr. President.

THE CALENDAR.

Mr. GALLINGER. Then I will ask unanimous consent that we proceed with the consideration of the Calendar of Unobjected Cases.

The PRESIDING OFFICER. Under Rule VIII?

Mr. GALLINGER. In fact, that is the order.

The PRESIDING OFFICER. The Senator from New Hampshire asks unanimous consent that the Senate proceed with the consideration of unobjected bills on the calendar. Is there objection? The Chair hears none.

BILLS PASSED OVER.

The first business on the calendar was the bill (S. 1062) relating to the duties of registers of United States land offices and the publication in newspapers of official land-office notices.

Mr. MYERS. Mr. President, the Senator from New Mexico [Mr. FALL] has an amendment pending to that bill. It has gone over many times on account of his absence; but I spoke to him yesterday and asked him if he would not leave word with somebody to ask that no objection be made the next time it was called, and he said he would speak to the Senator from Utah [Mr. SUTHERLAND]. If he made that request, I should like to know it.

Mr. SUTHERLAND. He did not ask me to make the request. I think the bill had better go over.

Mr. MYERS. I regret very much that it goes over. I have no hope of its ever being passed.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 706) to amend section 260 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, was announced as next in order.

Mr. LODGE. I object.

The PRESIDING OFFICER. The bill will be passed over.

Mr. SMITH of Georgia. Mr. President, I hoped Senators were all ready to vote on that bill at this time.

Mr. LODGE. Personally, I am not.

Mr. OVERMAN. Mr. President, I will ask the Senator from New Hampshire whether we are not making a mistake in this course? There are many Senators absent. We may pass bills here by unanimous consent that nobody knows anything about, and the Senators who are not here may have objections to them. So far as I am concerned, the Senate can go on with the calendar in this way; but there may be some Senators absent who have objections to bills on the calendar to which I would not object.

Mr. CLARK of Wyoming. I think there are more Senators than usual present in the Senate Chamber.

Mr. OVERMAN. Very well; I have no objection.

The bill (S. 609) to aid in the erection of a monument to Pocahontas at Jamestown, Va., was announced as next in order.

Mr. LODGE and Mr. KERN. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 611) for the erection of a monument to the memory of Matthew Fontaine Maury, of Virginia, was announced as next in order.

Mr. GALLINGER. Let that go over. I make the objection on the part of the Senator from Utah [Mr. SMOOT].

The PRESIDING OFFICER. The bill will be passed over.

The joint resolution (S. J. Res. 1) proposing an amendment to the Constitution of the United States conferring upon women the right of suffrage was announced as next in order.

Mr. LODGE. That may go over.

Mr. CLARK of Wyoming. That is just a short resolution?

Mr. LODGE. Yes.

The PRESIDING OFFICER. The joint resolution will be passed over.

The bill (S. 2406) to amend section 162 of the act to codify, revise, and amend the laws relating to the judiciary, approved March 3, 1911, was announced as next in order.

Mr. SMITH of Georgia. Mr. President, I doubt whether we had better pass that bill. The House has passed a very similar bill, and we have the House bill now before the Judiciary Committee. The Senator from Utah [Mr. SUTHERLAND], the Senator from Tennessee [Mr. SHIELDS], and I are on a subcommittee to report upon it. I will ask the Senator from Utah whether it is not the same thing?

Mr. SUTHERLAND. I am not sure about it. I have not in my mind the bill to which the Senator from Georgia refers.

Mr. OVERMAN. It is the same bill.

Mr. SUTHERLAND. This bill, as I recall, was passed by the Senate at a previous session. It is a very proper bill.

Mr. SMITH of Georgia. I think it is an exact duplicate of a bill which has already passed the House, and if it is it would be better to take up the House bill and pass it.

Mr. GALLINGER. Let it go over, Mr. President.

The PRESIDING OFFICER (Mr. SHAFROTH in the chair). Objection is made. The bill will be passed over.

Mr. SMITH of Georgia. I do not object to it. The Senator from Tennessee [Mr. SHIELDS] is here now. Let us pass it without prejudice, and we may be able to call it up a little later on.

The PRESIDING OFFICER. Objection is made by the Senator from New Hampshire [Mr. GALLINGER].

The joint resolution (S. J. Res. 43) authorizing and directing the Department of Labor to make an inquiry into the cost of living in the District of Columbia and to report thereon to Congress as early as practicable was announced as next in order.

Mr. OVERMAN. Let that go over, in the absence of the Senator from Iowa.

The bill (H. R. 408) to provide for the development of water power and the use of public lands in relation thereto, and for other purposes, was announced as next in order.

Mr. OVERMAN. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

ELLEN B. MONAHAN.

The bill (S. 640) for the relief of Ellen B. Monahan was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with an amendment, on page 1, line 6, after the words "sum of," to strike out "$1,371.18" and insert "$400," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Ellen B. Monahan, out of any money in the Treasury not otherwise appropriated, the sum of $400, for physical injuries received by her as the result of being overcome by illuminating gas escaping from a pipe (said to have been broken through the negligence of an employee of the Treasury Department) on the 14th day of June, 1911, while she was in the employ of the Government of the United States and in the discharge of her duties as a clerk in the national-bank redemption agency office of the Treasury of the United States.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

BILLS, ETC., PASSED OVER.

The resolution (S. Res. 43) for the appointment of a committee to investigate and inquire into the causes of the existing freight blockade and embargoes on the trunk-line railroads entering into the port of New York was announced as next in order.

Mr. GALLINGER. Let that go over.

The PRESIDING OFFICER. The resolution will be passed over.

The bill (S. 668) making it unlawful for any Member of Congress to serve on or solicit funds for any political committee, club, or organization was announced as next in order.

Mr. LODGE. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 665) to codify, revise, and amend the laws relating to publicity of contributions and expenditures made for the purpose of influencing the nomination and election of candidates for the offices of Representative and Senator in the Congress of the United States, limiting the amount of campaign expenses, and for other purposes, was announced as next in order.

Mr. LODGE. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 669) to limit the use of campaign funds in presidential and national elections was announced as next in order.

Mr. GALLINGER. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 1840) to amend an act entitled "An act to establish a Court of Private Land Claims and to provide for the settlement of private land claims in certain States and Territories," approved March 3, 1891, and the acts amendatory thereto, approved February 21, 1893, June 27, 1898, and February 26, 1909, was announced as next in order.

Mr. OVERMAN and Mr. KERN. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 1082) to prevent the manufacture and sale of alcoholic liquors in the District of Columbia, and for other purposes, was announced as next in order.

Mr. LODGE. That bill had better go over. It will give rise to debate.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 2730) to fix the compensation of assistant appraisers of merchandise, and for other purposes, was announced as next in order.

Mr. OVERMAN. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 703) to provide for the promotion of vocational education; to provide for cooperation with the States in the promotion of such education in agriculture and the trades and industries; to provide for cooperation with the States in the preparation of teachers of vocational subjects; and to appropriate money and regulate its expenditure, was announced as next in order.

Mr. JONES. Mr. President, I do not think I have any objection to that bill, but I should like to have it go over now. It will probably lead to considerable discussion, and we could not pass it to-day.

Mr. SMITH of Georgia. Mr. President, I do not think any bill of any substantial materiality, unless it is just a local bill, ought to have precedence over this bill that has just been called. If it is a purely local bill I shall not object to it; but to other bills I do not think I ought to yield. I think this bill is entitled to consideration, and it ought to receive it from the Senate.

Mr. JONES. That is the only reason why I asked that it go over in order that we may pass local bills.

Mr. SMITH of Georgia. The Senator from Vermont [Mr. PAGE] is here. I think this is a splendid day for us to take up the vocational education bill.

Mr. JONES. It could not be taken up and discussed under the order under which we are now proceeding, which limits speeches to five minutes each.

Mr. SMITH of Georgia. Oh, no; I would make a motion to proceed to its consideration, if necessary.

Mr. JONES. Then the Senator might have a roll call. I ask that the bill go over.

The PRESIDING OFFICER. Objection is made. The bill will be passed over.

The resolution (S. Res. 7) providing that any Senator upon his own request may be recorded and counted as present in order to constitute a quorum, was announced as next in order.

Mr. SUTHERLAND. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

The resolution (S. Res. 20) for the appointment of a committee of Senators to examine into questions relating to the acquisition or construction of manufacturing plants to supply the Army and Navy with arms, armament, etc., was announced as next in order.

Mr. GALLINGER. Let that go over.

The PRESIDING OFFICER. The resolution will be passed over.

The bill (S. 1428) to reimburse certain fire insurance companies the amounts paid by them for property destroyed by fire in suppressing the bubonic plague in the Territory of Hawaii in the years 1899 and 1900 was announced as next in order on the calendar.

Mr. KERN. Let that go over.

The PRESIDING OFFICER. Objection is made, and the bill goes over.

The bill (S. 3551) relating to the procedure in the United States courts was announced as next in order.

Mr. OWEN. Let that go over.

The PRESIDING OFFICER. The bill goes over.

FISH HATCHERY IN UTAH.

The bill (S. 34) granting to the State of Utah title to certain lands in said State for use as a fish hatchery was considered as in Committee of the Whole.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized to grant to the State of Utah lot 3 of section 17 and the northeast quarter of the southeast quarter of section 18 in township 26 south, range 2 east of Salt Lake meridian, located within the Fishlake National Forest, containing a total of 68.10 acres, for use as a fish hatchery: *Provided*, That if the said State shall at any time permit the said lands hereby granted to be used for any purpose not contemplated by this act the said lands shall revert to the United States: *Provided further*, That the right of the United States to any coal that may be contained in said tract of land, together with the right to prospect for, mine, and remove said coal, is hereby disinctly reserved to the United States.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS, ETC., PASSED OVER.

The joint resolution (S. J. Res. 93) authorizing the erection on the public grounds in the city of Washington, D. C., of a statue of James Buchanan, a former President of the United States, was announced as next in order.

Mr. LODGE. Let that go over.

The PRESIDING OFFICER. The joint resolution will be passed over.

The bill (S. 1107) to amend, revise, and codify the laws relating to the public printing and binding and the distribution of Government publications was announced as next in order.

Mr. OWEN. Let that go over.

The PRESIDING OFFICER. The bill will go over.

The bill (S. 4654) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors, was announced as next in order.

Mr. THOMAS. Let that go over.

The PRESIDING OFFICER. Objection is made, and the bill goes over.

The bill (S. 645) to provide for the closing of barber shops in the District of Columbia on Sunday was announced as next in order.

Mr. OWEN. Let that go over.

The PRESIDING OFFICER. The bill will go over.

The bill (H. R. 7571) to provide for the appointment of the recorder of deeds of the District of Columbia by the Commissioners of the District of Columbia was next in order on the calendar.

Mr. OWEN. Let that go over.

The PRESIDING OFFICER. The bill will go over.

The bill (H. R. 11240) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, was announced as next in order.

Mr. SMITH of Georgia. Let that go over.

The PRESIDING OFFICER. It will go over.

Mr. GALLINGER. I have no remedy, Mr. President; but these House bills in behalf of soldiers, I think, ought to be considered. I wish the Senator would not insist upon his objection. I will ask who objected.

The PRESIDING OFFICER. Is there objection to the consideration of this bill?

Mr. SMITH of Georgia. There is.

The PRESIDING OFFICER. Objection is made.

REPUBLIC COAL CO.

The joint resolution (S. J. Res. 50) authorizing the Secretary of the Interior to sell the coal deposits in and under certain public lands to the Republic Coal Co., a corporation, was announced as next in order.

Mr. GALLINGER. Let that go over.

Mr. MYERS. That bill has been waiting for a long time. I ask the Senator from New Hampshire to withdraw his objection.

Mr. GALLINGER. I withdraw my objection.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, which was read as follows:

Resolved, etc., That the Secretary of the Interior be, and he is hereby, authorized, empowered, and directed to sell to the Republic Coal Co., a corporation organized and existing under and by virtue of the laws of and doing business in the State of Montana, the coal deposits in and under the following described lands, situate in Musselshell County, State of Montana, to wit: Section 30, township 8 north, range 26 east; section 6, township 7 north, range 26 east; northeast quarter southeast quarter and southeast quarter northeast quarter and west half of southwest quarter section 26, township 8 north, range 25 east. In the event of a sale the purchase price thereof shall be fixed by the Secretary of the Interior, but shall not be less than the appraised value thereof, and upon payment thereof the said Secretary shall issue to said corporation a contract providing the terms and conditions of said sale: *Provided, however*, That said sale shall be made subject to the legal or equitable rights, inchoate or vested, of any surface or other entryman on any part of said lands, and subject to the laws now in force governing the sales of coal or other minerals where the surface lands and rights are reserved or have been previously disposed of.

Mr. OVERMAN. I will ask the Senator if he objects to striking out the word "directed," because there will be no discretion in the Secretary of the Interior. I think it should authorize him to sell but to direct him to sell gives him no discretion whatever. I do not know anything about it, but it seems to me that the word "directed" should not be employed.

Mr. MYERS. All the discretion in the world as to the price is vested in the Secretary of the Interior; unlimited discretion as to a maximum price, but he can not sell at less than the appraised price.

The object of the joint resolution is to effect the sale of these lands for purposes that are quasi public, that are beneficial to the public and in the interest of the public.

Mr. OVERMAN. I understand that.

Mr. MYERS. If he is given discretion as to a maximum price without limit, all the Secretary of the Interior would have to do would be to put on a prohibitive price. That would be equivalent to a refusal to sell.

Mr. OVERMAN. But this directs him to sell to one particular person. Ought he not to have some discretion or authority to sell?

Mr. MYERS. I think he has that discretion when allowed to name a prohibitive price.

Mr. OVERMAN. He is directed to sell to one particular person. Ought there not to be some competitive bidders? He would not have the right arbitrarily to put up the price so that nobody could buy it. He would have to sell it at a reasonable price.

Mr. MYERS. I accept the amendment.

Mr. OVERMAN. Very well; strike out the word "directed" and insert "and" between "authorized" and "empowered."

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. The joint resolution reads "and he is hereby authorized, empowered, and directed." It is proposed to strike out the word "directed" and to insert "and" between "authorized" and "empowered."

The amendment was agreed to.

The joint resolution was reported to the Senate as amended, and the amendment was concurred in.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

WEST OKANOGAN VALLEY IRRIGATION DISTRICT.

The bill (S. 3329) for an appropriation of $105,000 to purchase water rights within the West Okanogan Valley irrigation district, and for other purposes, was announced as next in order.

Mr. OVERMAN. Let that go over.

Mr. JONES. I will state that that has practically been incorporated in an appropriation bill which has become a law. I do not know what the practice is.

Mr. OWEN. Let it be indefinitely postponed.

Mr. JONES. I do not know whether it should be left on the calendar or go over.

Mr. OVERMAN. Let it go over under Rule IX.

Mr. JONES. I do not suppose my colleague [Mr. POINDEXTER] would have any objection to its going to Rule IX, because it has been taken care of in the Indian appropriation bill.

Mr. OVERMAN. Let it go to Rule IX.

Mr. OWEN. It should be indefinitely postponed.

Mr. OVERMAN. That is equivalent to being indefinitely postponed.

The PRESIDING OFFICER. Would it not be better to have it indefinitely postponed?

Mr. JONES. I do not think there would be any objection to that at all.

The PRESIDING OFFICER. Without objection, the bill will be indefinitely postponed.

INDIAN LANDS IN NEBRASKA.

The bill (S. 4424) to provide for the payment of drainage assessments on Indian lands in Nebraska was announced as next in order.

Mr. NORRIS. When the Indian appropriation bill was before the Senate I offered this bill as an amendment to it and it was agreed to. Therefore there is no use in keeping it on the calendar and it may be indefinitely postponed.

The PRESIDING OFFICER. Without objection, the bill will be indefinitely postponed.

OSAGE OIL LANDS.

The next business on the calendar was Senate resolution 107, relative to leasing of Osage oil lands.

Mr. LANE. Let that go over.

The PRESIDING OFFICER. The Senator from Oregon objects.

DENISON COAL CO.

The bill (S. 1093) to permit the Denison Coal Co. to relinquish certain lands embraced in its Choctaw and Chickasaw coal lease and to include within said lease other lands within the segregated coal area was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

LOYAL CREEK INDIANS.

The bill (S. 1100) to pay the balance due the loyal Creek Indians on the award made by the Senate on February 16, 1903, was announced as next in order.

Mr. CURTIS. I ask that that bill may go over under Rule IX. I want to be here when it is taken up, because I desire to present some reasons why it should not be passed.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Kansas that the bill go to the calendar under Rule IX?

Mr. OWEN. Mr. President, I think the Senate ought to dispose of this matter at some time when it has the opportunity, and I hope that the Senator from Kansas will not insist upon its going over under Rule IX. He will undoubtedly be notified in case it should come up at any time, because he has resisted the passage of it.

This is a case in which the Senate of the United States made an award to the loyal Creek Indians of $1,200,000, but the House of Representatives on the Indian appropriation bill in providing the means to pay it reduced the amount to $600,000, with a provision that the Creeks should be compelled to accept it in settlement. They did accept it with protest because they had no other course to pursue. The Senator from Kansas is opposed to paying the remainder of it, but I think the Senate ought to hear the case at some time and act upon it.

Mr. CURTIS. The Senate has twice voted upon this measure and defeated it at two different sessions of Congress. It is simply coming back here session after session when it ought to be left alone. The Senate has voted twice on the proposition.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Kansas?

Mr. OWEN. I object to its being taken over under Rule IX. I am willing to have it go over.

The PRESIDING OFFICER. Objection is made to the consideration of the bill and it goes over.

MUSKOGEE (CREEK) NATION.

The bill (S. 1096) to provide for carrying into effect of the agreement between the United States and the Muskogee (Creek) Nation of Indians ratified by act of Congress approved March 1, 1901, and supplemental agreement of June 30, 1902, and other laws and treaties with said tribe of Indians was announced as next in order.

Mr. CURTIS. I ask unanimous consent that that bill may go over under Rule IX. I want to be present when it is taken up because I desire to present some reasons why it should not be passed.

Mr. OWEN. I hope that the Senate may consider this matter now. It is a local affair. It merely permits the Creek Indians who have not received allotments to receive $1,040 which is the approximate share of an average allotment, or if they have received less than that in land and money that they be given that amount out of the Creek fund. I do not see why the Senator wishes to put it over.

Mr. CURTIS. I object to the present consideration of the bill.

The PRESIDING OFFICER. Objection is made and the bill goes over.

PONCA TRIBE OF INDIANS.

The bill (S. 4251) to authorize the Ponca Tribe of Indians to appear in and be made parties to any suits filed in the Court of Claims by the Omaha Tribe was considered as in Committee of the Whole.

The bill is as follows:

Be it enacted, etc., That the Ponca Tribe of Indians residing in Oklahoma and Nebraska is hereby authorized and empowered to appear in and be made party to any suit or suits in the Court of Claims heretofore instituted or which may hereafter be begun under and by virtue of an act of Congress approved June 22, 1910, entitled "An act authorizing the Omaha Tribe of Indians to submit claims to the Court of Claims," with full rights of appeal as therein provided for other parties; and the Court of Claims shall thereupon have full jurisdiction to hear and determine all legal and equitable claims, if any, of such Ponca Tribe of Indians against the United States and against any other tribe or band of Indians party thereto, and also any legal or equitable defense, set-off, or counterclaim which the United States or the Omaha Tribe of Indians may have against any other party thereto. The compensation to be paid the attorney or attorneys chosen by the Ponca Tribe under contract approved by the Commissioner of Indian Affairs and the Secretary of the Interior in accordance with law to represent them in those cases shall be determined by the Court of Claims, such fees to be paid out of any money which may be found to be due said Indians, provided that the amount of attorneys' fees shall not be greater than that named in the approved contract.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PONCA INDIAN CLAIMS.

The bill (S. 1094) conferring jurisdiction on the Court of Claims to hear, determine, and render judgment in claims of the Ponca Tribe of Indians against the United States was considered as in Committee of the Whole.

The bill had been reported from the Committee on Indian Affairs with an amendment, on page 1, section 1, line 7, after the words "United States," to insert "for lands taken by the United States from the Ponca Indians without due compensation," so as to make the section read:

That jurisdiction is hereby conferred upon the Court of Claims, with right of appeal to the Supreme Court of the United States, to consider and determine all legal and equitable claims, if any, of the Ponca Tribe of Indians against the United States for lands taken by the United States from the Ponca Indians without due compensation: for the misappropriation of any funds of the tribe or for the failure of the United States to pay the tribe any money due under any treaty: and also to consider and determine any legal or equitable defenses, set-offs, or counterclaims which the United States may have against the said tribe of Indians, and to enter judgment thereon, all claims and defenses to be considered without regard to lapse of time; and the final judgment and satisfaction thereof shall be a full and final settlement of all claims of said Indians against the United States.

The amendment was agreed to.

Mr. OVERMAN. I object to that bill because it provides that the Court of Claims shall render judgment. I would have no objection if it simply provided that the Court of Claims should find the facts.

Mr. OWEN. Mr. President, these people are entitled to their peace.

Mr. OVERMAN. Is this money to be paid out of the tribal fund?

Mr. OWEN. If the Government of the United States owes them, why should it not pay them?

Mr. OVERMAN. Every claim that is sent from the Senate to the Court of Claims is sent there for the purpose of having the Court of Claims find the facts, to make finding as to questions of law, and then to report their findings to Congress for appropriation.

Mr. OWEN. The Senator is entirely mistaken. The Congress of the United States from time to time sends cases there both for the purpose of having the court find the facts and, after finding the facts, to render judgment under the law.

Mr. OVERMAN. Very seldom is that done. I objected the other day to a claims bill affecting Massachusetts on the same ground.

Mr. OWEN. What would be the use of providing merely that the court shall find the facts and send them back to the Senate for the Senate to adjudicate the matter?

Mr. OVERMAN. The findings come back to Congress for its action. It has been done time and again, a thousand times.

Mr. OWEN. So has the other procedure been followed a thousand times.

Mr. OVERMAN. I think the Senator is mistaken. We have reports here from the Court of Claims every session setting forth the facts and the conclusions of the court on the questions of law and equity.

Mr. WILLIAMS. Why is not the court a better judge of the law and equity than Congress? Why can not the United States Government trust its own court?

Mr. OVERMAN. I trust the court. That is exactly what I want done. I want the court to find the facts and report to Congress in the regular way.

Mr. WILLIAMS. The Senator wants the court to find the facts and send the case here, and then constitute Congress as a court of appeals.

Mr. OVERMAN. I am perfectly willing that the Court of Claims should make a finding as to the facts. As I have said, some days ago I objected to a claims case of Massachusetts on the same ground as I am objecting in this instance, and I can not let one go through without letting the others go through. I object, Mr. President.

The PRESIDING OFFICER. Objection is made to the consideration of the bill.

Mr. OWEN. These bills relating to affairs in Oklahoma have been on the calendar for some time, and objection after objection has been made every time the bills have come up. Why are these people not to be given their peace? The Omaha Indians

have been permitted to bring suit and the Ponca Indians have a conflicting claim and should have the right to intervene; but the Senator is denying them that right by raising the objection.

Mr. OVERMAN. I am willing that they should go to the Court of Claims like any other claimants and have the court try the case and ascertain the facts. That is the purpose for which the Court of Claims was established. Congress can not go into these questions. We have not the power and we have established the court to ascertain regarding all questions of law and fact, and then to report to Congress. That has been the rule, and that was the reason for the establishment of the court.

Mr. OWEN. Congress does both sometimes. It authorizes the court to find the facts, and upon the facts Congress sometimes acts for itself, and sometimes it sends the case back to the court to find the law and render judgment.

Mr. OVERMAN. Very rarely.

Mr. OWEN. I have had great familiarity with the practice in that court, and I know perfectly what is the practice.

Mr. OVERMAN. I served 10 years on the Committee on Claims, and I think only in the rarest instances, and, as I recall, never did we send a case to the Court of Claims to render final judgment.

Mr. GALLINGER and Mr. LODGE. Regular order!

The PRESIDING OFFICER. The regular order is demanded. Objection has been made to the bill. The next business on the calendar will be stated.

CLAIMS OF LOYAL SHAWNEE AND ABSENTEE SHAWNEE INDIANS.

The bill (S. 1098) to adjust and settle the claims of the loyal Shawnee and loyal Absentee Shawnee Tribe of Indians, was announced as next in order.

Mr. OVERMAN. I object to that bill.

Mr. OWEN. Mr. President, this is a case where the Interior Department has ascertained the facts and made a report to Congress upon the facts, and the facts are now before Congress.

Mr. OVERMAN. Why does not Congress act, then, instead of sending it to the Court of Claims?

Mr. SUTHERLAND. Regular order!

Mr. OWEN. If the Senator is willing to make an appropriation direct, I would be very glad to have that done.

Mr. OVERMAN. I object to the bill.

The PRESIDING OFFICER. The regular order has been called for and objection has been made to the consideration of the bill. The bill will be passed over.

BILLS PASSED OVER.

The bill (S. 4250) for the relief of the Ottawa Indian Tribe of Blanchards Fork and Roche de Bœuf was announced as next in order.

Mr. OVERMAN. I object to that bill.

The PRESIDING OFFICER. Objection is made to the consideration of the bill.

The bill (H. R. 8092) confirming patents heretofore issued to certain Indians in the State of Washington was announced as next in order.

Mr. CURTIS. Mr. President, in view of the absence of the Senator from Washington [Mr. POINDEXTER] I ask that that bill go over. There is an amendment pending to it, but I think it had better go over until the Senator from Washington returns.

The PRESIDING OFFICER. Objection is made, and the bill will be passed over.

OCCUPANTS OF TUTTLE TOWN SITE.

The bill (S. 4722) for the relief of the occupants of the Tuttle town site was announced as next in order.

Mr. OWEN. I move the indefinite postponement of that bill. It has already been provided for in the Indian appropriation bill.

The PRESIDING OFFICER. The question is on the motion of the Senator from Oklahoma that the bill be indefinitely postponed.

The motion was agreed to.

BILLS PASSED OVER.

The bill (S. 3927) for the relief of the legal representatives of Francis Busch, deceased, was announced as next in order.

Mr. LODGE. Mr. President, the senior Senator from Utah [Mr. SMOOT] objected to that bill, and to the whole series of bills beginning at Calendar No. 243 down to Calendar No. 254, inclusive; and, in his absence, I think they had better go over.

Mr. VARDAMAN. Does the Senator's objection go to the merit of these claims?

Mr. LODGE. The Senator from Utah, when they were heretofore reached in the consideration of the calendar, objected to all of them, and said he did not wish them to go through without discussion.

Mr. VARDAMAN. I remember that the Senator from Utah objected to Calendar No. 246, a bill I should be very glad to have the Senate consider.

Mr. LODGE. Personally I have no objection to any of the claims, but, in the absence of the Senator from Utah, I do not think they ought to be considered to-day.

The PRESIDING OFFICER. Objection being made, the bills referred to will be passed over.

SETTLEMENT OF CERTAIN PRIVATE-LAND CLAIMS.

Mr. CATRON. Mr. President, I ask to recur to Calendar No. 72, Senate bill 1840, which was objected to by the senior Senator from North Carolina [Mr. OVERMAN]. I have explained to him the situation. He was laboring under a misapprehension, I understand, and is willing to withdraw his objection.

Mr. OVERMAN. I withdraw the objection after the explanation the Senator from New Mexico has given me of the bill.

Mr. CATRON. I ask unanimous consent that the bill be now considered.

Mr. ASHURST. Let the bill be read.

The Secretary read the bill (S. 1840) to amend an act entitled "An act to establish a Court of Private Land Claims and to provide for the settlement of private land claims in certain States and Territories," approved March 3, 1891, and the acts amendatory thereto, approved February 21, 1893, June 27, 1898, and February 26, 1909.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

Mr. LANE. I should like to ask the Senator to what the bill applies?

Mr. CATRON. It applies to some small claims in the States of Arizona, New Mexico, and Colorado of old people who were given permission when the Court of Private Land Claims was established to file their claims on their small holdings, but a great many of them did not understand the English language, they never got notice, and so did not file their claims. This bill simply proposes to extend the time within which they may do so.

Mr. LANE. Very well.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Public Lands with an amendment, on page 2, line 9, to strike out the date "1915," and insert "1917," so as to make the bill read:

Be it enacted, etc., That section eighteen of an act entitled "An act to establish a Court of Private Land Claims and to provide for the settlement of private land claims in certain States and Territories," approved March 3, 1891, as amended by the act approved February 21, 1893, and by the act approved June 27, 1898, and by the act approved February 26, 1909, be, and the same is hereby, further amended by striking out the words "before the 4th day of March, 1910," and inserting in lieu thereof the words "before the 4th day of March, 1917," so that the first clause of said section shall read as follows, namely:

"That all claims arising under either of the two next preceding sections of this act shall be filed with the surveyor general of the proper State or Territory before the 4th day of March, 1917, and no claim not so filed shall be valid."

Provided, That the extension herein granted shall not apply to lands within the limits of a confirmed grant or embraced in any entry completed under the public land laws prior to filing of a claim hereunder, nor shall its provision extend to persons holding under assignment made after March 3, 1901.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER.

The bill (S. 1065) to provide for summer residence homesteads, and for other purposes, was announced as next in order.

Mr. FLETCHER. I object to the consideration of that bill.

The PRESIDING OFFICER. Objection being made, the bill goes over.

Mr. GALLINGER. I call attention to the fact that Orders of Business 237 and 240 have not been acted on.

Mr. LODGE. Orders of Business 237 and 240 have nothing to do with the bills which went over. Order of Business 234 was passed over, and the Orders of Business from 243 to 254, inclusive, were passed over. Orders of Business 237 and 240 have nothing to do with those bills which have been passed over.

The PRESIDING OFFICER. The bills to which the Senator from Massachusetts [Mr. LODGE] refers went over at his suggestion.

Mr. LANE. Was Order of Business 234 considered?

Mr. LODGE. It has not been, Mr. President, as I understand, it being one of the bills to which objection was made;

but I repeat that Orders of Business 237 and 240 have nothing to do with that.

The bill (S. 4418) to establish game sanctuaries in national forests, and for other purposes, was announced as next in order.

Mr. THOMAS. Mr. President, I object to the consideration of that bill.

The PRESIDING OFFICER. Objection being made, the bill goes over.

PACIFIC OCEAN HALIBUT FISHERIES.

The bill (S. 4586) to protect and conserve the halibut fisheries of the Pacific Ocean, to establish closed seasons in halibut fishing in certain waters thereof, and to restrict the landing of halibut in the United States of America, and the Territory of Alaska during the closed seasons established, was announced as next in order.

The PRESIDING OFFICER. Did the Senator from Massachusetts object to this bill and those following down to and including Order of Business 254?

Mr. LODGE. No, Mr. President; Order of Business 240, being the bill just announced, has no relation to the post-office claims to the consideration of which I have objected.

The PRESIDING OFFICER. Then Senate bill No. 4586 will be proceeded with in the absence of objection.

The Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Fisheries with an amendment, in section 2, page 2, line 20, after the word "west," to insert "thence southeast (magnetic) 19 miles to a point approximately latitude 55° 24′ north, longitude 134° 3′ 42″ west," so as to make the section read:

SEC. 2. That it shall be unlawful for any vessel or boat of the United States or person belonging to or on such vessel or boat, or any person owing obedience to the laws of the United States, to fish for or catch halibut at any time within the area circumscribed by lines as follows, or for any vessel, boat, person, or corporation to land at any port or place in the United States any halibut taken within such area, which area is hereby recognized and designated as a nursery for halibut:

From the northwest extremity of Cape Lynch, Hecata Island, southwest (magnetic) 18 miles to a point approximately latitude 55° 42′ 21″ north, longitude 134° 12′ 30″ west; thence southeast (magnetic) 19 miles to a point approximately latitude 55° 24′ north, longitude 134° 3′ 42″ west; thence northeast (magnetic) 8.6 miles, touching the north shore of the outer and bisecting the inner of the two islets southwest of Cape Addington, Noyes Island, to a point on Noyes Island.

From the northwest extremity of Cape Lynch, Hecata Island, southeast three-fourths south (magnetic) approximately 14.5 miles, to a point on Noyes Island in range with the peak shown on chart No. 8150 published by the Coast and Geodetic Survey, said point being approximately in west longitude 133° 39′ 30″.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER.

The bill (S. 4884) for the relief of the estate of A. B. Denton was announced as next in order.

Mr. LODGE. That bill, being Order of Business 243, and all the others down to Order 254, have been objected to.

Mr. SUTHERLAND. Yes; they have been objected to, down to Order of Business 254.

PONCA INDIAN CLAIMS.

Mr. OWEN. Mr. President, the objection which was made to Order of Business 218, being Senate bill 1094, on the ground that it authorizes the entry of judgment, could be met by an amendment striking out the words "to enter judgment thereon," and so forth, and in lieu thereof to authorize the report to be made to Congress. If I may be permitted, I should like to have the bill disposed of.

Mr. OVERMAN. I shall be very glad to withdraw my objection with that understanding.

The PRESIDING OFFICER. The Secretary will state the title of the bill.

The SECRETARY. A bill (S. 1094) conferring jurisdiction on the Court of Claims to hear, determine, and render judgment in claims of the Ponca Tribe of Indians against the United States.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill.

Mr. OVERMAN. The bill has been read.

The PRESIDING OFFICER. The Senator from Oklahoma will state the amendment which he desires to submit.

Mr. OWEN. On page 2, line 4, I move to strike out all after the word "and," including lines 5, 6, 7, and 8, and to insert "report the same to Congress."

Mr. OVERMAN. The Senator proposes to strike out the words in reference to the court rendering judgment?

Mr. OWEN. Yes.

The PRESIDING OFFICER. The amendment proposed by the Senator from Oklahoma will be stated.

The SECRETARY. On page 2, line 4, after the word "and," it is proposed to strike out the words "to enter judgment thereon, all claims and defenses to be considered without regard to lapse of time, and the final judgment and satisfaction thereof shall be a full and final settlement of all claims of said Indians against the United States," and in lieu thereof to insert the words "report the same to Congress."

Mr. SUTHERLAND. Will not that amendment necessitate a reconstruction of the bill? The bill is drawn upon the theory that the Court of Claims shall render final judgment.

Mr. OWEN. I shall have to make one amendment at a time. I am going to move to amend the bill in another place as soon as the amendment which I have just offered is disposed of.

Mr. LODGE. The title also will have to be amended.

Mr. OWEN. I move to strike out section 3.

The PRESIDING OFFICER. The amendment proposed by the Senator from Oklahoma will be stated.

The SECRETARY. On page 3, it is proposed to strike out section 3, as follows:

SEC. 3. The balance of any judgment rendered in favor of claimant Indians shall be placed in the Treasury of the United States to the credit of the Indians entitled thereto, and shall draw interest at the rate of 4 per cent, which principal and interest may, in the discretion of the Secretary of the Interior, be paid to the Indians or expended for their benefit.

The amendment was agreed to.

Mr. SUTHERLAND. Mr. President, this is rather an unsatisfactory way of passing legislation—to amend it in a radical respect in the Senate—for we can not always tell what effect such amendments may have on other provisions of the bill. Beginning on line 20, page 2, there is a provision for compensation of attorneys——

Mr. OWEN. I am going to move to strike out all of the remainder of section 2 below line 14. I now move to strike out that part of section 2 after the words "existing law," in line 14.

The PRESIDING OFFICER. The amendment proposed by the Senator from Oklahoma will be stated.

The SECRETARY. In section 2, page 2, after the words "existing law," it is proposed to strike out:

The Ponca Tribe of Indians shall be party plaintiff and the United States party defendant, and such suit shall on motion of either party be advanced on the docket of the Court of Claims and of the Supreme Court. Official letters, papers, reports, and public records, or certified copies thereof, may be used as evidence. The compensation to be paid the attorneys for the claimant Indians shall be determined by the Court of Claims but in any event shall not be greater than that provided in the contract between the claimant Indians and their attorney or attorneys, and shall be paid out of any sum or sums found and adjudged to be due said Indians.

The PRESIDING OFFICER. Without objection, the amendment will be considered as agreed to.

Mr. SUTHERLAND. Mr. President, the very first provision of the bill is:

That jurisdiction is hereby conferred upon the Court of Claims, with right of appeal to the Supreme Court of the United States, to consider and determine—

The word "determine" is used, which implies a judgment.

A further provision is—

and also to consider and determine—

Again, the word "determine" means an adjudication upon the legal and equitable defenses. Then the bill concludes by providing that the adjudication shall be reported to Congress. It seems to me that the bill ought to go over.

Mr. OWEN. I have modified it so that the determination of what these rights are, and the facts in the matter, may be sent to Congress. It does not permit them to enter judgment against the United States. It sends it to Congress to ascertain from the findings of facts and of law what the rights are.

Mr. SUTHERLAND. I shall not object, Mr. President.

The PRESIDING OFFICER. If there are no further amendments to be proposed, the bill will be reported to the Senate.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. LODGE. The title should be amended to conform to the Senator's amendment.

Mr. OWEN. Yes; the title should be amended.

Mr. LODGE. The words "and render judgment" should be stricken out.

The PRESIDING OFFICER. Without objection, the amendment to the title will be agreed to.

Mr. LODGE. The Secretary can make the amendment to the title.

BILLS PASSED OVER.

The bill (S. 1065) to provide for summer residence homesteads, and for other purposes, was announced as next in order.

Mr. FLETCHER. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 5126) giving the consent of the United States for the bringing of certain suits in the Supreme Court of the United States, and for other purposes, was announced as next in order.

Mr. SUTHERLAND. Mr. President, I do not intend to object to the consideration of this bill, although I shall vote against the bill itself, as I voted against it in the Committee on the Judiciary. I think the Senate ought to understand the character of the legislation before it votes upon it. It makes a very profound and far-reaching alteration in existing law.

Of course, under the present state of the law, no State can maintain an action against the United States. Wherever a State has a grievance against the United States it must be presented to Congress, and there investigated and determined. My own opinion is that there is the safe place to leave it.

The principal object of this bill, as I understand, is to permit the State of West Virginia, and perhaps some other States, to maintain an action against the United States Government to recover for lands which were transferred to the United States by the State of Virginia and other States at the inception of the Government. Of course, if an action of that kind is maintained, and judgment is rendered, it means a judgment for untold millions of dollars—nobody knows how much. A bill of that vast importance and that vast range it seems to me ought to receive pretty careful consideration.

I content myself with making that statement. I shall not object to a vote being taken upon the bill.

Mr. TOWNSEND. Do I understand that the Senator does not object?

Mr. SUTHERLAND. I do not object.

Mr. TOWNSEND. I do object, Mr. President.

The PRESIDING OFFICER. Objection is made by the Senator from Michigan. The bill will be passed over.

The bill (H. R. 54) to pension widows and minor children of officers and enlisted men who served in the War with Spain, Philippine insurrection, or in China was announced as next in order.

Mr. SMITH of Georgia. Mr. President, I object to the consideration of that bill.

Mr. GALLINGER. Mr. President, I am going to venture to appeal to the Senator from Georgia regarding this bill. The widows and children of officers and enlisted men of every other war, including the Indian wars, have been pensioned.

Mr. SMITH of Georgia. I am very much opposed to it. I am opposed to pensioning the widows of men who come out of the Army sound. I do not see any reason for pensioning them. If they are injured in the service or killed in the service, or if they give their lives to the service, I am willing to give them just as much as anybody would give them, but I can not see why a man who went on an excursion to Cuba, which was the case with most of them, and who came back afterwards and married, sound and well, should charge the Government with responsibility for his widow or children, any more than if he had not been there.

Mr. GALLINGER. I know this matter is not debatable, but a great many of these widows are widows of soldiers who did not consider it a junketing expedition, but who actually contracted disease, and many of them were wounded. However, if the Senator objects——

Mr. SMITH of Georgia. I want to say to the Senator that wherever anyone was injured in the service, wherever anyone has died as a result of the service, wherever the service has really damaged anybody, the Senator from New Hampshire will not vote for a more liberal pension than I will. I simply object to pensioning them when they were not injured. I simply object to the system of pensioning widows of perfectly sound men who have had a short service, who come out of that service well, and who subsequently marry. I do not think there is any more reason for pensioning their widows than for pensioning the widows of everybody. It is injury in service that I am willing to vote any reasonable pension for, but I object to pensioning where there is lack of injury in service.

Mr. MYERS. Mr. President, If I may say a word, I will suggest that the bill might be amended, then, by striking out the widows in such cases. I will add my voice to the appeal of the Senator from New Hampshire to take up that bill. I am very much in favor of it.

Mr. GALLINGER. I will not agree to amending the bill. The Senator from Georgia has objected to every pension bill that we have reached on the calendar, and I am willing that the record shall stand.

Mr. SMITH of Georgia. Every one of the pension bills reached so far has contained pension of the class which I have shown should be subject to objection.

Mr. GALLINGER. I beg the Senator's pardon.

Mr. SMITH of Georgia. Yes; the others included them.

Mr. GALLINGER. Well, we will not argue that matter.

Mr. SMITH of Georgia. I did not object to the bills until I saw they included them.

I want to say that I have letters from constituents urging some of these pensions. There are persons in my own State who are in this list, and who want to get these pensions. I am pressing my objection now, free from any embarrassment about their having been soldiers of the war between the States. They are my constituents that I am stopping from receiving gifts from the Government to which I do not consider them entitled, just as they are constituents of Senators from other States.

Mr. GALLINGER. Well, Mr. President, that is all right. The Senator did object to two bills that provided pensions for widows of soldiers and sailors of the Regular Army and Navy.

Mr. SMITH of Georgia. And they also added "of other wars," the Senator will notice.

The PRESIDING OFFICER. Objection being made, the bill will be passed over.

CLAIMS OF MASSACHUSETTS.

The bill (S. 3346) conferring jurisdiction on the Court of Claims to adjudicate the claims of the State of Massachusetts, was considered as in Committee of the Whole.

The PRESIDING OFFICER. This bill was read and amended on April 24.

Mr. LODGE. Mr. President, objection was made to that bill by the Senator from North Carolina [Mr. OVERMAN] on the same ground on which he has objected to the bills of the Senator from Oklahoma. I have drafted an amendment in the nature of a substitute which meets his views, and I have consulted him in regard to it. I know of no other objection to the bill.

The PRESIDING OFFICER. The bill is in Committee of the Whole and open to amendment.

Mr. LODGE. I ask to have the amendment read.

The SECRETARY. It is proposed to strike out all after the enacting clause and to insert the following:

That the claim of the State of Massachusetts for premium paid for coin with which it paid the interest and principal of its bonds issued in the year 1861 for money borrowed and used to furnish troops of the State for the service of the United States during the Civil War, and also its claim for interest, and premium paid for coin used in payment of such interest, on bonds issued for money borrowed and expended, at the request, during said war, of the President of the United States, in protecting the harbors and fortifying the coast, which claims were rejected by the Comptroller of the Treasury Department, be, and the same are hereby, referred to the Court of Claims for a determination of the law and the facts and report to Congress. The evidence of the amount of said expenditures and of the computations of such premiums made by the accounting officers of the Treasury on file in said department as furnished by the State may be considered by the court so as to relieve the State of the necessity of again filing said evidence in court.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. SMITH of Georgia. Mr. President, is this Senate bill 3346?

The PRESIDING OFFICER. It is.

Mr. LODGE. The bill has been changed to meet the objection of the Senator from North Carolina.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the bill will be reported to the Senate.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ELIZABETH T. WELLS.

The bill (S. 3012) for the relief of Elizabeth T. Wells was considered as in Committee of the Whole. It proposes that in the administration of the pension laws and the laws conferring rights and privileges upon honorably discharged soldiers of the Volunteer Army Charles S. Wells, deceased, shall be held and considered to have been honorably discharged from the military service of the United States as a member of Company F, Twelfth Regiment New York Volunteer Infantry, on the 26th day of December, 1861, provided that no back pay, bounty, pension, or other emolument shall accrue prior to the passage of the act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILL PASSED OVER.

The bill (S. 2530) for the relief of the Buffalo River Zinc Mining Co. was announced as next in order.

Mr. GALLINGER. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

CREEK INDIAN LANDS.

The joint resolution (S. J. Res. 114) withholding from allotment the unallotted lands or public domain of the Creek Nation or Tribe of Indians, and providing for the sale thereof, and for other purposes, was considered as in Committee of the Whole.

The joint resolution has been reported from the committee on Indian Affairs with an amendment, on page 2, after line 2, to insert:

That the Secretary of the Interior is hereby authorized to pay each and every duly enrolled citizen of the Creek Nation who has not been allotted lands in said nation and who is not included in Senate Document No. 478, Sixty-third Congress, second session, the sum of $2,080, in lieu of an allotment of land in said nation. Said sum of $2,080 to be paid to each and every person out of the funds in the Treasury of the United States to the credit of the Muskogee Creek Nation.

So as to make the joint resolution read:

Resolved, etc., That the unallotted lands or public domain of the Creek Nation or Tribe of Indians, including any land the title to which has been or may be recovered for the Creek Nation in any pending or other suit or otherwise, be, and the same is hereby, withheld from allotment to members of said nation or tribe, and that the Secretary of the Interior be, and he is hereby, authorized, in his discretion, to cause such land to be sold or leased for the benefit of the Creek Nation or Tribe of Indians under such rules and regulations as he may prescribe, the proceeds of such sale or lease to be paid into the Treasury of the United States to the credit of said Creek Nation.

That the Secretary of the Interior is hereby authorized to pay each and every duly enrolled citizen of the Creek Nation who has not been allotted lands in said nation and who is not included in Senate Document No. 478, Sixty-third Congress, second session, the sum of $2,080, in lieu of an allotment of land in said nation. Said sum of $2,080 to be paid to each and every person out of the funds in the Treasury of the United States to the credit of the Muskogee Creek Nation.

Mr. GALLINGER. Let that go over, Mr. President.

Mr. OWEN. Mr. President, I wish to propose an amendment, to insert "$1,040" in lieu of "$2,080." Do I understand that objection is made to the consideration of the joint resolution?

The PRESIDING OFFICER. Yes.

Mr. OWEN. I hope the Senator will not object to its consideration. There are some lands which have been developed for oil there that have a very large value, estimated at as much as a million dollars for a quarter section. It is obvious that it was not the intention of the agreement that such a development there should pass into the hands of a private person.

Mr. CURTIS. Mr. President, I think with the amendment reducing the amount, offered by the Senator from Oklahoma, there is no objection on the part of members of the committee to the joint resolution.

The PRESIDING OFFICER. Is there objection to the consideration of the joint resolution?

Mr. GALLINGER. I objected, but I will withhold the objection to ask the Senator from Oklahoma a question. It looks to me as though the committee must have been guessing when they fixed upon the sum of $2,080 and now agree to a less sum. How did they reach their conclusions?

Mr. OWEN. The original estimate of the value of these allotments was $1,040. In many cases Congress, where it has granted money in lieu of land, has increased it to double the amount, and it was thought that double the amount would be just in this case, because they had developed a very important oil field there, and the values had increased accordingly. The value of the land increased, but $1,040 is the original standard.

Mr. GALLINGER. How did the committee happen to name $2,080?

Mr. OWEN. Because it was double $1,040.

Mr. CURTIS. Mr. President, I desire to state that I was not present when the bill was considered by the committee or I should have objected to that amount. As soon as I found the amount was fixed at that figure, I notified the Senator from Oklahoma that I thought it should be reduced to the amount fixed in the agreement, and he consented to offer that amendment.

Mr. GALLINGER. Mr. President, I withdraw my objection, under the statement made by the two Senators.

The PRESIDING OFFICER. The objection is withdrawn. The Senator from Oklahoma proposes an amendment to the amendment, which will be stated.

The SECRETARY. On page 2, line 8, in the committee amendment, it is proposed to strike out "$2,080" and to insert "$1,040," and in line 9 it is proposed to strike out "$2,080" and to insert "$1,040."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The joint resolution was reported to the Senate as amended, and the amendment was concurred in.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

IOWA TRIBE OF INDIANS.

The bill (S. 4253) conferring jurisdiction on the Court of Claims to hear, determine, and render judgment in claims of the Iowa Tribe of Indians against the United States was considered as in Committee of the Whole.

The Secretary read the bill, as follows:

Be it enacted, etc., That jurisdiction is hereby conferred upon the Court of Claims to hear, determine, and render judgment on principles of justice and equity and as upon a full and fair arbitration of the claims of the Iowa Tribe of Indians, of Oklahoma, against the United States, with the right of appeal by either party to the Supreme Court of the United States, for the determination of the amount, if any, which may be legally or equitably due said tribe of Indians under any treaties or laws of Congress or under any stipulations or agreements, whether written or oral, entered into between said tribe of Indians and the United States or its authorized representatives, or for the failure of the United States to pay any money which may be legally or equitably due said tribe of Indians. A petition in behalf of said Indians shall be filed in the Court of Claims within one year after the passage of this act, and the Iowa tribe of Indians shall be the party plaintiff and the United States the party defendant, and the petition may be verified by the attorney employed by the said Iowa Tribe of Indians, to prosecute their claim under this act, under contract to be approved by the Commissioner of Indian Affairs and the Secretary of the Interior, as provided by law, upon information and belief as to the facts alleged in said petition. Upon the final determination of the cause the Court of Claims shall decree such fees and expenses as the court shall find to be reasonably due to be paid to the attorney or attorneys employed by said Iowa Tribe of Indians, and the same shall be paid out of any sum or sums of money found due said Iowa Tribe of Indians: *Provided*, That in no case shall the fees and expenses decreed by said court be in excess of the amount stipulated in the approved contract.

Mr. OVERMAN. Let that bill go over, Mr. President.

Mr. OWEN. Mr. President, this bill can be modified so as simply to provide for a report to Congress, and I should like to have it passed in that form. I will propose such an amendment.

Mr. OVERMAN. Let it go over, then, and the Senator can call it up when he is ready to amend it.

Mr. OWEN. I am ready now.

Mr. OVERMAN. All right.

Mr. OWEN. I move, in line 4, page 1, to insert the word "and" after the word "hear"; to strike out the words "and render judgment," in line 4; and to insert, after the word "States," in line 7, the words "and report to Congress," striking out, in lines 7 and 8, the words "with the right of appeal by either party to the Supreme Court of the United States, for," leaving the language to read:

Jurisdiction is hereby conferred upon the Court of Claims to hear and determine, on principles of justice and equity, and as upon a full and fair arbitration of the claims of the Iowa Tribe of Indians, of Oklahoma, against the United States, and report to Congress the determination of the amount, if any—

And so forth.

The PRESIDING OFFICER. The amendment proposed by the Senator from Oklahoma will be stated.

The SECRETARY. On page 1, line 4, after the word "hear," it is proposed to insert the word "and," so that it will read "to hear and determine"; in the same line, to strike out the words "and render judgment"; in line 7, after the words "United States," to insert "and report to Congress"; and, in lines 7, 8, and 9, to strike out "with the right of appeal by either party to the Supreme Court of the United States, for."

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. GALLINGER. I notice in this bill there is a provision for the payment of fees to attorneys representing these Indians. I have heard——

Mr. OWEN. I have no objection to having that stricken out if it is objectionable.

Mr. GALLINGER. I am not going to object, but I am going to ask a question. A good deal of complaint has come to me of inordinate fees being made, fees out of all reason. I was going to ask the Senator how that is, whether or not——

Mr. OWEN. In the past history of the country there have been fees allowed that were unreasonable and unfair, but in recent years there has been a tendency to a gradual restriction of fees to narrower limits, and in this case it is left to the determination of the court after they have perceived what services were rendered before the court.

Mr. GALLINGER. The court will not decree anything above the amount stipulated in the approved contract. What I was trying to get at was whether those contracts as a rule are fair to the Indians.

Mr. OWEN. I think under the present administration and under recent administrations the restriction has been so rigid, in fact, that in many of these cases the Indians have really not been represented at all.

Mr. OVERMAN. I suggest to the Senator to strike out the words "render final judgment" and to insert "report to Congress," and to strike out the word "decree" and insert "find," so that they shall find such fees and report to Congress.

Mr. OWEN. I make the motion to change that.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. GALLINGER. What is the amendment?

Mr. OWEN. In line 21, strike out the word "decreed" and insert "found."

The PRESIDING OFFICER. The Secretary will state the amendment.

Mr. OWEN. In line 21, strike out the word "decreed" and insert the word "found."

The SECRETARY. On page 2, line 21, strike out "decreed" and insert "found," so as to read "the expenses found by said court."

The amendment was agreed to.

Mr. OWEN. In line 15, on page 2, I move to strike out the word "decree" and to insert "find."

Mr. OVERMAN. That is right.

The amendment was agreed to.

Mr. GALLINGER. The Chair did not give me an opportunity to conclude what I was trying to say.

The PRESIDING OFFICER. The Chair will give the Senator an opportunity now.

Mr. GALLINGER. Yes; I will take the time now.

The PRESIDING OFFICER. First, however, the hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The SECRETARY. A bill (H. R. 10484) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1917, and for other purposes.

Mr. OWEN. I ask that the unfinished business be temporarily laid aside.

Mr. BANKHEAD. I was going to suggest that it be laid aside temporarily.

Mr. OWEN. I beg the Senator's pardon; I looked at his seat and not seeing it occupied I did not observe him in the Chamber. That is the reason why I made the request.

The PRESIDING OFFICER. Without objection, the unfinished business will be laid aside temporarily.

Mr. GALLINGER. I was only going to say in reference to this matter that it is gratifying to me to have the Senator from Oklahoma, who is more familiar with these cases than those of us from the East, assure us that the Indians are being protected, so far as the payment of fees to attorneys is concerned. I had called to my attention one case a few years ago where an enormous fee had been paid to attorneys out of the funds of the Indians for defending them or securing legislation in their behalf, as it was claimed. I recognize the fact that fees ought to be paid to men who represent Indians or white men, but, as a friend of the Indian, in a general way, I trust that his rights will be carefully guarded in all such legislation and that he will not be robbed of fees that ought not and can not properly be demanded as a matter of justice and right.

That is all I care to say.

Mr. OWEN. It is very naturally an object of solicitude to protect the Indian people against unjust and unfair fees. In this case it comes under sections 2103, 2104, and 2105 of the Revised Statutes, and is subject to the scrutiny of the officers of the Indian Office and then the Secretary of the Interior, and it must receive the written approval of both, and then afterwards the court will define what is right.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

On motion of Mr. OWEN, the title was amended so as to read: "A bill conferring jurisdiction on the Court of Claims to hear, determine, and report to Congress in claims of the Iowa Tribe of Indians against the United States."

CARE AND TREATMENT OF LEPROSY.

The bill (S. 4086) to provide for the care and treatment of persons afflicted with leprosy and to prevent the spread of leprosy in the United States, was announced as next in order.

Mr. THOMAS. Let that go over.

The PRESIDING OFFICER. Objection is made to the consideration of the bill and it goes over.

BARKENTINE "MABEL I. MEYERS."

The bill (S. 3270) for the relief of the owners of the barkentine *Mabel I. Meyers* and her master and crew, and for the relief of the owners of cargo of molasses late on board said barkentine, was considered as in Committee of the Whole.

The PRESIDING OFFICER. The reported amendment has been agreed to.

Mr. SMITH of Georgia. What amendment was made?

The PRESIDING OFFICER. It will be stated.

The SECRETARY. On page 2, line 14, insert the following proviso:

Provided, That no award or judgment shall be made for prospective profits.

Mr. SMITH of Georgia. I should like to know what it is supposed the bill will carry as a charge, if anyone knows anything about it. Let it go over.

The PRESIDING OFFICER. Objection is made, and the bill will go over.

VOLUNTEER OFFICERS' RETIRED LIST.

The next bill on the calendar was the bill (S. 392) to create in the War Department and the Navy Department, respectively, a roll designated as the "Civil War volunteer officers' retired list," to authorize placing thereon with retired pay certain surviving officers who served in the Army, Navy, or Marine Corps of the United States in the Civil War, and for other purposes.

Mr. SMITH of Georgia. I object.

Mr. TOWNSEND. Mr. President, I had expected that the bill would be objected to at this time because I recognize that it is not the proper time to call up the bill when a majority of the Senate is not here. This, however, is a bill which was passed at the last session and which I am very anxious should receive the consideration of the Senate. I shall try immediately after the reconvening of the Senate to fix some day on which we can have a vote. I want to be as good as I can be to all Senators who have bills which they wish to have considered, but I am going to urge every means possible to secure a vote upon this bill at the proper time.

The PRESIDING OFFICER. The bill will go over.

TAX ON OPIUM, ETC.

The bill (S. 3526) to amend an act entitled "An act to provide for the registration of, with collectors of internal revenue, and to impose a special tax upon all persons who produce, import, manufacture, compound, deal in, dispense, sell, distribute, or give away opium or cocoa leaves, their salts, derivatives, or preparations, and for other purposes," was announced as next in order.

The PRESIDING OFFICER. This bill was considered as in Committee of the Whole on April 24 and an amendment suggested by the Senator from Kansas [Mr. THOMPSON] was stated but not agreed to. The question is on the amendment offered by the Senator from Kansas.

Mr. CHAMBERLAIN. In the absence of that Senator I suggest that the bill go over.

Mr. THOMAS. I understood that the Senator from Oklahoma [Mr. OWEN] objected to that bill. Consequently I assumed that he would object to its consideration now.

Mr. OWEN. I only objected to it on account of having introduced a rule with regard to "peyote" in Oklahoma. I ask that the bill may go over.

The PRESIDING OFFICER. The bill will go over.

WATER-POWER SITES.

The bill (S. 4971) to authorize the designation and withdrawal of water-power sites, and the construction of water power and other plants by the United States for the manufacture of nitrates, and for other purposes, was announced as next in order.

Mr. GALLINGER. Let that go over.

Mr. SMITH of Georgia. I think that bill has been disposed of by a provision in the Army reorganization bill, and it might be indefinitely postponed.

The PRESIDING OFFICER. Is there objection to the indefinite postponement of the bill?

Mr. SMITH of Georgia. Perhaps I had better not make that motion. Let it go over.

The PRESIDING OFFICER. Objection is made to the consideration of the bill at the present time, and it will go over.

COAL, PHOSPHATE, GAS, ETC.

The bill (H. R. 406) to authorize exploration for and disposition of coal, phosphate, oil, gas, potassium, or sodium was announced as next in order.

Mr. GALLINGER. Let that go over.

The PRESIDING OFFICER. It will go over.

COWLITZ INDIAN CLAIMS.

The bill (S. 2458) authorizing the Cowlitz Tribe of Indians residing in the State of Washington to submit claims to the Court of Claims was considered as in Committee of the Whole.

The bill was reported from the Committee on Indian Affairs with amendments.

The first amendment was, on page 2, line 3, after the words "The Court of Claims," to strike out the words "shall advance said cause upon the docket for hearing and," so as to read:

The Court of Claims shall have authority to determine and adjudge the rights, both legal and equitable, of said Cowlitz Tribe and of the United States in the premises, notwithstanding lapse of time or statutes of limitation.

The amendment was agreed to.

The next amendment was, on page 2, line 10, after the words "United States," to insert the following proviso:

Provided, That in no case shall any award covering all legal and equitable claims of said Cowlitz Tribe of Indians against the United States exceed the sum of $2,000,000.

The amendment was agreed to.

Mr. OWEN. I shall have to insist that that shall go under the same rule that is imposed upon the case in Oklahoma.

Mr. LANE. What is that rule?

Mr. OWEN. A rule that a report shall be made to Congress, and I shall move that the bill be amended accordingly. Otherwise I shall be compelled to ask that it go over.

Mr. JONES. I will offer an amendment to make it conform to that bill, because I doubt if we will have an opportunity to pass it again. I will ask the Senator to note the amendment as I suggest it. In line 6, after the word "Claims," I move to strike out the words "with the right of appeal to the Supreme Court of the United States," and in line 8, after the word "party," to strike out the words "for determination," so as to read:

That all claims of whatsoever nature, both legal and equitable, which the Cowlitz Tribe of Indians residing in the State of Washington may have or claim to have against the United States may be submitted to the Court of Claims by any party.

The amendment was agreed to.

Mr. JONES. On page 2, line 2, I move to strike out the words "enter judgment thereon" and insert "report its findings of fact and law to Congress."

The amendment was agreed to.

Mr. JONES. I suppose it would be just and proper to strike out the balance of the bill after the word "limitation," in line 7.

The PRESIDING OFFICER. The Secretary will state the amendment.

The SECRETARY. On page 2, line 7, after the word "limitation," strike out the comma and the remainder of the bill down to and including the word "cause," in line 8, on page 3, at the end of the bill.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

REGULATION OF IMMIGRATION.

The bill (H. R. 10384) to regulate the immigration of aliens to, and the residence of aliens in, the United States was announced as next in order.

Mr. LA FOLLETTE. Let that be passed over.

The PRESIDING OFFICER. Objection is made, and the bill will be passed over.

STEAMBOAT-INSPECTION SERVICE.

The bill (H. R. 449) to provide for the appointment of 11 supervising inspectors, Steamboat-Inspection Service, in lieu of 10, was considered as in Committee of the Whole.

Mr. CHAMBERLAIN. I desire to offer an amendment: On page 2, line 6, I move to insert the following proviso:

Provided, That the States of California and Oregon shall be included within the same steamboat inspection district.

Mr. JONES. I should like to ask the Senator from Oregon what change that makes?

Mr. CHAMBERLAIN. It simply leaves Portland, Oreg., and San Francisco in the same district.

Mr. JONES. How are they now?

Mr. CHAMBERLAIN. I was trying to find the report. I will find it in a moment.

Mr. JONES. As it is now, the Senator understands that Oregon, Washington, and Alaska are in one district?

Mr. CHAMBERLAIN. I will not be positive about that, I will say to the Senator. I thought I had the report at my desk, but I do not find it.

Mr. JONES. I have not any objection to the amendment.

Mr. CHAMBERLAIN. I will say to the Senator that I have been requested by the chamber of commerce of my city to ask for this amendment to the bill, and it was on their request that I offered the amendment.

Mr. JONES. The Senator has conferred with the department in reference to the desirability of it?

Mr. CHAMBERLAIN. No; I have not.

Mr. JONES. Of course, the bill has to go through the House, and I make no objection to the amendment.

Mr. CHAMBERLAIN. It can be amended there if there is any objection to it.

Mr. GALLINGER. It is a House bill.

Mr. FLETCHER. It is a House bill, and if any change is made it must be done in conference.

Mr. JONES. Being a House bill, it will go to conference if it is an important matter.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

CLAIMS OF SHAWNEE INDIANS.

Mr. OWEN. I should like to revert to the bill (S. 1098) to adjust and settle the claims of the loyal Shawnee and loyal Absentee Shawnee Tribe of Indians. It was objected to on the ground that it gave the Court of Claims the right to render judgment. I ask to be permitted to modify the bill so as to make the case of the loyal Shawnees conform to the Cowlitz case and the Ponca case.

The PRESIDING OFFICER (Mr. MYERS in the chair). Is there objection to recurring to the bill?

There being no objection, the bill was considered as in Committee of the Whole.

Mr. OWEN. On page 1, line 4, after the words "Court of Claims," I move to strike out the words "with right of appeal to the Supreme Court of the United States," and, in line 5, to strike out the word "adjudicate" and insert the word "hear," so as to read:

That jurisdiction is hereby conferred upon the Court of Claims to hear and determine as right and justice may require, and as upon a full and fair arbitration, the claims of the loyal Shawnees—

And so forth.

The amendment was agreed to.

Mr. OWEN. On page 2, line 3, after the word "time," I move to strike out the words "and the final judgment and satisfaction thereof shall be a full and final settlement of the claims of said Indians against the United States" and to insert "and to report the same to Congress."

The amendment was agreed to.

Mr. OWEN. In lines 15, 16, and 17, on page 2, I move to strike out the words "such suit on motion of either party shall be advanced on the docket of the Court of Claims and of the Supreme Court."

The amendment was agreed to.

Mr. OWEN. On page 3 I move to strike out all after the word "Indians," in line 2, in the following words:

The balance of any judgment rendered in favor of claimant Indians shall be placed in the Treasury of the United States to the credit of the Indians entitled thereto, and shall draw interest at the rate of 4 per cent per annum.

The amendment was agreed to.

Mr. OWEN. That merely leaves the bill so that a report is made to Congress of the facts and law bearing on the case.

The PRESIDING OFFICER. The bill was reported from the Committee on Indian Affairs with an amendment, which will be stated.

The SECRETARY. On page 2, line 11, after the word "Indians," strike out "entered into a contract on May 26, 1909, to represent them in the above matter" and insert "may enter into contract, with the approval of the Secretary of the Interior and Commissioner of Indian Affairs, as provided by law."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

As passed the bill reads:

Be it enacted, etc., That jurisdiction is hereby conferred upon the Court of Claims to hear and determine as right and justice may require, and as upon a full and fair arbitration, the claims of the loyal Shawnees and loyal Absentee Shawnees, either as a tribe or as individuals, against the United States, mentioned in the twelfth article of the treaty proclaimed October 14, 1868 (15 Stat., p. 513), and investigated and reported to Congress by the Interior Department, and to enter judgment

thereon, said claims to be considered without regard to lapse of time and to report the same to Congress.

SEC. 2. That suit under this act shall be begun by the filing of a single petition in the name of the Absentee Shawnee Tribe and the business committee as representative of the individual claimants, setting forth the claims of said Indians, to be verified by the attorneys with whom the claimant Indians may enter into contract, with the approval of the Secretary of the Interior and Commissioner of Indian Affairs, as provided by law. Official letters, papers, reports, and public records, or certified copies thereof, may be used as evidence, and in the event any original papers shall be lost, the court shall consider secondary evidence thereof, giving to the same such weight as to the court may seem proper. The compensation to be paid the attorneys for the claimant Indians shall be determined by the Court of Claims, but shall not exceed the amount provided in the contract between the claimant Indians and their attorneys, and shall be paid out of any sum or sums found and adjudged to be due said Indians.

The title was amended so as to read: "A bill to adjust and settle the claims of the loyal Shawnee and loyal Absentee Shawnee Tribe of Indians, and to report the same to Congress."

STOCK-RAISING HOMESTEADS.

The bill (H. R. 407) to provide for stock-raising homesteads, and for other purposes, was announced as next in order.

Mr. ASHURST. I wish to propose an amendment to the bill.

Mr. GALLINGER. Let it go over.

The PRESIDING OFFICER. Objection is made, and the bill goes over.

JAMES F. COLE.

The bill (S. 739) to remove the charge of desertion from the military record of James F. Cole was considered as in Committee of the Whole.

The bill was reported from the Committee on Military Affairs with an amendment to strike out all after the enacting clause and insert:

That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, James F. Cole, who was a private in Company E, Second Regiment Michigan Volunteer Cavalry, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a private of said company and regiment on the 25th day of May, 1864: *Provided*, That no pay nor bounty shall accrue or become payable by reason of the passage of this act.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill for the relief of James F. Cole."

MOSES CHAUNCEY.

The bill (S. 743) to remove the charge of desertion from the military record of Moses Chauncey was considered as in Committee of the Whole.

The bill was reported from the Committee on Military Affairs with an amendment to strike out all after the enacting clause and insert:

That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, Moses Chauncey, who was a private of Company M, Eighth Michigan Cavalry Volunters, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a member of said company and regiment on or about the 25th day of December, 1863: *Provided*, That no pay nor bounty shall accrue or become payable by reason of the passage of this act.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill for the relief of Moses Chauncey."

PUBLIC BUILDING AT GEORGETOWN, DEL.

The bill (S. 5503) to provide for the purchase of a site for the erection of a Federal building at Georgetown, Del., was considered as in Committee of the Whole. It directs the Secretary of the Treasury to expend a sum not exceeding $10,000 for the purchase of a site for the erection of a Federal building in the town of Georgetown, Del.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER.

The bill (S. 5206) for the relief of mail contractors was announced as next in order.

Mr. GALLINGER. Let that go over.

Mr. SMITH of Georgia. I did not intend to object to that bill.

Mr. GALLINGER. I objected.

The PRESIDING OFFICER. The bill will go over.

The bill (H. R. 12194) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, was announced as next in order.

Mr. SMITH of Georgia. I object.

The PRESIDING OFFICER. The bill is objected to, and the next bill will be stated.

CIRCUIT COURTS OF APPEAL.

The bill (S. 1308) to amend an act entitled "An act to establish circuit courts of appeals and to define and regulate in certain cases the jurisdiction of the courts of the United States, and for other purposes," approved March 3, 1911, was considered as in Committee of the Whole.

The bill was reported from the Committee on the Judiciary with an amendment to strike out all after the enacting clause and insert:

That the act entitled "An act to establish circuit courts of appeals and to define and regulate in certain cases the jurisdiction of the courts of the United States, and for other purposes," approved March 3, 1891, be, and the same is hereby, amended by adding at the end thereof an additional section, as follows:

"SEC. 16. In all suits wherein by the provisions of this act a review may be had as a matter of right in the Supreme Court of any final decision of a circuit court of appeals a right of review by the Supreme Court is hereby given of all decisions in such suits which reverse the judgment or decree of a district court and by the same procedure by which a review of such final decision can be obtained under the provisions of this act."

The amendment was agreed to.

The bill was reported to the Senate as amended and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to amend an act entitled, 'An act to establish circuit courts of appeals and to define and regulate in certain cases the jurisdiction of the courts of the United States, and for other purposes,' approved March 3, 1891."

CHILD LABOR.

The bill (H. R. 8234) to prevent interstate commerce in the products of child labor, and for other purposes, was announced as next in order.

Mr. NEWLANDS. The Senator from North Carolina [Mr. OVERMAN] told me that he wished to be present when this bill is considered.

The PRESIDING OFFICER. Objection is made——

Mr. NEWLANDS. I do not object myself, but I suggested——

The PRESIDING OFFICER. The bill has to be considered unless some one objects.

Mr. NEWLANDS. I suggest that the Senator from North Carolina be notified.

Mr. GALLINGER. Let the bill be passed over temporarily.

The PRESIDING OFFICER. Is there objection to that suggestion?

Mr. NEWLANDS. I suggest that it be passed over temporarily.

The PRESIDING OFFICER. Very well; it will be passed over.

COMMERCIAL PACIFIC CABLE CO.

The bill (S. 4866) to carry out the findings of the Court of Claims in the case of the Commercial Pacific Cable Co. was considered in Committee of the Whole. It directs the Secretary of the Treasury to pay to the Commercial Pacific Cable Co. $35,838.22, to reimburse that company for the cost of repairing certain damages done by the United States naval authorities to one of the company's cables in the harbor of San Luis d'Pra, Island of Guam, in September, 1907, as reported to Congress in Senate Document No. 88, Sixty-fourth Congress, first session.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

SERVICES ARISING UNDER NAVY DEPARTMENT.

The bill (H. R. 6651) providing for the payment for certain services arising under the Navy Department was considered as in Committee of the Whole. It directs the Secretary of the Treasury to pay the following sums of money to the respective claimants enumerated herein, the same being the amount due the claimants for service rendered under the Navy Department as certified to the House by letter from the Secretary of the Treasury March 25, 1914: To W. F. Durand, Stanford University, California, $228.05; to Burton McCullom, Bureau of Standards, Department of Commerce, $325; to Pay Director J. S. Phillips, United States Navy, $70; to Pay Inspector Z. W. Reynolds, United States Navy, $529.93; to R. P. Andrews Paper Co., Washington, D. C., $21.15.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

LESTER A. ROCKWELL.

The bill (S. 1362) for the relief of Lester A. Rockwell was considered as in Committee of the Whole. It provides that in the administration of the pension laws and laws governing the National Home for Disabled Volunteer Soldiers, or any branch thereof, Lester A. Rockwell, who was a private of Company G, First Regiment Connecticut Volunteer Cavalry, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a member of said company and regiment on the 29th of April, 1865, but that no pension shall accrue prior to the passage of this act.

Mr. GALLINGER. In line 11, after the word "pension," I move to insert the words "or other allowances," so that it will read:

Provided, That no pension or other allowances shall accrue prior to the passage of this act.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from New Hampshire.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

HEIRS OF MYRA CLARKE GAINES.

The bill (S. 3294) to appropriate a sum of money to pay Rhoda Menz, W. W. Christmas, and James M. Christmas, heirs of Myra Clarke Gaines, for certain lands in Louisiana, was considered as in Committee of the Whole. The bill had been reported from the Committee on Claims with an amendment in section 1, page 3, line 3, after the words "sum of," to strike out the figures "$200,000" and to insert "$48,071," so as to make the section read:

That the sum of $48,071 be, and the same is hereby, appropriated out of any money in the Treasury not otherwise appropriated, and that the same shall be paid by the Treasurer of the United States to Rhoda Menz, W. W. Christmas, and James M. Christmas, heirs at law of Myra Clarke Gaines, who shall prove their rights of inheritance.

The amendment was agreed to.

Mr. GALLINGER. I move to strike out section 2 of the bill. It is superfluous.

The PRESIDING OFFICER. The amendment proposed by the Senator from New Hampshire will be stated.

The SECRETARY. On page 3, after line 8, it is proposed to strike out section 2, as follows:

SEC. 2. That this act shall take effect from the date of its passage.

The amendment was agreed to.

Mr. GALLINGER. Mr. President, the Senator from Louisiana [Mr. BROUSSARD], who reported the bill, is not now in his seat. I was about to inquire how it chanced that the bill originally carried $200,000, and when reported that sum is reduced to $48,071? I have not had time to read the report of the committee, but knowing that the Senator from Louisiana is a very careful legislator, I shall not raise any objection to the bill, although it always strikes me as a suspicious circumstance when a large sum is named in a bill, and when the report comes in the amount is perhaps reduced three-fourths, or in this case more than that. I shall not, however, as I have said, object to the bill.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. GALLINGER. I move to strike out the preamble, as it recites facts that are included in the report.

The preamble was rejected.

SPANISH WAR CLAIMS OF KENTUCKY.

The bill (S. 2543) for the relief of the State of Kentucky was considered as in Committee of the Whole. It proposes that the claim of the State of Kentucky for reimbursement for expenses incurred by its governor in aiding the United States to raise the Volunteer Army for the War with Spain, arising under the act of Congress of July 8, 1898, and the acts amendatory thereto, which has heretofore been filed before the Treasury Department and disallowed because the claim had not been "filed and disallowed" before the passage of the amendatory act of April 27, 1904, shall be reopened, examined, and allowed in accordance with the second section of said act of April 27, 1904, and in accordance with the rulings of the accounting officers of the Treasury Department, heretofore made in claims of like character of other States, the allowance not to exceed in amount $1,400.44.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PRODUCTS OF CHILD LABOR.

Mr. NEWLANDS. Mr. President, I call the attention of the Senator from North Carolina [Mr. OVERMAN] to the fact that Order of Business 342, being the bill (H. R. 8234) to prevent interstate commerce in the products of child labor, and for other purposes, was called up during his absence, and that I called attention to the fact that it ought to be passed over until he could return.

The PRESIDING OFFICER. Is there objection to returning to the consideration of that bill?

Mr. OVERMAN. Mr. President, I suppose nobody desires that the bill shall be passed here at this time of day, with the Senate as it is. I do not propose to filibuster at all against the bill, but there are other Senators who are bitterly opposed to it who are not here to-day. So far as I am concerned, I repeat, I do not propose to filibuster on the bill. I had hoped some time might be set, say, the first Monday of next December, for its consideration. I do not know whether we shall reach it soon or not. I would be ready for its consideration, so far as I am concerned, when the bill properly comes up for discussion. I wish the bill discussed, and propose myself to discuss it, but I do not think we can discuss it this afternoon.

Mr. LA FOLLETTE. I ask unanimous consent, Mr. President, that the bill be taken up for consideration on the first Monday in July.

Mr. THOMAS. That will require a call of the roll.

Mr. SMITH of Georgia. Mr. President, I desire to suggest that there are a number of bills before that on the calendar, and I do not propose to give unanimous consent to take up such a bill for consideration ahead of its order on the calendar.

Mr. OVERMAN (to Mr. LA FOLLETTE). Make it the first Monday of December next.

Mr. SMITH or Georgia. The bill for vocational education precedes this bill, the judiciary bill precedes it, and a number of other bills precede it. Now, let us take up the calendar and dispose of these matters in their order.

Mr. LA FOLLETTE. I do not understand that the bill for vocational education is yet on the calendar.

Mr. SMITH of Georgia. Certainly; it is on the second page of the calendar. I tried to get it up, but it was objected to when it was reached on the calendar. I repeat, the bill for vocational education is on the second page of the calendar. It is No. 703, and has been objected to.

Mr. LA FOLLETTE. Because that bill was objected to, it does not follow that every other bill should be objected to.

Mr. SMITH of Georgia. I think we are entitled to call the calendar, not under a unanimous-consent agreement, but to dispose of business as we reach it.

Mr. LA FOLLETTE. Well, Mr. President, I will not submit a unanimous-consent request at this time, because I suppose that would necessitate a call of the roll and disclose the fact that there is no quorum. There are bills to which no objection can be taken that may be disposed of even without a quorum. Therefore I forbear to submit that request; but I shall do so, Mr. President, at a very early day, and press, with others who are in favor of this legislation, for its early consideration, even to the exclusion of bills that other Senators may think important.

Mr. OWEN. Mr. President, I am very greatly desirous of having the child-labor bill brought up and disposed of, but it is obvious that under the conditions to-day a unanimous-consent agreement is not possible without imparing the opportunity which we have of disposing of unobjected bills. At a very early opportunity, however, I shall join with other Senators and shall be prepared to make a motion that we proceed to the consideration of that measure and dispose of it.

BUILDING AND LOAN ASSOCIATIONS.

The bill (S. 5672) for the relief of sundry building and loan associations was considered as in Committee of the Whole.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to the several associations herein named, out of the moneys in the Treasury not otherwise appropriated, the sums herein specifically set forth, the same being a refund of the tax illegally collected from said associations under the excise act of August 5, 1909, namely:

To the Rapides Building & Loan Association, of Alexandria, La., $23.70.

To the Shreveport Building Association, of Shreveport, La., $929.47.

To the Sixth District Building & Loan Association, of New Orleans, La., $41.64.

To the Fidelity Homestead Association, of New Orleans, La., $70.26.

To the Union Homestead Association, of New Orleans, La., $190.98.

To the Iberia Building Association, of New Iberia, La., $723.55.

To the Teutonia Loan & Building Co., of New Orleans, La., $312.16.
To the Citizens' Homestead Association, of New Orleans, La., $21.63.
To the Portsmouth Savings & Loan Co., of Portsmouth, Ohio, $111.57.
To the Ninth West Columbia Permanent Building Association, of Baltimore, Md., $88.41.
To the State Mutual Building Association, of Baltimore, Md., $247.55.
To the Citizens' Saving & Loan Association Co., of Portsmouth, Ohio, $243.48.
To the Reliable Building & Loan Association, of Newark, N. J., $811.59.
To the Orvil Cooperative Building & Loan Association, of Allendale, N. J., $38.74.
To the Monticello Mutual Building & Loan Association, of Jersey City, N. J., $261.36.
To the Junior Order Building & Loan Association, of Newark, N. J., $228.61.
To the Ironbound District Building & Loan Association, of Newark, N. J., $97.28.
To the Hilton Building & Loan Association, of Newark, N. J., $134.82.
To the Duncan Building & Loan Association, of Jersey City, N. J., $47.46.
To the Columbia Building & Loan Association, of Jersey City, N. J., $201.05.
To the Commonwealth Building & Loan Association, of Newark, N. J., $77.40.
To the Woodlawn Building & Loan Association, of Jersey City, N. J., $10.95.
To the Boonton Building & Loan Association, of Boonton, N. J., $149.23.
To the Twelfth Ward Building & Loan Association, of Newark, N. J., $11.01.
To the Woodside Building & Loan Association, of Newark, N. J., $404.69.
To the State Mutual Building & Loan Association, of Los Angeles, Cal., $1,969.66.
To the Fidelity Savings & Loan Association, of Los Angeles, Cal., $2,392.29.
To the Kern County Mutual Building & Loan Association, of Bakersfield, Cal., $189.20.
To the Pasadena Building & Loan Association, of Pasadena, Cal. (formerly the Los Angeles County Mutual Building & Loan Association, of Pasadena), $62.74.
To the Home Builders' Loan Association, of Pomona, Cal., $117.55.
To the San Diego Building & Loan Association, of San Diego, Cal., $317.68.
To the Provident Mutual Building Loan Association, of Los Angeles, Cal., $4,403.12.
To the People's Mutual Building & Loan Association, of Bakersfield, Cal., $199.35.
To the Santa Fe Building Association, of San Bernardino, Cal., $571.90.
To the Home Investment Association, of Redlands, Cal., $157.65.
To the Western Loan & Building Co., of Salt Lake City, Utah, as successors to the Western Loan & Savings Co., $768.38.
To the Yakima Savings & Loan Association, of North Yakima, Wash., $121.54.
To the German Savings, Building & Loan Association, of Seattle, Wash., $37.54.
To the Pacific Building & Loan Association, of Tacoma, Wash., $268.33.
To the Jefferson County Building & Loan Association, of Birmingham, Ala., $1,034.59.
To the West Baltimore Building Association, of Baltimore, Md., $168.17.
To the Fidelity Building, Loan & Savings Co., of Columbus, Ohio, $541.28.
To the Trumbull Savings & Loan Co., of Warren, Ohio, $173.07.
To the Permanent Savings & Loan Co., of Akron, Ohio, $56.22.
To the Home Building Loan & Savings Co., of Coshocton, Ohio, $164.92.
To the Third Savings & Loan Co., of Piqua, Ohio, $151.23.
To the Cleveland Savings & Loan Co., of Cleveland, Ohio, $405.31.
To the Union Savings & Loan Co., of Cleveland, Ohio, $1,389.70.
To the People's Savings Association, of Columbus, Ohio, $835.61.
To the Allemania Building & Loan Co., of Columbus, Ohio, $10.58.
To the Cambridge Loan & Building Co., of Cambridge, Ohio, $122.82.
To the Bellefontaine Building & Loan Co., of Bellefontaine, Ohio, $194.44.
To the Centerburg Building & Loan Co., of Centerburg, Ohio, $331.10.
To the Central Ohio Building & Loan Co., of Columbus, Ohio, $353.68.
To the Citizens' Home & Savings Co., of Marysville, Ohio, $80.11.
To the Defiance Home Savings & Loan Association, of Defiance, Ohio, $269.58.
To the Delphos Savings & Loan Association Co., of Delphos, Ohio, $155.39.
To the Home Savings, Loan & Building Association Co., of Bryan, Ohio, $122.42.
To the Mutual Loan & Savings Association, of Chillicothe, Ohio, $105.45.
To the People's Savings & Loan Association, of Sidney, Ohio, $58.02.
To the Railroad Employees' Building & Loan Co., of Columbus, Ohio, $478.25.
To the Savings, Building & Loan Co., of Sandusky, Ohio, $50.08.
To the Star Building & Loan Co., of Ironton, Ohio, $338.70.
To the West Side Building & Loan Association, of Columbus, Ohio, $31.73.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, and read the third time.

Mr. GALLINGER. Mr. President, I do not rise to object to this bill, but rather to express regret that the author of the bill, who also reported it, is not present. I am a little puzzled to understand how it chanced that this illegal tax was levied upon building and loan associations in certain sections of the country and not in other sections. We have a great many such institutions in New England, but this legislation does not seem to apply to any one of those. Perhaps it could not apply to them. There may be some good reason for it. I simply want to suggest that for the record, with a view possibly to having the matter looked into further when it goes to the other House.

The PRESIDING OFFICER. The question is, Shall the bill pass?

The bill was passed.

CONVICT-MADE GOODS.

The bill (S. 4060) to limit the effect of the regulation of interstate commerce between the States in goods, wares, and merchandise wholly or in part manufactured, mined, or produced by convict labor or in any prison or reformatory, was announced as next in order.

The PRESIDING OFFICER. Objection is made.

Mr. SMITH of Georgia. Mr. President, this is a bill that I am very anxious to see passed. It has been favorably reported by the committee. It is not a bill that undertakes to invade the authority of the States, but only extends the regulations of the States, so that where they fix a limit as to the use of products or the sale of products manufactured by convict labor the rule of the States shall apply, even though the goods are imported into a State from some other State. If I can not proceed with the bill this afternoon, I hope we shall be able to have the bill considered in the near future.

BIRTHPLACE OF ABRAHAM LINCOLN.

The bill (H. R. 8351) to accept a deed of gift or conveyance from the Lincoln Farm Association, a corporation, to the United States of America, of land near the town of Hodgenville, county of Larue, State of Kentucky, embracing the homestead of Abraham Lincoln and the log cabin in which he was born, together with the memorial hall inclosing the same; and further, to accept an assignment or transfer of an endowment fund of $50,000 in relation thereto, was considered as in Committee of the Whole.

The bill had been reported from the Committee on the Library with amendments. The first amendment was, in section 1, page 1, line 5, after the words "possession of the," to strike out "President of the United States of America," and insert "Secretary of War"; on page 2, line 2, after the word "deed," to strike out "or" and insert "of"; in line 3, after the words "executed on the," to insert "eleventh"; in the same line, after the words "day of," to insert the word "April"; in line 4, after the word "and," to strike out "thirteen," and insert "sixteen"; so as to make the section read:

That the United States of America hereby accepts title to the lands mentioned in the deed of gift or conveyance now in possession of the Secretary of War, together with all the buildings and appurtenances thereon, especially the log cabin in which Abraham Lincoln was born and the memorial hall inclosing the same, which deed of conveyance was executed on the 11th day of April, 1916, by the Lincoln Farm Association, a corporation, to the United States of America, describing certain lands situated near the town of Hodgenville, county of Larue, State of Kentucky, which lands are more particularly identified and described in said deed or conveyance. The title to such lands, buildings, and appurtenances is accepted upon the terms and conditions stated in said deed or conveyance, namely: That the land therein described, together with the buildings and appurtenances thereon, shall be forever dedicated to the purposes of a national park or reservation, the United States of America agreeing to protect and preserve the said lands, buildings, and appurtenances, and especially the log cabin in which Abraham Lincoln was born and the memorial hall inclosing the same, from spoliation, destruction, and further disintegration, to the end that they may be preserved for all time, so far as may be; and further agreeing that there shall never be any charge or fee made to or asked from the public for admission to the said park or reservation.

The amendment was agreed to.

The next amendment was, in section 2, page 3, line 1, after the words "possession of the," to strike out "President of the United States of America," and insert "Secretary of War"; in line 3, after the words "executed on the," to insert "eleventh"; in the same line, after the words "day of," to insert "April," and in line 4, after the word "and," to strike out "thirteen," and insert "sixteen," so as to make the section read:

SEC. 2. That the United States of America hereby also accepts title to the endowment fund of $50,000 mentioned in the assignment and transfer, now in the possession of the Secretary of War, which assignment and transfer was executed on the 11th day of April 1916, by the Lincoln Farm Association, a corporation, to the United States of America, transferring and turning over all its rights, title, and interest in and to said endowment fund, heretofore invested in certain stocks, bonds, and securities held and owned by the Lincoln Farm Association, and more particularly identified and described in said assignment and transfer. The title to said endowment fund is accepted upon the terms and conditions stated in said assignment and transfer, namely, that the United States of America shall forever keep the said tract of land described in said deed, together with the buildings and appurtenances thereunto belonging, dedicated to the purpose of a national park or reservation, and that there shall never be any charge or fee made to or asked from the public for admission to the said park or reservation; and further, shall forever protect, preserve, and maintain said land, buildings, and appurtenances, and especially the log cabin in which Abraham Lincoln was born and the memorial hall inclosing the same,

from spoliation, destruction, and further disintegration, to the end that they may be preserved for all time, as far as may be, as a national park or reservation.

The amendment was agreed to.

Mr. LA FOLLETTE. Mr. President, I will detain the Senate only a moment; but I think, in connection with the acceptance of this property by the Federal Government, it is fitting that something of the history of the organization which has brought about the preservation of this memorial be made a part of the record of to-day's proceedings of the Senate.

I confess to feeling something of a personal interest in the matter. Richard Lloyd Jones, who I think was instrumental in first suggesting the idea which has culminated finally in the preservation of the birthplace and home of Lincoln, is a native of Wisconsin and a resident of the city of Madison, where I live. I have also a sentimental interest arising from the fact that my father was born upon the farm adjoining the Lincoln farm.

I asked Mr. Jones some time ago to write me a letter, stating in brief the circumstances which led to his taking up the subject originally; and, while he did not expect that his letter would be inserted in the RECORD, I am going to take the liberty of reading it into the RECORD myself.

WISCONSIN STATE JOURNAL,
Madison, Wis., April 18, 1916.

Hon. ROBERT M. LA FOLLETTE,
United States Senate.

DEAR SENATOR: You asked for a brief statement of the Lincoln farm movement. It is this:

In common with every American boy I grew up with an admiration for Lincoln and early began to collect books and stories of his life and had quite a creditable Lincoln library collected and much of it read when, in the summer of 1904, being then upon the editorial staff of Collier's Weekly, I found myself, in my editorial wanderings, in Kentucky with a day or two to spare. I used this time to visit his birthplace 2½ miles south of Hodgenville, the county seat of Larue County. (Lincoln was born in Hardin County. Larue County is part of the original Hardin County.) I found the farm in a state of sad neglect. Thomas Lincoln left the farm when Abraham was 7 years old. He sold it to a family by the name of Creal. Jude Creal, who was born in the cabin in which Lincoln was born and who was the son of the Creal that purchased the farm from Thomas Lincoln, sold the farm in 1885 to Mr. Dennett, a wealthy New York restaurant owner, who bought it with some patriotic idea in mind, but he never perfected any plan for the farm other than to remove the log cabin from its original site, marking the site from which it was taken and carefully numbering and cataloguing the logs and then exhibiting the cabin as a side show at the Chicago World's Fair, Pan American Exposition at Buffalo, St. Louis World's Fair, and other large fairs and expositions, the proceeds of which he gave to the Foreign Baptist Mission Society. When I first visited the farm the cabin was not there. It was in storage in a warehouse in Long Island City, N. Y. The farm had simply been neglected since Dennett bought it. Dennett was then in a sanitarium, not of sound mind, and his properties were involved in litigation I felt on that visit that some movement should be started to conserve this historic ground as national property. I retained a local lawyer in Hodgenville to advise me when this property might be subject to sale. On the 25th of August, 1905, I received a wire from this lawyer telling me that three days later the farm would be sold by court order at public auction on the steps of the courthouse at Hodgenville. I at once interested my friend, Robert J. Collier, the publisher of Collier's Weekly, in my plan, and he offered generous financial aid in the enterprise, and I hurried to Hodgenville and succeeded in bidding in the property at a very low figure, which would not have been possible except for the delay in the arrival of the two bidders who were eager to get the property for commercial purposes—one for distilling purposes, who would have been glad to have paid a high price for it. The distilling scheme, of course, grew out of the fact that there is a famous spring on this farm; the purity of its water is known through central Kentucky, and incidentally it is interesting to know that the only battleship that was ever christened with water was the battleship *Kentucky*, which was christened with water from the Lincoln birthplace spring. On the 28th of August, by virtue of this sale, I brought back the title of the property to Mr. Collier. We found we had been flooded with letters and telegrams coming from the news stories of the sale over the country and we at once organized the Lincoln Farm Association with the idea of raising an adequate sum of money to not only restore the log cabin to its original site but to build about it and over it a simple, strong, noble, enduring, granite memorial that would be in the nature of a national shrine, the story of which and the picture of which would find way into the geographies and school readers of the country as a constant reminder to the children of this country who are to be the future voters, that so long as they keep this country a pure democracy, even the boy of humblest birth may hope to rise to be the source of his country's greatest strength in its hour of greatest need. This was the inspiration in the movement and we invited the plain people of America to build this memorial by becoming members in the Lincoln Farm Association through the contribution of 25 cents or more to the memorial fund.

Gen. Horace Porter, Hon. Joseph H. Choate, Ex-President William H. Taft, Mr. August Belmont, Col. Henry Watterson, Jenkin Lloyd Jones—

Who, by the way, is the father of Richard Lloyd Jones and the pastor of the Lincoln Center Church in Chicago, which he has built up and which is a liberal church, where all may worship without regard to sect or belief—

Cardinal Gibbons, William Jennings Bryan, Justice Charles E. Hughes, Mr. Thomas Hastings, Mr. Sampel Gompers, Mr. Norman Hapgood and Miss Ida Tarbell (biographers of Lincoln), Hon. Oscar S. Straus, Hon. William Travers Jerome, Ex-Gov. Augustus E. Willson (of Kentucky), the late John A. Johnson (governor of Minnesota), the late Augustus Saint Gaudens, Dr. Albert Shaw (editor of the Review of Reviews), and Hon. Lyman J. Gage agreed to act as trustees of the association. Joseph W. Folk, then governor of Missouri, became the president of the association; Clarence H. Mackay, president of the Postal Telegraph Co., became its treasurer; Robert J. Collier, chairman of the executive committee; and Richard Lloyd Jones, the secretary of the association.

It was a five-years' campaign to raise the money and the endowment of $50,000, so that whether the property was finally put in the hands of the Government of the United States, where it properly belongs, or whether it was maintained through a private association, it would have all the necessary funds for upkeep.

On the 12th day of February, 1909, the centennial of Lincoln's birth, President Roosevelt delivered the centennial Lincoln address and laid the cornerstone of this memorial building. Though the farm is 2½ miles south of Hodgenville and Hodgenville is 60 miles south of Louisville, special trains were run to the farm on that occasion from Chicago, St. Louis, Cincinnati, New York, Nashville, Memphis, and many other cities, and over 17,000 people were on the ground.

On the 9th day of November, 1911, President Taft dedicated the completed memorial, at which time there was an equally large gathering on the grounds. During the four years since this memorial has been completed there has averaged over 15,000 visitors a year to this memorial, not including the crowds that have gathered there for special occasions and patriotic celebrations.

While this never would have come to pass but for my interest and enthusiasm in the idea, while I fathered the thing as secretary of the association engineered it, giving to it much labor and thought, and much more cash than I could afford to give, and while Mr. Collier, in the last report which he made to the meeting of the trustees of the association recently held in New York, very generously voiced the gratitude of the directors to me for bringing this thing into being, it would be unfair to give me credit for the whole enterprise, because, however great may have been my enthusiasm for the idea, it would have been impossible to bring to fruition without the very generous contribution of not only cash but labor of love given to the work, first by Mr. Collier himself and second by Mr. Mackay, for it was we three rather than any one of us who got together regularly once a week for five years and piloted the enterprise through to success. Of course, I "got together" once a day for an hour or so, but these two friends of mine should be given big credit for the fine and generous part they played in the enterprise. I think this covers all the ground you will want.

As a by-product of the enterprise the State of Kentucky, after the Lincoln Farm Association was well under way in its work, appropriated by legislative enactment $2,500 for a tablet to be erected in Hodgenville, which would bear the inscription that "On the 12th day of February, 1809, two and one-half miles south of this town, Abraham Lincoln was born." Through my interest in this, by virtue of my having been appointed on the commission to spend this $2,500 by Senator Beckham, then governor of Kentucky, we secured an additional appropriation of $10,000 from the Congress of the United States and $2,500 from individuals in Louisville, so that, with $15,000 instead of $2,500, we procured the beautiful and famous statue of Lincoln, by Adolph A. Weinman, which now stands in the courthouse square at Hodgenville, and, of course, it was through my initiative that a replica of that went to the campus of the University of Wisconsin. In addition to this, I interested Gov. Willson in an effort—which he made successful—in raising money for a second statue of Lincoln by Mr. Weinman, which now stands in the rotunda of the State Capitol at Frankfort.

Always faithfully, yours,

RICHARD LLOYD JONES.

The PRESIDING OFFICER (Mr. CHILTON in the chair). If there be no further amendments to be proposed, the bill will be reported to the Senate.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read three times, the question is, Shall it pass?

Mr. FLETCHER. There are certain amendments, I believe.

The PRESIDING OFFICER. They have been agreed to.

Mr. FLETCHER. I think these gentlemen have done very noble work and have rendered great public service toward this undertaking.

The PRESIDING OFFICER. The question is on the passage of the bill.

The bill was passed.

EXCLUSION OF INTOXICATING LIQUORS FROM NATIONAL PARKS AND FOREST RESERVES.

The bill (S. 4862) to exclude intoxicating liquors from national parks and national forest reserves was considered as in Committee of the Whole. It prohibits, from and after its approval, the issuance by any officer or employee of the United States to any lessee, permittee, concessioner, or other person, firm, or corporation whatsoever, of any permit or authority for the sale or dispensing of intoxicating liquors of any kind (including beer, ale, and wine) in any national park or national forest reserve, and directs the Secretary of the Interior and the Secretary of Agriculture to take all necessary measures to carry the bill into full force and effect.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. GALLINGER. Mr. President, it is now 3 o'clock on Saturday afternoon. There is only a small attendance of Senators, and we can not pass any controverted bills. I will ask the Senator from Indiana [Mr. KERN] if we may not adjourn at this time.

Mr. FLETCHER. Mr. President, I think we could clear up a good many bills on the calendar with no sort of inconvenience or discomfort to Senators. I think we are accomplishing a good deal by getting rid of a number of items that are not objected to at all.

Mr. SMITH of Georgia. I want to say to the Senator that I am not going to ask that House bill 13486 shall go over.

Mr. GALLINGER. It is a gratification to me to know that.

Mr. SMITH of Georgia. That falls within a different class.

Mr. GALLINGER. I have no disposition to force an adjournment by asking for a quorum; so I will withdraw for the present the suggestion I made and let us proceed a little further.

Mr. OWEN. I should like to call attention to the fact that we began the consideration of the calendar this time at the beginning, instead of starting where we left off before, so that it has been somewhat unfair to the unobjected bills at the latter end of the calendar.

Mr. GALLINGER. I have no objection to going along.

PENSIONS AND INCREASE OF PENSIONS.

The bill (H. R. 13486) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Pensions, with amendments.

The first amendment of the Committee on Pensions was on page 1, after line 5, to strike out:

The name of James C. Baker, late of Company G, Sixth Regiment Missouri State Militia Cavalry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 2, line 5, before the words "per month," to strike out "$50" and insert "$40," so as to make the clause read:

The name of Murray Myers, late of Company C, Forty-fourth Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

Mr. CURTIS. Mr. President, I hope that amendment will not be agreed to. The man has had a paralytic stroke and is confined to his house, and requires the care and attention of another person. He is also totally blind.

The PRESIDING OFFICER. The question is upon agreeing to the amendment of the committee.

The amendment was rejected.

The next amendment was, on page 2, line 9, before the words "per month," to strike out "$50" and insert "$40," so as to make the clause read:

The name of William C. Hershberger, late of Company A, Fifteenth Regiment Iowa Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

Mr. CURTIS. I hope that amendment will not be agreed to. That man is nearly blind and is suffering from disabilities contracted in the service. He is in very poor circumstances and has no income except his pension and needs the increase.

Mr. SMITH of Georgia. How long did he serve in the Army?

Mr. CURTIS. My recollection is that he had a long service, over three years. I thought I had the papers here. I did not expect to have the case come up to-day or I would have had them here. He had a long service, though, and a good service.

Mr. SMITH of Georgia. Has he raised any children?

Mr. CURTIS. None upon whom he can depend for support.

Mr. SMITH of Georgia. Does not the Senator think that every parent ought to have the right to depend upon every child for support?

Mr. CURTIS. I think so, if they are able to support the parent; but this is, indeed, a very meritorious case. I know the man personally and know of his condition.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee. [Putting the question.] By the sound, the "ayes" appear to have it.

Mr. CURTIS. I ask for a division.

The PRESIDING OFFICER. Those in favor of the amendment will rise. [A pause.] Those opposed will rise. [A pause.] The amendment is rejected.

The next amendment was, on page 4, after line 2, to strike out:

The name of Chesley Goldsby, late of Companies A and B, Eighteenth Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $27 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 5, after line 3, to strike out:

The name of Lucretia P. Kill, widow of Darius Kill, late of Company A, One hundred and fifty-second Regiment New York Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving

The amendment was agreed to.

The next amendment was, on page 6, after line 16, to strike out:

The name of Mary Ellen Thomas, widow of Charles R. B. Thomas, late of Company D, Thirty-second Regiment Illinois Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 6, after line 20, to strike out:

The name of Maggie Nelson, former widow of Alonzo Nelson, late of Company A, Seventeenth Regiment Wisconsin Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 7, line 19, after the word "Infantry," to insert "and former widow of William H. Rudd, late of Company I, One hundred and forty-fifth Regiment Illinois Volunteer Infantry," so as to make the clause read:

The name of Martha O. Balch, widow of William Balch, late of Company B, Fifty-fourth Regiment Illinois Volunteer Infantry, and former widow of William H. Rudd, late of Company I, One hundred and forty-fifth Regiment Illinois Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 8, line 10, before the word "Infantry," to strike out "Volunteer," so as to make the clause read:

The name of Frederick Wulff, late of Company I, Second Regiment United States Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 8, line 24, before the words "per month," to strike out "$30" and insert "$36," so as to make the clause read:

The name of William Foster, late of Company B, First Battalion Sharpshooters Maine Infantry, and Company B, Twentieth Regiment Maine Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 12, line 8, before the words "per month," to strike out "$36" and insert "$30," so as to make the clause read:

The name of Leslie R. Hyde, late of Company D, One hundred and thirty-fourth Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 13, line 8, after the name "Brackett's," to strike out "Battery" and insert "battalion," so as to make the clause read:

The name of George W. Beebe, late of Company D, Brackett's battalion, Minnesota Volunteer Cavalry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 13, after line 17, to strike out:

The name of Stephen B. Garrigus, late of Company H, Fifty-third Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 14, after line 20, to strike out:

The name of Henry Thompson, late unassigned, Seventy-ninth Regiment United States Colored Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 15, after line 16, to strike out:

The name of Mary Ann Bourke, widow of John Bourke, late of Company G, First Regiment Michigan Volunteer Engineers and Mechanics, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 16, line 7, before the words "per month," to strike out "$30" and insert "$24," so as to make the clause read:

The name of Peter Weber, late of Company C, First Regiment Minnesota Volunteer Heavy Artillery, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 16, line 12, before the words "per month," to strike out "$24" and insert "$25," so as to make the clause read:

The name of Julia W. Simpson, widow of John Simpson, late first lieutenant and quartermaster Ninety-ninth Regiment Pennsylvania Volunteer Infantry, and pay her a pension at the rate of $25 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 18, line 4, before the words "per month," to strike out "$40" and insert "$30," so as to make the clause read:

The name of Adelaide E. Kennedy, widow of Ronald A. Kennedy, late of Company K, Third Regiment, and lieutenant colonel Fifth Regiment, Vermont Volunteer Infantry, and pay her a pension at the rate of $30 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 18, line 22, before the words "per month," to strike out "$30" and insert "$25," so as to make the clause read:

The name of Anna E. Ritchey, widow of Adelbert L. Ritchey, late assistant surgeon, Sixteenth Regiment Illinois Volunteer Infantry, and surgeon, Tenth Regiment Illinois Veteran Volunteer Infantry, and pay her a pension at the rate of $25 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 18, after line 23, to strike out:

The name of Ann M. Coady, widow of William J. Coady, late of Company H, Nineteenth Regiment Indiana Volunteer Infantry, and Company B, Second Regiment United States Veteran Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 21, after line 6, to strike out:

The name of Julia L. Hulbert, former widow of Charles E. Hulbert, late of Companies A and B, Ninety-fourth Regiment New York Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 21, after line 22, to strike out:

The name of George Shults, late of Company C, Seventh Regiment West Virginia Volunteer Cavalry, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 24, after line 14, to strike out.

The name of Benjamin F. Patterson, late of Company G, First Regiment Provisional Enrolled Missouri Militia, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 25, line 9, before the words "per month," to strike out "$30" and insert "$24," so as to make the clause read:

The name of Aaron B. Stutzman, late of Company A, One hundred and sixty-ninth Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to,

The next amendment was, on page 25, line 17, before the words "per month," to strike out "$50" and insert "$40," so as to make the clause read:

The name of John F. Williams, late of Company F, Eighteenth Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The amendment was agreed to:

The next amendment was, on page 26, line 9, before the words "per month," to strike out "$30" and insert "$24," so as to make the clause read:

The name of Robert Jolley, late of Company H, One hundred and forty-third Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 26, after line 19, to strike out:

The name of David T. McFarland, late of Company F, Sixth Regiment Iowa Volunteer Infantry, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, at the top of page 28, to strike out:

The name of Laura A. Hayner, widow of George W. Hayner, late of Company F, One hundred and twenty-fifth Regiment New York Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 29, line 3, after the word "determine," to strike out:

And provided further, That in the event of the death of Mary Winegardner the name of said Carrie Winegardner shall be placed on the pension roll, subject to the provisions and limitations of the pension laws, at the rate of $12 per month from and after the date of death of said Mary Winegardner.

So as to make the clause read:

The name of Mary Winegardner, widow of Samuel Winegardner, late of Company A, Eighth Regiment, and Company K, Forty-first Regiment, Illinois Volunteer Infantry, and pay her a pension at the rate of $24 per month in lieu of that she is now receiving: *Provided*, That in the event of the death of Carrie Winegardner, helpless and dependent child of said Samuel Winegardner, the additional pension herein granted shall cease and determine.

The amendment was agreed to.

Mr. GALLINGER. Mr. President, unless my copy is a misprint, I will ask the Secretary to turn to page 20, line 7. The committee have stricken out the words "The name of Julia L. Hulbert, former widow of Charles," and then what follows has not any meaning to it.

The PRESIDING OFFICER. The Chair will inform the Senator that the Secretary is handling a reprint of the bill, which is correct.

The SECRETARY. As the item appears here, it reads:

The name of Barbara A. Mott, widow of George Mott, late of Companies K and D, Ninety-fifth Regiment New York Volunteer Infantry, and pay her a pension at the rate of $12 per month.

Mr. CURTIS. Mr. President, at the bottom of page 14 is the item relating to Henry Thompson. I will ask what action has been taken with reference to that?

The PRESIDING OFFICER. That amendment has been agreed to.

Mr. CURTIS. I ask unanimous consent to reconsider that amendment.

The PRESIDING OFFICER. Is there objection to granting unanimous consent to reconsider the vote whereby the amendment was agreed to?

Mr. THOMAS. What is the amendment?

Mr. CURTIS. It strikes out an item giving a pension of $24 a month to Henry Thompson, of Topeka, Kans., an old colored man who was only given a service of two months and seven days, but who, as a matter of fact, served over four years. He was the body servant of Gen. Blunt, and served all the time. The evidence shows he wore his uniform and carried a gun and took part the same as other soldiers, but he was only a body servant, and he is only given, in the War Department, a record of two months and seven days of service. He is a man about 70 years old. He is nearly blind, and is suffering from motor paralysis. He is in destitute circumstances, and it seems to me the increase is justifiable. It is only $24, from $15 that he is drawing now.

The PRESIDING OFFICER. Is there objection to the reconsideration?

Mr. STERLING. Mr. President, I think perhaps I ought to call the attention of the Senate to the report of the committee in this case. The Senator from Kansas has already stated the length of service as being two months and seven days. The man had no pensionable status, therefore, under the general law in regard to pensions, not having served the required time of 90 days. I read a paragraph from the report of the committee:

From testimony filed in support of this bill and that at the Bureau of Pensions it appears that the claimant had four years' actual service in the service above named, as bodyguard to Gen. Blunt, having been informed that such service, in the event of his becoming disabled, was a pensionable service, and it was on the strength of this information that the former bill was approved by Congress.

I think the Senator from Kansas has made correct statements in regard to the disabilities of this claimant.

The PRESIDING OFFICER. Is there objection to granting unanimous consent to reconsider the action of the Senate in agreeing to the amendment of the committee? The Chair hears none. The question is on agreeing to the amendment of the committee. [Putting the question.] By the sound the "ayes" seem to have it.

Mr. CURTIS. I ask for a division.

The PRESIDING OFFICER. Those in favor of the amendment will rise. [A pause.] Those opposed will rise. [A pause.] The amendment is agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

BILLS PASSED OVER.

The bill (H. R. 13620) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, was announced as next in order.

Mr. SMITH of Georgia. Mr. President, I think that bill had better go over.

The PRESIDING OFFICER. Objection being made, the bill will be passed over.

The bill (S. 3069) to amend an act entitled "An act to amend an act entitled 'An act to amend an act entitled "An act to regulate commerce,"' approved February 4, 1887, and all acts amendatory thereof, and to enlarge the powers of the Interstate Commerce Commission," approved March 4, 1915, was announced as next in order.

Mr. OVERMAN. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

LANDS IN IDAHO.

The bill (S. 3618) authorizing the Secretary of the Interior to subdivide the southeast quarter of section 18, township 46

north, range 4 west, Boise meridian (the same being that portion of the town site of Plummer, Benewah County, Idaho, not yet platted), into 5-acre tracts for sale, and for other purposes, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Public Lands with an amendment to strike out all after the enacting clause and insert:

That the Secretary of the Interior be, and he is hereby, authorized and directed to cause to be subdivided that part of the town site of Plummer, Coeur d'Alene Reservation, Idaho (which town site was created under the act of June 21, 1906; 34 Stat. L., 325, 337), described as the southeast quarter of section 18, township 46 north, range 4 west, into streets or roads and into tracts of not exceeding 5 acres each; and to cause the tracts to be appraised, except such as are hereinafter reserved for the town of Plummer, and sold at not less than their appraised value.

SEC. 2. That the Secretary of the Interior is also authorized and directed to cause a patent to be issued to the town of Plummer for 5 acres of land so subdivided for the purpose of a reservoir site for the Plummer waterworks system, described as the east half of the northeast quarter of the southeast quarter of the southeast quarter of section 18, township 46 north, range 4 west, as well as 10 acres of the land so subdivided for the purpose of a public park described as the northwest quarter of the northwest quarter of the southeast quarter of section 18, same township and range as above.

SEC. 3. That the purchase price of the tracts authorized to be sold shall be paid at such times and in such installments and upon such terms as the said Secretary may direct, and he shall cause 20 per cent of the net proceeds arising from said sale to be set apart and expended under his direction in the construction of schoolhouses or other public buildings or improvements within said town site.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill authorizing the Secretary of the Interior to subdivide a part of the town site of Plummer, Idaho, and for other purposes."

BILL PASSED OVER.

Mr. OVERMAN. Mr. President, I withdraw my objection to the consideration of Senate bill 3069.

Mr. BRANDEGEE. Mr. President, I think I will renew the objection.

The PRESIDING OFFICER. Objection being made, the bill will be passed over.

ISLANDS IN MINNESOTA.

The bill (S. 4287) to grant unsurveyed islands to the State of Minnesota for forestry purposes, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Public Lands, with amendments.

The first amendment was, on page 1, line 3, after the word "That," to insert "the Secretary of the Interior is hereby authorized to cause to be surveyed," so as to read:

That the Secretary of the Interior is hereby authorized to cause to be surveyed the unsurveyed islands in lakes and streams north of latitude 46°, in the State of Minnesota.

The amendment was agreed to.

Mr. OVERMAN. Mr. President, almost everybody has left, and I suggest to the Senator from Indiana that we may as well adjourn.

The PRESIDING OFFICER. Objection being made, the bill will be passed over.

THOMAS S. JOHNSON.

The bill (H. R. 3794) for the relief of Thomas S. Johnson, was considered as in Committee of the Whole. It authorizes and directs the Secretary of the Treasury to pay, out of any money in the Treasury not otherwise appropriated, to Thomas S. Johnson, of Beaver Dam, Wis., late chaplain One hundred and twenty-seventh Regiment United States Colored Volunteer Infantry, the pay and allowances of a chaplain of Infantry from November 4 to December 14, 1864, not to exceed $200.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

OSCAR R. HOWARD.

The bill (H. R. 7804) to authorize the issuance of patent to Oscar R. Howard, and for other purposes, was considered as in Committee of the Whole. It authorizes and directs the Secretary of the Interior, in consideration of improvements and payments made for and residence upon the land, to issue patent to Oscar R. Howard for lot 3, section 10, and lots 15, 16, and 17, section 15, township 13 north, range 8 west, Indian meridian, Oklahoma, containing 87.78 acres of land, more or less, without payment of the balance of purchase price due under the sale heretofore held, pursuant to act of Congress approved June 17, 1910, entitled "An act to open to settlement and entry under the general provisions of the homestead laws of the United States, certain lands in the State of Oklahoma, and for other purposes."

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ELIZABETH DAVIS.

The bill (S. 3617) for the relief of Elizabeth Davis, was considered as in Committee of the Whole. It authorizes and directs the Secretary of the Interior to issue patent to Elizabeth Davis for the east half of the northwest quarter, northeast quarter of the southwest quarter, and the northwest quarter of the southeast quarter, section 28, township 47 north, range 3 east, of the Boise meridian, lying within the Coeur d'Alene National Forest, in the State of Idaho.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

FRED WHITE.

The joint resolution (S. J. Res. 113) for the relief of Fred White was considered as in Committee of the Whole.

The joint resolution was read, as follows:

Whereas through the mistake in the acceptance by the officials of the land office at Lewiston, Idaho, of the homestead application of Fred White, who located upon land included within the Nez Perce Indian Reservation and made improvements thereon to the extent of $1,500 before the mistake was discovered: Therefore be it

Resolved, etc., That the Secretary of the Treasury is hereby authorized to pay to said Fred White, of Kooskia, Idaho, the sum of $600, which amount is hereby appropriated out of any money in the United States Treasury not otherwise appropriated.

The PRESIDING OFFICER. Without objection, the word "said" will be stricken from the joint resolution. It seems to be an error.

The joint resolution was reported to the Senate, without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

The PRESIDING OFFICER. Without objection, the preamble will stand as reported.

BILLS PASSED OVER.

The bill (S. 793) modifying and amending the act providing for the disposal of the surplus unallotted lands within the Blackfeet Indian Reservation, Mont., was announced as next in order.

Mr. STERLING. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 833) to provide that petty officers, noncommissioned officers, and enlisted men of the United States Navy and Marine Corps on the retired list who had creditable Civil War service shall receive the rank or rating and the pay of the next higher enlisted grade was announced as next in order.

Mr. OVERMAN. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 1807) to reinstate Elwin Carlton Taylor as a passed assistant surgeon in the United States Navy was announced as next in order.

Mr. OVERMAN. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

JOHN B. BOSTICK.

The bill (S. 3020) waiving the age limit for admission to the Medical Corps of the United States Navy in the case of John B. Bostick was considered as in Committee of the Whole. It waives the age limit for admission to the Medical Corps of the United States Navy, as an assistant surgeon, during a period of one year from the date of passage of the bill, in the case of John B. Bostick, in consideration of his previous naval service.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PENSIONS AND INCREASE OF PENSIONS.

The bill (H. R. 14484) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war was considered as in Committee of the Whole.

The bill had been reported from the Committee on Pensions with amendments.

The first amendment of the Committee on Pensions was, on page 3, after line 6, to strike out:

The name of Pauline R. Wolf, former widow of Hermann Rohde, late of Battery F, Second Regiment Missouri Volunteer Light Artillery, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 3, after line 18, to strike out:

The name of Mariah W. Smith, former widow of Robert J. Wilson, late of Company K, Two hundred and seventh Regiment Pennsylvania

Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 3, line 19, after the word "Maston," to strike out "C" and insert "G," so as to read:

The name of Mary Jane Strong, widow of Maston G. Strong, late of Company G, Fifty-third Regiment Ohio Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 4, line 24, before the word "Regiment," to strike out "Thirty-fourth" and insert "Twenty-fourth," so as to make the clause read:

The name of James Parmer, late of Company I, Twenty-fourth Regiment Missouri Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 5, after line 14, to strike out:

The name of Levi Coon, late of Company E, Fifty-third Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 5, after line 18, to strike out:

The name of Francis M. Cain, late of Company L, Third Regiment West Virginia Volunteer Cavalry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 6, line 11, after the surname "Gillespie," to insert "widow of Thomas J. Gillespie, late of Company B, Fifty-fifth Regiment Pennsylvania Emergency Militia Infantry, and," so as to make the clause read:

The name of Harriet C. Gillespie, widow of Thomas J. Gillespie, late of Company B, Fifty-fifth Regiment Pennsylvania Emergency Militia Infantry, and former widow of William T. Stevenson, late commissary sergeant, Fifth Regiment Pennsylvania Volunteer Heavy Artillery, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 8, after line 2, to strike out:

The name of Mary M. Duffy, former widow of Lawson Duffy, late of Company E, Ninth Regiment West Virginia Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 10, line 12, after the word "First" to insert "Regiment," so as to make the clause read:

The name of Collins Washburn, late of Battery F, First Regiment Ohio Light Artillery, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 11, after line 21, to strike out:

The name of Adeline Lampman, widow of Isaac Lampman, late of Company G, Ninety-eighth Regiment New York Volunteer Infantry, and Company I, Twenty-sixth Regiment New York Volunteer Cavalry, and pay her a pension at the rate of $20 per month.

The amendment was agreed to.

The next amendment was, on page 13, line 17, before the words "per month," to strike out "$30" and insert "$24," so as to make the clause read:

The name of Daniel V. Hamilton, late of Company B, Thirty-first Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 14, line 9, before the words "per month," to strike out "$30" and insert "$24," so as to make the clause read:

The name of Henry R. Thomas, late of Company I, One hundred and ninety-seventh Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 14, line 13, before the words "per month," to strike out "$40" and insert "$36," so as to make the clause read:

The name of Noble Bryant, late of Company H, Sixth Regiment Kentucky Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 15, after line 14, to strike out:

The name of Julia A. Slaybaugh, former widow of Levi Slaybaugh, late of Company I, Seventy-first Regiment Ohio Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 17, after line 20, to strike out:

The name of Mary T. Green, former widow of Thaddeus Albert, late of Company F, Eighty-fourth Regiment Pennsylvania Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 18, after line 4, to strike out:

The name of Gurney E. Hall, helpless and dependent child of Elijah P. Hall, late of Company D, Seventh Regiment Ohio Volunteer Cavalry, and pay him a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 18, after line 12, to strike out:

The name of Sarah J. Milligan, widow of James G. Milligan, late of Company D, Twenty-second Regiment Kentucky Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 19, after line 22, to strike out:

The name of Augusta Anderson, widow of Frank W. Anderson, late of Companies I and D, Ninth Regiment Connecticut Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 20, line 5, before the words "per month," to strike out "$24" and insert "$20," so as to make the clause read:

The name of Catherine Brennan, widow of John P. Brennan, late captain of the hold, United States Navy, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 20, line 15, after the surname "Benjamin," to insert "widow of Howard Benjamin, late of Company C, One hundred and seventy-ninth Regiment New York Volunteer Infantry, and," so as to make the clause read:

The name of Sarah E. Benjamin, widow of Howard Benjamin, late of Company C, One hundred and seventy-ninth Regiment New York Volunteer Infantry, and former widow of Henry Ellison, late of Company D, One hundred and seventy-ninth Regiment New York Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 21, after line 2, to strike out:

The name of Elizabeth Denges, former widow of George Denges, late of Company E, Seventy-fourth Regiment Pennsylvania Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 22, line 9, before the words "per month," to strike out "$50" and insert "$40," so as to make the clause read:

The name of Joseph C. Yutzy, late of Company C, Fifty-fourth Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 22, line 22, before the words "per month," to strike out "$30" and insert "$24," so as to make the clause read:

The name of Walter J. Wall, late of Fourth Independent Company, Ohio Volunteer Cavalry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was on page 23, after line 19, to strike out:

The name of Sarah H. Matheny, widow of Nathaniel B. Matheny, late of Company D, Seventeenth Regiment Ohio Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was on page 24, line 1, before the words "per month," to strike out "$30" and insert "$24," so as to make the clause read:

The name of Charles Claudius Early, late of Company D, Forty-sixth Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was on page 24, after line 6, to strike out:

The name of George W. Alt, late of Company A, Twenty-second Regiment Iowa Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was on page 24, after line 15, to strike out:

The name of George Vansickle, late of Company B, One hundred and eighty-fifth Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $30 per month.

The amendment was agreed to.

The next amendment was on page 26, line 5, before the words "per month," to strike out "$50" and insert "$36," so as to make the clause read:

The name of Homer Day, late of Company H, One hundred and seventieth Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was on page 28, after line 12, to strike out:

The name of Hollingsworth Gipe, late of Company C, First Regiment Maryland Volunteer Cavalry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was on page 29, line 24, before the words "per month," to strike out "$20" and insert "$12," so as to make the clause read:

The name of Orilla F. Porter, widow of Milo Porter, late of Companies F and E, Sixteenth Regiment Wisconsin Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 31, line 5, after the surname "Clevenger," to insert "widow of William F. Clevenger, late of Company A, Forty-eighth Regiment Iowa Volunteer Infantry, and," so as to make the clause read:

The name of Jemima Clevenger, widow of William F. Clevenger, late of Company A, Forty-eighth Regiment Iowa Volunteer Infantry, and former widow of Henry Richardson, late of Company M, Twelfth Regiment Illinois Volunteer Cavalry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 33, line 22, before the words "per month," to strike out "$30" and insert "$20," so as to make the clause read:

The name of Adelbert Price, late of Company H, Fifteenth Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $20 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 34, line 3, after the surname "Farr," to insert "widow of Albert J. Farr, late of Company C, Second Regiment Michigan Volunteer Cavalry, and," so as to make the clause read:

The name of Kitty E. Farr, widow of Albert J. Farr, late of Company C, Second Regiment Michigan Volunteer Cavalry, and former widow of Charles McCoy, late of Company D, Fifth Regiment Wisconsin Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, on page 34, line 8, after the surname "Phillips," to insert "widow of William A. Phillips, late of Companies A and F, Sixty-third Regiment Indiana Volunteer Infantry, and," so as to make the clause read:

The name of Mariah L. Phillips, widow of William A. Phillips, late of Companies A and F, Sixty-third Regiment Indiana Volunteer Infantry, and former widow of Nathaniel Edwards, late of Company F, Twenty-second Regiment, and Company D, One hundred and fiftieth Regiment, Indiana Volunteer Infantry, and pay her a pension at the rate of $12 per month

The amendment was agreed to.

The next amendment was, on page 34, after line 14, to strike out:

The name of Elizabeth Wolliver, former widow of Selah Baxter, late of Company G, Twenty-sixth Regiment Michigan Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The amendment was agreed to.

The next amendment was, at the top of page 35 to strike out:

The name of Josephine Sibley, widow of Solomon Sibley, late of Company D, Second Battalion, District of Columbia Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 35, line 8, before the words "per month," to strike out "$30" and insert "$25," so as to make the clause read:

The name of Celia F Congdon, widow of George B. Congdon, late major and additional paymaster, United States Volunteers, and pay her a pension at the rate of $25 per month in lieu of that she is now receiving.

The amendment was agreed to.

The next amendment was, on page 39, line 5, after the words "name of," to strike out "Davis" and insert "David," so as to make the clause read:

The name of David S. Milliken, late of Company B, Third Regiment New York Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The amendment was agreed to.

The next amendment was, on page 39, line 17, before the words "per month," to strike out "$32" and insert "$24," so as to make the clause read:

The name of Sarah E. McCann, widow of Francis McCann, late of Company K, Fourth Regiment Rhode Island Infantry, and First Company, Second Battalion, Veteran Reserve Corps, and pay her a pension at the rate of $24 per month in lieu of that she is now receiving: *Provided*, That in the event of the death of Francis E. McCann, helpless and dependent child of said Francis McCann, the additional pension herein granted shall cease and determine: *Provided further*, That in the event of the death of Sarah E. McCann the name of said Francis E. McCann shall be placed on the pension roll, subject to the provisions and limitations of the pension laws, at the rate of $12 per month from and after the date of death of said Sarah E. McCann.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

HOSPITAL CORPS OF THE NAVY.

The bill (S. 4054) to reorganize and increase the efficiency of the personnel of the Hospital Corps of the United States Navy, and for other purposes, was announced as next in order.

Mr. OVERMAN. Let that go over.

The PRESIDING OFFICER. The bill will go over.

NATIONAL-DEFENSE SECRETS.

The bill (S. 4307) to prevent the disclosure of national-defense secrets was considered as in Committee of the Whole.

The bill was reported from the Committee on Naval Affairs with an amendment, on page 3, line 3, after the word "penalty," to strike out the semicolon and insert a comma and the words "and offenses hereunder committed within the Canal Zone shall be cognizable in the district court of said zone," so as to make the bill read:

Be it enacted, etc., That the act entitled "An act to prevent the disclosure of national-defense secrets," approved March 3, 1911, be, and the same is hereby, amended to read as follows: That whoever, without proper authority, procures or attempts to procure, either individually or by collusion, information of any kind, in any form, relating to the national defense at any place within the United States or subject to the jurisdiction thereof; or so receives or assents to receive any such information from any unauthorized person; or whoever, having possession of or control over any such information, communicates or attempts or agrees to communicate the same to any person not authorized to receive it, shall be punished by a fine of not more than $1,000, or by imprisonment for not more than one year, or by both such fine and imprisonment.

SEC. 2. That all information of a confidential character communicated by any officer, representative, agent, or employee of the Government to any contractor or any officer, agent, or employee of any contractor for constructing, manufacturing, or supplying for the Military or Naval Establishment any vessel, building, structure, article, supplies, or thing, shall be regarded as included in information respecting the national defense within the meaning of this act.

SEC. 3. That whoever communicates, or agrees or attempts to communicate, information of any kind in any form respecting the national defense to any foreign Government, or to any officer, representative, agent, or employee of any foreign Government, shall be imprisoned for not more than 10 years.

SEC. 4 That offenses against the provisions of this act committed upon the high seas or elsewhere outside of a judicial district shall be cognizable in the district where the offender is found or into which he is first brought; but offenses hereunder committed within the Philippine Islands shall be cognizable in any court of said islands having original jurisdiction of criminal cases, with the same right of appeal as is given in other criminal cases where imprisonment exceeding one year forms a part of the penalty, and offenses hereunder committed within the Canal Zone shall be cognizable in the district court of said zone, and jurisdiction is hereby conferred upon such courts for such purpose.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER.

The bill (S. 3521) to establish a United States naval reserve was announced as next in order.

Mr. WARREN. Let that go over.

The PRESIDING OFFICER. It will go over.

The bill (S. 4761) providing for the classification, appraisal, and disposal of certain lands within the former Fort Peck Indian Reservation, Mont., was announced as next in order.

Mr. KERN. Let that go over.

The PRESIDING OFFICER. The bill will go over.

GEORGE S. CLARK.

The bill (H. R. 7817) to validate the homestead entry of George S. Clark was considered as in Committee of the Whole. It proposes to validate the homestead entry of George S. Clark, No. 029,961, made October 22, 1914, for the southeast quarter northwest quarter, east half southwest quarter, and southwest quarter southeast quarter of section 34, township 7 north, range 13 east, of the Black Hills meridian, in the State of South Dakota.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

HOMESTEAD ENTRIES.

The bill (H. R. 8654) to amend an act entitled "An act to provide for an enlarged homestead," approved February 19, 1909, by adding a new section to be known as section 7 was announced as next in order.

Mr. KERN. I object.

Mr. THOMAS. Is the bill objected to?

Mr. KERN. I will withdraw my objection.

Mr. THOMAS. I am glad the Senator has withdrawn it. The Senator from South Dakota [Mr. STERLING] desires to offer an amendment to the bill.

The Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. STERLING. I offer the following amendment.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. In line 10, page 2, after the word "laws" insert "except that where the land embraced in the additional entry is located not exceeding 20 miles from the land embraced in the original entry no residence shall be required on said additional entry," so as to make the bill read:

Be it enacted, etc., That the act entitled "An act to provide for an enlarged homestead," approved February 19, 1909, be amended by adding thereto an additional section to be known as section 7:

"SEC. 7. That any person who has made or shall make homestead entry of less than 320 acres of lands of the character herein described, and who shall have submitted final proof thereon, shall have the right to enter public lands subject to the provisions of this act, not contiguous to his first entry, which shall not with the original entry exceed 320 acres: *Provided*, That the land originally entered and that covered by the additional entry shall first have been designated as subject to this act as provided by section 1 thereof: *Provided further*, That in no case shall patent issue for the land covered by such additional entry until the person making same shall have actually and in conformity with the homestead laws resided upon and cultivated the lands so additionally entered, and otherwise complied with such laws, except that where the land embraced in the additional entry is located not exceeding 20 miles from the land embraced in the original entry no residence shall be required on said additional entry: *And provided further*, That this section shall not be construed as affecting any rights as to location of soldiers' additional homesteads under section 2306 of the Revised Statutes."

Mr. THOMAS. I accept that amendment.

The amendment was agreed to.

The bill was reported to the Senate as amended and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

LANDS IN COLORADO.

The bill (H. R. 2744) to correct title to certain lands in Colorado was considered as in Committee of the Whole. It directs the Secretary of the Interior to issue a patent conveying to the State of Colorado and its assigns all of lots 2 and 4 in section 23; lots 7, 9, and 11 in section 24; lots 3, 4, 5, 6, 7, 8, 12, 13, 14, 15, 17, and 19 in section 25; lots 1, 2, 7, 8, 9, 10, 15, and 17 in section 26, township 6 north, range 99 west, sixth principal meridian, Colorado, containing 639.14 acres, more or less, according to resurvey made in pursuance of the act of April 28, 1904 (33 Stats. L., p. 519), being the same land transferred to the Lily Park Stock Growing Association, a corporation of the State of Utah, by the State of Colorado by patent dated September 6, 1894, and filed for record August 15, 1901, in book 37, page 18, one of the land records for Routt County, Colo., and described in said patent from the State as section 36 of said township: *Provided*, That the State of Colorado and the said Lily Park Stock Growing Association, its successors or assigns, if any, shall relinquish to the United States any and all claims to section 36 of said township and range as shown by the survey made in pursuance of said act of April 28, 1904, which survey was approved August 14, 1907.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

STATISTICS OF COTTON SEED AND COTTONSEED PRODUCTS.

The bill (H. R. 4767) authorizing the Director of the Census to collect and publish statistics of cotton seed and cottonseed products was considered as in Committee of the Whole.

The bill was reported from the Committee on the Census with amendments.

The first amendment was to add a new section, to be known as section 4, as follows:

SEC. 4. That the Director of the Census be, and he is hereby, authorized and directed to collect and publish statistics of raw and prepared cotton and linters, cotton waste, and hull fiber consumed in the manufacture of guncotton and explosives of all kinds, and of absorbent and medicated cotton, during the calendar year 1915, and quarterly thereafter, and the quantity held in such establishments at the end of each quarter. The statistics herein provided for are in addition to those now collected in compliance with the act of Congress approved July 22, 1912, the provisions of that act being made applicable to and governing the collection and publication of the data.

The amendment was agreed to.

The next amendment was to add as a new section the following:

SEC. 5. That the Director of the Census be, and he is hereby, authorized and directed to collect and publish annually statistics of forest products and State finance in the several States and the District of Columbia.

The amendment was agreed to.

Mr. SHEPPARD. I wish to move one or two formal amendments. In line 10, page 1, I move to insert between the words "crude" and "cottonseed" the words "and refined."

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 1, line 10, before the word "cottonseed" and after the word "crude," insert "and refined," so as to read:

crude and refined cottonseed oil.

The amendment was agreed to.

Mr. SHEPPARD. The second amendment I move is on page 2, line 1, before the word "cottonseed" and after the word "crude," to insert "and refined."

The amendment was agreed to.

Mr. SHEPPARD. On page 2, line 20, before the word "or," I move to insert the word "refinery."

The amendment was agreed to.

Mr. SHEPPARD. On page 3, line 14, before the word "or," I move to insert "refinery."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

Mr. CHILTON. Is not an amendment to the title required?

The PRESIDING OFFICER (Mr. BRANDEGEE in the chair). The Secretary thinks so.

Mr. CHILTON. I will ask the Secretary to amend the title so as to correspond with the body of the bill.

The title was amended so as to read: "A bill authorizing the Director of the Census to collect and publish statistics of cotton seed and cottonseed products, and for other purposes."

STATISTICS OF MARRIAGE AND DIVORCE.

The joint resolution (S. J. Res. 107) authorizing and directing the Director of the Census to collect and publish statistics of marriage and divorce was considered as in Committee of the Whole.

The bill was reported from the Committee on the Census with amendments, on page 1, line 6, before the word "years," to strike out "seven" and insert "nine"; in line 8, after "December 31," to strike out "1913" and insert "1915"; in line 10, after the words "statistics as," to insert "are"; and after the word "collected," in line 11, to insert "shall," so as to make the joint resolution read:

Resolved, etc., That the Director of the Census be, and he is hereby, authorized and directed to collect and publish the statistics of and relating to marriage and divorce in the several States and the District of Columbia for the nine years from January 1, 1907, to December 31, 1915, and for each year thereafter annually: *Provided*, That such statistics as are now required by law to be collected shall be used, so far as it is practicable to do so.

The amendments were agreed to.

The joint resolution was reported to the Senate as amended, and the amendments were concurred in.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. SHEPPARD subsequently said: Mr. President, I ask unanimous consent, in connection with Senate joint resolution 107, which was passed awhile ago, to have printed in the RECORD a letter from Francis M. Moody, executive secretary of the Interstate Committee on Marriage and Divorce.

The PRESIDING OFFICER. Without objection, the request will be granted.

The letter referred to is as follows:

INTERSTATE COMMITTEE ON MARRIAGE AND DIVORCE,
Washington, D. C., May 22, 1916.

Hon. MORRIS SHEPPARD,
Senator from Texas,
Senate Office Building, Washington, D. C.

MY DEAR SENATOR: I beg leave to submit the following in behalf of Senate joint resolution 107, of which you are the author.

You are doubtless aware that the work for the now permanent Census Bureau has not yet been fully planned. The Director of the Census informs us that the census on marriage and divorce can be better handled and just as cheaply if taken annually as if taken decennially. Better, because the cases are less likely to be lost or mislaid through fire or carelessness. Without additional cost, because expert agents who are already on the field for certain other duly authorized work can be used to collect data for this work also.

The Director of the Census further informs us that the sum of about $20,000, needed to begin this work, is already in hand. He also estimates that the United States of America are this year breaking all previous world's records for a single nation in the granting of divorces by uttering over 125,000 such decrees in the current year of 1916. If this be true—and it seems to be an eminently conservative estimate—it ought not to be a matter left to any conjecture, however expert, but should be definitely known as soon as possible after the 1st of January, 1917, by the first of the annual censuses authorized by this act.

The data for the nine years just past (1907–1915, inclusive) are greatly needed in very many of our States for the proper consideration of most important legislation relative to the subject of marriage and

divorce, as well as in the discussion of the larger question of a possible Federal law on marriage and divorce. You are, of course, aware that most of our State legislatures meet only once in two years and that next year is the time of most of them. Delay in furnishing full and certain information on the subject of the pulverizing of American homes and the pauperizing of tens of thousands of American children every year because of such divorces, which are often utterly needless and fraudulent, would mean an incalculable loss to the Nation.

We therefore respectfully request your immediate assistance in securing the passage of this measure without delay.

Sincerely and cordially, yours,

FRANCIS M. MOODY,
Executive Secretary.

PUBLICATION OF LAND-OFFICE NOTICES.

Mr. MYERS. The first bill on the calendar is the bill (S. 1062) relating to the duties of registers of United States land offices and the publication in newspapers of official land-office notices. That bill has been going over for a long time, and in a number of instances on account of the absence of the Senator from New Mexico [Mr. FALL], because it happened to be reached at a time when he was absent. The Senator from New Mexico is present now and I think it would be agreeable to him to have the bill considered. I ask unanimous consent that we revert to that number and take it up and dispose of it at this time.

The PRESIDING OFFICER. The Senator from Montana asks unanimous consent to return to Senate bill 1062, relating to the duties of registers of the United States land offices and the publication in newspapers of official land-office notices. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill.

The PRESIDING OFFICER. The pending amendment will be stated.

The SECRETARY. The pending amendment is one offered by the Senator from New Mexico [Mr. FALL], following an amendment already adopted in line 5. The amendment adopted at that place reads "published nearest to the land affected." After the word "affected" the Senator from New Mexico proposes to insert a comma and the words "or in case of a public-land entry by the entryman," and a comma.

Mr. FALL. Mr. President, I shall not spend any time at all on this amendment. The purpose of it is simply to allow a man who has made the entry and must pay for the notice the choice of a paper in the event that there are two papers equally qualified to publish the notice. It merely enables him to make the choice himself.

There was some little debate had on this amendment and upon the bill at one time, and the Senator from Montana [Mr. MYERS] then made a statement with reference to the former practice and the present practice, and I think he was frank to say that it was his idea that this patronage from the public-land offices should go to the press of his political party. He said it had been the practice before, and he referred to an old circular. The circular did allow the entryman, unless objected to by the register or receiver, to choose his paper.

Mr. WARREN. Will the Senator yield to me for a moment?

Mr. FALL. Certainly.

Mr. WARREN. Not only that, but did not the present Secretary issue a circular, or perhaps I should say letters, to all the land offices to insert land notices only in newspapers supporting the administration? I think before that time it had never been done, at least so far as issuing official orders were concerned, and that the only qualification insisted upon was that the notice should in every case be published in a paper of general circulation.

Mr. FALL. I so understand, Mr. President. I am simply going to take the time of the Senate to read a letter, not a circular but a letter signed by the Secretary of the Interior at this time. It was a letter addressed to the registers and receivers of the public land offices in the State of New Mexico:

DEPARTMENT OF THE INTERIOR,
Washington, D. C., May 13, 1913.

DEAR SIR: You are charged with the duty of selecting newspapers for the publication of notices of intention to offer final proof; the law provides that newspapers selected shall be of established character and general circulation in the vicinity of and published nearest to the land affected. Complaints have been received by me that discrimination has been practiced in the placing of land notices in certain of our land districts. I hope that there will be no action on your part which will cause complaints of this nature.

It is considered that the registers of the Land Service should recognize the propriety of designating newspapers whose political principles are in harmony with the administration.

Very truly, yours,

FRANKLIN K. LANE,
Secretary of the Interior.

I have also here a letter from Hon. A. A. Jones, First Assistant Secretary of the Interior, directed to myself, upon the same subject. I took the matter up with him, and he states:

The practice that formerly prevailed in the Roswell land district, as set out in your correspondent's letter, was not in accordance with the law or the instructions thereunder, as shown by the inclosed circular, and, consequently, his deductions as to the cause of the change in the manner of selecting newspapers are erroneous. While it is considered that the register should recognize the propriety of designating newspapers whose political principles are in harmony with the administration, yet they are specifically enjoined from practicing discrimination in the placing of land notices; and if your correspondent is in a position to proceed in accordance with the instructions contained on pages 3, 4, and 5 of the inclosed circular, his complaint will be formally considered.

It was at that time that I obtained a copy of the letter which I have just read from the Secretary of the Interior himself, in which he directs the registers of the land offices, in the publication of these notices, to recognize papers and have notices published in papers which are supporting this administration.

It is simply for the purpose of obviating these very matters and difficulties which are constantly arising that I have offered the amendment to the bill to the effect that entrymen, who must pay for the publication of these notices, should, everything else being equal, be allowed to designate the paper in which the notice is to be published; that if he can make arrangements to have the notice published at less than the legal rate or by any contract rate, he would be allowed that privilege. That is the sole object of the amendment.

Mr. MYERS. Mr. President, this amendment was debated at great length once before in the Senate, and I have but little to say about it. I opposed it then, and I hope the amendment will not be adopted now, for the reason which I shall state.

This is the only change that the bill makes in the law. Under existing law in towns where there is no weekly paper published and only a daily paper published, the land-office notices, the mining-office notices, have to be published seven times a week, every day in the week, which is a great burden to poor mining claimants and homesteaders. The bill merely provides that in cases of that kind notice may be published once a week in the daily newspaper with the same effect as if published in a weekly paper. It makes no other change whatever. That is the only change the original bill sought to make, and I do not think we ought to drag politics into the measure.

Mr. SMITH of Arizona. Mr. President, if the Senator will permit me, with my experience of 25 or 30 years I have some knowledge of the subject. The only difference is as to the frankness of the letters that have just been read, for unquestionably it has always been the practice, as far as my experience with the land offices goes, that whenever the Republicans are in power the Republican paper nearest that particular mining claim or homestead got the publication. I know it was certainly true after the Democrats came into power that the Democratic papers usually got the publication. But the Democratic papers have had the publication so much less than the others that probably it would not exactly equalize the matter to stop the practice now, though I am not here asking for either course to be taken. I do not care except as to the amendment the Senator from New Mexico offers, which, it seems to me, would reduce the expense of the men who are making their applications for patents, and on that ground, and that alone, I should like to see it passed.

Mr. MYERS. In every other respect the bill leaves the law just as it finds it. It is not seeking to make any other change. If the law is partisan now, it leaves it partisan. If the law is nonpartisan now, then it leaves it nonpartisan. It just leaves it as it is in every respect, except that the notice shall be published once a week in a daily paper instead of daily.

In the last Congress a similar bill passed the Senate by practically a unanimous vote. The Senator from Wyoming [Mr. CLARK] was on the floor at that time and spoke in favor of the bill, for which I felt very grateful. I wish he was here now in order that he might do the same thing again, perhaps. There was practically no opposition to it. It was fully explained at that time and passed the Senate, but it did not pass the House for lack of time.

Therefore, I hope the amendment will not be adopted.

Mr. NORRIS. Mr. President, at a prior session of the Senate I discussed this bill somewhat at length. I shall take only a few moments now. The object of the bill which the Senator from Montana reported and has in charge is to reduce the expense of the homesteader when he makes proofs. That is a worthy object. The object of the amendment of the Senator from New Mexico is to further reduce those same expenses. That is likewise a worthy object. I am not claiming any more virtue for one party than another for the practice that has taken place heretofore. It has been correctly stated that the party which was in power, as far as I know without exception, there may have been, but both parties accepted it as far as I know, and the practice has been that the officer at the land office who must designate the paper in which the homesteader must publish his proof designates a paper, the political complexion

of which corresponds with the man who does the designating. That is conceded, so far as I know, by everybody.

The amendment of the Senator from New Mexico would prevent that from being done, and having lived most of my life since I have been grown in a country where final proofs were being continually made, I know that it is often a hardship to the homesteader, at least it is frequently unfair to the homesteader. He may be able to have a notice published in one newspaper at half the legal rate, and if he has not enough money in his pocket to buy a sack of flour for his family and the present practice be continued under this bill, without the Senator's amendment he would be compelled to pay the full legal rate to some newspaper designated by the officer at the land office.

I think when this bill was under discussion before I told of going down through western Kansas, quite a number of years ago, where I met an old schoolmate of mine. I had not seen him for several years and I did not know where he was. I found that he was running a newspaper. It was when Grover Cleveland was President. It was at a time when the farmers were just proving up on their lands. There had never been a Democratic newspaper there before. He went in there and started a Democratic newspaper, and while he was perfectly competent to edit it and did edit and publish a good newspaper, the only reason on earth why he established a newspaper there was because he was able to get all the notices of final proof. He got full pay without any reduction in any case, and he always got the pay in advance before he submitted the affidavit which it was necessary to have showing the publication under the law in that newspaper. It was a good thing for him. It made him lots of money. He had running at that time two or three extra pages of his paper with nothing but final-proof notices. But it was unfair to the homesteader. He was making several hundred dollars a month cash, clear and net, out of the one item alone.

It is not wrong, it seems to me, where there are two qualified newspapers in the same town and therefore both equally distant from the land that the man who has to pay the bill should select the newspaper, and such a practice will work just the same to one party as it does to another. It happens right now that the Democrats are in power, but you do not expect to stay in power through all eternity. God knows you are going to be awfully disappointed if you do have that kind of an expectation. But if you are, then, why not for once in your lives be generous and fair and let the poor devil who has to pay the money, often at a great sacrifice to himself, obtain the benefit of whatever reduction he can get by some competition in this line. It ought not to be a partisan question. There is no charge made against one party that does not exist against the other, but because one party has done it is no reason why another party should continue to do the evil.

Mr. FALL. Mr. President, will the Senator yield to me for just a moment?

Mr. NORRIS. Yes.

Mr. FALL. It is true, I think, just as the Senator has stated, that the practice has been in the past for the register to favor some paper of his political party, unless he happened to have some personal favorite editing some other paper, in which case he has always favored his personal friend; but my object in reading the letter, which I have read into the RECORD, was this: The circular which has been issued establishing the practice by article 7 is in force, except so far as it is done away with by written instruction from the present Secretary, which reads as follows:

> It will be entirely proper to accord favorable consideration to a claimant's nomination of a newspaper.

That is the circular under which all parties up to this time have been operating—that it is entirely proper to accord the claimant publishing a notice and paying for it the right to name his newspaper. Of course, the discretion is still left as to whether favorable consideration will or will not be given to his suggestion; but never before, until the present administration, so far as I can learn, was there ever a letter sent to the register directing him officially to publish notices in newspapers supporting the administration.

Mr. NORRIS. It reduces itself to this: The amendment, if adopted, will make it necessary, just the same as though it were not adopted, that the notice be published in a legal newspaper, as defined by law, the nearest one to the land. Nine times out of ten the town that is nearest to the land has two, or perhaps more newspapers, and publication in any one of them would be legal and would comply with the law. The homesteader has to pay the bill, and it is no more than justice that we should permit him to select the newspaper that will do the best by him in consideration of the payment of that bill, the newspaper itself being a legal newspaper, and the publication in it complying in all respects with the law. Can it be possible that we think so much of a little political advantage for any political party that we should require contributions to be made by men who can not afford to make them, in order to keep the party going? It seems to me it does not speak well for any party that is asking it.

Mr. SMITH of Arizona. Mr. President, if the Senator from Nebraska will permit me there, I wish to say that I am not going to carry my partisanship to the extent he suggests, though I confess to a very great deal of it; but if the Senator will ponder a minute over the experience he must have had in such matters, I think he will concede that it became necessary for somebody with authority to designate the paper in which such notices should be published. It is the easiest thing in the world for some one to start a newspaper for the purpose of receiving contributions in the form of payments for publishing notices, and then claim a general circulation by sending copies of the paper around the county. So it became necessary, in order that the notices should become general, that they should appear in some respectable newspaper. I imagine that was the reason for the original law.

I do not think the practice has been prostituted to the political ends of political parties, for if I were Secretary of the Interior and had this matter under control I would certainly, as between a Democratic and a Republican newspaper published in the same town, give the preference to the former. In that particular I would stand on exactly the same ground on which every Republican Secretary of the Interior has stood during my life in the West. So it is not a mere question of politics; it is a question of securing circulation and of publication in a paper that will give the notice which the law intends shall be given. I think that is the reason for it.

Mr. NORRIS. The publication must be made in a legal newspaper. There are States that have statutes which define what a legal newspaper is.

Mr. SMITH of Arizona. And there are some States which have not such statutes.

Mr. NORRIS. And there are some States which have not; but the very argument of the Senator from Arizona, it seems to me, is a good one in favor of this amendment. He says that often a newspaper is started for the purpose of getting such publications.

Mr. SMITH of Arizona. And for nothing else.

Mr. NORRIS. That is true. I have myself seen newspapers started for the purpose. The one I described was started for that purpose, and while in that case, in my judgment, it was a good newspaper, a man could start a newspaper for the express purpose of getting these publications. Do you suppose if he did so for that express purpose that as a rule he would have as good a newspaper, one that would be of as general circulation as the man who is publishing a newspaper and who is in the newspaper business because he wants to publish a real newspaper? Hence, if the question of publication were decided on partisan grounds it might go to a paper that was only distributed around, as the Senator says, without any idea of being a legitimate newspaper, but simply for the purpose of making this money.

Mr. BANKHEAD. Mr. President, I rise to a point of order, that the Senator from Nebraska [Mr. NORRIS] is out of order. He has spoken more than five minutes on this proposition.

Mr. NORRIS. I think that objection does not apply after the morning hour; that it does not apply to this unanimous-consent agreement under which we are now proceeding. The Senator must not expect, if he is trying to hurry this bill through, that he is going to get any particular advantage by attempting to be technical.

Mr. BANKHEAD. I do not care anything about this bill, but I think there are a number of other Senators who would like to address the Senate on the amendment.

The PRESIDING OFFICER. The Senate is by unanimous consent operating under Rule VIII. As Rule VIII does restrict a Senator to five minutes' discussion and to one speech upon unobjected bills, the Chair will be compelled to sustain the point of order made by the Senator from Alabama.

Mr. HITCHCOCK. Mr. President, I think my colleague [Mr. NORRIS] is putting the emphasis on the wrong portion of this law and of this practice. The object of giving this notice is for the purpose of advising people in the neighborhood in the widest possible way that the entryman is about to secure his rights under his entry. I think it would be a mistake to permit him to choose the newspaper in which he was to publish his notice, for he would desire to publish it in that paper which had the least circulation and which would attract the least attention.

Mr. NORRIS. Mr. President, will my colleague yield for a question?

Mr. HITCHCOCK. I will.

Mr. NORRIS. Is my colleague aware that in our own State there is a statute which provides that in every case where a service of summons must be made by publication the person who has to pay the bill shall have the right to select the newspaper in which it shall be made, and that we have been operating under that statute for the last 50 years?

Mr. HITCHCOCK. That is not the case with the law of the United States. The object of the law of the United States is to give the widest possible publicity in the neighborhood to the fact that the entryman is claiming his title.

Mr. NORRIS. Does not the Senator understand that that is the very object of a summons where it is served by publication?

Mr. SHAFROTH. May I ask the Senator a question?

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Colorado?

Mr. HITCHCOCK. I should like to be permitted to finish my point without being further interrupted.

The PRESIDING OFFICER. The Senator from Nebraska does not yield at this time.

Mr. HITCHCOCK. That being the proposition, and the desire and object of the national statute being to give the widest publicity, it would evidently be a perversion of the law to allow a man possibly to select the cheapest publication which might give the least publicity. It would be a defeat of the very purpose of the law.

This charge, after all, is not one which is so serious as my colleague indicates. It amounts to only a few dollars, at the very most, and it goes to a class of people who are living from hand to mouth. My colleague knows that every one of those small western publications, whether they are Republican or Democratic, are eking out a bare existence, and it is hardly fair to them to indicate that this matter is one in which the law is being used to extort from the poor entrymen an excessive amount of money. The law limits the charge that can be made.

It seems to me it would be to defeat the very purpose of the law, and it would be a wrong to a large number of people in the neighborhood to permit the entryman to choose the paper which would give the least possible publicity.

Mr. FALL. Will the Senator from Nebraska yield for a question?

Mr. HITCHCOCK. I will.

Mr. FALL. If these newspapers can only subsist, or if they depend largely upon this character of patronage, then, if the Democratic administration is in power, the Republican papers will go out of business.

Mr. HITCHCOCK. Well, Mr. President, I have not said that they only subsist on this patronage. I have said that the charges were not excessive. I said that the papers which were receiving those charges are as poor as are the entrymen themselves, and in many cases they are poorer. My colleague is doing an injustice to those papers in indicating that this paltry little charge which the Government permits is an excessive and harsh one upon the entryman.

I think, Mr. President, that the present law is the proper law, but I believe that the bill supported by the Senator from Montana is a wise one, because—and this is all that it does—it permits certain entrymen, who might now be compelled to advertise in daily papers for seven days per week, to advertise in a daily paper but one day per week. It is in the interest of a smaller charge to a man who is compelled to use a daily paper in the immediate neighborhood. I think the provision proposes a just and wise amendment to the statute.

Mr. WARREN. Mr. President, it is evident that we are not in a condition this afternoon to settle this subject. I ask the Senator from Montana if he is not willing to withdraw the bill and to let it be now passed over?

Mr. MYERS. Mr. President, I am willing, in the interest of fairness to others, to withdraw the request; but I will ask the Senator from New Mexico if he will not express his willingness at this time, so far as he is concerned, to have the bill voted on the next time the calendar is called, if he should not be present—that is, to let it be called as any other bill would be, and not express a desire to have it put over on account of his absence, if he should be absent.

Mr. FALL. Certainly, Mr. President. It has not been my intention at all to delay this measure.

Mr. MYERS. I realize that.

Mr. FALL. And I have no objection, under the heavens, to taking a vote right now on this measure. In what I have done I have simply acted not in behalf of the Democratic Party or of the Republican Party or of the newspapers, but for the poor homesteader who must pay for the publication of his notice.

Mr. MYERS. I realize the sincerity of the Senator's motives. May we not have a vote now?

Mr. WARREN. If a vote may be had without further debate, and settle the question, of course I do not want to interfere.

SEVERAL SENATORS. Vote!

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from New Mexico, which the Secretary will again state.

The SECRETARY. Following the amendment of the committee, in line 5, after the word "him," inserting the words "published nearest to the land affected," it is proposed to insert the words "or in case of a public-land entry by the entryman."

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from New Mexico. [Putting the question.] In the judgment of the Chair the "noes" have it.

Mr. NORRIS. I ask for a division.

The PRESIDING OFFICER. A division is requested.

Mr. WARREN. Will not the Senator ask for a showing of hands instead of a division?

Mr. NORRIS. Very well.

The PRESIDING OFFICER. Those in favor of the amendment will raise their hands, and the Secretary will count them. [A pause.] Those opposed to the amendment will raise their hands. [A pause.] The amendment is rejected. The bill is still as in Committee of the Whole and open to amendment.

Mr. NORRIS. I object to the bill.

The PRESIDING OFFICER. The Senator from Nebraska interposes an objection.

Mr. MYERS. Mr. President, of course I recognize the right of any Senator to object, but I merely want to ask the Senator from New Mexico if he will not state that he has no objection to the bill coming up the next time the calendar is called if he should not be present.

Mr. FALL. Mr. President, I have already made the statement; but I want the RECORD to show as strongly as it possibly can, in my weak words, that I offer no further objection of any kind to the taking up and consideration of this bill and final action upon it.

Mr. MYERS. I thank the Senator from New Mexico.

AMENDMENT OF INTERSTATE-COMMERCE ACT.

Mr. CUMMINS. Mr. President, I have been confined to my house for a day or two and have just reached the Chamber. There has been passed over a bill on the calendar which, unless some Senator has objection, I ask unanimous consent to take up. I refer to Calendar No. 359, being Senate bill 3069.

The PRESIDING OFFICER. What is the request of the Senator?

Mr. CUMMINS. I ask unanimous consent that Senate bill 3069 be taken up for consideration under the rule under which we are operating.

Mr. WARREN. Calendar No. 359 was objected to.

Mr. CUMMINS. Who objected to it?

The PRESIDING OFFICER. The Chair will state to the Senator from Iowa that calendar No. 359 was called up in regular order. We are operating under Rule VIII, which permits of a single objection blocking the consideration and passage of a bill. It is the impression of the Chair that the Chair himself objected to it when he was not in the chair, but was in his seat. The Chair will state to the Senator from Iowa, however, that when he objected he thought the bill was another bill in relation to the Interstate Commerce Commission; and if the Senator cares to ask unanimous consent to return to the consideration of that measure, and it is given, the Chair will not interpose another objection. The Chair objected under a misapprehension.

Mr. CUMMINS. Mr. President, I hope I may have unanimous consent for the consideration of the bill. It is quite important. If the Senate will permit me a moment, we passed a bill two years ago intended to restore full liability as against railroad companies in the event of loss of or damage to goods in transit. While the bill was on its passage through the Senate the proviso which had been reported by the committee was stricken out and another one, which, I think, had not been carefully thought out, was substituted in its stead. Under a construction, which I do not think sound, by the Interstate Commerce Commission, that proviso has done a great deal of harm and has caused a great deal of trouble; and this bill is intended to meet the views of the Interstate Commerce Commission and others who are interested in the subject. It has been prepared with the most careful cooperation of the commission and of both the shippers and the railway companies, and I do not think there is any objection to it. Therefore, I ask unanimous consent for its consideration at this time.

The PRESIDING OFFICER. Is there objection?

Mr. FLETCHER. Mr. President, I do not object to returning to the bill and considering it, with the understanding that we are operating under Rule VIII; in other words, unanimous consent for its consideration now might give it the entire right of way until disposed of.

The PRESIDING OFFICER. The Chair understands that unanimous consent is requested simply to return to the bill out of order, and that we are still operating under Rule VIII.

Mr. FLETCHER. With that understanding, I have no objection to the consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (S. 3069) to amend an act entitled "An act to amend an act entitled 'An act to amend an act entitled "An act to regulate commerce,"' approved February 4, 1887, and all acts amendatory thereof, and to enlarge the powers of the Interstate Commerce Commission," approved March 4, 1915.

Mr. OVERMAN. The bill has been read.

The PRESIDING OFFICER. The question is on the amendment proposed by the committee, which the Secretary will state.

The SECRETARY. On page 2, after line 15, it is proposed to strike out:

Provided, however, That the provisions hereof respecting liability for full actual loss, damage, or injury, notwithstanding any limitation of liability or recovery, shall not apply, first, to baggage carried on passenger trains or trains carrying passengers; second, to property offered and received for transportation which is hidden from view by wrapping, boxing, or other means, unless the carrier is notified in writing of the specific character of the property; third, to property, except ordinary live stock, offered and received for transportation concerning which express authorization has been heretofore granted or shall hereafter be granted by the Interstate Commerce Commission for the establishment and maintenance of rates for the transportation thereof dependent upon the value of the property shipped as stated in writing by the consignor; and in such cases the rate schedule shall refer to the authorization and the statement of value shall have no other effect than a limitation upon the amount of the recovery; and in such cases a tariff filed with the Interstate Commerce Commission may lawfully prescribe rates varying with values as so stated.

And to insert:

Provided, however, That the provisions hereof respecting liability for full actual loss, damage, or injury, notwithstanding any limitation of liability or recovery or representation or agreement or release as to value, and declaring any such limitation to be unlawful and void, shall not apply, first, to baggage carried on passenger trains or trains carrying passengers; second, to property, except ordinary live stock, received for transportation concerning which the carrier shall have been or shall hereafter be expressly authorized or required by order of the Interstate Commerce Commission to establish and maintain rates dependent upon the value declared in writing by the shipper or agreed upon in writing as the released value of the property, in which case such declaration or agreement shall have no other effect than to limit liability and recovery to an amount not exceeding the value so declared or released, and shall not be held to be a violation of section 10 of the interstate commerce act; and any tariff schedule which may be filed with the commission pursuant to such order shall contain specific reference thereto and may establish rates varying with the value so declared or agreed upon; and the commission is hereby empowered to make such order in cases where rates dependent upon and varying with declared or agreed values would, in its opinion, be just and reasonable under the circumstances and conditions surrounding the transportation. The term "ordinary live stock" shall include all cattle, swine, sheep, goats, horses, and mules, except such as are chiefly valuable for breeding, racing, show purposes, or other special uses.

So as to make the bill read:

Be it enacted, etc., That so much of an act to amend an act entitled "An act to amend an act entitled 'An act to regulate commerce,' approved February 4, 1887, and all acts amendatory thereof, and to enlarge the powers of the Interstate Commerce Commission," approved March 4, 1915, as reads as follows, to wit:

"*Provided, however,* That if the goods are hidden from view by wrapping, boxing, or other means, and the carrier is not notified as to the character of the goods, the carrier may require the shipper to specifically state in writing the value of the goods, and the carrier shall not be liable beyond the amount so specifically stated, in which case the Interstate Commerce Commission may establish and maintain rates for transportation, dependent upon the value of the property shipped as specifically stated in writing by the shipper. Such rates shall be published as are other rate schedules,"

be, and the same is hereby, amended to read as follows, to wit:

"*Provided, however,* That the provisions hereof respecting liability for full actual loss, damage, or injury, notwithstanding any limitation of liability or recovery or representation or agreement or release as to value, and declaring any such limitation to be unlawful and void, shall not apply, first, to baggage carried on passenger trains or trains carrying passengers; second, to property, except ordinary live stock, received for transportation concerning which the carrier shall have been or shall hereafter be expressly authorized or required by order of the Interstate Commerce Commission to establish and maintain rates dependent upon the value declared in writing by the shipper or agreed upon in writing as the released value of the property, in which case such declaration or agreement shall have no other effect than to limit liability and recovery to an amount not exceeding the value so declared or released, and shall not be held to be a violation of section 10 of the interstate commerce act; and any tariff schedule which may be filed with the commission pursuant to such order shall contain specific reference thereto and may establish rates varying with the value so declared or agreed upon; and the commission is hereby empowered to make such order in cases where rates dependent upon and varying with declared or agreed values would, in its opinion, be just and reasonable under the circumstances and conditions surrounding the transportation. The term 'ordinary live stock' shall include all cattle, swine, sheep, goats, horses, and mules, except such as are chiefly valuable for breeding, racing, show purposes, or other special uses."

Mr. CUMMINS. Mr. President, either by mistake of the stenographer or the printer two words were left out of the committee amendment. Therefore on behalf of the committee I move that the amendment be amended as shown in the slip I send to the desk.

The PRESIDING OFFICER. The Secretary will state the amendment to the amendment.

The SECRETARY. In the committee amendment, on page 3, line 16, after the word "trains," it is proposed to insert "or boats," and in the same line, after the word "trains," where it appears the second time, to insert "or boats," so as to read "on passenger trains or boats, or trains or boats carrying passengers."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

PENSIONS AND INCREASE OF PENSIONS.

The bill (S. 5911) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, was considered as in Committee of the Whole. It proposes to pension, at the rate stated, the following-named persons:

Nellie M. Leonard, widow of Willard R. Lemon, known as William L. Leonard, late of Company D, Third Regiment Ohio Volunteer Cavalry, $12 per month.

Bowman C. McEwen, late of Company B, First Regiment Minnesota Volunteer Heavy Artillery, $24 per month in lieu of that he is now receiving.

Burnum W. Francis, late of Company K, Sixteenth Regiment Connecticut Volunteer Infantry, $36 per month in lieu of that he is now receiving.

Elizabeth R. Frink, widow of Rufus S. Frink, late of Company G, Second Regiment Connecticut Volunteer Heavy Artillery, $20 per month in lieu of that she is now receiving.

Anna M. Holt, widow of Thomas Holt, late major and lieutenant colonel Seventieth Regiment New York Volunteer Infantry, $25 per month in lieu of that she is now receiving.

Fitzhugh S. Hoag, late of Company K, Forty-sixth Regiment Massachusetts Militia Infantry, $30 per month in lieu of that he is now receiving.

Ella P. Hines, widow of Thomas J. Hines, late chief musician, Fourteenth Regiment New York Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Sarah L. Lunt, widow of Albert C. Lunt, late of Companies I and F, First Regiment Vermont Volunteer Cavalry, $20 per month in lieu of that she is now receiving.

George H. Bishop, late of Company G, Fifty-second Regiment Illinois Volunteer Infantry, $50 per month in lieu of that he is now receiving.

Hatch Chamberlin, late of Company B, Fourth Regiment Vermont Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Michael Kelly, late of Company B, Eleventh Regiment Wisconsin Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Horace Berlew, late of Company B, One hundred and ninety-sixth Regiment Ohio Volunteer Infantry, $14 per month.

Irvin E. Scott, late of Company B, Twenty-eighth Regiment Pennsylvania Militia Infantry, and Company D, First Battalion, Fifteenth Regiment United States Infantry, $24 per month in lieu of that he is now receiving.

John B. Way, late of Company D, Seventeenth Regiment Kansas Volunteer Infantry, $30 per month in lieu of that he is now receiving.

William Comstock, late of Company C, Seventh Regiment Indiana Volunteer Infantry, $50 per month in lieu of that he is now receiving.

George H. French, late of Company A, Forty-eighth Regiment Wisconsin Volunteer Infantry, $27 per month in lieu of that he is now receiving.

David Devore, late of Company C, Fifteenth Regiment Iowa Volunteer Infantry, $36 per month in lieu of that he is now receiving.

Storm T. Roberts, late of Company B, Sixty-first Regiment Massachusetts Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Horatio N. Washburn, late of Company F, Fourth Regiment, and Company F, Nineteenth Regiment, Maine Volunteer Infantry, and Twenty-third Company, Second Battalion Veteran Reserve Corps, $40 per month in lieu of that he is now receiving.

Peter Wedge, late of Company C, Thirty-second Regiment Maine Volunteer Infantry, $36 per month in lieu of that he is now receiving.

Mary F. Fernald, helpless and dependent daughter of James L. Fernald, alias Francis Hamilton, late of Company G, Thirteenth Regiment Connecticut Volunteer Infantry, and Company H, Twentieth Regiment Veteran Reserve Corps, $12 per month.

Hiram R. Brackett, late of Company G, Fourteenth Regiment Maine Volunteer Infantry, $24 per month in lieu of that he is now receiving.

Harriet S. Crooks, widow of William Crooks, late colonel Sixth Regiment Minnesota Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Frances A. Hall, widow of Charles H. Hall, late of Company K, First Regiment Connecticut Volunteer Cavalry, $20 per month in lieu of that she is now receiving.

Elzie W. Grindle, late of Company F, Forty-second Regiment, Company E, Ninety-sixth Regiment, and Company A, Battalion Seventy-seven, Ohio Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Celia E. Gibson, former widow of William Gibson, late of Vaughn's independent battery, Illinois Volunteer Light Artillery, $12 per month.

Amanda Brewster, widow of Stephen G. Brewster, late unassigned, Thirty-second Regiment Indiana Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Henry Vanderpool, late of Company H, Tenth Regiment New York Volunteer Cavalry, $40 per month in lieu of that he is now receiving.

Charles F. Cooken, late of Company F, Forty-fifth Regiment Iowa Volunteer Infantry, $36 per month in lieu of that he is now receiving.

Orrin S. Williams, late of the Seventeenth Battery, Indiana Volunteer Light Artillery, $40 per month in lieu of that he is now receiving.

Mary J. Holliday, widow of George W. Holliday, late of Company H, Fifty-fourth Regiment Kentucky Volunteer Mounted Infantry, $20 per month in lieu of that she is now receiving.

Samuel I. Scammon, late of Company G, Fourteenth Regiment Maine Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Amanda M. Ricker, former widow of William E. Barrows, late of Company I, Nineteenth Regiment Maine Volunteer Infantry, and widow of Isaiah Ricker, late of Company E, Sixteenth Regiment Maine Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Henry Stewart, late of Company K, Sixty-ninth Regiment, and Company I, One hundred and fortieth Regiment, Illinois Volunteer Infantry, $30 per month in lieu of that he is now receiving.

Ivan S. Ford, late of Company F, Fourth Regiment Iowa Volunteer Infantry, $36 per month in lieu of that he is now receiving.

Miles Gary, late of Company I, Forty-seventh Regiment, and Company H, Twenty-fifth Regiment, Ohio Volunteer Infantry, $40 per month in lieu of that he is now receiving.

Josephine Taylor, widow of Isaac Y. Taylor, late of Company H, Seventh Regiment Rhode Island Volunteer Infantry, $20 per month in lieu of that she is now receiving.

Frances W. Wood, widow of George L. Wood, alias George Surgent, late of Company E, Third Regiment New Jersey Volunteer Cavalry, $12 per month.

Mathew Farley, late of Company C, Forty-ninth Regiment Massachusetts Militia Infantry, $30 per month in lieu of that he is now receiving.

Charles B. Sutton, late of Company G, First Regiment Oregon Volunteer Infantry, $30 per month in lieu of that he is now receiving.

John Harrigan, late of Troop F, Third Regiment United States Cavalry, $40 per month in lieu of that he is now receiving.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

DEPOSITS OF GOLD BULLION.

The bill (H. R. 13474) to amend section 6 of an act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes, approved March 14, 1900, as amended by the act of March 2, 1911, was considered as in Committee of the Whole. It proposes to amend section 6 of an act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes, approved March 14, 1900, as amended by the act approved March 2, 1911, by striking from the last proviso of said section 6 the word "one-third" and inserting in lieu thereof the word "two-thirds," making the last proviso of section 6 read as follows:

And provided further, That the Secretary of the Treasury may, in his discretion, receive, with the Treasurer or any Assistant Treasurer of the United States, deposits of gold bullion bearing the stamp of the coinage mints of the United States, or the assay office in New York, certifying their weight, fineness, and value, in amounts of not less than $1,000 in value, and issue gold certificates therefor of the description herein authorized. But the amount of gold bullion and foreign coin so held shall not at any time exceed two-thirds of the total amount of gold certificates at such time outstanding. And section 5193 of the Revised Statutes of the United States is hereby repealed.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

APPLICATION OF HOMESTEAD LAW TO ALASKA.

The bill (H. R. 228) to amend the United States homestead law in its application to Alaska, and for other purposes, was considered as in Committee of the Whole. The bill had been reported from the Committee on Public Lands with an amendment, in section 1, page 2, line 9, after the word "Alaska," to insert:

Provided, That nothing herein contained shall be construed to limit or curtail the area of any homestead claim heretofore lawfully initiated.

So as to make the section read:

That every person who is qualified under existing laws to make homestead entry of the public lands of the United States who has settled upon or who shall hereafter settle upon any of the public lands of the United States situated in the District of Alaska, whether surveyed or unsurveyed, with the intention of claiming the same under the homestead laws, shall, subject to the provisions and limitations of the act approved March 3, 1903, chapter 1002, United States Statutes at Large, page 1028, be entitled to enter 160 acres or a less quantity of unappropriated public land in said District of Alaska, and no more, and a former homestead entry in any other State or Territory shall not be a bar to a homestead entry in Alaska: *Provided*, That nothing herein contained shall be construed to limit or curtail the area of any homestead claim heretofore lawfully initiated.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

RESOLUTION PASSED OVER.

The resolution (S. Res. 119) authorizing the Committee on Fisheries to employ a stenographer to report hearings held before the committee was announced as next in order.

Mr. OVERMAN. The chairman of the Committee on Fisheries is not present, and I object to the present consideration of the resolution.

The PRESIDING OFFICER. The resolution will be passed over.

HEIRS OF RICHARD SHAW.

The resolution (S. Res. 111) authorizing the Secretary of the Senate to pay to the heirs of Richard Shaw, late head waiter in the Senate restaurant, a sum equal to six months' salary at the rate he was receiving at the time of his death, etc., was considered and agreed to, as follows:

Resolved, That the Secretary of the Senate be, and hereby is, authorized and directed to pay to the heirs of Richard Shaw, late head waiter in the Senate restaurant, a sum equal to six months' salary at the rate he was receiving by law at the time of his death, said sum to be considered as including funeral expenses and all other allowances.

BILLS PASSED OVER.

The bill (S. 2215) to provide divisions of mental hygiene and rural sanitation in the United States Public Health Service was announced as next in order.

Mr. OVERMAN. I object.

The PRESIDING OFFICER. Objection is made, and the bill goes over.

The bill (S. 5914) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors was announced as next in order.

Mr. THOMAS. Let that bill go over.

The PRESIDING OFFICER. The bill will be passed over.

PUBLIC BUILDING AT JEFFERSON CITY, MO.

The bill (S. 3265) for the extension, remodeling, and improvement of the public building at Jefferson City, Mo., was considered as in Committee of the Whole. It proposes to appropriate $60,000 for the purpose of erecting an addition to the public building at Jefferson City, Mo., and for extending, remodeling, and improving the public building, to be expended under the direction of the Secretary of the Treasury.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ELECTRIC LIGHT AND POWER IN KAUAI COUNTY, HAWAII.

The bill (S. 5777) to authorize and provide for the manufacture, maintenance, distribution, and supply of electric light and power within the Lihue district and the Koloa district, county of Kauai, Territory of Hawaii, was considered as in Committee of the Whole.

The bill had been reported from the Committee on the Pacific Islands and Porto Rico with an amendment, in section 11, page 7, line 24, after the word "the," to strike out "Territory of Hawaii," and insert "County of Kauai"; on page 8, line 1, after the word "the," where it occurs the second time, to strike out "Territory of Hawaii," and insert "County of Kauai"; in line 2, after the word "said," to strike out "Territory," and insert "county"; in line 7, after the word "the," to strike out "governor, the Public Utilities Commission of the Territory of Hawaii," and insert "treasurer of said county"; and in line 9, after the word "and," to strike out "their" and insert "his," so as to make the section read:

SEC. 11. That the association shall, within one month after the expiration of each calendar year, file with the treasurer of the county of Kauai a detailed statement showing all of its receipts and expenditures during the preceding calendar year, and shall, at the time, pay to the treasurer of the county of Kauai, for and on behalf of said county, one-half of 1 per cent of the gross receipts of the association from all electric light or power furnished to consumers during the preceding year; and all its books, papers, records, and accounts shall at all reasonable times be open to inspection by the treasurer of said county, and his respective agents appointed for such purpose.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

PRINTING OF ARTICLES BY JOHN S. PATTERSON AND PIERRE JAY (S. DOC. NO. 458).

Mr. SHEPPARD. Mr. President, I have here a brief but valuable document, entitled "Six Years of the Guaranty Fund—Its Operation and Effect," by Hon. John S. Patterson, commissioner of insurance and banking of the State of Texas. I ask that it be printed as a public document.

Mr. OWEN. I ask that there may be added to it an article by Mr. Pierre Jay, of the Federal Reserve Bank of New York, upon the same subject matter. I think they should probably go together as showing comments upon the operation of the statute from the points of view of these two gentlemen. I will ask the Senator if that is agreeable to him?

Mr. SHEPPARD. That is entirely agreeable.

The PRESIDING OFFICER. The Chair will call the attention of the Senator from Texas to the fact that the communication which he has sent to the desk has an indorsement showing that it was referred by the Senate to the Committee on Printing.

Mr. SHEPPARD. I ask that that indorsement be stricken out. I will state that I have been trying to get a quorum of the committee together for two or three months but have failed to do so.

The PRESIDING OFFICER. The order of the Senate was that it be referred to the Committee on Printing.

Mr. OVERMAN. If it has been referred to the Committee on Printing, I think it ought to remain there until acted upon.

The PRESIDING OFFICER. The Senator from Texas can move to discharge the committee or ask unanimous consent that the committee be discharged from the further consideration of the matter.

Mr. SHEPPARD. Then, I ask unanimous consent, Mr. President, that the Committee on Printing be discharged from the further consideration of the matter.

The PRESIDING OFFICER. Is there objection to that course of procedure being taken? The Chair hears none, and the order will be entered to print the paper as a document, together with the article referred to by the Senator from Oklahoma [Mr. OWEN].

ADDRESS OF HON. EDWARD N. HURLEY (S. DOC. NO. 459).

Mr. CHILTON. I ask unanimous consent to have printed as a public document an address by Hon. Edward N. Hurley, vice chairman of the Federal Trade Commission, delivered before the American Iron and Steel Institute, at New York, May 26, 1916. It is a very short address.

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia? The Chair hears none, and the order will be entered.

The Secretary will state the next bill on the calendar.

HONOLULU GAS CO. (LTD.).

The bill (S. 5658) to ratify, approve, and confirm an act duly enacted by the Legislature of the Territory of Hawaii amending the franchise held by the Honolulu Gas Co. (Ltd.), by extending it to include all of the island of Oahu, Territory of Hawaii, was considered as in Committee of the Whole. The bill was read, as follows:

Be it enacted, etc., That the act of the Legislature of the Territory of Hawaii entitled "An act amending the franchise held by the Honolulu Gas Co (Ltd.) by extending it to include all of the island of Oahu, Territory of Hawaii," is hereby ratified, approved, and confirmed, and section 1 of act 30 of the Laws of the Territory of Hawaii, 1903, as amended and approved by an act of Congress April 21, 1904 (section 905 of the revised laws of Hawaii, 1915), is hereby amended to read as follows:

"SECTION 1. Manufacture and supply: W. W. Dimond, of Honolulu, island of Oahu, Territory of Hawaii, his associates, successors, and assigns, or such corporation as he or they shall cause to be incorporated under the laws of the Territory of Hawaii (he or they being hereinafter referred to as W. W. Dimond), are hereby authorized and empowered to manufacture and supply gas for use as a fuel, for illuminating purposes, and otherwise, in Honolulu, which, for the purpose of this charter, shall be held to include all of the island of Oahu."

SEC. 2. That said act 30 of the laws of 1903 of said Territory as amended and approved by an act of Congress approved April 21, 1904, is hereby further amended by adding a new section thereto to be known as section 7A (and to be known as section 911A, revised laws of Hawaii, 1915), and reading as follows:

"The franchise and the person or corporation holding the same shall be subject as to reasonableness of rates, prices, and charges, and in all other respects to the provisions of chapter 128 of the revised laws of Hawaii, 1915, creating a public utilities commission and all amendments thereof for the regulation of the public utilities in said Territory, and all the powers and duties expressly conferred upon or required of the superintendent of public works or the courts of said act creating said franchise, are hereby conferred upon and required of said public utilities commission and any commission of similar character that may hereafter be created by the laws of said Territory."

SEC. 3. That the public utilities commission of the Territory of Hawaii is hereby granted the power to order the Honolulu Gas Co. (Ltd.), its successors or assigns, to make extensions of its service lines within the island of Oahu whenever it shall be made to appear that said extension is a public necessity and that said extension or extensions can be made to earn a reasonable profit on the cost and maintenance of the same: *Provided*, That all orders of the public utilities commission herein provided for shall be subject to review by the courts of said Territory.

SEC. 4. That Congress or the Legislature of the Territory of Hawaii, with the approval of Congress, may at any time alter, amend, or repeal this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

HAWAIIAN ELECTRIC CO. (LTD.).

The bill (S. 5274) to ratify, approve, and confirm an act duly enacted by the Legislature of the Territory of Hawaii amending the franchise held by the Hawaiian Electric Co. (Ltd.), by extending it to include all of the island of Oahu, Territory of Hawaii, was considered as in Committee of the Whole.

The bill was read, as follows:

Be it enacted, etc., That the act of the Legislature of the Territory of Hawaii entitled "An act amending the franchise held by the Hawaiian Electric Co. (Ltd.) by extending it to include all of the island of Oahu, Territory of Hawaii," is hereby ratified, approved, and confirmed, and section 1 of act 48 of the laws of 1903 of the Territory of Hawaii, as amended and approved by the act of Congress approved April 21, 1904 (now sec. 836 of the Rev. Laws of Hawaii, 1915), is hereby amended by striking therefrom the following:

"(b) 'Honolulu' or 'district of Honolulu,' shall refer to, include, and mean all of that portion of the island of Oahu included in the taxation, educational, and judicial district now defined by law as 'Honolulu district,' or the 'district of Honolulu.'"

SEC. 2. That section 2 of act 48 of the laws of 1903 of said Territory (sec. 837 of the Rev. Laws of Hawaii, 1915), as amended and approved by the act of Congress approved April 21, 1904, is hereby further amended to read as follows:

"Electric power, manufacture, sale, etc.: The right is hereby granted to the Hawaiian Electric Co. (Ltd.) as a body corporate under that or such other name as the said company may hereafter adopt, and its successors and assigns, to manufacture, sell, furnish, and supply electric light, electric current, or electric power on the island of Oahu, Territory of Hawaii, for lighting the streets, roads, public or private buildings, or for motive power, or for any other purpose which it or they may deem advisable, and from time to time, for the purposes above mentioned, to construct, maintain, and operate suitable poles, lines, wires, cables, lamps, lamp-posts, conductors, conduits, and such other appliances and appurtenances as may from time to time be necessary for the transmission, distribution, or supply of electricity to the consumers thereof, under, along, upon, and over the streets, sidewalks, roads, squares, bridges, alleys, and lanes in said island of Oahu and to connect the said lines, wires, and conductors with any manufactory, private or public building, lamp, lamp-post, or other structure or object with the place of supply."

SEC. 3. That section 3 of act 48 of the laws of 1903 of said Territory, as approved by the act of Congress approved April 21, 1904 (now section 838 of the Revised Laws of Hawaii, 1915), is hereby amended so as to read as follows:

"Power houses, etc.: Said company shall also have the right to maintain and operate its present light and power station on the corner of Halekauwila and Alakea Streets, in Honolulu, said island of Oahu, and also to construct, maintain, and operate, at such points as may from time to time be necessary, light and power stations or houses, or such other buildings and structures as may be necessary and proper, and to use machinery therein for the purposes of the company."

SEC. 4. That said act 48 of the laws of 1903 of said Territory, as amended and approved by the act of Congress approved April 21, 1904, is hereby further amended by adding a new section thereto to be known as section 15A (and to be known as section 850A of the Revised Laws of Hawaii, 1915), and reading as follows:

"This franchise, and the person or corporation holding the same, shall be subject as to reasonableness of rates, prices, and charges, and in all other respects to the provisions of chapter 128 of the Revised Laws of Hawaii, 1915, creating a public-utilities commission, and all amendments thereof, for the regulation of the public utilities in said Territory, and all the powers and duties expressly conferred upon or required of the superintendent of public works or the courts by said act creating said franchise are hereby conferred upon and required of said public-utilities commission."

SEC. 5. That the public-utilities commission of the Territory of Hawaii is hereby granted the power to order the Hawaiian Electric Co. (Ltd.), its successors or assigns, to make extensions of its service lines within the island of Oahu, whenever it shall be made to appear that said extension is a public necessity and that said extension or extensions can be made to earn a reasonable profit on the cost and maintenance of the same: *Provided*, That all orders of the public-utilities commission herein provided for shall be subject to review by the courts of said Territory.

SEC. 6. That Congress, or the Legislature of the Territory of Hawaii with the approval of Congress, may at any time alter, amend, or repeal this act.

Mr. OWEN. Mr. President, I should like to ask the Senator reporting that bill if the public-utilities authorities have a right to fix the price?

Mr. SHAFROTH. Yes; they have that right under the law. This is a bill which must be ratified by the Congress of the United States. It is an act of the Territory of Hawaii.

Mr. OWEN. It provides for public supervision and control?

Mr. SHAFROTH. Yes; it provides for the supervision and control by the public-utilities commission.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PUBLIC-UTILITY FRANCHISES IN HAWAII.

The bill (S. 5776) to amend certain public-utility company franchises in the Territory of Hawaii, was considered as in Committe of the Whole. It provides that each and every public-utility company operating within the Territory of Hawaii under

any franchise or charter heretofore approved or granted by the Congress of the United States shall, within one month after the expiration of each calendar year, pay to the treasurer of the county in which said company operates such per cent of the gross receipts of said company for the preceding calendar year as its franchise now requires it to pay to the Territory of Hawaii; and that all acts and parts of acts inconsistent with this enactment are repealed.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

NATIONAL PARK, TERRITORY OF HAWAII.

The bill (H. R. 9525) to establish a national park in the Territory of Hawaii, was considered as in Committee of the Whole.

Mr. OVERMAN. Mr. President, I should like to ask the Senator where this park is?

Mr. SHAFROTH. This park is on the Island of Hawaii. It includes the great volcano, and also takes in another volcano. They are very rare curiosities, as it were, because of the fact that they are live volcanoes. One of them is now in a very violent state of eruption. It has overflowed, and the lava extends nearly down to the sea.

Mr. THOMAS. What is the acreage?

Mr. SHAFROTH. I do not know the acreage.

Mr. OVERMAN. Does it carry any appropriation?

Mr. SHAFROTH. I do not think there is any appropriation in the bill; no.

Mr. SMITH of Georgia. Is it public land?

Mr. SHAFROTH. Yes; it is land acquired at the time of the acquisition of the islands. There is an appropriation of $10,000. No——

Mr. OVERMAN. I object to it.

Mr. SHAFROTH. I do not believe there is any appropriation. It is a limitation, instead of an appropriation.

Mr. OVERMAN. I have been on the island, and I am in favor of making it a national park; but there is no appropriation needed. It is public land, wild land. There is nobody living there.

Mr. SMITH of Georgia. I suggest to the Senator that the appropriation be stricken out.

Mr. SHAFROTH. There is no appropriation in it. It is a proviso, reading as follows:

That no appropriation for the maintenance, supervision, and improvement of said park in excess of $10,000 annually shall be made unless the same shall have first been expressly authorized by law.

I do not remember any provision in the bill for an appropriation except that limitation.

Mr. LANE. Mr. President, it should not cost anything to maintain a volcano.

Mr. SHAFROTH. No; but you have got to have some supervision of the park.

Mr. OVERMAN. I suggest to the Senator to strike that out and let it pass.

Mr. SHAFROTH. Rather than let the bill go over, I will move to strike that out. I offer an amendment striking out the first proviso on page 8, beginning with the word "*Provided*," in line 8, and extending to the word "law," in the twelfth line of the same page.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 8, line 8, it is proposed to strike out the following words:

Provided, That no appropriation for the maintenance, supervision, and improvement of said park in excess of $10,000 annually shall be made unless the same shall have first been expressly authorized by law.

Also the word "*And*" and the word "*further*" in line 12, after the proviso just read.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

EDWARD J. LYNCH.

The bill (S. 5495) for the relief of Edward J. Lynch, collector of internal revenue for the district of Minnesota, was considered as in Committee of the Whole. It authorizes and directs the Secretary of the Treasury to credit Edward J. Lynch, collector of internal revenue for the district of Minnesota, and his accounts with the sum of $35,207.14½, being the value of currency, coin, and various kinds of stamps charged to him and which were stolen from the vault of his office during the night of January 6, 1916, together with other stamps which have since been returned to him.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

REFUND OF DUTIES ON FLAX-PREPARATORY MACHINES, ETC.

The bill (S. 4384) providing for the refund of duties collected on flax-preparatory machines, parts, and accessories imported subsequently to August 5, 1909, and prior to January 1, 1911, was considered as in Committee of the Whole. It authorizes and directs the Secretary of the Treasury to pay, out of any money in the Treasury not otherwise appropriated, to the Linen Thread Co., of No. 96 Franklin Street, New York City, the sum of $23,239.35, being the amount of duties collected on flax-preparatory machines, parts thereof, and accessories thereto, imported subsequently to August 5, 1909, and prior to January 1, 1911.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

COPPER RIVER & NORTHWESTERN RAILWAY CO.

The bill (S. 5268) for the relief of the Copper River & Northwestern Railway Co. was considered as in Committee of the Whole. It authorizes and directs the Secretary of the Treasury to pay to the Copper River & Northwestern Railway Co., a corporation organized and existing under the laws of the State of Nevada, the sum of $3,102.92, in refund of the gross income tax paid by said company to the collector of internal revenue at Tacoma, Wash., on May 21, 1915, pursuant to a tax levied under the act of Congress approved July 18, 1914 (38 Stats., p. 517), for the period beginning January 1 and ending June 30, 1914, for which period said company had previously paid the license fee or tax provided by the act approved March 3, 1899 (30 Stats., pp. 1336, 1337), as amended by the act approved June 6, 1900 (31 Stats., pp. 330, 331).

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PUBLIC BUILDING AT PRESCOTT, ARIZ.

The bill (S. 1045) to provide for the erection of a public building at Prescott, in the State of Arizona, was considered as in Committee of the Whole. It authorizes and directs the Secretary of the Treasury to erect on the site heretofore authorized to be acquired by the United States a suitable building, including fireproof vaults, heating and ventilating apparatus, elevators, and approaches, complete, for the use and accommodation of the United States post office, Federal court, and other Government offices in the city of Prescott, in the State of Arizona, the cost of said building, including said vaults, heating and ventilating apparatus, elevators, and approaches not to exceed the sum of $100,000.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

SITE FOR PUBLIC BUILDING AT BISBEE, ARIZ.

The bill (S. 1046) to provide for the purchase of a site for a public building in the city of Bisbee, Ariz., was considered as in Committee of the Whole.

The bill had been reported from the Committee on Public Buildings and Grounds with an amendment, in section 1, line 6, after the words "sum of," to strike out "$35,000" and insert "$25,000," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to acquire, by purchase or otherwise, a site on which to erect a public building at the city of Bisbee, in the State of Arizona, and the sum of $25,000, or so much thereof as may be necessary, is hereby appropriated for the same.

SEC. 2. That no money hereby appropriated shall be available until a valid title to the site for said building shall be vested in the United States.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER.

The bill (S. 5854) to provide for the erection, furnishing, and equipping of a building in the city of Washington, D. C., for the Department of Justice was announced as next in order.

Mr. SHAFROTH and Mr. CHILTON. Let that go over.

The PRESIDING OFFICER. The bill will be passed over, under objection.

The bill (H. R. 308) to amend the act to regulate commerce, as amended, and for other purposes was announced as next in order.

Mr. OVERMAN. I do not think that ought to pass.

Mr. SMITH of Arizona. That ought to go over.

The PRESIDING OFFICER. The bill will be passed over, under objection.

ADDITIONAL LAND DISTRICT, CALIFORNIA.

The bill (H. R. 529) creating an additional land district in the State of California, and for other purposes, was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

FRANCES L. LLEWELLYN.

The bill (H. R. 4297) for the relief of Frances L. Llewellyn was considered as in Committee of the Whole. It authorizes and directs the Secretary of the Interior to allow Frances L. Llewellyn to enter, under the homestead law and subject to the terms, conditions, and limitations of the reclamation act and acts amendatory thereof, lots 1, 4, 5, and 6 and the southeast quarter of the northeast quarter of section 15, township 21 south, range 1 west of the New Mexico principal meridian, New Mexico, Las Cruces, N. Mex., land district, provided that the entry and patent therefor shall expressly reserve to the United States the right to take for use, without compensation to entryman, patentee, or her assigns, any or all of the said lands which may be actually needed for or in connection with the construction, operation, and maintenance of the Rio Grande reclamation project.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER.

The bill (S. 5716) to establish the Mount McKinley National Park, in the Territory of Alaska, was announced as next in order.

Mr. THOMAS and Mr. OVERMAN. Let that bill go over.

The PRESIDING OFFICER. The bill will be passed over.

CHARLESTON-DUNBAR TRACTION CO.

The bill (S. 5103) authorizing and directing the Secretary of War to lease to Charleston-Dunbar Traction Co. a certain strip or parcel of land owned by the United States Government on the Great Kanawha River in West Virginia, was considered as in Committee of the Whole. It authorizes and directs the Secretary of War to lease, at a nominal rental value of not exceeding $25 per year, to the Charleston-Dunbar Traction Co., a corporation, its successors or assigns, the strip of land 15 feet wide and 601.8 feet long, or approximately twenty-one hundredths of an acre, which said strip of land is situated at or near United States Government Lock and Dam No. 6 of the Great Kanawha River improvement, near the city of Charleston, in the State of West Virginia, which said strip of land said Charleston-Dunbar Traction Co. is now occupying with its track; provided that said annual rental shall be promptly paid as required by the Secretary of War, and that the United States Government shall sustain no loss or expense by reason of said lease to said traction company, and provided further that said traction company shall not fence up said strip of land unless required to do so by the Secretary of War, and shall, at its own expense, keep up and maintain the existing crossings over said traction company's line on the Government property, and provided further that said traction company shall not remove its station or stop upon or near the Government's said property as said stop and station is at present located.

Mr. CHILTON. Mr. President, there is a mistake in the notation in the calendar. It should state that this bill was reported from the Committee on Commerce instead of from the Committee on Military Affairs.

I do not want to have it read, but I ask permission to have inserted in the RECORD the letter of the Secretary of War approving this bill.

The PRESIDING OFFICER. Without objection, that may be done.

The letter referred to is as follows:

WAR DEPARTMENT,
Washington, March 25, 1916.

Hon. GEORGE E. CHAMBERLAIN,
Chairman Committee on Military Affairs,
United States Senate.

SIR: I beg to acknowledge the reference to this department of Senate bill No. 5103, Sixty-fourth Congress, first session, authorizing and directing the Secretary of War to lease to Charleston-Dunbar Traction Co. a certain strip or parcel of land owned by the United States Government on the Great Kanawha River, in West Virginia.

The Charleston-Dunbar Traction Co., the grantee named in the bill, operates a traction and gas line from the city of Charleston to the suburban town of Dunbar, W. Va. When the line was under construction in 1911 the company applied for permission to cross the lands of the United States at Lock No. 6, Kanawha River, but as the project contemplated the permanent occupation of Government property, and as the Secretary of War was not vested with power to grant such a privilege, the application was denied. Subsequently the company requested a temporary lease to be used pending action by Congress on an application for a permanent right of way, and on August 30, 1911, the company was granted a lease of the right of way for a period of one year at an annual rental of $150, on condition that the lessee should obtain from Congress at the earliest opportunity the necessary legislation for occupancy of the land. This lease was thereafter extended by the department, from time to time, an additional four years, covering the period up to September 1, 1916, on which date the full five-year period for which the Secretary of War is now authorized by law to lease public property will expire. The object of the bill under consideration is to authorize the Secretary to continue leasing the property indefinitely.

The land in question is on the abutment side of Dam No. 6, Kanawha River, and its occupation by the traction line has not been objectionable, and it is believed that its future use for the same purpose will not be harmful to the public interests. With respect to the rental to be paid by the company, it is proper to say that the amount now paid under the existing lease is recognized as being far in excess of the rental value of the property, but this high charge was imposed for the purpose of insuring compliance with that condition of the lease requiring the company to obtain the authority of Congress. It is thought that, in view of the small area of land occupied, and its inconsiderable value to the Government, the charge of $25 per year, as proposed in the bill, is a fair one.

I see no objection to the proposed measure, and with the addition of the usual repeal clause its enactment by Congress will be satisfactory to this department.

It is deemed appropriate to add that the land in question is not military land but was acquired by the Government for use in connection with the improvement of the Kanawha River to which work it pertains; and I have the honor to suggest, therefore, that the bill should also be considered by the Senate Committee on Commerce.

Very respectfully,

NEWTON D. BAKER,
Secretary of War.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILL PASSED OVER.

The bill (S. 681) providing for the election of a Delegate to the House of Representatives from the District of Columbia, and for other purposes, was announced as next in order.

Mr. OVERMAN. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

PUBLIC BUILDING, DURANGO, COLO.

The bill (S. 5724) authorizing the construction of a public building in the city of Durango, Colo., was considered as in Committee of the Whole.

The bill had been reported from the Committee on Public Buildings and Grounds with an amendment, on page 1, line 3, after the word "section," to strike out "four" and insert "three," so as to make the bill read:

Be it enacted, etc., That so much of section 3 of the public-building act, approved March 4, 1913 (37 Stat., p. 871), as authorizes the erection of a public building for the United States post office in the city of Durango and State of Colorado, be, and the same is hereby, amended so as to authorize and direct the Secretary of the Treasury to erect and complete a suitable building, including fireproof vaults, heating and ventilating apparatus, elevators, and approaches, complete, for the use and accommodation of the United States post office, Federal court, and other Government offices, upon ground already purchased by the Government for such purpose and now owned by the United States, the cost of such building not to exceed the sum of $150,000.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

BILLS, ETC., PASSED OVER.

The bill (S. 5675) for the relief of John Henry Gibbons, captain on the retired list of the United States Navy, was announced as next in order.

Mr. OVERMAN. Let that go over.

The PRESIDING OFFICER. The bill will be passed over.

The resolution (S. Res. 195) amending Rule XXII of the standing rules of the Senate was announced as next in order.

Mr. JONES. I object.

The PRESIDING OFFICER. The resolution will be passed over.

POST-OFFICE SITE AND BUILDING, MILLVILLE, N. J.

The bill (S. 5398) to increase the limit of cost of post-office site and building at Millville, N. J., was considered as in Committee of the Whole. It provides that the act of Congress approved June 25, 1910 (36 Stats., p. 681), authorizing the Secretary of the Treasury to contract for the acquisition of a site and for the erection and completion thereon of a suitable building, including fireproof vaults, heating and ventilating apparatus and approaches, complete, for the use and accommodation of the United States post office and other governmental offices at Millville, N. J., shall be and is amended so as to increase the limit of cost for said site and building from $55,000 to $105,000.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CHARLES H. BINGHAM.

The bill (S. 5863) authorizing the health officer of the District of Columbia to issue a permit for the removal of the remains of the late Charles H. Bingham from Congressional Cemetery, District of Columbia, to Lock Haven, Pa., was considered as in Committee of the Whole.

The bill had been reported from the Committee on the District of Columbia with an amendment, on page 1, line 7, after the word "Pennsylvania," to insert "but such permit shall not be issued until there has been filed in the health department of the District of Columbia a permit from the proper governmental authorities at the place where said cemetery is located authorizing the interment there of said remains," so as to make the bill read:

Be it enacted, etc., That the health officer of the District of Columbia be, and he is hereby, authorized to issue a permit for the removal of the remains of the late Charles H. Bingham from Congressional Cemetery, District of Columbia, to Lock Haven, Pa., but such permit shall not be issued until there has been filed in the health department of the District of Columbia a permit from the proper governmental authorities at the place where said cemetery is located authorizing the interment there of said remains.

The amendment was agreed to.

Mr. STERLING. Mr. President, I desire to offer an amendment, as follows:

In line 4, after the word "permit," I move to insert the words "to Charles Bingham," as the person who is to get the permit; then, on line 5, after the word "of," I move to insert the words "his son."

The PRESIDING OFFICER. The Secretary will read that part of the bill as it would read if amended.

The SECRETARY. If amended, that part of the bill would read:

That the health officer of the District of Columbia be, and he is hereby, authorized to issue a permit to Charles Bingham for the removal of the remains of his son, the late Charles H. Bingham, from Congressional Cemetery, District of Columbia, to Lock Haven, Pa., etc.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. OVERMAN. Mr. President, it is now quarter to 5 o'clock. I think the Senate should adjourn.

Mr. MYERS. Mr. President, I hope the Senator will not insist upon that motion.

Mr. OVERMAN. The Senator from Montana has had more bills on this calendar passed than any other Senator.

Mr. MYERS. There are a lot of other Senators here having little bills which have not yet been reached. We do not go through the calendar once a year. Let us go on. We are going to reach some of importance in a very few minutes. We ought to work until 6 o'clock. I wish we could go on until 7.

Mr. OVERMAN. There are a good many bills being passed here that ought not to be passed.

BILLS PASSED OVER.

The bill (S. 3776) providing for the establishment of a radio station on Unga Island, Alaska, was announced as next in order.

Mr. OVERMAN. I object.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 6047) to carry out the purposes mentioned in section 3 of the act of March 1, 1911, entitled "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers," was announced as next in order.

Mr. OVERMAN. I object.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 778) to amend an act entitled "An act to establish the Glacier National Park in the Rocky Mountains south of the international boundary line, in the State of Montana, and for other purposes," approved May 11, 1910, was announced as next in order.

Mr. OVERMAN. I object.

The PRESIDING OFFICER. The bill will be passed over.

LANDS IN WASHINGTON.

The bill (S. 5615) granting certain lands to the board of park commissioners of the State of Washington for park purposes, was announced as next in order.

Mr. OVERMAN. I object.

Mr. JONES. Mr. President, I hope the Senator will not object to the consideration of that bill. It is simply a local bill, granting a small amount of land in the State of Washington for public-park purposes. It is a short bill.

Mr. MYERS. I hope, too, that the Senator will not object. This is a bill reported from the Committee on Public Lands. We have to put these little bills through at some time.

The PRESIDING OFFICER. Does the Senator from North Carolina insist upon his objection?

Mr. OVERMAN. I withdraw the objection. I think we ought to adjourn, though.

The Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Public Lands, with amendments, on page 1, line 3, after the word "the," to strike out "Board of Park Commissioners of the," and, in line 6, page 1, after the word "acres," to insert "*Provided*, That whenever these lands shall cease to be used as a public park by the said State of Washington, or the same shall be devoted to other uses, the title thereto shall revert to the United States free and clear of all incumbrance," so as to make the bill read:

Be it enacted, etc., That there be, and there is hereby, granted to the State of Washington for park purposes all of section 26, township 25 north, range 21 east of the Willamette meridian, except the south one-half of the southeast one-quarter of said section; in all, 560 acres: *Provided*, That whenever these lands shall cease to be used as a public park by the said State of Washington or the same shall be devoted to other uses the title thereto shall revert to the United States free and clear of all incumbrance.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill granting certain lands in the State of Washington for park purposes."

BILL PASSED OVER.

The bill (S. 790) to repeal an act entitled "An act to amend section 3 of the act of Congress of May 1, 1888, and extend the provisions of section 2301 of the Revised Statutes of the United States to certain lands in the State of Montana embraced within the provisions of said act, and for other purposes," was announced as next in order.

Mr. OVERMAN. I object.

The PRESIDING OFFICER. The bill will be passed over.

MISSOULA NATIONAL FOREST, MONT.

The bill (S. 5082) adding certain lands to the Missoula National Forest, Mont., was announced as next in order.

Mr. OVERMAN. I object.

Mr. MYERS. Do I understand that this bill is objected to?

Mr. OVERMAN. Yes. However, I see that it is a bill reported by the Senator from Montana and is from his home town.

Mr. MYERS. It is a very harmless little bill.

Mr. OVERMAN. I withdraw the objection.

Mr. MYERS. I thank the Senator.

The Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Public Lands with amendments, on page 1, line 3, after the word "following" to strike out "described areas, namely," and insert "unsurveyed areas which, by protraction of the public surveys in adjoining townships, would probably be described as," and on line 7, page 1, after the word "west," to strike out "Montana principal meridian" and insert "and," so as to make the bill read:

Be it enacted, etc., That the following unsurveyed areas which by protraction of the public surveys in adjoining townships would probably be described as section 1, section 2, section 11, and section 12, all in township 9 north, range 15 west, and section 25, section 35, and section 36, all in township 10 north, range 15 west, Montana principal meridian, be, and the same are hereby, included in and made a part of the Missoula National Forest, subject to all prior valid adverse rights, and that said lands shall hereafter be subject to all laws affecting national forests.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER.

The bill (S. 5772) to provide for the sinking of artesian wells, and for other purposes, was announced as next in order.

Mr. OVERMAN. I object.

The PRESIDING OFFICER. The bill will be passed over.

Mr. MYERS. Mr. President, I hope the Senator will withdraw his objection unless he is making it understandingly, and really has a valid objection to the bill. It is a meritorious bill.

Mr. OVERMAN. My recollection is that we had quite a debate on this bill at the last session.

Mr. MYERS. Oh, no; not on this bill. This has never been introduced before.

Mr. OVERMAN. This is a bill providing for the sinking of artesian wells, is it not?

Mr. MYERS. Yes, sir; in a district which is very arid.

Mr. OVERMAN. I think it ought to go over.

Mr. MYERS. It is strongly recommended by the Interior Department.

Mr. OVERMAN. I object to it, Mr. President.

Mr. MYERS. It is unanimously recommended by the members of the Senate Committee on Public Lands who were present when it was considered.

The PRESIDING OFFICER. Objection being made, the bill will be passed over.

The bill (H. R. 4866) for the relief of Julia R. Goodloe was announced as next in order.

Mr. OVERMAN. I object.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 782) granting additional rights to settlers on reclamation projects was announced as next in order.

Mr. OVERMAN. I object.

The PRESIDING OFFICER. The bill will be passed over.

VALIDATION OF HOMESTEAD ENTRIES.

The bill (S. 5379) validating certain homestead entries was announced as next in order.

Mr. OVERMAN. I object.

Mr. SMITH of Arizona. I move that we adjourn. There is no use in going further with the calendar.

Mr. MYERS. Mr. President, let me have a word with the Senator from North Carolina.

Mr. OVERMAN. The Senator from Montana is interested in almost every bill that comes up.

Mr. MYERS. This is a bill carrying no appropriation. There can be no objection to it. It simply validates the title——

The PRESIDING OFFICER. The Senator from Montana is not in order.

Mr. MYERS. I will ask the Senator from North Carolina if he will not withdraw his objection to Senate bill 5379?

Mr. OVERMAN. Very well; let the Senator pass it.

The PRESIDING OFFICER. Does the Senator from North Carolina withdraw his objection?

Mr. OVERMAN. I withdraw the objection.

The Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Public Lands with amendments, to insert two new sections at the end of section 1, so as to make the bill read:

Be it enacted, etc., That all pending homestead entries made in good faith prior to January 1, 1916, under the provisions of the enlarged-homestead laws, and all rights to enter land under said laws, based on settlement made thereon in good faith before said date and while the land was unsurveyed, by persons who before making such enlarged-homestead entry had acquired title to land under the homestead laws and therefore were not qualified to make an enlarged-homestead entry or such settlement, be, and the same are hereby, validated, if in all other respects regular, in all cases where the original homestead entry was for less than 160 acres of land: *Provided*, That no settlement claim shall be validated hereby where adverse claim for the land has been initiated before the passage of this act.

SEC. 2. That no homestead entry heretofore made under the provisions of section 2 of the act of Congress entitled "An act for the relief of the Colorado Cooperative Colony, to permit homestead entries in certain cases, and for other purposes," approved June 5, 1900, shall be canceled for the reason that the former entry made by the entryman was commuted under the provisions of an act entitled "An act relating to the public lands of the United States," approved June 15, 1880 (21 Stat., p. 237). And all entries heretofore canceled on the ground that an entryman who commuted under the provisions of said act of June 15, 1880, is not entitled to the benefits of the act of June 5, 1900, shall be reinstated upon a showing by the entryman or his heirs, within one year from the approval of this act, that there were no valid grounds for the cancellation of such entries except that a former entry was perfected under the act of June 15, 1880, in all cases where valid adverse rights have not attached to the lands covered by such second entries since the date of their cancellation.

SEC. 3. That the provisions of the act approved March 3, 1911 (36 Stat. L., p. 1084), are hereby extended to a period of six months after the passage of this act, provided that proper application for reinstatement of the homestead entries mentioned in section 1 of said act or for the exercise of preference right mentioned in section 11 shall be filed in the proper land office within the said period of six months.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. OVERMAN. Mr. President, I want to say that if there is any other Senator who desires to have any particular bill on the Calendar passed, I shall be glad to have him bring it to the attention of the Senate.

PUBLIC BUILDING AT TAYLOR, TEX.

Mr. CULBERSON. I ask unanimous consent for the present consideration of Senate bill 5447.

The PRESIDING OFFICER. The Senator from Texas asks unanimous consent for the present consideration of a bill the title of which will be stated by the Secretary.

The SECRETARY. A bill (S. 5447) providing for the erection of a public building at Taylor, Tex.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

Mr. FLETCHER. Mr. President, I am not going to object to the consideration of this bill, but I have been waiting here all day to get to Order of Business 454, House bill 13112. The only objection to the motion to take it up this morning was because the motion was premature, and was made out of order. There is no objection to the bill, and I want to call attention to the fact that I am going to ask to take up Order of Business 454, because I have waited here all day to get it up.

Mr. CULBERSON. I simply made the request that I did because I understood we were about to adjourn.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas? The Chair hears none.

The Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Public Buildings and Grounds, with amendments, on line 6, after the words "post office," to insert "Department of Agriculture, and Civil Service Commission," and on line 12, after the words "sum of," to strike out "$75,000," and insert "$60,000," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized to erect a suitable building, with fireproof vaults therein, for the use and accommodation of the post office, Department of Agriculture, and Civil Service Commission, in the city of Taylor, State of Texas, upon the site now owned by the United States in said city.

The plans, specifications, and full estimates for said building shall be previously made and approved according to law and shall not exceed, for building complete, the sum of $60,000, which sum is hereby appropriated out of any money in the Treasury not otherwise appropriated.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

AMENDMENT TO THE SEAMEN'S ACT.

Mr. FLETCHER. Mr. President, I now ask unanimous consent for the present consideration of House bill 13112, to amend section 14 of the seamen's act of March 4, 1915. It will take only a moment to dispose of it. There is no objection to the bill.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Florida?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Th Secretary read the bill, as follows:

Be it enacted, etc., That section 14 of the seamen's act of March 4, 1915, be amended by striking out subdivisions 3 and 4 of subsection headed "Life jackets and life buoys," regarding the numbers of life buoys with which steamers navigating the ocean, or any lake, bay, or sound of the United States shall be equipped, and inserting, in lieu thereof, the following:

"Third. The minimum number of life buoys with which vessels are to be provided is fixed as follows:

"Vessels under 100 feet in length, minimum number of buoys, 2; vessels 100 feet and less than 200 feet in length, minimum number of buoys, 4, of which 2 shall be luminous; vessels 200 feet and less than 300 feet in length, minimum number of buoys, 6, of which 2 shall be luminous; vessels 300 hundred feet and less than 400 feet in length, minimum number of buoys, 12, of which 4 shall be luminous; vessels 400 feet and less than 600 feet in length, minimum number of buoys, 18, of which 9 shall be luminous; vessels 600 feet and less than 800 feet in length, minimum number of buoys, 24, of which 12 shall be luminous; vessels 800 feet and over in length, minimum number of buoys, 30, of which 15 shall be luminous.

"Fourth. All the buoys shall be fitted with beckets securely seized. Where two buoys only are carried, one shall be fitted with a life line at least 15 fathoms in length, and where more than two buoys are carried, at least one buoy on each side shall be fitted with a life line of at least 15 fathoms in length. The lights shall be efficient self-igniting lights which can not be extinguished in water and they shall be kept near the buoys to which they belong, with the necessary means of attachment."

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. FLETCHER. Mr. President, I should like to have the report of the House committee printed in connection with the bill.

The PRESIDING OFFICER. In the absence of objection, that may be done.

The report is as follows:

Mr. ALEXANDER, from the Committee on the Merchant Marine and Fisheries, submitted the following report:

The Committee on the Merchant Marine and Fisheries, to whom was referred the bill (H. R. 13112) to amend section 14 of the seamen's act of March 4, 1915, having considered the same, report it to the House with the recommendation that it do pass.

The bill amends subdivisions third and fourth of subsection 14, headed "Life jackets and life buoys," as regards the number of life

buoys with which steamers navigating the ocean or any lake, bay, or sound of the United States shall be equipped.

The third subsection referred to provides that the minimum number of life buoys on vessels under 400 feet in length shall be 12. The bill divides vessels under 400 feet in length into four classes, and provides the minimum number of life buoys with which vessels in these classes shall be as follows:

"Vessels under 100 feet in length, minimum number of buoys 2; vessels 100 feet in length and under 200 feet in length, minimum number of buoys 4, two of which shall be luminous; vessels more than 200 feet and under 300 feet in length, minimum number of buoys 6, of which two shall be luminous; vessels 300 feet and under 400 feet in length, minimum number of buoys 12, of which four shall be luminous."

The fourth subdivision is amended to conform in the matter of life buoys and life lines to subdivision 3 as amended by the bill.

Section 14 of the seamen's act contains the provisions of the International Convention on Safety of Life at Sea in respect of lifeboats, floats, rafts, life preservers, and other life-saving appliances and equipment, adopted at London, England, in January, 1914, to which this Government was a party. The convention was framed to apply to vessels of the signatory nations in the overseas trade. The committee in drafting section 14 of the seamen's act modified the provisions of the London convention in respect to vessels in our coastwise trade and on lakes, bays, and sounds, but overlooked the requirements as to life buoys on vessels under 400 feet in length.

Most of the vessels in the overseas trade are 300 feet long or over, and the provisions of the convention may reasonably apply to them. The same reason does not apply to the smaller vessels and particularly those on our lakes, bays, and sounds.

The seamen's act went into effect as to vessels of the United States on November 1, 1915, and when the provisions as regards life buoys were called to the attention of vessel owners by the Steamboat-Inspection Service they complained that they were unnecessarily severe and would work a hardship upon them. The owners of tug boats claimed that their crews are small and the spaces where the buoys might be placed were very limited.

A meeting of the representatives of the interests affected was held at the office of the Secretary of Commerce in December last, at which the Secretary of Commerce the Supervising Inspector General of the Steamboat-Inspection Service, the Commissioner of Navigation, the chairman of this committee, and a large delegation of agents and owners of vessels affected were present, and the whole question was considered, with the result that it was agreed that the amendments of the law proposed by the bill might reasonably be made and at the same time make ample provision in the matter of life buoys for saving life on vessels to which the bill applies.

M. A. SWEENEY SHIPYARDS & FOUNDRY CO.

Mr. KERN. Mr. President, I have a House bill for the relief of some very worthy people in Indiana, which I am very anxious to have passed before adjournment. It is House bill 13064, for the relief of the M. A. Sweeney Shipyards & Foundry Co.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It directs the Secretary of the Treasury to pay to the M. A. Sweeney Shipyards & Foundry Co., out of any money in the Treasury not otherwise appropriated, the sum of $2,635, which sum of money is appropriated for this purpose, the same being the amount of money withheld by the Government from said firm for building and constructing a steamboat named *John Ewens*.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

NATIONAL REUNION AND PEACE JUBILEE, VICKSBURG NATIONAL MILITARY PARK.

Mr. THOMAS. I ask unanimous consent to call up Order of Business 436, Senate bill 4176, authorizing and directing the Secretary of War to make certain provisions for the care of Federal and Confederate veterans.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

A bill (S. 4176) authorizing and directing the secretary of War to make certain provisions for the care of Federal and Confederate veteran soldiers who served in the War between the States, 1861 to 1865, to enable them to unite in participation of a national reunion and peace jubilee to commemorate the victories and virtues resulting in the half century of peace and prosperity to the American Nation, to be held in the national domain within the Vicksburg National Military Park, October 16, 17, 18, and 19, 1917.

Whereas a memorial celebration and peace jubilee was held at Gettysburg, Pa., on the fiftieth anniversary of the battle fought at that place during the War between the States in July, 1913, and such celebration gave to the veterans of the Union Army, known as the Army of the Potomac, and the Confederate Army, known as the Army of the Virginia, an opportunity in such a gathering of peace and unity; and

Whereas coincidently with that battle an equally important event to this country occurred in July, 1863, in the siege and defense of Vicksburg, the survivors of the Armies of the Tennessee and of the Mississippi, who participated in that siege, now desire to join in a national memorial celebration and peace jubilee to commemorate the victories and virtues leading to the half century of peace and prosperity to the American Nation, and, further, to strengthen the fraternal ties of brotherly amity in a United Nation of States: Therefore

Be it enacted, etc., That the Secretary of War be, and is hereby, authorized and directed as follows:

First. To provide and furnish all necessary sewerage, sanitation, and hospital service for health and accommodation of persons attending upon such occasion.

Second. To provide and furnish all necessary camp and garrison equipment for visiting veterans of the Civil War, together with all necessary rations and supplies, properly prepared and served, for such veterans during said celebration.

SEC. 2. That the steps hereinbefore authorized to be taken by the War Department shall be fully completed before the 14th day of October, 1917, and that all camp equipment, including tents, supplies, and rations shall be fully ready for occupancy and use.

SEC. 3. That the National Association of Vicksburg Veterans, formed in the city of Chicago, Ill., August 9, 1913, shall have charge of the order of exercises during the celebration; that the physical control of the camp and grounds and the movement of the troops and marching bodies therein shall be in the hands of the Secretary of War, under such officers as he may detail for that purpose.

SEC. 4. That there is hereby appropriated from the Treasury of the United States, out of funds not otherwise appropriated, such sum as may be necessary to carry out the foregoing provisions of this act, not exceeding the sum of $150,000: *Provided*, That out of the said sum of $150,000 thus appropriated no part thereof shall be available or expended for the purpose provided in this act until after January 1, 1917.

SEC. 5. That the Secretary of War is hereby authorized to reimburse and pay, out of the funds herein appropriated, the traveling expenses of the members of the council of administration or of the executive committee of the National Association of Vicksburg Veterans for journeys authorized by him to be taken in attendance upon meetings in the interest of this celebration. *Provided*, That the number of members shall at no time exceed seven at any one meeting.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PORTLAND, VANCOUVER & NORTHERN RAILWAY CO.

Mr. JONES. Mr. President, Order of Business 470, Senate bill 4550, is a purely local bill, and one of considerable urgency. I ask unanimous consent that it may be taken up and considered. It is a bill granting to the Portland, Vancouver & Northern Railway Co. a license to cross the Vancouver Barracks Military Reservation at Vancouver, Wash.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Military Affairs with amendments.

The PRESIDING OFFICER. The amendments of the committee will be stated.

The SECRETARY. On page 2, after line 16, the committee proposes to strike out all of section 3 as it appears in the bill, and in lieu thereof to insert:

SEC. 3. That the work shall be begun within one year after the approval of this act, and within 90 days after the approval of this act the said railway company shall furnish a bond to the satisfaction of the Secretary of War conditioned for the completion of the said railroad and other works mentioned herein across said reservation within two years after the approval of the said bond by the Secretary of War.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SECRETARY. On page 3, after line 6, the committee proposes to strike out all of section 4, and in lieu thereof to insert:

SEC. 4. That the work herein authorized shall be constructed in such manner, of such character, and with such spurs, switches, and crossings as may be prescribed by the Secretary of War, and shall be maintained and operated subject to such rules and regulations as he or the commander at the said post may from time to time prescribe.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SECRETARY. After the amendment just agreed to, the committee proposes to insert a new section, as follows:

SEC. 5. That the licensee shall bear one-third of the cost of macadamizing Fifth Street and the public road on the eastern boundary of the reservation for the distance they occupy said street and road; macadamizing of said street and road to be of such width as may be prescribed by the Secretary of War. The licensee shall bear one-third of the cost of maintenance of said street and road in addition to maintaining the space between the rails at all times in good condition for vehicle traffic.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SECRETARY. After the amendment just agreed to, on page 4, line 3, the committee proposes to change the number of the section from "5" to "6," and on line 5, after the word "road," to insert "work, lighting of track on roadway without expense to the United States," so as to make the section read:

SEC. 6. That the maintenance and operation of said railway within the limits of the reservation, including all road work, lighting of track on roadway without expense to the United States, and other work required to be done by the licensee in accordance with the provisions and conditions of this instrument, or deemed necessary or advisable by the Secretary of War, shall be subject to the supervision and approval of the post commander and to such regulations as he may from time to time prescribe in the interests of good order, police, sanitation, discipline, public safety, and the conservation of the interests of the Government.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SECRETARY. The committee also proposes to change the numbers of sections 6 and 7 to 7 and 8, respectively, in accordance with the amendments made.

The PRESIDING OFFICER. The question is on agreeing to the amendments.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. OVERMAN. I move that under the unanimous-consent agreement the Senate adjourn.

Mr. BANKHEAD. Pending that, I ask unanimous consent that the Senate proceed to the consideration of House bill 10484, commonly called the Post Office appropriation bill.

Mr. OVERMAN. I object.

The PRESIDING OFFICER. Objection is made.

Mr. OVERMAN. I move that the Senate adjourn, in accordance with the unanimous-consent agreement.

The motion was agreed to; and (at 4 o'clock and 55 minutes p. m.), under the order previously made, the Senate adjourned until Thursday, June 8, 1916, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

SATURDAY, *June 3, 1916.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Thou who art from everlasting to everlasting, through whose eternal energy all things are evolved, guide us by Thy counsels through this day that our thoughts, words, and deeds may harmonize with Thy will. For Thine is the kingdom and the power and the glory forever. Amen.

The Journal of the proceedings of yesterday was read and approved.

PREPAREDNESS, PATRIOTISM, AND FLAG DAY.

Mr. HULBERT. Mr. Speaker, I ask unanimous consent that I may address the House for two minutes.

The SPEAKER. Is there objection?

There was no objection.

Mr. HULBERT. As the RECORD stands, it would appear from interrogatories which I propounded to the gentleman from Maryland [Mr. LINTHICUM] yesterday that I was opposed to the spirit of the canvass which was conducted by a newspaper in Baltimore upon the subject of preparedness. Prior to the convening of this session of Congress I sent out to every registered voter in the twenty-first congressional district of New York, which I have the honor to represent, a list of questions, which I ask unanimous consent to insert in the RECORD, to which I have received over 7,000 replies, indicating that at least 80 per cent of the people in my district favored an increase in the Army and 90 per cent favored an increase in the Navy.

List of questions sent out to constituents:

1. Do you favor an increase in the Army?
2. To what extent?
3. Do you favor an increase in the Navy?
4. To what extent?
5. Do you approve the foreign policies of the administration:
(a) As to Germany in connection with the submarine controversy?
(b) As to Great Britain in connection with trade questions?
(c) As to Haiti?
(d) As to Mexico?
(e) As to Japan?
6. Do you favor an embargo on the exportation of munitions of war?
7. Do you favor a tax upon the manufacture of munitions of war for export?
8. Do you favor any changes in the tariff?
9. Do you favor continuance of the duty on sugar?
10. Would you be opposed to placing a duty on matches, both for the purpose of raising revenue and as a matter of safety in the regulation of their manufacture and sale?
11. Do you favor the withdrawal of the United States from the Philippines?
12. Do you favor the adoption of an amendment to the Federal Constitution granting suffrage to women?
13. Do you favor the adoption of an amendment to the Federal Constitution prohibiting the sale of liquor?
14. Do you favor the administration's ship-purchase bill?
15. Do you favor a special bond issue in order to secure an appropriation for the improvement of the Harlem and East Rivers to increase the commercial benefits of New York Harbor?
16. Do you approve of the assignment by the Secretary of War of an Army officer to orphan asylums and juvenile correctional institutions for the instruction of its inmates in the rudiments of military tactics?
17. Do you favor the use of public buildings for the education of special classes of aliens seeking citizenship in the patriotic history and rudiments of our governmental institutions?
18. Will you serve on a committee to promote civic interests of a national character in the district?

Name ——— ———.
Address ——— ———,

(Please fill out, sign your name as above, and mail to Congressman MURRAY HULBERT, 457 House Office Building, Washington, D. C.)

While upon the subject of preparedness I desire to place in the RECORD two letters written by me to the Secretary to the President of the United States upon the issuance of a proclamation relative to the 14th of June as Flag Day and requesting its observance, which action I took on behalf of the Benevolent and Protective Order of Elks, together with the proclamation of the President in accordance therewith, dated the 30th of May:

MARCH 18, 1916.

Hon. JOSEPH P. TUMULTY,
Secretary to the President, White House.

MY DEAR MR. TUMULTY: During my incumbency of the office of exalted ruler of New York Lodge, No. 1, I inaugurated a beautiful patriotic service and held same on June 14, 1912, to commemorate the birthday of the American flag. Since that time the grand lodge of the Benevolent and Protective Order of Elks has made the observance of this date in like manner compulsory in every one of the 1,400 lodges throughout the country under penalty of forfeiture of charter.

Articles have recently appeared with great frequency in various magazines and periodicals commenting upon the fact that the patriotism of this country was on the wane, but if this be true there has since been a noticeable acceleration.

In November of each year the President issues a proclamation calling upon all citizens to observe the last Thursday of November as the date upon which they should rightfully give thanks to Almighty God for the blessings He has bestowed upon them. May I not suggest with equal propriety, and hope that the President may deem it meet and proper to issue a proclamation in due course, calling up on all citizens of the United States to observe June 14, 1916, at least by displaying from every household and place of business the American flag and calling upon the people to arrange and participate in such patriotic services as they may, in their respective communities, deem advisable. Five hundred thousand members of the Benevolent and Protective Order of Elks, loyal citizens of the United States of America, would appreciate this service on the President's part in recognizing officially the day and date which they have been the first to dedicate to the patriotic cause of true Americanism.

Assuring you of my sincere appreciation of any personal effort you may show in this subject, I remain,

Cordially, yours,
MURRAY HULBERT.

MAY 26, 1916.

Hon. JOSEPH P. TUMULTY,
Secretary to the President, White House.

MY DEAR JOE: Some time since I took up with you the matter of asking the President to request the people, by public proclamation, to observe our National Flag Day on June 14. This is not a political or partisan matter but it seems to me making acknowledgment to our patriotism on this date as we acknowledge our gratitude to Almighty God on Thanksgiving Day.

My activity, as you know, has been stimulated by the fact that while exalted ruler of New York Lodge, No. 1, Benevolent and Protective Order of Elks, the mother lodge of Elkdom, I instituted a public, ritualistic ceremony which since has been adopted by the grand lodge and is observed in every one of the 1,400 lodges throughout the country and participated in by more than 500,000 American citizens, members of the order. I have received hundreds of communications from other patriotic organizations supplementing my endeavors, and I believe it would be in keeping with the policy of Americanizing the hundred million people who live under Old Glory if the President would take favorable action upon this request, and it certainly will not be setting a precedent that will be hard to follow, because no other similar appeal can be made to him founded upon any less worthy and patriotic cause. With kind personal regards, I remain,

Sincerely, yours,
MURRAY HULBERT.

WHITE HOUSE,
Washington, June 2, 1916.

Hon. MURRAY HULBERT,
House of Representatives.

MY DEAR MURRAY: Referring to your letters of March 18 and May 26, to your several talks with me, and your personal conference with the President on May 9, I have much pleasure in sending you herewith a copy of the proclamation which the President issued on May 30 suggesting the special observance of June 14 as Flag Day. I am sure this will please you, because I know how deeply interested you have been in this matter and how urgently you have pressed for this action.

Sincerely, yours,
J. P. TUMULTY,
Secretary to the President.

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA—A PROCLAMATION.

MY FELLOW COUNTRYMEN: Many circumstances have recently conspired to turn our thoughts to a critical examination of the conditions of our national life, of the influences which have seemed to threaten to divide us in interest and sympathy, of forces within and forces without that seemed likely to draw us away from the happy traditions of united purpose and action of which we have been so proud. It has therefore seemed to me fitting that I should call your attention to the approach of the anniversary of the day upon which the flag of the United States was adopted by the Congress as the emblem of the Union, and to suggest to you that it should this year and in the years to come be given special significance as a day of renewal and reminder, a day upon which we should direct our minds with a special desire of renewal to thoughts of the ideals and principles of which we have sought to make our great Government the embodiment.

I therefore suggest and request that throughout the Nation and, if possible, in every community the 14th day of June be observed as Flag Day, with special patriotic exercises, at which means shall be taken to give significant expression to our thoughtful love of America, our comprehension of the great mission of liberty and justice to which we have devoted ourselves as a people, our pride in the history and our enthusiasm for the political program of the Nation, our determination to make it greater and purer with each generation, and our resolution to demonstrate to all the world its vital union in sentiment and purpose, accepting only those as true compatriots who feel, as we do, the compulsion of this supreme allegiance. Let us on that day rededicate ourselves to the Nation, "one and inseparable," from which every thought that is not worthy of our fathers' first vows of independence, liberty, and right shall be excluded, and in which we shall

stand with united hearts for an America which no man can corrupt, no influence draw away from its ideals, no force divide against itself, a Nation equally distinguished among all the nations of mankind for its clear, individual conception alike of its duties and its privileges, its obligations and its rights.

In witness whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the city of Washington this 30th day of May, in the year of our Lord 1916 and of the independence of the United States of America the one hundred and fortieth.

[SEAL.] WOODROW WILSON.

By the President:
ROBERT LANSING,
Secretary of State.

I am also reminded of the fact that this is the birthday of Jefferson Davis, who will presently be eulogized, and in that connection I am going to ask, further, that I be permitted to have read from the Clerk's desk this poem, entitled "One Flag."

The SPEAKER. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD in the manner stated. Is there objection?

There was no objection.

The SPEAKER. The Clerk will read.

The Clerk read as follows:

ONE FLAG.

Never since fratricidal strife reddened our riven land,
When the flames of hate that brothers felt by the winds of war were fanned,
Has the day that we give to memories of a time when men were tried
In a furnace that cleansed the soul of them so filled our hearts with pride.

Pride that is sprung from the fervor of a vow renewed to-day
For a flag that flies for men to see that there is no foe in gray;
Our Northland graves are dear to us, but under the sycamore trees
From mounds where sleep the Southern brave 'tis one flag meets the breeze.

—Edward S. Van Zile.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had passed bill and joint resolution of the following titles, in which the concurrence of the House of Representatives was requested:

S. 5645. An act for the establishment of Noyes, in the State of Minnesota, as a port of entry and delivery for immediate transportation without appraisement of dutiable merchandise; and

S. J. Res. 139. Joint resolution making Wednesday, the 14th day of June, 1916, a legal holiday in the District of Columbia.

ENROLLED BILLS SIGNED.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 755. An act to incorporate the Boy Scouts of America, and for other purposes; and

H. R. 12835. An act to authorize and empower officers and enlisted men of the Navy and Marine Corps to serve under the Government of the Republic of Haiti, and for other purposes.

SENATE BILL AND JOINT RESOLUTION REFERRED.

Under clause 2 of Rule XXIV, Senate bill and joint resolution of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 5645. An act for the establishment of Noyes, in the State of Minnesota, as a port of entry and delivery for immediate transportation without appraisement of dutiable merchandise; to the Committee on Ways and Means.

S. J. Res. 139. Joint resolution making Wednesday, the 14th day of June, 1916, a legal holiday in the District of Columbia; to the Committee on the District of Columbia.

THE WILSON ADMINISTRATION.

Mr. ADAMSON. Mr. Speaker, in 1910 a Democratic House of Representatives terminated 16 years of uninterrupted Republican misrule. The Sixty-second Congress was more or less stormy, but the wise conduct of the Democrats, aided by discord in the dismembered Republican Party, split and floundering after its revelry of misdeeds and repudiated by the people, resulted in the election of a Democratic President and a Democratic Senate, with an overwhelmingly increased Democratic majority in the House for the Sixty-third Congress.

So small a number of States voted for either of the Republican candidates that the Electoral College was well-nigh unanimous for Woodrow Wilson and Marshall. The result was salutary for the country. The beginning of the Wilson administration ushered in a new era of good will in the United States. The iniquities of one-man rule in the House had been corrected during the Sixty-second Congress, though a Republican President was still in the White House and reform legislation during that Congress was impossible. The Underwood tariff bill, the first triumph of the Democratic administration, was the most fortunate legislative construction since the Walker tariff. The protectionists, who had long propped their dynasty with the false assertion that the Democratic Party was a free-trade party, were surprised to learn the truth—that the Democratic Party was a taxation party, believing that everything that entered our ports to compete with the products of our citizens ought to share with our own products in sustaining the burdens of the Government, and therefore everything ought to be taxed at a proper rate except a few absolute necessaries, luxuries being taxed most highly and necessaries at a much lower rate. Yet such taxation as was imposed inevitably and unavoidably carried some degree of incidental protection; enough, in fact, to satisfy any honest man. So that the protectionists were pleased and surprised to find that the Underwood bill did not verify their prediction and destroy their business. On the other hand, the reductions were so wise and beneficial, the removal of inequalities so general and salutary, that universal relief was realized by the people.

Freed from the shackles and bars of protection which excluded them from foreign markets our people were no longer the slaves of special interests which controlled both exports and imports, but were free to sell or exchange in all the markets of the world the boundless productions of our matchless industry and resources. So that the Underwood tariff bill was really a popular measure, the most satisfactory in 60 years. It not only permitted general prosperity among the people which increased by leaps and bounds but was a successful revenue producer, fully satisfying the demands of the Treasury. The most striking manifestation of the beneficence of the Underwood tariff was its remarkable effect upon the price of cotton. That great staple in all times of peace makes the cash balance of trade in favor of our country. For the first time in history, except during the Civil War and immediately following, when the world had lost four crops, cotton advanced immediately after the enactment of the Underwood tariff bill, so that in September and October, 1913, it commanded 12 and 13 cents per pound, absolutely unprecedented, and maintained that price until the breaking out of the universal war in 1914 obstructed the channels of commerce and temporarily closed our markets for cotton. Fortunately the genius of commerce recovering from the shock has adjusted its operations and necessities to the demands and exigencies of prolonged war so that not only has cotton recovered in price but the abnormal derangement of our revenues has been largely corrected so that cotton is again commanding a living price, and the Treasury is again receiving ample revenues for ordinary uses, not, of course, including increased expenses of our extraordinary preparations for the Army and Navy, in making which the Democrats have exhibited rare wisdom, prudence, and patriotism regardless of hysterical sensationalism of the jingoes on one side and criminal parsimony and obstruction of the pacificist on the other.

The companion piece of beneficial legislation exhibiting, as far as we know the consummation of human wisdom, was the Federal reserve act, which decentralized the control of money, guaranteed a sufficient supply for general distribution, and made it impossible for special interests to control it and produce shortage and panics. The one possible mistake was not in what the bill contained, but what it failed to contain. A number of us insisted all through the preparation of that legislation that it should include a provision specially adapted for the benefit of farmers, that it should provide for long-term loans on farmland security at low rates of interest. We insisted that the idea could consistently be incorporated in the system without injury to the general banking and commercial features of the scheme and could be administered with very little additional cost. While we failed at that time in that, we did succeed in providing for recognition of some farm products as bases of security, but not for accommodation rate of interest nor time necessary to help the farmer. If we could have succeeded at that time in our effort we could have prevented a terrible loss to the cotton producers, inflicted by the slump in price from 13 to 6 cents per pound following the breaking out of general war.

But we could not do all things at once, nor could we anticipate the war. No man could see a war cloud as big as a man's hand. Many men of many minds were unable to agree at that time, but we were pledged to some relief of that sort, and we kept working at it until we are now assured of success in legislating for farm loans. Though we can not reach back into the past and correct former errors and recoup or refund the losses already sustained, we hope to prevent their repetition in the future.

With the change of administration and a safer Democratic majority in both Houses, we succeeded in correcting the monu-

mental mistake we had made under the Taft administration in violating the equality pledge in our treaties as to canal tolls, which would have robbed the people of this country and our Treasury of two or three million dollars a year for the benefit of the opulent special interests which exclusively operate in the coastwise trade. We also during the Sixty-third Congress established a Federal Trade Commission, by which we hope so to *administer* present and future laws as largely to eliminate unfair and corrupt practices in interstate trade and render more healthy, as well as profitable, the domestic commerce of this country.

The correction and extension of the antitrust law was also a triumph of the Wilson administration. Time is too short to enumerate all the beneficial enactments so wise and so generally accepted that most of them received strong support on the Republican side of the House. In fact, there was very little strenuous opposition or lack of harmony until the ship bill, so essential to the commercial prosperity of our country met with such stubborn partisan opposition that the country has never been able to understand it. When the general war commenced there were only six ships of any consequence flying the American flag engaged in foreign trade. Under the free-ship provision of the Panama Canal act, hastily amended in 1914, something like 150 or 200 ships came under the flag; but having difficulty about insurance on account of the mines and torpedoes in the war zone, they could secure no cargoes, and were unwilling to venture anyway, for while ordinary marine insurance companies could insure ordinary marine risks, they were unable and unwilling to underwrite war risks in the war zone. So commerce remained at a standstill. Therefore Congress created an Insurance Bureau in the Treasury Department. Diligent and malicious misrepresentations have been made about this, but it was fully understood in Congress. Its wisdom and necessity were recognized and received the support of all shades of opinion. It has been falsely charged that the provision was for the benefit of speculators, and that they had deprived the producers of cotton at a low price, and special favor to the speculators was argued from the fact that cotton was insured at 10 cents per pound.

The truth is the insurance bill was introduced in August, 1914, when the cotton was still in the field unpicked, and the price was alleged to be so low that it was not worth the picking, and the reason the bill was introduced and passed was to encourage the farmers to pick their cotton, with the assurance that it might be carried to a profitable market. Whenever insurance was applied for, the bureau in the Treasury did not inquire who was the personal owner of the cotton, but it was insured at the valuation placed on it by the applicant who paid a premium in proportion to the value fixed. It was valued at 10 cents per pound because insurance was to operate in the war zone in Europe and not in this country, and cotton never was worth as little as 10 cents after it safely passed the war zone. It may comfort those who have been urging the false statements about this insurance bureau to know that the Treasury realized a net profit of more than 100 per cent on its insurance transactions. But having secured ships under the flag, with insurance for the ships and the cargo, ship owners, realizing their monopoly, raised their rates of freight to prohibitive figures. A bale of cotton, formerly carried for $1.70, was charged $17, and everything else in proportion. The protection of our people and the salvation of our commerce imperatively demanded relief. The emergency could only be relieved by a line of Government-owned ships. We did not necessarily need a $100,000,000 appropriation. What we needed was some legislation authorizing the construction or purchase and operation of some ships. A dozen ships placed upon the ocean accompanied by authority to start more, if necessary, would have brought instaneous relief—freight charges would have toppled at once. The question of temporary or permanent ownership and operation was immaterial. If Congress had given authority for the operation of a dozen ships we could have controlled the situation in the interest of our people until the emergency passed, and then the benefits and profits to our people would have been so vast as to make little difference as to what we did with the ships. If we had given them away or burned them up, the benefits to our people would still have justified the venture. However, we failed to pass the ship bill then, but it seems now that we are certain of success.

The only other measure stubbornly antagonized in the Sixty-third Congress, but the first and only one on which the Republicans could solidly organize opposition, was the war-revenue measure. If President Wilson had been a temporizing politician instead of a profound and honest statesman, he would have devised means to tide over the emergency for two months and wait until after the 1914 election to insist on that measure. But conditions abroad had suddenly interrupted our revenues and the Treasury was in a depleted condition. Something had to be done, and rather than try to fool the people by selling bonds or resorting to other means to pass the crisis he bravely and honestly faced the music and told Congress and the country the true condition and asked for a tax to relieve the shortage. He knew that the taxes to be levied would be unpopular, and he knew that his action would be misunderstood and that the Democratic majority in the House would be reduced in the November election because the people would not have time to learn the truth of the situation. If he had allowed that measure to wait until after the election, the Democratic majority in the Sixty-third Congress would have been maintained in the Sixty-fourth Congress. The Republicans also knew that; they knew the unpopular character of the taxes levied; they knew by acting the rôle of demagogue and attacking the taxing bill they could reap political advantage, if not win the House. Unfortunately they did not share the President's patriotism and candor and rise to the height of his principles and conduct. Unfortunately the war continued, the shortage also continued for awhile, and we had to extend the war-revenue measure, but we will soon supplant that by a new revenue bill, which will eliminate the most objectionable features. In the meantime the people have had an opportunity to learn the truth of the situation, and they are not likely to repeat their 1914 mistake in the next election.

So many beneficent measures were enacted during the Wilson administration that there is neither time nor necessity to enumerate them. The Agricultural Committee has been busy; so have the Committees on Good Roads and Flood Control. I have the individual happiness, after having introduced more good-road bills, perhaps, than any other Congressman ever did, to see the fruition of my hopes and labors in the result of the conference committee now at work on the differences between the two Houses on the good-roads bill. I also feel peculiar pleasure in my cooperation in the legislation on cotton, cotton warehouses, regulation of cotton exchanges, immigration, and other measures designed, not only for the protection but for the promotion of the prosperity of the farmers, the laborers, the common people, the backbone and sinew of the country and the hope of our institutions for the future.

Mention of some measures to the exclusion of others need not be construed as invidious comparison or discrimination, but the creation of the Coast Guard should not be overlooked as perhaps our most valuable instrumentality in time of peace and most reliable defense in time of war. Our administration has not failed to look after the maintenance and upbuilding of all the departments, not least among which is the organization and administration of the Department of Labor.

The most brilliant and glorious accomplishments, however, of our administration have been the diplomacy of Woodrow Wilson. Our adversaries have been so inconsistent in their criticism as not to be able to hold any one position. Woodrow Wilson found our Sister Republic, Mexico, distracted and riven by revolutions and bandit factions. There was no established accredited head of the Government. There was no occasion or pretense of war between the United States and Mexico. Occasionally an innocent bystander over the border was injured and there was no Mexican Government for us to hold responsible or to make war upon. The wise plan of watchful waiting was inherited from the Taft administration—about the only valuable thing that was acquired therefrom. Goaded on by American capitalists and American speculators and adventurers, indiscreet persons denounced watchful waiting and demanded intervention. Finally when Huerta's faction insulted the United States, President Wilson sent the fleet and Army and punished Huerta and his faction. However, he was not making war on Mexico but punishing Huerta and his faction. That expedition was at the time denounced by our political adversaries. Then when we had accomplished our purpose, had held Huerta's chief port, collected several million of his revenues and driven him ignominiously from his capital and his country, we withdrew our forces from Mexico. Then the President was denounced by his adversaries who falsely and foolishly charged that he withdrew without accomplishing his mission. Orators on this floor have loudly sneered that we went there to make Huerta salute the flag and came back without making him do so—foolish and illogical. We informed Huerta that if he did not salute the flag we would punish him. He refused and we proceeded with the punishment. He could not then settle the matter by saluting the flag, because we had entered upon his punishment. We seized his port, collected his revenues, and drove him from power and from the country, and it is not apparent where he had any opportunity to salute the flag or to settle the matter by so doing.

Yet the glory of this administration has been in diplomacy with the European powers. Not only a great administrator at home, Woodrow Wilson has shown as a bright particular star in the firmament of diplomacy. He has conducted the foreign relations of the Government in a superb and masterly manner. He has been able to differentiate with unerring precision between the conduct and demands of the different belligerents, and, in spite of clamor to the contrary, to recognize that the destruction of our commerce by the allies, however serious, was a mere financial matter that could be charged up and protested now and paid for after the war. He also knew and asserted that innovations in warfare which threatened and destroyed the lives of neutrals was more serious than a temporary financial disturbance, and should be challenged at once and denounced with courage and firmness, without regard to cost or results. On his theory of diplomacy he has won signal and glorious triumphs, and will go down in history as a master of statecraft and diplomacy.

There have been few matters of just complaint against the administration. The matter most complained of is attended by very strong mitigating circumstances. What is called the interference with the rural mail service has hit some of us pretty hard. In spite of all my efforts, it has hurt me politically in the district I represent more than all other circumstances combined, and yet I can not find it in my heart to criticize the administration of the Post Office Department. Their motives have been good. Economy has been the controlling motive, and whatever else may be said about it, the revision has been nonpartisan, and the Democrats have been hit as hard as the Republicans, and the South has been hit as hard as the North. The service is so vast, the routes and carriers so numerous, and the population served thereby so immense that the matter of surprise is not that so many mistakes were made, but that so few were made, and that the department had the temerity to undertake the task on so short notice and to be accomplished in such a short time. It was impossible for the inspectors to visit and survey all the localities. Many of the blue prints were antiquated and inadequate, and many of the communities had been metamorphosed since the blue prints were made.

One great mistake the department made was not taking the opinions of the Congressmen in preference to the views of the inspectors and postmasters in those districts where the Congressmen took an interest in the matter and knew all about the situation. But this and every other matter in connection with it are mere details resulting from the one fundamental mistake, to wit, the heresy that the Post Office Department must be a money-maker. It is even an ungodly heresy to assert that it ought to be self-sustaining. It is above all other Government agencies in giving necessary conveniences and accommodations to the people, to the maintenance of which they are willing that their taxes be applied. That truth should be recognized and should guide all administrations. Recognition of that truth would have avoided all troubles and complaints in the Post Office Department. But Gen. Burleson and Gen. Blakslee should not be denounced and execrated by Republicans for pursuing the false doctrine. They inherited the heresy from Republican administrations. For the past 20 years the full efficiency of the Post Office Department has been curtailed, hampered, and crippled by the foolish and unpardonable heresy that the Post Office Department must save money instead of spending money. Congress realizes the truth of the situation and is willing to grant all necessary funds to make the Post Office Service fully efficient and acceptable to the people. The first rule in administering the Post Office Department should be efficiency. The second rule should be, having prescribed an efficient standard, then have the work done as cheaply as possible without any dishonesty or graft. I believe that the present Post Office administration has striven to promote efficiency, handicapped, it is true, by the ever-present idea that it must be self-sustaining. Graft and dishonesty are entire strangers to the present administration of the Post Office Department.

Taken all together, future generations will credit the Wilson administration with the glory of having given the golden age to the American Republic. The universal prosperity which now blesses our people and signalizes the close of the first Wilson administration is unprecedented in this or any other country. The wisdom and moderation of his course, counsel, diplomacy, and general administration are recognized and appreciated by a grateful, prosperous, and glorious people and admired throughout the world, and if history ever records a more brilliant administration than the first term of Woodrow Wilson, it will be found in the second term of that great and glorious President.

EXTENSION OF REMARKS.

Mr. GORDON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing so much of the speech of Secretary of War Baker at Columbus, Ohio, recently, as chairman of the Democratic State convention, as pertains to national issues.

The SPEAKER. The gentleman from Ohio asks unanimous consent to extend his remarks in the RECORD by printing all that portion of the remarks of the Secretary of War delivered as president and chairman of the Ohio State convention, as applies to national politics. Is there objection?

Mr. MOORE of Pennsylvania. Mr. Speaker, reserving the right to object, I should like to ask the gentleman from Ohio [Mr. GORDON], who has carefully read this address, whether it covers the same ground that was covered by Secretary McAdoo in the two addresses which have been printed in the RECORD.

Mr. GORDON. I have not read those addresses, but I can assure the gentleman that it does not cover the same ground in the same way.

Mr. MOORE of Pennsylvania. And is upon an entirely foreign subject?

Mr. GORDON. No; but it is a very good speech, I will say to the gentleman, and I commend it to his favorable consideration.

Mr. MOORE of Pennsylvania. Mr. Secretary McAdoo's speech having been twice printed, and apparently being an excellent speech from a Democratic standpoint, what is the object of multiplying the same thing?

Mr. GORDON. This is not the same speech, I can say to the gentleman.

Mr. MOORE of Pennsylvania. It pertains to another phase of the work the Democratic Party has performed during the last three years?

Mr. MANN. Failed to perform.

Mr. ADAMSON. Mr. Speaker, the same theme is inexhaustible; it can go on forever.

The SPEAKER. This is not debatable. Is there objection?

Mr. MOORE of Pennsylvania. No; I do not object.

The SPEAKER. The Chair hears no objection.

Mr. FOSTER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD, and also to print some data in reference to the production of gasoline by the Rittman process, showing the cost to the firms that are using it in the United States, or who are going to use it.

The SPEAKER. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD. Is there objection?

Mr. MANN. Mr. Speaker, I suppose this will not contain an excerpt from the report of the Bureau of Mines that, owing to the discovery of Dr. Rittman the price of gasoline will likely go down, a report which was made when gasoline was costing about 9 cents a gallon and it is now costing about 19.

Mr. FOSTER. Mr. Speaker, I will say to my colleague—of course the gentleman knows that was some time ago, and the factories were not then in operation; but this shows something of what may be accomplished when they come into full operation and what they are able to do by the Rittman process.

Mr. MANN. I suppose gasoline will still go up?

Mr. FOSTER. Oh, I think not.

Mr. MANN. What they are able to do is best shown by the gasoline people.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

CHANGE OF REFERENCE.

The SPEAKER. There is a Senate bill, S. 6239, which everybody concerned wants rereferred from the Interstate and Foreign Commerce Committee to the Committee on the Merchant Marine and Fisheries. The Clerk will report the bill by title so that everybody will know what it is.

The Clerk read as follows:

A bill (S. 6239) authorizing the Commissioner of Navigation to document as vessels of the United States two barges built of American material and owned by James Stewart & Co. (Inc.), a citizen of the United States.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I suppose if this is done by unanimous consent and we discover afterwards that this is a mistake, we can not correct it by reconsidering the vote by which it is done?

The SPEAKER. Does the gentleman want to object or not?

Mr. MANN. I am asking.

Mr. ADAMSON. The gentleman is propounding a conundrum.

The SPEAKER. The Chair has ruled on that once.

Mr. MANN. I thought the Speaker might have looked it over and probably changed——

The SPEAKER. The Chair has not looked it over and changed his opinion about this unanimous-consent business. That ruling does not apply to anything else except a unanimous-consent change of reference bill.

Mr. ADAMSON. I was going to ask the Speaker to allow me to say to the gentleman from Illinois that it is not my recollection that our committee ever had jurisdiction of those barges.

Mr. MANN. They always had jurisdiction.

Mr. ADAMSON. The gentleman from Illinois has such an infinite fund of humor, bubbling and sparkling over, and such a great fund of wit that he had to joke at the Speaker.

Mr. MANN. I am so very slow that I am second and third to the gentleman from Georgia when it comes to wit, humor, pathos, oratory, or anything else that is good, great, and noble.

Mr. ADAMSON. Much obliged. I was trying to get the gentleman to say that.

Mr. MANN. The gentleman paid me for it.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none, and the reference is made.

Mr. SISSON. Mr. Speaker, I ask unanimous consent for the change of reference of a private bill referred to the Committee on Pensions. The bill is one to have the record of a soldier of the Civil War corrected where his original and honorable discharge was burned up in his house.

Mr. MANN. Those changes are made through the basket.

The SPEAKER. That is a private bill. Under special order of the House the gentleman from Louisiana [Mr. ASWELL] is recognized for 15 minutes. [Applause.]

JEFFERSON DAVIS.

Mr. ASWELL. Mr. Speaker, I am honored to-day in having the privilege of delivering the first eulogy in this Chamber on the President of the Confederacy. This era of good feeling and national unity between the North and the South which makes possible this occasion and which, God grant, may endure, is hailed by the people of all sections with genuine delight.

The subject of this discussion is a Mississippian, a man from the South—the real South—where cotton and cane and rice and oranges grow, where the magnolias bloom, and where the warm heart beats true to country, to humanity, and to the flag.

No people of any section are more willing than we to give ourselves in defense of our country. When the news of the *Maine* disaster was flashed over the country, the first companies to go to the front were bands of gallant southern boys who were the sons of Confederate soldiers. The men who followed the boys to the trains and cheered them on in defense of a united country were the old Confederate soldiers themselves. We stand for peace with honor, but ready to defend the flag. [Applause.]

In the State of Louisiana, June 3, the anniversary of the birth of Jefferson Davis, is a legal holiday. Our people are now celebrating this holiday in a most fitting manner. At this very hour in the city of New Orleans there is marching down Canal Street a most remarkable monster preparedness parade. In that parade are marching the organizations of our women and our men—business men of all classes, professional men of all grades, the judges of our courts, the members of our general assembly now in session, and at the head of the parade is our distinguished governor, who is the loyal son of a Confederate soldier and who was himself a distinguished colonel in the Spanish-American War. Dramatic and pertinent to this occasion in that parade are marching side by side in the line of honor the soldiers who wore the blue and the soldiers who wore the gray. [Applause.] They are vying with each other as to who is the more willing and ready to give himself, if need be, in demanding respect and honor to the American flag wherever she floats on land or sea. This parade expresses the sentiment of our people as they honor the memory of Jefferson Davis by showing their readiness to defend our country's honor.

It is easy to present the life and character of a successful man, a man whose name is made illustrious by valiant deeds on victorious fields of battle or in other lines of successful endeavor. The literature of the ancients—of the Grecians, of the Romans—finds its chief inspiration in recounting victories won in heroic contest.

But greatness is not always confined to victory. The American people love a courageous and purposeful man. This is the American spirit now. It was the American spirit a hundred years ago when in humble station such a man was born. He was loved, honored, worshiped by those whose cause he led. He led a victorious cause. A few months earlier in a home not so humble was born another such man. He, too, was loved, honored, idolized by those whose cause he led. He led a lost cause. In the early sixties the one was loved by the North, the other by the South. To-day the North and the South join hands in honoring the memory of both, rejoicing together that America produced Abraham Lincoln and Jefferson Davis—the one great in victory, the other no less great in defeat. [Applause.]

One hundred and eight years ago to-day, in the State of Kentucky, less than 100 miles from the birthplace of Abraham Lincoln, born eight months and nine days later, Jefferson Davis was born, not in poverty, nor in wealth, but able to secure an education.

After varied experiences as a soldier, he burst upon the scene of action and plunged into the national conflicts of the hour as a Member of Congress in 1845. Discussing the Mexican question in his first speech in this Chamber, he deprecated the wild and unreasoning appeal to arms by the jingoes of the time, saying, "We need a little better preparation for hostilities before too much bragging is indulged." His speeches then would apply now. He was a citizen of all time; a patriot with large perspective.

He declared that "logrolling" to secure appropriations from the Federal Treasury was despicable and unworthy of honorable men. He denounced partisanship and sectionalism in handling the affairs of the Government. He demanded that each question stand or fall upon its own merit. Individualism with him was a life conviction. It found expression in his vigorous championship of State rights as against nationalism. But his love for the Union and his devotion to our common country were well expressed when he resigned a position of honor, sacrificed his health, and offered his life in courageous service on the battle fields of Mexico. This proud-spirited son of the South expressed his love of country hundreds of times with convincing eloquence and a personal force unsurpassed, in this Chamber and in the Senate Chamber of the United States. He repeatedly expressed his patriotic sentiment in his public addresses in New England and elsewhere. No Cabinet member ever discharged his duties with more pluck and courage, signal ability, skill, consecration, and devotion to his country. [Applause.] Through all his public utterances before 1861 there breathed a consciousness of impending calamity. His constant prayer was to avoid bloodshed, but he had a conviction, and that conviction was the dominant force of his life. Where it led he had the courage to follow. Neither Washington nor Wellington created the conditions that made their names immortal, nor did Mr. Davis create the conditions of his time. His turbulent life hurled him into the midst of those conditions.

The conflict was inevitable. The theory of State rights held that the founders of the Constitution did not intend to create a new nation, but only a new Government; that the Federal Government was not the sovereign, nor had it any sovereign powers except such functions as had been delegated to it by the States. The national theory, on the contrary, held that the Federal Government was sovereign; that the States had ceded their sovereignty to it. Between theories so antagonistic and so resolutely held by courageous men, the only arbiter was the field of battle.

I have not time to discuss the terrible experiences during the four years that followed, nor would I, if I could, discuss here the two years of suffering and needless humiliation of this proud-spirited southerner that followed his defeat, but suffice it to say that no public man living or dead has gone through the perilous political conflicts of a generation with a more stainless name than did Jefferson Davis. [Applause.]

Soldier, Senator, Cabinet member—gallant, able, active, and efficient, always positive and aggressive, stimulating antagonism and resentment, yet no man has questioned his patriotic devotion, his integrity, or the purity of his character—a man impelled by motives unattainable by petty or ignoble passions, guided by a character of sterling firmness and more than common purity, with a devotion that culminated at the close of a turbulent life in the highest type of a patriot's love. Such a life, whether in victory or in defeat, whether in public or in private, is an enduring asset in the higher development of a republic.

The conflicts that raged about him were fought wherever men of opposite opinions gathered—in church, in State, and on fields of blood. Bitterness, suffering, anguish, devastation, poverty, desolation, ruin, and despair resulted.

Arising from the ashes of that titanic struggle, the men of the North and the men of the South faced each other with a courage unsurpassed in all the history of the world. There had been victory and defeat, but the blood of the race made it impossible for either to be conquered. They faced each other as unconquerable men, without apology or excuse for the past, and together they turned the same way to settle their differences in their own way and to work out the destiny of this Republic as no other people could and as only men of heroic mold can. This tragic moment in our history, met by master minds and hearts, reveals the superior character and the surpassing greatness of the American people. Out of it has come a new Republic, cemented forever by the blood of her citizens,

whose battles of the future will be fought not with shot and shell, but with logic, reason, and moral force—a people as pure as the Puritan, as gallant as the cavalier, as heroic and chivalrous as the southerner, as sturdy and loyal as the northerner; a people possessing the best of all sections and of many nationalities—Americans, standing for Americanism, which means that America must champion the rights of mankind, that every human being has a right to be free, and that we can best express our freedom by helping others be free. [Great applause.]

Let me illustrate. A friend of mine traveling in the West found an eagle's egg. He said he would take this egg home and grow the finest eagle that culture and care could grow. He did, and the eagle grew and measured several feet from tip to tip, a great North American eagle. He took the eagle into his garden and lest it might escape he chained it to a stake. The eagle went as far as the chain would permit, and round and round and round and round and round the eagle proceeded to go until he wore away the earth and left a beaten track. In that track the eagle went round and round for seven years. Finally the owner called his friends together, and they discussed it and decided that they would take away the shackles and set him free. To their disappointment round and round in the same old track the eagle proceeded to go. They stepped in front of him and turned him back, but he clung to the rut. Being discouraged, the owner kicked him out of the rut. For the first time the eagle spread his wings and realized that he had some power of his own. But he had no confidence at first and sank back. But finally, catching the spirit of his kind, higher and higher and faster and faster until he became a speck in the distant sky, and then the little group of friends heard the first shrill scream that told the story of the liberty that that bird had the right to have. In the struggles through which we have gone the American people have torn from their lives the shackles of bitterness, prejudice, and hatred that our people may enjoy the liberty that we have a right to enjoy. [Applause.]

Such are the lessons, the inspiration, and the hope that come to us to-day from a brief interpretation of the meaning of the unconquerable life and purpose of Jefferson Davis. [Prolonged applause.]

The SPEAKER. Under the special order of the House the gentleman from Kentucky [Mr. KINCHELOE] is recognized for 20 minutes.

Mr. KINCHELOE. Mr. Speaker and gentleman of the House of Representatives, a century and eight years ago to-day in the little hamlet of Fairview, Christian County, Ky., the light of day for the first time dawned upon the vision of Jefferson Davis. While he was an infant his father and mother moved to Louisiana, but owing to his children suffering from acclimatization his father sought a more congenial climate, and in a short while moved to Woodville, in Wilkerson County, Miss. His father's family consisted of 10 children, of whom Jefferson Davis was the youngest. At the age of 7 years he was sent on horseback by his father, in company with friends, to St. Thomas College, near Springfield, Ky., where he entered school for a year. He afterwards attended school near his father's home in Mississippi until he was sufficiently advanced, and then sent to Transylvania University, at Lexington, Ky. In November, 1823, he was appointed to the West Point Military Academy by President Monroe; was graduated from this institution in 1828, and was sent to the Jefferson Barracks, and afterwards to Fort Crawford, in Wisconsin, and to other forts in the Northwest.

He resigned from the Army in 1835 and married Miss Taylor daughter of Gen. Zachary Taylor, over the protest of her father, and went back to Mississippi to farm. The estrangement between Gen. Taylor and Mr. Davis never was healed. His wife lived only a short time. He was married again in 1845 to Miss Varina Howell.

He was elected to the Twenty-ninth Congress in 1845, and in 1847 was appointed United States Senator by the governor of Mississippi to fill the vacancy caused by the death of Senator Speight. While United States Senator he resigned to run for governor of Mississippi, but was defeated. In 1853 he was appointed Secretary of War by President Pierce and served for four years. He went back to the Senate from Mississippi on March 4, 1857. In 1861, when Mississippi seceded from the Union, Mr. Davis, as one of the United States Senators from Mississippi, immediately resigned his office and cast his fortunes with the Southern Confederacy. The speech which he made in the United States Senate at the time he resigned is one of the brightest and most pathetic gems of English literature, and should be read by every liberty loving and patriotic American citizen. He was shortly afterwards elected president of the Southern Confederacy.

The war clouds were lowering over this country at this time. The bloody conflict that transpired during the early sixties is well and familiarly known to all.

It is not my purpose to-day to pluck one laurel wreath from the brow of any Union soldier, either living or dead. They were loyal and patriotic and bared their breasts to the bayonets in order that this country might still remain an undivided Union. However, it shall be my endeavor to pay a just tribute to the brave and patriotic men of the Southern Confederacy, thousands of whom gave their lives in defense of a constitutional right, which theretofore from the adoption of the Federal Constitution had never been questioned by anyone, much less denied to any State. The principle for which they fought is clearly enunciated in the tenth amendment of the Federal Constitution, which reads as follows:

> The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States, respectively, or to the people.

It was agreed by all when the Constitution was adopted that it was a compact between the States, that the Federal Government was limited to the authorities granted in the Constitution, and that any State had a right to secede from the Union whenever that State was satisfied that the administration of the Government of the Union was oppressive, or that its constitutional right had been invaded.

Thomas Jefferson, the greatest of all Democrats of his age, in the celebrated Kentucky resolutions expressed this sentiment, and placed this interpretation upon the Constitution. In the Virginia convention, when this question was raised, it was conceded by all that this was the correct interpretation of the Constitution, and Virginia would not have ratified the Constitution or joined the Union without this understanding. Patrick Henry raised this question in the convention, and received the assurances from Mr. Madison, the father of the Constitution, that this was the correct interpretation of it.

In the Constitutional Convention a proposition was made to authorize the employment of force against a delinquent State, on which Mr. Madison remarked, "the use of force against a State would look more like a declaration of war than an infliction of punishment, and would probably be considered by the party attacked as a dissolution of all previous compacts by which it might have been bound." The convention expressly refused to confer the power proposed, and the clause was lost. This interpretation of the Constitution was prevalent among the Northern as well as the Southern States. The acquisition of Louisiana in 1803 created much dissatisfaction in the Northern States, and especially in Massachusetts. Col. Timothy Pickering, who had been an officer of the War of the Revolution, and afterwards Postmaster General, Secretary of War, and Secretary of State in the Cabinet of Gen. Washington, and later a representative of the State of Massachusetts in the Senate of the United States, was one of the leading secessionists of his day. Expressing his dissatisfaction at the way Louisiana was acquired, he wrote in December, 1803:

> I will not yet despair. I will rather anticipate a new confederacy. * * * There will be (and our children, at the fartherest, will see it) a separation.

In January, 1804, he further wrote:

> The principles of our Revolution point to the remedy—a separation. This can be accomplished and without spilling one drop of blood, I have little doubt. I do not believe in the practicability of a long-continued union. A northern confederacy would unite congenial characters. * * * While the Southern States, having a similarity of habits, might be left to manage their own affairs in their own way. * * * It (the separation) must begin in Massachusetts. The proposition would be welcomed in Connecticut; and could we doubt of New Hampshire? But New York must be associated, and how is her concurrence to be obtained? She must be made the center of the confederacy. Vermont and New Jersey would follow, of course; and Rhode Island of necessity.

I do not show this in any spirit of criticism of this great man, but to show that his interpretation of the Constitution coincided with the views of Thomas Jefferson, James Madison, Patrick Henry, and other great men of his day.

Even as late as 1860, when many men of the North were appealing to passion and inciting the multitudes to support a war waged against the Southern States in the event of their secession, the New York Tribune, the organ of the Abolitionists, declared:

> That if the cotton States wished to withdraw from the Union, they should be allowed to do so; any attempt to compel them to remain by force would be contrary to the principles of the Declaration of Independence and to the fundamental ideas upon which human liberty is based. If the Declaration of Independence justified the secession from the British Empire of 3,000,000 subjects in 1776, it was not seen why it would not justify the secession of 5,000,000 of southerners from the Union in 1861.

So we see that the right of a State to secede from the Union was claimed by the North and the South.

At the time of the adoption of the Constitution there were many people in the North and Northeast engaged in the slave traffic, importing slaves from Africa to this country, and when the fact was ascertained that these slaves were not acclimated to the North they were sold to the planters of the South. The question then came in this constitutional convention whether the right to longer traffic in slaves should be recognized by the Constitution. Some of the greatest leaders of thought in the South in this convention protested against the further legalizing of the slave traffic, while several States of the North and Northeast insisted that this right should be recognized, and thus this baneful institution was fostered by the fundamental law of this Republic for 20 years, to be assailed by their descendants in 1856 and 1861.

As a result of this concession in the Constitution, the institution of slavery spread over the South, its climate and soil being favorable to the institution.

A great number of the people of the Northern States were just as much in favor of the institution of slavery as were the people of the South.

In December, 1805, a petition of the Legislative Council and House of Representatives of the Indiana Territory, then comprising all the area now occupied by the States of Indiana, Illinois, Michigan, and Wisconsin, was presented to Congress, accompanied by a letter from Gov. Harrison, afterwards President of the United States, for a suspension of the sixth article of the ordinance, so as to permit the introduction of slavery into the Territory. These resolutions were submitted to a committee of the House, which reported the resolutions favorably, and this report was sustained by the House, and a resolution to suspend the prohibitory article was adopted. The proposition failed, however, in the Senate. But I cite this merely to show that the people of the Indiana Territory were unanimous in indorsing these resolutions, so as to permit the introduction of slaves into their Territory. The African slave trade was carried on largely by New England merchants and northern ships.

Thomas Jefferson, a southern man, the founder of the Democratic Party and the vindicator of State rights, was a constant enemy to every form of slavery. The Southern States took the lead in prohibiting the slave trade, and the State of Georgia was the first State to incorporate the prohibition in her constitution. These facts of history must be considered when judgment is pronounced by posterity upon the justice of the act of the southern people in choosing the fearful alternative of war rather than submit to an invasion of their chartered rights under the Constitution.

So in 1860–61 the southern people stood upon the constitutional rights as interpreted by their statesmen since the Government was founded, that a State in the strictest interpretation of the Constitution had the power never surrendered to withdraw from the Union should it be denied its right.

Eleven States, with South Carolina first, seceded from the Union and formed the Southern Confederacy. The great conflict lasted for four years.

In this great abandonment proceeding between Uncle Sam and 11 of his southern daughters, which was settled in a court of arms, Kentucky as a State was neither a party plaintiff nor party defendant. She was not even corespondent, but yet she furnished to the North and South her full quota of as brave men as ever went upon the battle field in the history of the world. She did more; she furnished to the Union its President, that great and liberty-loving idol, Abraham Lincoln, and to the Southern Confederacy its President, that brave and patriotic statesman, Jefferson Davis.

The South fought against many odds, but yet she fought for a principle guaranteed to her under the Federal Constitution. Finally, at the end of four years, at the Battle of Appomattox, when Gen. Lee surrendered, the sun of the Southern Confederacy set. The hopes of a brave and patriotic people were blighted, but these men were not traitors to the Government, but were just as patriotic and liberty loving as the men who fought to maintain the Union. [Applause.]

Jefferson Davis was indicted and imprisoned for treason, but without trial he was acquitted of the charge, and history must accept this result as conclusive of the fact that this great man, in standing for the constitutional right of a State to withdraw from the Union and in resisting force to coerce the State into submission, was guilty of no treason, but was justified by the law as it then existed. Such will be the verdict of unerring history. Were they guilty of treason? If they were, they were inspired to this act by the teachings of Patrick Henry, James Madison, and Thomas Jefferson in their interpretation of the Constitution. [Applause.]

After Lee's surrender these soldiers, in their faded gray uniforms, with their rusty canteens upon shoulders, wended their way to the sunny South, only to find burned homes, wrecked farms, and separated families. A great war debt had been contracted; Confederate money proved to be worthless; but, notwithstanding the unfavorable circumstances that then existed, they again united for grander and nobler purposes. Amid the ashes, wrecks, and their dead, holding the inspiration of the past for the future, they took their horses from the battle field to the furrow, their cotton, which was hidden, and sold it for the necessaries of life, and went with the same energies to rebuild the South as they had gone upon the battle fields to defend her, and to-day America has no better citizens in peace, and would have no braver soldiers in war, than those who over 56 years ago followed Robert E. Lee as their general, the grand old tune of "Dixie" for their inspiration, and the "Bonnie Blue Flag" as their banner. [Applause.]

The negroes of the South, as hard as were the conditions of slavery, owe a thousandfold greater debt of gratitude to the southern people than to any other people on earth. The people of the South tutored the negro in the way of civilization. They found him a savage, fresh from the jungles of Africa. They have taken him by the hand and lead him up the hill of progress and civilization and taught him there is a God, and that they may be the recipients of His choicest benedictions. They are giving him an education. And it is to the eternal credit of the South and its people that under the law of practically every Southern State each negro boy and girl draws as much per capita of the school fund as do the white children of the South.

The southern people have erected negro colleges at the expense of the taxpayers of the South, and are maintaining them at such expense in order to better the condition of the negro and to give him an equal chance in life's battles. That the institution of slavery has been abolished, and that every man beneath the fold of our country's flag is a freeman is the gratification of every man of this great Republic, and the people of the South also rejoice in this fact. Yet slavery was not the cause of the war, but the institution died as an incident of the war, and the southern people are exerting their best efforts to uplift and educate the negro, and every good colored citizen in the South will agree to this statement.

The deeds of valor and heroism of Jefferson Davis in his devotion to the South and to the people who had honored him will live in the memory of the posterity of the South so long as she erects an altar to her heroes and so long as men have grateful hearts.

Mr. Speaker, wherever in this broad land of ours the ashes of a Confederate soldier lie, the clay that wraps his remains is the sepulcher of an American patriot who died for a vital principle of government as taught by the fathers of this Republic. History, calm, fair, and truthful, will yet record this truth as the final and considered judgment of mankind.

> Not for fame or reward,
> Not for place or for rank,
> Not lured by ambition
> Or goaded by necessity,
> But in simple obedience to duty
> As they understood it,
> These men suffered all, sacrificed all, dared all—and died.

[Applause.]

When the war had ended, soldiers of the North and of the South shook hands across the graves of their comrade dead, and said we will be friends, we will again have a Union, one and undivided, and when they did this they made a Government that will live on united until time shall cease its flight in the centuries to follow.

I rejoice with every patriotic American to-day in the fact that we have a hundred million free, happy, peaceful, united, and patriotic people with one country, one Government, one flag, and one God. [Loud applause.]

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 58 minutes p. m.) the House adjourned until Monday, June 5, 1916, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, a letter from the Secretary of the Treasury, transmitting copy of a communication from the Secretary of War submitting an estimate of appropriation required for the service of the fiscal year ending June 30, 1917 (H. Doc. No. 1190), was taken from the Speaker's table, referred to the Committee on Appropriations, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. EDMONDS, from the Committee on Claims, to which was referred the bill (H. R. 13674) to amend section 11 of chapter 308 of the acts of 1909, reported the same with amendment, accompanied by a report (No. 797), which said bill and report were referred to the Private Calendar.

Mr. BURNETT, from the Committee on Public Buildings and Grounds, to which was referred the bill (H. R. 14669) authorizing the acceptance by the United States Government from Pueblo Post, No. 8, Grand Army of the Republic, of a monument located on the grounds of the Federal building in Pueblo, Colo., reported the same without amendment, accompanied by a report (No. 798), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 10725) granting a pension to Elizabeth Boetticher; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 12862) granting an increase of pension to Benjamin F. Crosson; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 15771) granting an increase of pension to Charles V. Petteys; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 14677) granting a pension to Mary A. Heinz; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills were introduced and severally referred as follows:

By Mr. McKENZIE: A bill (H. R. 16237) authorizing the Secretary of War to donate to the village of Cedarville, Stephenson County, Ill., one bronze or brass cannon or fieldpiece; to the Committee on Military Affairs.

By Mr. LITTLEPAGE: A bill (H. R. 16238) to provide for a site and the erection thereon of a public building on the west side, in the city of Charleston, W. Va.; to the Committee on Appropriations.

By Mr. RANDALL: A bill (H. R. 16239) to establish the Sierra Madre National Park in the State of California; to the Committee on the Public Lands.

By Mr. CASEY: A bill (H. R. 16240) providing for the purchase of a site and the erection thereon of a public building at Plymouth, Pa.; to the Committee on Appropriations.

Also, a bill (H. R. 16241) providing for the purchase of a site and the erection thereon of a public building at Nanticoke, Pa.; to the Committee on Public Buildings and Grounds.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. CASEY: A bill (H. R. 16242) granting an increase of pension to Delight A. Allen; to the Committee on Invalid Pensions.

By Mr. CLARK of Missouri: A bill (H. R. 16243) granting an increase of pension to Tyler W. Parker; to the Committee on Invalid Pensions.

By Mr. GREENE of Vermont: A bill (H. R. 16244) granting a pension to Julia A. Harlow; to the Committee on Invalid Pensions.

By Mr. HARRISON: A bill (H. R. 16245) for the relief of the legal representatives of Alicia Cornelia Hiern, deceased; to the Committee on War Claims.

By Mr. HAUGEN: A bill (H. R. 16246) granting an increase of pension to George R. Peacock; to the Committee on Invalid Pensions.

By Mr. HOLLINGSWORTH: A bill (H. R. 16247) granting an increase of pension to Sarah J. Creighton; to the Committee on Invalid Pensions.

By Mr. LAFEAN: A bill (H. R. 16248) granting an increase of pension to Mary Fahs; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16249) granting an increase of pension to Henrietta C. Ilgenfritz; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16250) granting an increase of pension to William H. Johnson; to the Committee on Invalid Pensions.

By Mr. SISSON: A bill (H. R. 16251) for the relief of the widow and heirs at law of George H. White, deceased; to the Committee on Naval Affairs.

By Mr. STEPHENS of Texas: A bill (H. R. 16252) authorizing payment to certain Red Lake Indians, out of Chippewa Indian funds, for garden plots surrendered for school-farm use; to the Committee on Indian Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ASHBROOK: Evidence to accompany H. R. 9934, to correct military record of Earl W. Shaffer; to the Committee on Military Affairs.

By Mr. DALE of New York: Report of Chamber of Commerce of State of New York on Philippine independence bill; to the Committee on Insular Affairs.

Also, memorial of National Association of Vicksburg Veterans, in re House bill 11874; to the Committee on Military Affairs.

Also, petition of Mrs. Edward Biddle, of Philadelphia, Pa., favoring an immediate report on the Susan B. Anthony amendment; to the Committee on the Judiciary.

Also, petition of Jenkin Lloyd Jones, of Chicago, Ill., in re "preparedness"; to the Committee on Military Affairs.

Also, memorial of the Pictorial Review Co., of New York, opposing section 7 of the Post Office appropriation bill; to the Committee on the Post Office and Post Roads.

By Mr. ESCH: Report of Chamber of Commerce of State of New York on Philippine independence bills; to the Committee on Insular Affairs.

By Mr. LAFEAN: Report of the Chamber of Commerce of the State of New York on Philippine independence bills; to the Committee on Insular Affairs.

By Mr. O'SHAUNESSY: Petition of Builders' Iron Foundry of Providence, R. I., opposing rider to naval appropriation bill prohibiting premium payments, etc., in navy yards; to the Committee on Naval Affairs.

Also, memorial of New England Bu. H. Co., of Providence, R. I., opposing proposed forms of legislation against efficiency methods in Government work; to the Committee on Labor.

HOUSE OF REPRESENTATIVES.

MONDAY, *June 5, 1916.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Lord God, our heavenly Father, impart unto us, we pray Thee, out of the abundance of Thy grace the qualities of mind and soul which shall bring us into a conscious relationship with Thee, that our minds may be broadened and our hearts quickened, that we may render willing and faithful service in the things whereunto Thou hast called us. In the spirit of the Lord Jesus Christ. Amen.

The Journal of Saturday, June 3, 1916, was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 14864) to alter and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from the Central Pacific Railroad, in California, to Portland, in Oregon," approved July 25, 1866, as amended by the acts of 1868 and 1869, and to alter and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from Portland to Astoria and McMinnville, in the State of Oregon," approved May 4, 1870, and for other purposes.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 5658. An act to ratify, approve, and confirm an act duly enacted by the Legislature of the Territory of Hawaii amending the franchise held by the Honolulu Gas Co. (Ltd.), by extending it to include all of the island of Oahu, Territory of Hawaii;

S. 5777. An act to authorize and provide for the manufacture, maintenance, distribution, and supply of electric light and power within the Lihue district and the Koloa district, county of Kauai, Territory of Hawaii;

S. 5274. An act to ratify, approve, and confirm an act duly enacted by the Legislature of the Territory of Hawaii amending the franchise held by the Hawaiian Electric Co. (Ltd.), by extending it to include all of the island of Oahu, Territory of Hawaii; and

S. 5776. An act to amend certain public-utility franchises in the Territory of Hawaii;

The message also announced that the Senate had passed without amendment bills of the following titles:

H. R. 529. An act creating an additional land district in the State of California, and for other purposes;

H. R. 4297. An act for the relief of Frances L. Llewellyn;

H. R. 6651. An act providing for the payment for certain services arising under the Navy Department;

H. R. 7817. An act to validate the homestead entry of George S. Clark;

H. R. 7804. An act to authorize the issuance of patent to Oscar R. Howard, and for other purposes;

H. R. 3794. An act for the relief of Thomas S. Johnson;

H. R. 2744. An act to correct title to certain lands in Colorado;

H. R. 13474. An act to amend section 6 of an act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes, approved March 14, 1900, as amended by the act of March 2, 1911;

H. R. 13112. An act to amend section 14 of the seamen's act of March 4, 1915; and

H. R. 13064. An act for the relief of the M. A. Sweeney Shipyards & Foundry Co.

The message also announced that the Senate had passed with amendment bills of the following titles, in which the concurrence of the House was requested:

H. R. 14484. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war;

H. R. 13486. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war;

H. R. 4767. An act authorizing the Director of the Census to collect and publish statistics of cotton seed and cottonseed products;

H. R. 9525. An act to establish a national park in the Territory of Hawaii;

H. R. 228. An act to amend the United States homestead law in its application to Alaska, and for other purposes;

H. R. 8654. An act to amend an act entitled "An act to provide for an enlarged homestead," approved February 19, 1909, by adding a new section to be known as section 7;

H. R. 8351. An act to accept a deed of gift or conveyance from the Lincoln Farm Association, a corporation, to the United States of America, of land near the town of Hodgenville, county of Larue, State of Kentucky, embracing the homestead of Abraham Lincoln and the log cabin in which he was born, together with the memorial hall inclosing the same; and, further, to accept an assignment or transfer of an endowment fund of $50,000 in relation thereto; and

H. R. 449. An act to provide for the appointment of 11 supervising inspectors, Steamboat-Inspection Service, in lieu of 10.

The message also announced that the Senate had passed bills and joint resolutions of the following titles, in which the concurrence of the House was requested:

S. J. Res. 113. Joint resolution for the relief of Fred White;

S. J. Res. 107. Joint resolution authorizing and directing the Director of the Census to collect and publish statistics of marriage and divorce;

S. J. Res. 50. Joint resolution authorizing the Secretary of the Interior to sell the coal deposits in and under certain public lands to the Republic Coal Co., a corporation;

S. J. Res. 114. Joint resolution withholding from allotment the unallotted lands or public domain of the Creek Nation or Tribe of Indians and providing for the sale thereof, and for other purposes;

S. 1098. An act to adjust and settle the claims of the loyal Shawnee and loyal absentee Shawnee Tribe of Indians and to report the same to Congress;

S. 3069. An act to amend an act entitled "An act to amend an act entitled 'An act to amend an act entitled "An act to regulate commerce," approved February 4, 1887, and all acts amendatory thereof, and to enlarge the powers of the Interstate Commerce Commission,'" approved March 4, 1915;

S. 2543. An act for the relief of the State of Kentucky;

S. 4176. An act authorizing and directing the Secretary of War to make certain provisions for the care of Federal and Confederate veteran soldiers who served in the War between the States, 1861 to 1865, to enable them to unite in participation of a national reunion and peace jubilee to commemorate the victories and virtues resulting in the half century of peace and prosperity to the American Nation, to be held in the national domain within the Vicksburg National Military Park October 16, 17, 18, and 19, 1917;

S. 3020. An act waiving the age limit for admission to the Medical Corps of the United States Navy in the case of John B. Bostick;

S. 2458. An act authorizing the Cowlitz Tribe of Indians residing in the State of Washington to submit claims to the Court of Claims;

S. 640. An act for the relief of Ellen B. Monahan;

S. 5268. An act for the relief of the Copper River & Northwestern Railway Co.;

S. 5082. An act adding certain lands to the Missoula National Forest, Mont.;

S. 3617. An act for the relief of Elizabeth Davis;

S. 4307. An act to prevent the disclosure of national-defense secrets;

S. 5724. An act authorizing the construction of a public building in the city of Durango, Colo.;

S. 3346. An act conferring jurisdiction on the Court of Claims to adjudicate the claims of the State of Massachusetts;

S. 5103. An act authorizing and directing the Secretary of War to lease to Charleston-Dunbar Traction Co. a certain strip or parcel of land owned by the United States Government on the Great Kanawha River in West Virginia;

S. 3618. An act authorizing the Secretary of the Interior to subdivide a part of the town site of Plummer, Idaho, and for other purposes;

S. 5911. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors;

S. 1094. An act conferring jurisdiction on the Court of Claims to hear and determine and report to Congress on claims of the Ponca Tribe of Indians against the United States;

S. 1093. An act to permit the Denison Coal Co. to relinquish certain lands embraced in its Choctaw and Chickasaw coal lease and to include within said lease other lands within the segregated coal area;

S. 5379. An act validating certain homestead entries;

S. 1308. An act to amend an act entitled "An act to establish circuit courts of appeals and to define and regulate in certain cases the jurisdiction of the courts of the United States, and for other purposes," approved March 3, 1891;

S. 743. An act for the relief of Moses Chauncey;

S. 1045. An act to provide for the erection of a public building at Prescott in the State of Arizona;

S. 4251. An act to authorize the Ponca Tribe of Indians to appear in and be made parties to any suits filed in the Court of Claims by the Omaha Tribe;

S. 5495. An act for the relief of Edward J. Lynch, collector of internal revenue for the district of Minnesota;

S. 4384. An act providing for the refund of duties collected on flax-preparatory machines, parts, and accessories imported subsequently to August 5, 1909, and prior to January 1, 1911;

S. 4282. An act to permit the State of Wyoming to relinquish and to select other lands from the public domain in lieu thereof;

S. 5672. An act for the relief of sundry building and loan associations;

S. 34. An act granting to the State of Utah title to certain lands in said State for use as a fish hatchery;

S. 4253. An act conferring jurisdiction on the Court of Claims to hear, determine, and report to Congress on claims of the Iowa Tribe of Indians against the United States;

S. 4586. An act to protect and conserve the halibut fisheries of the Pacific Ocean, to establish closed seasons in halibut fishing in certain waters thereof, and to restrict the landing of halibut in the United States of America and the Territory of Alaska during the closed seasons established;

S. 3012. An act for the relief of Elizabeth T. Wells;

S. 1046. An act to provide for the purchase of a site for a public building in the city of Bisbee, Ariz.;

S. 3265. An act for the extension, remodeling, and improvement of the public building at Jefferson City, Mo.;

S. 3294. An act to appropriate a sum of money to pay Rhoda Menz, W. W. Christmas, and James M. Christmas, heirs of Myra Clarke Gaines, for certain lands in Louisiana;

S. 5503. An act to provide for the purchase of a site for the erection of a Federal building at Georgetown, Del.;

S. 4866. An act to carry out the findings of the Court of Claims in the case of the Commercial Pacific Cable Co.;
S. 5398. An act to increase the limit of cost of post-office site and building at Millville, N. J.;
S. 5447. An act providing for the erection of a public building at Taylor, Tex.;
S. 5615. An act granting certain lands to the State of Washington for park purposes;
S. 4862. An act to exclude intoxicating liquors from national parks and national forest reserves;
S. 5751. An act authorizing the addition of certain lands to the Wyoming National Forest, Wyo.;
S. 5863. An act authorizing the health officer of the District of Columbia to issue a permit for the removal of the remains of the late Charles H. Bingham from Congressional Cemetery, District of Columbia, to Lock Haven, Pa.;
S. 739. An act for the relief of James F. Cole;
S. 1362. An act for the relief of Lester A. Rockwell; and
S. 2852. An act for the relief of John F. Considine.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

A message, in writing, from the President of the United States was communicated to the House of Representatives by Mr. Sharkey, one of his secretaries, who also informed the House of Representatives that the President had approved and signed bills of the following titles:
On June 3, 1916:
H. R. 12766. An act for making further and more effectual provision for the national defense, and for other purposes.
On June 5, 1916:
H. R. 12843. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war.

EXTENSION OF REMARKS.

Mr. ASWELL rose.
The SPEAKER. For what purpose does the gentleman from Louisiana rise?
Mr. ASWELL. I rise to ask unanimous consent to extend my remarks by printing a short resolution indorsing vocational education.
The SPEAKER. The gentleman from Louisiana asks unanimous consent to extend his remarks in the RECORD by printing a short resolution indorsing vocational education. Is there objection?
There was no objection.

ADJOURNMENT OF THE SENATE FROM JUNE 3 TO JUNE 8.

Mr. MANN. Mr. Speaker, I ask unanimous consent to proceed for three minutes.
The SPEAKER. The gentleman from Illinois asks unanimous consent to proceed for three minutes. Is there objection?
There was no objection.
Mr. MANN. The last paragraph of section 5 of the Constitution of the United States reads as follows:

Neither House, during the session of Congress, shall, without the consent of the other, adjourn for more than three days, nor to any other place than that in which the two Houses shall be sitting.

The RECORD shows that on Saturday, June 3, in the Senate of the United States one of the Senators moved that the Senate adjourn in accordance with a unanimous-consent agreement. The motion was agreed to, and under the order previously made the Senate adjourned until Thursday, June 8, 1916, at 12 o'clock meridian.
I do not know whether it is the business of the House of Representatives to tell the Senate of the United States to obey the Constitution. I am not sure that it may be, so that I do not propose to offer anything. I do not know but that the claim may be that adjourning from Saturday, June 3, to Thursday, June 8, which includes one Sunday, is only an adjournment for three days; but I feel quite certain that the universal custom in the House has been—and I think the universal custom in the Senate heretofore has been—that an adjournment from the 3d of June to the 8th of June was more than three days, although it included one Sunday.
I do not know what the effect would be if the Senate should conclude to adjourn for a month; whether there would be anything that the House could do; but I do not wish the incident to pass without some notice being taken of it, because it seems to me it is a flat violation of the Constitution for the Senate to adjourn for more than three days without the consent of the House, and that an adjournment from Saturday until Thursday is an adjournment for at least four days, in violation of the Constitution.
The SPEAKER. The Chair would like to inquire of the gentleman—because it is an interesting point undoubtedly—in case they adjourned for more than three days what would happen?
Mr. MANN. I do not know what happened. Nobody has ever tried it before, I believe.
Mr. SLAYDEN. It is a fracture of the Constitution.
Mr. MANN. The gentleman from Texas [Mr. SLAYDEN] suggests that what happened is a fracture of the Constitution.
Mr. GARRETT. Did the Senate adjourn or did it take a recess?
Mr. MANN. It adjourned according to a motion, as shown in the RECORD, and I think that was a unanimous-consent agreement in the Senate, as shown in the RECORD heretofore.
Mr. HEFLIN took the chair as Speaker pro tempore.
Mr. CLARK of Missouri. When the gentleman gets through, I would like to say a word or two myself. I would like to have five minutes.
The SPEAKER pro tempore. The gentleman from Missouri asks unanimous consent to proceed for five minutes. Is there objection?
There was no objection.
The SPEAKER pro tempore. The gentleman from Missouri is recognized for five minutes.
Mr. CLARK of Missouri. The question that the gentleman from Illinois [Mr. MANN] raises is a very fine point, and it comes very nearly being a fundamental question. The constitutional provision cited by the gentleman from Illinois [Mr. MANN] is this: "Neither House during a session of Congress shall, without the consent of the other, adjourn for more than three days," section 5, Article I. The Senate, it seems, adjourned from Saturday to Thursday—four days, not counting Sunday, a clear violation of the provision of the Constitution aforesaid.
Most of the Members have come in in recent years; at least they have not been here 20 years. The present Senator, JAMES HAMILTON LEWIS, of Illinois, an exceedingly brilliant man, made a national reputation when he was in this House—he was here only two years—from the State of Washington, and he made it on one question. Of course, he made a whole lot of interesting speeches on other questions, but he first attracted national attention on the paragraph of the Constitution just cited by the gentleman from Illinois [Mr. MANN]. When the House passed the Dingley tariff bill in the spring of 1897 Mr. Speaker Reed, who entertained a great prejudice against the Senate, and was not mealy-mouthed about expressing it, made up his mind that the House should not do anything the rest of that summer, so that public attention would be concentrated upon the Senate, to see it dawdle. What he was up to really was very largely to bring the Senate into contempt. He would not appoint the committees, and of course everybody knows you can not transact any business here without committees, except upon extraordinary occasions, such as the repeal of the purchasing clause of the silver law by agreement without the appointment of a committee. We took that up and debated it.
The point that Senator LEWIS made his great reputation on was this: That that clause of the Constitution which was read by the gentleman from Illinois [Mr. MANN] provided that one House of Congress can not adjourn more than three days at a time without the consent of the other. Speaker Reed held with the old-time lawyers that Sunday was dies non, no day, and he made two adjournments cover seven days in the teeth of that provision of the Constitution. Speaker Henderson and Speaker CANNON and myself have all followed the ruling of Speaker Reed. It may have been wrong originally, but it was a very convenient ruling, so we let it go at that.
Whenever the House met during the period of adjourning three days at a time we did not have anything else to do, and Col. LEWIS exploited his claim that Congress was not in session at all; that the fact that the House adjourned for more than three days practically adjourned Congress sine die, and he kept it up here time after time, week in and week out, with other constitutional lawyers occasionally helping him out. I shall never forget that one morning our friend the cartoonist Berryman, one of the most amiable of mortals, had an immense picture of Mr. Speaker Reed lying flat on his back and Col. LEWIS standing triumphantly on top of his stomach.
One of the funniest things that ever happened in this House grew out of that. As long as Mr. Speaker Reed was in a good humor he listened to these constitutional hair-splitters with patience and apparently with pleasure, but one morning he was in a bad humor, and Jerry Simpson, of Kansas, one of the best rough-and-tumble debaters that ever sat in this House, tackled this great constitutional question. Speaker Reed said he was not in order and peremptorily made him take his seat. Mr. Bland, of Missouri, moved that Jerry be allowed to proceed in

order. That seemed like a reasonable request, but they had a wrangle about it and a roll call on it, and on that roll call it was solemnly decided that Jerry Simpson, one of the ablest men in the House, should not proceed in order. Now, if Jerry had let them alone he would have been all right, but while the clerks were adding up that vote—the Members generally could tell by ear how it had gone—Mr. Richardson, of Tennessee, went up the aisle to where Jerry was sitting and said, "Jerry, when Reed anounces that vote, you get up and ask him where you are at." So Jerry got up, looking as solemn as an owl, and said, "Mr. Speaker, you have decided that I can not speak out of order. The House has just decided that I can not proceed in order. I want to know where I am at." As quick as lightning Mr. Reed said, "That is one of the things that no mortal man has ever been able to find out." [Laughter.]

I would like to know if the gentleman from Illinois [Mr. MANN] or anybody else has any suggestion about what happens when the Senate, or the House either, violates the Constitution in this regard. It is a very serious question. If the Senate can adjourn for four days without the consent of the House, it can adjourn for four weeks, and so can the House. The point raised in court might knock out and invalidate important laws. The statement in the RECORD that the Senate adjourned from Saturday until Thursday may be a misprint. I hope it is, because——

Mr. MANN. It is not a misprint.

Mr. CLARK of Missouri. It is then a clear case of a violation of that provision of the Constitution, because Monday, Tuesday, Wednesday, and Thursday are four days, not saying anything about Sunday. Everybody agrees now that Speaker Reed was right about that, and that Sunday is dies non, but we have to count either Saturday or Thursday, and so we have four days. It is worth looking into.

Mr. GARRETT. Did the Senate notify the House of its action?

Mr. CLARK of Missouri. No.

Mr. GARRETT. Was any resolution adopted by the House on the subject?

Mr. CLARK of Missouri. No.

The SPEAKER resumed the chair.

Mr. GARRETT. Mr. Speaker, if the Senate has not communicated to the House the resolution it adopted, providing for an adjournment until Thursday, I am frank to say that I do not see how we can take official notice of it. Personally I should like to present a resolution of regret that the Senate has violated the Constitution of the United States; but if it has not been communicated to us officially, we do not know officially that the Senate has adjourned. We know from the RECORD, but the RECORD is not official.

Mr. MANN. The gentleman knows that one House never communicates to the other the fact that it has taken an adjournment for three days.

Mr. GARRETT. They do not ask the consent of the House, but they have usually communicated the fact that they took an adjournment for three days.

Mr. MANN. Oh, no; they never do, and we never send word to the Senate that we have adjourned for three days.

Mr. NORTON. Mr. Speaker, will the gentleman yield?

Mr. GARRETT. Certainly.

Mr. NORTON. The gentleman is an authority on parliamentary law. What would he say would be the proper procedure if the Senate should adjourn for 30 days without notifying the House? Would it be proper for the House to take some action to compel the Senate to continue in session?

Mr. GARRETT. I do not know whether it would be proper or not. I think it might be in order to pass a resolution expressing our regret.

Mr. RUSSELL of Missouri. Mr. Speaker, when a resolution providing for the final adjournment of Congress is passed by one House it has no effect until the other House concurs in that resolution. Now, the Senate having adjourned for four days, five days, including Sunday, or a longer time than they have the right to adjourn under the Constitution without the consent of the House, it seems to me that action of the Senate is of no more binding effect than a resolution to adjourn sine die would have if passed by the Senate but not concurred in by the House. The proper course would be—the Senate having passed a resolution providing for an adjournment for five days, or for four days excluding Sunday—to send the resolution to the House and ask the House to concur in it. Then, if the House should not concur in the resolution, it would have no force or effect under the Constitution, and the Senate would be constructively in session, and it could meet to-day or to-morrow.

Mr. GARRETT. Suppose, as the gentleman from North Dakota suggests, the Senate should adjourn for 30 days.

Mr. RUSSELL of Missouri. That would be a nullity and have no effect, unless the House should concur in the resolution. An adjournment by the Senate for four days is, in my opinion, of no effect until the House concurs in it, because such an adjournment would be without constitutional authority. Like a resolution to adjourn sine die, it would not be binding and would have no effect whatever unless the House should concur in its action.

Mr. GARRETT. That is probably true, but I think we ought to resolve that we regret to hear that the greatest legislative body in the world has violated the Constitution of the United States.

Mr. ALEXANDER. Does not the gentleman think it would be worth while to first determine if they have violated the Constitution of the United States?

Mr. GARRETT. I think they have.

Mr. ALEXANDER. I think it is quite doubtful if they have.

OREGON & CALIFORNIA RAILROAD LAND GRANTS.

Mr. FERRIS. Mr. Speaker, I ask unanimous consent for the present consideration of the conference report on the Oregon & California Railroad land grants.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent for the present consideration of the conference report on the Oregon & California Railroad bill.

Mr. MANN. I think the gentleman should first present the conference report on the part of the managers of the House.

Mr. FERRIS. Mr. Speaker, I present the conference report.

The SPEAKER. The Clerk will report.

The Clerk read as follows:

Conference report on the bill (H. R. 14864) to alter and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from the Central Pacific Railroad, in California, to Portland, in Oregon," approved July 25, 1866, as amended by the acts of 1868 and 1869, and to alter and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from Portland to Astoria and McMinnville, in the State of Oregon," approved May 4, 1870, and for other purposes.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent for the present consideration of the conference report. Is there objection?

Mr. MONDELL. Reserving the right to object, Mr. Speaker, I would like to ask the gentleman from Oklahoma if there is any special hurry about this matter, if it can not be taken up to-morrow and have the report printed in the RECORD?

Mr. FERRIS. The gentleman knows that it was debated to great length in the Senate and that the conference report was acted on Saturday. There is an additional reason, the injunction expires on June 9, and, further, one of the Oregon Members on that side of the House wants to take the train this afternoon for Chicago.

Mr. MONDELL. The Senate does not meet until Thursday, and unless there is some special reason why the matter should be disposed of to-day I think it would be better to take it up to-morrow.

Mr. FERRIS. One of the gentlemen from Oregon wants to go to the convention and wants to leave at 2 o'clock. There can be no objection; the conference report has been printed in the RECORD in the Senate proceedings on Saturday.

The SPEAKER. Is there objection?

There was no objection.

The conference report is as follows:

CONFERENCE REPORT.

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill H. R. 14864, entitled "An act to alter and amend an act entitled 'An act granting lands to aid in the construction of a railroad and telegraph line from the Central Pacific Railroad, in California, to Portland in Oregon,' approved July 25, 1866, as amended by the acts of 1868 and 1869, and to alter and amend an act entitled 'An act granting lands to aid in the construction of a railroad and telegraph line from Portland to Astoria and McMinnville, in the State of Oregon,' approved May 4, 1870, and for other purposes," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1 and 6.

That the House recede from its disagreement to the amendments of the Senate numbered 4, 5, and 10, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: Omit the matter inserted by said amendment, and on page 9 of the bill, in line 11, after the word "residing," insert the following: "whether such lands shall be of class 2 or class 3 and"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"The timber on lands of class 2 shall be sold for cash by the Secretary of the Interior, in cooperation with the Secretary of Agriculture, or otherwise, to citizens of the United States, associations of such citizens, and corporations organized under the laws of the United States, or any State, Territory, or District thereof, at such times, in such quantities, and under such plan of public competitive bidding as in the judgment of the Secretary of the Interior may produce the best results: *Provided*, That said Secretary shall have the right to reject any bid where he has reason to believe that the price offered is inadequate, and may reoffer the timber until a satisfactory bid is received: *Provided further*, That upon application of a qualified purchaser that any legal subdivision shall be separately offered for sale such subdivision shall be separately offered before being included in any offer of a larger unit, if such application be filed within 90 days prior to such offer: *And provided further*, That said timber shall be sold as rapidly as reasonable prices can be secured therefor in a normal market.

"The Secretary of the Interior shall as soon as the purchase price is fully paid by any person purchasing under the provisions of this section issue to such purchaser a patent conveying the timber and expressly reserving the land to the United States. The timber thus purchased may be cut and removed by the purchaser, his heirs or assigns, within such period as may be fixed by the Secretary of the Interior, which period shall be designated in the patent; all rights under said patent shall cease and terminate at the expiration of said period: *Provided*, That in the event the timber is removed prior to the expiration of said period the Secretary of the Interior shall make due announcement thereof, whereupon all rights under the patent shall cease.

"No timber shall be removed until the issuance of patent thereof. All timber sold under this act shall be subject to the taxing power of the States apart from the land as soon as patents are issued as provided for herein."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment as follows: On page 9 of the bill, in lines 1 and 2, strike out the words "by the Secretary of the Interior"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment as follows: After the comma inserted at the beginning of said amendment, strike out the words "after which" and in lieu thereof insert the word "thereafter"; and, on page 14 of the bill, in line 5, omit the period after the words "United States"; and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "Twenty-five per cent of the remainder shall be paid to the State treasurer of the State to which the land is located, to be and become a part of the irreducible school fund of the State; 25 per cent shall be paid to the treasurer of the county for common schools, roads, highways, bridges, and port districts, to be apportioned by the county courts for the several purposes above named; 40 per cent shall be paid into, reserved, and appropriated as a part of the fund created by the act of Congress approved June 17, 1902, known as the reclamation act; 10 per cent shall become a part of the general fund in the Treasury of the United States; and of the balance remaining in said Oregon and California land-grant fund, from whatsoever source derived, 25 per cent shall be paid to the State treasurer of the State in which the land is located, to be and become a part of the irreducible school fund of the State; 25 per cent shall be paid to the treasurer of the county for common schools, roads, highways, bridges, and port districts, to be apportioned by the county courts for the several purposes above named; and the remainder shall become a part of the general fund in the Treasury of the United States"; and the Senate agree to the same.

SCOTT FERRIS,
E. T. TAYLOR,
I. L. LENROOT,
Managers at the conference on the part of the House.

GEORGE E. CHAMBERLAIN,
C. S. THOMAS,
THOMAS STERLING,
Managers at the conference on the part of the Senate.

Mr. HAWLEY. Mr. Speaker, I wish to comment upon the conference report only to the extent of explaining briefly some of the matters agreed upon by the conferees of the Senate and House. The timber is to be sold for cash only. The proceeds derived from the sales of timber and lands are to be divided in the same proportions as in the bill as it passed the House between State and national uses—that is, one-half to each. Forty per cent of the proceeds go to the general reclamation fund for use anywhere in the United States and 10 per cent to the United States Treasury. Twenty-five per cent of the proceeds are to be paid to the State treasurer for the irreducible school fund and 25 per cent to the county treasurers for common schools, roads, bridges, highways, and port districts, to be apportioned among them by the county courts. I understand it to be the purpose of the conferees that the amount received by any county at any time shall depend upon the area of grant lands within that county and the amount of sales therefrom. Prior to any distribution as above provided, the preferred claims must be paid to the railroad and to the Government. I wish again to protest vigorously that we have not received that portion of the proceeds of the grant to which we are by every consideration of right and justice entitled. The amendment I offered on May 24, when the bill was before the House, allotting to the State school fund practically 40 per cent of the proceeds and to the counties and municipal subdivisions also 40 per cent for roads, ports, and so forth, was fairer and should have been agreed to. I also feel that another contention of mine for more liberal treatment of the homesteaders was based upon sound policy and fairness.

Mr. NORTON. Would it not be well for the chairman of the committee to explain the conference report?

Mr. FERRIS. Mr. Speaker, I can explain the changes and modifications, I think, in two or three sentences. As the bill passed the House, roughly speaking, 50 per cent of the proceeds went to the State of Oregon and 50 per cent to the United States Government—40 per cent of the Government's part goes through the avenue of the Reclamation Service. As the bill passed the Senate it was raised to 90 per cent for the State of Oregon and only 10 per cent for the United States Government. In the conference the conferees came back to the fifty-fifty provision with one modification. The bill as it passed the House, and we still retain the provision providing for a suit for accounting and determining what, if any, excess the railroad had received more than it was entitled to. As the bill passed the House it carried all of the money to be recovered from the railroad as the result of the accounting to the Government, and the House yielded in conference to the extent of giving 50 per cent to go to the State and retaining 50 for the Government. Nobody knows what the surplus will be, but probably $200,000 or $300,000. There was also a little modification made on the method of selling the timber. The House will remember that there was some controversy about that as it went through. None of us were sure of the best way to sell it, but a good many different views were held. The Senate conferees yielded some of their positions, and we yielded some of ours, and brought in a compromise provision which we think is better than that of either the House or the Senate.

Mr. MONDELL. Will the gentleman yield?

Mr. FERRIS. Certainly.

Mr. MONDELL. Amendment No. 3, in regard to which the House has receded from its disagreement and agreed to the same with an amendment, seems to be a very important provision. As I read the conference report, it would seem that it has very materially modified the provision in regard to the disposition of the timber. The bill as it passed the House provided that the timber should be sold for cash or payments not exceeding 10 equal annual installments. The provision as agreed to in conference seems to provide for the sale of the timber for cash only.

Mr. FERRIS. That is true.

Mr. MONDELL. That is a very important departure. It would, of course, give great advantage to those who have ready cash to put up. What was the argument in favor of that sort of departure from the House provision?

Mr. FERRIS. The Senate provision as they passed it provided for cash sales only, and provided that the purchasers could retain title to the timber and possession of the land from which the timber was removed indefinitely, no time limit. That seemed to us to be very objectionable both for the sale of the timber and the handling of the land. It becomes a very important question as to when the property can become taxable. In the sale of the timber on time no one knows when they would cut it, how we could collect for it, and that leaves the thing all in the air and made it difficult for the Government to protect itself. In order to clean up all these questions—taxation, the

sale of the timber, the collection of the proceeds on the sale of Government property—we decided on this provision.

Mr. MONDELL. Mr. Speaker, the gentleman will recall that when the bill was under consideration I called attention to the fact that the provision in the bill, a new and novel one, for the issuance of a patent to the timber after all payments were made, might relieve, or would relieve, the purchaser from all taxes until he had paid his last installment, and I suggested that there would be no difficulty to amend that and make the land taxable by providing for the issuance of a certificate of sale.

Mr. FERRIS. I remember that.

Mr. MONDELL. And the land would become immediately taxable upon the issuance of a certificate of sale and upon the first payment. The change that has been made by the committee authorizing the sales only for cash undoubtedly would give a very great advantage to the large timber companies as against persons of small means who might desire to make these purchases.

Mr. FERRIS. Let me call the gentleman's attention to the fact that the Secretary of the Interior is given full power to reject any and all bids, and the provision forcing the Secretary to sell in 40-acre tracts is still preserved. We thought that was about as good as we could do. I may say that I was very much in favor of having the property sold on time; I thought it would bring more sold in that way, and thought perhaps it might help some one to buy land who could not otherwise buy; but we were confronted with this proposition: We had to do one of three things. We either had to sell the property on time and take outside security or we had to deny the State the right of taxation or, third, we had to sell it with a proviso that it was taxable from the date of sale. None of the three seemed satisfactory. If we allowed it to be taxed before it was paid for the State of Oregon would, of course, tax it; and if the purchaser refused to pay the taxes, the Government would lose it by a tax sale. In any time sale we encounter perplexing questions when you come to sell personal property of the Government on time. The provision was the best that we could do. It may not be free from objection. In fact, I doubt if it is, but it represents the combined judgment of your conferees, who worked very faithfully to solve it correctly.

Mr. Speaker, unless some one desires time, I ask for a vote.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

TRAINING THE ORGANIZED MILITIA.

Mr. HAY. Mr. Speaker, I call up the bill H. R. 15005, an act to appropriate $200,000 for training the Organized Militia of any State, Territory, or of the District of Columbia, with Senate amendments thereto, and ask that the same be laid before the House.

The Senate amendments were read.

Mr. HAY. Mr. Speaker, I move to concur in all of the Senate amendments.

The Senate amendments were agreed to.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. BRITT, for one week.

ACTS, ETC., OF PORTO RICO LEGISLATURE (H. DOC. NO. 1191).

The SPEAKER laid before the House the following message from the President of the United States.

The Clerk read as follows:

To the Senate and House of Representatives:

As required by section 31 of the act of Congress approved April 12, 1900, entitled "An act temporarily to provide revenue and a civil government for Porto Rico, and for other purposes," I transmit herewith copies of the acts and resolutions enacted by the Eighth Legislative Assembly of Porto Rico during its second session (Feb. 14 to Apr. 13, 1916, inclusive).

These acts and resolutions have not previously been transmitted to Congress and none of them has been printed.

WOODROW WILSON.

THE WHITE HOUSE, *June 5, 1916.*

The SPEAKER. This will be referred to the Committee on Insular Affairs and ordered printed. The documents are not ordered printed.

CALENDAR FOR UNANIMOUS CONSENT.

The SPEAKER. The Clerk will call the first bill on the Calendar for Unanimous Consent.

FRAUDULENT ENLISTMENT.

The first business on the Calendar for Unanimous Consent was the bill (H. R. 7619) to repeal section 3 of section 1342 of the Revised Statutes of the United States, enacted July 27, 1892.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, there are a number of bills on the calendar that might be objected to and passed over, and in view of the absence of a good many Members of the House, owing to the Republican convention at Chicago this week, I am going to suggest that instead of bills objected to being stricken off the calendar, they be passed over without prejudice.

The SPEAKER. The gentleman from Illinois asks unanimous consent that when a bill is called and there is objection made to it, it may be passed over without prejudice. Is there objection?

There was no objection?

Mr. GORDON. Mr. Speaker, do I understand that the gentleman from Illinois will not object to the consideration of this bill?

Mr. MANN. I am going to object to its consideration to-day.

Mr. GORDON. And there is no use in discussing the merits of it?

Mr. MANN. Not to-day. It will go over and have its place on the calendar.

Mr. GORDON. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. GORDON. Under the unanimous-consent agreement just entered into on the suggestion of the gentleman from Illinois [Mr. MANN], what would be the status of a bill that was objected to?

The SPEAKER. If any one objects to a bill under the unanimous-consent agreement just secured, instead of that objection striking it from the calendar it goes over without prejudice.

Mr. MANN. It keeps its place on the calendar.

The SPEAKER. That is because of the peculiar condition in which we find ourselves to-day. Is there objection to the consideration of this bill?

Mr. MANN. I object.

The SPEAKER. It will go over without prejudice.

RECORDS, ETC., OF COMMON CARRIERS.

The next business on the Calendar for Unanimous Consent was the bill H. R. 722, to amend section 20 of an act to regulate commerce approved February 4, 1887, as amended, and for other purposes.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, there is a minority report of a gentleman who is not present.

Mr. ADAMSON. I do not think the gentleman who made the minority report intends to delay the bill. I have talked to him about it. If the gentleman objects, of course, under the agreement it will go over.

Mr. MANN. It will have to go over in view of the minority report.

The SPEAKER. Does the gentleman object?

Mr. MANN. I object.

Mr. ADAMSON. I was praying the gentleman would not object.

The SPEAKER. The Clerk will report the next bill.

INVESTIGATION OF CONDITIONS RELATING TO INTERSTATE AND FOREIGN COMMERCE.

The next business in order on the Calendar for Unanimous Consent was Senate joint resolution 60, creating a joint subcommittee from the membership of the Senate Committee on Interstate Commerce and the House Committee on Interstate and Foreign Commerce to investigate the conditions relating to interstate and foreign commerce, and the necessity of further legislation relating thereto, and defining the powers and duties of such subcommittee.

The SPEAKER. Is there objection?

Mr. MANN. Under the agreement I object.

The SPEAKER. The joint resolution goes over under the agreement.

MEMORIAL TO JAMES BUCHANAN.

The next business in order on the Calendar for Unanimous Consent was House joint resolution 145, authorizing the erection, on the public grounds in the city of Washington, D. C., of a statue of James Buchanan, a former President of the United States.

The Clerk read the title.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

Resolved, etc., That the Chief of Engineers, United States Army, be, and he is hereby, authorized and directed to grant permission to the trustees designated in the will of Mrs. Harriet Lane Johnston for the erection of a memorial to James Buchanan, a former President of the United States, on public grounds of the United States in the city of Washington, D. C., in the southern portion of Meridian Hill Park, between Fifteenth, Sixteenth, W, and Euclid Streets NW.: *Provided,*

That the design and location of said memorial and the plan for the treatment of the grounds connected with its site shall be approved by the Commission of Fine Arts, and that the United States shall be put to no expense in or by the erection of said memorial.

The committee amendment was read, as follows:

Page 1, lines 9 and 10, strike out after the word "Columbia" the words "in the southern portion of Meridian Hill Park, between Fifteenth, Sixteenth, W, and Euclid Streets NW."

Mr. SLAYDEN. Mr. Speaker, unless some gentleman wants information about it I have nothing to say.

Mr. MANN. Will the gentleman yield?

Mr. SLAYDEN. Certainly.

Mr. MANN. My information is that the Fine Arts Commission approved the site for this monument in the Meridian Hill Park.

Mr. SLAYDEN. In the southern extremity of it.

Mr. MANN. That being the case, is it not safer to disagree to the Senate amendment so we will know that that is where it will go? I do not believe we ought ever to pass a bill for a monument that may be stuck no one knows where, and as long as they have made up their minds just now I would like for them to continue in that frame of mind, and that we should disagree to the Senate amendment and let it be put where they say they expect to put it.

Mr. SLAYDEN. Mr. Speaker, I have not a copy of the bill here——

Mr. MANN. The bill provides that this monument shall be located in the southern portion of Meridian Hill Park, between Fifteenth, Sixteenth, W, and Euclid Streets NW., and that is the present expectation. I think if it is to go through it ought to be located there and not located in Potomac Park or some other place—Monument Park, probably.

Mr. SLAYDEN. Mr. Speaker, I am willing to accept the suggestion of the gentleman from Illinois, and I presume the gentleman from Maryland [Mr. COADY], who was requested by Mr. LINTHICUM, the author of the bill, to see that it was reported and to represent it here to-day, would be willing to do that, and it is my understanding, as it is that of the gentleman from Illinois, that this Commission of Fine Arts decided that the appropriate place for the erection of the monument is in the southern extremity of Meridian Hill Park. What was the suggestion of the gentleman from Illinois?

Mr. MANN. To disagree to the committee amendment.

The SPEAKER. Without objection, the committee amendment is disagreed to.

There was no objection.

Mr. MEEKER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MEEKER. I do not know whether this is the right place for an inquiry, but I would like to know if the matter in regard to the Key monument has passed entirely from the control of Congress? I notice a protest on the part of his son to the design.

The SPEAKER. The gentleman from Texas can answer that question.

Mr. SLAYDEN. I did not catch the gentleman's question.

Mr. MEEKER. I desire to know if the entire control of the design of the Francis Key monument has passed from the control of the House? That was left to the commission, and there was a disagreement between his son and a number——

Mr. SLAYDEN. Mr. Speaker, my information is that the matter has been entirely settled. A protest from his son was sent recently to the White House opposing the design. I think I saw the report in the papers, and that is the only information I have——

Mr. MEEKER. Any action?

Mr. SLAYDEN. And a reply was received from the Executive that the matter had been settled and the design accepted.

Mr. MEEKER. Nothing could be done?

Mr. SLAYDEN. Nothing could be done.

Mr. MANN. I think we had better lay this aside temporarily. The Senate has not passed the bill.

Mr. SLAYDEN. Has not passed the bill? Then the amendment of the gentleman from Illinois is simply to definitely fix the location?

Mr. MANN. That has already been disagreed to.

Mr. COADY rose.

The SPEAKER. This joint resolution is on the Union Calendar.

Mr. SLAYDEN. Mr. Speaker, I ask unanimous consent to consider the joint resolution in the House as in the Committee of the Whole House on the state of the Union.

The SPEAKER. The gentleman from Texas asks unanimous consent that the joint resolution be considered in the House as in the Committee of the Whole House on the state of the Union. Is there objection? [After a pause.] The Chair hears none. The action of the House a while ago disagreeing to the amendment is reaffirmed, without objection.

There was no objection.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. SLAYDEN, a motion to reconsider the vote by which the joint resolution was passed was laid on the table.

THE AVIATION SERVICE.

The next business in order on the Calendar for Unanimous Consent was S. J. Res. 65, a joint resolution creating a joint commission of Congress to investigate the Aviation Service of the United States Army.

The Clerk read the title.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, I object.

The SPEAKER. The gentleman from Illinois objects.

RESTORATION OF HOMESTEAD RIGHTS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 8492) to restore homestead rights in certain cases.

The SPEAKER. Is there objection to the consideration of the bill?

Mr. VOLSTEAD. Mr. Speaker, reserving the right to object, I would like to know whether the gentleman in charge of the bill would be willing to amend it so as to include some of my people up in Minnesota?

Mr. FERRIS. I would, but it would bring other objections and cause trouble in other places. I hope the gentleman will not object.

Mr. VOLSTEAD. The amendment I offer only extends the relief provided in the bill to others equally deserving. There were 11 townships ceded out of the Chippewa Indian Reservation. The law provided that these lands must be sold at not less than $4 an acre. Now, those lands were too swampy to live on for many years after purchase, and practically every man that purchased has lost the land he got. Now, it seems to me, in view of that situation, we ought to be willing to admit those people to the same sort of relief as we are offering in this bill.

Mr. FERRIS. I am not objecting to the gentleman's amendment.

Mr. VOLSTEAD. I will send it to the Speaker's table and have it read, or give the gentleman a copy of it.

Mr. SHERLEY. Mr. Speaker, I do not think the House ought to consider, without a committee having acted on it, an amendment of that kind. We can not afford to do business in that way here.

Mr. FERRIS. I said to the gentleman that he could offer an amendment and I personally would not object to it. I think it is a just amendment.

Mr. SHERLEY. I am not prepared to have an amendment come up in that way without committee action.

Mr. FERRIS. I do not think the gentleman from Kentucky will object to it himself when he hears it.

Mr. SHERLEY. That may be; but we ought not to legislate with public lands in that way. I announce now that if the gentleman is going to accept that amendment, I will object to the bill that is now pending.

Mr. VOLSTEAD. If the gentleman will permit, this is in line with the bill itself. The only real difference is that this bill gives a new homestead if a person has paid $5. My amendment gives $1 where $4 has been paid.

Mr. SHERLEY. If the gentleman please, that is not the point at all. We have had enough legislation touching public lands—at least I have had enough experience—not to be willing to let the matter go through without it having been considered by committee. The gentleman is adding something that may or may not have merit, and if he persists I will object to the bill that is up now.

The SPEAKER pro tempore (Mr. ADAIR). Is there objection?

Mr. MANN. Reserving the right to object, what is the merit of this bill, anyhow?

Mr. FERRIS. The gentleman from Illinois will remember that this bill was passed in this House two years ago.

Mr. MANN. I do not remember it.

Mr. FERRIS. It did; and the gentleman from Illinois and the gentleman from South Dakota [Mr. BURKE] and I had a long colloquy about it at that time. The gentleman from South Dakota at that time wanted to amend it by taking in some Indian lands that sold at a smaller price. The gentleman from Illinois said if we did, he would object. I was between the proverbial two stones. This bill went over to the Senate and was held up behind the shipping bill last year, and therefore did not pass that body.

Mr. MANN. The gentleman understands that if this bill passes in this shape and there is any substantial amendment re-

lating to any other matter going in it in the Senate, and it comes back here, it will probably die.

Mr. FERRIS. That is probably true. But let me say a word on the merits of this proposition. In Oklahoma—and it has been true also in South Dakota and Minnesota—they have put up the Indian lands and sold them to the highest bidders, and, coupled with that, they have forced them to homestead the lands. Some of these lands sold for as much as $30 an acre. All this bill does is to provide that where they paid the price of $5 an acre or more they may take again.

The legislation providing for this sale provided that they may pay one-fifth down and pay one-fifth each year for five years. They most all had to prove up and go into a loan company, and they borrowed from the loan company in order to pay the Government the deferred payments. This method exhausted both his pocketbook and his homestead rights, and this bill allows him only to take again. And personally I think that these $4 an acre people, whom the gentleman from Minnesota represents, although they did not bid by competitive bid, ought to have another chance. If the House does not agree with the gentleman, I ask him not to obstruct this very meritorious legislation for my people. Surely it would not help his people to obstruct mine. My people bid by competitive bid, and in every case they paid over $5 an acre. It is almost too much to exhaust a man's pocketbook and homestead too.

Mr. VOLSTEAD. Why should Oklahoma, simply because the people paid a dollar more there than in Minnesota, be given relief? There is no question but the people that I have reference to lost out because they could not maintain their rights. It became necessary, before they could use the land, to drain it, and large expenses were incurred for that purpose. Most of your people, I understand, still retain the land.

Mr. FERRIS. Oh, no. They paid more than $5 per acre; that was the minimum. Lots of them have lost land and payments too. The condition in Minnesota is not on the same footing with Oklahoma; but, even so, they present a good case, and there is no reason why the House should refuse to allow the amendment to them also under those circumstances. Of course your people did not buy by competitive bids but pursuant to appraisement.

Mr. VOLSTEAD. I believe they bought at a competitive sale, but I am not quite sure; it may have been on appraisal.

Mr. FERRIS. I think you did.

Mr. VOLSTEAD. I know that a good many of them paid more than $4 an acre, and I know that they lost the lands they bought because they paid too much.

Mr. FERRIS. Of course if the gentleman from Kentucky [Mr. SHERLEY] and the gentleman from Illinois [Mr. MANN] are willing to let that amendment be considered, I will say frankly that the gentleman has justice in his amendment; but I do not want to see my people knocked out if I can help it, for I know that they need this relief. The Lord knows if they can go out on that bald, naked prairie and fight out a home on it they ought to have a chance to do it.

Mr. VOLSTEAD. That committee has passed upon this identical proposition, in passing on this bill.

Mr. FERRIS. I introduced a bill to take care of the gentleman, anticipating what the gentleman says, and the Interior Department would not recommend it favorably, and the department said they must report for a competitive bid and hew it down to those cases where they paid $5 or more an acre. I knew that the bill, if it passed, would have to be without any flaw, and free from departmental objection. We have to run the gantlet of unanimous consent, and I was trying to meet the objections that were made.

Mr. VOLSTEAD. I am willing to offer it and let the House decide whether it is willing to have the amendment.

The SPEAKER pro tempore. Is there objection?

Mr. MANN. Reserving the right to object, Mr. Speaker, do I understand that this other amendment is to be offered?

Mr. FERRIS. What was the suggestion of the gentleman from Illinois?

Mr. MANN. Is this bill to be amended otherwise?

Mr. FERRIS. Not by me. I hope the gentleman from Minnesota [Mr. VOLSTEAD] will not insist upon his amendment, because I feel if he does it will knock these people out of relief—those people who bought by competitive bids and with a minimum price of $5 per acre. Five hundred and five thousand acres were sold, and the average price, which included canyons and mountains and prairie-dog towns, was $10.50 per acre. Some of it is not worth that much now, and those people went out and secured it by competitive bids, and they also exhausted their homestead rights, and what I say is that it having served its purpose in keeping down speculation, they ought to have a chance to try again. I urge the gentleman from Minnesota not to offer his amendment, and thereby complicate the chances of my people.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That any person who has heretofore made homestead entry of lands embraced in a ceded Indian reservation, and who, in completion of the entry, has paid paid or shall have paid the purchase price provided in the law opening the lands to settlement, shall be entitled to the benefits of the homestead laws just as though such prior entry had not been made, if otherwise qualified: *Provided*, That the right of commutation of entries under this act shall not be permitted.

With a committee amendment, as follows:

After the enacting clause strike out all the matter just read and insert in lieu thereof the following: "That from and after the passage of this act any person who has heretofore entered under the homestead laws, pursuant to purchase by competitive bid for a price equivalent to or greater than $5 per acre, lands embraced in a ceded Indian reservation shall, upon proof of such fact, if otherwise qualified, be entitled to the benefits of the homestead law as though such former entry had not been made: *Provided*, That the provisions of this act shall not apply to any person who has failed to pay the full price for his former entry or whose former entry was canceled for fraud."

Mr. FERRIS. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER pro tempore. The gentleman from Oklahoma [Mr. FERRIS] asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. FERRIS, a motion to reconsider the vote whereby the bill was passed was laid on the table.

PREPAREDNESS PARADE IN WASHINGTON.

Mr. CARLIN. Mr. Speaker, I ask unanimous consent to discharge the Committee on the District of Columbia from the consideration of Senate joint resolution 137, and that it be considered in the House and passed. It will take only a minute. It gives the right directions for the preparedness parade in the District of Columbia.

Mr. HAMLIN. Reserving the right to object, Mr. Speaker, I would like to ask the gentleman from Virginia if his resolution is on the Unanimous Consent Calendar?

Mr. CARLIN. No. It has gone to the Committee on the District of Columbia, unless it is on the Speaker's desk.

Mr. MANN. I ask for the regular order, Mr. Speaker. I do not know what the request is.

Mr. BAILEY. I object, anyhow.

The SPEAKER pro tempore. Objection is heard. The Clerk will report the next bill.

LEO N. LEVI MEMORIAL HOSPITAL ASSOCIATION.

The next business on the Calendar for Unanimous Consent was the bill (S. 1388) to authorize the Secretary of the Interior to furnish hot water from the hot springs on the Hot Springs Reservation for drinking and bathing purposes free of cost to the Leo N. Levi Memorial Hospital Association.

The SPEAKER pro tempore. Is there objection?

Mr. MANN. Reserving the right to object, let us have the bill reported.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized to supply a sufficient quantity of hot water from the hot springs on the Hot Springs Reservation for drinking and bathing purposes to the Leo N. Levi Memorial Hospital Association without cost or charge therefor, under such rules and regulations as he may prescribe.

With committee amendments, as follows:

On page 1, lines 4 and 5, after the word "water," on page 4, insert the words "for five tubs."

On page 1, after line 8, insert the following:

"*Provided*, That said hospital association shall, upon request of the superintendent of the Hot Springs Reservation or his duly authorized representative, immediately after being notified, send an ambulance or conveyance for and accept and treat without charge therefor any emergency patients so sent to the hospital for treatment."

Mr. TAYLOR of Arkansas. Mr. Speaker, the Secretary of the Interior has suggested to the Committee on Public Lands the amendments now in the bill.

This bill authorizes the Jewish Hospital at Hot Springs, Ark., to use the hot water of the Hot Springs for five tubs. Heretofore they have been paying the Government for all the hot water they have used. Their patients are largely charity patients. They are not confined to any religion. If I, a Christian, were

to fall on the street, and they should take care of me, they would do it just exactly as if I were a Jew. This hot water, more than can be used from the springs, flows to the sea. It does not cost the Government a cent to give this water to this highly charitable hospital. I hope the bill will be passed as reported.

Mr. SHERLEY. Mr. Speaker, are most of these hospitals under the control of the Federal Government?

Mr. TAYLOR of Arkansas. This is not.

Mr. SHERLEY. That is just what I am coming to—whether the gentleman does not think this hospital should be subject to some supervision by the Government?

Mr. TAYLOR of Arkansas. It is to some extent.

Mr. SHERLEY. That is what I was asking. The gentleman said it was not.

Mr. TAYLOR of Arkansas. It is not controlled by any doctor in the city of Hot Springs. Of course, they have physicians there who look after the sick and helpless patients.

Mr. SHERLEY. I understand; but is it subject to any regulation by the Federal Government?

Mr. TAYLOR of Arkansas. This bill itself shows that it is under the regulation of the Federal Government, but not entirely.

Mr. SHERLEY. No; the bill provides that the water shall be furnished under certain regulations, but there is nothing to show that there is any control over it by the Government. In times past there have been very great abuses down there in the Hot Springs Reservation and there has been a great deal of trouble at different times in regulating it. While I am strongly in sympathy with the object of the bill, I wanted to inquire of the gentleman whether it was not desirable to give the Government some control over the hospital, inasmuch as the Government is furnishing the water?

Mr. TAYLOR of Arkansas. It is, so to speak, under the control of the Government. It may be on the reservation, and they are using the water from the reservation.

Mr. SHERLEY. I understand that perfectly well. I am somewhat familiar with the situation at Hot Springs. I want to know whether the hospital is going to be under the control of the Government at all.

Mr. TAYLOR of Arkansas. I can not say. It is a chartered institution. I do not know whether the Government has any immediate control over this charitable institution.

Mr. SHERLEY. In point of fact, I am hoping that the gentleman, or some one else primarily interested, will do for the Hot Springs Reservation what ought to have been done long ago, and that is to take it out of the jurisdiction of the Department of the Interior and put it under the direct control of the Public Health Service. It is not a park in any true sense of the word.

Mr. TAYLOR of Arkansas. It is one of the public parks of the Government, as much so as any the Government has.

Mr. SHERLEY. I know it is; but I have just stated that it ought not to be under the control of the Interior Department as a public park. It really ought to be under the control of the Public Health Service, because it is not a park; it is a sanitarium.

Mr. TAYLOR of Arkansas. I do not know what it takes to constitute a park. There are 1,100 acres in it. No park or health resort like it anywhere.

Mr. SHERLEY. Oh, yes; but the primary purpose of keeping it is to afford the people of America the benefit of its water. What I hope to see done is to have it developed, as it never has been properly developed, by people who are familiar with the real purpose to be served, and that is as a health resort and not a park. I suggest that to the gentleman, because I believe that the Government would feel very much better disposed toward the reservation if it was under the control of the Public Health Service.

Mr. TAYLOR of Arkansas. All I can say about that is that it is the greatest health resort of the world, and I hope that the Government will take some proper steps to give suffering humanity the greatest benefit.

Mr. SHERLEY. So do I. That is what I want; and because that has not always been done, and because the management in the past sometimes has been the subject of righteous criticism and indignation I make this remark.

Mr. TAYLOR of Arkansas. There is one wonderful fact about this park, which I think the gentleman knows as well as I do—that it is the only park in the United States that is self-sustaining.

Mr. SHERLEY. It would not long remain so if we should comply with all the requests that are made upon us to take care of matters there.

Mr. TAYLOR of Arkansas. I will try to change the gentleman's opinion about that later on.

Mr. MANN. Will the gentleman yield for a question?

Mr. TAYLOR of Arkansas. With pleasure.

Mr. MANN. There are a number of these hospitals there. I do not know whether the term "charitable" is correct or not; but these hospitals are maintained by various organizations. Do they all enjoy the privilege of getting water free?

Mr. TAYLOR of Arkansas. No; they do not. That is, all the hospitals that have asked for it do not now get it. Of course the Army and Navy Hospital located there gets its water free; but I do not know of any other hospital, except this Jewish hospital, that is being maintained in this way.

Mr. MANN. Oh, I think there are several hospitals there of a similar kind, maintained by different orders.

Mr. TAYLOR of Arkansas. This amendment, proposed by the Secretary of the Interior and offered by the committee, was to avoid setting a precedent to give the water free to all of the hospitals.

Mr. MANN. Well, but I do not see how it does set any such precedent.

Mr. TAYLOR of Arkansas. Suppose there are 100 tubs in the Catholic hospital. Congress will give them, I hope, if they ask for it, water for five tubs free, for the absolute poor that they have to take care of.

Mr. MANN. In this bill they asked for unlimited water, and the committee proposed an amendment limiting it to five tubs. Of course, the number of tubs to be furnished free should be in proportion to the size of the hospital. I suppose that possibly all the tubs they have in this hospital are five. In other words, I do not quite see how we can make a distinction between one hospital which takes patients without charge and another hospital which does the same thing.

Mr. TAYLOR of Arkansas. Here is the charge in this bill:

Provided, That said hospital association shall, upon request of the superintendent of the Hot Springs Reservation or his duly authorized representative, immediately after being notified, send an ambulance or conveyance for and accept and treat without charge therefor any emergency patients so sent to the hospital for treatment.

Mr. MANN. Oh, well, that is moonshine. It does not amount to anything. There is no penalty if they do not do it, and they will not do it if the hospital happens to be full, and they ought not to be asked to do it if they have other patients to fill the hospital. They would not do it ordinarily. The same provision could be made as to any hospital; but whatever practice we adopt ought to be uniform. If we are going to furnish free tubs to all of the hospitals that are in a way charity hospitals, that is very well; but I do not see how you can make a distinction between one and another. We have given to a number of these hospitals the land upon which they are located. We have given them the land. Now, I do not say we ought not to give them the water, but I say that we ought not to do it in one case and refuse to do it in another case of the same kind. I should like to know what the facts are.

Mr. TAYLOR of Arkansas. While these wonderful waters are now going to waste, flowing away to the sea, as I see it every day when I am at Hot Springs—it is in my district, but I do not live there—I do not see why poor, suffering, afflicted humanity should not have the benefit of it.

Mr. MANN. This hospital expects to charge patients for the use of this water, yet it wants to get the water for nothing.

Mr. TAYLOR of Arkansas. If you are able to pay, of course, you have to pay, for they must maintain their institution; but if you are a poor person, then you can get it without charge.

Mr. MANN. That may be. I do not know how many, or what the proportion is.

Mr. TAYLOR of Arkansas. I state this to the gentleman from Illinois: Frequently a poor fellow struggling along the street on his crutches falls upon the street, and there he lies unless some friendly policeman or kind somebody takes him away. In this bill provision is made for this vehicle belonging to this charity hospital, that it shall get the man and take him to that institution. There is quite a cost to maintain a vehicle and a horse to haul these people to the hospital.

Mr. MANN. The gentleman does not seriously think that they are going to do that.

Mr. TAYLOR of Arkansas. Oh, yes, they will. I know it.

Mr. SHERLEY. Who made the suggestion that they should do that?

Mr. TAYLOR of Arkansas. The superintendent of the reservation, Dr. Park.

Mr. SHERLEY. Did it come from the city because they did not want the expense?

Mr. TAYLOR of Arkansas. The city had nothing to do with it.

Mr. SHERLEY. The city has not control, but it has a good deal to do with suggestions, as I have found out.

Mr. TAYLOR of Arkansas. Dr. Park was called on by the Secretary of the Interior to know what he thought about the bill, and in reply he said that in his judgment this charitable institution ought to be willing to furnish that vehicle in compensation for the free hot medical water. I myself do not think that it ought to be required.

Mr. SHERLEY. I do not, but I am struck by the peculiar character of the service required and wondered whether it was to relieve the municipality.

Mr. TAYLOR of Arkansas. Not at all, I do not see how it could have that effect.

Mr. SHERLEY. If you relieve people within the city that it has to take care of, it relieves the municipality. I know that the claim is made that they bear great burdens as the result of this reservation, and that they ought to get great benefit from it.

Mr. TAYLOR of Arkansas. The poor from all over the United States come there for relief, and become a charitable charge on the good people of Hot Springs. Such people are there by thousands, and these charitable people take care of them; they are interested to that extent only. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER pro tempore (Mr. ADAIR). The gentleman from Arkansas asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The committee amendments were agreed to.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. TAYLOR of Arkansas, a motion to reconsider the vote whereby the bill was passed was laid on the table.

RECLAMATION OF ARID LANDS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 12365) to promote the reclamation of arid lands.

The SPEAKER pro tempore. Is there objection to the consideration of this bill?

Mr. MANN. Mr. Speaker, I ask to have that bill go over.

LAND FOR PUBLIC PARK IN OREGON.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 10305) to grant certain lands in the State of Oregon for a public park for the benefit and enjoyment of the people.

The SPEAKER pro tempore. Is there objection?

Mr. MANN. Reserving the right to object, I see that this purports to give certain lands to the State of Oregon as a public park, the land being situated in the State of Oregon "within boundaries particularly described." What are the boundaries particularly described.

Mr. HAWLEY. They are described by subdivisions of the rectangular division of the public survey.

Mr. MANN. That is not boundaries; that is the description of the property.

Mr. HAWLEY. I think the gentleman is right about that. I did not prepare the language of the bill.

Mr. MANN. Who did?

Mr. HAWLEY. I would not dare to say.

The SPEAKER pro tempore. Is there objection to the consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That all those certain tracts, pieces, or parcels of land lying and being situate in the State of Oregon and within the boundaries particularly described as follows, to wit: The south half and the northeast quarter of section 7, and the west half and the southeast quarter of section 8, and the southwest quarter of section 9, in township 5 north, range 8 west of the Willamette meridian; and the southwest quarter of section 27, and the southeast quarter of and west half section 28, and the north half of section 33, and the northwest quarter of section 34, and the northeast quarter and the southeast quarter of section 29, in township 6 north, range 8 west of the Willamette meridian, are hereby granted to the State of Oregon as a public park or pleasuring ground for the benefit and enjoyment of the people: *Provided*, That the patent to be issued for said lands shall contain the provision that the land shall revert to the United States whenever it shall not be used for the purposes mentioned in this act: *Provided further*, That the Government of the United States of America reserves the right to operate and maintain any telegraph or telephone line over and upon said land which is in operation at the passage of this act, or which it may see fit to establish thereafter.

The following committee amendments were read:

On page 1, line 11, strike out the word "of" and insert the word "of" between the words "half" and "section."

On page 2 add a new section:

"SEC. 2. That there shall be excepted from the grant hereby made any lands which at the date of the approval of this act shall be covered by a valid, existing bona fide right or claim initiated under the laws of the United States: *Provided*, That this exception shall not continue to apply to any particular tract of land unless the claimant continues to comply with the law under which the claim or right was initiated."

Mr. HAWLEY. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The committee amendments were agreed to.

Mr. MANN. Mr. Speaker, I move to amend, on page 1, lines 4 and 5, by striking out the words "and within the boundaries particularly."

The SPEAKER pro tempore. The Clerk will report the amendment.

The Clerk read as follows:

Page 1, lines 4 and 5, strike out the words "and within the boundaries particularly."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. HAWLEY, a motion to reconsider the vote whereby the bill was passed was laid on the table.

WATER SUPPLY OF BLACKHAWK, COLO.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11472) to reserve certain lands and make them a part of the Pike National Forest.

The SPEAKER. Is there objection to the consideration of this bill?

Mr. MANN. Reserving the right to object, I think the gentleman from Colorado ought to make a little explanation.

Mr. KEATING. I would be glad to do so.

Mr. SHERLEY. Let us have the bill read first.

The Clerk read the bill, as follows:

Be it enacted, etc., That all lands in the State of Colorado described as follows, to wit: Section 19 and section 30 in township 2 south, range 72 west, sixth principal base and meridian, be, and the same are hereby, reserved, subject to all prior valid adverse rights, and made a part of and included in the Pike National Forest.

Mr. KEATING. Mr. Speaker, the object of this bill is to safeguard the water supply of Blackhawk, Colo., an old-time mining camp. The Forestry Service for some years has been cooperating with the mountain towns of the West for the purpose of safeguarding their water supply. In some instances we find that a part of the watershed is in the forest reserve and a portion on the public domain. Where conditions will justify it the forest reserve would like to have its jurisdiction extended out over the public domain so as to take in the entire watershed in order that there may not be a divided jurisdiction. That is what we do in this case. It is what we have done in some other cases. I introduced a bill in the last Congress which accomplished the same object for the mining camp of Idaho Springs, Colo., and the Forestry Service and the city authorities of Idaho Springs have entered into an arrangement by which the Forestry Service will police the watershed of Idaho Springs.

In the case under consideration I think that about 800 acres will be added to the Pike National Forest. It will not involve any expense on the part of the Government, but it will result in giving the Forestry Service jurisdiction over the watershed from which the town of Blackhawk draws its water supply.

Mr. MANN. Mr. Speaker, I shall not object to the passage of this bill. A good water supply is necessary to everyone, especially since the State of Colorado will not permit the use of anything stronger. We hear a great many complaints from our distinguished and able Representatives from the West constantly that the Government does not treat them fairly. In the East, if a city wants to conserve and preserve its water supply, it has to do it at its own expense. There are more than a thousand of these cities and villages, and so forth, out in Colorado and the neighboring States that have their water supply taken care of by the General Government at the expense of the General Government. I never have heard any of them give any thanks for it.

Mr. KEATING. Mr. Speaker, on behalf of Idaho Springs and Blackhawk I will now establish a precedent by thanking the National Government for the very excellent service they have given us. [Applause and laughter.]

Mr. TAYLOR of Colorado. Mr. Speaker, I might suggest also that these lands are lands that have been surveyed for 46 years, and they have not been taken up by anyone. If the Government would give them to the cities and the towns, it would make it very much easier. The towns are too poor to buy them, and they would be very glad to take care of them themselves.

Mr. MANN. I notice in some cases that we have done that, or we have let the towns have the land at a very nominal consideration, but most of them want the Government not only to give the land, which may be perfectly proper, but also to take care of it and see that nothing gets on it which damages the water supply, which also may be very proper. I do not undertake to say that it is not, but it is all done at our expense, and, as I suggested before, while we are doing it at our expense, we would appreciate the courtesy of thanks.

Mr. TAYLOR of Colorado. I think we ought to extend thanks to the Government and the Forest Service, but on behalf of these cities I will say that this land is vacant, that it is of no value for mineral or other purposes, and if the Government would convey it to them the cities would relieve the Government from any expense and gladly take care of it themselves. Inasmuch as we can not get this land without paying a dollar and a quarter an acre for it, and the towns have not the money to do that, the next best thing and the only thing that they can do is to put it in the Forest Service.

Mr. KEATING. Mr. Speaker, I do not entirely agree with my colleague. I think the best way to handle this problem of policing the watersheds is for the municipalities to cooperate with the Forest Service. This is being done at a number of points in my district to the complete satisfaction of the municipalities and the Forest Service. I hope Congress will assist the good work by passing the pending bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The SPEAKER pro tempore. This bill is on the Union Calendar.

Mr. KEATING. Mr. Speaker, I ask unanimous consent that it be considered in the House as in Committee of the Whole.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. KEATING, a motion to reconsider the vote by which the bill was passed was laid on the table.

UNITED STATES COURT AT JAMESTOWN, N. DAK.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11878) to amend section 99 of the act to codify, revise, and amend the laws relating to the judiciary.

The SPEAKER pro tempore. Is there objection?

Mr. NORTON. Mr. Speaker, reserving the right to object, I have some amendments to offer to this bill. It seems that the committee in considering the bill was not acquainted with the rapid growth and development of North Dakota and has left out several counties in the arrangement of the different judicial districts. If there is no objection to including these counties I shall have no objection to the bill.

The SPEAKER pro tempore. Is there objection?

Mr. SHERLEY. Mr. Speaker, we would like to find out what the bill is about.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 99 of the act to codify, revise, and amend the laws relating to the judiciary be amended to read as follows:

"SEC. 99. That the State of North Dakota shall constitute one judicial district, to be known as the district of North Dakota. The territory embraced on the 1st day of July, 1910, in the counties of Burleigh, Logan, McIntosh, Emmons, Kidder, McLean, Adams, Bowman, Dunn, Hettinger, Morton, Stark, and McKenzie shall constitute the southwestern division of said district; and the territory embraced on the date last mentioned in the counties of Cass, Richland, Barnes, Sargent, Ransom, and Steele shall constitute the southeastern division; and the territory embraced on the date last mentioned in the counties of Grand Forks, Traill, Walsh, Pembina, Cavalier, and Nelson shall constitute the northeastern; and the territory embraced on the date last mentioned in the counties of Ramsey, Benson, Towner, Rolette, Bottineau, Pierce, and McHenry shall constitute the northeastern division; and the territory embraced on the date last mentioned in the counties of Ward, Williams, Mountrail, Burke, and Renville shall constitute the western division; and the territory embraced on the date last mentioned in the counties of Griggs, Foster, Eddy, Wells, Sheridan, Stutsman, Lamoure, and Dickey shall constitute the central division. The several Indian reservations and parts thereof within said State shall constitute a part of the several divisions within which they are respectively situated. Terms of the district court for the southwestern division shall be held at Bismarck on the first Tuesday in March; for the southeastern division, at Fargo on the third Tuesday in May; for the northeastern division, at Grand Forks on the second Tuesday in November; for the northwestern division, at Devils Lake on the first Tuesday in July; for the western division, at Minot on the second Tuesday in October; and for the central division, at Jamestown on the second Tuesday in April. The clerk of the court shall maintain an office in charge of himself or a deputy at each place at which court is held in his district.

With the following committee amendments:

Page 2, line 11, strike out the word "northeastern" and insert the word "northwestern."

Page 3, at the end of the bill, insert the following:

"*Provided*, That the Government of the United States shall incur no expense for rent, light, heat, water, or janitor service for the building in which court shall be held until such time as the Government may erect its own court room."

The SPEAKER pro tempore. Is there objection?

Mr. BORLAND. Mr. Speaker, reserving the right to object, is this creating some new divisions in North Dakota?

Mr. NORTON. This is creating a new district at Jamestown, N. Dak.; but, as I observed, I have noticed that the committee having in charge the bill has overlooked the fact that at the date given in the bill there were several counties in the State not included in the bill, and I purpose to offer an amendment to perfect the bill. This is not my bill. It is a bill introduced by my colleague, Mr. YOUNG.

Mr. BORLAND. Do I understand that this creates a new division, with the court to be held at Jamestown?

Mr. NORTON. Yes.

Mr. BORLAND. How large a place is Jamestown?

Mr. NORTON. It is a city of about five or six thousand.

Mr. BORLAND. Is there a public building there?

Mr. NORTON. There is a public building authorized at Jamestown.

Mr. BORLAND. Is it sufficient for this court?

Mr. NORTON. Yes; I think it is.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, do I understand my friend to intend offering an amendment to put it at another place?

Mr. NORTON. No. I have no such intention. I intended to include in certain judicial divisions described in the bill counties in the State that had been omitted from this bill, that are not mentioned in it at all.

Mr. MANN. The gentleman, I am afraid, has not carefully read the bill.

Mr. NORTON. On the contrary, I have read the bill very carefully, and I desire to say to the gentleman from Illinois that I have taken particular notice of the date—July 1, 1910—when the several divisions of the State is said to have been embraced in certain counties which are named. On that date there were several organized counties in the State which are not taken care of in this bill.

Mr. MANN. Of course, there are a number of counties left out of this bill which are in the existing law. Whether it was done designedly or whether the counties have been abolished I do not know. The gentleman from North Dakota would know. The existing law as it now stands provides:

The territory embraced on the 1st day of July, 1910, in the counties of Burleigh, Stutsman—

Stutsman is out of this bill—

Logan, McIntosh, Emmons, Kidder, Wells—

Out of this bill—

McLean—

Out of this bill—

Adams—

And a number of others. Have these counties been abolished?

Mr. NORTON. It appears from the gentleman's statement that he has not very carefully read the bill.

Mr. MANN. I have read the bill and the law, and I am telling exactly what occurs in both.

Mr. NORTON. Is the gentleman reading from the existing law?

Mr. MANN. I have read from the bill. I have the bill in my hand.

Mr. NORTON. If the gentleman will read line 16, page 2, he will find the counties of Eddy, Wells, Sheridan, and Stutsman.

Mr. MANN. In the central division.

Mr. NORTON. Incorporated in this bill.

Mr. MANN. The gentleman is correct.

Mr. NORTON. Now, I have reference particularly to the counties of Oliver and Mercer, which should be incorporated in the first division—not mentioned in this bill, but they were organized prior to July 1, 1910.

Mr. MANN. Where have they been all the time since then?

Mr. NORTON. The territory included in these counties has not been changed since a date long prior to July 1, 1910.

Mr. MANN. Have they been in a judicial district?

Mr. NORTON. I do not have at hand a copy of the existing law.

Mr. MANN. Well, I have both in my hand. What counties?

Mr. NORTON. Oliver and Mercer.

Mr. MANN. There are no such counties in the law.

Mr. NORTON. Clearly, then, they have been off the United States judicial map, and the omissions in this bill would result in continuing this gross error.

Mr. MANN. I guess they were not on the map at that time. The bill, I think, should go over until we find out.

Mr. YOUNG of North Dakota. If Congress has heretofore overlooked these counties there will be no objection to having them included, because it is very clear they were intended to be included in the district that centers at Bismarck.

Mr. MANN. I think it would be worth while to know, just for curiosity's sake, whether two counties in that great State have been left out, and they have not found it out in less than six years. That is a tribute to the counties, and I am willing to pay a tribute if they have had no litigation to cause them to find out that they were not in any judicial district in the United States, but it is well enough to be certain about it.

Mr. NORTON. If the gentleman has a copy of the existing law and they are not included in that, why, they simply have been left out.

Mr. MANN. I have a copy of this bill with the existing law compared with it.

Mr. TAYLOR of Colorado. Will the gentleman yield for a question?

Mr. YOUNG of North Dakota. I do not understand that the gentleman from North Dakota [Mr. NORTON] is objecting to the consideration of the bill at this time, but he simply wants to have those two counties named.

Mr. MANN. I think we ought to know.

Mr. YOUNG of North Dakota. But the gentleman from Illinois surely has no question as to the location of these two counties?

Mr. MANN. I do think this. I have the utmost of faith in the gentleman from North Dakota, but it is impossible, on the other hand, for me to believe without absolute proof of some kind that we have passed a law which had been in the statute books for six years which did not cover certain counties in a judicial district and nobody had discovered it. My friend from North Dakota has not discovered it, because he did not put it in his bill.

Mr. YOUNG of North Dakota. The counties were not located within the area in which we sought to create the district.

Mr. MANN. I do not think it will hurt to go over a couple of weeks and find out about it.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, I ask that the bill go over.

The SPEAKER. The gentleman objects, and the bill goes over.

TO SIMPLIFY APPEALS AND WRITS OF ERROR AND COSTS THEREOF.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 10312) relating to appeals and writs of error and costs thereof.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, this is a bill I am very anxious to have passed, but the gentleman from Kentucky [Mr. SHERLEY] wanted to be here. Might it go over for five minutes or so?

Mr. CARAWAY. I have no objection. He went out to get a copy of the bill and report a minute ago.

The SPEAKER. The gentleman from Illinois asks to pass this bill temporarily without prejudice. Is there objection? [After a pause.] The Chair hears none.

SECTION 20, ACT TO REGULATE COMMERCE.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 563) to amend section 20 of an act to regulate commerce, to prevent overissues of securities by carriers, and for other purposes.

The Clerk read the title of the bill.

Mr. MANN. There are some gentlemen absent who wish to be heard on this bill and I ask that it go over.

The SPEAKER. The gentleman from Illinois asks unanimous consent that the bill be passed without prejudice and to keep its place on the calendar. Is there objection? [After a pause.] The Chair hears none.

RED RIVER, OKLA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 7613) to authorize the Terral Bridge Co. to construct a bridge across the Red River near Terral, Jefferson County, Okla.

The SPEAKER. Is there objection to the consideration of the bill?

There was no objection.

The bill was read, as follows:

Be it enacted, etc., That the Terral Bridge Co., a corporation organized and existing under the laws of the State of Oklahoma, is hereby authorized to construct, maintain, and operate a bridge and approaches thereto across the Red River at a point suitable to the interests of navigation at or near Terral, Okla., in the county of Jefferson, in the State of Oklahoma, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The following committee amendment was read:

Page 1, line 4, at the end of the line, strike out the word "is" and insert, at the beginning of line 5, the words "its successors and assigns be and are."

Mr. STEPHENS of Texas. Mr. Speaker, I desire to ask the gentleman in charge of the bill whether this is designed as a toll bridge?

Mr. FERRIS. I do not think so. The farmers on both sides have raised the money by subscription and are going to build the bridge for their own benefit. It is in my own district.

Mr. STEPHENS of Texas. If it crosses the Red River, one end of it is in Clay County, in my district. That is the reason of my inquiry.

Mr. FERRIS. I have a letter here from Dr. Ewing, who lives at Ewing, and he explains it is a farmers' proposition, so that they can haul their grain across the river there. Terral is a small town on the edge of the river.

Mr. STEPHENS of Texas. In what direction from Terral will this be built?

Mr. FERRIS. South.

Mr. STEPHENS of Texas. Then it is near the crossing of the Rock Island into Texas?

Mr. FERRIS. It must be very near.

Mr. STEPHENS of Texas. I have no objection.

Mr. ADAMSON. I will say to the gentleman from Texas [Mr. STEPHENS] that in the event tolls were ever considered, it is under the jurisdiction of the Secretary of War as to what they shall be, if any.

Mr. STEPHENS of Texas. I understood from the reading that it is a corporation that is building the bridge, and I did not know the kind of a corporation.

Mr. ADAMSON. I should think that they would be willing to pay tolls in order to get into communication with such a good district.

Mr. STEPHENS of Texas. They are both good districts.

The SPEAKER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read a third time, and passed.

On motion of Mr. ADAMSON, a motion to reconsider the vote by which the bill was passed was laid on the table.

APPEALS AND WRITS OF ERROR.

Mr. CARAWAY. Mr. Speaker, I ask unanimous consent to return to the bill H. R. 10312.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 10312) relating to appeals and writs of error and costs thereof.

Be it enacted, etc., That two or more defendants severally adjudged guilty upon the same trial in any district court of the United States of any criminal offense or offenses charged against them in the same indictment or information, or in the same indictments or informations, may be joined as plaintiffs in error in the same writ of error issued to review the several judgments entered against them adjudging them guilty of and sentencing them for said offense or offenses, and said two or more defendants may unite in the same joint and several assignment of errors intended to be urged in the prosecution of such writ of error, and the court from which such writ of error is sued out shall hear and determine such writ of error on behalf of all and each of the plaintiffs in error named therein as if such joint and several assignment of errors were the separate and distinct assignment of errors of each of such plaintiff in error.

SEC. 2. That the bill of exceptions or certificate of evidence in any civil or criminal case, instead of a copy thereof, may be incorporated into the transcript of record for use in the Supreme Court or the court of appeals by stipulation of counsel for the respective parties or by order of the Supreme Court or of the court of appeals or of the judge or justice signing the citation; and that said bill of exceptions or certificate of evidence shall be returned to the district court after it has served its purpose in the Supreme Court or the court of appeals, or in both the Supreme Court and the court of appeals.

SEC. 3. That whenever any party to any suit or proceeding in any United States court desires to take an appeal or prosecute a writ of error from any judgment or decree of such court rendered in such suit or proceeding to the Supreme Court or a court of appeals, and shall present to the clerk of such United States court where such judgment or decree was rendered a fair copy of the bill of exceptions or certificate of evidence or other papers not of record in such case necessary to be transcribed, the clerk shall, in making up the transcript of the record for such appeal or writ of error, be allowed 3 cents for each 100 words for comparing such copies with the originals or with the record thereof

and for correcting any errors in the same, and shall incorporate into such transcript of the record of such appeal or writ of error, such fair copy of the certificate of evidence or the bill of exceptions or other papers not of record in such case.

The SPEAKER. Is there objection?

Mr. SHERLEY. Mr. Speaker, reserving the right to object, I just wanted to interrogate the gentleman in charge of the bill about a matter or two. I thoroughly agree with the wisdom of the first section of the bill. The second section undertakes to change the rules touching bills of exceptions. If I understand it, the effect of it would be simply to permit the original bill to be used in the appellate court instead of the copy.

Mr. CARAWAY. That is true.

Mr. SHERLEY. Would it in any way change the rule touching the printing of the transcript?

Mr. CARAWAY. No, sir; it does not. I just examined that matter a minute ago. By consent, the parties in civil matters may have in just one bill of exceptions all their errors incorporated.

Mr. SHERLEY. Does the gentleman quite catch what I mean? I understand that the effect of the bill is to permit the original bill to go up in place of a copy of it; but in addition to that the rules, as I recall them, require the printing of a number of copies of the record. Would this in any way change that rule?

Mr. CARAWAY. No, sir; it would not. It does not change that rule.

I would like to say that I am relying rather strongly on the brief furnished by Mr. Forrest, and on page 3, under the subdivision 2, I think it is rather clearly set out that it does seek to change the rule with reference to the printing of the copy.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill relating to appeals and writs of error and costs thereof."

On motion of Mr. CARAWAY, a motion to reconsider the vote by which the bill was passed was laid on the table.

EXTENSION OF ROCKY MOUNTAIN NATIONAL PARK.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 10124) to add to the Rocky Mountain National Park, Colo., certain lands.

The SPEAKER. Is there objection to the consideration of the bill?

Mr. SHERLEY. Reserving the right to object, can we have an explanation of the bill?

Mr. TIMBERLAKE. Mr. Speaker, this is a bill to add some small areas to the boundaries of the present Rocky Mountain National Park, as authorized in the Sixty-third Congress. In the arrangement of the boundaries in that bill there were certain special scenic features that were omitted. It was the opinion of the Interior and Agricultural Departments, as expressed, that these features should be included in the Rocky Mountain National Park. Accordingly a bill was drawn in conjunction with these departments to embody those features. That is the purpose of this bill. The features sought to be added to the park are very peculiar scenic features and very desirable to have added. They do not contain valuable timber. In fact, there is nothing included within the provisions of this bill that is sought to be added to the Colorado Rocky Mountain Park except pure scenery.

Mr. SHERLEY. Except the subsequent expense of the Government to build roads, trails, and so forth, to see the scenery.

Mr. MANN. In the limitation there is some suggestion of that.

Mr. SHERLEY. Yes; I wrote it.

Mr. TIMBERLAKE. Of course, we are willing to abide by it.

Mr. SHERLEY. Mr. Speaker, if the gentleman will permit, I was out in Denver last year, and you can take a pair of field glasses and see pretty much over the entire area of this park. It is a very beautiful piece of ground, and it makes a most delightful suburban park for Denver. Just why Denver should not keep it up I have never quite seen. It is close now with an automobile. It is only two hours' ride, and it is really quite an attraction for Denver. We would be very glad to have a similar one for Louisville and would be glad to maintain it at the expense of the municipality. I was wondering what additional outlay they would expect the Government to make.

Mr. MANN. I know it is very popular from Chicago. I do not know about Denver.

Mr. TIMBERLAKE. Well, it is popular with Denver, and it seems to me it is equally so for the whole country.

Mr. SHERLEY. I quite agree as to the value of national parks; but I take occasion to emphasize something that needs to be emphasized, to the constant, unreasoning propaganda that is going on over the country touching national parks.

Now, here is a park the primary advantage of which is for Denver. It is worth many thousands of dollars to Denver, but Denver does not seem to be disposed to do anything except to have Uncle Sam improve it; so that I think it is wise to emphasize that each time, so that we can understand where the influence comes and where all the articles in the magazines come from touching the development of public parks.

Mr. TIMBERLAKE. I do not represent the city of Denver. I have the honor to represent the second congressional district of Colorado, and I want to say that the Rocky Mountain National Park is considered by the people of the second district, outside of the people of Denver, as a very great asset to that portion of the country and to the United States as well.

Mr. SHERLEY. Of course it is an asset.

Mr. TAYLOR of Colorado. Mr. Chairman, will my colleague yield?

Mr. TIMBERLAKE. Certainly.

Mr. TAYLOR of Colorado. I would like to suggest to the gentleman from Kentucky [Mr. SHERLEY] that the city of Denver has expended something like $500,000 in building roads not only to this park but to the city parks and various mountain resorts around there. That is of benefit to the whole public.

Mr. SHERLEY. Oh, that is not unusual. My city has expended more than that in the development of its park system.

Mr. TAYLOR of Colorado. The State of Colorado is not parsimonious. The city of Denver has spent half a million dollars in the improvement of the roads.

Mr. SHERLEY. That is like many other beautiful pieces of mountain scenery in the West. Now, the particular reason why it was made into a national park was because Denver wanted it.

Mr. TAYLOR of Colorado. It is accessible to the railroads. It is the most accessible national park in the world.

Mr. TIMBERLAKE. I want to say to the gentleman from Kentucky that the people of Denver and of Colorado will not be found wanting in supplying the needed funds for the building of proper roads in that locality if the Government does not do it.

Mr. SHERLEY. How would the gentleman like us to give it to the State of Colorado, following the suggestion of the gentleman from Colorado, that he would be glad to have various and sundry of these lands presented to the State? How would the gentleman like us to give the park to the State?

Mr. TIMBERLAKE. I think the State of Colorado would regard it as a very valuable gift, coming from the United States Government, and would accept it with pleasure.

Mr. FERRIS. As a matter of caution, I suggest to the gentleman from Colorado that he had better not go on record with the Committee on Appropriations on that subject.

Mr. TIMBERLAKE. That was merely a personal opinion of mine.

Mr. TAYLOR of Colorado. I will say, Mr. Speaker, that when the boundaries of this park were originally created, when I had the distinction of passing the bill and being considerably cross-examined by the gentleman from Kentucky [Mr. SHERLEY], the boundaries, while we thought they were as they ought to be at that time, have been discovered to be somewhat defective in that there are two or three mountain peaks there that ought to be included, in order to round out the park. It is only a comparatively small amount of land that remains to be added, and we think it ought to be in.

Mr. FITZGERALD. This does not take in the city of Denver?

Mr. TAYLOR of Colorado. No; it does not take in the city of Denver. This adds to the scenery, and we hope it will pass.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. This bill is on the Union Calendar.

Mr. TIMBERLAKE. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Colorado asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER. This bill has three or four pages stricken out.

Mr. TIMBERLAKE. Mr. Speaker, I would like to suggest an amendment on account of a misprint.

Mr. FERRIS. I suggest that the gentleman ask unanimous consent to consider the amendment as distinguished from the part stricken out. It will save time.

The SPEAKER. The gentleman asks unanimous consent to have the amendment read in lieu of the part stricken out by the committee. Is there objection?

There was no objection.

Mr. TIMBERLAKE. On page 5, line 21——

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

On page 5, line 6, add:

"That the eastern boundary line of the Rocky Mountain National Park between the section corner common to sections 2 and 3, township 3 north, and sections 34 and 35, township 4 north, range 73 west, and the township corner common to townships 5 and 6 north, ranges 72 and 73 west, is hereby changed so as to read as follows:

"'Beginning at a point on the present eastern boundary line of the Rocky Mountain National Park, Colo., which is the northwest corner of section 2 and the northeast corner of section 3, township 3 north, range 73 west of the sixth principal meridian, Colorado, running thence east along the township line to its intersection with the main hydrographic divide east of Cow Creek, between section 31, township 4 north, and section 6, township 3 north, range 73 west; thence northwesterly following along said hydrographic divide, passing over Twin Sisters, The Crags, passing west of Lily Lake, and continuing along said hydrographic divide, now between Aspen Brook and Fish Creek and passing over Lily Mountain and Gianttrack Mountain to a point which is the southeast corner of section 34 and the southwest corner of section 35, township 5 north, range 73 west; thence north along the section lines between sections 34 and 35, 26 and 27, 22 and 23, 14 and 15, to the quarter corner common to sections 14 and 15, all in township 5 north, range 73 west; thence east along quarter-section line, through sections 14 and 13, township 5 north, range 73 west and along the continuation of said quarter-section line through section 18 to the quarter corner common to sections 18 and 17, township 5 north, range 72 west; thence north along the section line between sections 18 and 17, 7 and 8, 5 and 6, all in township 5 north, range 72 west to that point which is the northeast corner of section 6 and the northwest corner of section 5 in said township and range; thence west along the township line to the township corner common to townships 5 and 6 north, ranges 72 and 73 west, which is on the present eastern boundary line of the Rocky Mountain National Park, Colo.'

"And the lands lying between the present existing eastern boundary and the eastern boundary as changed by this act between said section corner common to sections 2 and 3, township 3 north, and sections 34 and 35, township 4 north, range 73 west, and said township corner common to townships 5 and 6 north, ranges 72 and 73 west, are hereby reserved and withdrawn from settlement, occupancy, or disposal under the laws of the United States, and said tracts are hereby made a part of and included in the Rocky Mountain National Park, and all the provisions of the act to establish the Rocky Mountain National Park in the State of Colorado, and for other purposes, approved January 26, 1915, are hereby made applicable to and extended over the lands hereby added to the park."

With another committee amendment to amend the title so as to read:

A bill to add certain lands to the Rocky Mountain National Park, Colo.

Mr. TIMBERLAKE. Mr. Speaker, I move to amend, on page 5, line 21, by striking out the word "seventy-three" and inserting the word "seventy-two."

The SPEAKER The Clerk will report the amendment offered by the gentleman from Colorado.

The Clerk read as follows:

Amend the committee amendment on page 5, line 21, by striking out the word "seventy-three" and inserting in lieu thereof the word "seventy-two."

The amendment to the amendment was agreed to.

The committee amendment as amended was agreed to.

The bill as amended was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

By unanimous consent, the title was amended so as to read: "A bill to add certain lands to the Rocky Mountain National Park, Colo."

On motion of Mr. TIMBERLAKE, a motion to reconsider the vote by which the bill was passed was laid on the table.

ADJOURNMENT OF THE SENATE FROM JUNE 3 TO JUNE 8.

Mr. FITZGERALD. Mr. Speaker, I ask unanimous consent to consider the following resolution.

The SPEAKER. The gentleman from New York asks unanimous consent to consider a resolution that will be read by the Clerk.

The Clerk read as follows:

House resolution 255.

Resolved, That the House of Representatives consent that the Senate may adjourn from June 3 to June 8, 1916.

The SPEAKER. Is there objection to the present consideration of the resolution?

There was no objection.

Mr. FITZGERALD. Mr. Speaker, my own opinion is that the proper procedure would have been for the Senate to have requested the House to consent that it take this adjournment.

The SPEAKER. There is no question about that.

Mr. FITZGERALD. As they have not done so, however, it seems to me that the House should at least come to the rescue of the Senate and save it from a violation of a plain provision of the Constitution, which it is perhaps too much to expect Members of the Senate would observe. [Laughter.]

Mr. MANN. Mr. Speaker, I think it is proper to say that this action is taken at the request of a number of the Senators of the United States.

Mr. FITZGERALD. An informal request.

Mr. MANN. True, an informal request.

Mr. FITZGERALD. It seems to me that it would have been proper for the Senate to do it formally, and I hope that if the House ever decides to adjourn for more than three days at a time it will keep in mind this provision of the Constitution, and in a proper, courteous, and legitimate manner ask the consent of the other body, in order that it may keep within the limitations of the Constitution.

Mr. MANN. Mr. Speaker, the gentleman from New York ought not to suggest that the Senate should have notified us in order to obtain this consent, because they did not know they were violating the Constitution when they took the action. [Laughter.]

Mr. FITZGERALD. If the gentleman thinks it advisable, a copy of that provision of the Constitution might be transmitted with this resolution. [Laughter.]

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

WESTERN AND EASTERN DISTRICTS, OKLAHOMA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11148) transferring the counties of Osage and Pawnee from the western judicial district of the United States court, in the State of Oklahoma, to the eastern judicial district of said court in said State for judicial purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. THOMPSON. Mr. Speaker, I object.

The SPEAKER. The gentleman from Oklahoma objects, and the bill goes over without prejudice.

ELECTRIC LIGHT AND POWER, OAHU, HAWAII.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 6070) to ratify, approve, and confirm an act duly enacted by the Legislature of the Territory of Hawaii amending the franchise held by the Hawaiian Electric Co. (Ltd.) by extending it to include all of the island of Oahu, Territory of Hawaii.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object——

Mr. HOUSTON. This is a bill passed by the Territorial Legislature of Hawaii.

Mr. MANN. I am under the impression that the Senate passed a similar bill——

Mr. HOUSTON. I was just coming to that. This is a bill to extend the rights of the company to extend its electric light and power service over every part of the island of Oahu, it now being limited to Honolulu. A bill identical with this bill reported by the Committee on the Territories has passed the Senate, and that Senate bill is now on the Speaker's table.

Mr. MANN. It has come over this morning, has it?

Mr. HOUSTON. It has come over this morning, and I ask unanimous consent that the House consider the Senate bill in lieu of the House bill.

Mr. RAKER. Do the people of Hawaii favor this legislation?

Mr. HOUSTON. Oh, yes. The Territorial Legislature of Hawaii has passed this bill. It comes here for ratification by Congress.

Mr. RAKER. In addition to that, is there a general feeling in Hawaii favorable to this bill?

Mr. HOUSTON. My understanding is that the people entirely favor it. There is much local demand for it, and also a demand on the part of the Government of the United States.

Mr. RAKER. There are no monopolistic influences back of it?

Mr. HOUSTON. Not at all. It simply extends to all parts of the island of Oahu the franchise that they already have for Honolulu. This will enable them to extend electric light and power service to Fort Schofield and to Fort Kamehameha, and also to the Government plant at Pearl Harbor, where they have no right to extend it now. It is a very great necessity.

Mr. RAKER. Does the company give reasonable rates?

Mr. HOUSTON. The rates are under the control of the public-utilities commission and are fixed by that commission. The bill also contains a provision that the public-utilities commission may require the company to extend its service into any other part of the island where there is a demand for it.

Mr. RAKER. In some of the States there has been some question as to the efficiency of their public-service commissions,

that they were not really capable of controlling the rates for these services. Has there been any complaint about that in this case?

Mr. HOUSTON. There has been no complaint of that sort about the Public Utilities Commission of Hawaii.

Mr. RAKER. That commission is absolutely efficient and does control this service, does it? I am in earnest about this.

Mr. HOUSTON. There has never been any complaint whatever in regard to the action of that utilities commission. The people of the island are very much in favor of this legislation, and their legislature have already enacted the law establishing the commission, and it is now in control of all the public-service companies there.

Mr. SISSON. Will the gentleman yield for a question?

Mr. HOUSTON. I yield to the gentleman from Mississippi.

Mr. SISSON. Is the gentleman familiar with the terms of the law as to the power of this commission to regulate rates, to increase or diminish the rates for the sale of electricity for light and power purposes?

Mr. HOUSTON. I can not say that I am familiar with the rates.

Mr. SISSON. I do not mean the identical rights, but power under the bill to raise or lower rates.

Mr. HOUSTON. They have the right to control rates.

Mr. SISSON. The mere passage of a bill of that kind carries with it very little weight, because frequently these things may go through the legislature by certain influences which might not result in protecting the people.

Mr. HOUSTON. I think these things are all safeguarded.

Mr. JOHNSON of Washington. The Public Utilities Commission of Hawaii has the power to increase or lower rates and hold hearings in relation thereto?

Mr. HOUSTON. Yes.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The gentleman from Tennessee asks unanimous consent to consider the Senate bill of identical tenor in place of the House bill. Is there objection?

There was no objection.

The Clerk read the Senate bill, S. 5274, as follows:

Be it enacted, etc., That the act of the Legislature of the Territory of Hawaii entitled "An act amending the franchise held by the Hawaiian Electric Co. (Ltd.) by extending it to include all of the island of Oahu, Territory of Hawaii," is hereby ratified, approved, and confirmed, and section 1 of act 48 of the Laws of 1903 of the Territory of Hawaii, as amended and approved by the act of Congress approved April 21, 1904 (now section 836 of the Revised Laws of Hawaii, 1915), is hereby amended by striking therefrom the following:

"(b) 'Honolulu,' or 'district of Honolulu,' shall refer to, include, and mean all of that portion of the island of Oahu included in the taxation, educational, and judicial district now defined by law as 'Honolulu district,' or the 'district of Honolulu.'"

SEC. 2. That section 2 of act 48 of the Laws of 1903 of said Territory (section 837 of the Revised Laws of Hawaii, 1915), as amended and approved by the act of Congress approved April 21, 1904, is hereby further amended to read as follows:

"Electric power manufacture, sale, etc.: The right is hereby granted to the Hawaiian Electric Co. (Ltd.) as a body corporate under that or such other name as the said company may hereafter adopt, and its successors and assigns, to manufacture, sell, furnish, and supply electric light, electric current, or electric power on the island of Oahu, Territory of Hawaii, for lighting the streets, roads, public or private buildings, or for motive power, or for any other purpose which it or they may deem advisable, and from time to time, for the purposes above mentioned, to construct, maintain, and operate suitable poles, lines, wires, cables, lamps, lamp-posts, conductors, conduits, and such other appliances and appurtenances as may from time to time be necessary for the transmission, distribution, or supply of electricity to the consumers thereof, under, along, upon, and over the streets, sidewalks, roads, squares, bridges, alleys, and lanes in said island of Oahu and to connect the said lines, wires, and conductors with any manufactory, private or public building, lamp, lamp-post, or other structure or object with the place of supply."

SEC. 3. That section 3 of act 48 of the Laws of 1903 of said Territory, as approved by the act of Congress approved April 21, 1904 (now section 838 of the Revised Laws of Hawaii, 1915), is hereby amended so as to read as follows:

"Power houses, etc.: Said company shall also have the right to maintain and operate its present light and power station on the corner of Halekauwila and Alakea Streets, in Honolulu, said island of Oahu, and also to construct, maintain, and operate, at such points as may from time to time be necessary, light and power stations or houses, or such other buildings and structures as may be necessary and proper, and to use machinery therein for the purposes of the company."

SEC. 4. That said act 48 of the Laws of 1903 of said Territory, as amended and approved by the act of Congress approved April 21, 1904, is hereby further amended by adding a new section thereto to be known as section 15A (and to be known as section 850A of the Revised Laws of Hawaii, 1915), and reading as follows:

"This franchise, and the person or corporation holding the same, shall be subject as to reasonableness of rates, prices, and charges, and in all other respects to the provisions of chapter 128 of the Revised Laws of Hawaii, 1915, creating a public utilities commission, and all amendments thereof, for the regulation of the public utilities in said Territory, and all the powers and duties expressly conferred upon or required of the superintendent of public works or the courts by said act creating said franchise are hereby conferred upon and required of said public utilities commission."

SEC. 5. That the public utilities commission of the Territory of Hawaii is hereby granted the power to order the Hawaiian Electric Co. (Ltd.), its successors or assigns, to make extensions of its service lines within the island of Oahu, whenever it shall be made to appear that said extension is a public necessity and that said extension or extensions can be made to earn a reasonable profit on the cost and maintenance of the same: *Provided*, That all orders of the public utilities commission herein provided for shall be subject to review by the courts of said Territory.

SEC. 6. That Congress, or the Legislature of the Territory of Hawaii, with the approval of Congress, may at any time alter, amend, or repeal this act.

The SPEAKER. Is there objection to the consideration of the bill? [After a pause.] The Chair hears none.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. HOUSTON, a motion to reconsider the vote whereby the bill was passed was laid on the table.

The bill H. R. 6070 was laid on the table.

PUBLIC-UTILITY FRANCHISES IN HAWAII.

The next bill on the Calendar for Unanimous Consent was the bill (H. R. 14071) to amend certain public-utility company franchises in the Territory of Hawaii.

The Clerk read the bill, as follows:

Be it enacted, etc., That each and every public-utility company operating within the Territory of Hawaii under any franchise or charter heretofore approved or granted by the Congress of the United States shall, within one month after the expiration of each calendar year, pay to the treasurer of the county in which said company operates such per centum of the gross receipts of said company for the preceding calendar year as its franchise now requires it to pay to the Territory of Hawaii.

SEC. 2. That all acts and parts of acts inconsistent with this enactment are hereby repealed.

Mr. MANN. Will the gentleman yield?

Mr. HOUSTON. Yes.

Mr. MANN. I understand from the report in this case that the purpose of the bill is to have paid to the counties the per centum of the gross receipts which are now paid to the Territory.

Mr. HOUSTON. That is the object of the bill.

Mr. MANN. Let us see whether that is what it does. The bill says "shall pay to the treasurer of the county in which said company operates such per centum of the gross receipts of said company for the preceding calendar year as its franchise now requires it to pay to the Territory of Hawaii."

It does not seem to me that that is what it means, that it shall pay the percentage which it now pays to the Territory and pay the same amount to the counties. "Shall pay such per cent of the gross receipts." That is merely assigning the amount.

Mr. HOUSTON. The object of the bill and a fair construction of the language would seem to be that this per centum that is now required by the franchise to be paid into the Territorial treasury shall be paid into the county treasury.

Mr. MANN. I think a fair construction of it is that 2 per cent—if that is what it is—shall be paid to the county. If the gentleman means that they shall pay "the" per centum, he had better say so. "The per centum" is definite language.

Mr. NORTON. Will the gentleman yield?

Mr. HOUSTON. Yes.

Mr. NORTON. Is it intended by this bill that there shall be paid into each county the per centum on the mileage of the company that is operated in a certain county? If the company operates in two or more counties——

Mr. MANN. It does not, because each island is a county. No island is divided into counties.

Mr. HOUSTON. That is correct; each island is a county.

Mr. MANN. I believe the city of Honolulu—it may be that it is a county—takes in the Midway Islands, 2,000 miles away. I think it is safe to say that no public-utility company operates over in the Midway Islands from Honolulu.

Mr. NORTON. I did not know that; reading the bill, if the company operated in two counties it would look as if it had to pay twice.

Mr. HOUSTON. The county of Honolulu takes in all of the island of Oahu, and that constitutes the county, with the addition of some small islands.

Mr. MANN. My information comes from Mayor Lane, who was mayor of Honolulu. I understand Honolulu takes in a number of little islands not organized by themselves.

Mr. HOUSTON. Adjacent to it.

Mr. MANN. One is 1,500 or 2,000 miles away.

Mr. NORTON. That is not much in that country of magnificent distances.

Mr. MANN. Possibly it will be clear if you change the word "such" to "the." It seems to me the present language means simply the definition of the amount.

Mr. HOUSTON. I am convinced that it was the intention of the Territorial legislature, from the hearings on the bill and information we have from the residents of Hawaii, some of

whom have been before the committee in support of the bill. I think if the bill is subject to the construction the gentleman speaks of it ought to be amended. I was going to say that we have a Senate bill identical with this which has passed the Senate, and I was going to ask unanimous consent to substitute that bill.

Mr. MANN. If the gentleman thinks it is sufficient, I will not raise any question about that part of it. I could not tell from the reading of the bill just what it meant. I would like to ask the gentleman a question. This is for the purpose of ratifying and approving an act of the legislature. In a number of these cases they say they ratify and approve the act of the legislature, but it does not pretend to do that here. What is the distinction in these bills where you purport to ratify the action of the legislature? In the bill just passed you sought to ratify the act of the legislature, and in this you do not make any reference to it.

Mr. HOUSTON. This is not a bill especially to ratify the act of the Territory of Hawaii. This is more general in its purpose. The Territory of Hawaii passed two bills relative to two different franchises, and in each one there was a provision similar to this. The intention of this bill is to ratify those two bills, also to provide that all franchises authorized of a similar character shall be subject to this provision. Since these two bills were passed by the legislature they have passed two other bills of the same purport with the same conditions.

The SPEAKER. Is there objection?

There was no objection.

Mr. HOUSTON. Mr. Speaker, I ask that the bill S. 5776, of identical language, be substituted in lieu of this bill.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that Senate bill 5776 be substituted for this. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the Senate bill.

The Clerk read as follows:

Be it enacted, etc., That each and every public-utility company operating within the Territory of Hawaii under any franchise or charter heretofore approved or granted by the Congress of the United States shall, within one month after the expiration of each calendar year, pay to the treasurer of the county in which said company operates such per centum of the gross receipts of said company for the preceding calendar year as its franchise now requires it to pay to the Territory of Hawaii.

SEC. 2. That all acts and parts of acts inconsistent with this enactment are hereby repealed.

Mr. MANN. Mr. Speaker, this is a Senate bill. I am not going to be captious about it, but I move to strike out the last word for the purpose of calling attention to one thing. I do not know who drew the bill, but evidently some one connected with the Territory of Hawaii. No one connected with Congress drew it. Section 2 provides "that all acts and parts of acts inconsistent with this enactment are hereby repealed." It means the same thing as if they had used the word "act," of course.

Mr. HOUSTON. Where is that?

Mr. MANN. Section 2. I refer to the word "enactment," which is used instead of "act." It means the same thing. It is because such things are formal and that we know the form that we let them pass without scrutiny. They all ought to be in the same form. I withdraw the pro forma amendment.

The SPEAKER. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. HOUSTON, a motion to reconsider the vote by which the bill was passed was laid on the table.

HONOLULU GAS CO.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 3085) to ratify, approve, and confirm an act duly enacted by the Legislature of the Territory of Hawaii amending the franchise held by the Honolulu Gas Co. (Ltd.) by extending it to include all of the island of Oahu, Territory of Hawaii.

The SPEAKER. Is there objection?

There was no objection.

Mr. HOUSTON. Mr. Speaker, this is a bill identical with the one passed with regard to the electric-light franchises, only it applies to gas—the Honolulu Gas Co. (Ltd.). The provisions are the same, and the purport is the same. The demand for this is much more universal throughout the country, because gas is used for cooking purposes, and the measure is more imperative in that respect.

Mr. COX. Mr. Speaker, will the gentleman yield?

Mr. HOUSTON. Yes.

Mr. COX. Does the public-utilities commission in the Territory of Hawaii fix the price of gas to the consumer?

Mr. HOUSTON. They fix the price on the products of all public-service corporations. They have that right now.

Mr. COX. Do they actually fix the price of gas to the consumer?

Mr. HOUSTON. They have the power to fix it.

Mr. COX. Is not that far in advance of the work of the public-utilities commissions in this country generally?

Mr. HOUSTON. There are some provisions in these measures that are progressive.

Mr. COX. I think that must be so. I am heartily in favor of that.

Mr. MANN. One of the provisions of the original law put the power in the hands of what I think they called the superintendent of public works, but since that time they have created a public-utilities commission, and one of the purposes of this bill is to give the public-utilities commission power which, under the orginal act, was authorized by the superintendent of public works.

Mr. HOUSTON. Except I suggest this, that the public utilities commission has powers that the superintendent of public works did not have. They go further and fix the price beyond any authority given him.

Mr. MANN. I understand.

Mr. COX. I am not criticizing the measure, but it looks to me as though they are making much more progress in the Territory of Hawaii than we are in this country with our public-utilities commissions.

Mr. MANN. We are getting public-utilities commissions in almost every State.

Mr. COX. That is true. In the city of Chicago, does the Public Utilities Commission of the State of Illinois fix the price of gas to the people of the city of Chicago?

Mr. MANN. There is a dispute in the city of Chicago as to whether the public-utilities commission has jurisdiction or the city council. I believe the public-utilities commission not only claims jurisdiction, but has jurisdiction under our State law. There is a good deal of opposition to that in Chicago, by the way.

Mr. COX. Then there is some power in the State of Illinois which does fix the price of gas to the consumers in the city of Chicago?

Mr. MANN. Oh, certainly. The city council has the power, subject, of course, to review by the courts, and there is a case pending in the courts there now.

Mr. COX. Has the Public Utilities Commission in the city of Washington power to fix the price of gas to the consumer?

Mr. MANN. Yes.

Mr. COX. Are they doing it?

Mr. MANN. Recently the price of electric light, I think, was reduced through voluntary action on the part of the company, after obtaining an order from the Public Utilities Commission.

Mr. OGLESBY. I will say to the gentleman the Public Utilities Commission of New York has the right to fix the price of gas, electricity, and so forth.

Mr. HOUSTON. I suggest to the gentleman from Indiana this Public Utilities Commission of Hawaii has the right to require companies to extend their lines out where there is a demand for them.

Mr. COX. I am in full sympathy with it, but I was referring to the progress Hawaii was making.

Mr. RAKER. Will the gentleman yield for a question?

Mr. HOUSTON. Yes, sir.

Mr. RAKER. The third section of this bill is intended to cover the act of the Territorial Legislature of Hawaii that has been passed since this bill was introduced, is it not?

Mr. HOUSTON. What is the gentleman's question?

Mr. RAKER. I asked if this third section, which is an amendment to the bill, is intended to comply with the public utilities act that the Territorial Legislature of Hawaii lately passed?

Mr. HOUSTON. Yes, sir; that is an amendment that was put upon this bill by the House.

Mr. RAKER. For that purpose?

Mr. HOUSTON. For that purpose.

Mr. RAKER. Will the gentleman yield for another question?

Mr. HOUSTON. Yes, sir.

Mr. RAKER. This law is desired by the citizens and the people generally of Hawaii?

Mr. HOUSTON. We so understand it.

Mr. RAKER. And there is no monopoly?

Mr. HOUSTON. The representative of the people, the Delegate from Hawaii, favors it and the people who have been before the committee in the hearings favor it.

Mr. RAKER. I am asking it so that it may appear in the RECORD if the people of Hawaii are in favor of this legislation, and that it will not give to the company a monopoly but will give the people a chance to get their material?

Mr. HOUSTON. The committee has reported this bill with just the terms and provisions in it that there are in response to the demands of the representatives of the people of the Territory of Hawaii.

Mr. RAKER. It will at least protect the interests of the people of Hawaii?

Mr. HOUSTON. That is the intention, certainly.

Mr. SISSON. Will the gentleman yield?

Mr. HOUSTON. I will.

Mr. SISSON. These privileges are not exclusive, are they?

Mr. HOUSTON. Not at all.

Mr. SISSON. Anybody else can organize——

Mr. HOUSTON. None are exclusive, and Congress has the power and right to repeal and change any provision afterwards.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. HOUSTON. Mr. Speaker, I ask unanimous consent to consider the Senate bill, which is identical with this, in lieu of the House bill.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that the Senate bill of like tenor be considered in lieu of the House bill. Is there objection? [After a pause.] The Chair hears none.

The Clerk read the Senate bill, as follows:

A bill (S. 5658) to ratify, approve, and confirm an act duly enacted by the Legislature of the Territory of Hawaii amending the franchise held by the Honolulu Gas Co. (Ltd.) by extending it to include all of the island of Oahu, Territory of Hawaii.

Be it enacted, etc., That the act of the Legislature of the Territory of Hawaii entitled "An act amending the franchise held by the Honolulu Gas Co. (Ltd.), by extending it to include all of the island of Oahu, Territory of Hawaii," is hereby ratified, approved, and confirmed, and section 1 of act 30 of the Laws of the Territory of Hawaii, 1903, as amended and approved by an act of Congress April 21, 1904 (section 905 of the revised laws of Hawaii, 1915), is hereby amended to read as follows:

"SECTION 1. Manufacture and supply: W. W. Dimond, of Honolulu, island of Oahu, Territory of Hawaii, his associates, successors, and assigns or such corporation as he or they shall cause to be incorporated under the laws of the Territory of Hawaii (he or they being hereinafter referred to as W. W. Dimond), are hereby authorized and empowered to manufacture and supply gas for use as a fuel, for illuminating purposes, and otherwise, in Honolulu, which, for the purpose of this charter, shall be held to include all of the island of Oahu."

SEC. 2. That said act 30 of the laws of 1903 of said Territory as amended and approved by an act of Congress approved April 21, 1904, is hereby further amended by adding a new section thereto to be known as section 7A (and to be known as section 911A, revised laws of Hawaii, 1915), and reading as follows:

"The franchise and the person or corporation holding the same shall be subject as to reasonableness of rates, prices, and charges, and in all other respects to the provisions of chapter 128 of the revised laws of Hawaii, 1915, creating a public-utilities commission and all amendments thereof for the regulation of the public utilities in said Territory, and all the powers and duties expressly conferred upon or required of the superintendent of public works or the courts of said act creating said franchise, are hereby conferred upon and required of said public-utilities commission and any commission of similar character that may hereafter be created by the laws of said Territory."

SEC. 3. That the public-utilities commission of the Territory of Hawaii is hereby granted the power to order the Honolulu Gas Co. (Ltd.), its successors or assigns, to make extensions of its service lines within the island of Oahu whenever it shall be made to appear that said extension is a public necessity and that said extension or extensions can be made to earn a reasonable profit on the cost and maintenance of the same: *Provided*, That all orders of the public-utilities commission herein provided for shall be subject to review by the courts of said Territory.

SEC. 4. That Congress or the Legislature of the Territory of Hawaii, with the approval of Congress, may at any time alter, amend, or repeal this act.

The SPEAKER. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. HOUSTON, a motion to reconsider the vote by which the bill was passed was laid on the table.

The SPEAKER. The House bill (H. R. 3085) of similar tenor will lie on the table.

STREAMS, SPRINGS, AND WATER HOLES, CALIFORNIA.

The next business on the Calendar for Unanimous Consent was the bill (S. 1351) providing for the discovery, development, and protection of streams, springs, and water holes in the desert and arid public lands of the United States in the State of California, for rendering the same more readily accessible, and for the establishment of and maintenance of signboards and monuments locating the same.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, I ask to have it go over.

The SPEAKER. The gentleman from Illinois objects, and the bill goes over.

Mr. RAKER. Mr. Speaker, I ask unanimous consent that the bill retain its place——

The SPEAKER. It retains its place under the agreement of to-day.

Mr. RAKER. Mr. Speaker, I hoped the gentleman could see his way clear to withdraw his objection.

PUBLIC LANDS FOR CEMETERY AND PARK PURPOSES.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11162) to amend an act entitled "An act to authorize entry of the public lands by incorporated cities and towns for cemetery and park purposes, approved September 30, 1890, and for other purposes."

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, under section 3 of this bill, beginning—

That any county or incorporated city or town shall have the right, under rules and regulations prescribed by the Secretary of the Interior, to select and acquire title to not exceeding 640 acres of nonmineral public land—

And so forth, do they have to pay anything for it?

Mr. TAYLOR of Colorado. Yes, sir; they have to pay $1.25 an acre.

Mr. MANN. Where does it say that?

Mr. TAYLOR of Colorado. In section 2.

Mr. MANN. That relates to another matter. The gentleman would say in section 1, but that relates to another matter.

Mr. TAYLOR of Colorado. Section 1, line 3, page 2:

That any incorporated city or town shall have the right, under rules and regulations prescribed by the Secretary of the Interior, to purchase, at a dollar and a quarter an acre, for cemetery or sewerage purposes.

Then there is the next one, section 2:

That any incorporated city or town shall have the right to select and acquired, under rules and regulations prescribed by the Secretary of the Interior, at a dollar and a quarter an acre, not exceeding 640 acres of nonmineral lands not reserved for public use other than for a forest reserve necessary and useful for the protection of the water supply.

And so forth.

Mr. MANN. Oh, well, it has been some time since the gentleman introduced this bill and he does not remember what is in it. There is no such provision in the bill. Evidently the gentleman intended there should be one or he would not have the supposition now that there had been one.

Mr. TAYLOR of Colorado. Well, the bill——

Mr. MANN. So taking the gentleman's intent as to what he meant, will he offer an amendment to provide that they shall pay a dollar and a quarter an acre for the land?

Mr. TAYLOR of Colorado. Yes; I will accept that amendment, certainly. I may say to the gentleman from Illinois that the gentleman readily knows the bill has been reported out a number of times and this bill as it is written now is an Interior Department bill. It is a bill that is to supersede the present law, because the present law has become entirely obsolete.

Mr. MANN. Oh, well, the present law—there is no such law on the subject as section 3.

Mr. TAYLOR of Colorado. That is true. It is to extend the present law, and it is also to make a general provision whereby a county can get a part of this land as well as a city. There are a number of places where a county wants outing places and where several counties want to get together and have outing places. There is no law on the subject for a county, but there is for incorporated towns, and there are no public lands left any more that are suitable for a park within 3 miles of any town; and this is simply to allow them to go outside of that limit and select a site for a public outing place.

Mr. MANN. I have no objection to that whatever; but the question is whether they should pay $1.25 an acre for the land so as to add to the reclamation fund. I am very solicitous about the amount of money in the reclamation fund.

Mr. TAYLOR of Colorado. Personally, I would rather they would not do it, but I would not object to an amendment of that kind going in.

Mr. MANN. Let us see where it would go in.

Mr. TAYLOR of Colorado. We could put a proviso at the close of section 3, providing that such lands shall be paid for at the rate of $1.25 an acre. That would cover it.

Mr. MANN. You might put it in after the word "title" in line 19, on page 2, or after the word "to" in line 20, "to select and acquire title to, at $1.25 per acre, not exceeding 640 acres." Is the gentleman willing to accept that?

Mr. TAYLOR of Colorado. Yes.

Mr. MANN. All right. I have no objection to the bill.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. This bill is on the Union Calendar.

Mr. TAYLOR of Colorado. Mr. Speaker, I ask unanimous consent that the bill may be considered in the House as in Committee of the Whole.

The SPEAKER. Is there objection?

There was no objection.

The bill was read, as follows:

Be it enacted, etc., That the act of Congress approved September 30, 1890, entitled "An act to authorize entry of the public lands by incorporated cities and towns for cemetery and park purposes" (26 Stat. L., 502), be, and the same is hereby, amended to read as follows:

"That any incorporated city or town shall have the right, under rules and regulations prescribed by the Secretary of the Interior, to purchase, at $1.25 an acre, for cemetery or sewerage purposes, not exceeding one quarter section of nonmineral public lands not reserved for public use other than for a forest reserve, such lands to be located within 5 miles of the city or town applying therefor.

"SEC. 2. That any incorporated city or town shall have the right to select and acquire, under rules and regulations prescribed by the Secretary of the Interior, at $1.25 an acre, not exceeding 640 acres of nonmineral public lands not reserved for public use other than for a forest reserve necessary or useful for the protection of the water supply of said city or town, such lands to be located within 20 miles of the city or town applying therefor.

"SEC. 3. That any county or incorporated city or town shall have the right, under rules and regulations prescribed by the Secretary of the Interior, to select and acquire title to not exceeding 640 acres of nonmineral public lands not reserved for public use other than for a forest reserve for public-park purposes, such lands to be within the exterior limits of the county or within 30 miles of the incorporated city or town applying therefor: *Provided*, That any such selection and grant for public-park purposes shall be upon the express condition that the county, city, or town shall construct and maintain a substantial and permanent wagon and automobile road to the exterior limits of such public park, and in the case of the incorporated city or town such road shall extend from the city or town in question to the exterior limits of the public park.

"SEC. 4. That all patents issued under the provisions of this act shall contain the stipulation and reservation that the lands shall revert to the United States in case the county, city, or town shall fail to comply with the conditions herein expressed, shall fail to occupy or use the lands for the purpose granted, or shall attempt to sell or dispose of the same: *Provided*, That selections under this act for lands within forest reserves shall be subject to approval by the Secretary of the Interior."

Also the following committee amendments were read:

Page 2, in lines 23 and 24, strike out the words "or within 30 miles of the incorporated city or town applying therefor" and insert "applying therefor, and when such application is made by any incorporated city or town, such lands to be within the exterior limits of the county in which it is situated and within 30 miles of such city or town."

Page 3, line 19, amend by striking out the words "the Interior" and insert the word "Agriculture."

The SPEAKER. The question is on agreeing to the committee amendments.

The question was taken, and the amendments were agreed to.

Mr. TAYLOR of Colorado. Mr. Speaker, I suggest to the gentleman from Illinois [Mr. MANN] that the idea of the Interior Department and the Public Lands Committee was that by compelling these towns to build good highways from the cities or towns to the parks that they would expend quite a large amount of money; and also in improving these sites and in building highways and automobile roads through them, when they were some distance from the town, they would thereby be expending as much money as they ought to, and they would have to make that expenditure before the Interior Department would give them a title. I think that Secretary Lane personally did not care anything about the $1.25 an acre; that he wanted the sites improved for outing places for the public; and if the towns were compelled to expend probably ten times the amount of money in improving and beautifying the grounds, the Government could very well afford to relieve them of the expense of paying $1.25 an acre. That was the reason I left out the purchase price. I do not think the towns ought to be compelled to pay the Government $1.25 per acre for worthless land for a park for the use of the public.

Mr. MANN. Well, it is perfectly evident that if you start in on that principle the towns will want enough land on the basis of $1.25 an acre, which they do not expect to pay, to be equivalent to the amount which they pay for the improvement of roads, the roads being constructed for their own benefit, and we would soon be asked to donate the whole public domain. These are nominal, and I think we ought to maintain the nominal amount when we donate the lands to the municipalities. It is the only possible check we have.

I move to amend by inserting, in line 20, page 2, after the word "to," "at $1.25 per acre."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. TAYLOR of Colorado, a motion to reconsider the vote by which the bill was passed was laid on the table.

LEAVE OF ABSENCE FOR HOMESTEAD SETTLERS.

The next business on the Calendar for Unanimous Consent was the bill (S. 1066) authorizing leave of absence to homestead settlers upon unsurveyed lands.

The SPEAKER. Is there objection to the consideration of the bill?

Mr. MANN. Reserving the right to object——

Mr. TAYLOR of Colorado. Will the gentleman permit a suggestion? The gentleman from Illinois will remember that at my request the House some time ago passed this identical bill, and it went over to the Senate. It was my bill. After it reached the Senate our attention was called to the fact that the Senator from Montana had a few days prior passed a similar bill through the Senate, and it had come over here and was lying on the Speaker's table, apparently. We did not know anything about it. So the Senate called our attention to the practice of the two Houses, and that we ought to recede and take up and pass the Senate bill, because it had passed the Senate before our House bill had passed the House. Thereupon we had the bill referred to the Committee on the Public Lands, and the committee authorized me to report out the Senate bill, which I have done in exactly the same language. I desire to now pass this same bill again and send it over to them again.

Mr. MANN. Well, let us see now. I supposed the gentleman carefully examined the Senate bill.

Mr. TAYLOR of Colorado. There is one difference between my bill and the Senate bill, and we have amended this Senate bill to conform to the bill the way we passed it before.

Mr. MANN. There is one here in the Senate bill that does not mean anything. Let us see what the Senate bill says. They are quite different, so far as that is concerned. This is what I want to ask about; I may be wrong, but these things always get me mixed up. I read:

Provided, That he shall have plainly marked on the ground the exterior boundaries of the lands claimed and have filed in the local land office notice of the approximate location of the lands settled upon and claimed of the period of intended absence.

I guess that is right.

Mr. TAYLOR of Colorado. If the gentleman will take the amendment that is in my report, I think he will find it is all right.

Mr. MANN. Has the gentleman got a star print of this bill?

Mr. TAYLOR of Colorado. I am not sure that I know what you call a star print.

Mr. MANN. Has it a star below it? The gentleman reported it with some amendments. They are not printed in the copy of the bill that I have.

Mr. TAYLOR of Colorado. They are not printed in the copy of the bill I have here, either.

Mr. MANN. That is what I am trying to find out about. Let us find out what the bill is before us. Here is a bill reported with a number of amendments, but the copy of the bill in the Clerk's hands has not any amendments in it. Theoretically it may be the fault of the printing clerk, but it is not actually the fault of the printing clerk, because when a bill is reported with committee amendments there will always be a copy of the bill with amendments inserted in the bill for the benefit of the printing clerk.

Mr. TAYLOR of Colorado. The only difference between the Senate bill and the House bill is that the period of absence provided—five months each year—may be taken at two separate times instead of all at one time. Under the present three-year homestead law that we passed a leave of absence of five months is allowed each year. After that we passed a bill allowing a man to take his five months' leave of absence in two periods. He might want to stay away two months at one time and three months at another time. The way the Senate passed this bill was in accordance with the old three-year homestead provision of five months' continuous leave of absence. The House modified that in accordance with the bill I prepared, allowing the entryman to take his leave of absence in two different sections as desired. That is the only change that we reported out, and that is a beneficial provision and ought to remain in the bill the way it passed this House before.

Mr. MANN. That change is not indicated in the copy that the Clerk has in his hands. I know why. Whoever actually reported the bill, I will not say theoretically, did not correct it.

Mr. TAYLOR of Colorado. I will say that actually and theoretically I reported it, so that if there is any fault it is mine, because I introduced the bill in the House and reported it from the committee, and had charge of it in the House, and I have again reported this bill, which is Senator MYERS's bill.

Mr. MANN. The gentleman is old enough and wise enough as a Member of the House to have known how to do it correctly, and he did not do it correctly.

Mr. TAYLOR of Colorado. I think I did do it correctly.

Mr. MANN. The proof of the pudding is in the eating. Here is the bill. If it were passed as the gentleman reported it to the House, the gentleman's amendment would not be in it.

Mr. TAYLOR of Colorado. My report clearly shows what the committee did.

Mr. MANN. If the Clerk were bound to read all the reports of committees filed in this House we would have to get a number of extra clerks and pay them higher salaries. I have discovered now what the gentleman wants to do. I could not tell in the first place. I have no objection if he wants to offer an amendment.

Mr. TAYLOR of Colorado. I will offer this committee amendment so as to make it conform to what the committee intended. Mr. Speaker, have we passed the unanimous-consent stage?

The SPEAKER. No. Is there objection?

There was no objection.

The SPEAKER. This bill is on the Union Calendar.

Mr. TAYLOR of Colorado. I ask unanimous consent, Mr. Speaker, that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Colorado asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc. That any qualified person who has heretofore or shall hereafter in good faith make settlement upon and improve unsurveyed unreserved unappropriated public lands of the United States with intention, upon survey, of entering same under the homestead laws shall be entitled to a continuous leave of absence from the land settled upon by him for a period not exceeding five months in each year after establishment of residence: *Provided*, That he shall have plainly marked on the ground the exterior boundaries of the lands claimed and have filed in the local land office notice of the approximate location of the lands settled upon and claimed, of the period of intended absence, and that he shall upon the termination of the absence and his return to the land file notice thereof in the local land office.

Mr. TAYLOR of Colorado. Mr. Speaker, I move to amend by striking out, on line 7, the words "continuous leave," and all of line 8, and, in line 9, the words "not exceeding" and inserting in lieu thereof the words "leave of absence in one or two continuous periods not exceeding in the aggregate." That will appear in the report.

The SPEAKER. The Clerk will report the amendment offered by the gentleman from Colorado.

The Clerk read as follows:

Amend, on page 1, by striking out, in line 7, the words "continuous leave," all of line 8, and, in line 9, the words "not exceeding" and inserting "leave of absence in one or two continuous periods not exceeding in the aggregate."

Mr. TAYLOR of Colorado. Mr. Speaker, I move the adoption of the amendment.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the third reading of the Senate bill.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. TAYLOR of Colorado, a motion to reconsider the vote whereby the bill was passed was laid on the table.

The SPEAKER. The Clerk will report the next one.

PERMITS, EXCURSIONS ON PASSENGER STEAMERS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13831) to amend section 4464 of the Revised Statutes of the United States relating to number of passengers to be stated in certificates of inspection of passenger vessels, and section 4465 of the Revised Statutes of the United States, prescribing penalty for carrying excessive number of passengers on passenger vessels, and section 4466 of the Revised Statutes of the United States, relating to special permits for excursions on passenger steamers.

The title of the bill was read.

The SPEAKER. Is there objection?

Mr. McLAUGHLIN. Mr. Speaker, reserving the right to object, I would like to call the attention of the gentleman in charge of the bill to the portion beginning on page 2, line 18, where a penalty for violation of the act, for carrying a greater number of passengers than is permitted by the certificate of inspection, makes the owner or master liable to a suit by any individual. It reads:

SEC. 4465. It shall not be lawful to take on board of any vessel a greater number of passengers than is stated in the certificate of inspection, and for every violation of this provision the master or owner shall be liable to any person suing for the same to forfeit the amount of passage money and $10 for each passenger beyond the number allowed.

The bill provides also, on page 3, for a penalty of $100 or imprisonment for not more than 30 days or both. Is it wise to have in this law a provision for suits by individuals against the owner of a ship to recover a $10 penalty or any penalty?

Mr. GREENE of Massachusetts. That is the existing law.

Mr. McLAUGHLIN. Should it be permitted to remain so in the judgment of the gentleman in charge of the bill?

Mr. ALEXANDER. If the gentleman will permit, I will read the existing law. Section 4465—is that the section to which the gentleman refers?

Mr. McLAUGHLIN. Yes.

Mr. ALEXANDER. That section reads:

SEC. 4465. It shall not be lawful to take on board of any vessel a greater number of passengers than is stated in the certificate of inspection, and for every violation of this provision the master or owner shall be liable to any person suing for the same to forfeit the amount of passage money and $10 for each passenger beyond the number allowed.

That is the existing law.

Mr. McLAUGHLIN. This bill proposes to amend that section; and why not amend it by striking out the portion which gives to individuals the right to sue? That imposes the burden of a suit on each individual, if he chooses to sue. Why not leave the punishment for the violation of this act in the hands of the Federal authorities and make the punishment fit the crime?

Mr. ALEXANDER. This has been the law for a long while. We have never had any complaint of its abuse, and the committee were not disposed to disturb it.

Mr. McLAUGHLIN. Would it not be well to strike out everything after the word "and" following the word "inspection," in line 22, page 2, down to the end of line 2 on page 3, and then let follow the next four lines, which read as follows:

The master or owner of the vessel, or either or any of them, who shall knowingly violate this provision shall be liable to a fine of not more than $100 or imprisonment of not more than 30 days, or both.

I have never thought it a good idea to leave the enforcement of a law in the hands of individuals, or to have the law so framed as to permit an individual to profit by a suit for violation of a law. If an individual suffers loss or damage, he has a right to bring a civil action to recover; but is it wise to provide for suits by individuals to recover a penalty for the purpose of assisting in enforcement of a law?

Mr. ALEXANDER. As I have said, that whole matter was discussed in the committee, and the committee were unanimously of the opinion that there was no occasion to change the existing law. For that reason the amendment was not made.

Mr. McLAUGHLIN. Did the committee consider the particular matter which I am calling to the attention of the gentleman now?

Mr. ALEXANDER. Oh, yes, indeed.

Mr. McLAUGHLIN. And the committee considered it a wise provision to give individuals the right to sue?

Mr. ALEXANDER. Yes; and the fact that there is no complaint of the law ever having been abused was an additional reason why the committee thought it was well to let it remain.

Mr. McLAUGHLIN. That right to sue for a penalty might be exercised by the very individuals who were received on the boat in excess of the number provided by the certificate of inspection. They might, perhaps, profit by their own fault in going aboard.

Mr. ALEXANDER. Surely the gentleman can not take the position that every passenger who goes aboard a vessel is at fault if he fails to ascertain whether it is overloaded.

Mr. COX. This simply makes it doubly safe, as far as the passengers are concerned.

Mr. ALEXANDER. This legislation grew out of the *Eastland* disaster, and our effort was to make the law in many respects more stringent, or rather to make it such as better to insure safety of life. The gentleman is familiar with the facts as to the *Eastland* disaster?

Mr. McLAUGHLIN. Yes.

Mr. ALEXANDER. We saw no occasion to change this part of the statute.

Mr. McLAUGHLIN. If the committee wished to make this law more drastic, the amount of the fine could be increased. The amount of fine provided is only $100, and the imprisonment is only 30 days. It would seem to me that if you wish to make it more drastic you should increase the amount of fine or the jail sentence; but as I look at it now I do not like the

idea of giving the right to each and every individual on a boat to bring suit against the master. There may be thousands of them. I do not think, as a principle, that individuals ought to undertake the enforcement of a criminal statute and to profit by suits brought for the violation of a statute.

Mr. ALEXANDER. That has been the law for many, many years. I think it is in the revision of 1878, and it never has been disturbed. The committee saw no occasion to amend the law in this regard. It has never been abused, and for that reason we thought it unwise to change it.

Mr. McLAUGHLIN. Now that it is brought to the gentleman's attention, will he not consent to an amendment such as I suggest?

Mr. ALEXANDER. No; I would rather strike out the other penalty than that one.

Mr. HARDY. Will the gentleman allow me to make a suggestion there?

Mr. McLAUGHLIN. Yes.

Mr. HARDY. This whole matter came up at the instance of the department, for the reason that the law as it stood applied only to steamships and not to vessels propelled by other motive power. Consequently the word "steamboat" was stricken out and the other word inserted. There was no complaint against this provision. There was one giving the passenger the right to bring a civil action. Then there is the other section imposing a fine. That was put there so that if no passenger complained the officials themselves might enforce the law in another proceeding.

Mr. McLAUGHLIN. I wish to see this law made just as good as it can be, but I do not like that provision.

Mr. HARDY. As it is it enables the passenger to enforce it by a suit if he sees proper; and if no passenger will do it, then the public officials may proceed.

Mr. McLAUGHLIN. Why should it be necessary that there be any power behind the officials to compel them to enforce the law? They ought to be regardful of their duty and active in the enforcement of the law anyway.

Mr. HARDY. The great *Eastland* disaster was caused by somebody being inactive in the performance of his duty, and we do not want to take away any vitality that there is in the law.

Mr. McLAUGHLIN. There was no lack of activity on the part of the officials after the disaster occurred. But the activity ought to be before and at the time the ship is being loaded.

Mr. ALEXANDER. When the committee were called upon to strengthen and correct the law we did not feel that we wanted to weaken it. Under the existing law the local inspectors may determine how many passengers a steamer may carry, and there is no appeal from their decision. Section 1 of this bill provides that they may fix the number, but shall report the number to the supervising inspector, who may approve or disapprove of their action. We amend the existing law in the interest of greater safety to life.

Mr. McLAUGHLIN. I shall not object to the bill, but I have called attention to this feature, as I thought it might have been overlooked. It does not seem to me to be just right.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 4464 of the Revised Statutes of the United States be, and is hereby, amended so as to read as follows:

"SEC. 4464. The board of local inspectors shall state in every certificate of inspection granted to vessels carrying passengers, other than ferryboats, the number of passengers of each class that any such vessel has accommodation for and can carry with prudence and safety. They shall report their action to the supervising inspector of the district, who may at any time order the number of such passengers decreased, giving his reasons therefor in writing, and thereupon the board of local inspectors shall change the certificate of inspection of such vessel to conform with the decision of the supervising inspector. Whenever the allowance of passengers shall be increased by any board of local inspectors such increase shall be reported to the supervising inspector of the district, together with the reasons therefor, and such increase shall not become effective until the same has been approved in writing by the supervising inspector."

SEC. 2. That section 4465 of the Revised Statutes of the United States be, and is hereby, amended so as to read as follows:

"SEC. 4465. It shall not be lawful to take on board of any vessel a greater number of passengers than is stated in the certificate of inspection, and for every violation of this provision the master or owner shall be liable to any person suing for the same to forfeit the amount of passage money and $10 for each passenger beyond the number allowed.

"The master or owner of the vessel, or either or any of them, who shall knowingly violate this provision shall be liable to a fine of not more than $100 or imprisonment of not more than 30 days, or both."

SEC. 3. That section 4466 of the Revised Statutes of the United States be, and is hereby, amended so as to read as follows:

"SEC. 4466. If any passenger engages in excursions, the board of local inspectors shall issue to such steamer a special permit, in writing, for the occasion, in which shall be stated the additional number of passengers that may be carried and the number and kind of life-saving appliances that shall be provided for the safety of such additional passengers; and they shall also, in their discretion, limit the route and distance for such excursions: *Provided, however*, That the issuance of such special permit shall be reported by the board of local inspectors to the supervising inspector of the district, and such special permit shall not be effective until approved by the said supervising inspector."

The following committee amendments were read:

Add, on page 3, line 8, after the word "passenger," the word "vessel"; and strike out on page 3, line 10, the word "steamer" and insert the word "vessel."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. GREEN of Massachusetts, a motion to reconsider the vote whereby the bill was passed was laid on the table.

APPEALS FROM DECISIONS OF BOARDS OF LOCAL INSPECTORS OF VESSELS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13223) to provide for appeals from the decisions of boards of local inspectors for vessels, and for other purposes.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

Mr. ALEXANDER. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Missouri asks unanimous consent to consider the bill in the House as in Committee of the Whole? Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That whenever any person directly interested in or affected by any decision or action of any board of local inspectors of vessels shall feel aggrieved by such decision or action he may appeal therefrom to the supervising inspector of the district; and a like appeal shall be allowed from any decision or action of a supervising inspector to the Supervising Inspector General, whose decision, when approved by the Secretary of Commerce, shall be final: *Provided, however*, That application for such reexamination of the case by a supervising inspector or by the Supervising Inspector General shall be made within 30 days after the decision or action appealed from shall have been rendered or taken: *And provided further*, That in all cases reviewed under the provisions of this act where the issue is the suspension or revocation of the license of a licensed officer such officer shall be allowed to be represented by counsel and to testify in his own behalf.

SEC. 2. That whenever there shall be a disagreement between the local inspectors in regard to any matter before them for decision they shall report the case to the supervising inspector of the district, who shall investigate and decide the same; and any supervising inspector may within 30 days thereafter, upon his own motion, review any decision or action of any board of local inspectors within his district and in like manner the Supervising Inspector General may within 30 days thereafter review any decision or action of any supervising inspector or board of local inspectors, and the decision of the Supervising Inspector General in such case shall, when approved by the Secretary of Commerce, be final.

SEC. 3. That any decision or action reviewed by the Supervising Inspector General or by any supervising inspector, as provided in sections 1 and 2 of this act, may be revoked, changed, or modified by such reviewing officer, who shall have power to administer oaths and to summon and compel the attendance of witnesses by a similar process as in the district courts of the United States; and the disbursing clerk, Department of Commerce, shall pay, on properly certified vouchers, such fees to any witness so summoned for his actual travel and attendance as shall be officially certified to by the officer reviewing the case, not exceeding the rate allowed for fees to witnesses for travel and attendance in the district courts of the United States.

SEC. 4. That the Secretary of Commerce shall make such regulations as may be necessary to secure a proper enforcement of the provisions of this act.

SEC. 5. That section 4452 of the Revised Statutes, as amended by section 6 of the act of March 3, 1905, is hereby repealed.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ALEXANDER, a motion to reconsider the vote whereby the bill was passed was laid on the table.

RIGHT OF WAY NEAR ENGLE, N. MEX.

The next business on the Calendar for Unanimous Consent was the bill (S. 1843) to authorize the Secretary of the Interior to acquire certain right of way near Engle, N. Mex.

The SPEAKER. Is there objection?

Mr. MONDELL. Reserving the right to object, the arrangement which it is proposed to make with the Atchison, Topeka & Santa Fe Railroad to give them not to exceed 30,000,000 gallons of water per month seems to be a pretty liberal one, unless the property rights they are surrendering are quite valuable. Is the gentleman from Texas acquainted with the value of the property that is being surrendered?

Mr. SMITH of Texas. I do not know that any money value was ever put on that property. The company refuses to sell it.

Mr. MONDELL. It is simply a right of way, an easement over public lands.

Mr. SMITH of Texas. It is to the river.

Mr. MONDELL. And that right of way would expire if not utilized within a given time.

Mr. SMITH of Texas. I do not know what the conditions were about that.

Mr. MONDELL. I know about the dam, but I know nothing about this right of way. The quantity of water which the railroad company is to be given is very large. If it were sold at the ordinary price of water supplies it would amount to a considerable sum of money.

Mr. SMITH of Texas. I think it would irrigate something less than 400 acres of land. I think the supply of water is small.

Mr. MONDELL. It depends upon whether you figure it from the standpoint of water for irrigation or water for domestic or railroad purposes. Figuring it from the ordinary value of water for railroad purposes it would mean several hundred dollars a month.

Mr. SMITH of Texas. Under the terms of the bill the gentleman will notice that the amount of water allowed the railroad company is to be fixed by the Secretary of the Interior, but there is no obligation on the part of the Government to deliver it; it merely permits the railroad company to take it at such times and places as the Secretary may prescribe. But the Reclamation Service has figured out the amount of water and figures it at a sufficient supply to irrigate 400 acres of land.

I will state to the gentleman that we have had this matter up with both of the water-users associations under this project and have agreed that this is a fair settlement of this matter, and they are willing for it to go through.

Mr. TAYLOR of Colorado. Will the gentleman yield?

Mr. SMITH of Texas. I will.

Mr. TAYLOR of Colorado. I will say to the gentleman from Wyoming that the committee had the Reclamation Service officials before us and the senior Senator from New Mexico. The reclamation officials seemed to be of the opinion that 30,000,000 gallons a month was an infinitesimal amount of water, and that it was much better to make the proposition than to condemn the right of way. They said the company's right to that territory would not lapse for many years.

Mr. MONDELL. My friend knows well that 30,000,000 gallons a month is far from infinitesimal. Taken from the ocean it would not be so much.

Mr. TAYLOR of Colorado. For a great big irrigation proposition it would not go far.

Mr. MONDELL. I do not know anything about the right of way which the company surrendered, and in view of the fact that the Reclamation Service thinks it is a fairly equitable arrangement I have no disposition to object.

Mr. TAYLOR of Colorado. I will say to the gentleman that I did not write the bill at all, but the Reclamation Service thought it was best and for the welfare of the department.

Mr. MANN. The report of the Reclamation Service would seem to indicate that this was not a right of way but that they owned the land. They say that the company was unwilling to sell the land for cash. Either they do not know what a mere right of way is or I do not know what the English language means or else they own the land.

Mr. TAYLOR of Colorado. They could refuse to sell the land, but we could condemn it and take it away from them.

Mr. MONDELL. If it were a right of way that the railroad company had still in force, there might be some question as to whether or not we could condemn it. I imagine, as a matter of fact, that the building of the dam does not in any way affect the right of way. I do not see any reason why it should. The fact that the dam covers some land over which there may be an easement for a right of way would not prevent the lowering of a pipe.

Mr. COX. Mr. Speaker, will the gentleman yield?

Mr. MONDELL. Yes.

Mr. COX. How much land is actually involved in this right of way?

Mr. MONDELL. I do not know. It is a right of way.

Mr. COX. Does anybody know how much is actually involved? In other words, what are we getting from the railroad company for the swamp?

Mr. SMITH of Texas. It is a right of way for a pipe line.

Mr. COX. It does not involve much land?

Mr. SMITH of Texas. Not a great deal.

Mr. COX. What is the length of the pipe line?

Mr. SMITH of Texas. It must be 10 or 12 miles.

The SPEAKER pro tempore. Is there objection?

Mr. COX. Just one more question. The railroad, as I gather from the report, is to pay for taking the water out of the reservoir and putting it on their trains?

Mr. SMITH of Texas. Yes.

Mr. COX. They are to stand all of that expense?

Mr. SMITH of Texas. Yes; under the direction of the Secretary of the Interior. The rights of the Government are well safeguarded in the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. This bill is on the Union Calendar.

Mr. SMITH of Texas. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Interior be, and is hereby, authorized to receive on behalf of the United States from the Atchison, Topeka & Santa Fe Railway Co. the conveyance of so much of said company's pipe-line right of way from a point near Engle, N. Mex., to the Rio Grande River as will be flooded by the Elephant Butte Dam; and as the consideration for such conveyance the railway company shall be permitted to take from the water impounded above Elephant Butte Dam, now under construction by the Reclamation Service, and which will flood such right of way, such quantity of water as the Secretary of the Interior may find to be necessary for the operation of said company's railway, but not exceeding 30,000,000 gallons of water per month; that neither the United States nor its successors in interest shall be held liable for or obligated to supply the water hereinbefore described, but in the event that the United States or its successors in interest shall abandon the use of the land upon which the said Atchison, Topeka & Santa Fe Railway has its said right of way for a reservoir site as herein contemplated, said right of way, so far as the same may be conveyed to the United States hereunder, shall revert to the said railway company.

With the following committee amendment:

Page 2, line 5, after the word "month," insert the following:

"*Provided*, That the Secretary of the Interior shall at all times have authority to determine the times, place, and manner in which said Atchison, Topeka & Santa Fe Railway Co. shall be permitted to take such water from said reservoir, and that all expense incident thereto shall be borne by said railway company: *Provided further.*"

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question now is on the third reading of the Senate bill as amended.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. SMITH of Texas, a motion to reconsider the vote by which the bill was passed was laid on the table.

GAME PRESERVE IN THE STATE OF KANSAS.

The next business on the Calendar for Unanimous Consent was the bill (S. 1793) granting to the State of Kansas title to certain lands in said State for use as a game preserve.

The SPEAKER pro tempore. Is there objection?

Mr. MANN. Reserving the right to object, I notice there are three committee amendments to this bill which seem to me to make the bill worse instead of better.

Mr. SHOUSE. Mr. Speaker, I will say to the gentleman that they were put in at the request of the ranking minority member of the committee, the gentleman from Wisconsin [Mr. LENROOT]. He would not report the bill favorably unless these amendments were inserted. I had no objection to them.

Mr. MANN. Then, I think we better let the bill go over until he is here.

Mr. SHOUSE. He did not object to the bill. He wanted these amendments in, that is all.

Mr. MANN. They do not seem to me to be reasonable. If he wants them in I would like to have some explanation why.

Mr. SHOUSE. Perhaps the chairman of the committee can offer some explanation.

Mr. MANN. I do not see what great distinction there is as to the first amendment. If we pass a law granting to the State of Kansas certain public lands, that covers the case. If we pass a law to say that we issue a patent to the State of Kansas I suppose if we issue the patent it would show that the State owns the land.

Mr. FERRIS. Does the gentleman from Illinois think the second amendment is of no value?

Mr. MANN. The second amendment, of course, goes with the first, but the third amendment is different. The bill as it came from the Senate provided "such reversion to be declared by the Secretary of the Interior." That amounts to something; but when you say "such reversion to be specified in said patent" it would amount to nothing. The right of reversion would be specified in the patent, but it would not amount to anything unless somebody declared it, unless you went into court and declared it.

Mr. FERRIS. The gentleman is probably correct about that.

Mr. MANN. I think I am.

Mr. FERRIS. I rather hope the gentleman from Illinois will not oppose this and have it passed over. If he desires to put this back as it was originally, or even to fix it to suit himself, it will be satisfactory to the committee, and I think also to the gentleman from Wisconsin [Mr. LENROOT]. They have a little band of antelope out there, and that is a very scarce article in the United States. As the gentleman from Illinois [Mr. MANN] will recall, they had a pretended forest reserve out there without any trees on it, and by Executive proclamation they opened it all up except these few sections.

Mr. MANN. I am in sympathy with the purpose of the bill. I am willing to give them a little land to take care of the deer.

Mr. FERRIS. If the gentleman from Illinois thinks best, we can go back to the original bill, and will be glad to do it.

Mr. MANN. All right.

Mr. FERRIS. We will not even have to go back to the Senate. We will just vote the amendments down.

Mr. MANN. Yes; vote down the amendments.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none.

Mr. SHOUSE. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in the Committee of the Whole House on the state of the Union.

The SPEAKER pro tempore. The gentleman from Kansas asks unanimous consent that the bill be considered in the House as in the Committee of the Whole House on the state of the Union. Is there objection? [After a pause.] The Chair hears none. The Clerk will read the bill.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized to grant to the State of Kansas the public lands in sections 25, 26, and 35 in township 24 south and sections 1 and 2 in township 25 south, all in range 33 west, sixth principal meridian, for use as a game preserve: *Provided*, That if the said State shall at any time use or permit the said lands hereby granted to be used for any purpose not contemplated by this act the said lands shall revert to the United States, such reversion to be declared by the Secretary of the Interior.

The committee amendments were read, as follows:

Page 1, line 4, strike out the word "grant" and insert the words "issue patent."

Page 1, line 10, after the word "lands" strike out the words "hereby granted."

Page 2, lines 1 and 2, strike out the words "declared by the Secretary of the Interior" and insert the words "specified in said patent."

Mr. FERRIS. Mr. Speaker, I hope the amendments will be voted down.

The question was taken, and the amendments were rejected.

The bill was ordered to be read the third time, was read the third time, and passed.

On motion of Mr. SHOUSE, a motion to reconsider the vote by which the bill was passed was laid on the table.

SECTION 4931, REVISED STATUTES.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13618) to amend section 4931 of the Revised Statutes of the United States.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. LLOYD). Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none.

The Clerk read as follows:

Be it enacted, etc., That section 4931 of the Revised Statutes of the United States be, and the same is hereby, amended to read as follows:

"SEC. 4931. Patents for designs may be granted for the term of 3 years and 6 months, or for 7 years, or for 14 years, as the applicant may in his application elect; and that during the term of letters patent for a design heretofore or hereafter issued for one of the shorter terms, the owner thereof may at any time, but not later than 30 days prior to the expiration of the term for which said patent was issued, file with the Commissioner of Patents his election of one of the longer terms provided for by law, said application being accompanied by an amount of money equal to the difference between the fee paid for the patent as issued and the fee that would have been required to be paid had the applicant for said patent originally elected such longer term. The Commissioner of Patents shall thereupon amend and modify the letters patent issued in such case so as to include the unexpired balance of such longer term so elected by the owner of said letters patent."

The SPEAKER pro tempore. The question is——

Mr. MANN. No; the question is, Is there objection to the present consideration of the bill?

The SPEAKER pro tempore. That was granted.

Mr. OGLESBY. I will say to the gentleman that I saw the gentleman from Tennessee was talking with the gentleman from Illinois when this was passed. The gentleman said to me that he thought it ought to be amended——

Mr. MANN. All right; let it go.

Mr. OGLESBY. I would call the attention——

Mr. MANN. The truth is most of the gentlemen who occupy the position of Speaker, except the Speaker, do not understand that there is a zone of air around the Speaker's chair that it is hard to break through. They do not talk loud enough usually for me to hear them, although another gentleman was talking to me.

Mr. OGLESBY. Mr. RUSSELL of Missouri has charge of this bill.

The SPEAKER pro tempore. Certainly the gentleman does not mean the present occupant of the chair?

Mr. MANN. Yes; I mean the present occupant of the chair and all the others that have been in the chair recently. It takes a lot of noise——

Mr. OGLESBY. The gentleman suggested he wanted this bill amended——

Mr. MANN. I move to insert, page 2, line 7, after the word "term," the words "plus 20 per cent."

Mr. OGLESBY. That is perfectly satisfactory to me. I had written in 25 per cent. Twenty per cent is all right.

Mr. RUSSELL of Missouri. I am satisfied with that.

The SPEAKER pro tempore. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 2, in line 7, by inserting after the word "term" the words "plus 20 per cent."

Mr. RUSSELL of Missouri. Mr. Speaker, the gentleman from New York [Mr. OGLESBY] who reported the bill to the House says he consents to this amendment. I prefer to have the bill passed as it is, but of course if Mr. OGLESBY, the acting chairman of the Patents Committee, who reported the bill to the House, has seen the gentlemen who are interested in it and says they are satisfied with it, I do not feel inclined to make serious objection.

Mr. MANN. I will say to the gentleman, to relieve the gentleman from New York, I would not consent to the passage of the bill without the amendment. Here is a proposition where men take out design patents and can take them out for 3½ years or 7 years or 14 years, as they please, there being an addition to the fee charged in the three cases. This bill proposes to let all design patents be taken out in the first instance for 3½ years. That is not the language of the bill, but that is the effect of it, and if anyone wants to extend it all they will pay is the difference between the cost of the 3½-year design patent and the 7 or 14 year design patent, and if they take out the 14-year patent that will save the designers or patentees of these design patents thousands of dollars.

Mr. RUSSELL of Missouri. Will the gentleman yield?

Mr. MANN. In just a second. Because there is not one design patent in 20, probably, which is ever made any use of or ever extended, whereas now if they want to get a design patent for 14 years they have to pay for it in the first place. Under this bill they will only have to pay the lower fee for 3½ years, and then, if it proves to be good, they can get a 14-year patent benefit by paying the difference between the original cost of the 3½-year and the 14-year patent. I have only suggested that they pay 20 per cent in addition.

Mr. RUSSELL of Missouri. I think that would greatly improve this law, but I think without the amendment suggested it would be still better. The gentleman correctly states the purpose of the bill, and my information is that the Commissioner of Patents says that this will encourage the filings for the shorter term and that the money paid will amount to more than is paid at the present time; in other words, that it would increase the revenue of that department.

Mr. MANN. I would not be surprised if it would add a great many to the number of design patents which are issued. The fact is, you know, we encourage everybody to patent everything; then when they patent the articles we kick because they have a monopoly upon them. Why, the automobile industry in this country, which is getting to be something wonderful, never started until the original patents had expired. It could not.

Mr. COX. Why?

Mr. MANN. Because one man had a monopoly and the genius of the American people could not be made to operate upon it, because they were held by the throat by this one man who had a monopoly. The sewing machines of the country never really started until the original patents ran out. People could not make sewing machines, regardless of the original patent and add to them. Well, I am not opposed to the patent law, but the result of this will probably be that anybody who gets up a design for anything will patent it.

Mr. RUSSELL of Missouri. If it is true that the people interested in design patents want it, and if it is also true, as the Commissioner of Patents states, that it will increase the revenues of the Government in that department, why should anybody object to it?

Mr. MANN. If anybody would object to it it is the gentleman from Missouri and myself. We are the ones who will have to pay for it.

Mr. RUSSELL of Missouri. When we buy the article?

Mr. MANN. Yes.

Mr. OGLESBY. I will say to the gentleman from Missouri——

Mr. MANN. I will not offer objection to the bill.

Mr. RUSSELL of Missouri. I understand that you would object unless this amendment is included?

Mr. MANN. I think if people are going to pay a dollar—I do not remember what the price is—it is not very much for these design patents.

Mr. OGLESBY. The design patent is practically the same as any other patent.

Mr. MANN. The cost of the patent is not very much, anyhow. They do not pay very much for a 3½-year patent.

Mr. RUSSELL of Missouri. They pay $10 for 3½ years, $15 for 7 years, and $30 for 14 years.

Mr. MANN. Then, this would require them to pay 20 per cent more when they elect to take the 14-year patent. Most of them will not take that at all.

Mr. OGLESBY. After it has been determined at the end of 3½ years that the increase is very small the patent granted that much earlier will fall into the public domain.

Mr. RUSSELL of Missouri. On the statement of the gentleman from New York [Mr. OGLESBY], who reported the bill to the House, I will make no objection to the proposed amendment.

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read a third time, and passed.

On motion of Mr. RUSSELL of Missouri, a motion to reconsider the vote by which the bill was passed was laid on the table.

APPLICATIONS FOR PATENTS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13720) to amend section 4894 of the Revised Statutes relating to patent applications.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That section 4894 of the Revised Statutes be, and it is hereby, amended so as to read as follows:

"SEC. 4894. All applications for patents shall be completed and prepared for examination within one year after the filing of the application, and in default thereof, or upon failure of the applicant to prosecute the same within one year after any action therein, of which notice shall have been given to the applicant, they shall be regarded as abandoned by the parties thereto, unless it be shown to the satisfaction of the Commissioner of Patents that such delay was unavoidable: *Provided, however*, That no application shall be regarded as abandoned which has become the property of the Government of the United States and with respect to which the head of any department of the Government shall have certified to the Commissioner of Patents, within a period of three years, that the invention disclosed therein is important to the armament or defense of the United States."

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

Mr. MONDELL. Mr. Speaker, I desire to discuss the bill briefly. As I understand it, this is the bill that was placed on the fortification bill as one of its items. I have no doubt, Mr. Speaker, but that we should have legislation on this subject, but I have very grave doubts as to whether we should legislate in this way. I think it would have been very much better to have provided for the prosecution of these applications to a patent, and provide that the patent should be secret, and I say that with some hesitation, because I am not an expert on patent law and know comparatively little concerning it. But what I fear is this, that an application, or applications, may be filed for a patent on behalf of the United States, rather broad in its nature, covering quite a wide field. It is not necessary for the Government to prosecute that application. It may be held indefinitely, forever, so far as any provision in the bill is concerned, if I recollect rightly, and thereafter any number of applications made covering the same general field may be denied on the ground that they might affect the application or applications thus filed on behalf of the Government. It is true that if the application were prosecuted to a patent, it might develop that the new application might not apply to or infringe upon the patent as secured, but the application being broad and being held indefinitely, it seems to me that there is very great danger that other applications along the same general line, or for improvements and betterments, for carrying out or developing the idea, might be held up indefinitely.

While, as I said, I am not sufficiently familiar with the patent business to know to what extent this involves a danger to the development of patentable ideas, it occurs to me that might involve a very great danger.

The gentleman from Illinois [Mr. MANN] just called attention to the fact that the automobile did not develop to any large extent until the basic patents had expired, and that that was true to a certain extent of the sewing machine. It would have been true to a much greater extent if the original applications, which were much broader than the final patents, had been held indefinitely without a prosecution to patent. What I fear is that an agency of the Government, anxious to protect the Government, filing applications broad and general and holding them indefinitely, may by so doing absolutely block progress along important lines. This is announced as a part of the program of preparedness, and one is anathema who stands in the way of anything heralded in the name of preparedness. Hence I did not object to the bill. But I have very serious doubts as to whether this is a wise course to pursue in cases of this kind.

Mr. OGLESBY. Will the gentleman yield?

Mr. MONDELL. I will.

Mr. OGLESBY. Will the gentleman suggest some way in which the filing of such an application could block the wheels of progress? These applications, of course, are secret and are never made known until the patent is granted.

Mr. MONDELL. That is true.

Mr. OGLESBY. And all their applications are secret, and the secret is not revealed until the actual granting of the patent.

Mr. MONDELL. I understand. It is secret as far as the world is concerned, but it is known to the Patent Office, and every other patent application that is filed thereafter must be considered in view of that application, which in these cases would or could remain indefinitely blocking the way. You as an inventor do not know what the Government has filed along a certain line. You make an application along the same line and you are held up. Why? You are told you are held up on account of Government application or applications the nature of which you can never know, the extent of which will not be revealed to you. I think the gentleman from New York is familiar with patents. I am not. Therefore, it is with some hesitation that I discuss the matter, but it does seem to me that you create a situation which makes it very trying for people who file applications along the same line as the Government applications and whose applications will be held up because they are said to interfere with an application which has been filed on Government account but indefinitely held in abeyance.

Mr. OGLESBY. It would not interfere with it any more than if a patent had been granted. If there is no interference, it would not be held up.

Mr. MONDELL. But an application is very broad. Although I have never filed one, I assume that an application is generally much broader than the patent as finally granted, and if a certain thing has been patented and you make an application you can judge yourself as to whether your application infringes. You can have some opinion yourself in regard to it. But how can you know whether you can enter the field at all if there can be an infinite number of applications filed and held secret for the Federal Government. Your application might not be considered at all because of the opinion held by the department that it might infringe upon an application filed by or on behalf of Uncle Sam.

Mr. OGLESBY. There are about 50,000 applications on file now.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. SHERLEY, a motion to reconsider the vote whereby the bill was passed was laid on the table.

The SPEAKER pro tempore. The Clerk will read the next one.

TOWNSITE OF M'CABE, MONT.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 600) to validate title to the townsite of McCabe, in the State of Montana.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to accept for surface rights only Santa Fe Pacific lien-land selection heretofore made and designated as Glasgow, Mont., land office serial number 015766, for the following-described land: Southwest quarter of the southeast quarter of section 4, in township 29 north, range 56 east, Montana meridian; and issue patents thereto, which patents shall contain a reservation to the United States of all coal, in said lands, as provided by section 3 of the act of June 22, 1910 (36 Stats., p. 584).

With a committee amendment, as follows:

Amend, page 2, by striking out all after the word "coal," in line 2, and all of lines 3 and 4 and inserting in lieu thereof "oil, or other mineral deposits in the land, and the right of the United States, its grantors or lessees, to mine and remove same."

The SPEAKER pro tempore. This bill is on the Union Calendar.

Mr. FERRIS. I ask unanimous consent, Mr. Speaker, that the bill be considered in the House as in Committee of the Whole.

The SPEAKER pro tempore. The gentleman from Oklahoma [Mr. FERRIS] asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

Mr. MANN. I move, on line 6, page 2, to strike out the word "grantors" and insert the word "grantees."

The SPEAKER pro tempore. The Clerk will report the amendment offered by the gentleman from Illinois.

The Clerk read as follows:

Amend, page 2, line 6, by striking out the word "grantors" and inserting the word "grantees."

Mr. MANN. I do not know whether that is correct or not.

Mr. FERRIS. Yes; it should be "grantees."

Mr. MANN. Certainly if it is "grantors or lessees," they do not come in very well together. The lands are reserved to the United States, grantees or lessees.

Mr. FERRIS. The only thing I was debating was whether the amendment suggested would improve it. It needs something, but I do not know whether it needs that or not.

Mr. MANN. Plainly it is not trying to reserve for any grantors of the United States.

Mr. FERRIS. "Grantors" is wrong, undoubtedly. We accept the amendment if the gentleman is satisfied with it himself.

The SPEAKER pro tempore. The question is on agreeing to the amendment of the gentleman from Illinois to the committee amendment.

The amendment to the committee amendment was agreed to.

The SPEAKER pro tempore. The question is on agreeing to the committee amendment as amended.

The committee amendment as amended was agreed to.

Mr. MONDELL. Mr. Speaker, I move to amend, page 1, line 4, by striking out the words "surface rights" and inserting the words "limited patents."

The SPEAKER pro tempore. The Clerk will report the amendment offered by the gentleman from Wyoming.

The Clerk read as follows:

On page 1, line 4, strike out the words "surface rights" and insert "limited patents."

Mr. MONDELL. Mr. Speaker, what is proposed to be done here is to issue a limited patent, and, therefore, we should direct the Secretary of the Interior to accept a certain application for a limited patent.

Mr. FERRIS. The committee thinks the gentleman from Wyoming is right about it.

Mr. MANN. I would like to hear the amendment reported first.

The SPEAKER pro tempore. The Clerk will again report the amendment.

The amendment was again read.

The SPEAKER pro tempore. The question is on agreeing to the amendment offered by the gentleman from Wyoming.

The amendment was agreed to.

Mr. MANN. Now, Mr. Speaker, if nobody else does, I move to amend, page 1, line 5, by striking out the word "lien" and inserting the word "lieu."

Mr. FERRIS. That ought to be done. The letter "u" is turned bottom side up.

The SPEAKER pro tempore. The Clerk will report the amendment offered by the gentleman from Illinois.

The Clerk read as follows:

Amend, page 1, line 5, by striking out the word "lien" and inserting the word "lieu."

The SPEAKER pro tempore. The question is on agreeing to the amendment offered by the gentleman from Illinois.

The amendment was agreed to.

Mr. MANN. Mr. Speaker, I move to amend, in line 10, by striking out the word "patents" and inserting the word "patent" in the singular.

The SPEAKER pro tempore. The Clerk will report the amendment offered by the gentleman from Illinois.

The Clerk read as follows:

Amend, page 1, line 10, by striking out the word "patents" and inserting the word "patent."

Mr. MANN. I suppose the word "patent" for a quarter section is sufficient.

The SPEAKER pro tempore. The question is on agreeing to the amendment offered by the gentleman from Illinois.

The amendment was agreed to.

Mr. MANN. Mr. Speaker, I make the same amendment on page 2, line 1.

The SPEAKER pro tempore. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 2, line 1, by striking out the word "patents" and inserting the word "patent."

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. FERRIS, a motion to reconsider the vote whereby the bill was passed was laid on the table.

The SPEAKER pro tempore. The Clerk will report the next one.

METALLIFEROUS MINERALS ON INDIAN RESERVATIONS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 12426) to authorize mining for metalliferous minerals on Indian reservations in the State of Arizona.

The title of the bill was read.

Mr. MANN. Mr. Speaker, I ask to have that bill go over.

The SPEAKER pro tempore. Without objection, it will be so ordered.

There was no objection.

The SPEAKER pro tempore. The Clerk will report the next one.

ENROLLED BILL SIGNED.

Mr. LAZARO, from the Committee on Enrolled bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 13765. An act to amend section 73 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, and for other purposes.

PUBLIC PARK, SALIDA, COLO.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 21) authorizing the city of Salida, Colo., to purchase certain public lands for public-park purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. LLOYD). Is there objection to the present consideration of this bill?

There was no objection.

The bill was read, as follows:

Be it enacted, etc., That the city of Salida, Chaffee County, Colo., is hereby authorized for a period of five years and after the passage of this act, to purchase, and the Secretary of the Interior is hereby directed to convey to said city for public-park purposes for the use and benefit of said city, the following-described lands or so much thereof as the said city may desire, to wit: All of section 16, township 49 north, range 9 east, New Mexico principal meridian, locally known as Castle Garden, containing 640 acres, more or less, and the south half of section 25, and the southeast quarter of section 26, township 51 north, range 8 east, New Mexico principal meridian, known as Box Canon, containing 480 acres, more or less.

SEC. 2. That the said conveyance shall be made of the said lands to the said city by the Secretary of the Interior upon the payment by said city for the said lands, or such portions thereof as they may select, at the rate of $1.25 per acre, and patent issued to said city for the said land selected to have and to hold for public-park purposes, subject to the existing laws and regulations concerning public parks, and that: *Provided*, The grant hereby made shall not include any lands which at the date of the issuance of patent shall be covered by a valid existing bona fide right or claim initiated under the laws of the United States: *Provided further*, That there shall be reserved to the United States all oil, coal, and other mineral deposits that may be found in the lands so granted, and all necessary use of the land for extracting the same: *And provided further*, That said city shall not have the right to sell or convey the land herein granted, or any part thereof, or to devote the same to any other purpose than as hereinbefore described; and that if the said land shall not be used as a public park, the same, or such parts thereof not so used, shall revert to the United States.

The SPEAKER pro tempore. This bill is on the Union Calendar.

Mr. TAYLOR of Colorado. Mr. Speaker, I ask unanimous consent to consider the bill in the House as in Committee of the Whole House on the state of the Union.

The SPEAKER pro tempore. Without objection it is so ordered.

The following committee amendment was read, considered, and agreed to:

Page 1, line 4, insert, after the word "years," the word "from."

The following committee amendment was read, considered, and agreed to:

Amend by striking out after the words "to wit," in line 9, on page 1, the following:

"All of section 16, township 49 north, range 9 east, New Mexico principal meridian, locally known as Castle Garden, containing 640 acres, more or less, and the."

The amendment was agreed to.

Mr. MANN. There are a number of committee amendments. We had better consider them altogether.

The SPEAKER pro tempore. The Clerk will report the committee amendments.

The following committee amendments were read, considered, and agreed to:

Page 2, line 2, before the word "south," insert the word "The."
Page 2, line 11, after the word "patent," insert the words "shall be."
Page 2, lines 12, 13, and 14, strike out the words "subject to the existing laws and regulations concerning public parks, and that."
Page 2, line 14, after the word *"Provided,"* insert the word "That."
Page 2, line 14, strike out the word "grant" and insert the word "conveyance."
Page 2, line 15, strike out the word "made" and insert "authorized."

The SPEAKER resumed the chair.

The bill as amended was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

On motion of Mr. TAYLOR of Colorado, a motion to reconsider the last vote was laid on the table.

MYTON, UTAH.

The next business on the Calendar for Unanimous Consent was the bill (S. 35) to authorize the Secretary of the Interior to issue patents for certain lands to the town of Myton, Utah.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized to issue patents to the town of Myton, Utah, for the following-described lands, as shown by the plats and records on file with the Commissioner of the General Land Office, for the use and benefit of the inhabitants of said town: The southwest quarter of the southwest quarter, section 19, township 3 south, range 1 west, to be used as the site of a pumping station; the south half of the northwest quarter section 30, township 3 south, range 1 west for cemetery purposes; the north half of the northwest quarter, section 30, township 3 south, range 1 west, Uinta base and meridian, to be used as a reservoir site, and for other purposes incidental thereto in the distribution of water to the inhabitants of said town; blocks 36 and 46 of town site of Myton, to be used and held for the benefit of the public schools of said town; all that portion of unsubdivided block 1 which lies west of the Duchesne River, to be used as a public common; and all those portions of blocks 1, 3, 4, 5, 7, 8, 9, and 10 which lie east and north of the Duchesne River, to be used as a public park: *Provided*, That if the said town shall at any time permit the said lands hereby granted to be used for any purposes not contemplated by this act the said lands shall revert to the United States.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, I should like to ask how many acres this bill proposes to convey, and how much they are to pay for it, if anybody happens to know.

The SPEAKER. Who is in charge of this bill?

Mr. MAYS. Mr. Speaker, this is a Senate bill reported out of the House Committee on the Public Lands. I suppose I may know as much about it as any member of the committee, and that is not a great deal. It was introduced by the Senator from Utah. What is it the gentleman from Illinois wishes to know?

Mr. MANN. I should like to know how much land it is proposed to convey, and how much they are to pay for it.

Mr. MAYS. I think the land is described in the bill. The southwest quarter of the southwest quarter would be 40 acres.

Mr. MANN. Oh, yes; I know about that, but I do not know how many acres there may be in block 36 and block 46.

Mr. MAYS. In these towns in Utah a block contains 10 acres.

Mr. MANN. How many acres are there in—

All those portions of blocks 1, 3, 4, 5, 7, 8, 9, and 10, which are east and north of the Duchesne River?

I think I am entitled to know how much land they contain, and certainly there is no indication in the description.

Mr. MAYS. The report does not add up the total number of acres.

Mr. MANN. I have discovered that.

Mr. MAYS. I do not know of any way to find out, except by adding up the number of blocks and the number of quarter sections.

Mr. MANN. My arithmetic is very good, and always was. That was my strong suit. I can tell the number of blocks, but I can not tell by arithmetic alone what portion of the blocks lie east and north of the Duchesne River.

Mr. MAYS. If the gentleman will multiply the number of blocks by 10 he will get the number of acres.

Mr. MANN. Oh, no; he will not. You see it provides for so much of certain blocks as lie east and north of the Duchesne River. It will take more than abstract arithmetic to tell how many acres there are in the parts of those blocks that lie east and north of the Duchesne River.

Mr. MAYS. It says—

All that portion of unsubdivided block 1 which lies west of the Duchesne River, to be used as a public common; and all those portions of blocks 1, 3, 4, 5, 7, 8, 9, and 10 which lie east and north of the Duchesne River, to be used as a public park.

Block 1 would have 10 acres in it, if it took it all. That portion of block 1 on the west side of the river, and that portion of block 1 on the east side of the river, taken together, would make 10 acres.

Mr. MANN. That accounts for block 1. But how about block 3? I assure the gentleman I have been over the report very carefully. There is absolutely nothing in the bill or the report that gives any indication of the number of acres which are to be conveyed. I think these people ought to pay a dollar and a quarter an acre for the land.

Mr. MAYS. I am willing that they should.

Mr. MANN. You can not tell anything about it. I think the bill had better go over until the gentleman can get from the Land Office the information which they ought to have furnished in the first place.

Mr. MAYS. The report of the Secretary of the Interior did not furnish that.

Mr. MANN. I understand that.

The SPEAKER. The gentleman from Illinois objects, and the bill goes over without prejudice. The Clerk will report the next bill.

Mr. MANN. I think there are some matters on the Speaker's table.

The SPEAKER. That is true.

ENLARGED HOMESTEADS.

Mr. TIMBERLAKE. Mr. Speaker, I ask the Chair to lay before the House H. R. 8654 with the Senate amendments.

The SPEAKER laid before the House the bill (H. R. 8654) to amend an act entitled "An act to provide for an enlarged homestead," approved February 19, 1909, by adding a new section to be known as section 7, with Senate amendments.

The Senate amendments were read.

The SPEAKER. The question is on concurring in the Senate amendments.

Mr. FERRIS. I want to offer an amendment to the Senate amendment. I assume that the gentleman is going to move to concur in the Senate amendment.

The Clerk read as follows:

Agree to the Senate amendment with an amendment as follows: Add at the end of the Senate amendment the following: "if the entryman is residing on his own original entry."

The SPEAKER. The question is on agreeing to the Senate amendment with the amendment offered by the gentleman from Oklahoma.

Mr. RAKER. Will not the gentleman from Oklahoma explain what this amendment does?

Mr. FERRIS. The House passed a bill providing for an additional homestead entry by living on it and cultivating it. The Senate struck out the part requiring residence, and this amendment modifies it to this extent, that they can only take the additional land where they are residing on the original homestead. In other words, they must reside on the original homestead before they can take the addition.

Mr. NORTON. If they are residing on the original homestead under the terms of the gentleman's amendment, residence would not be required, but if they were not residing on the original homestead, both residence and cultivation will be required.

Mr. FERRIS. Yes.

Mr. RAKER. Suppose a man still owns his original homestead and has his family in town going to school?

Mr. FERRIS. If he had abandoned it, if he had moved away——

Mr. RAKER. No; I am assuming that that is his regular place of residence, but he has moved temporarily to town to send his children to school.

Mr. FERRIS. That would be a temporary absence, and I do not think it would affect him.

The SPEAKER. The question is on agreeing to the Senate amendment with the amendment.

The question was taken, and the amendment with an amendment was agreed to.

PENSIONS.

Mr. RUSSELL of Missouri. Mr. Speaker, I ask unanimous consent to take the bill H. R. 13486 from the Speaker's table, disagree to the Senate amendments, and ask for a conference.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

H. R. 13486. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war.

The SPEAKER. The gentleman from Missouri asks unanimous consent to take this bill from the Speaker's desk, disagree to the Senate amendments, and ask for a conference. Is there objection?

There was no objection.

The SPEAKER appointed as conferees on the part of the House Mr. RUSSELL of Missouri, Mr. ASHBROOK, and Mr. FULLER.

Mr. RUSSELL of Missouri. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill H. R. 14484, disagree to the Senate amendments, and ask for a conference.

The Clerk read as follows:

H. R. 14484, granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war.

The SPEAKER. The gentleman from Missouri asks unanimous consent to take from the Speaker's table this bill, disagree to the Senate amendments, and ask for a conference. Is there objection?

There was no objection.

The Chair appointed as conferees on the part of the House Mr. RUSSELL of Missouri, Mr. ASHBROOK, and Mr. FULLER.

FORT NIOBRARA MILITARY RESERVATION, NEBR.

Mr. KINKAID. Mr. Speaker, I ask unanimous consent to take up House joint resolution 184 for consideration.

The SPEAKER. The gentleman from Nebraska asks unanimous consent to take up House joint resolution 184 at the present time. Is there objection?

There was no objection.

The Clerk read the joint resolution as follows:

Joint resolution (H. J. Res. 184) providing for one year's extension of time to make installment payments for the land of the former Fort Niobrara Military Reservation, Nebr.

Resolved, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to allow entrymen of lands of the former Fort Niobrara Military Reservation, Nebr., made under the act entitled "An act to subject lands of the former Fort Niobrara Military Reservation and other lands to homestead entry," approved January 27, 1913, as are required to be paid for at their appraised values, one year extension of time in which to make each of the two remaining unpaid installments of the purchase price.

The following committee amendments were read:

Amend the bill in line 4, after the word "of," by striking out the words "the certain" and insert in lieu thereof the word "such."

Line 9, after the word "thirteen," strike out the word "which" and insert in lieu thereof the word "as."

Line 11, strike out the word "extention" and insert in lieu thereof the word "extension."

Mr. KINKAID. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Nebraska asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

Mr. MANN. Mr. Speaker, I move to strike out the last word. They have made a very strong case for an extension of time for the payment of these installments, although I am of opinion that no extension of this sort should be granted without the payment of some rate of interest. Does not the gentleman from Oklahoma agree with me that where we extend the time for the payment of land to be paid for in installments that there ought to be some rate of interest?

Mr. FERRIS. They always have charged in my State on extensions, but this is an abandoned military reservation and in cases where they have sold land in my State it was Indian land.

Mr. MANN. Yes; that is where we felt it would be a gross injustice to the rightful owner of the property not to charge interest, but where it is Uncle Sam anybody has a right to rob him and nobody kicks. The fact is that no one will ever want to pay his debts, if he gets an extension without it, and why should they?

Mr. FERRIS. The only reason that I know of is that the interest would be a small item.

Mr. MANN. I do not believe that there is another man in the United States who could hornswoggle Congress into this as has the gentleman from Nebraska.

Mr. FERRIS. We are all familiar with the very persuasive ways of the gentleman from Nebraska.

Mr. MANN. He is as sweet to Congress as he would have been if married. [Laughter.]

Mr. KINKAID. I accept the sweet remarks, also with thanks, if there is no further objection. [Laughter.]

The committee amendments were agreed to.

The joint resolution as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. KINKAID, a motion to reconsider the vote whereby the joint resolution was passed was laid on the table.

LOAN OF TENTS TO KNIGHTS OF PYTHIAS.

Mr. BYRNS of Tennessee. Mr. Speaker, I ask unanimous consent to consider House joint resolution 78, No. 153 on the Calendar for Unanimous Consent.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to take up out of its order House joint resolution 78, authorizing the Secretary of War to loan certain tents, saddles, and bridles for the use of the national encampment, Knights of Pythias, to be held at Nashville, Tenn., in August, 1916. Is there objection?

Mr. BYRNS of Tennessee. Mr. Speaker, I will state to the House that this is in the nature of an emergency proposition.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

Resolved, etc., That the Secretary of War be, and he is hereby, authorized to loan, at his discretion, to the committee on tents of the national encampment, Knights of Pythias, to be held at Nashville, Tenn., in the month of August, 1916, 1,018 tents and 200 saddles and bridles: *Provided*, That no expense shall be caused the United States Government by the delivery and return of said property, the same to be delivered to said committee designated at such time prior to the holding of said encampment as may be agreed upon by the Secretary of War and Paul De Witt, chairman of the said committee on tents: *Provided further*, That the Secretary of War, before delivering said tents, shall take from said Paul De Witt a good and sufficient bond for the safe return of said property in good order and condition, and the whole without expense to the United States.

With the following committee amendment:

On page 2, line 2, after the word "tents" insert "saddles and bridles."

The SPEAKER. This is on the Union Calendar.

Mr. BYRNS of Tennessee. Mr. Speaker, I ask unanimous consent that it be considered in the House as in the Committee of the Whole.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The resolution as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. BYRNS of Tennessee, a motion to reconsider the vote by which the bill was passed was laid on the table.

ORDER OF BUSINESS.

Mr. MANN. Mr. Speaker, I do not see the gentleman from North Carolina [Mr. KITCHIN] present——

Mr. FERRIS. Mr. Speaker, I wish the gentleman would let me make a request for unanimous consent. Does the gentleman think that we ought to quit at this time?

Mr. MANN. I do not think we ought to bring up any other bills. I understand the Diplomatic and Consular appropriation bill is going to come up to-morrow. The gentleman from Virginia [Mr. FLOOD] is not on the floor at present, but I think he has that understanding. I was about to ask whether it would be agreeable to everyone to meet at 11 o'clock in the morning and to quit at 4 o'clock in the afternoon instead of meeting at noon and quitting at 5 o'clock, probably for this week only?

Mr. ASWELL. Mr. Speaker, is there any chance to continue the Unanimous Consent Calendar to-morrow?

Mr. MANN. I do not think there is to-morrow.

The SPEAKER. Not to-morrow.

Mr. MANN. But I think we can get through the Unanimous Consent Calendar, and I hope the Private Calendar for Unobjected Bills, this week or next week. By the way, there are quite a number of what we call bridge bills on the calendar which can be passed by unanimous consent without trouble. If we do not run through the Unanimous Consent Calendar by Thursday, I think we ought to pass these bridge bills by that time, and I hope that we can dispose of the Unanimous Consent Calendar soon. I suppose on Friday we are likely to take up the Private Calendar for Unobjected Bills and see if we can not run through it.

The SPEAKER. Does the gentleman make a request to meet at 11 o'clock?

Mr. MANN. Of course, a request of that kind properly comes from the other side, and I am merely suggesting that, hoping that somebody will make that request.

Mr. FERRIS. Of course, the House will understand that I am merely a small straw boss here this afternoon. I was left here merely to adjourn.

Mr. LLOYD. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow.

The SPEAKER. The gentleman from Illinois made the further suggestion that we stop at 4 o'clock.

Mr. MANN. Oh, that would be only an understanding.

The SPEAKER. The gentleman from Missouri asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow. Is there objection?

Mr. ASWELL. Mr. Speaker, reserving the right to object, I ask unanimous consent that the Unanimous Consent Calendar may be taken up on Thursday.

Mr. MANN. I hope that may be done, but I am sure the gentleman from North Carolina [Mr. KITCHIN] would not want an agreement of that kind made without consulting him.

Mr. FERRIS. I shall object for the present, as I do not think the gentleman from North Carolina would desire to have that taken up without his having been consulted.

Mr. MANN. As long as gentlemen on the other side will not permit me to go to Chicago this week and I have to stay here, though I really do want to go, I want to make it worth while and see if we can not get through some of these bills for the benefit of Members who have gone.

Mr. FERRIS. Mr. Speaker, I ask unanimous consent that on Thursday of this week, if there be no appropriation bill pending, no other matter pending, I be permitted to address the House for one hour on the state of the Union.

The SPEAKER. The gentleman from Oklahoma [Mr. FERRIS] asks unanimous consent that next Thursday after the reading of the Journal and clearing up the business on the Speaker's table, unless there is an appropriation bill or something of importance pending, he be allowed one hour to discuss the state of the Union. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, can not the gentleman come in to-morrow on general debate on the diplomatic bill?

Mr. FERRIS. I had in mind the suggestion of the gentleman. I have not had a chance to see the gentleman from Virginia [Mr. FLOOD] and I am really not quite ready with the remarks I intend to make. I want to submit to the House a kind of digest of the work here——

Mr. MANN. What does the gentleman think it is more important to do, to submit a digest of what we have done here, or to do the things we ought to do now?

Mr. FERRIS. Well, there is some question about that. I submit it for what it is worth.

Mr. MANN. Of course, if the gentleman wants an hour I might want 15 minutes to reply to him.

Mr. FERRIS. I certainly would not object, and I know the gentleman can do more in 15 minutes than I can in an hour.

Mr. MANN. I might want two hours.

Mr. JOHNSON of Washington. Mr. Speaker, reserving the right to object, is this the Thursday on which the gentleman from Oklahoma stated he could not agree we should go ahead with some of the business of the House?

Mr. FERRIS. If there is no important business——

Mr. JOHNSON of Washington. Does the gentleman include the Unanimous Consent Calendar?

Mr. FERRIS. If the House desires to take up the Unanimous Consent Calendar, I certainly would not occupy that time.

Mr. JOHNSON of Washington. There is a large amount of business here that has been waiting for months, when we have had no Unanimous Consent Calendar. It has been postponed and postponed, and when we have had that day to consider bills it has been largely occupied by bills from the Committee on the Public Lands. Mr. Speaker, I shall not object.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I think the gentleman can get in to-morrow. If he can not, we will try to work him in some way on Thursday; but I do not think at this time we should commence granting unanimous consent in this way. We can not give it to one and refuse it to another.

The SPEAKER. Is there objection?

Mr. MANN. I object.

Mr. LITTLEPAGE. Mr. Speaker, reserving the right to object——

The SPEAKER. The gentleman from Illinois objects.

ADJOURNMENT.

Mr. FERRIS. Mr. Speaker, I move that the House do now adjourn.

The SPEAKER. Is there objection to the House meeting at 11 o'clock to-morrow morning? [After a pause.] The Chair hears none. The question is on the motion of the gentleman from Oklahoma that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 48 minutes p. m.) the House adjourned to meet to-morrow, Tuesday, June 6, 1916, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the chairman of the Interstate Commerce Commission, transmitting report of the Chief of the Division of Safety concerning a test of the automatic train-control system of the Golloa Railway Signal Co. of America, Chicago, Ill., which was conducted by the commission's experts from August 10 to October 1, 1915, and from February 26 to March 31, 1916 (H. Doc. No. 1192); to the Committee on Interstate and Foreign Commerce and ordered to be printed.

2. A letter from the Secretary of War, inviting attention to the omission from the bill making appropriations for the support of the Army, fiscal year 1917, of a provision making Signal Corps appropriations available for the purchase of motorcycles and motor-driven vehicles used for technical purposes (H. Doc. No. 1193); to the Committee on Military Affairs and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. SHALLENBERGER, from the Committee on Military Affairs, to which was referred the bill (H. R. 12545) granting to the Portland, Vancouver & Northern Railway Co. a license to cross the Vancouver Barracks Military Reservation at Vancouver, Wash., reported the same with amendment, accompanied by a report (No. 799), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. JOHNSON of Kentucky, from the Committee on the District of Columbia, to which was referred the bill (H. R. 15282) authorizing the health officer of the District of Columbia to issue a permit for the removal of the remains of the late Charles H. Bingham from the Congressional Cemetery, District of Columbia, to Lock Haven, Pa., reported the same without amendment, accompanied by a report (No. 800), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and a resolution were introduced and severally referred as follows:

By Mr. TREADWAY: A bill (H. R. 16254) authorizing the Secretary of War to donate to the town of Lanesboro, Berkshire County, Mass., one bronze or brass cannon or fieldpiece; to the Committee on Military Affairs.

By Mr. SMITH of Michigan: A bill (H. R. 16255) to provide for the daily free delivery of rural mail and parcel-post matter to every rural home at least once each day where the houses are not more than 1 mile apart on a main traveled highway; to the Committee on the Post Office and Post Roads.

By Mr. BAILEY: A bill (H. R. 16256) to authorize the Committee on Ways and Means of the House of Representatives and the Finance Committee of the Senate to collect facts and statistics for the use of said committees, and for other purposes; to the Committee on Ways and Means.

By Mr. JOHNSON of Kentucky: A resolution (H. Res. 256) authorizing Committee on the District of Columbia, or the subcommittee thereof, to sit during sessions of Sixty-fourth Congress or during the recesses between the sessions of said Congress; to the Committee on Accounts.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. SMITH of New York: A bill (H. R. 16253) authorizing the Commissioner of Navigation to document as a vessel

of the United States a dredge built of American material and owned by the Perry-Victoria Sand Co., a citizen of the United States; to the Committee on the Merchant Marine and Fisheries.

By Mr. ADAIR: A bill (H. R. 16257) granting a pension to Frank M. Twigg; to the Committee on Pensions.

By Mr. BARNHART: A bill (H. R. 16258) granting a pension to Hiram Davis; to the Committee on Invalid Pensions.

By Mr. BEALES: A bill (H. R. 16259) granting a pension to James M. Danner; to the Committee on Invalid Pensions.

By Mr. CAMPBELL: A bill (H. R. 16260) granting a pension to Alexander Gross; to the Committee on Invalid Pensions.

By Mr. CRAGO: A bill (H. R. 16261) for the relief of Andrew Ohler; to the Committee on Military Affairs.

By Mr. DILLON: A bill (H. R. 16262) granting a pension to Henry F. Walton; to the Committee on Invalid Pensions.

By Mr. DUPRÉ: A bill (H. R. 16263) for the relief of the heirs of Isabella Ann Fluker; to the Committee on War Claims.

By Mr. FERRIS: A bill (H. R. 16264) granting a pension to Julius M. Deal; to the Committee on Pensions.

Also, a bill (H. R. 16265) granting a pension to James M. Conner; to the Committee on Pensions.

Also, a bill (H. R. 16266) granting a pension to Pearl B. McDonald; to the Committee on Pensions.

By Mr. GOODWIN of Arkansas: A bill (H. R. 16267) granting a pension to A. J. Pope; to the Committee on Pensions.

By Mr. GOULD: A bill (H. R. 16268) for the relief of Uriel D. Belles; to the Committee on Military Affairs.

By Mr. HOLLINGSWORTH: A bill (H. R. 16269) granting an increase of pension to Benjamin R. Buffington; to the Committee on Invalid Pensions.

By Mr. HOUSTON: A bill (H. R. 16270) granting an increase of pension to John H. Foutch; to the Committee on Invalid Pensions.

By Mr. KENNEDY of Iowa: A bill (H. R. 16271) granting a pension to Christena Wentworth; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16272) granting an increase of pension to William H. Coulter; to the Committee on Invalid Pensions.

By Mr. KENNEDY of Rhode Island: A bill (H. R. 16273) granting an increase of pension to George H. Cheek; to the Committee on Invalid Pensions.

By Mr. NORTH: A bill (H. R. 16274) granting a pension to Thomas M. Hoover; to the Committee on Pensions.

By Mr. RUBEY: A bill (H. R. 16275) granting an increase of pension to Elijah W. Sorber; to the Committee on Invalid Pensions.

By Mr. STEPHENS of California: A bill (H. R. 16276) to authorize the appointment of John Faraday James to the grade of lieutenant in the Army; to the Committee on Military Affairs.

By Mr. TAGGART: A bill (H. R. 16277) granting an increase of pension to Mary E. Hottenstein; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16278) granting an increase of pension to Marstein Forward; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16279) granting an increase of pension to Mary W. Dagley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16280) granting a pension to Sarah A. Day; to the Committee on Invalid Pensions.

By Mr. THOMPSON: A bill (H. R. 16281) granting an increase of pension to Abner D. Bell; to the Committee on Pensions.

By Mr. TINKHAM: A bill (H. R. 16282) granting a pension to Agnes K. Hedman; to the Committee on Pensions.

By Mr. TREADWAY: A bill (H. R. 16283) granting a pension to Charles A. Smead; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. BEAKES: Petition of John Ferris and 38 citizens of Riga, Mich., and Town Line Sunday School of Whiteford, Mich., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of F. P. Goodwyn and 17 others, of Albion; R. T. Davis and 56 others, of Adrian, both in the State of Michigan, against abridgment of the freedom of the press; to the Committee on the Post Office and Post Roads.

By Mr. CAREW: Petition of the National Automobile Chamber of Commerce, against bills to abolish Taylor system in Government shops; to the Committee on Labor.

By Mr. CASEY: Memorial of the Woman's Christian Temperance Union and Second Welsh Congregational Church, of Wilkes-Barre, Pa., favoring national prohibition; to the Committee on the Judiciary.

By Mr. DALE of New York: Memorial of women voters of Maricopa County, Ariz., and M. Davis, of Philadelphia, Pa., relative to woman suffrage amendment; to the Committee on the Judiciary.

By Mr. DOOLING: Memorial of the Chamber of Commerce of the State of New York, against Philippine independence; to the Committee on Insular Affairs.

By Mr. EAGAN: Petition of the Maritime Law Association of the United States, relative to safety of life at sea; to the Committee on the Merchant Marine and Fisheries.

Also, petition of Atlanta (Ga.) Typographical Union, No. 48, favoring bills relative to wages, etc., on Panama Canal; to the Committee on Appropriations.

By Mr. FULLER: Petition of M. Engel, of Marseilles; H. H. Wagner, of De Dalb; Murdoc & Farmes, of Clinton, and P. W. Pyler, of Winnebago, all in the State of Illinois, protesting against the Stevens-Ashurst price-maintenance bill; to the Committee on Interstate and Foreign Commerce.

By Mr. GOODWIN of Arkansas: Paper to accompany House bill granting a pension to Duval Johnson; to the Committee on Pensions.

By Mr. NOLAN: Memorial of San Diego (Cal.) Tent, No. 26, Knights of the Maccabees, favoring passage of Penrose-Griffin indefinite leave of absence bill for postal employees; to the Committee on the Post Office and Post Roads.

Also, petition of F. E. Barton and 19 others, of San Francisco, Cal., favoring eight hours a day for telegraph operators; to the Committee on Interstate and Foreign Commerce.

By Mr. STEPHENS of Texas: Petitions of sundry merchants of Spur, Tex., against passage of the Stephens-Ashurst bill; to the Committee on Interstate and Foreign Commerce.

HOUSE OF REPRESENTATIVES.

TUESDAY, *June 6, 1916.*

The House met at 11 o'clock a. m.

The Rev. Clarence A. Vincent, D. D., pastor of Mount Pleasant Congregational Church, Washington, D. C., offered the following prayer:

Eternal God, our Father, we praise Thee for that love and grace that have enriched and strengthened the life of every one of us and of the Nation. We ask for that help that shall guide us in our thinking, comfort us in our trials, keep alive in us our visions and ideals, and help us always to live and when necessary to sacrifice for the public weal; in Jesus' name. Amen.

The Journal of the proceedings of yesterday was read and approved.

UNANIMOUS CONSENT CALENDAR.

Mr. ADAMSON. Mr. Speaker, I want to make a request or suggestion touching the procedure. Yesterday the gentleman from Illinois [Mr. MANN] secured an agreement that bills which were objected to when called yesterday should remain on the calendar without prejudice. I wish to request that, in the event the Unanimous Consent Calendar is called again this week, the same agreement apply to the extended call.

The SPEAKER. The gentleman from Georgia [Mr. ADAMSON] asks unanimous consent that if the Unanimous Consent Calendar is called again this week the same agreement that was made yesterday as to bills to which objection was made going over shall prevail. Is there objection? [After a pause.] The Chair hears none.

DIPLOMATIC AND CONSULAR SERVICE.

Mr. FLOOD. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 13383, the Diplomatic and Consular appropriation bill; and pending that, Mr. Speaker, my friend from Wisconsin [Mr. COOPER], the ranking member of the committee, not being here, I would like to make an arrangement with the gentleman from Massachusetts [Mr. ROGERS] as to time for general debate.

Mr. ROGERS. Mr. Speaker, I think there will be very little time desired on this side. I suggest that the time run for a little while.

Mr. FLOOD. I will say to the gentleman that I talked with the gentleman from Wisconsin [Mr. COOPER] yesterday, and he suggested 45 minutes on his side.

Mr. ROGERS. There is one more speaker on this side, and I do not know exactly how much time he will require. I think there will probably be not over an hour and a half at the outside, and we may save time in the end if we do not attempt to fix the limit of the debate now.

Mr. FLOOD. I suggest that we fix it at an hour on a side, and I can give the gentleman some time if he has not sufficient.

Mr. MANN. Oh, let it run. I think we can pass this bill to-day.

Mr. FLOOD. I can give you time in addition to what the gentleman from Massachusetts can give you.

Mr. MANN. If we let it run, I do not think there will be any extra time consumed.

The SPEAKER. The gentleman from Virginia [Mr. FLOOD] moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the Diplomatic and Consular appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 13383, with Mr. MOON in the chair.

The CHAIRMAN. The House is in the Committee of the Whole House on the state of the Union for the consideration of the bill the title of which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 13383) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1917.

Mr. FLOOD. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. FLOOD. Mr. Chairman, I desire to make a brief statement in reference to this bill. The Diplomatic and Consular appropriation bill this year carries a total appropriation of $5,483,246.66. For 1916 it appropriated $4,061,280.01. The net increase in the present bill over the bill for the year ending June 30, 1916, is $1,421,966.65. This is a very considerable increase, but the committee believed that every item provided for here is fully justified and should be passed by the House.

Of this $1,421,966.65 increase, the larger item consists of appropriations for legation and consular buildings amounting to $555,000. There was no appropriation of this character authorized in the bill of last year, so that this $555,000 is an entirely new item.

We also have an appropriation in this bill of $250,000, the annual payment to Panama which heretofore has been carried in the urgent deficiency bill. Under our treaty with Panama, by which we acquired the right to construct the Panama Canal, we agreed that nine years after the signing of the treaty we would pay Panama $250,000 per year. These payments have been made since they became due but were not carried in this act. This year the State Department estimated for it to be carried in this bill, which is the place where it belongs. This is an obligation we acquired by treaty and is a part of the payment for our right to construct the Panama Canal.

The emergency fund has been increased this year by $125,000. In the last bill the amount carried for this fund was $75,000 and in this bill it is $200,000. This is for emergencies arising in the Diplomatic and Consular Service, and is known as the emergency fund. It is used for the purpose of meeting unforeseen emergencies arising in the Diplomatic and Consular Service, to extend the commerce of the United States and meet the necessary expenses attendant upon the execution of the neutrality act.

The need for ample funds for emergencies and confidential purposes is obviously greater to-day than at almost any time in our history, and the committee felt that the President and Secretary of State should not be left unprovided with ample funds to meet emergencies that under the present situation might arise any time. The committee therefore provided for what the department asked for.

There is also an entirely new item of $100,000 carried in this bill known as "Post allowances for the Consular Service." This is to enable the President to make allowances for consuls who are living in countries where, owing to the war, the cost of living has very greatly increased. After the war began there was a rise in prices in all parts of the world, and particularly in those countries where the war was being fought. The prices became higher for foodstuffs, for clothing, and for rents, and it was almost impossible in some countries for consuls to properly perform their duties on the salaries they were getting. This fund will be used under the direction of the State Department and only where the department is satisfied that owing to extraordinary conditions some additional allowances should be made to the consuls.

There is also an increase of $132,000 for "Contingent expenses, United States consulates." This is necessary in order to provide the consulates with the proper furniture and filing systems. We have been making such meager appropriations for these in the past that very little has been accomplished in this direction. The department has a standard index and filing system that applies throughout the Consular and Diplomatic Services, and in order to continue that and make it possible for an officer at any post to begin work immediately on arrival there and to do his work efficiently, it is essential to keep this system up to date and in good order. The department thought, and the committee agreed with it, that this increase was a wise one. In a normal year, 1914, for instance, the Consular Service paid back to the Treasury in cash received from fees every dollar appropriated for it except about $43,000.

These increases make $1,052,000, leaving the rest of the increases somewhere between $300,000 and $400,000, which I will discuss in detail as the bill is read, if anyone desires information in reference to them.

While the increase in this bill is quite large, the committee believes that under the existing world-wide conditions it is a very moderate increase, and is as little as ought to be provided for our Diplomatic and Consular Services.

Mr. Chairman, I reserve the balance of my time.

Mr. ROGERS rose.

The CHAIRMAN. The gentleman from Massachusetts is recognized.

Mr. FLOOD. I will say to the gentleman from Wisconsin [Mr. COOPER] that when he was temporarily out we did not agree to any limit on debate.

Mr. COOPER of Wisconsin. The reason I was not in the Chamber when the session began this morning was that I thought we would begin at 12 o'clock. I see no reason why we should begin at 11 o'clock with such a small attendance present.

Mr. FLOOD. When the House adjourned last evening it was agreed to meet to-day at 11 o'clock.

Mr. COOPER of Wisconsin. Yes. I was misinformed.

Mr. FLOOD. Will the gentleman from Wisconsin yield some time now?

Mr. ROGERS. Mr. Chairman, I ask for recognition.

The CHAIRMAN. The gentleman from Massachusetts is recognized for one hour.

Mr. ROGERS. Mr. Chairman, the direct influence of the European war extends to every quarter of the earth's surface and immediately and vitally affects almost every form of human endeavor and activity. It is not surprising that this influence is felt to a peculiar and unusual degree by the State Department.

EFFECT OF WAR ON STATE DEPARTMENT.

The Department of State is the department of the Federal Government upon which existing domestic and foreign conditions bear most heavily. It is the department which speaks for the entire United States in the relations of this country with foreign nations, whether the subject concerned is the protection of national or individual rights or the safeguarding and advancing of our foreign trade. Even under normal conditions the intelligence and efficiency with which the Department of State is administered are vitally important to the welfare of the country and to its commercial interests; but the great European war has precipitated an unprecedented condition which makes it of supreme importance that the department should be well administered and adequately maintained if it is to accomplish all that may, under existing conditions, rightfully be expected from it. The United States, through the Department of State and the diplomatic and consular officers subordinate to it, is at present in charge of the interests of 23 nations, in various parts of the world, including the interests of the principal nations engaged in the war. The discharge of the duty thus imposed involves not only exercising our good offices in behalf of individuals or property interests of the nations so represented and acting as a medium of communication with enemy governments, but also the inspection of prison camps and the distribution of millions of dollars in relief to prisoners of war and detained civilians of the belligerent Governments. While some of the work described is temporary and will cease with the close of the war, new duties will then arise of much concern to our manifold trade and commercial interests. With the outbreak of the war in 1914 many treaties and commercial arrangements between Governments ceased to exist. Conditions under which foreign trade was carried on have changed. When the war is over the entire question of foreign trade will have to be studied de novo and new treaties and trade agreements negotiated. The negotiations embracing these questions will devolve upon the Department of State. Furthermore, the interference with American commerce and individual rights in belligerent countries and in Mexico is resulting in the filing by American citizens of hundreds of claims for redress, all of which must be examined, and, if approved, presented to the foreign Government concerned for payment. This problem alone will involve a vast amount of legal and clerical work.

WAR CONDITIONS ENTAIL LARGE EXPENDITURES IN STATE DEPARTMENT.

In the light of this recitation, then, it was not surprising that last year the Diplomatic and Consular act was the largest in

our history—$4,061,280—nor is it surprising that the bill now under discussion exceeds even the large bill of last year by nearly a million and a half of dollars, carrying $5,483,246. For the reasons stated it can not confidently be expected that our future Diplomatic and Consular bills will shrink to the standards prevailing during the years prior to the European war. The appropriations carried by the present bill are, comparatively speaking, at least, large. Yet in my judgment they are not too large, considering the magnitude and variety of the benefits to result from a farsighted administration of the Department of State. The report accompanying the bill states (pp. 2 and 3):

The committee has made every effort to keep the total appropriations carried by the bill within the bounds of reasonable economy; and while some of the increases for the Diplomatic and Consular Service are apparently considerable, the committee deems them wise and necessary. The continuance of the European war has devolved upon our entire Diplomatic Service a vast amount of labor as well as unavoidable expense, and if the efficiency of the service is to be maintained, the additional appropriations asked for are imperative.

I believe the foregoing statement to be warranted and entirely accurate.

OUR CONSULAR SERVICE.

The general public has little detailed knowledge of what our Consular Service is and what it does. It knows in a general way that United States consuls are sent out by the State Department to important trade centers in foreign countries primarily in the commercial interests of the United States and its citizens. Beyond this the average man has little occasion to inquire and does not inform himself.

It is my purpose in this discussion to make available some facts about our Consular Service which I think are not generally understood or appreciated, but of which it seems to me desirable that there should be more general knowledge. In the course of my remarks I shall consider especially some of the respects in which our Consular Service fails fully to meet its largest opportunities and to accomplish its highest measure of usefulness. In saying this, however, I do not mean to be understood as even suggesting that our service to-day is inefficient or backward; on the contrary, I believe it to be remarkably efficient and progressive.

OPINION OF OUR CONSULAR SERVICE IN EUROPE.

It is always of interest to notice how we are appraised by our neighbors and especially by our rivals. Last March the chambers of commerce of the United Kingdom, which assembled for the purpose of devising ways and means of improving British commercial interests, discussed the efficiency of our Consular Service. President Sterling, of the Belfast delegation, who is one of the largest linen producers in Great Britain, said that whenever he required exact technical details concerning linen, Belfast's chief industry, he was obliged to seek it in the American consular reports, which contained better information concerning linen than the British Government or the Belfast trade possessed.

Mr. Sterling was followed by Col. Herbert Hughes, C. B., C. M. G., president of the Sheffield Chamber of Commerce, representing one of the great steel industries, who said that the Sheffield manufacturers had found it imperative to know the sources and distribution throughout the world of wolfram ore, from which tungsten is made, and that after unsuccessfully searching all available British data the trade statistics compiled from the reports of American consular officers were examined, and there he found where wolfram was produced, the quality, the state of the industry, and the amount likely to be available. Partly as a result of that information, he said, the manufacture of tungsten powder was undertaken in England and has proven a great success; he predicted that the beginning thus made will destroy the monopoly enjoyed by the German Empire prior to the war. This material is essential in the production of certain necessary war supplies and the present extensive branch of this large war industry was entirely the result of our American consular reports.

NEEDS OF THE CONSULAR SERVICE.

My suggestions as to various respects in which the Consular Service is capable of improvement will not, I repeat, be a criticism of a system of little worth, but an effort to bring to the attention of the public specific possibilities for improving an efficient and well-managed machine.

In fairness to the State Department it should here be pointed out that the department is entirely conscious of such weaknesses as still inhere in the Consular Service, and during recent years has made persistent and faithful efforts to eradicate them. In so far as it has failed, the failure has been largely due either to insufficient appropriations given it by Congress or to the shortcomings or unwisdom of existing legislation.

RECENT IMPROVEMENTS IN THE CONSULAR SERVICE.

Since 1905 all the efforts of the State Department to improve the Consular Service have been consistently toward the accomplishment of the following results:

1. The elimination of all personal profit on the part of consuls general, consuls, and clerks from the performance of their duties and the placing of them upon fixed annual compensation paid by the Government.

2. The classification of all consulates general and consulates in such manner as to make possible the promotion of officers for efficient service from the lower grades gradually upward to the higher grades.

3. The graduation of salaries in accordance with the importance of the various posts.

4. The systematic and intelligent inspection of all consular offices by experienced officers chosen from the service.

5. The stimulation of officers in the performance of their duties by keeping a careful record of their efficiency and conduct.

6. The gradual improvement of the physical condition and equipment of consular offices by providing more commodious and better-situated quarters, American-made office furniture, typewriters, telephones, and other miscellaneous equipment.

7. The gradual Americanization of the clerical force of the consular offices by substituting young Americans as clerks wherever means and conditions permit.

8. The improvement of the personnel by requiring all candidates for appointment as consul to pass a comprehensive examination to determine their educational and personal qualifications for consular work, including their knowledge of at least one foreign language, the commercial resources of the United States, political economy, commercial geography, and international, commercial, and maritime law.

9. The gradual elimination of useless offices and inefficient officers.

All the foregoing objects have been accomplished, but there still remain many other things to be done if our Consular Service is to be developed to the highest modern standard of efficiency. Before undertaking to point out the principal needs of the service at the present time, it may be profitable to indicate the characteristics of a modern and efficient Consular Service.

REQUIREMENTS OF AN EFFICIENT CONSULAR SERVICE TO-DAY.

Throughout the world the consul is recognized as the local representative of the commercial interests of his Government and people quite apart from the multitude of other duties that he is called upon to perform. Regardless of any other governmental agencies that may be at work in a foreign country or district, it is the consul who is in a position to make systematic and continuous investigations to obtain information through personal channels when official sources are no longer open, to exert an effective influence in behalf of his country's trade interests through the acquaintance and confidence gained through long intercourse with the people. In view of these considerations the consuls general, consuls, and vice consuls should be Americans of the best type; they should have made a study of economics and commercial and industrial development, as well as of the special subjects which constitute a large part of the routine consular work. They should speak and write the languages of the countries to which they are sent, and they should have such mental training as will enable them to make accurate and intelligent investigation of commercial, economic, and industrial developments, and be able to report the result of their investigations in a manner to be of practical value to business men in America interested in foreign trade or in the development of American industries. The personal characteristics of a really efficient consul should be such as to enable him to take an honorable place among the people of the district to which he is sent. He should possess tact and resourcefulness and have a practical habit of thought. We take great pains to ascertain the personal and mental and physical charcteristics of the men who officer our Army and Navy, and there is quite as much reason for similar care in relation to the men who guard and promote our commercial interests in foreign countries.

We have perhaps now reached a point where, with the foregoing as a setting, we can advantageously consider the present shortcomings, or, to put it in another way, the needs of the service, if its utmost fruitfulness is to be realized.

1. AMERICANIZATION.

First in importance of the needed reforms is, in my judgment, the complete Americanization of our Consular Service; that is, that every consul general, consul, vice consul, and consular agent of the United States shall be a native-born or naturalized American citizen. Every consul general and consul is to-day, I believe, an American citizen; yet there is no statutory requirement that

such should be the case. The possibility that a person not an American citizen should be a consul general or a consul should be eliminated by law, and when the proper place in the detailed consideration of this bill is reached I propose to offer an amendment to accomplish this purpose.

As to vice consuls, a most astounding situation exists. Out of 243 American vice consuls, 84—over one-third—are foreigners. The Committee on Foreign Affairs has this year for the first time inserted a provision to do away with this indefensible practice. This provision is added as a limitation to the item appropriating salaries for the Consular Service, and reads as follows:

No portion of this sum shall be paid as compensation to vice consuls who are not American citizens: *Provided*, That if in any case the Secretary of State deems it impracticable immediately to secure a competent vice consul who is an American citizen, he may appoint or retain as vice consul and compensate from this fund a person not an American citizen until such time as he is able to designate a competent American citizen for such post.

As to consular agents, the proportion is even less creditable. Out of 189 consular agents, 97—over one-half—are foreigners. The remedy in the case of consular agents, however, is not so clear and simple as in the case of vice consuls, and I shall take up later in my remarks the most feasible solution to bring about the Americanization of our consular agents.

The demand for the Americanization of our Consular Service is no new thing; it even antedates the Constitution of the United States. To show the thought in this direction of our best statesmen, it may be worth while to incorporate some of the many recommendations upon this subject, which appear frequently in the pages of our history.

The first reference which I find is embodied in a report made to the President of the Continental Congress only two years after the signing of the Declaration of Independence. At that time the infant Nation was represented in Europe by three of its ablest citizens—Benjamin Franklin, Arthur Lee, and John Adams. In a report, signed by the commissioners, dated July 20, 1778, and addressed to the President of Congress, appears the following language:

If Congress should think proper to appoint consuls, we are humbly of opinion that the choice will fall most justly, as well as naturally, on Americans, who are, in our opinion, better qualified for this business than any others.

In a report signed by John Adams, dated June 29, 1780, to the President of Congress appears the following recommendation:

I would therefore beg leave to propose to appoint a consul without loss of time to reside at Nantes, and to him consign all vessels from the United States. I think it should be an American. * * * There are many applications from French gentlemen. But I think that from a want of knowledge of our language, our laws, customs, and even the humors of our people, for even these must be considered, they never would be able to give satisfaction or to do justice. Besides, if it is an honor, a profit, or only an opportunity to travel and see the world for improvement, I think the native Americans have a right to expect it; and further, that the public have a right to expect that whatever advantages are honestly to be made in this way should return some time or other to America, together with the knowledge and experience gained at the same time.

Presumably acting upon these and other recommendations, Congress itself, on March 16, 1784, passed the following resolution:

That it is inconsistent with the interest of the United States to appoint any person not a citizen thereof to the office of minister, chargé d'affaires, consul, vice consul, or to any other civil department in a foreign country.

In 1791 Thomas Jefferson, then Secretary of State, wrote to one of our consuls as follows:

With respect to your inquiries on the subject of consuls, vice consuls, and agents, you will observe that the system of the United States is different from that of other nations. We appoint only native citizens consuls. Where a port is important enough to merit a consular appointment, if there is a deserving native there, he is named consul; if none, we name a merchant of the place vice consul, notifying him that whenever a citizen settles there he will be named consul.

And in 1819 John Quincy Adams, then Secretary of State, wrote to an American consul:

It has been the general and almost invariable rule of this Government to appoint in preference a native American citizen to every consular office abroad; when a person bearing that character, suitably qualified for the office, was also desirous of obtaining it.

In Hunt's Magazine for March, 1846, appears an interesting article upon the Consular Service by the United States consul at Genoa. In the course of it he says:

Another evil, and perhaps a greater one still in our present consular system, is the appointment of foreigners to office. Gen. Jackson introduced a reform in this matter, Mr. Van Buren prosecuted it, and Mr. Tyler has done more than all our former Presidents put together; but still a very large number of our consuls are foreigners. I do think it requires no argument to prove that no foreigner, under any circumstances, should ever hold an office under our Government. By a foreigner, I mean a man who owes allegiance to a foreign Government. Set a wolf to watch the fold, but in God's name don't commit republicanism to the keeping of foreigners. Whoever heard of Great Britain asking a foreigner to hold an office for her? John Bull ask another dog to watch his fold? Not he! This is one of the good things of the exclusiveness and pride of England; this is the spirit which has brought her to the top of the world; and what is her consular system? In the most distant port of the most barbarous nation, where no American would accept the office of a consul, the English send an intelligent, experienced man, and maintain him, too, with a handsome salary, and he is backed by all the authority of the Government. This is one of the reasons why that tremendous power is so universally dreaded. She is everywhere present, and no man or nation can tread upon the folds of her mantle without finding cause to repent of it afterwards.

In 1846 James Buchanan, then Secretary of State, wrote:

From the nature, variety, and importance of consular duties, and their bearing on the commercial interests of nations, consuls ought always to be citizens of the country which they represent. The President, at an early period of his administration, had this subject under consideration, and determined to appoint no consuls who were not American citizens, and, indeed, several consuls have been removed because they did not possess this qualification.

In 1873 Assistant Secretary of State Hunter wrote:

As a general rule, it is preferable that United States citizens only should be appointed to all consular offices.

By the act of August 18, 1856, diplomatic officers and principal consular officers were required to be citizens of the United States. The Revised Statutes, which became law June 20, 1874, do not incorporate this requirement and contain no prohibition of payment to consuls who are not American citizens. As the law stands to-day, therefore, it is legally possible to commission as a consul one who is not a citizen of the United States. As I previously stated, the prohibition of 1856 should unquestionably be reenacted. By the act, approved April 5, 1906, it is provided that—

No person who is not an American citizen shall be appointed hereafter in any consulate general or consulate to any clerical position the salary of which is $1,000 a year or more.

Strangely enough, therefore, our law permits non-American principal officers while emphatically excluding subordinate clerks who receive a salary of $1,000 or more. As a result of the act of 1906, there are to-day only 11 non-American clerks—the service of all 11 antedating 1906—who receive a salary of $1,000 a year or over.

Quotations upon this subject covering almost every year of our history might be multiplied to show the universal sentiment. Enough has been said, however, to indicate the importance with which the question has been regarded.

The most recent action which I have seen was in the form of a referendum conducted last winter by the United States Chamber of Commerce. A special committee of that body was appointed to consider desirable reforms in our Consular Service, and among other things it recommended in its report complete Americanization. The committee said:

The committee can not conceive of an argument against the position that those promoting the commercial interests of the United States should be American citizens. It is clearly inconsistent to employ natives of a foreign country, whose sense of nationality and loyalty will lead them to prefer the interests of that country over those of the United States.

The report of the committee was submitted to the constituent members of the chamber of commerce, and the result of the referendum shows a vote of 877 to 8 indorsing the report of the committee.

This subject is engaging the attention of other Governments at this time. The same meeting of the British Chamber of Commerce, to which I have previously referred, adopted a resolution for the reorganization of the British Consular Service with British-born consuls. One of the delegates asserted that during the competition for trade between Great Britain and Germany, preceding the war, 44 British consuls were Germans.

The situation is much the same in Holland. Dissatisfaction among many commercial bodies in Holland with the Dutch system of foreign representation has led to a general advocacy of reforms, whereby foreign consuls shall be paid officials. Of the total of 730 representatives of the Netherlands abroad only about 80, mostly diplomats, are paid officials. Of the remaining 630 honorary consuls only 129 are Dutchmen, and there are nearly 400 who can not even correspond in the Dutch language. The Government is being urged particularly at this time to see that commercial interests are well represented abroad, in order that Dutch manufacturers, traders, and shipowners may be kept well informed on the needs and opportunities of foreign countries after peace is declared.

Mr. BORLAND. Mr. Chairman, will the gentleman permit me to interrupt him there?

Mr. ROGERS. Yes; I will yield to the gentleman from Missouri.

Mr. BORLAND. How many consuls are there now in the service who are not American citizens?

Mr. ROGERS. There are no consuls who are not American citizens. There are no consuls general who are not American citizens. But I will say to the gentleman that there is no provision of law which requires them to be American citizens, and

one of the amendments which I propose to offer to this bill will put actually on the statute books the requirement that all consuls and consuls general shall necessarily be American citizens.

Mr. BORLAND. I think I am right in this position, that up to about six or seven years ago there were many consuls, or at least some consuls, that were not American citizens. But since the plan has been strictly enforced of these consular examinations and consular promotions we have gradually supplanted them all with Americans, so that to-day we have a complete set of American citizens.

Mr. ROGERS. To-day we have undoubtedly American consuls and consuls general only. I think the gentleman is mistaken, however, in saying that that situation is of recent origin. I think that foreign consuls and consuls general have for many years been the exception and not the rule. From 1856 down to 1874, when the Revised Statutes were compiled, it was the law of the United States that consuls general and consuls must be American citizens, but in the codification that provision was eliminated.

Mr. BORLAND. Now let me ask the gentleman in that connection: My information is that a good many of the consular clerks are not Americans. Is that true?

Mr. ROGERS. As the result of the act of 1906, which I have read, there are still about a dozen clerks receiving salaries of $1,000 a year or more who have continued over from the period prior to the enactment of the statute, and who have been retained because they were competent, and because it did not seem fair to dismiss them; but every new appointment at a salary of a thousand dollars a year or more has been and is an American citizen.

Mr. BORLAND. Then, of course, there are some whose salaries are less than $1,000 who are not American citizens.

Mr. ROGERS. I think probably the majority of clerks whose salaries are less than a thousand dollars a year, and who hence are not covered by the section which I have read, are not American citizens.

Mr. BORLAND. As the gentleman knows, it is almost impossible to get a young man in this country who is qualified to take that kind of a clerkship, to go to some foreign capital and work for less than a thousand dollars a year. We can not get them to go, and ordinarily we can not find them there.

Mr. ROGERS. That is true. My insistence that our Consular Service be Americanized does not go to the minor clerical positions, for that reason. I think you must be reasonable and businesslike about a thing of this sort, as well as about everything else, if you can; and while I think every position of responsibility in our Consular Service should be filled by an American citizen, I do not think that at present at least it is practicable even to attempt to Americanize the lower-paid consular clerks.

Mr. BORLAND. What is the gentleman's insistence at this time—that we have a definite law limiting consuls and consuls general to American citizens?

Mr. ROGERS. I was just reaching that point in my discussion when the gentleman asked the question.

Mr. CARY. By "clerk" does the gentleman mean "vice consul"?

Mr. ROGERS. No; a "clerk" may or may not be a "vice consul." A vice consul is oftentimes appointed from the ranks of the clerks in a certain post. Does that answer the question of the gentleman from Wisconsin?

Mr. CARY. They are all Americans, are they not?

Mr. ROGERS. If they receive over $1,000 a year; all except 11 are Americans under the law of 1906.

The question of Americanization resolves itself into three classes, I think. In the first place, as to consuls general and consuls, it involves Americanization by law as distinguished from Americanization by custom. There is not a single foreigner, so far as I know, who is to-day serving either as consul general or as consul; but there is no legal requirement that such should be the fact. In my judgment, there should be no objection to reenacting the state of the law as it existed from 1856 to 1874, prohibiting in terms the appointment of any foreigner as an American consul general or consul.

Then the second class is made up of vice consuls, and as to those the language on page 23 of the bill, which I have read, seems to cover the ground as far as it can. In the more remote posts of the world it is not possible, as every gentleman will understand, to find at once a man who will be a competent vice consul and who is also an American citizen. I think the language of the bill which I have read is sufficiently elastic to permit the Secretary of State to retain a suitable foreigner until he can be sure of locating and appointing a suitable American citizen.

Mr. HARRISON. Will the gentleman yield?

Mr. ROGERS. I yield to the gentleman from Mississippi.

Mr. HARRISON. I want to get into my head what the gentleman proposes to do by his amendment. Does he propose to Americanize all the vice consuls in the service?

Mr. ROGERS. The language which is already in the bill as reported by the committee deals with the vice consuls.

Mr. HARRISON. The language in the bill does not Americanize them absolutely.

Mr. ROGERS. It Americanizes them as fast as practicable.

Mr. HARRISON. Is the gentleman dissatisfied with the provision in the bill?

Mr. ROGERS. I am absolutely satisfied with the provision in the bill.

Mr. HARRISON. Does the gentleman want to go further than the provision in the bill? Because the provision in the bill says:

> No portion of this sum shall be paid as compensation to vice consuls who are not American citizens: *Provided*, That if in any case the Secretary of State deems it impracticable immediately to secure a competent vice consul who is an American citizen, he may appoint or retain as vice consul and compensate from this fund a person not an American citizen until such time as he is able to designate a competent American citizen for such post.

Does the gentleman want to wipe out that proviso and make it absolute?

Mr. ROGERS. No; I am perfectly satisfied with the bill as it stands with respect to the Americanization of vice consuls. I think it should contain a further express prohibition against the appointment of foreign consuls general and consuls, which is not in the law and which is not in this bill.

Mr. HARRISON. They are all Americans, though.

Mr. ROGERS. They happen to be all Americans. They have not been in the past and they may not be in the future, unless we require that they shall be.

In the third place, I want to make a start in the direction of Americanizing our consular agents.

Mr. HARRISON. The gentleman has an amendment that he proposes to offer to this provision?

Mr. ROGERS. I have an amendment that I propose to offer, dealing, in the first place, with consuls general and consuls on the one hand, and in the second place with consular agents on the other hand.

Mr. HARRISON. I remember that in the committee the gentleman made quite a strenuous fight to get that.

Mr. FLOOD. May I make a statement?

Mr. ROGERS. I yield to the gentleman from Virginia.

Mr. FLOOD. In the good old Democratic days consuls and consuls general were required to be Americans, but later that provision of the law was omitted in some way. Now we want to bring it back to the point where it was in the old days. Is that the gentleman's idea?

Mr. ROGERS. The only period in our history when that was the law of the land was from 1856 to 1874, and my recollection is that there was not a long line of Democratic Presidents during those years.

Mr. FLOOD. There certainly was a Democratic President during four years of that time and at the time when this law was enacted.

Mr. ROGERS. I will say to the gentleman, in reply, that I think this is an absolutely nonpartisan matter, and that partisan politics should not enter into it in any way. I have approached the matter, and I know the chairman of the committee has approached the matter, in a way that in no wise involves partisan politics.

Mr. FLOOD. That is true. The gentleman's suggestion is a wise one—that we go back to the old law requiring that no consul and no consul general shall be other than an American citizen.

Mr. HARRISON. Will the gentleman yield?

Mr. ROGERS. I will.

Mr. HARRISON. The gentleman realizes that it was the view of the committee, I think every man, that consuls should all be Americanized.

Mr. ROGERS. Yes; that is true or they would not have adopted this provision.

Mr. HARRISON. The reason why that provision was not put in is we thought it would not work; that it was impracticable to try and Americanize them immediately, and so put in this provision that it might work out and not disorganize the force.

Mr. ROGERS. The gentleman will agree that I am not disclosing any committee secret if I say that I drew the language that applies to the vice consuls, and of course I am satisfied with it.

Mr. CLINE. Will the gentleman yield?

Mr. ROGERS. I yield to the gentleman from Indiana.

Mr. CLINE. I call the gentleman's attention to what is disclosed in the hearings; that it has been the practice for the last 10 years to Americanize as fast as possible not only the vice

consuls but the consular agents also; that in the last 10 years 19 consular agents have dropped out in South American Republics for the very reason that the Government is proceeding along these lines as rapidly as possible to Americanize all of the force.

Mr. ROGERS. That is true, and yet it is also true that over half of the consular agents are foreigners now. The State Department recognizes the importance of Americanizing the Consular Service and is anxious to cooperate in bringing about that result.

Mr. BORLAND. Will the gentleman yield?

Mr. ROGERS. I will.

Mr. BORLAND. Will the gentleman state the difference between the consular agent and the vice consul?

Mr. ROGERS. They have similar duties, but the consular agent is appointed to the smaller places—not necessarily smaller in population, but in trade importance. The consular district is the unit. Take, for instance, Rio de Janeiro, which is the location of a consul general. There are two or three consulates within the consular district of which Rio is the center, and smaller places up and down the coast where there are consular agents. In other words, it is largely a question of degree, with a consul general at the top, several consuls under him, one or more vice consuls substituting for each consul general and consul; then at the bottom are several consular agents.

As I said a moment ago, more than half of the consular agents are foreigners to-day. Under the provisions of the law these men receive no salary whatever but do receive compensation, in no case to exceed $1,000, representing one-half of all the fees which go into their office during the year.

Mr. BORLAND. The consular agents are not always under a consul, but represent some country where they are detached?

Mr. ROGERS. They are always subordinate to some central consular district, but independent in jurisdiction in their particular location.

Mr. BORLAND. Is it not a fact that these men frequently represent a group of countries?

Mr. ROGERS. That has sometimes been detected by the State Department.

Mr. BORLAND. Is it not a good thing?

Mr. ROGERS. I do not think so. Just as fast as it catches a man doing that, the State Department tells him that he can not serve God and Mammon—God in this instance representing the United States and Mammon the rest of the world—that he must choose whether he will represent us alone or represent some other country and give up the United States.

Mr. BORLAND. It transpires that in my city there are a number of gentlemen there, not a large number, but possibly half a dozen, who among them represent all the Latin American countries. One gentleman will represent three or four. I know of one Spanish teacher in the high school who represents three South American countries. He was not a citizen of either one of those countries.

Mr. ROGERS. The policy of other countries may differ in that regard from our own, but I agree with the State Department that we should not have a divided allegiance among the consuls and consular agents.

Mr. BORLAND. Suppose we have so little work in that particular district that we could not have a man looking after it exclusively.

Mr. ROGERS. The method of compensation takes care of that. The consular agent receives one-half of the fees which he takes in, not exceeding, however, a total compensation of $1,000. If he takes in nothing, he gets no salary whatever.

Mr. BORLAND. The gentleman's idea is that the Americanizing of the consular agents should go on; that it is just as important as that of the vice consul.

Mr. ROGERS. Just as important. There is, for instance, a consular agency at Casa Blanca, Morocco, where there is little or no business, and where it would be absurd to try to Americanize the agent, simply because we could not afford to pay a man for the amount of business that is done there. We must in time, however, put all consular agents upon a salary basis, if their post is of any commercial importance.

To insure by law that our consuls general and consuls shall be American citizens, I propose to offer, at line 22 on page 23 of the bill, the following amendment:

Every consul general, consul and, wherever practicable, every consular agent, shall be an American citizen.

The Americanization of our vice consuls is, as far as practicable, achieved by the language which I have already quoted and by the addition of the sum of $45,000 to the Consular Service salaries item, which sum was stated by Hon. Wilbur J. Carr, Director of the Consular Service, in a letter to the gentleman from Virginia [Mr. FLOOD], the chairman of the committee, dated February 4, 1916, to be necessary for this purpose. I shall later take up in detail the problem of how to Americanize our consular agencies.

I think the historical review will convince anyone—if, indeed, argument were needed—that the practice of appointing foreigners to represent us abroad should be and must be stopped. The primary obligation of patriotism and loyalty is owed by the foreigner to his own Government and not to the United States. Much important information goes through his hands and may be diverted to the service of his compatriots instead of being applied solely to the advancement of American interests. The increased cost incident on Americanization is so trivial that it may be disregarded.

In time of war the necessity is even more apparent. Foreigners who represent us, if nationals of a belligerent, may be and often are called upon to serve in the armies of their country. A recent clipping from the Washington Post illustrates this point. It reads as follows:

TWELVE WOMEN AID UNITED STATES CONSUL—FEMININE CLERKS TAKE PLACE OF MEN WHO HAVE JOINED ARMY.

LONDON, *February 28.*

War has done much to change the complexion of the working force of the United States consulate here. Seven British clerks have joined the army.

There are now 12 women employees where before the war there was not one. One of the British clerks came to the consulate when the affairs of the Turkish consulate were taken over, having formerly been employed there.

It is well known that disloyalty to America on the part of foreigners who were representing us in various countries is not a theoretical matter but is a practical and demonstrated fact. The State Department has since the outbreak of the war two years ago repeatedly found it necessary to separate from the Consular Service men whose conduct showed all too plainly that their primary interests were not in favor of the United States. We must, then, promptly replace each foreigner with one who is an American citizen, either by birth or by naturalization. It is the duty of the United States to see to it that the watchword of every foreign representative shall be not "America second" but "America first."

2. REORGANIZATION OF CONSULAR AGENCIES.

A consular agent is an officer at a post the commercial importance of which has not been deemed sufficient to require the designation of a consul general or a consul. I have already alluded to the fact that of our 189 consular agents more than one-half (97) are foreigners. The importance of Americanizing our consular agencies was emphasized by Mr. Carr, Director of the Consular Service, during the hearings on the present bill. He says (p. 91):

In regard to consular agents, Americanization of these is a stronger need than for the vice consuls. The consular agent is stationed at a post other than that at which the supervising consul is stationed.

In other words, while the vice consul acts as consul only for the limited period during which the regular consul is absent on leave or by reason of sickness, the consular agent is at all times the head of the office to which he is assigned. It may be that in volume of business the office is smaller than a consulate; yet in many of the consular agencies the business transacted is exceedingly important and its faithful and loyal performance may be of incalculable importance to American interests.

Americanization of consular agencies is, however, greatly complicated by two circumstances:

First. The consular agent is paid by fees.

Second. He is permitted to engage, and habitually does engage, in trade.

The combination is an unusually vicious one—a foreign, fee-paid consular agent of the United States engaged in and primarily interested in his own private business. Foreigners should be eliminated; the vicious fee system, of which, by the way, this is happily the last vestige in our consular service, should be eliminated; and by making our consular agents officers "of career"—that is, by professionalizing them—their necessity of engaging in private trading should be eliminated.

All this, however, is not as simple as it perhaps sounds. By the act of April 5, 1906, section 8—

* * * Consular agents * * * shall be paid by one half of the fees received in their offices up to a maximum sum of $1,000 in any one year, the other half being accounted for and paid into the Treasury of the United States.

Under this provision the average salary per year of our consular agents probably does not exceed $400 and very few receive the maximum of $1,000. As the case now stands, the hopelessness is obvious of expecting a consular agent to give up his private business and of being able to Americanize the agencies by offering inducements to competent young men to go out from

this country, perhaps to an obscure and undesirable post, to obtain a salary which at best can not exceed $1,000.

Plainly, therefore, the fee system, which in all conscience is vicious enough in itself, must for this further reason be done away with and a salary system substituted.

What is the best way of effecting the needed reforms? Probably to elevate as fast as possible consular agents to vice consuls, each dependent upon the principal consular officer of the particular district. Up to this time the term "vice consul" has always indicated a substitute consul; that is, an officer whose duties begin when those of his principal consular officer are suspended by absence. Such vice consuls have been and usually are also permanent clerks in the particular consulate. Under the act approved February 5, 1915, we find:

For such time as any vice consul shall be lawfully authorized to assume charge of a consulate general or consulate during the absence of the principal officer at the post to which he shall have been appointed or assigned he shall be entitled to receive, in addition to his regular salary or compensation as a subordinate consular officer or employee, compensation equal to the difference between such salary or compensation and 50 per cent of the salary provided by law for the principal consular officer at such post.

This is the only provision in our laws for the payment of vice consuls, so that when they are not actually performing the duties of consul general or consul, as the case may be, their vice consulate brings them in no compensation of any kind.

A new type of vice consul was, however, hinted at for the first time in the act of February 5, 1915, which provides:

"Vice consuls" shall be deemed to denote consular officers subordinate to such principals exercising and performing the duties within the limits of their consulates at the same or at different points and places from those at which the principals are located.

Here we have for the first time in our diplomatic history the conception of a vice consul who exercises his functions at all times—instead of merely during the absence of his principal officer—and whose station is at a point other than that at which his principal is located. Here, I believe, is the basis for the needed reforms in our consular agencies. Let us make a class of professional vice consuls, who shall devote all their time to the duties of their vice consulate office, who shall receive an adequate salary from the United States Government, who shall not engage in private business, and who shall be American citizens. Let the State Department then take advantage of the language of the act of February 5, 1915, and as rapidly as possible elevate the consular agencies to vice consulates in the manner indicated. At one stroke we should thus wipe out the three present vices in our consular-agency system—foreign representation, the fee system, and the trading consular agent.

To Americanize all our consular agencies would be rather expensive, involving, as it does, the payment of an outright salary sufficient to induce a competent American citizen to take the office and to devote his whole time to the duties thereof. Assuming that Congress should undertake to professionalize all consular agencies and give the incumbents salaries of $2,000 a year, the yearly cost would be $386,000, from which could be deducted approximately $85,000 a year now paid to agents as their share of the fees, making the net cost $301,000. To this would have to be added about $155,000 for contingent expenses, since it would be expected that professional vice consuls should do more work in an independent office and consequently be a greater expense to the Government than our consular agents.

If, on the other hand, it should be felt sufficient to professionalize only consular agencies that are now held by foreign subjects, the cost, including contingent expenses, would, after deducting the amount at present paid our consular agents at the corresponding posts, be approximately $200,000.

The reorganization of our consular agencies can not be achieved in one year. A start, however, in this direction should at once be made. I propose to offer an amendment increasing the Consular Service salaries item by $25,000, and amending the text so as to permit the Department of State to use this $25,000 for compensation of the new type of permanent and "career" vice consuls. Even so small a sum as $25,000 will permit the State Department to establish the grade of salaried vice consul and demonstrate the advantage of having in office American citizens who are able to devote their entire time to the promotion of American commerce and to the advancement of American interests. I believe that the results of a year's trial will convince Congress of the wisdom of replacing our consular agents with salaried vice consuls in all posts except those in which the business done is practically negligible.

3. TRACES OF THE SPOILS SYSTEM.

The merit system in the Consular Service was put on a firm footing by President Roosevelt in 1906. In his Executive order of June 27 of that year he provided in considerable detail that vacancies in the office of consul general and consul above the two lowest classes should be filled by promotion from the lower grades of the Consular Service, based upon ability and efficiency as shown in the service; and that vacancies in the two lowest classes of consuls should be filled either by promotion of vice consuls, consular agents, and so forth, or by new appointments of candidates who had passed a satisfactory examination. This Executive order did not, of course, have the force of law. Even after it was issued the President could at any time by another Executive order appoint a personal or political friend to a consulate. Nevertheless, from 1906 to 1914 not a single Executive order was issued making such personal or political appointment; not a single consul was appointed to the service except in accordance with the provisions of the Executive order of 1906.

With the arrival in the State Department of Mr. William Jennings Bryan alarm was naturally felt for the integrity of the Consular Service and especially for the strict continuance of the merit system. It was feared by many that a series of Executive orders would be issued appointing to the Consular Service henchmen of Mr. Bryan as often as a vacancy occurred. I need not point out that such a course would have utterly destroyed the effect of the Executive order of 1906, although technically it would have been permissible. But to the surprise of all, for substantially a year Mr. Bryan kept his hands off the Consular Service. It was not until February 10, 1914, that we find the first Executive order making appointment to the Consular Service without regard to the Executive order of 1906. At monthly intervals they followed for six months. By that time a good deal of publicity had been stirred up, and it was apparently deemed feasible—not for the sake of the service but for political reasons—to suspend further issuances.

I append herewith a list of the six orders in question:

Otis A. Glazebrook, New Jersey, February 10, 1914.
Wilbur J. Keblinger, Virginia, March 28, 1914.
John M. Savage, New Jersey, April 21, 1914.
Wallace J. Young, Illinois, May 26, 1914.
John R. Silliman, Texas, July 3, 1914.
J. C. Monaghan, New Jersey, October 10, 1914.

Perhaps the fact that these orders were issued and signed by President Wilson himself and that one-half of the orders are in favor of citizens of New Jersey may indicate that at all events Mr. Bryan's responsibility was not exclusive.

It may be argued that six appointments not based upon the merit system and upon examination are so few as to be trivial. This is, however, not the proper way in which the incidents should be judged. We are trying to attract to the Consular Service the highest type of young men which our country affords. In 1906 we told them that appointment and promotion would be based upon merit and upon nothing else. For eight years we adhered to this principle without a single exception. Then, in 1914, six exceptions came in rapid succession. With the vicious spoils system again rearing its ugly head in the Consular Service, the best young men will hesitate to risk a career in which ability and achievement may be subordinated to political "pull"; men already in the service will be disheartened and discouraged if they see men with "influence" shot over their heads.

Take the case of Mr. Monaghan, of New Jersey, for example. He was appointed to Kingston, Jamaica, as a consul of class 4, with a salary of $4,500. He is serving in the same class and at the same salary with men who have been in the service 20 years, and, indeed, is in a grade ahead of some men who have served honorably and efficiently for 25 years.

Take the case of Mr. Glazebrook, of New Jersey. He is a consul of class 6, assigned to Jerusalem, at a salary of $3,500. He is serving in the same class with men who have been in the Consular Service for 20 or even 25 years, and ahead of some who have been in the service as long. The case of Mr. Savage, who is consul at Sheffield, is similar; he is in class 7, receiving a salary of $3,000. It should be said that he and Mr. Monaghan had been in the Consular Service 15 or 20 years before; at the time of their previous appointment, however, entrance did not depend, as now, upon examination.

But the issuance of Executive orders fell, as I say, into disrepute. Whether it was the "pitiless publicity" which each order evoked or the unamenability of the President to some of the schemes of Mr. Bryan which stopped the issuance of further orders, we do not certainly know.

At all events, a new and ingenious scheme, which avoided both publicity and the necessity of Executive docility, was devised. The Executive order of 1906 provides that "persons in the service of the Department of State with salaries of $2,000 or upward shall be eligible for promotion, on the basis of ability and efficiency as shown in the service, to any grade of the Consular Service above class 8 of consuls." This was suggested by Mr. Root, then Secretary of State, with the idea of affording an outlet from the department for men who had worked their

way up from the ranks to a position perhaps as chief of one of its bureaus. It was the intention that the provision should be utilized only in favor of men who had originally entered the department under civil service rules, and this requirement had been insisted upon without exception on the infrequent occasions, prior to Mr. Bryan's incumbency, when it was invoked.

The fertile mind of Mr. Bryan, however, detected in it an opportunity to take care of a stray "deserving Democrat." Let me illustrate: He appointed one Calvin M. Hitch, who had been for years a prominent wheel horse in Georgia politics, Assistant Chief of the Division of Latin-American Affairs, at a salary of $3,000. He then, on February 22, 1915, applied the above provision of the Executive order of 1906 and appointed Mr. Hitch consul of class 5, at a salary of $4,000. Mr. Hitch is now consul at Nottingham.

While the action was no doubt a technical compliance with the provision of the Executive order, it was as gross and flagrant a violation of the spirit of the order as could well be imagined. It is probably fair to say that every man in the Consular Service, excepting Mr. Hitch himself, resents and deplores the prostitution of the Executive order of 1906 to the political exigencies of the unlamented Secretary of State.

Take another case. William F. Kelley hailed from Lincoln, Nebr. The very name of the town was until about a year ago something to conjure with. Mr. Bryan appointed his fellow townsman Assistant Solicitor in the Department of State, at a salary of $3,000. Mr. Bryan resigned on June 9, 1915. "Coming events cast their shadows before." On June 8, 1915, the previous day, Mr. Bryan again took advantage of the letter of the Executive order and appointed Mr. Kelley consul of class 5, at a salary of $4,000, and assigned him to Rome.

These two men, both appointed for purely political reasons, entered the same class and at the same salary with men who had been acquiring the traditions, the policies, and the details of the service for from 10 to 25 years. They became the superiors in rank and salary of perhaps 30 or 40 men whose service exceeds 10 years. It is small wonder that the friends of our Consular Service and the consular officers themselves were outraged at this utterly indefensible breaking down of the merit system.

It must be said in fairness to Secretary Lansing that during the year of his incumbency he has sedulously and scrupulously preserved intact the merit system and that there is no sign whatever that with his connivance further inroads may be expected.

4. MORE CONSULS AND CONSULAR POSTS.

If we are to get and hold our share of the trade of the world we must have at every important commercial center of the world an outpost of trade. As I have previously pointed out, the war in Europe has thrown upon our Consular Service in the countries at war a vast amount of work of an entirely new character, namely, that of protecting the interests of belligerent Governments, of relieving and caring for their nationals, of inspecting the camps in which prisoners are confined, and attending to a multitude of details having to do in a minor way with the war. While commercial and ordinary consular functions have decreased in some of the belligerent countries they have been vastly increased in other belligerent countries to such an extent that the Department of State has been compelled to withdraw consuls from some of the neutral countries and send them to the consulates in belligerent countries. This has been unfortunate in that it has left the United States with an inadequate consular staff in some of the neutral countries, in which they are at present very greatly needed because of the opportunities for the extension of American trade. The effect of the war, as is well known, has been to modify to a considerable extent the course of trade and to cause many neutral countries which have hitherto depended upon the countries at war for the major part of their imports to turn to the United States for their purchase of supplies. It follows that the consular organizations in all the neutral countries should be maintained at their maximum strength, and that in order to accomplish this desirable object the number of available consuls should be considerably increased.

In South America there are undoubtedly extraordinary opportunities at present for the United States to build up a permanent market for its products. Yet we are getting to-day only a relatively small share of the business of South America. This is in part attributable to the fact that throughout the vast continent we have a total of but 41 posts. This number should be materially increased. There should be additional consulates at some or all of the following places: Oruro, Bolivia; Bahia Blanca, Argentina; Maranhao, Brazil; Porto Alegre, Brazil; Paita, Peru; Rio Grande do Sul, Brazil; Mollendo, Peru; Paramaribo, Dutch Guiana; Santiago, Chile; and Manaos, Brazil. In Australia there should be consulates at Brisbane, Adelaide, and Townsville. In the Dutch East Indies there should be a consulate at Soerabaya. In Russia and China there should be several new consular offices established, because there are extremely promising opportunities for extending American trade during the war and for holding it after the war.

Sometimes the proper solution will be to elevate a consular agency to a full consulate; sometimes it will be sufficient to put at the posts in question a salaried vice consul, above referred to; and sometimes new posts must be established. With world trade as the stake the United States can not afford to be penny-wise and pound-foolish.

5. HIGHER COMPENSATION.

As a general rule, to which there are some exceptions, the higher grades of the Consular Service from $5,000 a year and upward are adequately compensated. The middle and lower grades, from $5,000 to $2,000, are not adequately compensated. A glance at the following list will at once convey an idea of how much underpaid some of the lower-grade consuls are:

Aden, Arabia	$2,500
Asuncion, Paraguay	2,500
Batum, Russia	2,500
Bergen, Norway	2,500
Breslau, Germany	2,500
Hull, England	2,500
La Rochelle, France	2,500
Madrid, Spain	2,500
Nice, France	2,500
Swatow, China	2,500
Tunis, North Africa	2,500
Turin, Italy	2,500
Bristol, England	2,000
Cartagena, Colombia	2,000
Petrograd, Russia	3,500
Port Elizabeth, South Africa	3,500
Vladivostok, Siberia	3,500
Rosario, Argentina	3,500
Colombo, Ceylon	3,000
Madras, India	3,000

The list might be greatly extended, but the foregoing will serve to convince anyone who will stop to think what can be done with like amounts in any large city in the United States of the impossibility of properly representing a great commercial nation upon such salaries. In order to emphasize the insufficiency of these salaries, it will be profitable to see what Great Britain and Germany pay their consuls at a few of these places:

Place.	Great Britain.	Germany.	United States.
Vladivostok	$4,865	$5,783	$3,500
Rosario	4,865	.....	3,500
Tunis	[1] 4,379	5,093	2,500
Petrograd	5,459	8,151	3,500
Batum	3,893	4,392	2,500

[1] And house.

The United States is one of the strongest competitors of Great Britain and Germany in the contest for the world's markets. Since external appearances, a consul's manner of living, his ability to enter into personal relations with the people among whom he lives, affect so strongly his influence in the community and consequently his power to serve his Government and people, it is easy to see from the foregoing which consular officers would as a rule have the best standing in the community.

While a careful and detailed estimate has not been made, it is believed that it would cost $250,000 additional to place the salaries of the American consuls general and consuls upon an equality with the scale of compensation of British and German consular officers.

A far better method of equalizing the cost of living at various consular posts than the mere raising of salaries is to place at the disposal of the President a sum of money sufficient to enable him to make allowances to individual posts in the nature of additional compensation to meet changes or variations in the cost of living. No scale of salaries can be adapted to the purposes of promotion of officers and at the same time equalize the cost of living, which is constantly changing. The continental nations have learned this fact, and all the leading ones provide the means of making post allowances in addition to salary where needed. Thus, a German consul general receives a maximum salary in his grade of $2,856, but at Moscow he is given an additional local allowance of $5,236; at Naples the allowance is reduced to $2,856, while at New York it is increased to $10,234. This method is fair to the consul and simplifies the work of administration. Moreover, it promotes greater economy because it reduces frequency of transfers and the expense incident thereto, because in many cases promotion in salary can be made without changing an officer's post. If the amount of $250,000,

suggested in the preceding paragraph, were provided for post allowances, the number of classes of consuls reduced from eight to four, and the grade of salaried vice consul established, the condition of the personnel would be vastly improved.

No better illustration of the hardship which results to officers from the absence of such a fund as that suggested can be desired than that of the consulate at Vladivostok. The duties may well be performed by a sixth grade—$3,500—consul, yet that salary will not maintain a consul and his family decently. To send a higher grade consul there merely results in wasting the ability of a more experienced officer and at the same time in actually reducing the value of his compensation. The entire difficulty could be remedied by allotting to the consul a sum equal to the normal cost of living for an officer of his grade and the existing cost at the post where he happens to be stationed.

The Secretary of State has requested $150,000 as a fund for equalizing the cost of living by means of post allowances. The Committee on Foreign Affairs has recommended instead the sum of $100,000. Actual returns from consular officers show that the cost of living under war conditions, based upon the cost of fuel, rent, clothing, and food, ranges all the way from 15 to 128 per cent above that at the outbreak of the war. The cost of food alone has increased in some countries as much as 250 per cent above the prices of 1914. The effect of the rise in prices will be appreciated when it is remembered that consular salaries run as low as $1,000 and that the vast majority are below $3,000. Some of the belligerent Governments have increased from 37 to 60 per cent the salaries of their own officers to offset the rise in prices. The United States has done nothing. It is proposed from such appropriation as Congress may make to increase the compensation of consular officers in a proportion to compensate at least in part for the increase in the cost of living. Of course, caution will have to be exercised in making post allowances of this kind. It should be definitely known that the returns of the cost of living are accurate and are inflated permanently and not merely temporarily.

6. MORE FREQUENT INSPECTIONS.

Every consular post should be inspected at least as often as once in two years. In many ways it would be desirable if such inspection should occur annually. The United States has but five consular inspectors, known as consuls general at large, to cover the whole world. With due diligence and under peace conditions some of these men can not cover their district oftener than once in five years. An increase in the force of inspectors seems necessary for this purpose.

7. BETTER QUARTERS.

In respect to the effect upon the local mind quite as much as in the interest of the efficiency of our consulates their physical condition should be representative of the best that there is in America in the way of quarters, office equipment, clerical force, and general management. We should not seek to outdo other nations in the direction of the elegance of our establishments, but we should be careful that our consulates should be of such a character as to command at least as much respect on the part of the various local communities as that shown to the establishment of any other nation. The realization of these ideals makes it necessary that our consulates should be in central and convenient, if not in prominent, locations in the cities in which they are situated; that they shall be appropriately housed; and that they shall acquire a reputation abroad for dignity, permanency, helpfulness, and efficient organization. I believe that as fast as possible we should purchase suitable consular premises, and I am glad to point out that the present bill, besides providing for legations at Panama and Habana, appropriates $355,000 for adequate consular and court premises at Shanghai. Shanghai is the great commercial port of the Orient and the distributing point for imports into China. It is the city in which are located the principal agencies of American firms. It is the point of arrival and departure for trans-Pacific steamers. The United States maintains at Shanghai one of its largest and busiest consulates as well as a district court, a jail, a post office, and public-health office. The court and the consulate have official jurisdiction over Americans and their property. These offices occupy rented quarters. Every other first-class Government owns dignified and commodious buildings in which their consulates and courts are housed. The United States is the only first-class Government not owning its consular and court premises. The property now rented by the United States is the only available property on the water front and near the consulates of other great nations. The lease expires next month. The importance to American commerce of owning the property now occupied or other property equally desirable can scarcely be overemphasized.

8. AGE LIMIT.

The personnel of the American Consular Service has been greatly improved within the last few years. In the interest of economy and efficiency, however, further improvements are desirable. The existing rules fix the maximum age for examination at 50 years. This is entirely too high. It is not fair to the Government from an economical point of view, and it is not just to the service or to the commercial interests of the country to admit men from other walks of life at an age when they can not be expected to acquire readily the knowledge necessary to the efficient discharge of consular work or be available for service in tropical or other climatically trying places. Great Britain long ago placed her maximum age limit at 27. Under no circumstances should men be admitted to our service over 30. The analogy of officers in our Army and Navy, who can under no circumstances be more than 28 years of age and who except in rare cases are not over 24 or 25, is instructive in this connection.

9. MORE BUSINESS TRAINING.

It is often urged that business experience be made a prerequisite to appointment as a consul. In theory this is almost axiomatic. But in practice it is doubtful if it would work so well. "Business training" is an elastic term. It may mean a clerkship in a bank or it may mean a presidency of a trust. If we are to insist upon men in their twenties, we can not insist upon any considerable or detailed business knowledge, and if a clerkship or some minor business experience will fulfill the requirements, it is questionable whether it is worth exacting it at all. The right kind of business training would be of unquestionable value, but the kind ordinarily possessed by a man of 25 would be worthless. Probably an insistence upon such a requirement would entail the sacrifice of more important qualifications.

The best way, I think, is to encourage consuls after appointment to return to this country as often as possible and acquire as rapidly as possible the sort of knowledge which is a valuable qualification for their work. Indeed, it is doubtful if the Consular Service can properly progress without requiring that consuls return to the United States regularly on leaves of absence. Only in this way can they retain to the fullest extent their knowledge of and appreciation for the best in our national life. Only in this way can they become acquainted with American progress and industry and with the principal problems of manufacturing and exporting. Only in this way can they impart by personal touch the first-hand information which they possess to chambers of commerce and business men as to commercial conditions in foreign countries. I believe that no one thing would do more to vitalize the entire consular organization, in so far as its work relates to commerce, than to have every officer feel that at the end of a certain period he would be expected to return to this country for a time on leave and enter into a series of conferences with business men having trade with his district, in the course of which he would be expected to answer questions, to advise, and at the same time study conditions in this country. Consuls now receive leave of absence for 60 days each year with full pay, and in the event they come to the United States the leave is extended to cover the time of transit. Once in two and a half or three years, then, consuls should be required to return home and their traveling expenses paid. Great Britain already has this system in operation. An appropriation of $25,000 for this purpose would prove of great practical value to the business men of the country. The National Foreign Trade Council, through its committee on improvement of foreign and domestic commerce and consular service, recently said:

Your committee also strongly indorses the recommendations of officials of the State Department that authority be given and funds provided which will enable consular officers, on arriving in the United States, to attend business conventions and commercial conferences, in order to bring before American business interests the information as to conditions in the markets where they are stationed. The National Foreign Trade Council had the benefit at its recent third national foreign trade convention in New Orleans of the presence not only of representatives of the Bureau of Foreign and Domestic Commerce, but of three consular officers, and the benefits derived by delegates from this opportunity for personal consultation were great.

COMMERCIAL ATTACHÉS.

The act of Congress approved July 16, 1914, provides in part as follows:

For commercial attachés to be appointed by the Secretary of Commerce, after examination to be held under his direction to determine their competency, and to be accredited through the State Department, whose duties shall be to investigate and report upon such conditions in the manufacturing industries and trade of foreign countries as may be of interest to the United States, $100,000.

The 1915 and 1916 laws have carried a similar item.

Under this provision the Department of Commerce has appointed 10 commercial attachés, 1 being assigned to each of the following capitals: London, Paris, Berlin, Petrograd, Peking, Buenos Aires, Rio de Janeiro, Lima, Santiago, and Melbourne.

The fact that these officials are under the Department of Commerce may seem to make it superfluous to discuss them in a speech upon the Consular Service. Nevertheless, I think the connection is sufficiently close and important to warrant a brief reference.

It is my considered opinion that these officials do absolutely no good and in some respects do the country more harm than good. I think they should either be eliminated or be made subject to the State Department.

It is well known that the Department of Commerce, under the tutelage of Secretary Redfield, is one of the greatest self-advertising institutions in the world. It blows its horn in season and out of season. A typical blast appeared in an article entitled "Uncle Sam, Trade Expert," in the Saturday Evening Post for May 6, 1916. This article lauded to the skies the achievements of the commercial attachés and, inferentially at least, left the impression that our commercial attachés were everything and our Consular Service nothing. For example, the following language, quoting a high official of the Department of Commerce, appears:

> It is not strange that all consuls are not able at all times to produce trade reports calculated to inspire the American manufacturer to go out after export business, and to guide those efforts to success after they have been inspired. On this end of the job he needs help of the sort that only the highly trained specialist can give. Hence the commercial attaché and the commercial agent.

I believe it to be a demonstrable fact that these 10 men hinder instead of assist the work of the consuls in caring for our foreign trade. For example, there have been repeated cases where a commercial attaché would ask a consul to collect information for him bearing upon a certain subject. The consul, though under no obligation so to do, would graciously and after much research collect the information desired. Then the attaché without giving any credit whatever to the consul, would forward the information to the Department of Commerce and it would be blazoned forth to the country with a great hurrah. That very information would frequently have already been made available by the consul himself. Lately, I am informed, some of the consuls have notified the attachés that they no longer could do their own work and that of the attaché as well.

A number of the attachés were selected for political reasons, and several of them at least had no apparent qualifications for the task to which they are assigned. Knowledge of business conditions in the country of their station, knowledge even of the tongue of the country were apparently not deemed essentials to appointment.

These men, being officials of the Department of Commerce, not of the Department of State, and belonging neither to the diplomatic nor to the consular branches of our Government, have no official standing abroad. The foreign Government can not understand why they are in the country at all, and they occupy a thoroughly nondescript position. Oftentimes it seems as if every man's hand was against them and their hand was against every man.

It may be that there is a useful opportunity for service for the right sort of men, but any such men, to be effective at all, must be, as is the practice of other Governments, under the direction of the State Department. The present division of responsibility and authority works very badly, tells directly for friction, and entirely neutralizes any possible good which might otherwise result. As it stands now the country is simply throwing away $100,000.

COST OF THE CONSULAR SERVICE.

It is not, I think, generally realized that the Consular Service is practically self-supporting. Largely through fees for invoices, the receipts almost equal the expenditures. I append herewith a table showing the receipts and expenditures, together with the net cost of the service, for the past 10 years:

Year.	Invoice fees.	Total consular fees.	Gross cost of Consular Service.	Net cost of Consular Service.	Gain.
1906	$1,262,060.76	$1,404,940.10	$1,385,217.47	.....	$19,722.63
1907	1,384,319.50	1,672,802.15	1,777,635.72	$104,833.57	.....
1908	1,251,637.12	1,517,304.65	1,808,661.26	296,356.61	.....
1909	1,330,514.24	1,586,047.14	1,835,078.06	249,030.42	.....
1910	1,484,653.65	1,762,133.72	1,928,561.77	166,428.05	.....
1911	1,434,264.00	1,712,345.87	2,017,042.35	304,696.48	.....
1912	1,502,621.93	1,793,166.00	2,053,256.21	260,090.21	.....
1913	1,561,327.23	1,852,535.99	1,972,604.39	120,068.40	.....
1914	1,735,247.30	2,040,234.42	2,083,908.42	43,674.00	.....
1915	1,236,810.91	1,498,029.80	2,073,642.57	575,612.77	.....

It will be seen from these figures that for the year just prior to the European war the consular budget was about $2,000,000 and that the consular fees came within $44,000 of meeting all expenditures. Even during the year 1915, when very heavy burdens resultant upon the war were being borne by the Consular Service, the net cost of the service was only $575,000.

When we consider that a net expenditure of from one to two million dollars is made yearly by France, Germany, and Great Britain, it will be seen that the United States can well afford to expend a million dollars more upon its Consular Service and still be well within the net expenditure of its principal trade rivals. We can well afford to be extremely liberal in our appropriations for the practical upbuilding of the Consular Service. The committee report accompanying this bill emphasizes this point:

> The committee deems it proper to call attention to and emphasize the fact that under normal conditions the fees collected and actually paid into the Treasury by the Consular Service are almost equal in amount to the entire cost of that service—approximately $2,000,000 per year. In fact, this service has been heretofore almost self-supporting. This should be taken into account when appropriations for this branch of the service are under consideration. In view of the extraordinary and exigent conditions now existing, with every expectation that they will continue perhaps indefinitely, the committee feels that it can not too strongly urge upon the Congress liberal, but necessary, appropriations for the Diplomatic and Consular Service as proposed in the accompanying bill.

PRACTICAL RESULTS OF CONSULAR SERVICE.

Inquiry into the results of consular activity on behalf of American export trade covering the period of six months prior to January 1, 1916, shows from the reports of about one-half of the consuls orders and sales amounting to $24,600,000. Assuming that these results were average results, the new business obtained through the direct activity of the Consular Service for six months would amount to the large total of $49,200,000. The orders and sales referred to include cotton piece goods, cloth, clothing material, coal, drugs, druggists' supplies, electrical goods, harness and saddlery, leather goods, machinery, lumber, typewriter supplies, tobacco, varnish, and so forth. When it is considered that the net cost of the Consular Service to the Government for that period was less than $300,000, we may gain some conception of the utility of the service in comparison with its cost to the public and form some accurate opinion of how far the Consular Service deserves support and a more generous provision for its maintenance.

Besides the purely material good, such as the direct securing of orders, we must bear in mind the thousand and one activities of the Consular Service in safeguarding American lives, in assembling accurate information for well-directed commercial activities by our people, and the numerous though intangible beneficial results which flow from having our country suitably represented in the cities and markets of the world.

It is our duty to use our utmost efforts to promote in every wise way the continued and increasing usefulness of the Consular Service. One of the essentials, and the one which I have emphasized in the course of my remarks, is that we must make the Consular Service attractive to our best and strongest citizens; we must make it a career of distinction and promise; we must make the holding of consular office an object of worthy ambition and a source of pride and patriotism.

I have a good many other questions which I desire to discuss but I do not care to take up the time of the committee in dealing with them to-day, and, Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Massachusetts asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. DUPRÉ. Will the gentleman yield?

Mr. ROGERS. I do.

Mr. DUPRÉ. I should like to ask the gentleman if he has any idea what course the Department of State intends to pursue with regard to our consuls in Mexico? Are they to be allowed to remain there indefinitely? I mean with regard to the tenure of particular positions. I know, for instance, one consul who has been there for five very strenuous years. Is it intended to shift these gentlemen to other posts and recognize their services?

Mr. ROGERS. I have not discussed that question with any of the officials of the Department of State, and I am unable to say what their position is. Mr. Chairman, I reserve the balance of my time. [Applause.]

Mr. MANN. Mr. Chairman, I have a few matters upon which I desire to make a few observations. On the 23d of May there appears in the CONGRESSIONAL RECORD, page 9674, an extension of remarks by the gentleman from Texas [Mr. DIES] under this heading:

> Thou shalt not bear false witness against thy neighbor.

I think it might be said with truth that this is a campaign primary speech for home consumption. I noticed the heading of it and glanced through the speech, because the gentleman from Texas is always interesting, and I found this statement among other things:

The next charge in this false circular is that I was "present and did not vote" to establish a certain bureau in the Department of Labor, known as the Children's Bureau. I was for the bill, as the CONGRESSIONAL RECORD shows, and was paired for the bill with Mr. COPLEY, a Republican, who was against the bill. This bill passed the House April 2, 1912.

I knew that Mr. COPLEY, my colleague from Illinois, was not opposed to the bill, and I wondered if the statement of the gentleman from Texas [Mr. DIES] was correct, that he was paired for the bill with Mr. COPLEY, a Republican, who was against the bill. I looked up the record and found that the statement was wholly inaccurate; was not correct at all. The Children's Bureau bill passed the House on April 2, 1912, as stated by the gentleman from Texas. It passed under suspension of the rules on a yea-and-nay vote. This was the second yea-and-nay vote taken that day. On the first yea-and-nay vote on that day, which was on the lighthouse bill, the gentleman from Texas [Mr. DIES] had a general pair with my colleague from Illinois [Mr. COPLEY] "until further notice." This general pair ran through the day, being announced but once. There was no special pair on the Children's Bureau bill. The RECORD does not show that the gentleman from Texas was in favor of the Children's Bureau bill, or that my colleague from Illinois was against that bill. Nor is the statement of fact correct.

The gentleman from Texas also states:

The next charge in this false circular is that I was "present and did not vote" for a bill to investigate the Money Trust. I was paired for it with a Republican, Mr. Harris, who was against it.

Mr. DUPRÉ. May I ask the date of the RECORD from which the gentleman is quoting?

Mr. MANN. May 23.

The Money Trust investigation bill was before the House on April 25, 1912. The resolution authorizing that investigation was adopted by a yea-and-nay vote. The gentleman from Texas [Mr. DIES] did not vote or answer "present." He had a general pair with the gentleman from Massachusetts, Mr. Harris, which did not show that the gentleman from Texas was for the resolution or that Mr. Harris was against the resolution.

I call attention to this, because it is utterly unfair to my colleague from Illinois [Mr. COPLEY], who has been for a long time enthusiastically in favor of bills like the Child's Bureau bill, which, to a certain extent was a part of the propaganda of the Progressive Party, to which Mr. COPLEY belongs.

Mr. COOPER of Wisconsin. Will the gentleman permit one interruption?

Mr. MANN. Certainly.

Mr. COOPER of Wisconsin. I want to corroborate what the gentleman says about Mr. COPLEY, because he has spoken to me more than once in favor of the Child Labor Bureau.

Mr. MANN. Gentlemen making speeches for the RECORD ought to be a little careful about what they insert in the RECORD relating to other Members of the House. So much for that.

The other day in the Senate there was inserted in the river and harbor bill a Senate amendment, in part, as follows:

And the improvement of navigation of the Illinois River, authorized by an act of the Illinois General Assembly approved June 18, 1915, providing for an expenditure of $5,000,000 therefor by the State of Illinois, be, and is hereby, authorized in accordance with said act.

Then, the amendment contains various provisions, among which is:

Provided further, That the amount of water to be diverted from Lake Michigan through this system of waterways shall never exceed the rate of 250,000 cubic feet per minute.

This is known, I believe, as the La Follette amendment, being offered in the Senate by the Senator from Wisconsin, and which comes with a letter of recommendation from the Secretary of War, Mr. Baker, from Cleveland, Ohio. I just want to take a moment to read a letter from the commissioner of health of Chicago in reference to this matter, so that some Members of the House may know of what intense interest it is to the citizens of Chicago.

Mr. CRAMTON. Will the gentleman yield?

Mr. MANN. Yes.

Mr. CRAMTON. Is it not a fact that during the speech of Senator LA FOLLETTE one of the Illinois Senators—I do not recall which one—offered to accept such an amendment, and thereupon the amendment was introduced and carried?

Mr. MANN. I think it is not the fact. Still, if the gentleman says it is a fact, I am not going to dispute him.

Mr. CRAMTON. That was the situation.

Mr. MANN. I think the gentleman is mistaken. Neither of the Illinois Senators was present when the amendment was offered. I do not see how they could have had this conversation when one of them was in New York, and I do not know where the other was, except that he was not here.

Mr. CRAMTON. I will say to the gentleman, it was simply the Senator who was looking after the measure in question. I do not recall his name.

Mr. MANN. Of course it is not permissible for me to discuss what debate took place in the Senate, and I shall endeavor to comply with the rules.

What some Senator may have said in debate as to what he would do in the future I would not undertake to say. I might have forgotten. My recollection is the Senator to whom the gentleman has reference was in New York City delivering a speech at the time this matter was up in the Senate and agreed to there. However, that has nothing to do with the proposition. I am not complaining about the introduction or the agreement of the Senate to the amendment. This is not the time to do that.

Mr. BUCHANAN of Illinois. Will the gentleman yield?

Mr. MANN. Certainly.

Mr. BUCHANAN of Illinois. Would it not be impossible for the people of Chicago to submit to that law without encouraging the ravages of disease?

Mr. MANN. If my colleague will yield until I read a letter that I have announced I was going to read, it will do more service.

Mr. BUCHANAN of Illinois. I would like to have the gentleman continue.

Mr. MANN. This is the letter:

CITY OF CHICAGO,
DEPARTMENT OF HEALTH,
Chicago, May 31, 1916.

Hon. JAMES R. MANN,
House of Representatives, Washington, D. C.

DEAR SIR: In reference to the La Follette amendment to the rivers and harbors bill limiting the amount of water to be withdrawn from Lake Michigan by the sanitary canal system of the city of Chicago to 250,000 cubic feet per minute, I have the honor to call to your attention the fact that this amount of water will be inadequate to properly dilute the sewage of this city.

The 450,000 cubic feet per minute now diverted has been insufficient, and consequently there has been practically no free oxygen in the water of the sanitary canal during the summer season. It is thus self-evident that any further reduction in the amount of water available for dilution will make the Chicago River and the sanitary channel a public nuisance.

Furthermore, such reduction in the amount of water which may be withdrawn will interfere with the measures now under consideration for the diversion of the sewage of the north shore and northern Indiana towns. Such delay will naturally result in a continued and increasing pollution of the water supply of this and neighboring cities. At the present time about one-half of the typhoid fever in this city is contracted in neighboring towns as a result of polluted water supplied in such towns. There is now such an epidemic of typhoid fever in Indiana Harbor. Approximately 250 cases have developed there within the last 60 days.

Chicago has just gone through the year 1915 with a typhoid rate of 5.39 per 100,000, which is the lowest in the history of the city and, according to the report on comparative typhoid rates of cities in the United States for 1915, published by the American Medical Association, the lowest of any city in the country with a population of 500,000 or more. We are justified in being proud of such a record. In addition, we have the right to expect such a lowering of mortality as a reward of the millions expended in intercepting the sewers and constructing the sanitary channel.

Our citizens will oppose any measures which will result in rendering inefficient at once our present method of sewage disposal and which will reestablish conditions which existed here before the sanitary channel was put into operation. For the 10-year period preceding the opening of the channel our typhoid rate was 59.7 per 100,000.

I am well aware of the fact that the system of sewage disposal now used by this city is not ideal. We are, however, confronted with the situation of having to guard the health and welfare of two and one-half millions of people. It is therefore apparent that the crippling of the existing system of sewage disposal by limiting the amount of water available is a very dangerous procedure and should not be taken until a comprehensive system of sewage treatment and disposal has been installed in Chicago and also for neighboring cities.

Therefore, I have the honor to respectfully request that you make every effort possible to have this proposed amendment stricken from the pending rivers and harbors bill.

Respectfully,
JOHN DILL ROBERTSON, M. D.,
Commissioner of Health.

Mr. McLAUGHLIN. Mr. Chairman, will the gentleman yield?

Mr. MANN. In a moment. When the old rate for typhoid fever for the 10-year period was over 59 for 100,000 inhabitants, as against less than 6 for 100,000 inhabitants at the present time, you can see that the matter is of considerable interest to Chicago, because the decrease in the rate of typhoid has been caused by the Sanitary Canal. Now I yield to the gentleman.

Mr. McLAUGHLIN. In February, 1912, the Secretary of War, after a full hearing, refused to consent to the diversion of more water. That was notice to the people of the city of Chicago. Has any effort been made on their part or any move in the direction of otherwise disposing of the sewage than into the Chicago River?

Mr. MANN. I am told by the trustees of the Sanitary Canal that it would cost $250,000,000 to Chicago to dispose of the city

sewage in any other way than the way now adopted. I do not know whether that is correct, or how far there has been investigation on that subject. Before the Sanitary Canal idea was adopted at Chicago there was a considerable investigation on the subject of sewage disposal.

Mr. HAMILTON of Michigan. Mr. Chairman, will the gentleman yield?

Mr. MANN. Let me finish. Personally, at the time I was not in favor of the method which was adopted. I thought it was a mistake for Chicago to have adopted the plan that it did without first getting authority of Congress. But they went ahead with the plan, and have expended close to $100,000,000. Whether they should be required to adopt some other plan I am not undertaking to say. I am calling this to the attention of the House, because I do not believe the House desires to adopt any amendment which would make life unsafe in the city of Chicago, not only to the citizens there but to all who go through Chicago.

Mr. GORDON. Mr. Chairman, will the gentleman yield to me?

Mr. MANN. Certainly.

Mr. GORDON. Has the gentleman fully considered the consequences of draining the Great Lakes, and the fact that we have a treaty with Great Britain which obligates us to maintain the present lake level?

Mr. MANN. Oh, certainly; long before the gentleman was in the House, and many times since.

Mr. HAMILTON of Michigan. Mr. Chairman, may I ask the gentleman a question for information.

Mr. MANN. Certainly.

Mr. HAMILTON of Michigan. How much water does the gentleman who writes that letter say is passing through the Chicago River per minute now?

Mr. MANN. He says 450,000 cubic feet. Whether it is correct or not I do not know.

Mr. HAMILTON of Michigan. And the proposition involved in this amendment is 250,000 cubic feet?

Mr. MANN. Yes; 250,000 cubic feet. I might say, although I do not want to go into that, that no one knows what is the effect upon the level of the water by the diversion at Chicago. At Chicago the water flows on the west side of the lake to the south. It flows by Chicago south. It always has and still does. While the current is not perceptible to the naked eye, it is quite perceptible to those who investigate the matter. If there is a dock on the west side, it fills up with sand, and the sand is deposited on the north side of the pier. In my district the current is to the east. On the east side of the lake the current is to the north. I have seen the water in Lake Michigan rise and fall 6 or 8 inches in less than half an hour. I have heard a great many gentlemen explain why it happens, but I do not think any of them knows.

Now, Mr. Chairman, I have a little illustration of the dignity of the State Department. I suppose if anybody should ever propose to introduce real modern methods into the State Department they would get such a shock up there that they would not get over it, and though it is more modern now than it was a few years ago, still it is a very dignified place. We passed a law a couple of years ago requiring every department to send a report to Congress each year of the number of typewriters purchased and exchanged, and they all do it.

The Secretary of War, the Secretary of the Navy, the Secretary of the Interior, and the Secretaries of Agriculture, Commerce, Labor, and the other Secretaries send the statement addressed to the Speaker of the House. Not so with the State Department. It would be beneath the dignity of the State Department to communicate this statement directly to the House. That would be too short a method, so we get the statement from the President of the United States. They communicate this statement about old typewriters first to the head of the Nation, and then the President, carrying out the theory of the State Department, sends a special communication to Congress, communicating what has been done with an old $10 typewriting machine in exchanging it for a $50 new one. Other departments write to us directly, but it would not be in keeping with the dignity of the Nation for the State Department to communicate such great, valuable, and intricate information to the Congress by addressing it to the Speaker of the House.

I have another matter here which I suppose everybody is familiar with, though I have not seen any reference to it in the RECORD. I hold in my hand a circular issued by the H. W. Johns-Manville Co. It is headed "Important," and is as follows:

IMPORTANT.

APRIL 14, 1916.

In compliance with a recent "Order in Council" of the Canadian Government, we are compelled to ask each of our customers to sign and return to us the following guarantee:

H. W. JOHNS-MANVILLE CO.

I now read the guaranty which follows:

To H. W. JOHNS-MANVILLE Co.,
Michigan Avenue and Eighteenth Street, Chicago, Ill.:

In consideration of your consenting to the delivery to us of asbestos from Canada or elsewhere, we hereby give you the following undertaking, which shall remain in force so long as the present war in Europe continues.

The said asbestos shall be consumed in the United States and shall not be exported from the United States in any shape or form.

Date ——— ———, 1916.

Signature ——— ———,
Town ——— ———,
State ——— ———.

Of course the Canadian Government has the right to make any orders it pleases. An order in council up there is an order by the executive department, which has the effect of legislation. They have issued an order under which they say that men transacting business in the United States shall not sell asbestos to anyone, no matter where the asbestos comes from, unless the purchaser will agree that he will not ship it out of the United States. I do not know what they would do up in Canada if we should adopt some such legislation as that in Congress.

Mr. KELLEY. Will the gentleman yield?

Mr. MANN. No; not yet. I have a letter here from the Sharon Steel Hoop Co., of Sharon, Pa., dated February 14, 1916, addressed to a Chicago firm, whose name, at their request, I will not give. This letter is as follows:

SHARON STEEL HOOP CO.,
Sharon, Pa., February 14, 1916.

———— ————, *Chicago, Ill.*

GENTLEMEN: In order that we may secure the necessary raw material to continue operations necessary to supply you with steel will you please sign and return to us the attached agreement by return mail in the inclosed envelope.

Yours, very truly, SEVERN P. KER, *President.*

This is the undertaking:

FEBRUARY —, 1916.

SHARON STEEL HOOP CO., *Sharon, Pa.*

GENTLEMEN: We hereby undertake not to export any of the steel purchased by us from you or any article manufactured from such steel to any European country except the United Kingdom, France, Italy, or Russia, and not to export any such steel or products to any countries outside of Europe or Canada without giving written notice to his Britannic Majesty's consul general at New York of such shipments, and that this engagement will be kept by us so long as the present war in Europe continues.

I think that is really going some! I have had a number of these communications sent to me. I presume other Members of the House have received them from their constituents; but it does seem remarkable that in this country, which produces more steel, probably, than all the other countries of the world put together, a man can not buy steel from this company because this company can not buy steel from the companies manufacturing steel or pig iron, unless he agrees that he will not export the steel or any product made from it except to certain countries in Europe, excluding all the neutral countries of Europe, and unless he will notify His Britannic Majesty's consul general at New York when he ships out 5 cents' worth of the steel. I wonder at times whether we did have a war of independence, or, if we did, whether we were successful.

Mr. GORDON. Will the gentleman yield?

Mr. MANN. In just a moment. Of course, I know that the foreign countries engaged in war will do everything in their power to injure one another. I do not criticize that, nor do I want this country to go to war about it, but I would like at times to see some effort on our part to maintain at least our natural independence. We have heard a good deal of talk about preserving the lives of Americans and how much more valuable life is than property. It is good talk, but it always was the talk of slaves everywhere to preserve life as against rights. What good is it to a man to have his life, if that is all he cares for? He is a slave! I am in favor of preserving the lives of Americans from exploitation or injury on the part of Germany and in favor of preserving the rights of American property from England or any other country. [Applause.] Now I yield to the gentleman from Michigan.

Mr. KELLEY. When the gentleman was talking about asbestos I was about to say that I understand Canada is the chief source of supply of asbestos for this country, and it is used very extensively in the manufacture of automobiles, and the automobile manufacturers have had to sign an agreement of that sort.

Mr. MANN. This letter which I read does not confine this agreement to asbestos coming from Canada.

Mr. KELLEY. That is the chief source of supply of asbestos.

Mr. MANN. There was a great deal of asbestos before the Canadian asbestos beds were discovered. Now I yield to the gentleman from Ohio.

Mr. GORDON. I will say to the gentleman that I have considered with a good deal of care and attention those contracts

which he has just read into the RECORD. But are they not the voluntary renunciation of rights by American citizens, and does the gentleman suggest any way in which the Government can prevent its citizens from signing such contracts if they see fit to do so, and think it to their personal advantage to do so, in order to get these raw materials?

Mr. MANN. I could easily suggest many ways by which these men would not be compelled to sign these agreements under duress, but I am not going to suggest any.

Mr. GORDON. They are not compelled now to sign them.

Mr. MANN. Oh, they are compelled to sign it. A man in business who is threatened with the loss of all he has unless he signs an agreement to boycott somebody will sign the agreement.

Mr. GORDON. Can the gentleman suggest any way by which the Government can stop it?

Mr. MANN. Yes; I can suggest forty ways.

Mr. GORDON. Will the gentleman suggest one.

Mr. MANN. No; I am not going to. The gentleman can make the suggestion.

I have a letter here which I want to read, and then I am about through. It is dated Department of State, Washington, April 18, 1916, and is as follows:

SIR: The department has received your letter of April 11, 1916, in further relation to the claims of various American citizens against the British Government growing out of their detention at Falmouth, England, on August 4, 1914, as passengers on the steamships *Prinz Adalbert* and *Kronprinzessin Cecilie*.

The department regrets to inform you that it does not consider that it is in a position to press these claims at the present time. You will doubtless appreciate that the department must determine for itself the time and the methods for action in matters of this kind.

As I say, this is dated April 18, 1916, and relates to claims growing out of the detention of passengers on August 4, 1914, and the department says it is not in a position to bring these to the attention of the British Government at this time, although they are over 20 months old.

I do not say that the department may not be correct. If the State Department would not only call some of these things to the attention of the British Government, but tell them to get out of the way, there would be no difficulty.

I received last night from one of the largest bulb houses in America a catalogue of bulbs imported from Europe. They usually sell them at a lower rate if you buy them early in the season, in advance of importations. This bulb catalogue said that owing to the seizure by England of all the mail going between the United States and European countries—and this particularly applied to mail between the United States and Holland—it was impossible to now get a letter through short of 30 days' time, and that in most cases the time was much longer than that.

The State Department recently addressed a letter to Great Britain on the subject of the detention of mail. I read the letter, and the papers heralded it as a very strong letter, although it practically acknowledged that you could not send a check in a letter which England did not have the right to take the check out. I have wondered whether even that letter was sent with the fingers crossed. I would like to see something done where we mildly, and not too weakly, insisted that we do have a right to transact business with Holland and other neutral countries in Europe.

Mr. COOPER of Wisconsin. Will the gentleman yield?

Mr. MANN. Yes.

Mr. COOPER of Wisconsin. In that connection it may be proper to state—and perhaps the gentleman knows instances of this sort—that last week I received the complaint of a friend who had received letters from Germany and Austria, saying that pension checks going from this country to pensioners who had fought in the United States Army from 1861 to 1865 had been held up for months and months, and some of them never received at all.

Mr. MANN. That is between this country and some of the belligerent countries. I have had innumerable cases brought to my attention where in the ordinary course of business between this country and Norway and Sweden and Holland and other neutral countries, the mail has been taken out and our rights absolutely disregarded if not spit upon. I do not think that there would be any difficulty about it if we just told them to quit. [Applause.]

Mr. FLOOD. Mr. Chairman, I yield five minutes to the gentleman from Indiana [Mr. Cox].

Mr. COX. Mr. Chairman, I beg the indulgence of the committee for a few moments to briefly discuss a matter not germane to the present bill. I do not like to put myself in the attitude of being a critic or criticizing any of the departments, and what few words I say upon this subject this morning must not be considered at all as a criticism by me.

But, Mr. Chairman, I am getting a little bit tired of having the newspapers, magazines, and periodicals of the country criticize me, and practically every Member of Congress for not voting larger and heavier appropriations. I announced that I was for the naval bill when it passed the House, which carried $361,000,000 before the building program and the bill is finally completed. I think it is safe to guess that before the bill finally becomes a law it will carry $400,000,000 or $425,000,000.

Mr. COOPER of Wisconsin. Will the gentleman yield?

Mr. COX. Yes.

Mr. COOPER of Wisconsin. Does the bill carry $361,000,000? I thought it was two hundred and sixty-odd millions.

Mr. COX. Before the building program is completed I understood the gentleman from Pennsylvania [Mr. BUTLER] to say that it would carry $361,000,000.

Mr. TALBOTT. The bill as it left the House carried practically $270,000,000.

Mr. COX. But, Mr. Chairman, we can not prepare this country by making appropriations. We can not prepare this country by passing laws. The only thing that the Congress can do is to give to the department the bone and sinew necessary to prepare the country; and that is, give to the department the money. This Congress could appropriate a billion dollars for the Navy, or it could appropriate $500,000,000 for the Army this session. If Congress should make these appropriations it would not prepare the country. After the money is made available, from that time on, the working out of the details and the preparation of the country rests with the Army and the Navy.

When the naval bill was going through the House I took occasion then to call the attention of the committee to what I thought was at least some carelessness, if not neglect, on the part of the Navy officials in not paying attention to men of science, to men of thought, to men who have devoted their lives to studies along the lines of preparing this country for defense. There is a man living in the city of New York named Simmons, who, I believe, has worked out some wonderful inventions, and if the department will only give him a chance, with a view of seeing whether or not he has the details of inventions worked out, so far as I am concerned, I will be satisfied. What I said the other day I said with the hope that the Navy Department would pay some attention to him, having previously taken the matter up with him by correspondence, and having been turned down. I am going to put a few more remarks in the RECORD this morning on this same subject. If the foreign war has taught us anything, it is that the submarines are practically the masters of the situation in the European war to-day, and I especially rejoiced when the Committee of the Whole increased the number of submarines in the naval appropriation from 20 to 50. I voted for the increase. The newspapers to-day carry, in their headlines, at least, the news that Lord Kitchener, the great war lord of England, has gone to the bottom of the sea as the result of a torpedo. This man to whom I refer—Mr. Simmons, in the city of New York—claims that he has worked out to a mathematical certainty a torpedo that will carry 20,000 yards. The maximum limit now, as I am informed, of the new torpedo is 8,000 yards. Yet the Navy Department will not let this man get within gunshot distance of it. In addition to this, he says that he has worked out a submarine; and if I remember correctly his statement—and I want to detail it exactly as I remember it—the Navy Department has absolutely denied to him the right to go upon a submarine. Here is what he says in his letter:

NEW YORK CITY, N. Y., *June 3, 1916.*

Hon. W. E. COX, M. C.,
Washington, D. C.

DEAR SIR: I can not thank you enough for the great favor you have done for me.

When I forwarded the drawing of the torpedo to you I was satisfied that the naval officials would reject it, simply because they can not afford to give me recognition after they had previously given false report upon the practicability of my "gun" for submarines, and their report upon my "high-velocity shell and armor-piercing projectile" and "submarine" was so ridiculously nonsensical that I would consider it an insult to my intelligence to answer them.

Admiral Strauss said to me, "Now, don't let me discourage you; you have ability all right, but your gun doesn't seem to have any advantages over those now in use"; but the report he forwarded to me was to the effect that the gun would not stand the recoil and would not stand the pressure of water when submerged.

No one in the Navy Department discouraged me, but some of them have gotten me pretty well disgusted, and I am going to Europe just as soon as I find that there is no chance of an honest inventor to get a square deal here in America. I wish that you would inform me as to whether or not I have a chance of getting the torpedo adopted into the United States Navy, and I will hold the plans until I hear from you.

I have plans of a submarine that will need no batteries and may be operated among hostile fleets or in hostile harbors, and with safety, at

that. This submarine will be capable of rising to the surface, fire its guns and torpedoes, and submerge again in less than 30 seconds' time, and it will have a speed sufficient to overhaul any battleship afloat.

Our naval experts laughed at this when I told them of the rapid operation of the submarine; they have laughed at everything they did not understand and never seen in books.

Great Britain has requested that I forward my plans of torpedo for their consideration, but I have been told repeatedly that I would stand a better show in Germany, and will give all an equal opportunity to acquire the torpedo, armor-piercing projectile, new turbine, submarine, and all the essentials that goes to make it the most rapid operating under-sea vessel in the world.

I am inclosing clippings which tell of other inventors besides the Wright Bros., Gathmann, and myself that Uncle Sam refused to recognize until Europe brought them to the fore.

I thank you very much for your efforts in my behalf.

Very faithfully, yours,

SHERIDAN D. SIMMONS.

NEW YORK CITY, N. Y., *1713 Webster Avenue.*

Of course, they have no use for this man when he goes down to the Navy Department. He is not a highbrow in any sense of the word, but is a laboring man, yet, if I do say it myself, he is a wizard when it comes to working out the details of an invention. Almost everyone here knows something about Prof. Nicholas Murray Butler. I imagine he is not a man who goes off his feet and puts his O. K. and approval on a proposition unless he has gone through it. Mr. Butler is behind this man Simmons and his inventions. The Scientific American and many other papers are likewise behind him. Why is this? There must be a reason for it, and in my judgment it is due to the little petty rankling jealousies that exist in our Navy Department as against the civilian. It is due to the rankling petty jealousy in the Army, not alone as against the Army officials but as against the civilian; but that is not all.

I am going to insert here under leave granted an article published in the New York Herald recently. We all know something about the automatic gun which was invented in this country by Col. Lewis, which was turned down by the War Department, for they absolutely refused to recognize it. Yet the Lewis gun, invented by an American inventor, refused by the War Department in this country, is the gun that is to-day being used by England, France, Italy, Russia, and Belgium. I think that is undisputed. I will put this article in the RECORD, and if it is not correct, I will stand corrected by the War Department, and if what I have said concerning Mr. Simmons is not correct I will be delighted to rise upon the floor of this House and make corrections. Here is what the article says:

With the return to this country of Col. Isaac Newton Lewis, United States Army, retired, whose deadly automatic gun—refused by this country—has practically revolutionized organization and operation in the European war, and who is expected here this week, men in Army circles here predict the beginning of a bitter fight in the War Department over the Nation's unpreparedness.

The fight is expected to center around the Board of Ordnance and Fortification, of which Brig. Gen. William Crozier is the chief, and of which Col. Lewis had been the stormy petrel up to the very day of his retirement. It is predicted in certain quarters that the result will be a demand upon Congress for a sweeping investigation into the actual state of preparedness of this country, having in view the radical departures in equipment, armament, munitions, and operation that have been forced upon the nations now at war through the development of the modern means of destruction, like the aeroplane, the submarine, and the machine gun. Not one of these twentieth-century implements of warfare has been developed in the United States Army or Navy past the experimental stage; not one is included in any comprehensive way in the present formation of the various fighting units; not one has been considered with anything like the earnestness that it was by the chief powers at war even before the conflict started.

EQUIPMENT IS FAULTY.

Preparedness will be the whole issue. Men in position to know declare that the equipment of this country is years behind the time, that only a few of the submarines can compare with those of the warring nations; that the aeroplane service presents a meager showing against those of other nations; and that the coast fortifications are almost obsolete as means of defense against a modern fleet. It is declared on the best of authority that the 12-inch guns, the largest in this service, are outranged from 3,000 to 4,000 yards by the 12-inch guns of England, France, Russia, Germany, Italy, Austria, and Belgium.

Men in official circles here who are alarmed at the admitted deficiency of the country in the matter of preparedness assert that it is known to those directing the defense forces of the Nation that a few 12-inch guns could be brought to the entrance of New York Harbor and, absolutely out of the range of the 12-inch guns of the forts around that immensely wealthy port, reduce the city in a few hours to ruins.

GUN CAUSED REORGANIZATION.

The machine gun practically has turned organization upside down. Great Britain has virtually reorganized her whole infantry arm and done away with cavalry. Germany at the start of the war had thousands upon thousands of machine guns. In her equipment there were 50 machine guns to every 1,000 soldiers. Great Britain and France had a hopelessly small number to the thousand men, not more than six or eight. Belgium had an almost inconsiderable quantity. But she was making the Lewis gun and outfitted her men as fast as she could. Great Britain and France, seeing the terrific work of the German guns, increased their equipment as fast as they could have the weapons turned out. Now Great Britain has 20 of these automatic weapons to a thousand men, France has the same, and both countries are manufacturing them as fast as day and night forces can make them. Great Britain soon will increase this equipment to 32 machine guns to a thousand men, and France will do the same, increasing this allotment to 64 as quickly as possible.

The Lewis machine gun is declared by all military experts to be the most deadly and perfect of any in the world to-day, having greater accuracy, range, and facility of handling than the German weapon. Russia has given contracts for thousands of the Lewis guns, and by the end of the next year the entente allies will have spent $70,000,000 for the weapon which was refused by the United States Government. Great Britain is using hundreds of them on aeroplanes, and yet the United States denied, during the joint maneuvers in Connecticut in 1914, the privilege of a demonstration of this weapon on the four aeroplanes that were then being used by the Regular troops. The United States Army has about 2 machine guns to 1,000 men.

And this incident, as friends of the colonel here explain, was the final one in a long chain of discouragements that Col. Lewis suffered in the branch of the service he was trying to aid. He retired after 33 years and went to Europe to interest army men there in his gun. Just before the Connecticut maneuvers request was made of him for two of his machine guns for use on the Army aeroplanes. Col. Lewis said he would gladly lend them, without any restrictions, if the Government would supply its own ammunition. This was agreed to, and request was made for 2,000 rounds of ammunition. When this reached the Chief of Ordnance the ammunition was refused on the ground that the Lewis gun had not been adopted in the United States Army service, and therefore ammunition could not be issued for a gun that was not a service gun.

OTHER MACHINE GUNS REFUSED.

The Lewis gun suffered the same experience as practically every machine gun that was submitted to this Government, all by Americans. At the end of the Civil War Richard J. Gatling offered the first machine gun. It was refused and then developed abroad, the same as the Gardner, the Maxim, the Hotchkiss, the Colt, and the Benet-Mercier, which later was adopted and is now in use in the United States Army. Other inventions that were offered by Col. Lewis were rejected for one reason or another. He invented a depression range and position finder which were adopted into general use for the coast armament by the Board of Ordnance and Fortification in 1896. Hundreds of them were put in use. Other devices offered, but not accepted, were a horizontal base range finder, automatic sight, photographic time recorder, self-regulating differential dynamo, automatic electric cut-out switch, and others which friends of the colonel do not recall.

Although Col. Lewis and Gen. Crozier were constantly at odds, Col. Lewis is not coming to Washington to foment trouble himself, according to his friends here. He bears no animosity toward any one of the board and feels that he has had ample vindication for the efforts made against him in the adoption by four large nations of the gun which he invented and offered to the Government of the United States. But friends of the colonel who are alarmed over the condition of national defenses are lining up to make a fight.

Mr. HAMILTON of Michigan. Mr. Chairman, will the gentleman yield?

Mr. COX. Yes.

Mr. HAMILTON of Michigan. What kind of a machine gun is this?

Mr. COX. It is an automatic gun, said to fire 600 shots a second.

Mr. HAMILTON of Michigan. Who invented the guns that our Army is using?

Mr. COX. I do not know.

Mr. HAMILTON of Michigan. They seem to have had difficulty with them at Columbus.

Mr. COX. That is true.

In 1914 when the Army maneuvers were being held at sea on the Atlantic Ocean, off the borders of Connecticut, they asked Col. Lewis to loan them some of his guns with which to experiment in aeroplanes. He readily consented on condition that the Government would furnish the ammunition. Only 2,000 rounds were required, and yet when that request was made, it was refused; and upon what ground? On the ground that the Lewis gun had never been adopted by our Army!

And yet the Lewis gun, to-day, as I said a moment ago, is the gun that is used by all the allies, or practically all of them, against Germany. I repeat, as I said a moment ago, it is a matter of indifference how much money the Congress appropriates for the preparedness of our country if the men charged with the work of the details of this Army absolutely turn their backs upon all inventions made by civilians of this country.

Mr. MANN. Will the gentleman yield?

Mr. COX. For a question.

Mr. MANN. All right.

Mr. COX. Oh, yes; I will yield for a statement

Mr. MANN. I did not want to interrupt the gentleman. It was understood the gentleman was courteous, but I did not want to interrupt him.

Mr. COX. If the gentleman desires to make a statement. I will yield.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. MANN. Mr. Chairman, I have some time left, and I yield the gentleman the balance of my time.

Mr. COX. All right. I thank the gentleman.

Mr. MANN. The gentleman recognizes that in the consideration of the naval bill in the House the other day a letter was read from the Secretary of the Navy asking Congress to make an appropriation for the trying out of the Neff patent in

reference to submarines, and we declined to make the appropriation. I do not know who it was who made the point of order.

Mr. COX. I think it was the gentleman from Illinois [Mr. MADDEN].

Mr. MANN. The gentleman from Indiana and myself very often make points of order on similar things, but this time both escaped. Is not the main difficulty the refusal of Congress to *give to the* Navy and War Departments money with which they can make these investigations?

Mr. COX. I think that is absolutely correct.

Mr. MANN. Does not every Member of this House receive in the course of a year from somebody notice that he has some scheme connected with the Army or the Navy that will absolutely give defense to this country and revolutionize all warfare?

Mr. COX. Yes; that is true again.

Mr. MANN. Is it not perfectly patent that the Army and Navy can not investigate all these things unless they have the force and the appropriation with which to do it?

Mr. COX. I recognize, Mr. Chairman——

Mr. MANN. And is it not true that if they ask for such an appropriation the two men in the House most likely, under ordinary conditions, to make points of order against it will be the gentleman from Indiana and the gentleman from Illinois, myself? [Laughter.]

Mr. COX. Mr. Chairman, in response to that, I shall not make any point of order against any item which, in my judgment, would tend to prepare this country, and I regretted it very much when the gentleman from Illinois [Mr. MADDEN], if I remember correctly, made the point of order against the proposition proposed in the Navy bill to try out the patent. I recognize we can not appropriate money indiscriminately for these things. This man, Mr. Simmons, is not asking for an appropriation. The only thing that he has ever asked for is an audience with the proper naval authorities——

Mr. HAMILTON of Michigan rose.

Mr. COX. With a view to seeing whether or not it is a project that would put this country, to some extent, in line of defense. I yield to the gentleman.

Mr. HAMILTON of Michigan. I simply want to say to the gentleman, in my experience, the War Department, for illustration, has been very fair and very accommodating in trying out these proposed inventions; that within its resources it has always been willing to do what it could.

Mr. COX. Here is the worst rebuke I ever read in my life, when Col. Lewis's gun was turned down by the War Department, if it does do what it is claimed to do in this European war. Why did not they take hold of it, then?

Mr. REAVIS. Will the gentleman yield for a question?

Mr. COX. For a question.

Mr. REAVIS. I want to know whether the Lewis gun is more efficient than the gun they are now using in the Army?

Mr. COX. I take it it must be, otherwise the allies certainly would not be using it.

Mr. REAVIS. Beyond the fact the allies are using it rather than the one we are now using in our Army, has the gentleman any information as to which gun is the more efficient?

Mr. COX. I have not. Mr. Chairman, I ask leave to revise and extend my remarks by inserting this letter and this editorial.

The CHAIRMAN. The gentleman from Indiana asks unanimous consent to extend his remarks by inserting the letter and editorial indicated. Is there objection? [After a pause.] The Chair hears none.

Mr. FLOOD. Mr. Chairman, I would like to ask my friend from Wisconsin [Mr. COOPER] if we could make some arrangement about closing debate?

Mr. MANN. Does anyone here want more time?

Mr. ROGERS. I have two gentlemen who request five minutes each, which I can yield out of my time.

Mr. COOPER of Wisconsin. The gentleman from Missouri [Mr. MEEKER] wants half an hour.

Mr. FLOOD. I would like to ask how much time has been consumed on that side and how much on this side?

The CHAIRMAN. Thirty-two minutes has been used on the side of the gentleman from Virginia and 78 minutes on the other side.

Mr. MANN. How much time does the gentleman want over there?

Mr. FLOOD. We want about 20 minutes.

Mr. MANN. We have used more time than the gentleman has.

Mr. FLOOD. What I want to do is to reach a conclusion as to closing general debate.

Mr. MANN. Let us close debate in an hour's time.

Mr. COOPER of Wisconsin. The gentleman from Missouri [Mr. MEEKER] wants half an hour, and the gentleman from Massachusetts says he has two gentlemen who desire five minutes each, which time he can yield.

Mr. MANN. That would be 40 minutes.

Mr. COOPER of Wisconsin. If the gentleman on that side does not want to use more than 20 minutes, make it 1 hour, and——

Mr. FLOOD. The suggestion was made this morning before the gentleman from Wisconsin came in by the gentleman from Illinois [Mr. MANN] that we could get through this afternoon.

Mr. MANN. I think possibly we can, although I guess we will not be able to get through this afternoon; still, we will do the very best we can.

Mr. FLOOD. Suppose we limit the debate to 40 minutes—20 minutes on a side.

Mr. COOPER of Wisconsin. The gentleman from Massachusetts [Mr. ROGERS] has promised two Members 5 minutes each, making 10 minutes, and the gentleman wants 30, and that will be 40 minutes.

Mr. FLOOD. I ask unanimous consent, Mr. Chairman, that the general debate be closed in an hour, 30 minutes of it to be controlled by the gentleman from Wisconsin [Mr. COOPER] and 30 minutes by myself.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. COOPER of Wisconsin. And that will close debate at 8 minutes past 2.

Mr. FLOOD. Mr. Chairman, I yield to the gentleman from Texas [Mr. DIES].

Mr. DIES. Mr. Chairman, I got into the Chamber just as the gentleman from Illinois [Mr. MANN] was discussing some remarks of mine that occurred in the RECORD some days ago. I will say, Mr. Chairman, that these remarks were inserted in the RECORD in order to place myself correctly before my constituents with reference to an assertion that was being made in my district that I was present and did not vote on a great many important measures. And I will say, Mr. Chairman, I do not now recall having ever declined to vote upon any measure in the Congress since I have been a Member of it. I may have been present and not voted, but I have no recollection of it. Whatever other faults I may possess, I have usually voted one way or another on measures that have come up before this body. These records I have had looked up by the record clerk, and my information about these pairs was gained from him.

Now, with respect to the Money Trust in this circular which my friend from Illinois [Mr. MANN] criticized, I used this language:

> I was paired for it with a Republican, Mr. Harris, who was against it.

That is the Money Trust. I got that from the CONGRESSIONAL RECORD of the Sixty-second Congress, second session, page 5346. My understanding was then, and it is now, that when a Democrat is paired with a Republican in a Democratic Congress, the Democrat's name appearing at the left of the column and the Republican at the right, he is paired for it while the Republican is paired against it. If I am mistaken in that, it is simply a mistake.

Mr. MANN. Will the gentleman yield?

Mr. DIES. Yes, indeed.

Mr. MANN. Does the gentleman understand that a general pair means that one is for and the other against a proposition?

Mr. DIES. That is precisely what I understood when I inserted this in the RECORD.

Mr. MANN. The gentleman offers a valid excuse for insertion in the RECORD, but I doubt if anybody else has ever understood it in that way.

Mr. DIES. I think so. I have conferred with a great many gentlemen and they seem to be of my opinion about it. However, I can set the gentleman at rest about this business.

My contention was that I was not sitting by and refusing to vote on these questions. I had no particular ambition to show that I voted for the Money Trust investigation. I looked upon it as a sort of political horseplay for which I had no particular respect. If I had been present I would have voted for it, however. I wanted to show my constituents that I was not doing a cowardly thing by refusing to vote on questions that came up in the Congress.

And the same may be said of the Children's Bureau. That pair will be found on page 4195 of the RECORD, where it shows that Mr. DIES is paired with Mr. COPLEY, a Republican. I had no desire to show that Mr. COPLEY was against the bill. I do not know except in the manner in which the pair is stated,

and the thing I did want to show and the thing I want to now state to this House is, that the statement that I have been present and not voting on important questions is utterly without foundation, because I do vote one way or the other, whether right or wrong.

While I am on my feet, I wish to refer to another statement they make about me in my district, which is that the gentleman from Illinois said that I had referred to a speech of the President of the United States as idiotic. The facts are that the gentleman from Illinois spent a large part of his time in the last Congress making points of order against battle cruisers, against appropriations for submarines, and voting against battleships. I was present and helped him hold down large appropriations for the Navy. Some gentlemen who come back to the Congress confess the coin. They say that sentiment has changed, and that they were for a large Navy, but my friend from Illinois came in with a cock and bull story about meditation in a garden somewhere. He neglected to say whether he had a ground wire and received these meditations while he had his ear to the ground, or read them in the newspapers while in his garden, but he said he reached the determination never to make points of order against battle cruisers, never again to smite submarines, never again to raise questions against a large Navy, because, he said, he had meditated in his garden. Of course, it aroused our risibility to know that a man whose district had turned over for preparedness would have to go in his garden in order to turn himself over. [Laughter.] He could do it on the sidewalk, or elsewhere.

I did not say that the President's speech was idiotic. I said the speech of the gentleman from Illinois was somewhat of a twaddle.

I do say, and repeat, that the people who ride up and down the Avenue in automobiles with streamers do not send their sons to join the Army. They ride around with poodle dogs and with streamers calling for preparedness.

Preparedness means a gun upon the shoulders of the young men of this country, a gun with powder and lead in it; and I do say before this Congress that it is idiotic to parade around over the country talking about preparedness and putting your hand upon your sons' heads, not telling them to join the standing army. More than 60 days ago we authorized 20,000 additional soldiers that the President said we needed. We have not got them. We have not been able to get a thousand more into the Army than we had 60 days ago. And all those people in New York that are parading in 150,000 bunches up and down the streets could solve the question of preparedness and give dignity and integrity to their declarations if they would stay at home and tell their boys to join the Regular Army.

That is what I said was idiotic, and I say it to this good day, that it rings with insincerity. You know when men want a Regular Army in this country in time of peace they can get it by Congressmen sending their sons to join it and by Senators and naval and Army officers sending their sons. Why do not you open down here at the Peace Monument a recruiting station, and as this great parade for preparedness marches down the street let them enlist their sons and the members of their families? Tell them that the President wanted 20,000 men 60 days ago and that nobody will join.

I do say that this Nation is making itself ridiculous by these parades when nobody will join the Army. The gentleman from Massachusetts [Mr. GARDNER] was talking about preparedness and saying that no appropriation was big enough for him, and one man enlisted in 10 days in Boston. New York had a parade of 150,000 for preparedness when in April of this year there were 100 less enlisted in the standing army in New York than in April of last year.

Mr. ROGERS. Mr. Chairman, will the gentleman yield?

Mr. DIES. I regret I have not the time.

Mr. ROGERS. Just a word in regard to the statement as to enlistments in Boston.

Mr. DIES. I referred to the statement of the gentleman from Illinois [Mr. MCKENZIE] in the RECORD.

Mr. ROGERS. The gentleman from Texas is mistaken and the gentleman from Illinois [Mr. MCKENZIE] is mistaken if he seriously said any such thing. Eight thousand, instead of 1,000, have been enlisted in the Regular Army since the adoption of the emergency act, and Boston has done her full share and more.

Mr. DIES. Expired enlistments have kept the number down until only about 1,000 additional have been gotten into the Army, and we have to-day, as I understand it, about 19,000 vacancies in the standing army of the United States. And what I say is this, that if the people of Boston, Mass., and Beaumont, Tex., and New York, N. Y., and Fort Worth, Tex., instead of riding their Cadillacs and their Chalmers high-power cars up and down the streets, and tooting their horns for preparedness, had told their boys to put on a uniform and take a gun on their shoulder they would be doing something effective. War means hell and fighting and guns with powder in them; and all this tommyrot of parades amounts to nothing except to further gum-fuzz and confuse the American people. That is what I want to say. [Applause.]

Mr. ROGERS. Mr. Chairman, I yield two minutes to the gentleman from Illinois [Mr. MANN].

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] is recognized for two minutes.

Mr. MANN. Mr. Chairman, the original statement of the gentleman from Texas [Mr. DIES] that my colleague from Illinois [Mr. COPLEY] was opposed to the child-labor bill, when he was for it, the gentleman tries to get around. The statement was deliberately made, and it is not true. What the gentleman says about his reference to my speech is equally incorrect. The speech which he made on the floor, in which he referred to the President of the United States as having uttered idiotic ideas has nothing whatever to do with the speech he made on the floor concerning my garden meditation repentance. It is very natural that he mixes the speeches up, but unless he has changed the copy that was furnished to him—which many Members do—the RECORD will still show that he referred to the utterances of the President of the United States as idiotic.

Mr. DIES. Mr. Chairman, will the gentleman yield?

Mr. MANN. Yes.

Mr. DIES. That is not true. The gentleman made the reference to the gentleman named as a candidate for President; he referred to a candidate for the Presidency. I submit to this House my manuscript to show that the gentleman's statement is not true.

Mr. MANN. The gentleman was referring then to the speech by President Wilson some time after I made my speech on the subject in the House, and I at once took the floor to say that that was not the sentiment of Congress, as it was not, notwithstanding the gentleman's assault upon his own President.

Mr. DIES. I can set the gentleman right by saying that if I said anything about an idiotic speech, it must have been with reference to the only idiotic speech made that day, and that was by the gentleman from Illinois.

Mr. COOPER of Wisconsin. Mr. Chairman, I yield to the gentleman from Nebraska two minutes.

The CHAIRMAN. The gentleman from Nebraska [Mr. SLOAN] is recognized for two minutes.

Mr. SLOAN. Mr. Chairman, very many excellent gentlemen and ladies from Wymore, Nebr., in my district, have placed themselves on record by resolutions on the subject of the suffrage question, and they desire that these brief resolutions be made a part of the RECORD of this House. I therefore ask to have them made a part of my remarks.

The CHAIRMAN. The gentleman from Nebraska asks permission to extend his remarks by printing the resolutions indicated. Is there objection?

There was no objection.

Following are the resolutions referred to:

Resolutions unanimously passed at Wymore, Nebr., by about 40 men and 10 women residents.

Resolved, That we, citizens of Wymore, Nebr., assembled May 14, 1916, protest against the unjust action of the Judiciary Committee of the House of Representatives in blocking the passage of the Susan B. Anthony Federal suffrage amendment and demand that it be given an immediate and favorable report; and be it further

Resolved, That we hold the party in power responsible for the passage of this amendment before the close of the present session of Congress; and be it finally

Resolved, That a copy of these resolutions be forwarded the administration leaders, the chairman and members of the Judiciary Committee of the House, and the Nebraska congressional delegation, with the request that it be read into the CONGRESSIONAL RECORD in the Senate and in the House.

FLORENCE BAYARD HILLES, *Chairman*.

Mr. COOPER of Wisconsin. Mr. Chairman, I yield five minutes to the gentleman from Michigan [Mr. CRAMTON].

The CHAIRMAN. The gentleman from Michigan [Mr. CRAMTON] is recognized for five minutes.

Mr. CRAMTON. Mr. Chairman, in the remarks this morning of the gentleman from Illinois [Mr. MANN], reference was made by him to an amendment offered by Senator LA FOLLETTE, so stated by him, to the committee amendment to the river and harbor bill in the Senate, providing for the improvement of the Illinois River. I find that I was in error in my first suggestion to him, to the effect that the amendment was the result of a suggestion or offer from one of the Senators from Illinois. I find, however, that I was correct in my further statement that the said amendment was the result of an offer or suggestion

from the gentleman in charge of the bill and at that time in charge of the amendment in question.

I find by consulting the RECORD that the gentleman in question was Senator CLARKE of Arkansas, the chairman of the committee. After some discussion in opposition to this proposed improvement of the Illinois River, on the ground that it might endanger the level of the lake, the following occurred:

Mr. CLARKE of Arkansas. It might serve to limit the disputed questions in the proposition offered by the Senator from Wisconsin for me to say that I shall offer to include in the amendment the proviso that was omitted, including the limitation suggested by the War Department. So the Senator may discuss it as if that proviso was in the amendment.

Mr. LA FOLLETTE. For 250,000 feet?

Mr. CLARKE of Arkansas. Whatever it says, 250,000 cubic feet per minute. The Senator has the letter before him?

Mr. LA FOLLETTE. I have.

Mr. CLARKE of Arkansas. We will put that proviso in the amendment.

Mr. LA FOLLETTE. Mr. President, I think it will serve to shorten this discussion considerably, and with that assurance from the chairman of the committee I will simply offer that as an amendment to the bill as amended and will discontinue discussing this matter any further.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. Add to the proviso already agreed to the following: "*Provided further*, That the amount of water to be diverted from Lake Michigan through this system of waterways shall never exceed the rate of 250,000 cubic feet per minute."

Mr. LA FOLLETTE. With that amendment added to the amendment already adopted, which, as I understand, fully complies with the suggestion that comes from the War Department, I am disposed to withhold any further suggestion which I had intended to make.

Which he did, except to insert certain papers in the RECORD, Mr. Chairman, I have no desire to enter into any general discussion of the merits of that amendment, as I am not prepared to do so. I read the debate in the RECORD at the time it appeared, because I was interested, as everyone must be who represents a district in any way affected by the commerce of the Great Lakes, in any proposition that would permit the diversion of an immense quantity of water from the Great Lakes down the Illinois River and out through the Mississippi, and I took it from that colloquy that that was a settled question, that the people in support of the amendment having accepted that, and thereby forestalled the attacks being made upon it by the Senator, it was a settled question, and I have been surprised to know that it is proposed in the committee of conference to legislate upon a matter as vital as that, when it had not been mentioned in this House, as I understand, at all, and in the Senate was made the subject of an agreement and passed by unanimous vote.

Mr. MANN. Will the gentleman yield?

Mr. CRAMTON. My time is very limited. I will yield to the gentleman, however.

Mr. MANN. Does the gentleman know that in the Senate an amendment on this subject had been agreed to, offered by the Senator from Illinois [Mr. SHERMAN] before this controversy came up——

Mr. CRAMTON. I am under an absolute limit of time, and I think I have the gentleman's question.

Mr. MANN. No; the gentleman has not.

Mr. CRAMTON. I am willing to have all of it.

Mr. MANN. No; go on.

Mr. CRAMTON. Then I will answer what I have. The RECORD shows that the amendment in the bill was at the instance of Senator SHERMAN. Such is the statement of Senator CLARKE, but it embodied all of the agreement recommended by the Secretary of War except the vital point as to 250,000 cubic feet of water per minute, and that is the point that we upon the Lakes and around through the rivers are interested in.

Mr. CHIPERFIELD. Will the gentleman yield?

Mr. CRAMTON. I would like to yield, if I could have my time extended.

Mr. CHIPERFIELD. I would like to get the gentleman's time extended.

Mr. CRAMTON. Then I am right with you.

Mr. CHIPERFIELD. I ask unanimous consent that the gentleman's time be extended for one minute, because he is doing a grave injustice to one of the Senators from Illinois, and I know he would not wish to do that. I ask that his time be extended one minute.

Mr. FLOOD. Mr. Chairman, a rule has been adopted——

Mr. CRAMTON. I will say, Mr. Chairman, that I would like at least five minutes.

Mr. FLOOD. I yield to the gentleman one minute.

Mr. CRAMTON. Make it five minutes by unanimous consent.

Mr. FLOOD. I can not yield five minutes.

The CHAIRMAN. The gentleman can get recognition and then yield so much of his time as he wishes.

Mr. FLOOD. I will yield to the gentleman three minutes.

Mr. CHIPERFIELD. There is an injustice being done by the statement of the gentleman.

Mr. CRAMTON. I yield to the gentleman from Illinois.

Mr. CHIPERFIELD. Mr. Chairman, I am not a defender of Senator SHERMAN, but I have been vitally interested in this proposition, and I want to ask the gentleman from Michigan [Mr. CRAMTON], does he not know, as a matter of fact, that Senator SHERMAN has been bitterly opposed and is now bitterly opposed in every way to the limitation of the flow of water from Lake Michigan to 250,000 cubic feet per minute?

Mr. HAMILTON of Michigan. Mr. Chairman, I suggest that this discussion is in violation of the rule which forbids criticism of senatorial action.

Mr. CRAMTON. I will say to the gentleman from Illinois that I know nothing of Senator SHERMAN's attitude further than the statement of the chairman of the Senate committee—Senator CLARKE—that the committee amendment was inserted at the instance of Senator SHERMAN, and the said committee amendment did not include the limitation of 250,000 cubic feet per minute.

Senator SHERMAN was not present when this amendment proposing a limitation of the amount of water to be diverted was offered.

Mr. CHIPERFIELD. It is only fair to say that he is thoroughly opposed to the limitation.

Mr. CRAMTON. That is all right, then. It does not appear in the RECORD. There was an agreement entered into there by those who were present, Senator CLARKE representing the committee and Senator LA FOLLETTE opposed to an unlimited diversion of the water, but finally accepting the limitation recommended by the War Department, and that is the shape in which the bill now is. Now, what does an unlimited diversion of the water mean? I do not think any of us are sure. If we could permit that unlimited diversion and accomplish the object desired by the city of Chicago, without injury to other localities, all of us would favor it.

We want the city of Chicago to be just as healthy as possible, but we do not want that accomplished at the expense of lowering the level of all the lakes. We have spent millions of dollars in getting deeper channels and deepening the harbors in order to permit the vast commerce to come down. Is all that work to be destroyed by the diversion of this water? Before such a momentous question is decided by permitting such a diversion by legislation there ought to be a thorough investigation and a thorough discussion. Why, even in my district, in the waters bordering it, in the St. Clair River, there has existed a point dangerous to navigation, said by the War Department to be the most dangerous point of navigation between Buffalo and Duluth. The War Department has steadfastly refused to permit the removal of the middle ground opposite Port Huron, on the ground that it would reduce the level of the lakes above.

There is in the bill a provision which Senator SHERMAN called attention to, which, to remove this danger, permits a channel 400 feet wide along the Port Huron side water front, and in that case they provide for a compensating weir to offset the effect of such narrow deepened channel.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FLOOD. Mr. Chairman, I yield five minutes to the gentleman from Illinois [Mr. CHIPERFIELD].

Mr. CHIPERFIELD. Mr. Chairman, in the brief time allotted to me to-day there is no opportunity to discuss the question of the effect of 250,000 cubic feet flow from Lake Michigan through the sanitary canal of Chicago. But I desire to say that it is a question upon which no Member of this House should close his mind without the fullest information that is possibly attainable.

It is a problem I have been connected with for nearly 20 years, and during that time have had a close and intimate study and association with the matter.

The flow through the sanitary district channel of Chicago affects the lives and the health of two and a half millions of people. I am not competent at this time to speak with any degree of binding authority as to what that flow or any other flow accomplishes so far as lowering lake levels is concerned, but the question, Mr. Chairman, is in the courts of the United States, and hundreds of witnesses have been sworn and their testimony taken, and soon there is to be a decision on that proposition as to whether or not it does injure the commerce and navigation of the State represented by the gentleman who has just spoken, and whether it injures the commerce and navigation of the States represented by other gentlemen that border on the lake.

It is a momentous question and one upon which there should not at this time be any snap judgment. Action should not have been taken hurriedly by the Senate of the United States or any other body upon this question that is so vital to the needs of the people of Chicago.

Mr. LINTHICUM. Will the gentleman yield?

Mr. CHIPERFIELD. Very briefly.

Mr. LINTHICUM. How do you dispose of the sewage in Chicago? Have you not any system by which it is treated to get rid of it?

Mr. CHIPERFIELD. The system of disposal of sewage of Chicago is this: It was formerly ascertained that the sewage which had been going into the lake by gravity flow through the Chicago River, the country being very flat, was contaminating the water supply of that city, drawn from Lake Michigan, especially the health of the poor people of the city.

Children were being affected and sickened until they were literally dying off like flies. With the tacit consent of the whole country, the city of Chicago inaugurated this sanitary district, reversed the flow of the Chicago River, and spent more than $100,000,000 to dilute the sewage of the Chicago River with the water from the lake and send it down through the valley. At some time I want to get more time to discuss this matter thoroughly. In the meantime I ask the Members of this House to keep an open mind upon this question in order that a very grave injustice may not be done to the people of the city of Chicago.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. COOPER of Wisconsin. Mr. Chairman, I yield five minutes to the gentleman from Michigan [Mr. McLAUGHLIN].

Mr. McLAUGHLIN. Mr. Chairman, this amendment was inserted in the river and harbor bill for the purpose of enacting into law a rule or regulation adopted by the Chief of Engineers of the War Department and for many years enforced. The quantity of water permitted to be taken from Lake Michigan and turned into the drainage canal is 4,167 cubic feet per second, or a trifle more than 250,000 cubic feet per minute. There have been requests of the Secretary of War to modify his order and permit the taking of a larger quantity from the lake, but each request has been refused because, after careful study of the question, the Secretary has determined that it would be harmful to navigation to permit the taking of a larger quantity than is provided by his order.

February 12, 1912, there was a hearing before the Secretary of War. It was attended by many Representatives and Senators, by representatives of the Sanitary District of Chicago, by representatives of the Government of the Dominion of Canada, which we all understand is interested equally with ourselves.

We have a treaty with Canada which binds us to do nothing that will reduce the level of the water of the Great Lakes. Canada is interested, and has protested; Canadian representatives protested at the meeting of 1912; and the Secretary of War, Mr. Stimson, gave a written opinion, in which he determined that in justice to commerce, to the harbors of the Great Lakes and interests dependent upon them, in justice to or in keeping with our obligations to Canada, the water demanded by the drainage district could not and ought not to be permitted to be taken from Lake Michigan. This amendment is the first attempt ever made to determine by law the amount of water that should be taken from the lake.

It appeared, however, at the hearing in 1912 that in the face of the regulation of the War Department, which permits 4,167 cubic feet per second only, the drainage district of Chicago had been taking out of Lake Michigan upwards of 9,000 cubic feet per second—deliberately violating the law or the rule of the War Department, and they were requesting permission to take 10,000 cubic feet per second. The request, as I say, was denied.

There was a similar hearing last November in Chicago, and another demand for a larger quantity of water. The result of that hearing was that the Secretary adhered to his regulation to permit the taking only of 250,000 feet. So persistent has been the violation of the regulation of the Secretary of War by the drainage district of Chicago that the Secretary began, or under his direction proceedings were begun, in the district court of the United States at Chicago against the sanitary district. There was a full trial of the case, the Secretary of War seeking an injunction against the sanitary district of Chicago to restrain it from taking more water than is permitted by the rule of the department—that is, to compel it to obey the law. There has been no determination of that case.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. McLAUGHLIN. I will ask the gentleman from Wisconsin to yield me one minute more.

Mr. COOPER of Wisconsin. I regret that everything is given out, but I will yield to the gentleman one minute more.

Mr. MANN. The gentleman ought not to get so worked up.

Mr. McLAUGHLIN. It does work us up, because we are vitally interested. Mr. Chairman, for the purpose of showing the attitude of some of the people of Chicago toward this proposition, for the purpose of showing how unmindful they are of the interests of the rest of the country, I desire to quote one gentleman from Illinois as saying that they must be permitted to take this larger quantity of water, even though the results be that appropriations will have to be made by the Federal Government to rebuild and reconstruct every harbor on the Great Lakes. That statement was made in my hearing at the time of the hearing before the Secretary of War in February, 1912, by a gentleman who at the time of the making of it was a Senator from the State of Illinois. The amendment suggested by the Senate ought to be adopted. The city of Chicago must find ways and means of taking care of its sewage. It must not be permitted to pursue a course which will impose irreparable loss upon other parts of the country. The Great Lakes have other and better uses than to supply water for relieving the city of Chicago of the burden, which it is abundantly able itself to assume, of taking care of sewage.

Mr. COOPER of Wisconsin. Mr. Chairman, I yield the balance of my time, 26 minutes, to the gentleman from Missouri [Mr. MEEKER].

The CHAIRMAN. The gentleman has but 16 minutes remaining.

Mr. COOPER of Wisconsin. I thought I had 40 minutes in all.

The CHAIRMAN. No; 30 minutes on a side.

Mr. COOPER of Wisconsin. Mr. Chairman, I did not so understand it. I supposed that I had 40 minutes, because I had requests for that amount of time.

The CHAIRMAN. The Chair understood the committee agreed upon an hour, to be divided equally between the gentleman from Wisconsin and the gentleman from Virginia.

Mr. FLOOD. And the gentleman from Illinois suggested I might be able to yield some of my time over there, and I have already yielded five minutes.

The CHAIRMAN. The gentleman from Missouri is recognized for 16 minutes.

Mr. MEEKER. Mr. Chairman, in the time that I have—and I expected to have 30 minutes—I shall probably be able to suggest some things that can be answered when we get under the five-minute rule.

Mr. FLOOD. Mr. Chairman, I will yield five minutes of my time.

Mr. MEEKER. I thank the gentleman. On page 20 of the bill we find the following item:

Fifteenth International Congress Against Alcoholism: To complete the arrangements and provide for the entertainment of the Fifteenth International Congress Against Alcoholism, to be held in the United States, to be expended under such rules and regulations as the Secretary of State may prescribe, $10.000, or so much thereof as may be necessary, together with the unexpended balance of previous appropriations for the holding of said congress in the United States.

I would like to know how much is the unexpended balance at this time?

Mr. FLOOD. The gentleman asks that question?

Mr. MEEKER. Yes.

Mr. FLOOD. My understanding is that it is something over $35,000.

Mr. MEEKER. About $40,000 is the unexpended balance?

Mr. FLOOD. No; the original appropriation was $40,000 and some of it has been expended.

Mr. MEEKER. About $35,000 remains?

Mr. FLOOD. Something over $35,000.

Mr. MEEKER. So that we have about $35,000 already provided for the entertainment of this congress. If I have read the records correctly, in 1912, when the bill was introduced in the Senate to defray the expenses of the delegates from the United States to the congress held in Europe at that time, there was a proviso instructing the delegates to that congress to invite this congress to meet in the United States in 1915. That proviso was stricken out of the bill and the bill passed, making provision for defraying the expenses of the delegates to that congress without any authority whatever granted them to invite this congress to the United States; that is, official authority.

Nevertheless, the invitation was extended, and after the invitation had been extended the representatives of this organization came and asked for an appropriation, which was to be used in defraying the expenses of the congress in 1915. However, because of the European war the congress has been postponed. I would like now to ask from any gentleman here, any member of the committee, or anyone else, upon whose authority, after this invitation was stricken from the original bill, the invitation of the United States was extended to have the congress meet here. If any member of the committee can give that information, I would like to have it.

Mr. FLOOD. Who gave the invitation?

Mr. MEEKER. Who invited the congress to come here after the provision for inviting them was stricken out of the original bill in 1912?

Mr. FLOOD. The delegates from this country. There was no inhibition in the bill as to that.

Mr. MEEKER. But the authority to extend the invitation was specifically stricken out of the bill.

Mr. FLOOD. They were not inhibited from inviting the congress here. They did invite them, and the congress accepted the invitation; and since then the Congress of the United States has made provision for $40,000, and in that way approved the invitation. It provided to that extent for the entertainment of the congress.

Mr. MEEKER. The delegates, on their own authority, extended the invitation, and then came to Congress and asked for the funds?

Mr. FLOOD. Yes.

Mr. MEEKER. And $40,000 have already been appropriated?

Mr. FLOOD. Yes.

Mr. MEEKER. That was what I was wanting to get at in this part of the discussion. Mr. Chairman, I am perfectly willing and would be only too glad to see this Congress appropriate funds to entertain any congress which might be considered to add to the knowledge of the people of this Nation or to the people of the world, and I should be glad to see an appropriation made to call together a congress of scientists, authorities on the question of alcoholism. I should be glad to appropriate funds to call together a body of men who were not identified with any particular group of so-called reformers at so much per reform.

Mr. FLOOD. That is just what this congress is.

Mr. MEEKER. Very well. I will read a list and see how many scientists we have. I have been looking for some time through the record of who has been going to this congress and how much information they have been returning to this country, and I want to get into the RECORD just who has been attending these congresses. I have in my hand the list of delegates who went in 1909 from the United States. Mrs. M. M. Allen, of New York; Miss Brehm, of Chicago; Hon. G. F. Cotterill, of Washington; Rev. Dr. Wilbur Crafts, of Washington—and everybody understands what a great scientist he is; Prof. T. D. Crothers, M. D., Hartford; Mrs. E. Smith Davis, Milwaukee; Rev. E. C. Dinwiddie, Washington—we know what a scientific man he is; Dr. W. A. Ellsworth, Boston; Dr. Reid Hunt, Public Health Department, Washington; Mr. G. R. Munroe, Newark, N. J.; Surg. F. L. Pleadwell, United States Navy; Judge Pollard, St. Louis; Prof. C. Scanlon, Pittsburgh; Miss Cora Stoddard, Boston. That is the 1909 delegation, the scientists whom we sent over to Europe for the purpose of enlightening the world as to what alcohol really means to the country.

Now, I want you to know how we have improved on this list of delegates. In 1913 we sent another delegation at the expense of the Government, and it did not cost $40,000 at that time. We sent Miss Marie C. Brehm, Pittsburgh; Bailey B. Burrill, New York; Father Peter J. O'Callaghan, Chicago; E. H. Cherrington, Westerville, Ohio, editor of an antisaloon paper; Mrs. E. H. Cherrington also went; Laura Rooke Church, Washington; Miss Maynard N. Clement, Albony, N. Y.; Mrs. Maynard N. Clement, Albany, N. Y.; Rev. J. S. Davis, Hartford, Wis. Here cames E. C. Dinwiddie and Mrs. Dinwiddie. We know what real scientists they are and how much wisdom they have always brought to the solution of this question from the standpoint of prohibition and the solving of the question of alcoholism. Mrs. Margaret Dye Ellis, of Newark, N. J.; A. W. Ferris, of Watkins, N. Y.; Dr. G. H. Heald, Takoma Park, Washington; Mrs. Heald also went. I presume they are both scientific persons. Dr. Kingsbury, of Florida; Miss E. Norine Law, of Los Angeles, Cal.; Prof. P. J. Lennox, of Washington, D. C., and Mrs. Lennox also went. Dr. Lewis Mason attended. S. E. Nicholson, of Washington, and Mrs. Nicholson went to this great scientfiic gathering. Judge Pollard went again. Prof. Charles Scanlon attended; James K. Shields went over. Mrs. Mary Charlton Sibley attended; Prof. E. E. Southard, of Cambridge, Mass.; Miss Cora F. Stoddard, of Boston. Those were the people who attended in 1912. Do you know how many scientists were in that list and what knowledge they would be capable of bringing home to this country?

Mr. CLINE. Will the gentleman yield?

Mr. MEEKER. I do.

Mr. CLINE. Did those parties go at the expense of the Government?

Mr. MEEKER. They are the Government's delegates.

Mr. CLINE. How many were the duplicates of those who went to the preceding gathering?

Mr. MEEKER. It runs about fifty-fifty. The scientific people were all gradually eliminated and the antisaloon people are on hand.

Mr. FLOOD. I would suggest to the gentleman that was the fault of the appointing power——

Mr. MEEKER. I understand.

Mr. FLOOD. And not the people who made the appropriation.

Mr. MEEKER. Sure; I know how the appointments were made.

Mr. FLOOD. If President Taft had followed the line of his predecessor and appointed scientists the gentleman's criticism would not apply.

Mr. MEEKER. Let us look at the last list. This was the one that went over there in 1913 for the purpose of getting information to enlighten the world, and he selected a group of scientists about as near as the then Secretary of State could select, scientists from his point of view.

First comes the Rev. Dinwiddie, who went again.

Mr. KELLEY. What year?

Mr. MEEKER. Nineteen hundred and thirteen, when they asked for this congress to come here, and now want $10,000 more for the entertainment of the "drys." Well, I know it sometimes costs more to entertain them than it does the "wets." Now I will proceed to give you this list of scientists. Rev. Edwin C. Dinwiddie, superintendent of the National Temperance Bureau, Washington, D. C. This scientist goes again. Mr. Ernest H. Cherrington, editor American Issue, Westerville, Ohio, attended at our expense. Rev. S. E. Nicholson, secretary Antisaloon League of America, Washington, D. C., also went; Hon. Maynard N. Clement, former excise commissioner of the State of New York, attended; Judge Pollard, of St. Louis; Prof. Charles Scanlon, general secretary of the Temperance Committee of the Presbyterian Church in the United States, Pittsburgh; Mrs. Margaret Dye Ellis; Mrs. Edith Smith Davis, all "scientists," every one of these, and "authorities"; Dr. V. A. Ellsworth, superintendent of the Washingtonian Home for Inebriates, Boston; Rev. Father Peter J. O'Callaghan, president of the Catholic Total Abstinence Union of the United States, Chicago; Rev. James K. Shields, editor Illinois Issue, Chicago; Prof. Patrick J. Lennox, Catholic University, Washington, D. C.; Miss Laura Rooke Church, secretary-stenographer to the delegation, Washington, D. C. The Rev. Dinwiddie was chairman, the Hon. Maynard N. Clement was vice chairman, and the honorable secretary was Prof. Charles Scanlon. They sent in their report here, which is very interesting.

Mr. HARRISON. Will the gentleman yield?

Mr. MEEKER. Yes.

Mr. HARRISON. Is the gentleman objecting to the fact that Anheuser-Busch, Schlitz, and Pabst were not appointed delegates to this conference?

Mr. MEEKER. Not at all; but as long as the Anheuser-Busch Co. have to pay their own way and that of the Government, if the gentleman wants to know anything about that, as far as that is concerned——

Mr. MURRAY. The gentleman really wants to know if the gentleman knows Anheuser-Busch.

Mr. MEEKER. Yes; I know Anheuser-Busch; does the gentleman?

Mr. MURRAY. I have heard of it.

Mr. MEEKER. The Democratic convention will meet in St. Louis next week. [Laughter.] I simply want to call the attention of the committee to this one thing. This body of men and women, under gradually increasing political power in this country, have been increasing the amount which they have asked from the Treasury. They started only a few years ago with $4,500 to send these folks to Europe, Mr. Dinwiddie and the Antisaloon League crowd—prohibitionists—and now they have got their hands in the Treasury to the tune of $40,000, when, in both letter and spirit they have violated the trust of this Congress when they went in 1912, the provision being in the bill originally that the President of the United States should extend an invitation to this congress, and that was stricken out. The chairman of the committee said that of course there was no inhibition; that they could not prevent them from extending an invitation, but I say to you that this organization that has already gotten some "pap" from the Federal Treasury, is not entitled to $10,000 more. None of us, I think, prohibitionists or otherwise, have any objection, nor should we be concerned to do other than to appropriate all the funds that are necessary to any enterprise which has to do with the development of the scientific knowledge of the world. But when you go and look over the personnel of those delegates, you will find that they are not scientists, but that it has been a question of politics pure and simple. You can not make anything else out of it.

It is nothing but common cadging from the Treasury of the United States by a group of individuals who boast of the fact

that their organization has an income of over $1,000,000 a year, who are at the same time violating the trust of this Congress that was kind enough and considerate enough to send delegates over there—not a scientist among them, and nobody came back for the purpose of using anything that they got over there, even the resolutions that they put together, except for politics. Those same people have had $40,000 slipped across in an appropriation bill recently, and they now come in here with this little innocent-looking item for $10,000 more. It is up to this Congress to begin to take some account of the activities of that organization. It is not my purpose this morning to give a little historic sketch of the maneuvers of this league, but I want to say to you, and some of you know it, that there is no more powerful lobby in Washington than the one headed by Mr. Dinwiddie and his crowd, and you know it just as well as you know that you are here.

Mr. CLINE. Will the gentleman yield?

Mr. MEEKER. Yes.

Mr. CLINE. The gentleman has undoubtedly read the proceedings of this congress. Is there anything disclosed there of a scientific nature that was undertaken?

Mr. MEEKER. There was nothing used that had not been used before, not a thing. I can get up a lot of glittering generalities on any subject, but this group of men and women is not identified with the scientific bodies of America. They are political, and you can not get away from it. I have no objection to a man who wants to be a prohibitionist. That is his business. I have a greater respect for him if he lives the way he votes. The only one who merits contempt is the one who votes one way and lives another.

Mr. HUDDLESTON. Is it any more inconsistent for a man in a dry territory drinking than a man in a wet territory not taking a drink?

Mr. MEEKER. Inconsistencies are always in evidence.

Mr. FLOOD. Is the gentleman aware of the subjects that were discussed at Milan in 1913?

Mr. MEEKER. Yes.

Mr. FLOOD. Would the gentleman mind if I would read him a list of those subjects?

Mr. MEEKER. You can do so, and then I will ask you a question.

Mr. FLOOD. The following is a list of a few of the subjects:

A. The State and alcoholism.
(1) Legislation.
(2) The consumption of alcohol in the colonies.
(3) The attitude of the courts toward alcoholics, and particularly the application of restraint and conditional sentence.
(4) The juridical, political, and economical causes which make it the duty of the governments and parliaments to repress alcoholism.
B. Society and alcoholism.
(1) Questions of organization.
(2) Indirect repression of alcoholism; that is to say, by improving the workmen's homes.
(3) The treatment of alcoholics in sanitariums, asylums, and the like.
(4) Medical problems bearing on the subject.

Does the gentleman think that those are worthy subjects?

Mr. MEEKER. Fine. Did you read the addresses delivered on those subjects?

Mr. FLOOD. I read some of them.

Mr. MEEKER. So did I—all of them.

Mr. FLOOD. And not all of them were delivered by prohibitionists, by any means.

Mr. MEEKER. I leave it to the country after reading the list.

I want to say that so far as Mr. Dinwiddie is concerned and Dr. Craft and all of these other agitators and reformers, that so far as what they got I take my hat off to them. I am not quarreling with them because they came in here and got $40,000 out of the United States Treasury or that they want $10,000 more. They would take the whole Treasury if they got a shot at it. The question is how much more of this sort of thing we want to allow to slip in. You might as well ask any other organization that is termed "reform." Uncle Sam has helped them to the extent of $4,000 and $8,000 and $10,000. He sent them to Europe, but they should not invite the people to come at his expense. But these people go and invite the others to come and say, "We want the money." That is the thing in a nutshell.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FLOOD. Mr. Chairman, I will occupy the attention of the committee only for a few moments. I do not care now to enter into a defense of the great assembly of scientists, jurists, and statesmen in the world-wide fight against the evil of alcoholism. I will have something to say on that subject when that item is reached in the bill.

I do think, however, I should make some reply to the remarks of the gentleman from Massachusetts [Mr. ROGERS] with reference to the violation of the efficiency system established in connection with our Consular Service. The gentleman complains that the former Secretary of State, Mr. Bryan, secured from the President six Executive orders placing in the Consular Service men who did not get into that service under the Executive order of President Roosevelt.

The facts are, Mr. Chairman, that for years and years, from 1897 to 1906, the Consular Service was filled, consuls and consuls general were appointed, under the spoils system by various Republican administrations until they had gotten the entire Consular Service filled with Republicans. In 1905 President Roosevelt undertook to get Congress to enact a law applying civil-service efficiency rules to the Consular Service. He failed to do it. He then issued an Executive order, in the name of efficiency, blanketing into the service, under rules that protected them from removal, every Republican in the service, and then they stayed in until 1913, when the Democrats came into power, and most of them are still there; of the 57 consuls general, 233 consuls, and 327 vice consuls, Executive orders have been issued in only six cases since President Wilson was inaugurated.

Mr. SLAYDEN. Mr. Chairman, will the gentleman permit me a question?

Mr. FLOOD. I will.

Mr. SLAYDEN. Does not the gentleman think the administration was very remiss, then, in the discharge of its duties?

Mr. FLOOD. From my standpoint, they were, because there were numbers and numbers of inefficient Republicans placed in there under the spoils system and protected by the Roosevelt order putting them under a civil-service system. I think the Secretary of State did not go far enough and did not remove a sufficient number of them. But so careful was he to observe the rules of civil service that had been applied—not by Congress, but by President Roosevelt, not, in my opinion, for the purpose of protecting the efficiency of this service, but for blanketing in office and keeping in office a lot of political appointees—that of all this great number of consuls and consuls general Executive orders were issued to remove only six, and to replace those six with gentlemen who, I presume, although I do not know, were Democrats.

Mr. SLOAN. "Deserving Democrats."

Mr. FLOOD. Certainly it does not lie in the mouth of a civil-service worshiper to complain of this record of the former Secretary of State.

Mr. SLAYDEN. Mr. Chairman, will the gentleman permit another question along that same line?

Mr. FLOOD. Yes.

Mr. SLAYDEN. Does not the gentleman think that if they are to have a permanent tenure, in common decency and fairness there should be a just and equitable distribution among the parties of the country? Does he not think a Democrat should be permitted to aspire to some of those offices, if not all of them, under a Democratic administration?

Mr. FLOOD. I think when the time came to pass a law, not an Executive order, making this service a part of the civil service, these people should have been removed and examinations should have been held for all of these positions. But the then Secretary of State, Mr. Bryan, took a different view. I hold no brief from Mr. Bryan. I have had controversies with him. But I frequently came in contact with him as Secretary of State, and I do believe he applied his great ability to the duties of that office with singleness of purpose and a devoted desire to serve the welfare of this country, as much so as any other man who ever occupied that office, and among the things he thought was for the best interests of the country was the plan to have this Consular Service placed in the civil service; and therefore he went before the Committee on Foreign Affairs and asked that a bill be introduced into Congress and enacted into law placing the service upon an efficiency basis. That bill became a law, and under a Democratic administration, under the administration of Mr. Bryan in the State Department, for the first time in our history that service was fully and completely placed upon the merit system. I think the criticism——

Mr. ROGERS. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. Yes.

Mr. ROGERS. The gentleman introduced a bill which, I assume, is the bill he refers to, on the 19th of May, 1914, providing for secretaries in the Diplomatic Service and appointments in the Consular Service?

Mr. FLOOD. Yes.

Mr. ROGERS. That bill contains three sections, squarely putting the appointments thereafter and promotions thereafter on the merit basis after examination. Will the gentleman explain why it was, before that bill was taken up in the House, that those three sections were taken out of the bill which he

introduced on September 3, and which was the basis of the legislation?

Mr. FLOOD. Because other provisions were put in that put this service under the merit system.

Mr. ROGERS. That is not correct. Will the gentleman say that it was not at the request of Mr. Bryan that he struck out those three sections?

Mr. FLOOD. The bill as it passed put the service under the merit system. The three sections referred to by the gentleman were objected to by Members of the House, and it was doubtful if the bill in that shape could have been gotten through at that time; and that fact was communicated to Mr. Bryan, and in his desire to have the legislation enacted, he acquiesced in the suggestion made to him that those sections be stricken out. But the bill that became a law on February 5, 1915, while Mr. Bryan was still Secretary of State, places the Consular Service and the appointment of secretaries in the diplomatic service upon an efficiency basis, and provides that they shall be appointed to classes and not to posts, and shall be promoted from one post to the other. Since that time there has never been a consul or a consul general or secretary put in except in the lowest class in that service, and we owe that enactment to Mr. Bryan as much as to anyone else; we owe it to the Democratic administration. [Applause.]

Mr. ROGERS. There are two exceptions to that. Two have been put in since the act of February 5, 1915.

Mr. FLOOD. Who are they?

Mr. ROGERS. One is Kelly. I refer to the two cases in my own knowledge. The case of Kelly was one, and the other was the consul at Nottingham.

Mr. FLOOD. Since the enactment of this law?

Mr. ROGERS. Yes.

Mr. FLOOD. What was the time?

Mr. ROGERS. One was in February, 1915, and one in June, 1915.

Mr. FLOOD. They were put in under a provision of law that authorized the appointment to these diplomatic positions of gentlemen who had been in the service of the Government. There have been no appointments of those who were not in the service at all, since the enactment of this law, either to the Consular Service or to secretaryships in the Diplomatic Service. I simply allude to that as a matter of justice to the former Secretary of State, who I believe rendered great service to his country; and while I do not agree with him about everything, I do think we ought at least to do justice to him in discussing these measures.

How much time have I remaining, Mr. Chairman?

The CHAIRMAN. Six minutes.

Mr. FLOOD. I notice that the gentleman from Illinois [Mr. MANN] is somewhat critical in his remarks of the administration in regard to our dealings with Great Britain. I believe, Mr. Chairman, that the country approves fully the action of President Wilson in our foreign affairs. Germany violated our rights upon the high seas. She violated international law and the instincts of humanity, and there were people who demanded that the President should break off diplomatic relations with that country and go to any extent that that step might lead to. The President preferred to pursue the wiser course and to negotiate as far as negotiation was wise. He denounced the sinking of the *Lusitania* with such force and vigor as to challenge the attention of the civilized world and to arouse anew respect for international law and to awaken in Germany a respect for the principles and precepts of that law. There was complaint that he negotiated too long, but he negotiated successfully; he did not go to war, but achieved the greatest diplomatic victory of this generation, and now Germany and this country have agreed upon the principles upon which submarine warfare shall be carried on in the future, and the basis upon which our violated rights of the past shall be settled. The country approves of what the President has accomplished diplomatically by delay and negotiation, instead of by forcing the issue with that great country at once. [Applause.]

Germany yielded, because she knew that we were right, and because she knew that this country had at its head a man who, when he was right, would enforce the right regardless of cost. [Applause on the Democratic side.] The questions we were dealing with, with Germany, involved the lives of our people and of innocent persons who traveled on merchant ships of belligerent countries, and they demanded the President's first attention. The controversy with England involved property rights, and could wait. England has violated our rights upon the seas. She has violated the dignity of our flag, and there were those who demanded that the President should at once hold England to the strictest accountability. He preferred to pursue the wiser course—to pursue the course that was followed by Washington in 1793, when England, then at war with France, violated our rights just as much as she has in this instance. He preferred to pursue the course followed by Grant in 1873, when Spain violated the dignity of our flag to a greater extent than England has done in this instance. He preferred to follow the course pursued by Blaine in our controversy with Chile, and by Cleveland with England over the Venezuelan question. These great statesmen were determined to assert the rights of this country and maintain them at any cost, but they preferred to do it by negotiation and by diplomacy rather than by war, if that could be done, and they accomplished the results they had in mind greatly to the gratification of the people of this country and the glory of this Nation. [Applause.] They did just as President Wilson will do with England in this case. England will settle with this country and settle with her people, because they know that we are right in the demands we are making upon them, and the President is going to demand every right that an American citizen is entitled to. England knows that we have at the head of this Government a man who when he is right is willing to go to any extent that may be necessary to enforce the rights of his people and the honor of his Nation. [Applause on the Democratic side.]

Mr. KINKAID. Mr. Chairman, I ask unanimous consent to extend the remarks which I made yesterday on House joint resolution 184.

The CHAIRMAN. The gentleman from Nebraska asks unanimous consent to extend his remarks on House joint resolution 184. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will read the bill for amendment under the five-minute rule.

The Clerk read as follows:

RECEIVING INSTRUCTIONS AND MAKING TRANSITS.

To pay the salaries of ambassadors, ministers, consuls, and other officers of the United States for the periods actually and necessarily occupied in receiving instructions and in making transits to and from their posts, and while awaiting recognition and authority to act, in pursuance of the provisions of section 1740 of the Revised Statutes, $65,000, or so much thereof as may be necessary.

Mr. ROGERS. Mr. Chairman, I move to amend by inserting the words "vice consuls" after the word "consuls," in line 3, page 4.

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, page 4, line 3, by inserting after the word "consuls" the words "vice consuls."

Mr. MANN. I reserve a point of order on that amendment.

Mr. FLOOD. I think that is a very wise amendment. I understand from the gentleman from Massachusetts that he is going to follow that up with some other amendments with a view of improving the situation of the vice consuls in the service.

Mr. ROGERS. I think this stands on its own merits, however, without regard to whether other amendments are adopted later or not.

The act of February 5, 1915, provided that—

"Vice consuls" shall be deemed to denote consular officers subordinate to such principals exercising and performing the duties within the limits of their consulates at the same or at different points or places from those at which the principals are located.

That language, in so far as it permitted the exercise of functions by vice consuls at different points and places, was, I think, new, and it permitted the State Department at its pleasure to assign vice consuls at other points than those at which their principal consuls were residing. If that permission should be taken advantage of by the Department of State, it would mean that vice consuls would become in certain cases practically minor consuls at smaller posts, although with the title of vice consul. If that situation results, they will need to be given instructions, and so on, just as the consular and other officers of the Consular Service are now given.

Mr. MANN. The law now provides where there shall be consulates, does it not?

Mr. ROGERS. I am not familiar with that law if it does.

Mr. MANN. The law provides where there shall be consuls and the salary?

Mr. FLOOD. The law provides for posts and the President makes appointments to the grades, and the consul is assigned to the post according to the grade of the post.

Mr. MANN. Does not the law that we passed some years ago specify where the consuls are to be located?

Mr. FLOOD. That was the law of February 9, 1915.

Mr. MANN. That did not change the location of the posts?

Mr. FLOOD. No.

Mr. MANN. Did not the old reorganization law that we passed some time ago provide where there should be consuls, and fix the salaries?

Mr. ROGERS. That was the law of 1906.

Mr. FLOOD. No; that law fixed the salary.

Mr. MANN. Can the President appoint a consul at any place he pleases?

Mr. FLOOD. No. The posts are fixed by law. Under the present law men are not appointed to a particular post.

Mr. MANN. I understand. Formerly the consuls were paid by the fees, and we passed a law some years ago fixing the salaries, and I thought that we specified the places where there should be consuls.

Mr. FLOOD. That was fixed by law prior to that time.

Mr. MANN. I think in the law of 1906 we specified the salaries for a lot of places.

Mr. FLOOD. Yes.

Mr. MANN. I think we fixed the salaries at every place instead of fees.

Mr. FLOOD. The gentleman from Massachusetts has that law.

Mr. ROGERS. I have a version of it printed by the Department of State, but it simply refers to the 1915 law as to this section.

Mr. FLOOD. The gentleman from Illinois is right; we fixed the salaries for each place. For instance, we fixed the salary of the consul at London at $12,000, and so on down at all places where the law had established consuls.

Mr. MANN. That is what I thought. Now, as to vice consuls, whether we should start in to pay their expenses not now authorized I am not sure. There are a great many vice consuls. We do not undertake to pay now certain expenses of theirs. Is the gentleman quite sure that we should do that?

Mr. ROGERS. I am quite sure that we should provide for it if advantage is to be taken of the permission granted the State Department under the act of 1905 to continue vice consuls in certain positions where consular agents are not operating.

Mr. MANN. We have never undertaken to pay the consular agents or vice consuls either for receiving instruction. For the first time the bill carries a limited amount. The custom heretofore has been, for a number of years at any rate, to appropriate so much money as may be necessary for these expenses of transit and receiving instruction. With a limited amount I do not know that it makes so much difference, but if we could return to the old system and pay so much as may be necessary, I suppose we would pay for the transportation of vice consuls all over the world in a little while without any limitation.

The CHAIRMAN. The time of the gentleman has expired. Does the gentleman from Illinois wish to be heard on the point of order?

Mr. MANN. No, Mr. Chairman; but it is subject to a point of order. There is no authority at law for it.

Mr. ROGERS. Is not this provision in the act of 1915 a sufficient authority?

Mr. MANN. No; we have a provision in section 1740 of the Revised Statutes for the payment of these expenses, but that does not apply to vice consuls.

Mr. ROGERS. That is true, but I thought the act of 1915 would be considered broad enough.

Mr. MANN. I doubt if the amendment, if inserted, would make any difference, because the authority to pay expenses only applies to certain offices. However, does the gentleman from Virginia [Mr. FLOOD] think this is a proper provision?

Mr. FLOOD. I think it is a good provision, but I think it is subject to a point of order.

Mr. MANN. Well, Mr. Chairman, I feel overwhelmed by the two gentlemen, and I withdraw the point of order. [Laughter.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts [Mr. ROGERS].

The amendment was considered and agreed to.

The Clerk read as follows:

To pay the actual and necessary expenses of transportation and subsistence, including the transportation of household and personal effects, under such regulations as the President may prescribe, of diplomatic and consular officers in going to and returning from their posts or when traveling under orders of the Secretary of State, but not including any expense incurred in connection with leaves of absence, $125,000.

Mr. MANN. Mr. Chairman, I reserve a point of order on the paragraph. I notice that in this item you increase the appropriation from $50,000 to $125,000 and appropriate for the first time for the transportation of household and personal effects, also all the cost of subsistence. Is the increase in appropriation because of these changes as to what we shall pay for? Heretofore we paid for transportation at the rate of 5 cents per mile. Now, it is proposed to pay all the cost of transportation, all the cost of subsistence, and also all the cost of transferring household and personal effects to and from foreign countries.

Mr. FLOOD. The argument was made by the department to the committee—and the committee was convinced by the argument—that the 5-cent provision did not in any way compensate the official when moved from one place to another. The Consular and Diplomatic Service is now a permanent service. They are transferred from one post to another and their salaries are not extravagant. Five cents per mile did not pay the traveling expenses frequently of the officer himself.

Mr. MANN. I have no doubt of that.

Mr. FLOOD. In comparing the treatment of the men in that service with those of the Army and Navy we found that they were treated very much less generously, and the idea was to allow the department to make an allowance to the officers when transferred so as to cover the actual expenses.

Mr. MANN. The gentleman understands that we do not make any limited allowance in the Army or the Navy or the Revenue-Cutter Service, and I believe those are the only branches that have household transportation at the Government expense. This makes an unlimited amount. In other words, any of these gentlemen abroad may buy all of the things he wants, of any kind, before he comes home and have them brought home at our expense.

Mr. FLOOD. No. The statement was made that the department would adopt a system of rules to limit that.

Mr. MANN. That is true, but we do not know what that system will be. As far as this law is concerned, it is unlimited.

Mr. FLOOD. Yes.

Mr. MANN. The reason for the increase in the expense is because of this change?

Mr. FLOOD. Yes; largely.

Mr. MANN. My observation is, and I have made it before, that all reforms, especially designed to effect economy, are very expensive.

Mr. FLOOD. I think the gentleman is right about that.

Mr. MANN. Here is a proposition to effect a needed reform in the interest of the Government, and in order to do it we increase the appropriation from $50,000 to $125,000.

Mr. FLOOD. That is what it does.

Mr. MANN. While I think, perhaps, it is subject to a point of order, I do not want to interfere with what is necessary.

Mr. FLOOD. I will say to the gentleman that, in the judgment of the State Department and in the unanimous judgment of the Committee on Foreign Affairs, after hearing the question discussed, it was deemed that this request for the additional $75,000 for this purpose was a reasonable request.

Mr. MANN. I think a few years ago—and I am not sure that I am right about it—there was no limitation of 5 cents a mile, and the Congress, in order to prevent undue extravagance, put in a limitation of 5 cents a mile?

Mr. FLOOD. Yes.

Mr. MANN. That is for the transportation of the person. You now not only remove the limitation but add very much to what is to be transported at Government expense. I withdraw the point of order.

Mr. COX. Mr. Chairman, I renew the point of order, and reserve it.

The CHAIRMAN. Does the Chair understand that the gentleman from Indiana makes the point of order?

Mr. COX. No; I do not make it, I reserve it. My heart is to make the point of order, but I am afraid to do it because I am afraid that I will do wrong. I recall reading the report on this item, and, if I remember correctly, the man who made the statement before the committee proposes under rules and regulations that the Government pay not only the traveling expenses of the diplomatic officer but also of the members of his family. Am I correct in that?

Mr. FLOOD. Yes.

Mr. COX. That is in process of contemplation?

Mr. HARRISON. The actual expense.

Mr. COX. Not only of the person himself but of all the members of his family?

Mr. FLOOD. Yes.

Mr. COX. Does not the gentleman feel that that would be an abuse of authority?

Mr. FLOOD. I do not think so. These people are moved about at the will of the department. I happen to know a secretary who was at Stockholm, who had expensive quarters there, well furnished. He was telegraphed to go to London, and he was kept in London six months, and finally had to bring his furniture there at great cost to him, after having paid six months' rent at Stockholm. Five cents a mile is evidently too

little. Consuls, secretaries, and diplomatic officers moving about in the war zone can not begin to pay their own expenses at 5 cents a mile. and the idea of this is something like the idea that keeps in the 20 cents a mile for Congressmen, to enable them to bring their families to the seat of government at the expense of the Government, on the theory that they have a right to have their families with them. Here is what the evidence showed. I read from Mr. Carr's statement:

Mr. CARR. The existing law, which is a provision in the appropriation act, provides that diplomatic and consular officers traveling to and from their posts or under the orders of the Secretary of State shall receive an allowance of 5 cents a mile to cover the cost of traveling expenses. That operates in this way: On a journey of comparatively short length 5 cents a mile does not cover the actual traveling expenses, and on a steamer journey, we will say, across the Atlantic or the Pacific, 5 cents a mile more than covers the cost of transportation of the officer himself. The great difficulty is that the 5 cents a mile makes no provision whatsoever for the transfer of the officer's household effects, or his family, or anything except his own personal transportation and light personal baggage.

Now, that works great hardship, particularly upon a consular officer who is likely to be ordered from one place to another on comparatively short notice, as is necessary and usual in the service. He has to break up his household; usually sell his furniture at a sacrifice; and advance the cost of transporting his wife and perhaps several children. He may have to carry household effects with him, because he may not be able to get satisfactory new ones in the place to which he is going; or, if he is able to get them there, he will at least have to sell out his old furniture and buy new furniture to replace it. That is a source of very great expense and hardship upon a man who is receiving, say, a salary of $2,000 or $3,000 or $4,000, where the journey is anywhere from 5,000 to 10,000 miles.

Mr. COX. This provision will apply to the ambassadors as well, will it not?

Mr. FLOOD. Yes; it does.

Mr. COX. It applies to the Diplomatic and Consular Service altogether, no matter whether a man's salary is $2,000 a year or $17,500 a year?

Mr. FLOOD. The gentleman is right about that.

Mr. COX. I want to again call the gentleman's attention to the point suggested by the gentleman from Illinois [Mr. MANN]. It does look to me as though this is dangerous ground.

Mr. FLOOD. I will say to the gentleman that there was not any contemplation on the part of the department of paying the expenses of ambassadors and ministers. What is in mind are the secretaries and the consular officers.

Mr. COX. But the gentleman concedes that under this provision it can be done?

Mr. FLOOD. Yes.

Mr. COX. The Army gets 7 cents a mile while traveling under orders, and the Navy gets 8 cents a mile. If I remember correctly, an Army officer is permitted to transport household goods to the amount of 7,000 pounds, and a Navy officer to the amount of 8,000 pounds. Unless that is safeguarded in some way under rules and regulations to be prescribed by the President, there is no limit, and they could move Marshall Field's store from abroad to this country if they desired.

Mr. FLOOD. The statement made to the committee was that the Department of State would immediately adopt a system of rules and regulations governing how much a diplomatic and consular officer could carry with him on these trips.

Mr. COX. Does not the gentleman feel that it ought not to be more than that given to the Army and the Navy?

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. COX. Mr. Chairman, I ask for one minute more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. FLOOD. I do not think that that is a fair rule. I was convinced that the mileage system was not a wise system.

Mr. COX. I am referring to the number of pounds permitted.

Mr. FLOOD. That might be.

Mr. COX. That they ought not to have in excess of what the Army and Navy have.

Mr. FLOOD. That might be. I suggest to the gentleman that we try it out this year, and next year we can work into the law the system that has been worked out by the State Department.

Mr. HARRISON. Will the gentleman yield?

Mr. COX. I will.

Mr. HARRISON. I notice that Mr. Carr in his statement before the committee says:

These regulations would naturally follow the regulations of the departmental civil service of the Government plus some provision for the officer's family——

The CHAIRMAN. The time of the gentleman has expired.

Mr. HARRISON. Mr. Chairman, I desire about two minutes.

Mr. COX. I will reserve the point of order until the gentleman gets through.

Mr. HARRISON (continuing)—

These regulations would naturally follow the regulations of the departmental civil service of the Government plus some provision for the officer's family, or a certain limited number of members of the officer's family, and a limited amount of household effects and baggage.

In other words, the President could lay down any regulations that he might see fit as to the number of the family that might travel, or any other regulation that he might see fit to impose. I notice also in the hearing that Mr. Carr, speaking about this provision, says:

Let me illustrate that. We transferred an officer from Washington to Hongkong. His expenses for himself and wife were $820.50. The Government reimbursed him at the rate of 5 cents a mile, or $587.80, leaving the officer to suffer a personal loss of $232.70 plus any costs of transporting household effects and baggage he may have had.

And throughout the hearings he cites other instances where these men in traveling from these places lose two or three hundred dollars and sometimes more.

Mr. TEMPLE. Is there not another point that ought to be taken into consideration, and that is to travel in certain countries sometimes it has to be by carts or horseback, which is much more expensive than 5 cents per mile?

Mr. HARRISON. Yes; by horseback, carts, and in some insome instances in Persia they had to employ mules.

Mr. TEMPLE. They have to organize a caravan?

Mr. HARRISON. Or by caravan, and so forth.

Mr. COX. Mr. Chairman, I feel the point of order ought to be made, but I will let it go this year.

The CHAIRMAN. Does the gentleman withdraw the point of order?

Mr. COX. I withdraw the point of order.

The Clerk read as follows:

To enable the President to meet unforeseen emergencies arising in the Diplomatic and Consular Service and to extend the commercial and other interests of the United States and to meet the necessary expenses attendant upon the execution of the neutrality act, to be expended pursuant to the requirement of section 291 of the Revised Statutes, $200,000, together with the unexpended balance of the appropriation made for this object for the fiscal year 1916, which is hereby reappropriated and made available for this purpose.

Mr. FLOOD. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 9, line 3, after the word "purpose," strike out the period, insert a colon, and the words "*Provided*, That in his discretion the President may employ part of this fund for the payment for personal services in the District of Columbia or elsewhere notwithstanding the provisions of any existing law."

Mr. MANN. Mr. Chairman, I reserve a point of order on that. It is not expected to be a permanent arrangement, is it?

Mr. FLOOD. No; this is just an emergency arrangement.

Mr. MANN. I withdraw the point of order.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

To enable the commission to continue its work under the treaties of 1884, 1889, 1905, and the protocol of May 6, 1896, between the United States and Mexico, $17,000.

Mr. MANN. Mr. Chairman, I move to strike out the paragraph. What possible excuse is there for the making of this appropriation?

Mr. FLOOD. We have a treaty obligation which has never been abrogated.

Mr. MANN. We have no treaty obligation about this.

Mr. FLOOD. Oh, yes; we are under treaty with the Republic of Mexico.

Mr. MANN. Oh, I understand; but we have no treaty obligation that requires the expenditure of this money. Nothing is being done and nothing has been done for years. Now, let me be square about it. I do not know, and I am frank about these things. We made this appropriation for several years after the trouble in Mexico commenced, because John Wesley Gaines, formerly a Member of the House, was drawing a salary. The newspaper accounts stated that Mr. Gaines threw up the job. Now, to whom are we under obligation of making a useless appropriation?

Mr. FLOOD. We are under no obligation to any individual, but we are under obligation to the Republic of Mexico.

Mr. MANN. But nothing is being done; the gentleman will not say that.

Mr. FLOOD. Something is being done; oh, yes, the gentleman is mistaken about that.

Mr. MANN. Oh, I am not.

Mr. FLOOD. I think the gentleman is. We have always had an organization, and while the specific purposes for which the first treaty was made are not being carried out now, we have always kept and will have to keep an account of the quantity of water that we are taking into this country that belongs to

Mexico, because we are under obligation under this treaty not to take but half of it, and unless we have these gaugers, water measurers, along there, we will not know whether we are taking water which belongs to our sister Republic or not, and the treaty provides that we should have a commissioner and a consulting engineer and a secretary. Now, the treaty still stands, and I understand that Mexico has some sort of a commissioner——

Mr. MANN. Oh, they are not paying any money to anybody.

Mr. FLOOD. I do not know whether they have got any money——

Mr. MANN. We are not doing anything and they are not doing anything.

Mr. FLOOD. But this treaty requires us to keep up this organization. If conditions slow down in Mexico, this commission would go right to work. It is a very small appropriation. The former appropriation was $50,000 generally, and the commissioner was an Army officer, and did not get any pay out of that. We have not got a commissioner. Mr. John Wesley Gaines was the secretary, and we have not got him, but we have got a consulting engineer and we have got an assistant engineer, Mr. Gilliam, from North Carolina, and the State Department feels that this skeleton of this organization ought to be kept up.

Mr. MANN. I remember when it was up last year we made an appropriation then of $14,000. This bill provides for $17,000. I do not remember whether it was stated on the floor of the House openly—if it was not stated openly, it was stated privately by a large number of the members of the Committee on Foreign Affairs—there really was not the slightest excuse for the appropriation unless the House wanted to pay a salary to John Wesley Gaines.

Mr. FLOOD. If that was stated, it was not exactly the fact.

Mr. MANN. I believe if this is——

Mr. FLOOD. It was the desire of a great many Members of the House to see Mr. Gaines well provided for, but, outside of that, we understood we had to keep a skeleton organization up under the treaty we had with Mexico. Here is what the Secretary of State said to me under date of February 19 of this year:

It is true that, on account of conditions existing in Mexico, it has not been possible to carry on the regular work of the commission relating to the disposition of new questions arising in regard to the boundary line; but the American section of the commission is frequently requested by persons having interest in lands along the Rio Grande for information in regard to the location of the boundary line and upon other points connected therewith which have been considered by the commission, so that it is practically imperative that the present small staff be retained. While it is not possible to foresee when it may be feasible for the commission to resume its regular work of determining questions in relation to the boundary, the United States should be in a position to resume its part of the work as soon as it shall have been formally notified of the appointment of a Mexican representative on the commission. Several questions of importance are awaiting the action of the commission, the decision in regard to one of which, the precise location of the boundary line along the Colorado River, will have an important effect upon the cost of one of the projects of the Reclamation Service to the people in that locality. It is learned from the Reclamation Service that it is highly desirable that the last-named question be determined as speedily as possible.

In addition to the foregoing it should be pointed out that for a number of years the Governments of the United States and of Mexico have been making a systematic study of the equitable distribution of the waters of the Rio Grande and of the methods by which the flood waters of the tributaries of that river can be controlled so as to reduce to a minimum the variability of the channel of the river itself. Consultation with the Geological Survey reveals the fact that the measurements of the amount and flow of the waters of the Rio Grande are of much importance and that it is very desirable that the work of taking such measurements should be continued.

I have, therefore, to request that so much of the amount estimated for the boundary commission as shall appear proper to the committee be included in the bill to be reported.

The CHAIRMAN. The time of the gentleman from Illinois [Mr. MANN] has expired.

Mr. MANN. Mr. Chairman, I ask unanimous consent for two minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MANN. There is no work being done. There is work that ought to be done and work that will be done under the treaty whenever we can get somebody from Mexico appointed to the office of commissioner who can join in the work. The Government can not do the work. Now, the only possible use that could be made of this appropriation is to put some new person on the job and pay him the salary. I realize it is difficult to abolish an appropriation where somebody has to go off of the pay roll, at any time, but I had hoped it was possible to postpone an appropriation before a new man was appointed in an office that is purely a sinecure at present.

Mr. FLOOD. Mr. Chairman, there is some work being done by the officers connected with this commission. We have not a commissioner now, and we have not a secretary, but we have engineers and we have the skeleton of the commission which can be filled in very readily as soon as conditions in Mexico enable them to appoint a commissioner to unite with our commissioner in fixing the boundary lines of the Rio Grande. No work has been done on that for some years, and it is very important that it should be done, but there is work being done in reference to the Reclamation Service down there. And as my friend from Texas tells me, hundreds of people are interested in the service in his State and there is work constantly being done. And this appropriation is principally for that purpose, to pay the gaugers along those rivers, the water of which ought to be equally distributed between this country and the people of Mexico, so that we will not take more than our share and lay ourselves liable to damages to that Republic by taking water belonging to their people.

Mr. MANN. Mr. Chairman——

Mr. SMITH of New York. This appropriation does not provide for a successor to Mr. Gaines, does it?

Mr. FLOOD. No. There is nothing in the bill in regard to appointments.

Mr. SMITH of New York. This is for gauges and work that is going on? The work that Mr. Gaines has been on would be done by anybody who might succeed him?

Mr. FLOOD. We have an office in El Paso. Already in the office there is a consulting engineer, whose name I do not recall now, quite an intelligent man, drawing quite a good salary, and there is an assistant engineer, and there are a number of gaugers all up and down the river. So they keep this office open. We made a calculation of what was necessary for officers to keep the commission going and limited the appropriation to that amount.

Mr. NORTON. How was the amount expended last year? Has the gentleman a statement of that?

Mr. FLOOD. I think it was $14,000. About $4,800 went to the consulting engineer, and $4,800 went to the secretary, and about $1,800 to the assistant secretary, and the rest of it to the gaugers, stenographers, for office rent, and so forth. Mr. Gaines was secretary. He is the only one who is out now.

Mr. NORTON. Who is the consulting engineer? Is he a retired Army officer?

Mr. FLOOD. No; he is not a retired Army officer. He is a gentleman named Corbin, from Colorado.

Mr. TEMPLE. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. Yes.

Mr. TEMPLE. We have no report yet of the amount expended for the present fiscal year, ending June 30, 1916, when the appropriation was $14,000?

Mr. FLOOD. No.

Mr. TEMPLE. But there was a balance of something like $7,000 left over for the year ending June 30, 1915, when the appropriation was $20,000. How much will be expended this year I do not know.

Mr. FLOOD. There is no commissioner. Gen. Mills, an Army officer, was the commissioner. The salary he got was the Army salary, and his expenses were paid out of this appropriation. That was in the old days, when the appropriation was from $20,000 to $50,000, when they were doing some work with reference to the bancos in the river. Now they have a consulting engineer and his assistant and the gaugers and the office rent.

Mr. NORTON. What does the consulting engineer do?

Mr. FLOOD. He is provided for by treaty and is the head officer of this commission as it stands, and he is next in office to the commissioner when there is one.

Mr. MANN. There is no commissioner and there is no secretary. There is no commissioner from Mexico and there is no organization on the other side. This is a joint commission. It can not work from this side unless there is somebody on the other side. They have not done any work, and they can not do any work.

Mr. FLOOD. Let me interrupt the gentleman. You will recall that they had two commissions, one by treaty and one that Mr. Knox established by some sort of an agreement or arrangement with Mexico, for the purpose of keeping measurements of this water and the equitable distribution of this water. That has not stopped working for a minute. It is working now.

Mr. MANN. If the gentleman will let me make a statement I will be glad to have the privilege. Last year, or as the gentleman says, now, this year, until Mr. Gaines resigned, $4,800 salary was paid to the consulting engineer, $4,800 was paid to the engineer, $1,800 to the assistant engineer or assistant secretary—I have forgotten which—not one of whom has a thing to do. That would be $12,000 out of an appropriation of $14,000

for the current year and out of the $13,000 for the year before. There is nothing to do. There is nothing to do except to draw the salaries.

Now, if gentlemen want to pay a salary when there is no human probability of continuing this work in the next fiscal year, very well. Of course, everybody will agree that if the trouble in Mexico ceases, so that they can appoint their commissioner and take part in the work, we can make an appropriation so that the work will be carried on, but it will not be done now.

[Mr. GARNER addressed the committee. See Appendix.]

The CHAIRMAN. The question is on the amendment of the gentleman from Illinois, to strike out, on page 10, the appropriation contained in lines 12 to 18, inclusive, for the Mexican Boundary Commission.

The amendment was rejected.

Mr. NORTON. Mr. Chairman, I move to strike out "$17,000," in line 18, page 10, and to insert "$5,000."

The CHAIRMAN. The gentleman from North Dakota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, on page 10, line 18, by striking out "$17,000" and inserting "$5,000."

Mr. NORTON. Mr. Chairman, it seems that there was $6,000 of the $13,000 appropriated in 1914 remaining unexpended. There is no statement as to the amount unexpended at the end of the fiscal year 1916, but it is reasonable to assume that there is at least the same amount expended that there was last year; and it would seem to me that if there is no commissioner, and only a consulting engineer employed, $5,000 additional would be ample.

Mr. FLOOD. Mr. Chairman, $5,000 would not be any better than nothing. We may be paying the consulting engineer too much, but he is getting $4,800 a year, and the gaugers who are measuring the water ought to be paid. They are employed under the consulting engineer.

Mr. NORTON. Will the gentleman yield?

Mr. FLOOD. Yes.

Mr. NORTON. Does not the gentleman know what the unexpended balance was on July 1, 1915?

Mr. FLOOD. Not a cent. They kept within the appropriation.

Mr. GARNER. It was all used up last year?

Mr. FLOOD. Every bit of it.

Mr. NORTON. The gentleman from Pennsylvania [Mr. TEMPLE] said that year before last there was $6,000 unexpended.

Mr. FLOOD. That was a much larger appropriation.

Mr. TEMPLE. Will the gentleman yield?

Mr. NORTON. Certainly.

Mr. TEMPLE. The appropriation for the year ending June 30, 1915, was $20,323.46. The amount expended was $13,595.99 and the balance remaining $6,727.47.

Mr. FLOOD. Then we cut down the appropriation to $14,000, and I understand every bit of it was used and that there will not be any of it left.

Mr. GARNER. It was all used.

Mr. NORTON. I do not doubt the statement of the chairman that there will be none of it left, but I do not see why any more is needed than enough to pay the consulting engineer.

Mr. TEMPLE. In order to avoid any misunderstanding, some gentlemen are using the phrase "last year." Let it be understood that that means the last appropriation, for the fiscal year which has not yet expired but will expire on the 30th of this month. For last year the figures were as I read them a moment ago.

Mr. GARNER. Will the gentleman yield?

Mr. NORTON. Yes.

Mr. GARNER. The importance of gauging this water is, I think, far-reaching. It may involve a controversy between the Mexican Government and this Government, with reference to damages that they might claim or we might claim for taking more water on one side of the river than on the other. That is the object in gauging the water.

Mr. NORTON. The Mexican Government is not gauging this water, is it?

Mr. GARNER. Yes; the Mexican Government is gauging this water, and so it is quite important and more far-reaching than the question of a commission.

Mr. NORTON. Have they gaugers employed there at this time?

Mr. GARNER. Yes; and have had for a number of years.

Mr. FLOOD. These gaugers have been employed for a number of years, and we have had to pay for the excess of water that we have taken.

Mr. GARNER. In my judgment that is more important than the commission, because the friction existing between the two countries as to the boundary might be settled through diplomatic channels, but the question how much water each Government is taking is an important question which might involve a claim by one Government against the other.

Mr. NORTON. You might use the gaugers, but the consulting engineer is not necessary.

Mr. FLOOD. The consulting engineer is the head of the gaugers. He might be dispensed with, but he has not been dispensed with, and he is there at the head of this gauging work.

Mr. NORTON. And he will not be dispensed with as long as you keep up this appropriation.

Mr. FLOOD. Should there not be some head of this system?

Mr. NORTON. Not necessarily.

Mr. FLOOD. To whom are these gaugers to report?

Mr. NORTON. They can keep their records themselves.

Mr. FLOOD. How is the Government going to get them?

Mr. NORTON. This work is done under the State Department, is it not?

Mr. FLOOD. Yes; but they can not go down there.

Mr. DAVIS of Texas. Mr. Chairman, I represent the whole State of Texas. That river borders my district.

Mr. NORTON. Do I understand the gentleman to say that he represents the whole State of Texas?

Mr. DAVIS of Texas. Yes; the State of Texas. It is immaterial to this issue whether Mexico is doing any gauging or not. We are carrying on an irrigation system all up and down that country, and under the treaty we are only allowed to take half the water. If we take more than half the water during a time of low water, Mexico complains, and it is liable to complicate matters with that country, and we must have some kind of a system by which we can know what we are doing under the treaty obligations that we owe to Mexico; and it is very important that we should know how much water is used.

The CHAIRMAN. The time of the gentleman from North Dakota has expired. The question is on the amendment of the gentleman from North Dakota to strike out, in line 18, page 10, the figures "$17,000" and insert "$5,000."

The amendment was rejected.

The Clerk read as follows:

The judge of the said court and the district attorney shall, when the sessions of the court are held at other cities than Shanghai, receive in addition to their salaries their necessary actual expenses during such sessions, not to exceed $10 per day for the judge and $5 per day for the district attorney, and so much as may be necessary for said purposes during the fiscal year ending June 30, 1917, is hereby appropriated.

Mr. COX. Mr. Chairman, I move to strike out the last word. The paragraph at the top of page 15 provides for the expenses of the judge of the United States court at Shanghai when the court is held outside the city, not to exceed $10 per day. How much did that expense amount to last year? Is there any record of that? That is a pretty large per diem.

Mr. SLAYDEN. In a cheap country.

Mr. COX. As the gentleman from Texas says, in a cheap country.

Mr. SMITH of New York. Does the gentleman think that $10 a day is large for the expenses of a judge?

Mr. COX. I think it is—entirely for expenses. He does not spend it.

Mr. HARRISON. Is it not a fact that all judges of the United States courts get $10 a day for service outside of their home in this country?

Mr. COX. As I understand it, this is for expenses.

Mr. HARRISON. It is the same for the judges in this country; when they serve away from home they get $10 a day. That was the theory on which this was placed in this bill.

Mr. COX. I know that has been in the law for years, but what I wanted to know is how much was expended under this paragraph last year?

Mr. MEEKER. Is it not worth $10 a day to live in China? [Laughter.]

Mr. FLOOD. All the expenses of that court and the officers for the year ending June 30, 1915, amounted to $31,200, or $2,800 more than was appropriated.

Mr. COX. It is not as much as I supposed it was.

Mr. FLOOD. No; they watch them very carefully.

The pro forma amendment was withdrawn.

The Clerk read as follows:

Expenses, United States agency: Necessary and contingent expenses, $200; rent of rooms, not more than $1,000.

Mr. BYRNS of Tennessee. Mr. Chairman, I move to strike out the last word. I notice the committee has reduced the appropriation for rent from $1,500 to $1,000, thereby saving $500. I understand that this will necessitate the commission moving to less commodious quarters on New York Avenue. I did not rise, however, to criticize the action of the committee in that respect, but there is an item of $200 for necessary and contingent expenses which, I am informed, will not be sufficient to meet the actual expenses required in the event of certain contingencies during the next fiscal year. Information has been given me that there are about 16 cases under advisement by the arbitration commission. Six of them involve claims by this Government against Great Britain amounting to over a million and a half dollars and 3 by Great Britain against this Government amounting to more than half a million dollars. I am told that there has been an exchange of notes recently between the two Governments with a view of having the cases now under advisement determined finally, and if these awards are rendered it will be necessary to make publication of the findings, and in such event the $200 would by no means be sufficient to pay the extra expense plus the expense of keeping up the library and other expenses of the office.

I wanted to ask the gentleman if he would have any objection to accepting a small amendment, say, $100, making $300 for contingent expenses, especially in view of the fact that he has saved $500 on the rent.

Mr. FLOOD. The gentleman from Tennessee is mistaken about the rent matter. The amount allowed for rent last year was $600, and we have increased it to $1,000 in order that the tribunal may keep the commodious quarters they are now occupying and not have to move their valuable papers and the library.

Mr. BYRNS of Tennessee. The gentleman knows that they were allowed to remain in their present quarters this year at $600, with the hope and expectation that for the next fiscal year the rent would be increased to $1,500, as it had been previous to this year. They could not stay where they are now for $1,000 next year, and so they have entered into an arrangement for offices on New York Avenue near Fifteenth Street; the quarters are less commodious and less convenient. But I did not rise for that purpose, and I do not wish to be understood as finding fault with the committee for its action in the matter of rent.

Mr. FLOOD. I think this is an important tribunal, Mr. Chairman, and I am willing to accept the proposed amendment of the gentleman from Tennessee.

Mr. BYRNS of Tennessee. Mr. Chairman, I move to strike out on page 16, line 12, the figures "200" and insert the figures "300."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 20, line 12, strike out the figures "200" and insert the figures "300."

The amendment was agreed to.

The Clerk read as follows:

Nineteenth Conference Interparliamentary Union: The appropriation of $40,000 "for the purpose of defraying the expenses in Washington City incident to the Nineteenth Conference of the Interparliamentary Union to be held in Washington in 1915, to be expended under such rules and regulations as the Secretary of State may prescribe," made in the act making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1915, is hereby extended and made available for the calendar years 1916 and 1917.

Mr. SLAYDEN. Mr. Chairman, I move to amend by striking out the words "in Washington City," in line 7, page 20, and if I may be indulged for a few minutes I will explain why.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 20, line 7, strike out the words "in Washington City."

Mr. MANN. I would like to suggest to the gentleman from Texas that his amendment would not accomplish anything.

Mr. SLAYDEN. Why not?

Mr. MANN. That is only a citation. It is in quotation marks, and refers to an appropriation heretofore made. The gentleman will have to do something more than change the citation. All that has reference to is an appropriation of $40,000 heretofore made.

Mr. SLAYDEN. And reappropriated.

Mr. MANN. I know; but if the gentleman changes the language in the quotation of what the appropriation was last year he will accomplish nothing.

Mr. SLAYDEN. Mr. Chairman, I will ask to withdraw my amendment.

The CHAIRMAN. Without objection, the amendment will be withdrawn.

Mr. MANN. The gentleman can add the words "made available for the calendar years of 1916 and 1917 for the purpose of defraying expenses incident to the Nineteenth Conference of the Interparliamentary Union."

Mr. SLAYDEN. Does the gentleman think that the limitation in line 7 will not be held to apply?

Mr. MANN. That is in quotation, and refers only to the appropriation heretofore made. If we incorrectly cite the appropriation, probably the department would think it was an error upon our part, but they would not do anything more.

Mr. SLAYDEN. What is the gentleman's suggestion as to the language to be used?

Mr. MANN. I suggest that the gentleman add after the word "seventeen" the language "for the purpose of defraying the expenses incident to the Nineteenth Conference of the Interparliamentary Union." That will cover what the gentleman wants.

Mr. SLAYDEN. And the gentleman would not go further and say that the expenditure in that connection is not restricted to expenditures in the city of Washington?

Mr. MANN. No; I have not restricted it at all.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

After the word "seventeen," in line 16, page 20, insert the words "for defraying the expenses incident to the Nineteenth Conference of the Interparliamentary Union."

Mr. HARRISON. Mr. Chairman, on that I reserve the point of order.

Mr. SLAYDEN. Mr. Chairman, I hope I may be allowed to proceed for five minutes, as I dare say the first five minutes have already gone. The reason that I am offering the amendment is this: I am not asking for any change of the appropriation, for it is abundant. I was connected with the expenditure of the appropriation when the conference was held here in 1904. An appropriation of $50,000 was made that year. I was on a committee charged with the entertainment of these visiting parliamentarians, and the expenditures in connection with it. It was our pleasure to return to the Treasury a fifth of that appropriation, which was not expended. These people were received in New York, magnificently entertained, taken out to St. Louis to the exposition, and as far west as the Rocky Mountains, brought back by way of Omaha, Chicago, Detroit, Niagara, New York, and to Washington, where they had their interview with the President.

Mr. HARRISON. Did the various cities pay the expenses from Washington to those places?

Mr. SLAYDEN. No; the municipalities only entertained those people while they were in the different cities. They were essentially and always the guests of the country.

Mr. HARRISON. And all of the expenses came out of the appropriation made by the Federal Government?

Mr. SLAYDEN. Except for the local entertainments, which were inexpensive, however agreeable.

Mr. HARRISON. How many were in the party?

Mr. SLAYDEN. As I remember it, 314 to 320—somewhere in that neighborhood.

Mr. HARRISON. Mr. Chairman, if the gentleman will permit, when this matter was presented to the committee, if I recall correctly—and all of the committee were for the appropriation to entertain them in the city of Washington—the committee was told by some of those who advocated this proposition that these cities would pay the expenses of the delegates after they got here, and we were given to understand, as I understood it, that the Federal Government would not be called upon to pay to send them all over the country.

Mr. SLAYDEN. The Government does not have to do that. There is no obligation to do it. They need not be sent anywhere, except to Washington.

Mr. HARRISON. But if we write into this law a provision that we are going to pay the expenses here and the $40,000 should not meet those expenses, then the Congress might feel under obligation to make an additional appropriation.

Mr. SLAYDEN. Mr. Chairman, the experience and the precedent set in 1904 show that the appropriation will meet it. If we do invite the representatives of about 23 or 24 or 25 governments to come and hold a great conference in the interest of the whole human family, for the purpose of promoting arbitration, something we all stand for, and which this House with one exception voted for the other day, I do not think we ought to qualify our own tender of hospitality in this way.

With reference to the apprehensions of the gentleman from Mississippi [Mr. HARRISON] that the appropriation will not meet such an expense, I desire to tell him that I know absolutely that it will do it. I was on that committee from the time these guests arrived in New York, in 1904, until they were brought to

Washington. They did not come here first. I myself watched with care all of the expenses. They were magnificently entertained. They had everything that was required to make an elegant, complete, and satisfactory entertainment. It was hospitality such as is rarely shown. We ought not to invite them and to make a tender of hospitality which we do not mean. If this is to pay only the hotel expenses of those gentlemen in Washington, then the appropriation is entirely too large. It will not cost any such sum of money, unless it is thrown to the birds.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. SLAYDEN. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SLAYDEN. If we are going to invite people to visit us, I believe we ought to extend hospitality like a prince.

Mr. CARY. Will the gentleman yield?

Mr. SLAYDEN. Yes.

Mr. CARY. Will the gentleman inform me how many delegates there would be?

Mr. SLAYDEN. I can only say to the gentleman that there are about 3,300 or 3,400 members of the Interparliamentary Union, and experience indicates that there will be approximately 10 per cent present.

Mr. CARY. Will the gentleman yield?

Mr. SLAYDEN. It is a long way, and they will have to pay their expenses here and back to their homes.

Mr. CARY. Does the gentleman think $40,000 would be too much to entertain them?

Mr. SLAYDEN. I said it would be too much to entertain them if it were confined to their stay in the city of Washington.

Mr. CARY. But it would be plenty if they remained in the city of Washington?

Mr. SLAYDEN. Forty thousand dollars is enough, if we care to do so, to transport them to Chicago or Milwaukee—that city made famous by certain enterprises—to St. Louis or Chicago; they all want to go to those great cities; and to entertain them handsomely and bring them back to New York, the usual port of embarkation.

Mr. FLOOD. Will the gentleman yield?

Mr. SLAYDEN. Yes, sir.

Mr. FLOOD. I do not see how the gentleman can tell what will be the attendance.

Mr. SLAYDEN. I have just disavowed my ability to do so.

Mr. FLOOD. How can the gentleman say every member of every parliamentary body of the world can come here and attend as a member of this Interparliamentary Union, what the expense would be in the city of Washington, or what the expense would be if we undertook to haul them about the country?

Mr. SLAYDEN. If they were to come, we could take care of them here and cut our garment according to the cloth. And I want to say that in 1904, when everything was prosperous in Europe, when there was no devastating war abroad and distress and poverty over great areas, only about 300 came; and certainly following this great war one can not reasonably expect a very large attendance, and for that reason I look upon this appropriation of $40,000 as being relatively greater than $50,000 12 years ago.

Now, Mr. Chairman, I am president of the American group of the Interparliamentary Union, and I am in receipt of letters, a great many letters, from gentlemen of importance in some of these war-racked countries of Europe and from some of the neutral countries all saying that they hope we will arrange to have the Nineteenth Conference of the Interparliamentary Union in the United States, because this is the one great neutral country in the world. It is the one country to which they can come with the hope that the environment will be such that some sort of an agreement may grow out of the conference, that some sort of progress may be made toward an era of peace and good will. They do not believe it possible to have such a development if it were held in Europe, even in a country as neutral as Switzerland or Holland. This is the one country they have all turned their eyes to, and now the only plea I make is that if we propose to extend hospitality we shall do it with liberality and gentility and not restrict it in this way. I hope, Mr. Chairman, that the chairman of the committee will accept the amendment.

Mr. HARRISON. Mr. Chairman, I reserved the point of order on the amendment and I regret very much to have to make it. I make the point of order on the amendment.

The CHAIRMAN. What is the point of order?

Mr. HARRISON. The point of order is that it is a change of existing law. It is providing for an expenditure of money outside of the city of Washington, when under the law that was passed it was to be expended in the city of Washington, and that was the condition on which the committee made the appropriation. I doubt if the committee would have made it otherwise, and now it is proposed to change that existing law by this amendment.

Mr. SLAYDEN. Mr. Chairman, is the point of order made to the entire paragraph, let me ask the gentleman?

Mr. HARRISON. No; just to the gentleman's amendment.

Mr. SLAYDEN. Mr. Chairman, I do not know whether the point of order is well taken or not. The Secretary of State can expend every cent of this appropriation in the city of Washington if he pleases, even under my amendment. I do not require that he expend it elsewhere. I simply undertake to extend his right. That is all, and I doubt if the point of order is well taken, because there is no command on the Secretary of State to expend it elsewhere than in the city of Washington.

Mr. HARRISON. If the Chair is in doubt about the proposition, I would like to say something more.

The CHAIRMAN. Very well.

Mr. HARRISON. This appropriation is for the purpose of defraying the expenses in Washington City in entertaining the Nineteenth Conference of the Interparliamentary Union, that appropriation being made by the committee with the understanding that these gentlemen who come here from Europe and various countries to this Interparliamentary Union——

The CHAIRMAN. The point of order is sustained, and the Clerk will read.

Mr. MANN. Will the Chair hear me on the point of order?

The CHAIRMAN. The Chair has already sustained the point of order, but he will be glad to hear the gentleman.

Mr. MANN. This whole item is subject to the point of order——

Mr. SLAYDEN. That is the point.

Mr. MANN. But the point of order was not made upon it.

The CHAIRMAN. The point of order the Chair sustained was not to the item, because it was not made on the item.

Mr. MANN. I understand, but if the whole item was subject to the point of order and it is not made you can not make a point of order upon a proper germane amendment to it. That is what I wanted to call to the attention of the Chair. There is no authorization of law for the holding of this Nineteenth Conference of the Interparliamentary Union at all, except as it was carried in an appropriation act subject to a point of order when it was inserted in the bill in the first place. That expires with the end of this fiscal year. Now, this item carrying an appropriation and making it available for the next fiscal year was subject to the point of order. That point of order was not made, and under the well-settled rules of the House, it is then open to amendment. And if the item, in the first place, had not been subject to a point of order, then the amendment of the gentleman from Texas would be subject to a point of order. But as his amendment is simply to perfect the text of the original paragraph which itself was subject to a point of order, I do not think the amendment offered is subject to a point of order. It is for the same purpose.

The CHAIRMAN. The Chair understood the gentleman from Mississippi [Mr. HARRISON]—and the question was not disputed—that there was a general law that authorized this appropriation. If that is an error, of course the Chair was in error, because the Speakers of the House have held time and time again that where a proposition in a bill was out of order an amendment that was germane to it would be entertained if the point of order was not made upon the main proposition. The point of order would have to be made to the main section unless, as I understood the gentleman from Mississippi to say, the general law authorized this appropriation.

Mr. HARRISON. If the Chair will permit, I may have misstated the situation. There was a law passed appropriating this $40,000 to be expended in a certain time. It was not spent at that time, and here we propose to extend that appropriation. The law did expire when the money was not spent, I presume.

The CHAIRMAN. Now, the Chair will ask the gentleman from Mississippi this: Was that a general statute or a mere appropriation act?

Mr. MANN. It was a mere appropriation.

Mr. HARRISON. Not a statute.

The CHAIRMAN. The Chair will have to change the ruling made on the amendment offered by the gentleman from Texas [Mr. SLAYDEN]. The question is on the amendment offered by the gentleman from Texas.

Mr. HUDDLESTON. Mr. Chairman, I move to strike out the last word.

It seems to me that the time has come to call a halt in spending public money for the purpose of paying for pleasure trips, both for our own citizens and for people who come here from foreign countries. I admire hospitality of the open-handed kind, but hospitality ought to be extended by the individual. We do not stand here in any attitude to offer the hospitality of this country, so far as it consists in taking money which the people have paid to carry this Government on, and spending it upon the pleasure of travelers and pleasure seekers.

We have about 19, I think it is, of these international congresses, conferences, committees, and commissions, and one such thing and another. It amounts, in my mind, to what almost reaches the proportion of a scandal, that we are spending so much public money as we do upon these organizations. I venture to assert, Mr. Chairman, that no useful purpose is served by any of these commissions. The idea of sending our citizens, selected for political purposes or social purposes or as a favor to them, to some foreign country to meet with others of their kind and powwow and palaver and come back after having had a nice time, eaten good food, and seen some strange sights, and leave this country exactly as it was when they went away, seems to me absurd. Here we propose not only to send our own people to Europe and give them the pleasure of trips over there, but in return we are going to pay for junkets for our European brothers and make good to them for the hospitality which they may have extended to our citizens, and so on and so forth. How could anyone believe that any useful public purpose is to be served by any such course.

This is the Nineteenth Conference of the Interparliamentary Union, which the distinguished gentleman states was formed for the purpose of promoting peace between nations. We are making preparations to hold a peace conference at this time when the cause of peace is in most dire extremities. I am surprised that any gentleman has the temerity to propose any appropriation upon this floor for any purpose except for war. Preparedness for war is in the air. Why should we have any preparation for peace?

As I have said, this is to be the nineteenth conference. The other 18 have gone into history; nevertheless, the world has on hand the greatest war humanity has ever seen.

It seems to me it is time to end this farce. A lot of people will come here from foreign countries. They are eminent people and mean well, but they will accomplish absolutely nothing. However, we have invited them and I would not say to stop the conference, but I do insist we ought not to spend the peoples' money in giving these visitors a pleasure junket. I do insist that the laws of hospitality do not for a moment squint at the idea that we ought to take these people over these United States and pay their way from city to city in order to impress them with our greatness.

Mr. SLAYDEN. Is the gentleman under the impression that we are to pay the expense of bringing those people over here?

Mr. HUDDLESTON. Not at all. If you want to show them the great resources of this country, and the wealth and power of it, let them read a guide book, Mr. Chairman. That will be much better for them and much cheaper. Let them come to Washington and transact the business of their organization, and then if they want to travel over the country, let them pay their own way. Why should the Government of the United States pay the bill? Why should the humble people at home, the people down in Texas, in Alabama, and in other sections of this country sweat and toil to pay their taxes on the necessaries of life in order to give these visitors a chance to see what this country looks like and to inform their minds and educate themselves upon the geography of the Western Hemisphere?

Mr. MANN. Mr. Chairman, I have never been a member of the Interparliamentary Union, and was not very enthusiastic about inviting the next conference to be held in the United States.

On the whole I doubt if it has been of any practical value, but I am always willing to let gentlemen who think they can do good in the world get together with that hope. But it seems to me that if we do invite what I might term our associates in the parliaments of other countries here to this country, we ought to treat them with ordinary courtesy. The present appropriation of $40,000 provided only for the entertainment of the members who come to this conference in the city of Washington. They are members of other parliaments.

Gentlemen will notice that in the item immediately below this there is an appropriation of $50,000—$10,000 besides $40,000 heretofore appropriated—to pay all the expenses of delegates to the Fifteenth International Congress Against Alcoholism, there being no limit or location where the expenses will be paid, it only being provided that the expenses shall be paid under the rules and regulations prescribed by the Secretary of State. It really seems to me that it would be just as appropriate for us to give entertainment to our fellow associates in other parliaments gathered here for the purpose of producing peace in the world as it is to pay the expenses of delegates to the congress on alcoholism gathered for the purpose also of doing what seems to be very laudable work. I think we ought to treat them both very well, but if we invite them here—I am not very enthusiastic about inviting many of these conferences to come here—we should treat them as guests should be treated.

Mr. HUDDLESTON. Mr. Chairman, will the gentleman yield?

Mr. MANN. Yes.

Mr. HUDDLESTON. Does the gentleman think that includes paying their traveling expenses around over the United States?

Mr. MANN. Oh, as a matter of fact, the traveling expenses around over the United States will not be paid by the Government of the United States, notwithsanding my friend from Texas [Mr. SLAYDEN]. These gentlemen will travel around over the United States; they will go to Chicago at the expense of Chicago; they will go to St. Louis at the expense of St. Louis. They will go to other large cities of the country and through smaller cities at the expenses of the localities, because $40,000 will not take care of them. But extending the appropriation will permit the Government to send somebody with them and pay those ordinary expenses which a host would naturally pay.

Mr. SLAYDEN. Mr. Chairman, will the gentleman permit an interruption?

Mr. MANN. Certainly.

Mr. SLAYDEN. In 1904 the appropriation was $50,000. These guests were received in New York and taken to Philadelphia and Pittsburgh, then to St. Louis and kept there during the conference, four days; thence to Kansas City, Denver, and up into the mountains, and back by way of Omaha, Chicago, Detroit, and Niagara to Washington, where they fulfilled an engagement with Mr. Roosevelt, and then they were delivered to New York again; and $9,555.02 was turned back into the Treasury. There were more than 320 of them, and they were carried half across the country. They did not have to be taken on that journey, and they did not have to be invited; but if they are invited they should be treated courteously.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. FLOOD. Mr. Chairman, I do not agree with the gentleman from Illinois [Mr. MANN] that this provision or amendment ought to be put in this bill. It would probably have been well if the restriction had been contained in the succeeding item in this bill with reference to the antialcoholic conference. I believe when we invite delegates here we ought to entertain them, and entertain them well, but I do not believe in junketing trips taken on these occasions.

I attended, last summer, the most important and, in my judgment, the most useful in its results of any of the conferences that have been held in this country for many years, the Pan American Financial Conference. The most distinguished financiers and business men of Central and South America were here as our guests, and they were entertained in the city of Washington most delightfully, and then an attempt was made to give them a junket over the country. These men were business men, and did not have time to take the junket, and the result was that the Government was put to the expense of sending this train of cars to the various cities of this country, and very few of the South and Central American delegates attended. Those who went with the Assistant Secretary of the Treasury, Mr. Peters, were a lot of clerks here and Americans who had nothing else to do but take advantage of a junket which nobody else would take. It was not a success.

We had a very large conference here last year, the Pan American Scientific Congress, and they abandoned the idea of a junket as not being essential to the entertainment of the delegates. They were given a most magnificent entertainment here, which pleased the delegates highly.

Most of these conferences have advanced our trade relations and have brought about closer trade conditions between this and other countries, and I believe in them, but I do not believe junkets all over the country are at all essential to their success or the proper entertainment of our guests. I hope the amendment will not be adopted.

Mr. SLAYDEN. Mr. Chairman, I move to strike out the last word. I wish to address the House for two minutes.

The CHAIRMAN. The gentleman from Texas [Mr. SLAYDEN] asks unanimous consent to proceed for two minutes. Is there objection?

There was no objection.

Mr. SLAYDEN. I want to correct the impression that the gentleman from Virginia [Mr. FLOOD] seems to be under, that I am asking or expecting a junket. I do not ask or expect that any such trip shall be taken. All I ask is that you should not invite guests to your house, people whose hospitality you have enjoyed, and then treat them as you propose to do here by restricting the Secretary of State in this way. I hope sincerely that there will be no traveling about the country when these guests come. I hope, as a matter of fact, that they will be brought to the city of Washington and entertained here, and perhaps to New York, the port to which they will first come.

I do not like the position in which this debate would put me, as advocating a junket. I am not asking that there shall be any such privilege. I referred to what happened in 1904 to show that the appropriation that year was excessive. I had nothing to do with the procuring of it. I did have something to do with the expenditure of it and the settlement of the accounts under it. We turned back a fourth or a fifth of it. I do not ask that a junket be entered upon; but when I invite a gentleman to my house I do want to show him hospitality in a decent way and not confine or limit it. I would not say, "You may come into my house, but not into my grounds." I am not asking a change in the appropriation. The appropriation itself is ample, but I do not like the restriction. Better no hospitality than the sort that makes your guest think he is unwelcome.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. ROGERS. Mr. Chairman, I ask that the gentleman may have two minutes more on this question.

The CHAIRMAN. All debate has expired on this proposition. The question is on agreeing to the amendment offered by the gentleman from Texas [Mr. SLAYDEN].

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. SLAYDEN. A division, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 14, noes 55.

Accordingly the amendment was rejected.

Mr. MANN. Mr. Chairman, I move to strike out the last word. The gentleman from Virginia [Mr. FLOOD], I think, was temporarily absent yesterday when we agreed to meet at 11 o'clock this morning with the idea of quitting early this afternoon, and I am going to suggest to him that we might rise now, and when we get into the House see if we can not agree to go ahead with this bill to-morrow, that being Calendar Wednesday, when probably we would not be able to do much with any contested matter, anyhow, under the circumstances.

Mr. FLOOD. I understand, Mr. Chairman, that there was an understanding between the gentleman from Illinois [Mr. MANN] and the gentleman from North Carolina [Mr. KITCHIN] that the House should convene at 11 o'clock this morning and that the committee should rise at 4. Therefore I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. MOON, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 13383) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1917, and had come to no resolution thereon.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. SMITH of Texas, indefinitely, on account of important business.

FISCAL RELATIONS, DISTRICT OF COLUMBIA AND THE UNITED STATES.

Mr. LLOYD. Mr. Speaker, I present the following privileged resolution from the Committee on Accounts.

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

House resolution 256 (H. Rept. 807).

Resolved, That the Committee on the District of Columbia, or the subcommittee thereof provided for in House resolution 229, adopted on the 2d day of June, 1916, in the investigations authorized by said resolution, be, and is hereby, authorized to sit during the sessions of the Sixty-fourth Congress, or during the recesses between the sessions of said Congress, and employ stenographers and accountants, the expenses of said investigation, not exceeding the sum of $10,000, to be paid out of the contingent fund of the House on vouchers ordered by said committee or subcommittee, certified by the chairman thereof, and with the approval of the Committee on Accounts, certified by the chairman thereof.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

FOLDING SPEECHES.

Mr. LLOYD. Mr. Speaker, I present the following privileged resolution from the Committee on Accounts.

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

House resolution 251 (H. Rept. 806).

Resolved, That the Doorkeeper is authorized to employ additional labor for folding speeches, at the rate of not exceeding $1 per thousand, and the sum of $5,000 is authorized to be expended from the contingent fund for that purpose.

Mr. LLOYD. Mr. Speaker, this becomes necessary on account of the extraordinary number of speeches that have been ordered by Members of the House.

The SPEAKER. Without objection, the resolution will be agreed to.

There was no objection.

On motion of Mr. LLOYD, a motion to reconsider the votes by which the two preceding resolutions were agreed to was laid on the table.

SENATE BILLS AND JOINT RESOLUTIONS REFERRED.

Under clause 2 of Rule XXIV, Senate bills and joint resolutions of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. J. Res. 113. Joint resolution for the relief of Fred White; to the Committee on Claims.

S. J. Res. 107. Joint resolution authorizing and directing the Director of the Census to collect and publish statistics of marriage and divorce; to the Committee on the Census.

S. J. Res. 50. Joint resolution authorizing the Secretary of the Interior to sell the coal deposits in and under certain public lands to the Republic Coal Co., a corporation; to the Committee on the Public Lands.

S. J. Res. 114. Joint resolution withholding from allotment the unallotted lands or public domain of the Creek Nation or Tribe of Indians and providing for the sale thereof, and for other purposes; to the Committee on Indian Affairs.

S. 1098. An act to adjust and settle the claims of the loyal Shawnee and loyal absentee Shawnee Tribe of Indians and to report the same to Congress; to the Committee on Claims.

S. 3069. An act to amend an act entitled "An act to amend an act entitled 'An act to amend an act entitled "An act to regulate commerce,"' approved February 4, 1887, and all acts amendatory thereof, and to enlarge the powers of the Interstate Commerce Commission," approved March 4, 1915; to the Committee on Interstate and Foreign Commerce.

S. 2543. An act for the relief of the State of Kentucky; to the Committee on Claims.

S. 3020. An act waiving the age limit for admission to the Medical Corps of the United States Navy in the case of John B. Bostick; to the Committee on Naval Affairs.

S. 2458. An act authorizing the Cowlitz Tribe of Indians residing in the State of Washington to submit claims to the Court of Claims; to the Committee on Claims.

S. 640. An act for the relief of Ellen B. Monahan; to the Committee on Claims.

S. 5268. An act for the relief of the Copper River & Northwestern Railway Co.; to the Committee on Claims.

S. 5082. An act adding certain lands to the Missoula National Forest, Mont.; to the Committee on the Public Lands.

S. 3617. An act for the relief of Elizabeth Davis; to the Committee on the Public Lands.

S. 4307. An act to prevent the disclosure of national-defense secrets; to the Committee on the Judiciary.

S. 5724. An act authorizing the construction of a public building in the city of Durango, Colo.; to the Committee on Public Buildings and Grounds.

S. 3618. An act authorizing the Secretary of the Interior to subdivide a part of the town site of Plummer, Idaho, and for other purposes; to the Committee on Public Lands.

S. 5911. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors; to the Committee on Invalid Pensions.

S. 1094. An act conferring jurisdiction on the Court of Claims to hear and determine and report to Congress on claims of the Ponca Tribe of Indians against the United States; to the Committee on Claims.

S. 1093. An act to permit the Denison Coal Co. to relinquish certain lands embraced in its Choctaw and Chickasaw coal lease and to include within said lease other lands within the segregated coal area; to the Committee on Indian Affairs.

S. 5379. An act validating certain homestead entries; to the Committee on Public Lands.

S. 1308. An act to amend an act entitled "An act to establish circuit courts of appeals and to define and regulate in certain cases the jurisdiction of the courts of the United States, and for other purposes," approved March 3, 1891; to the Committee on the Judiciary.

S. 743. An act for the relief of Moses Chauncey; to the Committee on Military Affairs.

S. 1045. An act to provide for the erection of a public building at Prescott in the State of Arizona; to the Committee on Public Buildings and Grounds.

S. 4251. An act to authorize the Ponca Tribe of Indians to appear in and be made parties to any suits filed in the Court of Claims by the Omaha Tribe; to the Committee on Claims.

S. 5495. An act for the relief of Edward J. Lynch, collector of internal revenue for the district of Minnesota; to the Committee on Claims.

S. 4384. An act providing for the refund of duties collected on flax-preparatory machines, parts, and accessories imported subsequently to August 5, 1909, and prior to January 1, 1911; to the Committee on Claims.

S. 4282. An act to permit the State of Wyoming to relinquish to the United States lands heretofore selected and to select other lands from the public domain in lieu thereof; to the Committee on Public Lands.

S. 5672. An act for the relief of sundry building and loan associations; to the Committee on Claims.

S. 34. An act granting to the State of Utah title to certain lands in said State for use as a fish hatchery; to the Committee on the Public Lands.

S. 4253. An act conferring jurisdiction on the Court of Claims to hear, determine, and report to Congress on claims of the Iowa Tribe of Indians against the United States; to the Committee on Claims.

S. 3012. An act for the relief of Elizabeth T. Wells; to the Committee on Military Affairs.

S. 1046. An act to provide for the purchase of a site for a public building in the city of Bisbee, Ariz.; to the Committee on Public Buildings and Grounds.

S. 3265. An act for the extension, remodeling, and improvement of the public building at Jefferson City, Mo.; to the Committee on Public Buildings and Grounds.

S. 3294. An act to appropriate a sum of money to pay Rhoda Menz, W. W. Christmas, and James M. Christmas, heirs of Myra Clarke Gaines, for certain lands in Louisiana; to the Committee on Claims.

S. 5503. An act to provide for the purchase of a site for the erection of a Federal building at Georgetown, Del.; to the Committee on Public Buildings and Grounds.

S. 4866. An act to carry out the findings of the Court of Claims in the case of the Commercial Pacific Cable Co.; to the Committee on Claims.

S. 5398. An act to increase the limit of cost of post-office site and building at Millville, N. J.; to the Committee on Public Buildings and Grounds.

S. 5447. An act providing for the erection of a public building at Taylor, Tex.; to the Committee on Public Buildings and Grounds.

S. 5615. An act granting certain lands to the State of Washington for park purposes; to the Committee on the Public Lands.

S. 5751. An act authorizing the addition of certain lands to the Wyoming National Forest, Wyo.; to the Committee on the Public Lands.

S. 5863. An act authorizing the health officer of the District of Columbia to issue a permit for the removal of the remains of the late Charles H. Bingham from Congressional Cemetery, District of Columbia, to Lock Haven, Pa.; to the Committee on the District of Columbia.

S. 739. An act for the relief of James F. Cole; to the Committee on the Public Lands.

S. 1362. An act for the relief of Lester A. Rockwell; to the Committee on Military Affairs.

S. 2852. An act for the relief of John F. Considine; to the Committee on Claims.

S. 3346. An act conferring jurisdiction on the Court of Claims to adjudicate the claims of the State of Massachusetts; to the Committee on the Judiciary.

S. 4176. An act authorizing and directing the Secretary of War to make certain provisions for the care of Federal and Confederate veteran soldiers who served in the War between the States, 1861 to 1865, to enable them to unite in participation of a national reunion and peace jubilee to commemorate the victories and virtues resulting in the half century of peace and prosperity to the American Nation, to be held in the national domain within the Vicksburg National Military Park October 16, 17, 18, and 19, 1917; to the Committee on Appropriations.

S. 5082. An act adding certain lands to the Missoula National Forest, Mont.; to the Committee on the Public Lands.

ENROLLED BILLS SIGNED.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 2744. An act to correct the title to certain lands in Colorado;

H. R. 15005. An act to appropriate $200,000 for training the Organized Militia or National Guard of any State, Territory, or of the District of Columbia;

H. R. 529. An act creating an additional land district in the State of California, and for other purposes;

H. R. 13112. An act to amend section 14 of the seamen's act of March 4, 1915;

H. R. 13474. An act to amend section 6 of an act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes, approved March 14, 1900, as amended by the act of March 2, 1911;

H. R. 13064. An act for the relief of the M. A. Sweeney Shipyards & Foundry Co.;

H. R. 3794. An act for the relief of Thomas S. Johnson;

H. R. 4297. An act for the relief of Frances L. Llewellyn;

H. R. 7804. An act to authorize the issuance of patent to Oscar R. Howard, and for other purposes;

H. R. 7817. An act to validate the homestead entry of George S. Clark;

H. R. 14864. An act to alter, and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from the Central Pacific Railroad, in California, to Portland, in Oregon," approved July 25, 1866, as amended by the acts of 1868 and 1869, and to alter and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from Portland to Astoria and McMinnville, in the State of Oregon," approved May 4, 1870, and for other purposes; and

H. R. 6651. An act providing for the payment for certain services arising under the Navy Department;

The SPEAKER announced his signature to enrolled bill of the following title:

S. 6073. An act granting the consent of Congress to George Fabyan to construct a bridge across the Fox River.

THE VISITORS' GALLERY.

Mr. MANN. Mr. Speaker, I ask unanimous consent to proceed for two minutes.

The SPEAKER. The gentleman from Illinois asks unanimous consent to proceed for two minutes. Is there objection?

There was no objection.

Mr. MANN. Just for amusement, and so that it may appear in the RECORD: A little incident happened here in this House to-day, and this is the way in which it is described in one of the evening papers:

> The House was thrown into pandemonium to-day when a slight, immaculately dressed youth arose from his seat in the visitors' gallery and in loud voice began reading a resolution demanding an investigation of Secret Service sleuthing operations.
>
> Speaker CLARK banged his gavel and there was disorder in the House and galleries until the youth was arrested.

[Laughter.]

It is on such things as this that the newspaper boys feed the country. There was no disorder in the House.

Mr. JOHNSON of Kentucky. The Speaker was not in the chair.

Mr. MANN. True, a man arose in the gallery, and in a very sofe voice read something which no one in the House could understand. No one in the gallery could distinguish what he said. He made a little speech, and the caretakers in the gallery took him out. The Speaker was not in the chair. No one banged the gavel. There was no disorder in the House.

Mr. LLOYD. And there were no reporters in the press gallery.

Mr. MANN. There was no pandemonium in the House. I was occupying the floor at the time, and never ceased speaking in a mild tone of voice. I just put this in the RECORD to show how accurate these accounts are.

Mr. LLOYD. The gentleman does not want to omit the fact that there were no reporters in the press gallery. The gentleman from Illinois could not see that, but other Members on the floor observed that the press gallery was deserted.

Mr. MANN. It would not have made any difference. [Laughter.] It would not have been a good story if the truth had been told.

ORDER OF BUSINESS TO-MORROW.

Mr. FLOOD. Mr. Speaker, I ask unanimous consent that Calendar Wednesday be transferred to Thursday.

Mr. MANN. Will not the gentleman make his request in this way, that it shall be in order to-morrow, Calendar Wednesday, to proceed with the consideration of the Diplomatic and Consular appropriation bill, so that if we get through with that, then we can go ahead with other business if anybody wants to do so?

Mr. FLOOD. I make that request.

The SPEAKER. The gentleman from Virginia asks unanimous consent that the Diplomatic and Consular appropriation bill shall be in order to-morrow, notwithstanding it is Calendar Wednesday.

Mr. NORTON. Mr. Speaker, reserving the right to object, I just want to say that it seems to me we ought to make some arrangement to have one unanimous-consent day this week. I trust some such arrangement will be made.

Mr. FLOOD. We will try to arrange that to-morrow.

The SPEAKER. Is there objection to the request of the gentleman from Virginia to make the Diplomatic and Consular bill in order to-morrow?

There was no objection.

HOUR OF MEETING TO-MORROW.

Mr. MANN. I think we had better agree to meet at 11 o'clock to-morrow, and adjourn early.

Mr. FLOOD. I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow.

The SPEAKER. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. FLOOD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 20 minutes p. m.) the House adjourned until to-morrow, Wednesday, June 7, 1916, at 11 o'clock a. m.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. MONTAGUE, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (S. 5851) to extend the time for constructing a bridge across the Eastern Branch of the Elizabeth River in Virginia, reported the same without amendment, accompanied by a report (No. 801), which said bill and report were referred to the House Calendar.

Mr. DILLON, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (S. 5805) permitting the Riverview Ferry Co. to construct, maintain, and operate a bridge across the Yellowstone River in the State of Montana, reported the same without amendment, accompanied by a report (No. 802), which said bill and report were referred to the House Calendar.

Mr. RUBEY, from the Committee on Agriculture, to which was referred the bill (S. 3205) to amend "An act to protect the birds and animals in Yellowstone National Park, and to punish crimes in said park, and for other purposes," approved May 7, 1894, reported the same without amendment, accompanied by a report (No. 803), which said bill and report were referred to the House Calendar.

Mr. CAREW, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 13224) to amend an act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, reported the same without amendment, accompanied by a report (No. 804), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. McCLINTIC, from the Committee on Public Lands, to which was referred the bill (H. R. 15156) granting public lands to the State of Oklahoma, reported the same with amendment, accompanied by a report (No. 805), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. RUSSELL of Missouri, from the Committee on Invalid Pensions, to which was referred the bill (H. R. 16290) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and to certain widows and dependent children of soldiers and sailors of said war, reported the same without amendment, accompanied by a report (No. 808), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Pensions was discharged from the consideration of the bill (H. R. 14989) granting a pension to Nina H. Love, and the same was referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and a resolution were introduced and severally referred as follows:

By Mr. HELVERING: A bill (H. R. 16284) to provide for the building of a macadam road on the Fort Riley Military Reservation in the State of Kansas; to the Committee on Military Affairs.

By Mr. CARTER of Oklahoma: A bill (H. R. 16285) providing for the building of a road to the Choctaw Sanitarium, near Talihina, Okla.; to the Committee on Public Buildings and Grounds.

By Mr. VINSON: A bill (H. R. 16286) authorizing the Secretary of War to deliver to the Georgia Military College, Milledgeville, Ga., four condemned bronze or brass cannon with their carriages and a suitable outfit of cannon balls; to the Committee on Military Affairs.

By Mr. CRISP: A bill (H. R. 16287) granting the consent of Congress to the county of Sumter or to the county of Dooly, both of the State of Georgia, acting jointly or saparately, and their successors and assigns, to construct a bridge across the Flint River; to the Committee on Interstate and Foreign Commerce.

By Mr. NOLAN: A bill (H. R. 16288) to amend an act entitled "An act to provide for the lading or unlading of vessels at night, the preliminary entry of vessels, and for other purposes," approved February 13, 1911; to the Committee on Ways and Means.

By Mr. STEPHENS of Texas: A bill (H. R. 16289) authorizing the Secretary of the Interior to withdraw from the funds now on deposit in the Treasury to the credit of certain Indian tribes and to pay certain claims, and also making appropriations for the payment of certain claims as herein provided for, and for other purposes; to the Committee on Indian Affairs.

By Mr. CARTER of Oklahoma: A concurrent resolution (H. Con. Res. 42) providing for the printing of 3,000 copies of the Compilation of Indian Laws and Treaties; to the Committee on Printing.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. RUSSELL of Missouri [from the Committee on Invalid Pensions]: A bill (H. R. 16290) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War, and certain widows and dependent children of soldiers and sailors of said war; to the Committee of the Whole House.

By Mr. BRUMBAUGH: A bill (H. R. 16291) granting an increase of pension to Catherine J. Thayer; to the Committee on Invalid Pensions.

By Mr. COOPER of West Virginia: A bill (H. R. 16292) granting an increase of pension to William C. Bowen; to the Committee on Pensions.

By Mr. DOOLITTLE: A bill (H. R. 16293) granting an increase of pension to Miron Harper; to the Committee on Invalid Pensions.

By Mr. HAWLEY: A bill (H. R. 16294) granting an increase of pension to M. L. Moore; to the Committee on Invalid Pensions.

By Mr. KEARNS: A bill (H. R. 16295) granting a pension to Adline Young Swearingen; to the Committee on Invalid Pensions.

By Mr. NORTH: A bill (H. R. 16296) granting an increase of pension to Thomas Black; to the Committee on Invalid Pensions.

By Mr. PLATT: A bill (H. R. 16297) granting an increase of pension to Mary E. Edwards; to the Committee on Invalid Pensions.

By Mr. RAKER: A bill (H. R. 16298) for the relief of Maurice B. Browne; to the Committee on the Public Lands.

Also, a bill (H. R. 16299) for the relief of Evelyn Browne; to the Committee on the Public Lands.

Also, a bill (H. R. 16300) for the relief of Maude Browne Matkins (formerly Maude Browne); to the Committee on the Public Lands.

By Mr. TALBOTT: A bill (H. R. 16301) to correct the military record of William W. Edwards; to the Committee on Military Affairs.

By Mr. WINGO: A bill (H. R. 16302) granting an increase of pension to George W. Cainan; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of Washington Chamber of Commerce, against erection of municipal hospital at Fourteenth and Upshur Streets; to the Committee on the District of Columbia.

By Mr. CAREW: Memorial of the Franklin Typothetæ, of Chicago, approving the Stevens resale bill; to the Committee on Interstate and Foreign Commerce.

By Mr. DALE of New York: Memorial of E. B. Donaldson, of Philadelphia, Pa., favoring woman-suffrage amendment; to the Committee on the Judiciary.

By Mr. DARROW: Petition of woman's section of Navy League of the United States, Philadelphia Branch, Oak Lane Division, in behalf of national defenses; to the Committee on Naval Affairs.

By Mr. DAVIS of Texas: Petition of Levy Bros. Dry Goods Co., of Houston, Tex., against passage of the price-maintenance bill; to the Committee on Interstate and Foreign Commerce.

By Mr. FULLER: Petition of Progressive Lodge, No. 440, International Association of Machinists, of Rockford, Ill., against the Taylor system in Government shops; to the Committee on Labor.

Also, petition of Charles V. Weise Co., of Rockford, Ill., against the Stephens-Ashurst price-maintenance bills; to the Committee on Interstate and Foreign Commerce.

By Mr. KENNEDY of Rhode Island: Memorials of Rhode Island Nos. 1 and 5, National Association of Stationary Engineers, of Providence, R. I., indorsing Senate bill 4874; to the Committee on the Post Office and Post Roads.

By Mr. KETTNER: Petition of Mrs. Adele Meyer Outcalt, principal of the Francis W. Parker School, and 6 others, of San Diego; Miss E. B. Scripps, La Jolla; Paul Scharrenberg, San Francisco; and William Blacklock, president Los Angeles Post Office Laborers' Association, Los Angeles, favoring Kern-McGillicuddy bill, H. R. 15316; to the Committee on Education.

Also, petition of A. J. Newsom, Garden Grove, opposing increase in Army and Navy; to the Committee on Military Affairs.

Also, petition of D. R. Crane, Elsinore, favoring House bill 10500, the Alexander shipping bill; to the Committee on the Merchant Marine and Fisheries.

Also, petition of W. C. Wilde, adjutant Bennington Camp, No. 20, United Spanish War Veterans, San Diego, favoring Senate bill 4086, establishment of national leprosarium; to the Committee on Agriculture.

Also, petition of Edward L. Hardy, State Normal School, San Diego, favoring Smith-Hughes vocational bill; to the Committee on Education.

Also, petition of Elizabeth M. Covell, San Diego Review, No. 17, Woman's Benefit Association of Maccabees, San Diego, and A. T. Petersen, record keeper, Tenth and M Streets, San Diego, favoring Penrose-Griffin bills, H. R. 6915 and S. 3081; to the Committee on the Post Office and Post Roads.

Also, petition of W. H. Readle, 142 Seventh Street, San Bernardino, and R. J. Pickard, 607 Watts Building, San Diego, favoring House bill 8828, for recognition and reward of civilian canal builders; to the Committee on Insular Affairs.

Also, petition of H. R. Rising, editor Saturday Telegram, San Diego, Cal., protesting against House bill 15949, interstate transmission of racing bets, odds, etc.; to the Committee on Interstate and Foreign Commerce.

Also, petition of C. B. Munzig, Redlands, Cal.; E. A. Hartt, 23 Tribune Street, and 2 others, of Redlands, Cal., favoring passage of Warren bill; to the Committee on the Judiciary.

Also, petition of D. H. Oberholtzer, Palm City, Cal., and 49 others, protesting against House bills 6468 and 491, to amend postal laws; to the Committee on the Post Office and Post Roads.

Also, petitions of D. H. Oberholtzer, Palm City, Cal., and 49 others, and Byron E. Tefft and 133 others, of National City, Cal., protesting against House bill 652, Sunday closing; to the Committee on the District of Columbia.

Also, petition of John H. Roberts, assistant adjutant general Grand Army of the Republic, San Francisco, Cal., favoring a bill to place the few remaining officers of the Civil War on retired list, with pay of officers of like grade in Regular Army; to the Committee on Military Affairs.

By Mr. LINTHICUM: Petition of citizens of Baltimore, Md., against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. NOLAN: Memorial of Society of the Chagres, favoring House bill 8828, for payment of a bonus to civilian employees of the Panama Canal; to the Committee on Appropriations.

By Mr. PRATT: Petition of Philadelphia Branch of the Woman's Section of the Navy League of the United States, at Corning, N. Y., Miss Gretchen Gorton, chairman, favoring national-defense legislation; to the Committee on Military Affairs.

By Mr. RAKER: Memorial of California Tax Collectors' Association, opposing any national legislation for collection of inheritance tax by the Federal Government; to the Committee on Ways and Means.

By Mr. RANDALL: Petition of Christian Endeavor Mission of 51 people of Pasadena, Cal., favoring national prohibition; to the Committee on the Judiciary.

By Mr. SMITH of Michigan: Papers to accompany House bill 15910, granting a pension to George M. Woodard; to the Committee on Pensions.

Also, petition of Ministerial Association of Battle Creek, Mich., favoring House bill 6915, relative to indefinite leave of absence for Government clerks; to the Committee on the Post Office and Post Roads.

Also, petition of C. E. Paul and 17 others, of Bedford, Mich., and vicinity, against the Sunday observance bill; to the Committee on the District of Columbia.

Also, petition of C. E. Paul and 17 others, of Bedford, Mich., and vicinity, against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. SLOAN: Petition of R. D. Waterman and 12 others, of Ceresco, Nebr., against the Shields water-power bill; to the Committee on Interstate and Foreign Commerce.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *June 7, 1916.*

The House met at 11 o'clock a. m.

Rev. Dr. George S. Duncan, of the Hermon Presbyterian Church, Washington, D. C., offered the following prayer:

Father of all, may Thy name be hallowed in this day's session. May all that we do, say, and think be in harmony with Thy holy will, and so for the highest and best good of our beloved land. May every one of these Thy servants feel that they have indeed been chosen by Thee for the important duties in which they are here engaged. Give every one of them, we pray Thee, a double portion of Thy divine spirit, illumining their minds, guiding them into all truth, so that at the close of each day's duties they may hear Thee saying to them, "Well done, good and faithful servants." Grant all these mercies, which we ask in the name of Jesus Christ, Thy Son and our Savior. Amen.

The Journal of the proceedings of yesterday was read and approved.

LEAVE OF ABSENCE.

Mr. PRICE, by unanimous consent, was given leave of absence for one week, on account of important business.

WINSTON-SALEM, N. C., PORT OF DELIVERY.

Mr. KITCHIN. Mr. Speaker, I ask unanimous consent for the present consideration of the bill S. 5708, to make Winston-Salem, N. C., a port of delivery.

The SPEAKER. The gentleman from North Carolina asks unanimous consent for the present consideration of the bill which the Clerk will report.

Mr. MANN. Mr. Speaker, this bill would be in order to-day on the Calendar Wednesday call.

The Clerk read as follows:

An act (S. 5708) for the establishment of Winston-Salem, in the State of North Carolina, as a port of delivery under the act of June 10, 1880, governing the immediate transportation without appraisement of dutiable merchandise.

Be it enacted, etc., That the privileges of the seventh section of the act approved June 10, 1880, governing the immediate transportation of dutiable merchandise without appraisement, be, and are hereby, extended to the port of Winston-Salem, in the State of North Carolina.

The SPEAKER. Is there objection?

There was no objection.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. KITCHIN, a motion to reconsider the vote whereby the bill was passed was laid on the table.

OFFICERS OF THE NATIONAL GUARD.

Mr. MANN. Mr. Speaker, I ask unanimous consent to proceed for two minutes.

The SPEAKER. The gentleman from Illinois asks unanimous consent to address the House for two minutes. Is there objection?

There was no objection.

Mr. MANN. Mr. Speaker, there are several Members of the House who hold commissions in the National Guard of the different States. There was no question in reference to that before the enactment of the recent Army reorganization bill. Under that act there is pay that goes to the officers, and several Members have asked me, in reference to their status, whether they could still remain members of the National Guard and of the House. I have a resolution asking the Committee on the Judiciary to make an investigation of the subject so that they may have their standing known. If there is no objection, I will ask unanimous consent for its immediate consideration.

The SPEAKER. The gentleman from Illinois asks unanimous consent for the present consideration of the resolution which he has explained. Is there objection?

There was no objection.

The Clerk read the resolution, as follows:

House resolution 257.

Resolved, That, in order to determine the status of certain Members of this House with reference to whether there is any disqualification of such Members by reason of such Members holding commissions in the National Guard of the various States, the Judiciary Committee is hereby directed to investigate such question and to report its conclusion thereon at such early date as may be convenient to said committee.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

DIPLOMATIC AND CONSULAR APPROPRIATION BILL.

Mr. FLOOD. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 13383, the Diplomatic and Consular appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. MOON in the chair.

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the further consideration of the bill of which the Clerk will read the title.

The Clerk read as follows:

A bill (H. R. 13383) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1917.

The Clerk, proceeding with the reading of the bill, read as follows:

Fifteenth International Congress Against Alcoholism: To complete the arrangements and provide for the entertainment of the Fifteenth International Congress Against Alcoholism to be held in the United States, to be expended under such rules and regulations as the Secretary of State may prescribe, $10,000, or so much thereof as may be necessary, together with the unexpended balance of previous appropriations for the holding of said congress in the United States.

Mr. CARY. Mr. Chairman, reserving a point of order on this section, I would like to ask the gentleman from Virginia a question. Is it not a fact that there is $40,000 now laid aside for this purpose?

Mr. FLOOD. Forty thousand dollars was appropriated, but some of it has been used. I do not know how much; probably three or four thousand dollars. There is a considerable sum remaining; over $35,000 certainly.

Mr. CARY. Yesterday on the floor I asked the gentleman from Texas [Mr. SLAYDEN] a question in regard to the other convention coming here, if $40,000 would carry it through, and he said it would be a plenty. If $40,000 was enough to carry that convention through, surely $40,000 ought to be enough for this.

Mr. FLOOD. I will say to the gentleman that this is a great moral congress of unselfish, devoted men and women from all over the world, and it is apt to be more largely attended and more enthusiastically attended, than a congress of the Interparliamentary Union that is principally for the purpose of bringing together the members of the different parliaments of the world and having a good time. These gentlemen and ladies who attend this congress come here for serious work. We had a financial congress of Pan American countries last year, and we appropriated $50,000 and it was not more than sufficient. We had a scientific congress here, and my recollection is that there was $60,000 or $70,000 appropriated for that, but they did not have any excess fund. This is a congress that seems to me should appeal to every Member in this House. It is a congress that was established in 1885 at a meeting held in Antwerp, and was the successor of a philanthropic congress that was organized in 1851. It is not a prohibition congress; it is a congress for the moral uplift of humanity.

Mr. FITZGERALD. Will the gentleman yield?

Mr. FLOOD. Yes.

Mr. FITZGERALD. Mr. Chairman, with one notable exception, have not the delegates appointed on behalf of the United States been prohibitionists?

Mr. FLOOD. I do not know. I have not followed the history of all of the men appointed; but if that is the case, it is not the fault of Congress, it is not the fault of this institution, which has been established practically since 1856. It is the fault of the appointing power; and, in fact, I do not see that it is any fault at all.

Mr. FITZGERALD. But we can not control the appointments.

Mr. FLOOD. And if the gentleman is interested in having people who are antiprohibitionists appointed, let him suggest the names to the President of the United States, who makes the appointments.

Mr. FITZGERALD. The fact is that there was a gentleman who was neither a prohibitionist nor an antiprohibitionist, who had been an excise commissioner of the State of New York, who was appointed to one of these conferences, and he submitted a report upon his return to the President of the United States, pointing out that the work of the conference had been very much hampered by reason of the fact that all of the delegates from the United States were radical prohibitionists, and that they could see only one side of the question. I do not believe that we ought to appropriate money for a prohibition convention any more than we should for an antiprohibition convention.

Mr. FLOOD. This is not a prohibition convention. The delegates from the European countries are not prohibitionists. Every phase of alcoholism is discussed in this Congress.

Mr. FITZGERALD. How do they come to have their next conference in the United States? Who asked them here?

Mr. FLOOD. The delegates from the United States.

Mr. FITZGERALD. What authority did the delegates from the United States have to issue such an invitation?

Mr. FLOOD. In 1911 the delegates from the United States extended an invitation to the conference when it assembled at The Hague. They did not accept that invitation, but accepted an invitation of the city of Milan, Italy, and indicated that they would accept the invitation of the United States to the next congress.

Mr. FITZGERALD. My recollection is——

Mr. FLOOD. I will ask the gentleman to wait for a moment. He asked me a question and I want to answer it. When the delegates were provided for for the Milan conference in 1913 I introduced a bill in the House, which was reported from the Committee on Foreign Affairs, providing that these delegates be authorized to extend this invitation. A bill had been introduced in the Senate that did not have that provision in it. That bill came over to the House and was referred to the committee of which the gentleman from New York [Mr. FITZGERALD] is the chairman, and the time for the conference——

Mr. FITZGERALD. I was not the chairman of the committee then.

Mr. FLOOD. In 1913? Oh, yes; the gentleman was.

Mr. FITZGERALD. That is accurate.

Mr. FLOOD. This was in the summer of 1913, in the early days of September. The Congress was to assemble on the 23d of September, 1913, and we felt that we did not have time to get the bill through the House and through the Senate and have the President appoint the delegates so they could get to the conference, and the result was that we took up the Senate bill which had passed that body prior to that time, discharged the Committee on Appropriations from further consideration of it, and passed it. That bill did not have the provision in it for extending the invitation, but there was no suggestion that they were prohibited from extending the invitation, and these delegates went to Milan and extended that invitation.

Mr. FITZGERALD. The gentleman has a very peculiar theory of our Government if he thinks that officials can do anything they are not prohibited from doing. Officials in our Government can only do things that they are specifically authorized to do, and when people purporting to represent the United States extend invitations to bodies to meet here when Congress has failed to give that authority, it is an assumption of power that should not be passed by without some criticism.

Mr. FLOOD. It has been passed by without criticism by the gentleman from New York [Mr. FITZGERALD]. Many international conferences have been invited here without authority

of Congress, and authority was given afterwards and an appropriation was made afterwards.

Mr. FITZGERALD. I would criticize that action by whomsoever it was taken just as I would criticize this one. I do not believe that any official of this Government, whomsoever he may be, has any right to do any such thing, and, as a matter of fact, my recollection is there is a statute which expressly prohibits such action.

Mr. CARY. Mr. Chairman, I believe I have the floor.

Mr. FLOOD. I desire to reply to the gentleman from New York [Mr. FITZGERALD]. The delegates to the Milan conference were appointed after a bill had passed this House appropriating $4,500 to pay their expenses. I stated at that time upon the floor of the House that at The Hague conference they had indicated their purpose to invite this congress to the United States for its fifteenth meeting, and there was no objection made to it. I stated that we took the Senate bill because the date for the assembling of the conference was nearly at hand, and the House bill which gave that authority and requested them to invite this congress here could not be passed through this House and the Senate and become a law in time to have the President appoint these delegates and give them time to reach Milan. There was every suggestion made in this House that they had authority and right to issue that invitation officially, and they did extend the invitation, and it was accepted, and in 1914 and again in 1915 this House, the Senate, and the President approved their action in issuing that invitation by making an appropriation of $40,000 to pay the expenses of that congress when it came here. I yield now to the gentleman from Wisconsin [Mr. CARY].

Mr. CARY. Mr. Chairman, I believe the $40,000 is sufficient to cover all of these expenses, and that this additional $10,000 is not necessary at all. I therefore make the point of order upon the section.

The CHAIRMAN. Does the gentleman from Virginia desire to be heard upon the point of order?

Mr. FLOOD. I hope that the gentleman will not make the point of order.

Mr. CARY. I will reserve it.

Mr. FLOOD. The International Congress on Alcoholism was organized in 1885 at a meeting held at Antwerp, and is the successor of an international philanthropic congress which was organized in 1856. Fourteen congresses have been held, as follows:

Congress.	Place.	Time.	Congress.	Place.	Time.
First	Antwerp	1885	Eighth	Vienna	1901
Second	Zurich	1887	Ninth	Bremen	1903
Third	Christiania	1890	Tenth	Budapest	1905
Fourth	The Hague	1893	Eleventh	Stockholm	1907
Fifth	Basel	1895	Twelfth	London	1909
Sixth	Brussels	1897	Thirteenth	The Hague	1911
Seventh	Paris	1899	Fourteenth	Milan	1913

The scope and purpose of the congress can easily be determined by the subjects discussed at the Milan meeting.

The questions discussed related to:

A. The State and alcoholism.

(1) Legislation.

(2) The consumption of alcohol in the colonies.

(3) The attitude of the courts toward alcoholics, and particularly the application of restraint and conditional sentence.

(4) The juridical, political, and economic causes which make it the duty of the Governments and parliaments to repress alcoholism.

B. Society and alcoholism.

(1) Questions of organization.

(2) Indirect repression of alcoholism; that is to say, by improving the workmen's homes.

(3) The treatment of alcoholics in sanitariums, asylums, and the like.

(4) Medical problems bearing on the subject.

The congress is a great assemblage of scientists, publicists, jurists, statesmen, and prominent workers in the world-wide fight against the evils of alcoholism. The discussions are protected by the strictest neutrality of politics and religion, and by a free interchange of opinions concerning the methods for combating this evil.

The adherents to the moderate use of alcohol, or of the total abstinence and prohibition, as well as those advocating various forms for regulating the traffic in alcoholics, are allowed equal rights in the congress.

The discussions embraced not only the physical conditions usually understood from the term "alcoholism," but embraced all forms of the evils, social, medical, and economic, and the various remedies for dealing with the evils, educational, legislative, and other methods.

The periodical mingling of representatives of the various governments to consider the evils of alcoholism and the progress of the many methods of dealing with them, can not fail to produce a broader vision and lead to better methods in treating these evils.

Participation in these congresses does not bind the Governments represented or the individuals to any form or system of control which may be advocated, but tend only to the dissemination of knowledge concerning the various methods which have been tried. The facts brought out are given publicity so that they are obtainable by all who desire them, and even those connected with the liquor trade can profit by them, and if desired can take what they claim to be the falacious arguments or theories and adopt them or prove the truth concerning them, particularly so because of the class of men who largely compose the congress, especially from foreign countries.

The questions discussed at these conferences are the various methods for regulating and controlling the manufacture and sale of intoxicating liquors, the general welfare of society, and the preservation of its manhood, the happiness of women and children, the prosperity of commerce, the preservation of wealth, the strengthening of law and order, and every man, regardless of his position on the question of prohibition, should favor this conference. [Applause.]

It is clear, therefore, that this is not a prohibition congress, but it is a congress for the discussion of the use of alcohol, and the views of those who believe in a moderate use of it are represented as well as those who believe in total abstinence.

Even if it was a congress to advance the cause of prohibition I think the appropriation should be made. The antisaloon organizations all over the country and in many other countries of the world are composed of unselfish and devoted men and women who are working for the good of humanity, and it is a cause that is worthy of the encouragement of this Government. I sincerely believe this. On every occasion in my life where I have been called upon to cast my vote and use my influence for or against the manufacture and sale of alcoholic liquors I have always lined up with those who are opposed to its manufacture and sale. I have done this at my precinct, in the Virginia Legislature, and in Congress. I have done so simply because I know that the manufacture and sale of alcoholic drinks have done infinite harm to mankind and I have never seen the slightest good it has done.

I do not think all prohibitionists have prosecuted their cause wisely. Some have been as unwise as the gentleman from Missouri [Mr. MEEKER] was in his remarks upon this floor yesterday in opposing this appropriation.

I have had experience with these myself. In my district there are some very unwise and extreme prohibitionists, who not only want you to vote and work for their cause, but to claim for yourself that because you do this you are better than other men. Because I did not do this I was opposed by this class for reelection two years ago.

When I returned to my district the week before election I found they had formed a combination with the Republican nominee, and that he was advocating his election not upon the Republican doctrine of a protective tariff and the plundering of the masses of the people for the benefit of the favored few, but on the ground that he was a great and leading prohibitionist. I looked into his record. I had one joint discussion with him. I developed the fact in this discussion that my opponent out of five times he had voted on the wet and dry question had voted wet three times and for the dry cause twice; that he had represented the whisky interests in overturning a dry victory in his town upon a technicality; and that he had represented barkeepers of an adjoining county who were applying for whisky licenses.

And yet some of the leading prohibitionists of my district voted for him. I believe, however, that the broad-minded, intelligent, and patriotic leaders of the prohibition cause in the State of Virginia and the Nation and most of them in my district understand what I have done for their cause and appreciate it. At any rate, I am satisfied with my course. I have many friends who do not believe as I do and have not voted as I have, and in discussing the question of prohibition with them I have always told them that they would not gain anything for their side by trying to throw captious obstructions in the way of this great cause. It is too great and means too much to humanity to be delayed or injured by petty objections and fights. [Applause.]

The CHAIRMAN. The gentleman has made the point of order.

Mr. FLOOD. I concede the point of order as to the $10,000. There is no use of arguing against that.

The CHAIRMAN. The point of order is sustained.

Mr. BORLAND. Mr. Chairman, I would like to have the gentleman from Wisconsin withhold the point of order for a moment.

Mr. FITZGERALD. I wish the gentleman would withhold it for a moment.

Mr. CARY. I withhold the point of order.

Mr. BORLAND. I notice this paragraph against which the gentleman makes the point of order provides that the unexpended balance of previous appropriations is reappropriated. What will be the effect of this point of order? Will it leave the administration without any money to provide for this congress, invitation to which has already been ratified?

I understand from the gentleman from Virginia that one year ago we appropriated $40,000, which was a specific ratification of the invitation given. Now, if this unexpended balance is not reappropriated and no money is appropriated, what shape will it leave this country in after having extended the invitation?

Mr. FITZGERALD. When is this congress to be held?

Mr. MANN. It is for the fiscal year.

Mr. FLOOD. Yes.

Mr. BORLAND. The gentleman from New York asks when this congress is to be held.

Mr. FLOOD. It was, as I understand it, to be held the latter part of this year or the first part of the next year.

Mr. BORLAND. Has the date been set?

Mr. FITZGERALD. Does it not depend somewhat on conditions abroad?

Mr. SMITH of New York. If the gentleman will permit, this is the statement the State Department made:

> The congress was not held in 1915 as had been intended, and in the Diplomatic and Consular act approved March 14, 1915, the appropriation was extended. The arrangements have not yet been completed, nor is there sufficient in the appropriation to provide for the entertainment of the delegates.

So no arrangements have been made at present for holding the congress. The matter is under negotiation and arrangement at the present time.

Mr. BORLAND. Can these arrangements be made unless some appropriation is provided for that purpose?

Mr. FLOOD. The gentlemen who are in charge of this matter have had conferences with the Secretary of State. They have arranged for correspondence with the foreign delegates, with a view of having this congress open sometime in the latter part of this year.

Mr. HARRISON. Will the gentleman permit me to ask the gentleman from Wisconsin a question?

Mr. CARY. Certainly.

Mr. HARRISON. The gentleman from Wisconsin only made the point of order on the $10,000?

Mr. CARY. That is all; to strike that out.

Mr. HARRISON. So it is not against the whole paragraph, only against the $10,000?

Mr. CARY. Only against the $10,000, but I made the point of order on the paragraph.

Mr. DUPRÉ. I should like to ask the gentleman a question——

Mr. MANN. I would like to be heard on the point of order.

Mr. DUPRÉ. And that is, Is it proposed to use this money at any point beyond the city of Washington?

Mr. FLOOD. I do not think so; no.

Mr. DUPRÉ. Because I notice the position the gentleman took yesterday in regard to the Interparliamentary Union meeting here, and in order to be consistent the gentleman should take a similar position.

Mr. FLOOD. I said on yesterday, in regard to a provision of this kind, I thought it would be proper if applied to this item.

Mr. DUPRÉ. Does not the gentleman think he should offer an amendment to that effect?

Mr. FLOOD. No; the gentleman from Louisiana has a perfect right to offer one.

Mr. DUPRÉ. I understand the right of the gentleman from Louisiana, but my inquiry was in regard to the consistency of the gentleman from Virginia.

Mr. FLOOD. There is no inconsistency in the position of the gentleman from Virginia, because he stated yesterday he thought that that provision would be very proper in this item.

Mr. MANN. Mr. Chairman, while the gentleman from Virginia conceded the point of order, I think perhaps he did it inadvertently. I do not think the item is subject to the point of order. The language of the existing law makes available for this fiscal year an appropriation of $40,000 which was made in the preceding year. Of course that is no warrant of itself for continuing the appropriation, but the language of the current law in making the appropriation also gives this authority:

> The Secretary of State is hereby authorized and requested to extend an invitation to the governments of the world with which we maintain diplomatic relations to participate in and appoint delegates to said congress: *Provided*, That an itemized account of all expenditures shall be reported to Congress.

That follows the appropriation for the purpose of defraying the expenses incident to the fifteenth national congress against alcoholism.

I think the fact that we authorized the Secretary of State to extend the invitation to the governments of the world to send delegates to this congress is of itself an authority for us to make an appropriation to pay the necessary expenses. It would be ridiculous to say that we authorized the Secretary of State or the President to extend an invitation to various countries of the world to send delegates to a congress to be held in Washington and then can not thereby authorize any expenses whatever in connection with the reception of those delegates or the holding of the congress. That is the authority we have given by legislation, the authority to extend the invitation that does not expire with this fiscal year.

Mr. SMITH of New York. To what year does the gentleman refer? In what year was that law passed?

Mr. MANN. It was passed a year ago. This law that I am referring to was passed a year ago. It is current law. It is the current appropriation act. But it contains the authority to extend an invitation.

We constantly make use of this practice. Where we authorize the President to extend an invitation and do not expect that we will make any appropriation for it we invariably put in the bill a provision that this shall not authorize any expense on the part of the United States, because it has always been assumed in the House that where we authorize the President to extend an invitation and do not provide that the United States should be put to no expense we thereby authorize an expense, and if we authorize the expense, then the item of appropriation is in order.

Mr. FITZGERALD. Mr. Chairman, the argument of the gentleman from Illinois, if it were to prevail, would completely destroy the rules of the House under which we operate in the consideration of appropriation bills. Under the rules no appropriation can be carried in a bill or is in order as an amendment unless it is authorized by law, and an appropriation to pay the expenses of a convention can not be inferred from an authority to issue an invitation to Governments to nominate delegates to the convention. The provision to which the gentleman refers, about Congress inserting provisions to the effect that no expense shall be incurred by the United States, is a provision which is intended as a notice and as a warning to those interested in these conventions that they shall not look to the Federal Treasury to meet the expense that should be met from other sources.

That practice of acceptance of invitations to participate in international conferences or to have international conferences meet in the United States and have their expenses defrayed by the Government of the United States assumed such proportions and became such an abuse that Congress provided specifically that the Executive shall not extend or accept any invitations to participate in any international conference or congress or like event without having specific authority of law to do so, and the delegates appointed on behalf of the United States to any such conference have no authority, unless it is specifically given to extend such an invitation.

Now, in this instance such an invitation was without authority of law extended by the American delegates. Congress, however, recognized the situation that frequently arises, that the Government would be embarrassed if it did not acquiesce in nor ratify the action of those appointed to represent the Government, and so provision has been made to take proper care of this congress. I have looked over some of the hearings, and I have found out that when this item of $50,000 was reported to the Senate and stricken from the House bill on a point of order and the item was reported to the Senate carrying $40,000, the statement was made that there were no facts upon which it was possible to say that $40,000 would be required. Forty thousand dollars has been appropriated, and is at the disposal of the Department of State. The only money that could have been expended thus far would be the money that necessarily would have been expended in connection with whatever correspondence has taken place relative to the proposed holding of the convention. There is no reason submitted why an additional $10,000 should be given. So far as I know there is none.

So far as the gentleman from Illinois [Mr. MANN] is concerned, if his argument is to prevail, then practically any kind

of an appropriation could be argued in order on an appropriation bill. This appropriation is not authorized. No statute can be found which authorizes an expenditure of money or an appropriation of money to pay the expenses of this congress. The paragraph is not in order. But I hope, because I have no desire any more than any other Member of this House to prevent the Government doing the thing to which it is committed, that some understanding may be reached by which the money now at the disposal of the State Department might be continued at its disposal for this work.

Mr. CARY. Mr. Chairman, in reserving the point of order or making the point of order, which I will do, it is not with the intent of embarrassing the committee or the Secretary of State or this Government. All I wish stricken out is the $10,000, not the law or section itself. If the gentleman is willing to do that, I will merely confine my point of order to the $10,000 in the section.

The CHAIRMAN. Is the gentleman's point of order to the section or to the $10,000?

Mr. HARRISON. Mr. Chairman, I make the point of order that he can not make it to the whole section now. It is too late.

Mr. FLOOD. He does not make it to the whole section, as I understand.

Mr. MANN. He made it to the paragraph. Now, just a word more on the point of order.

The CHAIRMAN. The gentleman from Wisconsin [Mr. CARY] has the floor.

Mr. FLOOD. Mr. Chairman, will the gentleman yield to me for a moment?

Mr. CARY. I will.

Mr. FLOOD. As I understand, the point of order is only made to the $10,000.

Mr. CARY. I make the point of order to the whole section, but the gentleman from Virginia [Mr. FLOOD] asked me if I would change it and restrict it to the $10,000, and I said I did not wish to strike out the whole section if it would embarrass him.

Mr. FLOOD. Then the gentleman will withdraw the point of order?

Mr. CARY. If you will guarantee that the $10,000 shall be stricken out, I will.

Mr. FLOOD. I will not guarantee anything. I can not tell what the Senate of the United States is going to do. I concede the point of order on the $10,000. I think the gentleman from Illinois [Mr. MANN] is right, and I take it that the Chair will rule that the point of order against the $10,000 is well taken. That is all I can guarantee.

Mr. MANN. I do not think he will, as it is not well taken.

Mr. FLOOD. He ought not to.

Mr. MANN. I can throw the gentleman's last argument out of the water so quickly that he would admit it himself.

Mr. FLOOD. If the gentleman concedes the point of order on the $10,000, it is not necessary for the Chair to rule.

Mr. CARY. Mr. Chairman, there seems to be a great deal of dispute in the minds of the parliamentarians here; so that, in order not to continue the agony longer, I make the point of order on the whole section.

Mr. HARRISON. I make the point of order, Mr. Chairman, that it is too late. I asked the gentleman if he made the point of order to the whole paragraph or to the $10,000, and he said he made it to the $10,000.

Mr. CARY. I said I made it to the whole paragraph, but would restrict it to the $10,000.

Mr. FITZGERALD. Make it that way, then.

Mr. CARY. I make the point of order on the whole section.

Mr. MANN. Mr. Chairman, just a word.

The CHAIRMAN. The gentleman from Illinois is recognized.

Mr. MANN. The gentleman from New York [Mr. FITZGERALD] said that no appropriation was in order unless previously authorized by law, but the gentleman is mistaken. The language of Rule XXI, paragraph 2, is:

> No appropriation shall be reported in any general appropriation bill, or be in order as an amendment thereto, for any expenditure not previously authorized by law unless in continuation of appropriations for such public works and objects as are already in progress.

This is not a public work. Public works are physical things, but this is an object already in progress. Here is an invitation which by legislation we have authorized the Secretary of State to extend. It is an object already in progress. A portion of the appropriation has been expended already. There was legislation authorizing the invitation, so it is an object in progress, an object started by the Congress of the United States.

Mr. FITZGERALD. Of course the decisions do not sustain the gentleman from Illinois.

Mr. DAVIS of Texas. Mr. Chairman, I am not going to try to be technical; but it is a well-known rule of all legislative bodies that a requirement of law to do a thing carries with it all necessary means to perform the act commanded. We find a law authorizing the Secretary of State to invite a certain body to convene in the United States, and under that the ratification of an appropriation of $40,000, or something like that amount, heretofore made. This House is now called upon to add to that appropriation $10,000, following in line that direction. I do not think a point of order could possibly lie, even against the $10,000. If you move to strike it out, it is a question for the House to consider, whether $40,000 is proper, or $50,000; but from my viewpoint it is entirely germane to all the action taken heretofore and could not be eliminated by a point of order.

Now, the question raised about most of these people being prohibitionists heretofore appointed to these alcoholic investigations is certainly not germane. If the President selected prohibitionists, I suppose he selected them upon the theory that they were experts upon alcoholism, which is really in most cases a fact. When you send men to school to study the scientific questions involved in alcoholism, and graduate them, nine times out of ten they come out of college prohibitionists. That is the history of such young men.

I do not think a point of order can possibly lie against even the $10,000.

Mr. FITZGERALD. Mr. Chairman, I call the attention of the Chair to the manual, which says that by "public works and objects already in progress" are meant tangible matters like buildings, roads, and so forth.

Mr. MANN. Those are public works.

Mr. FITZGERALD. Public works and objects, and not the duties of officials in executive departments.

I suggest to the gentleman from Wisconsin [Mr. CARY], however, so as to relieve the situation and obviate any necessity for a ruling, that I understand the gentleman from Virginia [Mr. FLOOD] concedes that the point of order is good as to the $10,000. I suggest to the gentleman from Wisconsin that he make his point of order to the $10,000, and, as it is conceded, that will end it.

Mr. FLOOD. When the gentleman from New York [Mr. FITZGERALD] took the floor I had risen to say that my view of the parliamentary situation was that the point of order as to the $10,000 was well taken, but that it would not be well taken as to the whole paragraph. I concede the point of order as to the $10,000, if that is the point of order the gentleman makes.

Mr. CARY. As long as the chairman of the committee concedes the point of order as to the $10,000, I am satisfied to make it as to the $10,000 instead of to the section, so that the $10,000 will be stricken out.

Mr. FLOOD. The gentleman can move to strike it out.

Mr. FITZGERALD. Do not move to strike it out. It goes out.

Mr. CARY. What I want to accomplish is to have the $10,000 stricken out of the bill.

The CHAIRMAN. The Chair is ready to rule on the whole question.

Mr. FITZGERALD. The gentleman from Wisconsin makes the point of order to the $10,000, and the gentleman from Virginia concedes it.

The CHAIRMAN. Does the gentleman make the point of order only to the $10,000?

Mr. CARY. Yes; at the suggestion of gentlemen on that side.

The CHAIRMAN. The point of order is sustained.

Mr. MANN. I suggest to the gentleman from Virginia [Mr. FLOOD] that the language will have to be modified.

Mr. FLOOD. I offer an amendment.

Mr. MANN. You had better put it in the language of the current law.

Mr. FITZGERALD. I suggest to the gentleman that he offer an amendment in lieu of the paragraph.

Mr. FLOOD. I offer this amendment in lieu of the paragraph:

> Fifteenth International Congress Against Alcoholism: To complete the arrangements and provide for the entertainment of the Fifteenth International Congress Against Alcoholism to be held in the United States, to be expended under such rules and regulations as the Secretary of State may prescribe, together with the unexpended balance of previous appropriations for the holding of said congress in the United States—

Leaving out the $10,000.

Mr. BORLAND. The gentleman should add the words "is hereby reappropriated and made available for the fiscal year ending June 30, 1917."

Mr. FITZGERALD. You had better put in that language.

Mr. FLOOD. Yes.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

> Amend by inserting the following:
> "Fifteenth International Congress Against Alcoholism: To complete the arrangements and provide for the entertainment of the Fifteenth International Congress Against Alcoholism to be held in the United

States, to be expended under such rules and regulations as the Secretary of State may prescribe, together with the unexpended balance of previous appropriations for the holding of said congress in the United States is hereby reappropriated."

Mr. MANN. For the fiscal year ending June 30, 1917.

The CHAIRMAN. Is this offered as an independent section?

Mr. MANN. That is in lieu of what is in the bill.

The CHAIRMAN. In lieu of lines 17 to 25, on page 20?

Mr. FLOOD. Yes.

Mr. FITZGERALD. You want to add the words "and made available for the fiscal year ending June 30, 1917."

Mr. FLOOD. Why not let them hold it any time they want to?

Mr. FITZGERALD. You had better include those words.

Mr. SMITH of New York. Mr. Chairman, I reserve a point of order on that amendment, for the purpose of asking the chairman a question. I am not going to make the point of order. I understand that about $5,000 of the $40,000 has already been spent.

Mr. FLOOD. Some of it; I do not know how much.

Mr. SMITH of New York. I should like to know just why that money has been spent and for what purpose, before the convention is held.

Mr. FLOOD. It has been spent for the purpose of starting the congress—getting in communication with the different countries that are going to send delegates; for postage, paper, stenographic work, newspaper work, and things of that kind.

Mr. SMITH of New York. That would seem to be a rather liberal expenditure.

Mr. FLOOD. I do not say that it is $5,000. There is something over $35,000 left. I do not know whether they have spent $1,000, $2,000, $3,000, $4,000, or $5,000. My information is that something has been spent, and that more than $35,000, but less than the whole $40,000, is now available. I do not know how much.

Mr. SMITH of New York. I am not going to make the point of order, but I want to suggest in this connection that this money heretofore has been spent for junketing, as the gentleman from Missouri [Mr. MEEKER] pointed out yesterday. I want to put in the RECORD the suggestion that in the future delegates be appointed who are actual scientists, or who actually understand this subject, and not because they are for or against prohibition.

Mr. FLOOD. What does the gentleman mean by the money having been spent in junketing?

Mr. SMITH of New York. I mean that men and their wives were sent over, apparently at the expense of the Government, to these conventions. They were not scientists; two members of the same family were not scientists, and they should not have been selected as delegates.

Mr. FLOOD. Some of them were scientists; and when Congress appropriated the money and these ladies and gentlemen were appointed to attend the convention in Italy, I do not think it can be said that the money was spent for junketing when it was spent to pay their expenses to the place of meeting. Four thousand five hundred dollars was spent for paying the expenses of delegates. The President appointed the delegates, and the money was used for the purpose of paying their expenses, and I do not think the gentleman should characterize that as junketing.

Mr. SMITH of New York. It is clear that many of the men and women appointed were not scientists, and they did not add anything to the information of the convention or to the knowledge of the United States.

Mr. FLOOD. I think the statement of the gentleman from Missouri yesterday was far afield. All of them may not have been scientists, but some of them were. All of them had much knowledge as to the suppression of alcoholism, and the exercise of this knowledge is what the gentleman from Missouri is opposed to.

Mr. MANN. Mr. Chairman, can we have the amendment reported? It has not been fully reported yet.

The Clerk read as follows:

Amend by striking out the paragraph beginning on line 18 and ending on line 23 and inserting the following:

"To complete the arrangements and provide for the entertainment of the Fifteenth International Congress Against Alcoholism to be held in the United States, to be expended under such rules and regulations as the Secretary of State may prescribe, the unexpended balance of previous appropriations for the holding of said congress in the United States is hereby reappropriated and made available for the fiscal year ending June 30, 1917."

Mr. MANN. Mr. Chairman, I move to amend by adding, "*Provided*, That an itemized account of all expenditures shall be reported to Congress."

Mr. FLOOD. I have no objection to that.

Mr. SMITH of New York. Would the gentleman from Virginia accept a further amendment, that no part of the appropriation shall be spent for expenses outside of Washington City?

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Illinois.

The Clerk read as follows:

Add to the amendment the following:

"*Provided*, That an itemized account of all expenditures shall be reported to Congress."

The CHAIRMAN. The question is on the amendment to the amendment.

The question was taken, and the amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. SMITH of New York. Now, Mr. Chairman, I offer an amendment, "that no part of the appropriation shall be spent for expenses outside of Washington City."

Mr. BORLAND. Mr. Chairman, I make the point of order that the amendment as amended has already been adopted, and my point of order is that the amendment offered by the gentleman from New York should have been considered before the amendment as amended was agreed to.

Mr. SMITH of New York. Mr. Chairman, I offer it as a separate paragraph, "*Provided*, That no part of the foregoing appropriation shall be spent for expenses outside of the city of Washington."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Add to the paragraph as amended the following:

"*Provided*, That no part of this appropriation shall be expended for entertainment outside the city of Washington."

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and on a division there were 32 ayes and 14 noes.

So the amendment was agreed to.

Mr. CLINE. Mr. Chairman, I move to strike out the last word. During the consideration of this bill for the last two or three years questions have arisen on the floor of the House relative to what became of the student interpreters appointed under the Diplomatic and Consular appropriation bill. The gentleman from Illinois last year made that inquiry. Since 1903 we have been appropriating $10,000 or more a year for the appointment of student interpreters. We have also been making appropriations for tuition services for the ostensible purpose of bringing these students into the Consular Service.

I do not presume that there are many Members of Congress who have any understanding or knowledge of what finally becomes of the appropriations and the students nominated for these places. Accordingly I asked the Secretary of State, or Mr. Carr, representing that department, for an abstract of the appointees showing the appointments, promotions, and positions they now hold in the service. The abstract is very short, but it takes up every person appointed under the provisions of the law, and I would like to have it incorporated in the RECORD for the information of the Members.

Mr. MANN. Will the gentleman yield?

Mr. CLINE. Certainly.

Mr. MANN. Generally speaking, what becomes of these students?

Mr. CLINE. I think they are largely incorporated into the service. There are now serving as consuls and vice consuls—28 in China, 11 in Japan, and 13 in Turkey. Some of these students occupy inferior positions.

Mr. MANN. How much have we appropriated; $10,000 in Turkey every year for 10 or 15 years?

Mr. CLINE. These student interpreters are to be educated and distributed wherever, in their respective countries, the State Department sees fit to send them.

Mr. MANN. Not at all; there are 10 in Turkey, and, I think, 6 in Japan.

Mr. CLINE. The abstract sets out who they were and where they are.

Mr. MANN. If we have been educating 150 student interpreters and now have 28 in China and 13 in Turkey or Asia, we are doing pretty well. Student interpreters were authorized for China in 1903, 10 in number; to the embassy in Japan, 1907, 6 in number; in the embassy in Turkey, 1909, 10 in number.

Mr. ROGERS. Mr. Chairman, will the gentleman yield?

Mr. CLINE. Yes.

Mr. ROGERS. The gentleman recalls that in the Executive order of 1906 provision was made for the promotion of student interpreters and other subordinates to the lower grades of consul if their merit was sufficient to warrant it. Has the gentleman any information as to how many student interpreters in the last 10 years since that order was promulgated have been in fact promoted to the grade of consul?

Mr. CLINE. A very large number of these student interpreters have been promoted from inferior positions to positions

of more dignity and efficiency in the service, and this abstract I have from the State Department, I will say, sets out in detail each individual person, as to the position he has held, and his promotion. I think, as a matter of information, it ought to be incorporated in the RECORD, and I ask that that be done.

The CHAIRMAN. The gentleman asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The abstract referred to is as follows:

Statement of the number of students who have been appointed, promoted to the grades of interpreter and of consul, retired from service by death or resignation, voluntary or involuntary, and the number now in the service.

	China.	Japan.	Turkey.
Appointed	42	15	17
Interpreters	22	10	10
Consuls	13	3	.....
Now serving	28	11	13
Died	2	.....	4
Resigned:			
Voluntarily	8	3	1
Involuntarily	4	.....	3

AMERICAN STUDENT INTERPRETER CORPS.

CHINA.

[Mr. CARY addressed the committee. See Appendix.]

Mr. ROGERS. Mr. Chairman, my colleague on the committee, the gentleman from New York, Mr. MOTT, is unavoidably detained, and he asked me to secure permission for him to extend his remarks in the RECORD upon this bill. Is it in order to make that request in the committee?

The CHAIRMAN. It is.

Mr. ROGERS. Then I make that request.

The CHAIRMAN. Without objection, it will be so ordered.

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Purchase and repair, consular premises: Purchase, alteration, and repair of consular premises, or purchase of a site and the erection thereon of a suitable building or buildings, for the use of the consulate general at Shanghai, including the residences of officers, $150,000.

Mr. COX. Mr. Chairman, I reserve the point of order on that; and I think in order to save time I may just as well make it, because it is my intention to do so.

Mr. FLOOD. Mr. Chairman, that is not subject to the point of order.

The CHAIRMAN. The Chair will hear the gentleman from Virginia.

Mr. FLOOD. Mr. Chairman, that is made in pursuance of the law, and I will read that law to the Chairman:

Be it enacted, etc., That the Secretary of State be, and he is hereby, authorized to acquire in foreign countries such sites and buildings as may be appropriated for by Congress for the use of the diplomatic and consular establishments of the United States, and to alter, repair, and furnish the said buildings; suitable buildings for this purpose to be either purchased or erected, as to the Secretary of State may seem best, and all buildings so acquired for the Diplomatic Service shall be used both as the residences of diplomatic officials and for the offices of the diplomatic establishment: *Provided, however*, That not more than the sum of $500,000 shall be expended in any fiscal year under the authorization herein made: *And provided further*, That in submitting estimates of appropriation to the Secretary of the Treasury for transmission to the House of Representatives, the Secretary of State shall set forth a limit of cost for the acquisition of sites and buildings and for the construction, alteration, repair, and furnishing of buildings at each place in which the expenditure is proposed (which limit of cost shall not exceed the sum of $150,000 at any one place) and which limit shall not thereafter be exceeded in any case, except by new and express authorization of Congress.

Approved, February 17, 1911.

This item against which the gentleman makes the point of order is for the purchase, alteration, and repair of consular premises, or the purchase of a site and the erection thereon of a suitable building or buildings for the use of the consulate general at Shanghai, including residences of officers. This committee is authorized by law to report not exceeding $500,000 for this purpose, and not exceeding at any one place $150,000 for this purpose. This item comes within the provisions of the law. I concede that the succeeding item is subject to a point of order.

Mr. COX. Mr. Chairman, I think the argument made by the gentleman from Virginia is well made. I recollect the statute was passed several years ago, but for the time being it had escaped my recollection. Under the authority read by the gentleman from Virginia I think it is not subject to the point of order.

Mr. MANN. Mr. Chairman, I desire to ask the gentleman from Virginia a question. This item comes under the terms of the so-called Lowden Act?

Mr. FLOOD. Yes.

Mr. MANN. Does the next item also?

Mr. FLOOD. The next item exceeds the limitation in the Lowden Act. The Lowden Act authorizes us to make an appropriation of only $150,000 at any one place.

Mr. MANN. It is supposed to come within the provisions of the Lowden Act except as to the amount?

Mr. FLOOD. No.

The CHAIRMAN. The point of order is overruled.

Mr. SMITH of New York. Mr. Chairman, does not the Lowden Act refer to diplomatic and consular buildings?

Mr. FLOOD. Yes.

Mr. SMITH of New York. Does the next paragraph refer to that—that is, for other buildings?

Mr. FLOOD. Mr. Chairman, that is true. The gentleman from New York is correct about that.

The CHAIRMAN. Discussion of the succeeding item is not in order. It has not yet been read. The Clerk will read.

The Clerk read as follows:

Purchase, alteration, and repair of premises, or purchase of a site and the erection thereon of a suitable building or buildings, for the use of the United States court, jail, post office, marshal's and other Government offices at Shanghai, and residences of officers, $205,000.

Mr. COX. Mr. Chairman, on that I reserve the point of order. I do not think the Lowden Act covers that.

Mr. EDMONDS. Mr. Chairman, will not the gentleman reserve his point of order?

Mr. COX. I reserve the point of order.

Mr. EDMONDS. Mr. Chairman, during my recent visit to China I was greatly impressed with the fact that it was characteristic of the Chinese that when dealing with foreigners they were impressed only by what they personally saw of them or their belongings, and that their idea of the greatness of a nation was gauged entirely by the evidences of its wealth and power visible to them.

Most Foreign nations realizing this have seized every opportunity to present what is known in China as "face" and have secured every concession made to them by the Chinese Government, using the ground not only to establish thereon their consular and other governmental buildings but concentrating on these concessions all of their commercial and manufacturing interests where they can be under the protection of their home government, as these concessions are policed by the governments to whom they are made.

This is not true of our Government, although on the most friendly basis with the Chinese Government, so much so that we have always been offered the best of the concessions, we have refused to take advantage of their offer and to-day find ourselves not in a position to present the "face" that the other large commercial powers are able to do, and our interests suffer accordingly.

In Hankow, the "Pittsburgh of China," the greatest manufacturing city in China, located 600 miles up the Yangtze River, and yet doing a commercial business in ocean shipping, having 30 feet of water at its wharves, the Chinese Government offered our Government at a low price a favorably located concession, facing on the bund—or water front—and alongside of the concessions made to other nations. This was refused by our Government, and immediately taken up by the Japanese and is now occupied by them. The ground alone is now worth ten times the price at which it was offered to us. As a contrast to what might have been had we accepted this concession, our consulate is at present situated on the first floor of a private residence and has nothing about it to impress anyone with the greatness of our Nation.

In Tientsin, where we have a full regiment of soldiers, we rent our consulate, and also barracks and officers' quarters for the soldiers, all located in the city notwithstanding that there is a piece of ground on the bund large enough to accommodate all of our operations, saving in cost, compared with the rents at present paid and calculating the cost on a 3 per cent basis, more than it would cost us to buy this ground and erect buildings thereon. This piece of ground is still under option by our Government and is now occupied by the British Government under an agreement that we can take it over at any time upon payment for the buildings erected upon it. Again, in this important city we have lost "face."

In Shanghai, the "New York of the East," we have made numerous errors. Originally what is now known as the international concession was made by the Chinese Government to the United States and refused by us. To-day it is under the joint rule of a board composed of five Englishmen, one American, and one Russian. This property is in the foreign section of the city, and the ground alone is worth over a hundred million dollars. In this concession and near the bund are found all of the large foreign banking and business concerns, and property is worth ten times as much as it was 20 years ago. Of course ground has become very desirable along the bund and most of it is worth far more than the property offered the United States Government, which is just across Soochow Creek from the concession and is between the German and Japanese properties. It is the most available site that can be purchased at the present time, and considering the prices placed upon other properties the price asked is reasonable. Should our Government lose this location it will be forced to go upon one of the back streets, which would be a severe blow to our prestige. I understood, when I was in China, that there was another nation which would purchase this site if we did not take up our option.

At the present time we have housed in the two buildings rented by the Government the consul general's office, the United States court and jail, the post office, and the United States Marine and Health Service. The buildings are well built and can be used for years without change, and although they are not as impressive as some of the consulate buildings of other nations their location at the mouth of Soochow Creek is so commanding that it helps to correct the lack of impressiveness.

Mr. SMITH of New York. Will the gentleman yield for a question?

Mr. EDMONDS. Certainly.

Mr. SMITH of New York. Does the gentleman know how much rent we are paying for property which can be abandoned for rental purposes if this building is constructed?

Mr. EDMONDS. At present we pay a rental of over $5,000 gold for use of about one-half property, and our tenancy is subject to an option to purchase which will expire in a few months. If no action is taken by this body and the property is not purchased by other parties, it will only be possible to retain

this property under a greatly increased rental or to purchase it at a greatly increased cost.'

As a comparison in value, I am able to give the values of a few properties on the Shanghai Bund reduced to the price per acre: Union Assurance Co., $392,040 per acre; Bank de l'Indo-Chine, $313,632 per acre; Siemssen & Co., $705,672 per acre; and American consulate site, $347,173.

I can not too earnestly impress upon the House the necessity for acting at this time, and trust that for our future prestige and commercial advantage the bill to purchase the buildings and grounds will pass.

The CHAIRMAN. The time of the gentleman has expired.

Mr. EDMONDS. May I ask the privilege of extending my remarks in the RECORD?

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to extend his remarks in the RECORD. Is there objection. [After a pause.] The Chair hears none.

Mr. COX. Mr. Chairman, I make the point of order.

Mr. FLOOD. Mr. Chairman, I think the gentleman from Wisconsin [Mr. COOPER] wanted to be heard.

Mr. COX. Then I will reserve the point of order.

The CHAIRMAN. Does the gentleman from Wisconsin desire to be heard on the point of order?

Mr. COX. I will reserve the point of order if the gentleman from Wisconsin wants to make a statement.

Mr. COOPER of Wisconsin. Mr. Chairman, may I ask the gentleman from Virginia whether it will be possible, if the point of order be sustained and all of lines 6 to 10, inclusive, page 21, be stricken out, for the United States Government to purchase any property on the water front at Shanghai?

Mr. FLOOD. My opinion is it would not; but the appropriation of $150,000 was not subject to the point of order, and has been passed. Now, the gentleman from Indiana makes the point of order against the next item of $205,000.

Mr. HAMILTON of Michigan. May I ask the gentleman a question? Suppose this item in line 10 be reduced to $150,000, so it may come within the law, would it not be possible to enter upon negotiations to acquire the site suggested in the paragraph, and thereby save the site which the gentleman from Pennsylvania referred to?

Mr. FLOOD. I do not think there would be any law if we reduced it, because this is for other purposes than buying a building for the Diplomatic and Consular Service. This is for a court.

Mr. HAMILTON of Michigan. I see.

Mr. COOPER of Wisconsin. Mr. Chairman, the gentleman from Massachusetts [Mr. ROGERS], a member of the Committee on Foreign Affairs, has just called my attention to the report—page 56—of the hearing before our committee last January, during which he asked Mr. Carr, of the State Department, the precise question that I just put to the gentleman from Virginia [Mr. FLOOD], and I invite the attention of the gentleman from Indiana——

Mr. COX. I have read the report.

Mr. COOPER of Wisconsin. To this testimony of Mr. Carr. It is not necessary for me to vouch for the character of Mr. Carr, nor for the high standing he has with all people who have had business with him at the Department of State:

Mr. ROGERS. The $150,000, which is not subject to the point of order, would not alone do you very much good, would it, Mr. Carr?

Mr. CARR. No; because we could neither get this piece of property nor could we get any other that would be adequate.

The gentleman from Indiana [Mr. Cox] will notice the express statement of the representative of the State Department that the $150,000 which we have appropriated by the previous paragraph, or will appropriate if the paragraph shall become a law, would do no good at all, because it would not enable us to buy either this property on the water front or any elsewhere that would be adequate.

Mr. Chairman, it is well for the House, I think, to be reminded of what consulates are and of the advisability where possible of keeping all of the representatives of our Government together in offices in close proximity to the consulate building.

A consulate is a business office. Consuls perform no diplomatic function. Our consuls are really business agents for the American people. As a business agent it is a consul's duty to try in all honorable ways to extend our trade in the country where the consulate is located. That is one of the chief purposes of a consulate.

Now, at Shanghai—and I visited Shanghai a few years ago—is one of the most magnificent water fronts in the world—incomparably the finest water front in the Orient—an avenue lined on one side by banks—some of these being branches of the principal international banks of Europe—by great business houses, and by the handsome, commodious consulate buildings of Great Britain, Germany, France, Japan, and other nations. As our steamer passed slowly along that superb water front we all were astonished to see floating over those consulate buildings the flags——

The CHAIRMAN. The time of the gentleman has expired.

Mr. HAMILTON of Michigan. I ask unanimous consent, Mr. Chairman, that the gentleman from Wisconsin [Mr. COOPER] may proceed for five minutes.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. COOPER of Wisconsin. I was about to speak of our astonishment to see flying proudly from those fine Government buildings the flags of our commercial rivals, and of our regret that nowhere could we see the flag of the United States. We were told that our consulate was on a back street. On reaching it we soon were reminded by our official representatives that this Government was making a serious mistake in keeping our consulate housed in such a building and in so bad a location; that an appearance of business thrift about a consulate is important in any country, but especially so in the Orient; and that they had found our poor, badly located quarters in that city a great drawback in their efforts to extend our trade. Since then the consulate was removed to the premises it now occupies on the water front, this being the property that the pending paragraph is intended to purchase.

This particular piece of property is located between the consulate of Germany and that of Japan, and is absolutely the only piece of property which we can purchase on that water front for our business building. I do not know who the owners are except by name, nor have I ever had a communication from any one of them, either directly or indirectly. My knowledge of the subject comes only from the testimony of the State Department officials who appeared before the Committee on Foreign Affairs of the House and from my own personal observations while visiting Shanghai.

The foreign trade of China before the present European war broke out was annually more than $740,000,000. The city of Shanghai alone did more than 42 per cent—nearly one-half—of that business, or more than $300,000,000, export and import. The city is located on the Whangpoo River, and that great stream, with its tributaries, enables vessels drawing considerable water to reach one-third of the vast domain of China. Our commercial rivols know all this, and they are getting that trade. We have only 10 per cent of it.

The rapidity of the growth of the city's foreign trade is remarkable. In 1880 it was $40,000,000, and in 1913, as I said before, it was more than $300,000,000, and of this we did only 10 per cent. We have the right to look for a larger, much larger, share of that trade. We can get it only by taking advantage of every legitimate business opportunity in China. One such opportunity is now before us. This Government ought to have a respectable business house on that water front. Remember that Shanghai is a city surrounded by a stone wall pierced by gates. All foreigners, including the people of the United States, are limited to a very restricted area inside of the walled city, and that area can not be extended. The situation in Shanghai is wholly exceptional, unlike that of any other consulate. I hope that the gentleman from Indiana [Mr. Cox] will not make a point of order against this item. We have an option on that property, which, as I understand, will expire in two months. If the Government of Great Britain, or of Germany, or of Japan, or if some great Japanese steamship company should buy that property, the Government of the United States could never have a business office—and a consulate is a business office—on the water front in Shanghai, the city destined to become the London of the Orient.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired. The point of order is sustained. The Clerk will read.

Mr. COOPER of Wisconsin. Mr. Chairman, did the Chair give the gentleman from Indiana an opportunity to renew his point of order? Did the gentleman renew it?

Mr. COX. No; I made the point of order.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Acquisition of legation premises at Panama City, Panama: For the erection at the city of Panama, on ground to be presented by the Government of Panama, of a suitable building for the use of the legation to Panama, both as a residence of the minister and for the offices of the legation and for the necessary furnishing of the building, $100,000, or so much thereof as may be necessary.

Mr. MANN. Mr. Chairman, I reserve a point of order on the paragraph.

The CHAIRMAN. The gentleman from Illinois reserves a point of order on the paragraph.

Mr. CULLOP. Mr. Chairman, I move to strike out the last word, for the purpose of asking a question of the chairman of

the committee. As I recall, in the act which authorizes these buildings to be constructed there was a limitation that not more than $500,000 should be expended in any one year. Is that correct?

Mr. FLOOD. That is correct.

Mr. CULLOP. I notice a number of items in this bill for the erection of these buildings. I would like to ask the chairman if more than $500,000 is authorized in this bill for that purpose?

Mr. FLOOD. Only $350,000, I think.

Mr. CULLOP. All the items together?

Mr. FLOOD. One at Shanghai, $150,000; one at Panama, at $100,000; and one at Habana, $100,000.

Mr. CULLOP. So that it comes within the limitation prescribed by the statute for this purpose, and does not exceed the expenditure of $500,000 for any one year?

Mr. FLOOD. No.

Mr. CULLOP. I thought it well to keep in view the limitation contained in the law authorizing the construction of these buildings, in order that no difficulty might arise hereafter about the same. I can readily see if more than the amount should be authorized here now serious difficulties might arise and embarrass the work.

Mr. MANN. Mr. Chairman, I would like to ask the gentleman from Virginia if he is familiar with the item in the sundry civil bill relating to the American Legation building at Panama?

Mr. FLOOD. I would like to have the gentleman read the item.

Mr. MANN. I did not know that it had been called to the attention of the gentleman. The sundry civil bill, which was recently reported to the House, carried the items in reference to the Panama Canal, and so forth, and so on. One of the items in the sundry civil bill relates to the American Legation building. It is in connection with some other matters, but it reads this way:

> And exclusive of the fair value of the American Legation building in Panama, as approved by the Secretary of War and the Secretary of State, which building is authorized to be transferred without charge to the jurisdiction of the Secretary of State.

The purpose of that is to turn over to the State Department the building now belonging to the Government of the United States under the Panama Canal act as a legation building. The question is whether that will fully take care of the needs of a legation building at Panama. We certainly do not want to spend money unless it be necessary there.

Mr. FLOOD. No; and the State Department will not spend it unless it is necessary.

Mr. COX. I do not know about that.

Mr. FLOOD. But they are very anxious to have a legation building. I think I can make that statement without qualification.

Mr. MANN. The gentleman knows the pressure that has been brought to bear on the State Department in reference to this from outside sources?

Mr. FLOOD. Yes. A representative of the State Department approached me the other day in reference to an appropriation of $350,000, I think it was, for the purpose of securing an embassy building at Petrograd, and our ambassador at Paris has in mind a building that can be bought very cheaply now if Congress will make the appropriation. But I have talked with Mr. Phillips with reference to the Russian embassy building, and he said he would be very willing to substitute Russia for Panama, but it was essential to put up a proper building at Panama at this time, though it was not as important as it would be in Russia. I told him that I did not think the committee would entertain the proposition, as it would involve too much money. They think that a proper building at Panama is necessary on account of the fact that other nations have their buildings there, and it is a place where a great many people will visit, and it will accomplish as much good, probably, for the country as the expenditure at any other embassy or legation, except that he preferred this Russian proposition because the property at this time could be bought very cheaply.

Mr. MANN. The gentleman knows that this item contemplated that a certain piece of land should be given to the Government. That land is located outside of the city of Panama, quite a distance from the city, at a very inconvenient place for anybody going through Panama to visit.

Mr. FLOOD. It has not been designated, and I have no idea that the department would accept a site any considerable distance outside of the city of Panama.

Mr. MANN. It is a part of that same real-estate deal in reference to a Government exposition.

Mr. FLOOD. The gentleman made that statement on the floor of the House last year, and when the representatives of the State Department were before the committee this year we took occasion to go into it somewhat, and developed the fact that the gentleman from Illinois was mistaken.

Mr. MANN. Oh, I am not mistaken. I have talked with the representatives of Panama in reference to it.

Mr. FLOOD. The representatives of the State Department who read the gentleman's statement made on the floor of the House last year stated to us that the gentleman was mistaken.

Mr. MANN. Then the representatives of the State Department are not informed.

Mr. FLOOD. They said the gentleman from Illinois was not informed.

Mr. MANN. My information comes at first hand.

Mr. FLOOD. Their information also comes at first hand.

Mr. FITZGERALD. Where is this land to be donated? I have been in Panama seven times. I get my information at first hand myself.

Mr. FLOOD. I do not know where it is to be located.

Mr. FITZGERALD. There is no land in the city of Panama, unless you go away outside, that can be granted.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FITZGERALD. I ask that the time of whatever gentleman has the floor may be extended five minutes.

Mr. FLOOD. Mr. Chairman, I ask for recognition, and yield to the gentleman from New York [Mr. FITZGERALD] for a statement.

Mr. FITZGERALD. The Panama Canal Commission took over a building in the city of Panama when they acquired the rights of the French company. The State Department has been endeavoring to get possession of that building to use for a legation. The canal commission has no use for the building. It is a very substantial structure, one of the most substantial and one of the finest buildings in the city of Panama. We carry in the sundry civil bill a provision, put there at the suggestion of Gen. Goethals, to turn the building over to the State Department without expense.

I find that there is a good deal of exaggeration about these legation buildings. I have been all over Panama. I have been down there seven times, and it takes a guide to find these legation buildings, with the exception of one, and to identify them. They do not add a thing to the prestige of any government, and the best building of the lot is this building that we propose to turn over to the State Department. One of the legation buildings is rather attractive, because it recedes a little, and there are some tropical plants outside of it; but the architecture of Panama is such that most of the residences are above business places. You can not tell anything about them from the outside. The business houses are on the ground floor and the residences are on the upper floors, and they are all barricaded, as if everybody were afraid that there was about to be an uprising at any moment and that a mob would take possession of the buildings. It seems to me that if the State Department gets this building, it will be all that is wanted. I should think that for $100,000 you could build a whole public park full of buildings, judging from what I have seen of them. I have spent a lot of time in Panama. It is like going from here over to the Senate, from where the committee would be located. I have walked all over it and driven all over it, in those little vehicles that they have there, and I am convinced that if the gentleman from Virginia [Mr. FLOOD] had ever been in Panama, if anybody had the temerity to ask him for $100,000 for a building exclusive of site, he would suggest that that man be sent to St. Elizabeth's for examination. That is not an exaggerated statement. There are a number of gentlemen on the floor of this House who have been there and who know the situation and the conditions. I can not understand this, except on the theory that those who make the suggestion have never been in Panama.

Mr. HARRISON. May I ask the gentleman a question?

Mr. FITZGERALD. Certainly.

Mr. HARRISON. Did the State Department appear before the committee and recommend this provision in the sundry civil bill?

Mr. FITZGERALD. No; they did not. Gen. Goethals told us that they had been trying to get the building for several years, that the Canal Commission could not turn it over because they had no authority to transfer it, and he asked for that authority and to exclude it from the sums for which bonds could be issued. The Canal Commission has no use for the building, the Department of State needs one, and this is one of the best buildings in Panama.

Mr. HARRISON. How far is this building located from the site of the exposition grounds, where they propose to locate this legation building?

Mr. EVANS. About 2 miles.

Mr. FITZGERALD. The exposition grounds are outside the city.

Mr. FLOOD. This site that the Republic of Panama is going to give is not on the exposition grounds at all. It is in the city of Panama.

Mr. FITZGERALD. There are no vacant lots in the city.

Mr. FLOOD. They could tear down one of those buildings.

Mr. FITZGERALD. The city of Panama extends out. I suppose there are unbuilt sections of it, but I should think this would be a very unwise thing.

Mr. CLINE. Does the gentleman know where the legations of Cuba, Spain, and France are located at this time?

Mr. FITZGERALD. I have had them all pointed out to me, but I can not distinguish them now in my mind. I have had men take me to see them. There is one of them that is attractive, and that stands out from the general run of buildings there. The streets of Panama are not as wide as half of the corridor of the lobby of this House.

Mr. CLINE. What I wanted to inquire is, How far is this building which it is proposed to be turned over to the United States from the embassies?

Mr. FITZGERALD. It is in the heart of the city—I suppose six or seven minutes' walk. You can walk from the Tivoli Hotel through to the extreme end of the city of Panama in half an hour without any effort.

The CHAIRMAN. The time of the gentleman from Virginia has expired.

Mr. FLOOD. Mr. Chairman, I ask that my time be extended five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. FLOOD. Mr. Chairman, it seems to me that what the gentleman from New York has said demonstrates the propriety of the United States putting up a decent building at Panama to give the people some idea of the proper kind of architecture of a building for a legation or an embassy if they ever have an embassy there. The gentleman says that there is one appropriate building there occupied by a legation of some country, and I do not see why the United States should not have the best that there is there. We passed a law some years ago authorizing Congress to appropriate half a million dollars a year for the purpose of erecting embassies, legations, and consulates in different countries of the world. Since then we have appropriated $100,000 for a legation at Berne, $150,000 for a legation at Mexico City, and $150,000 for one at Tokyo. I think that is all up to the present appropriation bill. None of that money has been expended so far except in negotiations in reference to the Berne property. In this bill we carry an item providing for a change of site in Tokyo, and the State Department will do nothing until that change is made. In Mexico City, owing to the disturbed conditions in that country, nothing has been done.

The State Department this year recommended appropriations for building a consulate at Shanghai and for the erection of a legation at Panama upon land to be given to the United States Government by the Republic of Panama, and for the erection of a legation at Habana. The committee has recommended this $350,000 appropriation under the Lowden Act. It seems to me that if we are going to carry out the policy laid down by Congress some years ago when the Lowden Act was passed we ought to proceed to make some appropriations each year. Of all of our representatives in countries besieging the State Department with the request or recommendation for embassy or legation or consulate buildings the department selected Panama. I do not see anything in the suggestion made by the gentleman from New York to induce Members of Congress to vote against this appropriation.

Mr. TEMPLE. Will the gentleman yield?

Mr. FLOOD. Yes.

Mr. TEMPLE. I noticed in the report that the department is officially informed that it is the intention of the President of Panama to present to the United States a suitable site for the construction by the Government of the United States of a building for the use of the legation, and so forth. In the bill the appropriation is made for a legation on ground to be presented by the Government of Panama. I would like to ask whether it is from the Republic of Panama, or a private gift from the President from his own personal resources.

Mr. FLOOD. It is a gift from the Republic of Panama. I do not see, Mr. Chairman, any advantage to be gained by voting for the suggestion of the gentleman from New York. We ought to put a building at Panama that will be an example in architecture and a proper building for the use of our legation and a credit to our country.

Mr. HAMILTON of Michigan. Will the gentleman yield?

Mr. FLOOD. Yes.

Mr. HAMILTON of Michigan. Does the gentleman know what the actual value of the land proposed to be given by Panama is?

Mr. FLOOD. That question was asked at the hearing, but they did not know what the value was. It was assumed to be a suitable site for a building for the legation.

Mr. HAMILTON of Michigan. I did not want to violate the proprieties by looking a gift horse in the mouth, but I did not know but that the gentleman might state it privately.

Mr. FLOOD. I think the gentleman can trust the State Department. If the site is not satisfactory, they need not erect a building, but can come to Congress and ask permission to change the site.

Mr. MANN. Mr. Chairman, I understood the gentleman from Virginia to say that when Mr. Carr was before the committee he contradicted something I said on the floor a year ago. I did not remember until reading the testimony before the committee, but I have reread it, and there is no contradiction by Mr. Carr of any statement I made a year ago, but quite the contrary.

Mr. FLOOD. I did not say it was in the hearings before the committee; I said we asked him about it, and he said that the gentleman from Illinois was entirely mistaken.

Mr. MANN. But he did not say it.

Mr. FLOOD. He did say it.

Mr. MANN. It is not in the hearings.

Mr. HARRISON. Mr. Chairman, may I read what was said before the committee?

Mr. MANN. I will yield to the gentleman to read from the hearings.

Mr. HARRISON. I read from page 62 of the hearings:

Mr. HARRISON. Did they have discussion in the committee and on the floor of the House about that, Mr. Chairman?

The CHAIRMAN. Both in committee and on the floor of the House. Mr. MANN stated that he had been there and looked at it; that it was some distance from the residential and business part of the city and in a location that would not be suitable for the legation.

Mr. CARR. In the communication I saw and to which I have made reference there was no location specified.

The CHAIRMAN. There was no specific location?

Mr. CARR. No.

Mr. LINTHICUM. Was that the exposition building or the legation building?

The CHAIRMAN. It was the exposition building that was to be used as a storeroom for exhibits.

Mr. CARR. It may have been an exposition building erected for that purpose, and possibly afterwards to be used for legation purposes. There was some such proposition as that, I know. I think, however, in any appropriation that was made for the legation building at Panama you can depend upon it that the department will not consent to the erection of any building that is not suitable or on a suitable site.

The CHAIRMAN. Why do you recommend this?

Mr. MANN. Certainly. That is all correct. There is no contradiction there of what I said.

Mr. HARRISON. I did not say there was.

Mr. MANN. The gentleman from Virginia [Mr. FLOOD] simply forgot.

Mr. FLOOD. I did not forget.

Mr. HARRISON. I will say that it was the impression of the committee that the gentleman had made a statement to that effect, but when we asked Mr. Carr, this is what he stated before the committee.

Mr. MANN. I was going to read that myself, and I am much obliged to the gentleman for reading it. What was up last year was in reference to the exposition building which possibly might be used for a legation building. I know where the exposition grounds are. I do not know whether the gentleman from Virginia [Mr. FLOOD] has been there and seen them or not. The State Department probably knows where they are. There was no secrecy about that. The exposition building had to be located upon the exposition grounds. I was talking about the exposition building when the gentleman from Virginia [Mr. FLOOD], a little forgetful of what I had said, stated to Mr. Carr what I said, which was in reference to a legation building, which was not the building that was under discussion at all, and Mr. Carr said that he did not know, because there was no location specified. The location that was not specified was a legation building which was not before the House last year at all unless it was to be the left-over remains of the exposition building. But that is neither here nor there. I know where these exposition grounds are, because I have been there. I know where the exposition building was to be located, because I examined the site. I presume that the site that is to be presented by the President of the Panama Republic for a legation building is the same location, though I do not know. The committee does not know, Mr. Carr does not know, the State Department does not know—at least they say they do not, but the fact is that there is an element down there endeavoring to build up a new subdivision——

Mr. FITZGERALD. And we are to help them.

Mr. MANN. Where the exposition buildings were to be located, in the hope that some of them would remain there permanently, where they would like to locate the legation building, where some one might be perfectly willing to donate a site to help sell the balance of the property. I do not see any reason why we should engage in real-estate speculations in Panama. The one thing that we are long on down there is real estate. We own lots of real estate in the city of Panama. We own a strip 10 miles wide clear across the Isthmus from Panama to the Caribbean Sea. We practically gave to the Republic of Panama the old administration building down there a few years ago because we had no use for it—a much better location for a legation building than one located outside of Panama, where the people going through the canal will never see it.

Mr. CLINE. Mr. Chairman, I just want to add a word to this discussion as a reason for the recommendation of the State Department. I have never been to Panama and do not speak from any personal knowledge. I am informed by the State Department that Cuba has already expended $60,000—it may be in revamping their old exposition building; I do not know how that is—for a legation and for a permanent commercial exhibit. Spain has expended $100,000 in transforming, if that is the fact, their exposition building into a legation building and bank for the purpose of doing a banking business and for a permanent commercial exhibit also. France has also erected a building at a cost of $60,000 in this group of buildings. These countries feel that the development in the South American Republics demand this. I understand that it is the purpose of the President of the Panama Republic in his representative capacity to give the United States a very excellent lot in the immediate vicinity of these buildings. The State Department considers that a very good reason why the United States should build, especially when the site for the building is given to us. I think that that is a matter which ought to be taken into consideration, especially in view of our relationship with the South American Republics and with that territory down there, in which we are becoming more and more interested, and because of the fact that within the last five years our exports to South American Republics have increased in round numbers from $189,000,000 in 1910 to $324,000,000 in 1915, showing the great drift of trade to the territory south and through the Panama Canal. All those things are of interest to the United States.

I do not know how far an exposition building or a legation building will go toward helping that out, but I do know it is universally believed that legation buildings bespeak the dignity and influence of the Government that constructs them. Certainly it is worthy of our attention, and those are some of the things—together with the fact that we get the very best site there is there—that ought to command our attention. If the exposition building we formerly occupied can be changed and made into a good legation building, with all of the necessary arrangements we ought to have in a building of that kind, with a residence for the minister, and if it is properly located for the purposes contemplated, I think it ought to be considered also.

Mr. McLAUGHLIN. Mr. Chairman, will the gentleman yield?

Mr. CLINE. Yes.

Mr. McLAUGHLIN. The gentleman has stated that a very excellent lot in the vicinity of the exposition building has been offered to the Government of the United States. I gather from the talk of gentlemen on both sides of the Chamber that no one here knows the location or anything about it. By what authority does the gentleman now say that a very excellent lot in the vicinity of the exposition building has been offered?

Mr. CLINE. Mr. Chairman, I stated distinctly when I began my remarks that I got my information from the State Department. Where the lot is located, the size of it, the value of it, I do not pretend to know. One thing is certain, however, that if the lot was not commensurate with the necessities of the United States the State Department would not erect a building there to cost $100,000.

Mr. EVANS. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. All debate upon this amendment is ended under the rules. The gentleman can proceed only by unanimous consent.

Mr. EVANS. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. EVANS. Mr. Chairman, I regret to find myself out of accord with the committee's recommendation in this matter. Anyone who has been to Panama and looked over the situation there must agree, I think, that if the building formerly occupied by the Panama Canal Commission is to be turned over to the State Department for the purposes here stated, they will have all of the building they want for ambassadorial purposes.

This building is located near the water front, in the heart of the city. It is one of the best buildings there. In my judgment if the building is taken over for ambassadorial purposes it will be incomparably the best building in Panama for the purpose. It is a large, commodious, fireproof, and excellent building. Now, the exposition grounds are probably 2 miles from there. I do not say positively they are beyond the corporate limits, because I do not know, but there are no buildings around it for half a mile, or perhaps three or four or more blocks, at least; and if we can get a good building, own it ourselves, and turn it over to the State Department for the purpose, I see no reason why we should expend $100,000 in building a building somewhere else. I am sure, as I suggested, that the building shown to me as the building originally occupied by the Panama Canal Commission, which is sought now to be turned over here, will be better than any foreign public building in the city of Panama. For that reason I would be opposed to voting $100,000 to build a new building when we have one already that can be used.

Mr. MANN. Mr. Chairman, I make the point of order against the paragraph. The Lowden Act does not authorize the appropriation for buildings to be constructed on land which the Government has not acquired or is not authorized to acquire. This is for the erection at the city of Panama on ground to be presented by the Government of Panama. We do not own that ground and there is no authority to make an appropriation for the construction of a building on ground to be presented, nor is there any authority on the part of the State Department to accept any ground that is presented unless this itself is legislation authorizing the acceptance. This probably would be considered as legislation authorizing the acceptance; hence it is legislation and is subject to the point of order because it requires legislation to authorize any officer of the Government to accept a present.

Mr. FLOOD. Mr. Chairman, I ask unanimous consent to offer an amendment to this paragraph right at this time.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent to offer an amendment to the paragraph.

Mr. MANN. If the point of order is sustained the gentleman would have authority to offer an amendment, of course.

Mr. FLOOD. I would rather do it before.

Mr. MANN. Or a substitute.

The CHAIRMAN. The Chair rather thinks that the point of order should be disposed of before the amendment is offered.

Mr. FLOOD. Not if I get unanimous consent.

Mr. FITZGERALD. Mr. Chairman, I make the point of order on the whole paragraph, because I am going to oppose any proposition for the expenditure of $100,000, as you might as well throw it in the river as to expend it for this purpose.

Mr. MANN. Mr. Chairman, I made the point of order on the paragraph. Of course the gentleman can offer another proposition if the point of order be sustained.

The CHAIRMAN. The Chair thinks the point of order should be disposed of first.

Mr. FLOOD. Let the Chair dispose of it.

The CHAIRMAN. The Chair sustains the point of order.

Mr. FLOOD. I offer this amendment. Acquisition of legation premises at Panama City, Panama. For the erection at the city of Panama of a suitable building for the use of the legation to Panama, both as a residence of the minister and for the offices of the legation, and for the necessary furnishing of the building, $100,000, or so much thereof as may be necessary.

Mr. MANN. If the Clerk has not the amendment we might argue the point of order while the gentleman reduces it to writing, so the Clerk can get it.

Mr. FLOOD. The amendment is to strike out, page 22, line 9, the word "on," in line 10, down to and including the word "Panama," in line 11. Does the gentleman make the point of order against that?

Mr. MANN. I do.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Substitute for the paragraph stricken out the following:

"For the erection at the city of Panama of a suitable building for the use of the legation at Panama, both as a residence of the minister and for the offices of the legation, and for the necessary furnishing of the building, $100,000, or so much thereof as may be necessary."

Mr. MANN. Mr. Chairman, I make a point of order against that. The only authorization for any of these appropriations is the so-called Lowden Act. That act, which I helped to draw in order to protect the Treasury from onslaughts upon it, is very particular as to what the appropriation shall be. It requires an estimate from the State Department and the appropriation to be made in accordance with the estimate. Now, the

gentleman has not any estimate from the State Department, except the estimate in conformity to the paragraph which was stricken out, and there can be no appropriation until an estimate has been presented stating exactly what is to be done and the appropriation is based upon the estimate.

Mr. FLOOD. Mr. Chairman, I would like to read the Lowden Act to the Chair. It is as follows:

Be it enacted, etc., That the Secretary of State be, and he is hereby, authorized to acquire in foreign countries such sites and buildings as may be appropriated for by Congress for the use of the Diplomatic and Consular Establishments of the United States, and to alter, repair, and furnish the said buildings; suitable buildings for this purpose to be either purchased or erected, as to the Secretary of State may seem best, and all buildings so acquired for the Diplomatic Service shall be used both as the residences of diplomatic officials and for the offices of the Diplomatic Establishment: *Provided, however*, That not more than the sum of $500,000 shall be expended in any fiscal year under the authorization herein made: *And provided further*, That in submitting estimates of appropriation to the Secretary of the Treasury for transmission to the House of Representatives the Secretary of State shall set forth a limit of cost for the acquisition of sites and buildings and for the construction, alteration, repair, and furnishing of buildings at each place in which the expenditure is proposed (which limit of cost shall not exceed the sum of $150,000 at any one place), and which limit shall not thereafter be exceeded in any case except by new and express authorization of Congress.

Approved, February 17, 1911.

Now, that estimate of the cost was made by the Secretary of State and submitted to Congress by the Secretary of the Treasury, and the estimate was $100,000, and this appropriation is for $100,000, which is within the limit of $150,000 prescribed by law, and this bill does not carry in excess of $500,000. Therefore, it seems to me, the item is necessarily in order.

Mr. FITZGERALD. I call the attention of the Chair to the fact that the statute requires an estimate be submitted on the limit of cost and site of building. There is no estimate here on the site at all. There is no estimate for a site, and there is no provision in this amendment to acquire a site. You can not authorize the construction of a building without a site. The act requires the estimate to be for a limit of cost for site and buildings.

Mr. HARRISON. You have already got your site, and it provides in one year for the building.

Mr. FITZGERALD. You can not have a building without a site. It is useless to authorize the erection of a building without authorizing the acquisition of a site.

Mr. FLOOD. Mr. Chairman, I will offer another amendment to meet that objection. I do not concede the point of order, but I want to offer an amendment. On line 8, after the word "For," to insert "purchase of a site and."

Mr. MANN. The gentleman withdraws his former amendment and offers an amendment with this in?

Mr. FLOOD. Yes.

Mr. MANN. I am perfectly willing.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent to withdraw his former amendment. Is there objection?

There was no objection.

Mr. MANN. Mr. Chairman, let the new amendment be reported.

Mr. FLOOD. It is for the purchase and acquisition.

The CHAIRMAN. The Clerk will report it.

The Clerk read as follows:

Amend by inserting "For the acquisition of a site and the erection of a suitable building thereon for the use of the legation at Panama, both as a residence of the minister and for the offices of the legation and for the necessary furnishing of the building, $100,000, or so much thereof as may be necessary."

Mr. MANN. Mr. Chairman, I make a point of order on the amendment. It is perfectly plain that under the Lowden Act there must be an estimate for the site and the building and that the estimate for the site and the building must not exceed $150,000. But there must be an estimate for it. There is no estimate here for a site.

Mr. FLOOD. Mr. Chairman, there was an estimate of $100,000. That was all that the department estimated, all that it desired to spend at Panama. It was not in contemplation that any portion of that $100,000 was to be spent for a site, because it was thought that the site would be given by the Republic of Panama. But the estimate of the cost of the acquisition of the site and the erection of a building thereon was $100,000, and that was made according to the Lowden Act.

Mr. MANN. There is no dispute about that. This is a very important matter, Mr. Chairman, as to the ruling that is to be made.

For many years there was a controversy pending here as to whether Congress should purchase embassy buildings abroad. A bill to authorize that was defeated once or twice in the House. Finally we passed the Lowden Act, drawn so that just this kind of a thing could not be done; requiring, first, that the State Department should make an estimate of the cost of a site and building which should not exceed $150,000.

Now, it is frequently stated that you can not buy an embassy building in Berlin, Paris, London, or Vienna for $150,000. Gentlemen have been trying to find some way by which they could evade the provisions of the Lowden Act. But the law requires that before you can make an appropriation you must have an estimate from the Department of State to the effect that you can acquire both the site and the building for $150,000 or less. Suppose this were in Berlin, and there was no estimate of the cost of the site at all, but just of a building, $150,000; but the gentleman puts in an item for the acquirement of a site and building, $150,000. You could acquire the site for $150,000, and stop there. Then you could come in next year with an estimate of the building, another $150,000. Under that system you clearly evade the provisions of the Lowden Act. There must be an estimate from the State Department that they can do this. We do not ordinarily have any rule of the House requiring an estimate. The law provides that certain estimates should be made. But here is a law which provides that an estimate shall be made before it is in order to make the appropriation in the House, and there is no estimate from the State Department here for anything except the building.

Mr. HARRISON. Mr. Chairman, this act that the gentleman talks about proposes to allow the Congress to appropriate $500,000 a year, not over that amount, to procure these embassies throughout the world, and the limitation was placed in it that at no place should the site and building cost over $150,000. The provision was written in it that the Secretary of the Treasury should transmit to Congress an estimate as to the cost of buildings for some purpose. What was that purpose? The purpose of compelling the Secretary of the Treasury, through the Secretary of State, to present to Congress that estimate was to limit the expenditure by Congress at any one place, namely, that they should not appropriate for any one place over $150,000. The Congress did not care whether or not the site costs anything. The Congress did not care whether or not the site costs $10,000 and the building $140,000. The question that Congress was interested in was that the embassy or the legation should not cost over $150,000 in any one place.

Now, here is an estimate of the Secretary of the Treasury which says that at Panama $100,000 shall be a limit of cost for the acquisition of the premises and the erection of a building. He says in his estimate of cost that the site is going to cost nothing, and that it is proposed to expend $100,000 on the erection of a building. It would have no more effect, since it comes within the limitation, namely, of expending no more than $150,000 for the acquisition of a site and building at Panama than if the site cost $10,000 and the erection of the building cost $140,000; and the fact that in the estimate submitted by the Secretary of the Treasury he says that the site shall cost nothing, but that it shall be given to the Government of the United States, cuts no figure.

The question that confronts the Chair in passing upon this is whether or not in the acquisition of the site and building the limit of cost shall exceed $150,000. The limit of cost here is not $150,000, but the limit of cost provided is $100,000, and the question whether or not the site is given to the Government has nothing to do with it. I submit, Mr. Chairman, that the point of order ought to be overruled.

The CHAIRMAN. The point of order is overruled. The Clerk will report the amendment.

The Clerk read as follows:

Page 22, after line 7, insert the following: "Acquisition of legation premises at Panama City, Panama: For the acquisition of a site and the erection at the city of Panama of a suitable building for the use of the legation at Panama, both as a residence of the minister and for the offices of the legation and for the necessary furnishing of the building, $100,000, or so much thereof as may be necessary."

Mr. FITZGERALD. Mr. Chairman, I was in error in stating what building was to be turned over under the provision in the sundry civil bill. The building to be turned over is the building now occupied by the legation, which pays to the Panama Canal Commission $3,000 a year rent.

When the Lowden Act was passed by Congress its purpose was to provide for the erection at foreign capitals of buildings that would impress the people of those countries with the importance and dignity and the power of the Government of the United States. If there be any place in the civilized world where it is not necessary to erect a building for that purpose it is Panama.

We have expended nearly $400,000,000 in the greatest engineering enterprise of all time. We have an administration building at Ancon that towers up above the city of Panama that cost in the neighborhood of $800,000 or $900,000. We pay to the Republic of Panama, in perpetuity under the treaty, $250,000 a year. We have already paid to the Republic of Panama

$10,000,000 for the rights that we have acquired from it. The one place in the entire world where it is not necessary to spend money to impress the people with the power, dignity, and wealth of the United States is Panama. A great many Members of Congress have been there——

Mr. FLOOD. Mr. Chairman, will the gentleman allow me to interrupt him?

Mr. FITZGERALD. Yes.

Mr. FLOOD. I was going to make the suggestion that I withdraw this amendment, so that the proposition for the erection of this building at Panama may be taken up by the State Department with the Senate committee and the Senate. I will say that the last time I talked to any representative of the State Department that department knew nothing about the transfer of this building to which the gentleman from New York refers.

Mr. FITZGERALD. I want the RECORD to show that the building I mentioned first is not the building which it is proposed to transfer. I was in error about that. That building was sold to the Republic of Panama for $80,000, as provided in the treaty. The building that is being turned over is the building which has been occupied by the legation for several years and for which it pays an annual rental of $3,000, and I think has paid in all about $20,000 to the Canal Commission. I simply wish to say this to the gentleman from Virginia: I am very familiar with Panama, and if the gentleman should spend two weeks there he would be as familiar with the location of the buildings there as he is with the location of the buildings in Washington. If he should see the conditions there and should then propose an appropriation for the purpose of providing a building, both as a residence and as offices for our legation at Panama, I believe he would not suggest anywhere near $100,000 for both the site and the building. I say that in perfect good faith, because the conditions down there are such that if we should spend $100,000 on a building and the furnishing of it for our minister, we would not be able to obtain many men who would have the means to keep up the palace that we should erect for that much money. I think perhaps the gentleman's suggestion that this matter be looked into a little more thoroughly is a wise one. I do not wish to antagonize the gentleman's committee.

Mr. FLOOD. We do not want to make an appropriation that is extravagant, and this matter can be taken up by the Department of State with the Senate committee, and if the Senate desires to make the appropriation it can be made. I ask unanimous consent to be allowed to withdraw my amendment.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent to withdraw his proposed amendment. Is there objection?

There was no objection.

The Clerk read as follows:

For salaries of consuls general, consuls, and vice consuls, as provided in the act approved February 5, 1915, entitled "An act for the improvement of the foreign service," $1,139,000. No portion of this sum shall be paid as compensation to vice consuls who are not American citizens: *Provided*, That if in any case the Secretary of State deems it impracticable immediately to secure a competent vice consul who is an American citizen, he may appoint or retain as vice consul and compensate from this fund a person not an American citizen until such time as he is able to designate a competent American citizen for such post.

Mr. ROGERS. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. ROGERS: Page 23, line 14, strike out the figures "$1,139,000" and insert in lieu thereof the following: "And for salaries of vice consuls, under such regulations as the President may prescribe, $1,164,000."

Mr. HARRISON. I reserve a point of order on that.

Mr. ROGERS. Mr. Chairman, I think that is not subject to a point of order. The Revised Statutes, edition of 1878, section 1695, prescribe—

The President is authorized to define the extent of country to be embraced within any consulate or commercial agency, and to provide for the appointment of vice consuls, vice commercial agents, deputy consuls, and consular agents therein in such manner and under such regulations as he shall deem proper.

The act of 1906, which made separate provisions for consuls general and consuls, prescribed by section 3—I am reading it only in part—

That the offices of vice consuls shall be filled by appointment, as heretofore. * * * Consular agents may be appointed, when necessary, as heretofore.

In other words, the effect of the provision in the Revised Statutes, coupled with the virtual continuance of that provision in the act of 1906, leaves it still open to the President to prescribe for the appointment of vice consuls and consular agents as he may deem necessary.

Now, as to the effect of this amendment. The act of 1915 prescribes, in the third paragraph of section 6:

Vice consuls shall be deemed to denote consular officers subordinate to such principals, exercising and performing the duties within the limits of their consulates at the same or at different points and places from those at which the principals are located.

I may say, in passing, that that was the first recognition by law of the principle that vice consuls need not necessarily be substitute consuls exercising their functions only at the place where the principal consul general or consul was holding office.

That same act, of 1915, provided by section 3 that a vice consul should be paid during the absence of his consul compensation equal to the difference between one-half the salary of the consul for whom he is substituting and the salary of the vice consul himself as clerk or other officer of the Government; this provision for the first time permitted vice consuls to receive a salary out of the Treasury of the United States. Prior to that time a vice consul had received a salary as such only by personal arrangement with his consul, and out of the consul's own pocket, when the consul himself was away. The language of the present bill provides for salaries of consuls general, consuls, and vice consuls, "as provided in the act approved February 5, 1915," a certain sum of money. In the opinion of the State Department this provision for compensation of vice consuls would be construed to refer only to the provision of section 3 of the act of 1915, which provides for partial compensation for vice consuls during the absence of their principals. I have therefore suggested, as an amendment, the addition of the words "and salaries of vice consuls under such regulations as the President may prescribe," just before the figures in line 14, and I have increased the sum carried in the bill by $25,000.

Mr. CLINE. Will the gentleman yield?

Mr. ROGERS. I yield.

Mr. CLINE. My understanding is that the party who acts as vice consul already receives a clerk's salary for his services except in the absence of the consul, and then he receives an additional sum equal to 50 per cent of the difference between his salary and that of the consul. Does the gentleman propose to put him on a new basis?

Mr. ROGERS. I am attempting at this time only to deal with the point of order and to show that my amendment is not subject to a point of order. If I can get past that point I will be glad to discuss the merits of the question.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. ROGERS. Mr. Chairman, I am discussing the point of order.

The CHAIRMAN. The Chair will be glad to hear the gentleman on the point of order.

Mr. ROGERS. I supposed that I had been discussing the point of order. As briefly as I can state it my position is this: The act of 1915 permits the appointment of vice consuls as independent officers and does not restrict the appointment of vice consuls to men who are acting as subordinate officers at a given post. Thus we have contemplated by the act of 1915 the creation of a somewhat modified type of vice consul. The Revised Statutes and the act of 1906 both prescribe that the President of the United States shall have the power to make regulations for the appointment of vice consuls and consular agents. For these two reasons taken together I submit that the point of order should be overruled.

The CHAIRMAN. The point of order is overruled, and the question is on the amendment offered by the gentleman from Massachusetts.

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. ROGERS. Mr. Chairman, I demand a division, and I would like to ask the gentleman from Virginia if he has any objection to the amendment; it was drawn by the State Department.

Mr. HARRISON. Mr. Chairman, has not the vote been declared?

The CHAIRMAN. The amendment would be voted down if the gentleman does not claim a division.

Mr. ROGERS. I ask unanimous consent for one minute to state the reasons for this amendment.

The CHAIRMAN. The gentleman from Massachusetts asks for one minute. Is there objection?

There was no objection.

Mr. ROGERS. The State Department wishes to try the experiment of Americanizing the consular agents little by little by sending out professional vice consuls. They will get very little salary, but that result will accomplish not only the Americanization of the vice consular service but also the elimination of the vicious fee system, of which this is the last remnant. Also the practice of having consular agents who are

engaged in private business will be abolished. The State Department would like to have a small sum of money, $25,000, to make a beginning and to show Congress a year hence that this process should be continued and extended. I had an impression that this amendment was satisfactory to the chairman of the committee.

Mr. FLOOD. I told the gentleman yesterday that I had no objection to it but I thought it would be better to postpone it to another year until we could have hearings upon it.

Mr. ROGERS. The State Department has gone into it carefully, and the Director of the Consular Service has approved it. I have a letter on my desk from him on the subject. I think there can be no objection raised to it.

Mr. HARRISON. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. HARRISON. Has the vote upon this amendment been announced?

The CHAIRMAN. The question was put on the motion of the gentleman from Massachusetts, and the amendment was lost, and then he asked for a division and the House was about to divide when he asked for a minute, by unanimous consent, to state the reasons for the amendment, which the House gave to him.

Mr. HARRISON. Mr. Chairman, I want to be heard in opposition to the amendment, if it is to be up again.

The CHAIRMAN. The gentleman can be heard by unanimous consent.

Mr. HARRISON. I ask unanimous consent that I may have two minutes.

The CHAIRMAN. The Chair thinks that this is very irregular, but as the House can do anything by unanimous consent, the Chair will put the question. Is there objection to the request of the gentleman from Mississippi? [After a pause.] The Chair hears none.

Mr. HARRISON. Mr. Chairman, I am opposed to the amendment which carries an increase of $25,000, for the reason that in this item the committee gave to the State Department every cent that it asked for, and at the urgent recommendation or solicitation of the gentleman from Massachusetts they increased the item, I think, $25,000. He got into this a provision for Americanizing the vice consuls without disorganizing the whole service, and this item carries an increase of appropriation of $51,000 over what it was last year, $25,000 to take care of Americanizing the vice consuls. This increase has not been asked for by the State Department, and it certainly ought to be first considered by it. It looks like an unwise piece of legislation to adopt the amendment at this time.

The CHAIRMAN. The question is on the amendment of the gentleman from Massachusetts.

The House divided; and there were—ayes 5, noes 8.

So the amendment was lost.

Mr. ROGERS. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

On page 23, line 22, after the word "post," insert the following as a new sentence: "Every consul general, consul, and, wherever practicable, every consular agent shall be an American citizen."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

For salaries of five consular inspectors, at $5,000 each, $25,000.

Mr. DIES. Mr. Chairman, I move to strike out the last word. On the 28th of January, 1916, I made a speech in the House on the subject of preparedness, and following the custom of Members of Congress, I asked leave to revise and extend my remarks. In order to get that speech into a 16-page pamphlet to send to my district, I condensed it into 16 pages. After the delivery of the speech the gentleman from Illinois [Mr. MANN] secured time and made a speech in which he said that I had referred to the speech of the President of the United States as idiotic. Those opposed to my reelection in my district seized upon that as the most serious thing that could be said about me as a Member of Congress and largely pitched their campaign that I had referred to the speech of the President as idiotic. On yesterday I called attention to the fact that that was untrue—that I had made no such reference to the speech of the President—and the gentleman from Illinois [Mr. MANN] took the floor and used this language:

"What the gentleman says about his reference to my speech is equally incorrect. The speech which he made on the floor in which he referred to the President of the United States as having uttered idiotic ideas has nothing whatever to do with the speech he made on the floor concerning my garden meditation repentance. It is very natural that he mixes the speeches up, but unless he has changed the copy that was furnished to him—which many Members do—the RECORD will still show that he referred to the utterances of the President of the United States as idiotic."

Taking up that statement by the gentleman from Illinois, the papers very generally carried it; and, as I say, it was made the chief campaign slogan against me in my district. I need not say to the House, to those who heard me, that I made no such statement. I am not a worshiper of the President of the United States. When I think he is right, I go with him. When I think he is wrong, I go against him. When I entertain doubt as to the correctness of his position, I resolve the doubt in favor of the President.

Mr. Chairman, it is a question of veracity. I do not doubt the gentleman from Illinois [Mr. MANN] thinks he is speaking the truth, but as a matter of fact he is doing me a great injustice in my district. If I had said that the President had made an idiotic speech, I would stick to it; but I did not say that, and I do not think the gentleman from Illinois ought to want to put me in a position of having made such a statement, when, in fact, I did not make it. I therefore ask unanimous consent to insert in the RECORD the stenographer's report of my speech, which I later revised into a pamphlet of 16 pages in order to avoid the great expense of its publication, and I now desire to insert it in the RECORD as proof positive of the fact that the gentleman from Illinois [Mr. MANN] is honestly, but, nevertheless, mistaken as to my speech, and that the campaign against me on that score, at least, is unfounded.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to insert in the RECORD the official report of a speech that he made at a previous date. Is there objection?

There was no objection.

The speech referred to is as follows:

"Mr. DIES. Mr. Chairman, I do not expect the committee to extend to me any privilege that any other Member of the House should not ask for. Yet, I want to ask you to permit me to make a plain and candid speech; allow me to call a spade a spade, and always, if something in the heat of my remarks—which will be extemporaneous—should displease you, I ask you charitably to conclude that it is intended for the other fellow and not for any person who feels that it might be directed toward him.

"I realize, of course, that there is such a thing as being too candid, brutally candid; but it does seem to me that in this moving-picture crisis of our country, this hysterical fit into which the public seem to have fallen, it is time that the matter receive candid treatment at the hands of representatives of the people.

"What I said yesterday with rgard to a reversal of opinion on the part of my distinguished friend from Illinois [Mr. MANN] occurring in his garden was not intended, I assure you, as a stricture upon him. The thing is fashionable. The malady is catching. The epidemic is universal. The paper I quoted from yesterday, the Philadelphia Inquirer, referred to the gentleman from Illinois [Mr. MANN] as the real leader of the House. It said:

"'The vigorous and clearly defined speech of Congressman MANN in favor of strengthening the Army and Navy, and his eloquent plea to make this a national and not a partisan or political question, lifts him into immediate prominence as the real leader of this most important movement.'

"And even the Philadelphia Inquirer last night flops on the question of flopping, and this morning it says, under the caption of 'The President's changing mind':

"'Entirely aside from the merits of the proposition, the President's announcement that he has changed his mind on the subject of a tariff commission presents an interesting study in psychology. It was the first Napoleon who said that the worst fault in the conduct of affairs was vacillation.'

"So this newspaper overnight flops on the question of flopping. [Applause on the Democratic side.] I am not so much concerned with what the President said a year ago, or what the leader of the Republican Party said a year ago, as I am with regard to the truth of what they said a year ago. I concede any man's right to change his opinion. I admire the courage of gentlemen who announce to the public a change of opinion, but I beg leave, before I follow repentant gentlemen to the mourners' bench, to inquire the revelation to them for a change of faith. And that is what I propose to do to-day.

"I have a garden as well as my friend from Illinois. I doubt not it is as luxuriant in vegetables as his. I worked in it last summer, but I did not conclude, as he did, that the whole tradition of this Republic should be changed with regard to military preparedness.

"I have been reading the President's speech this morning, and he says, by way of apology for Members of Congress, that we have not had time to look into this question. I am glad that the President is not so busy a man but that he has had time to look carefully into it. I have had more than the usual amount of time to look into it, and I shall give you candidly some of the conclusions I have arrived at after having looked into it.

"I believe just as the President believed a year ago. I think I am not as radical now as the gentleman from Illinois was a year ago, although I doubt now if I would be willing to join him again in striking those 14 submarines from the naval bill and the 2 battle cruisers and both dreadnaughts. I am inclined to think that I, too, have changed to that extent with regard to preparedness.

"Now, I want to see what part of the President's speech a year ago is untrue now.

"'We are at peace with all the world.'

"That is true now.

"'No one who seeks council based on facts and candid interpretation of realities can say that there is reason to fear that from any quarter our independence or the integrity of our territory is threatened.'

"He reiterated that yesterday in New York by saying that all the twaddle about invasion of the United States was not to be believed. He says:

"'We never have had, and while we retain our present principles and ideals we never shall have, a large standing army.'

"The President may have changed his principles and ideals and the gentleman from Illinois may have changed his ideals, but my ideals and the ideals of my country are just what they have been from the days of 1776 down to this time, and that is that a military atmosphere is one in which a free government can not exist. [Applause.]

"The President says:

"'The country has been misinformed.'

"Well, that is true; that was true a year ago, and more violently true to-day; and if you do not think so, go up and sit for an hour in the moving picture theaters and behold the invasion of this country, the destruction of its cities, the ravage of the land, the rape of the women of the country, the sinking of all the American Navy without the loss of the life of a single one of the invaders. Then the President told the truth. A year ago the country was misinformed, and more violently misinformed to-day. He said:

"'We have not been negligent of national defense.'

"That was true then, and it is truer to-day than it was then, because in the last naval appropriation bill we gave the President $8,000,000 more than he asked for. He further says:

"'But I turn away from the subject. It is not new. There is no new need to discuss it. We shall not alter our attitude toward it because some amongst us are nervous and excited.'

"I appreciate that, for there is great excitement and more nervousness, and we who are following the old flag would be recreant to our trust if we got nervous and excited and changed our ways in thinking about it.

"Ordinarily it would be a difficult task to bring public opinion into such a state that it would be willing to reverse the entire traditions of the country in just an hour. Have we forgotten all of the history of this country? Have we forgotten that it began without a standing army; that we secured our liberties without it; that we have maintained our liberties against all comers in the years of our infancy and growth? Do the representatives of the people to-day, and the people themselves, forget that in all the time and tide of nations no nation anywhere in the world, at any period of the world's history, was ever able to survive as a free government in the presence of a large standing army and great preparations for war?

"In the midst of war, the old Roman said, laws were silent. The man on horseback never tolerated that freedom and liberty which the people of this country demand, and it is old, but it is true, that it was the same Cæsar who conquered the barbarians when he returned to Rome and destroyed the liberties of the people. It was the same Napoleon who rose in obedience to the popular cry as the First Consul, who, when secure on horseback, turned on the people and hoisted himself into power and crowned himself as Emperor of the French with his own hands.

"What is the state of our preparedness to-day? We are better prepared to-day than we have been in the history of the Republic. Prepared for what? For the only thing—for the one thing which the Republic should be prepared for, and that is to maintain our liberty and the integrity of our institutions. I ask, gentlemen, what are we to prepare for? If we follow the vagaries of our generals and admirals on the active and retired list, we make preparations for conquest of the world. And in speaking of admirals and generals, permit me to say that every old liar on the retired list is in active service now. [Laughter and applause.]

"And we have more of them on the retired list, on the retired pay-roll list, than we have in the active service. We have to-day 145 rear admirals drawing princely salaries, more rear admirals on the pension roll living in this country than there are in all of the navies combined in all the world. If there is anyone here who wants to prepare this United States to depart from the traditions of the fathers, who want to prepare it for world conquest, who wants to assemble the young men of this country in armies, to police Santo Domingo, Haiti, who wants to keep a larger army in the Philippine Islands, to be captured by first assault—I say if there is any man who entertains the belief that it is for the interest of this Republic that we turn our people into conquerors of great military power, my only criticism of the program is that it is not large enough. Instead of having a navy equal to Great Britain, we ought to have a navy equal to all the world. Instead of a million soldiers they tell us about, we ought to emulate the Germans and make every citizen a soldier. Instead of the industrial, peaceable, and prosperous Republic of our fathers, we should convert it into an armed camp and go forth to conquer. But I do maintain that if your purpose is merely to defend the shores of America, to vouchsafe to this people the boon they received from their fathers and from a kind Providence, to work out their own destiny on this hemisphere, and maintain free government, we are better prepared to-day than we have ever been.

"Oh, what a year can do! Just a year ago we were informed by the Chief of Staff of the Army on page 700 of the hearings before the Military Committee on the Army appropriation bill that we were in less danger then of attack than we were six years ago. Mark you, these Army people who want a great army and these Navy people who want a great navy do not confine themselves to the statement that we are now unprepared. They admit that we are better prepared than we have ever been. What they want is what men of their kind have wanted since the dawn of time, namely, more power, more commissions, more princely battleships to live upon, more appropriations for the Army and for the Navy.

"The gentleman from Virginia [Mr. HAY], chairman of the Committee on Military Affairs, just a year ago said that to-day the United States is safer from attack than she has ever been in our history. He said that on page 2066 of the CONGRESSIONAL RECORD. Less than a year ago the Secretary of the Navy made this argument—and I suppose the argument, like the argument of my friend from Illinois [Mr. MANN], has gone into meditations of the garden, though the argument itself remains:

"'I think when the war is over in Europe there is going to be such exhaustion and such reaction that the people are going to demand the cessation of this ever-increasing burdensome expense of war.' (Page 63 of the hearings.)

"Our leaders a year ago were unanimous. Right by the side of my friend from Illinois [Mr. MANN], the brilliant leader of the Republican Party, stood the brilliant UNDERWOOD, of Alabama, leading the Democratic forces against the Navy bill, against more submarines, against more scout ships, against more battle cruisers, against more dreadnaughts, against more appropriations for the Navy. Do you know, I have come to the conclusion that the average Member of Congress is a sort of weather vane, local weather vane. That is, he is a weather cock for his particular locality; but when you want to know how the political wind is blowing generally, as to its general velocity, then consult our leaders. They will answer the purpose for the whole community of Congress, as each Member answers for his district. Usually great bodies move slowly, but that law of physics evidently has no application to modern politics, for the bigger the leader a man is the quicker he can flop. [Laughter.]

"Among the other floppers is the Navy General Board. Just a year ago the Navy General Board said that we ought to have a Navy equal to everybody except Great Britain. Now they have flopped, and they say that we ought to have a Navy as great as Great Britain. But I am not going to waste a great deal of time on the Navy General Board; they are in a receptive mood at all times for appropriations. They fit the description I once gave on the floor of the House of my friend Hobson. They think an ideal republic is an aggregation of battleships with just enough land around them for coaling stations. [Laughter.] And in speaking of my friend Hobson, who is not here to-day, I wish you to indulge me the time to pay him this compliment. He ought to be on some party ticket for President. He is the first man who said what my friend the gentleman from Illinois [Mr. MANN] said the other day, that we ought to have a Navy as great as Britain and Japan combined. Of course the real leader of the movement is crowded off the band

wagon before the movement gets sufficiently accelerated to get anywhere. [Laughter.]

"My friend GARDNER, from Massachusetts, ought to be the Republican candidate and Hobson ought to be the Democratic or the Prohibition candidate. These men who started to tell us that the country was in danger of invasion have been lost. Who hears of Hobson as a leader? And all GARDNER does is to stand up and pick pebbles out of his eyes because the wagon has passed him so speedily. [Laughter.]

"I invite your attention to the fact that a year ago we had a hearing before the various committees. The war was then in progress in Europe. We knew all about the blighting effect of war in Europe a year ago. They say our coasts are undefended. The highest authority in this country, the Battle Cry of Peace on that side of the question, informs us that the coast defenses at New York can be destroyed, outranged, and the city laid waste without the loss of a single life of the invader. Would you allow me to read you the testimony of Gen. Weaver, Chief of Coast Artillery, before the committee last year? I understand upon what seems to be very good authority that Gen. Weaver has no garden, and he has not meditated a change of mind. A year ago Gen. Weaver said:

"'I have been a close student of the whole subject, naturally, for a number of years, and I know of no fortifications in the world, so far as my reading and observation and knowledge goes, that compare favorably in efficiency with ours.'

"But what is Gen. Weaver's testimony compared with the testimony of 'The Battle Cry of Peace'? [Laughter.] I have culled out some of the criticisms of the American Navy, and I wish to answer the most pointed ones. They say that we have no auxiliary vessels, and therefore we have an unbalanced Navy. Admiral Blue, Chief of Navigation, testified a year ago, page 40 of the hearing, and said:

"'I believe I am correct in stating that we have now more auxiliary vessels in our Navy than any other nation maintains in time of peace.'

"Mr. DAVIS of Texas. Amen!

"Mr. DIES. They have got to eliminate this Navy before they can get to the United States, but these moving-picture experts. these garden meditators and hysterical gentlemen throughout the land, are felt called upon to do a thing that I never believed would lie in the mouth of an American citizen to do or say, to libel the American Navy. They have not stopped at that. They have told you how cowardly your forefathers were at Concord Bridge, the farmers of Massachusetts, the sires of one of the present Representatives from that State. To hear his speech you would never conclude that they were his sires. I learned that from other sources. [Applause on the Democratic side.] They have belittled the War of 1812; they have belittled your sires who have come out victorious in every war of the country. Why do not they talk of the Battle of New Orleans, where Andrew Jackson, a militia general, with a handful of militia soldiers, drove back the pick of Wellington's army, fresh regular soldiers from the Peninsula War, commanded by Wellington's brother? They say that we were not organized, and we had a little loss at Blandensburg. We had called out 400,000 of the yoemanry of this country, and the Battle of New Orleans, fought after the war was actually over, was just the beginning of the strength of this young giant of America, and would have been repeated on the various battle fields if that war had continued. If I had four hours, I would like to engage in joint debate with some man who tells me the regular soldiers ever won a battle in this world [applause], from the time your recruits drove back the regular soldiers, from the time Athens and Sparta drove back the Persians in days of old, when the Republic of Rome drove back the 13-year prepared army of Hannibal on down to the first Battle of Manassas.

"I made a statement in a speech at New York the other day that the regular soldiers ran faster than the others at Manassas, because they were better prepared. [Laughter and applause on the Democratic side.] They all ran, but naturally the man who had been in training would be expected to run faster. [Laughter.] My father, who followed Forrest for four years, said the Confederacy never got into real trouble until they met the boys from Illinois and Ohio and other Western States, who had been used to shooting squirrels in the head because they did not want to spoil the meat. [Laughter.] Regular soldiers are generally made up of people who have had a falling out with their sweethearts, or have been cut off from their pin money by their fathers and have gone to the Army in a spirit of spite, and they generally make a Congressman's life miserable by wanting to get out after the first four or five months. [Applause.] I want to argue as a lawyer would argue to a jury the question of the strength of the American Navy. I am not willing to let the 'Battle Cry of Peace' decide its worthlessness. I want to call as my witness the man who commanded it, Admiral Fletcher. You know they say we have not any submarines, that our submarines will not submerge [laughter], and when submerged, they will not come up any more. [Laughter.] Now, the trouble is that the defects in our submarines are advertised to the world. The troubles that the Germans are having with what submarines they have left are not advertised to the world. I believe we have 77 built and building. Germany had 31 when the war broke out. I think she has 10 or 12 left. Judging by the information we have from our naval intelligence bureau, taking the number that have been destroyed of German submarines during the war and captured, my conclusion is that Germany has no more than 10 or 12 submarines afloat to-day. And, yet, they say German submarines will come over here and destroy us because we have no submarines. Let us see about it. We want the facts even though we do not vote like we think the facts are. We want the facts as a matter of historical refreshment. [Laughter.] Admiral Fletcher, page 522, made this statement a year ago:

"'I should think it would be reasonable precaution to provide a few more submarines, considering our extensive coast line in the Atlantic and in the Pacific, yet I will say that as compared to other nations we are well provided with submarines to-day.'

"Further he says:

"'I think a reasonable increase of submarines, 8 or 10, or something in that vicinity, would be a proper increase.'

"Mr. Daniels, I believe, recommended 8 submarines, and he said he spoke for the President. My friend MANN and myself were not willing to give them the 8 they asked for, but the balance of the House, when they asked for 8, gave them 17 in the last appropriation bill in spite of all that my friend from Illinois and myself could do about it. [Laughter.] But you know, if you take the testimony of Admiral Badger, the scare is nothing, after all, because he said, at page 504 of the hearings, in response to a question by Judge Witherspoon—

"'A German submarine could not operate on our coasts for want of a base of supplies.'

"Now, if you believe the testimony of a member of the Navy General Board, who was commander of the Atlantic Fleet in advance of Admiral Fletcher, all of this newsy movie-picture alarm is without foundation, because without bases of supplies Germany could not operate her submarines against this coast. You know you never can pin one of these preparedness fellows down. If he comes from a district largely inhabited by Germans, he wants a Navy larger than England. If he comes from a district pro-ally, he wants a Navy which is just as big as that of Germany. If on the Pacific coast, it is the Japanese Navy he seeks to emulate, and so forth, and so forth.

"How strong is our Navy? Turn to page 553 of these hearings and you will find this question by Judge Witherspoon. God bless his memory! He was one of the ablest and bravest fighters who ever graced a place in this Chamber. [Applause.] He asked of Admiral Fletcher:

"'Then, understanding your testimony after reviewing it, do you want us to understand that England is the only nation on earth that has a navy that we could not successfully resist?

"Admiral Fletcher replied: 'I think that is the fair conclusion; yes, sir, at the present time.'

"Was our Navy progressing last year? Secretary Daniels stated, on page 597, that—

"'The naval program has been upgrade all the time. The Navy has been getting better every year. The present Congress gave three dreadnaughts, and we have 7,000 more trained men than at the first session of the Sixty-third Congress.'

"Another criticism I have seen is that our boats are not ready to fight. Some are not in commission, some have been wabbling on their sides, and some have no men. Some have so few men, if we believe the moving-picture campaign, that we can not defend the shores of our country.

"See what Admiral Fletcher says:

"'I would say, in emergency, some vessels are ready to-day, some would be ready to-morrow, but I would say all of them could be ready within a week.'

"Did he know what he was talking about? Will we listen to the experts of the Navy with regard to the efficiency of the fleet, or will we listen to politicians who have been going to the movies? [Laughter.]

"Now, there are some things I would not permit an admiral or general to tell me. I never want to go to an admiral or a general to have him inform the country what to fight about. Fighting is their business. They get more promotions in war. Oh, there is no treason about this. I am only repeating the words of other men. Do not abuse me about it. Abuse De Toqueville's work, his Democracy in America.

"Army officers and Navy officers are quick to quarrel. They are ready to involve the country in war. They believe that war is the natural state of society; and while I would not allow them to tell the country what to fight about, I would go to them in a minute if we got into war in order to have them tell us how to fight. There is the biggest difference in the world. You want, my colleagues, to tell the people what the tradition and policy of this country is and should be. It is you and I that ought to be able to say to the country when to fight, and then, after we get into it, let the admirals and generals tell us how to fight. There is all the difference in the world. The great trouble is to-day that we are allowing the admirals and generals to shape the foreign policy of this country. The American people are overwhelmingly opposed to our undertaking to hold the Philippine Islands as a political liability which is likely to involve us in war. [Applause on the Democratic side.] And while the words 'Philippine Islands' are on my lips, do you know that a good chunk of our small standing army is over there to-day—something like 19,000 of them, I believe, including the Philippine Scouts. Possibly there are a few more. Let those who cry the need for more soldiers to defend the shores of America use our transports to bring home the soldiers we are quartering upon the Philippine people to-day. I believe we have a couple of thousand men over in China. Let those who are driving the mothers of this country into hysterics lest their homes be invaded by a foreign foe join me in bringing the 2,000 American soldiers home from China.

"The Secretary of War says that if we give him what he asks for—141,000 in the Regular Army—he proposes to send 42,000 of them to the Philippine Islands. If this Republic is to be driven from its traditions of a small standing army, if we are to turn our faces back on all of the teachings of the political history of nations, let it be for the defense of our shores and our homes and not for the subjugation of a people that will to be free. [Applause on the Democratic side.]

"Our experts tell us that about the first thing we will do when we get into a war will be to turn loose the Philippine Islands temporarily. We could not hold them. Talk about scaring the people! I heard my friend Hudson Maxim make a speech in New York the other night. He said two very important things, and I want you to get them. He said, 'There are manufacturers in this country to-day who are making a million dollars a day out of the war in Europe by selling munitions.' That is one thing. Put a pin down there. And he turned from that statement to the large audience and said, 'You women of Brooklyn, if this country does not go forward and prepare, you will see a foreign invader in Brooklyn within two years. You will see foreign troops quartered in your homes; a strange man to be the master of the bedchamber.'

"I do not wish to leave the impression that every man who advocates what they call preparedness is actuated by bad motives, but I wish the American people to take into consideration that many large concerns in this country to-day are reaping a veritable harvest of gold by making war munitions for Europe; and they know, when the war in Europe is over, unless they can drive the American people mad and drive them into emulation of blood-soaked Europe, down go their profits. Schwab's concern, stock worth $8 before the European war; worth $700 to-day. They are selling these war stocks all over the country. Something has gotten into the usually fair American press that has dried up their power to speak the truth with regard to our defenses. I do not know of a great newspaper in America to-day that has not, with few exceptions, joined this propaganda of libel upon the American Navy. Get one of them to publish Admiral Fletcher's statement that ours is the strongest Navy in the world except England's! You would never find it there. You will never find anything in the newspapers of this country except the hackneyed statement that we are utterly defenseless; that our Navy and coast defenses are worthless.

"Just the other day the Washington Times, bad authority, but as good as you can get in these days, had a whole page of 'Admiral Fletcher says our Navy is worthless. Admiral Fletcher says that the Navy is totally unprepared.'

"What are the facts? I have read you what Admiral Fletcher said a year ago. Do you want to know what he says now? In his report, which they are using before the American people to libel the Navy of the United States, he starts off in this way:

"'I have the honor to submit herewith a report covering the period of September 17, 1914, to June 30, 1915. In order to limit the report to moderate length it has been found necessary to omit discussion of the many satisfactory features of the fleet and to invite attention more particularly to its operations, condition, and requirements.'

"He very candidly starts out his statement by saying he omits the good part of the Navy and merely calls attention to what he conceives to be some of its needs. If they had been fair enough to tell the truth about the American Navy, they would have quoted Admiral Fletcher's statement to the effect that it is 15 per cent stronger to-day than it was a year ago, when he said it was the second Navy in the world; that in the matter of accuracy of gunnery it had improved 30 per cent in the year.

"You found none of these things in the statement, but the usual one that the American Navy was hopelessly deficient. Just the 6th of this month—not last year, when he said it was the best, but just the 6th of this month—the Secretary of the Navy says:

"'When the fleet sailed for Guantanamo on the 6th of this month the complement of every vessel, including destroyers, was filled, and the department is reliably informed that the enlisted complement of our ships is as liberal as that of similar ships in the great navies of the world.'

"We had from the press the other day a volume, paid for out of the public funds, entitled 'The Navy Yearbook.' I see the newspapers are still using the Naval Yearbook as a basis for the comparison of our Navy with that of Germany and the other powers. This Naval Yearbook, published 8 or 10 days ago, carries nine German armored cruisers. Six of them had been at the bottom of the ocean for a year. [Laughter.]

"I shall not go into a discussion of the deliberate and systematic depreciation of our Navy. It is the old trick of those who want larger appropriations. Bernhardi said in his book that the American Navy was second to that of Great Britain and that there was no objection in Germany that it should keep the lead. He may have made the statement in order to get larger appropriations for the German Navy. If my deceased friend, Judge Witherspoon, proved anything in his whole life, he proved in the last session of the Sixty-third Congress that the American Navy was second only in strength to that of Great Britain. Of course, like my friend from Illinois [Mr. MANN], in an interruption of Judge Witherspoon's speech a year ago, he invited Judge Witherspoon's attention to the fact that some 44 German vessels had been destroyed as another reason why we ought not to have a larger naval bill. I can say for the benefit of my friend that now we have the record of something over 100 German vessels that have been destroyed.

"Mr. Chairman, we are all for preparedness. One of us is as much for preparedness as another. I will tell you what the trouble is. I know what is the matter. The State of New York and a few other coast States and pivotal States have become excited over this question. They have been brought to that by having their minds focused upon the great conflagration in Europe.

"The first thing you think of when you see a house on fire is as to whether your own insurance policy is secure. Moreover they have been brought to it by the makers of money out of the traffic in war munitions, and then they have been brought to it by the Army and the Navy men who seek to build up their establishments now, 2 years ago, 8 years ago, and 20 years ago. You know I never have been in favor of the proposed embargo on munitions, but I do not know; I was out in my garden this morning meditating a little bit. [Laughter.] If we are in such a horrible state of unpreparedness as they tell us, I do not know whether we ought to be shipping rifles and cannon and airships and submarine parts, all the implements of war and death, over to Europe. Why, might they not shoot us with our own guns? We are sending millions over there. Mr. Maxim says some of the corporations are making a million a day out of the traffic. Well, if I thought one of my neighbors was about to shoot me I would not be poking bullets into his gun, I would not be getting him a new gun to shoot me with. [Laughter.] So, pretty soon, when you convince the American people that we are about to be invaded, somebody will get up a statement showing how many guns we are supplying to foreign people, how much ammunition we are putting into their guns, how much power to destroy we are handing to them.

"I know one thing that this ammunition gold mine has done. Looking about for definitions, I took up an old edition of Webster. I do not know whether Webster has been out in his garden since he wrote this definition or not [laughter], but I looked for the word 'preparer,' and this is one of the definitions of 'preparer';

"'That which fits or makes suitable, as certain manures are preparers of land for a particular crop.'

"Mr. DAVIS of Texas. Amen! [Laughter.]

"Mr. JOHNSON of Washington. Mr. Chairman, a parliamentary inquiry.

"The CHAIRMAN. The gentleman will state it.

"Mr. JOHNSON of Washington. If a Member desires to interrupt, by exclamations or otherwise, does he not have to rise in his seat and address the Chair?

"Mr. DIES. Oh, Mr. Chairman, I protest; with as many prominent men as there are to-day at the mourners' bench, anybody ought to be allowed to say, 'Amen!' [Laughter.]

"The CHAIRMAN. The Chair will not have to rule on that. The gentleman can think, but not speak so loud—that is the object of the rule—unless he desires to rise and address the Chair. [Laughter.]

"Mr. DIES. As certain manures are preparers of land for a particular crop, has it ever occurred to you that these billions that are being accumulated by the makers of the implements of death, to be gently pressed into the hands of dying men in Europe to kill themselves with first, and to kill ourselves with afterwards—has it ever occurred to you that we are manuring our own field for war? I have not tarried long in my garden [laughter], and I have not yet come quite to the conclusion that we ought to put an embargo on our exportation of ammunition and munitions of war. But I do believe that if this propaganda keeps on, and you frighten the American people within an inch of their lives, if you continue to tell them that this great country of a hundred million people is helpless, and that they may expect a foreign foe to devastate this land at any time, you will surely work them up to a point where they will ask you to stop supplying our possible enemies with the means to destroy us.

"Mr. QUIN. Does not the gentleman think that these millionaires ought to be taxed on their incomes to pay for this extra expense of this so-called 'preparedness'?

"Mr. DIES. Oh, I am glad my friend from Mississippi brought my mind around to that phase of the question. I was about to forget something. I believe we are prepared, as our fathers were prepared. I agree with the President in his speech of yesterday in New York, in which he said he did not take any stock in the notion that this country could be invaded. Of course, it could not be invaded. They could not invade it when our people were weak and struggling in the first days of our national life. They have never been able successfully to invade it. Oh, of course, some nation might land a marauding party on our shores, certainly. There is no doubt but what anybody might come along and slap my jaws, but—a nation which would land an army in the United States would do so with the full knowledge that they would never get it back home. Of course not.

"Now, we are not what the preparedness people say we are. We are not a commercial Nation in the sense that we would suffer a foreign foe to land upon this soil. Why, this is a militant Nation, this is a young Nation, a young giant, feeling its first great strength as a Nation. That is not our danger. I want you to call me back to that in a moment.

"Another thing: In these garden meditations not only have positions on public questions gone with the sweet peas and poppies of the garden, or the last rose of summer, but logic as well has been destroyed. Whoever would have thought that men would have taken the position that we could find an enemy in one of the warring nations of Europe? Germany, with almost 3,000,000 men killed, wounded, and missing; poor France, bleeding their last drops, with a loss of two and one-half million men; England with almost a million men killed in the war!

"And yet we are told that when this war is over and these soldiers go back to their wives and mothers those wives and mothers will send them to a fresh war with us. This is not rhetoric. This is logic. Fritz goes back home to his mother in Germany after the war is over, a mother who has lost one son, who lies buried in an unnumbered grave in France. A French soldier goes back home and consoles his sister, whose other brother was killed in battle. France and Europe, all of the nations of Europe with crêpe on every door knob, with death in the house of the prince and the peasant alike, with the horrid ravages of war before the visions of all the people, with one-legged men sitting in every park, with every hospital filled with diseased men, with billions of dollars of debt which must be paid by taxes; men with rheumatism from the damp ditches of the long lines in Russia and France. These battered soldiers of Europe, with the best blood of the nation spilt in war, with property destroyed and homes torn with bereavement, limp back to their wives and mothers and sisters, and these fellows would have us believe that those wives and mothers and sisters would kiss them good-by and send them forth to an invasion of America! [Applause on the Democratic side.] It staggers the reason of any sensible man. Why, do you know that in the South when that little war was over—I say 'little war,' because it was little compared to this one—I remember following an ox wagon from Louisiana to Texas with my parents. It was the most desolate country I ever saw. Every soldier was telling tales of how his comrade was killed in some place far away. Mothers were mourning for their sons, fathers were grieved at the terrible loss of war, and I lay this down to you, that you could not get to-day one Confederate soldier in ten to tell you other than that he has a perfect horror of war. If that was true in the southern mind after the war, what will be true in the mind of Europe when the war is over?

"Mr. SHERWOOD. It was true in the North, too.

"Mr. DIES. How much time have I remaining?

"The CHAIRMAN. The gentleman has one minute.

"Mr. POU. I ask unanimous consent that the gentleman may have an extension of time of 10 minutes.

"Mr. MANN. The time has been limited in the House. The committee can not change it.

"Mr. GARNER. The gentleman from Missouri [Mr. RUSSELL] may be able to yield time to the gentleman from Texas.

"Mr. RUSSELL. I yield 10 minutes to the gentleman from Texas. [Applause.]

"The CHAIRMAN. The time of the gentleman from Texas is extended 10 minutes.

"Mr. DIES. I will devote that 10 minutes to a discussion of ways and means. My friend from Illinois [Mr. MANN] wants a Navy as great as that of Great Britain. He always descends to particulars. He is one of the most useful Members of this House to-day, because he watches legislation. He goes into the figures of the case. Let him tell the country in the discussion of this question how many dollars and cents it will cost to duplicate the British Navy. Billions of dollars will be required. If we start in the race with Great Britain, will she stop?

"Only a few weeks ago Secretary Daniels said that Great Britain had built more navy since she has been at war than we have. How are we to keep up with the British Navy? You know it costs us three times as much to get a navy as it costs in Germany or Great Britain. In 12 years we have spent more money on the American Navy than both Germany and Japan combined. Will gentlemen who want this colossal establishment come now and tell the people how much it will cost, and how we are going to get the money? I can tell you how I am in favor of getting every dollar in excess of what was appropriated last year for the Army and Navy—by a tax on incomes. [Applause.]

"Mr. DAVIS of Texas. Mr. Chairman, will the gentleman allow an interruption? I want to ask the unanimous consent of the gentleman from Washington [Mr. JOHNSON] to say Amen. [Laughter.]

"Mr. DIES. I want to get it by a tax on incomes. Republicans and Democrats, we are taxing the American people to-day on the clothes they wear, on the food they eat. It is not right. It never was a just principle of taxation. And now, if you propose to follow the leadership of the gentleman from Illinois and spend three or four billion dollars to duplicate the English Navy, and $600,000,000 a year to maintain it, do you think a man ought to pay in proportion to the number of collars he wears and the food he eats, upon consumption, or do you think wealth ought to bear its burden in proportion as wealth is owned?

"I am a Democrat, but I am not hurt with partisanship. I follow my leader. That is, I do not ramble around in the garden with him [laughter on the Democratic side]; but I want to serve notice now, and I believe the Members of the House know me well enough to believe what I say, that I am going to vote against any sort of taxation for these extra appropriations for the Army and Navy except a tax which comes out of the wealth in proportion as the man owns that wealth. [Applause on the Democratic side.]

"The gentleman from Illinois talks about patriotism and this being a nonpartisan question, but he will not join me in proposing that wealth shall bear these burdens. He will help us to order a navy as big as that of Great Britain, he will sit in council with us while we write the order for a $5,000,000,000 navy and a $2,000,000,000 army, but when we come on the floor of the House and propose that those who own the wealth of the country shall pay for it, not in proportion to their appetite but in proportion to the wealth they own, I fear that my patriotic friend and erstwhile leader will return again into his garden. [Laughter on the Democratic side.]

"You can say what you please. The day laborer on the railroad and the section hand that gets $1.50 a day, with 10 Irish mouths to feed, ought not to be taxed on the clothes and food that he buys for his wife and children, while the man that is making a million dollars a day out of the traffic in iron and blood does not pay in proportion to his wealth. [Applause on the Democratic side.]

"I say to this House of Representatives this day that if enough Democrats will stand with me, or allow me to stand with

them, we will put the kibosh on this mad rivalry between nations as to which shall build the greatest navy and tax the nation the most by getting a tax on incomes. [Applause on the Democratic side.] Then we will get space in the New York World, we will get space in the Saturday Evening Post, then we will get our views in the moving-picture shows, and not until then. As long as they can tax the man in the ditch in a time of peace, as long as they can tax the laboring man in proportion to his consumption in time of peace, and pocket the profits of a million dollars a day, and send the other fellow to war when they bring it on, so long will they cry, 'Let slip the dogs of war!' [Applause on the Democratic side.]

"If war should ever come to this our beloved country, we are all ready to make the sacrifice; but we do not want to talk ourselves into war. [Applause.] Stop this talk, suppress the moving-picture shows that depict the dastardly invasion of our country without an American rising in arms to defend our shores. If there is anything in this world that will produce war in this country, it is the intemperate and idiotic talk going forth from public men in the public press. [Applause.] What nation in the world to-day has a war grievance against us over here working out our destiny, disturbing no nation in the world. Unless we threaten and bully and fan the smoldering embers of hate into war and alarm the American people into the belief that the country is to be invaded, we will have no war.

"The one thing doing more to drive this country to-day in the direction of war than any other combination of causes is the simple statement that we are going to have a war, and putting a pistol in our pocket for a war. That has produced many a corpse and a funeral out in the western part of Texas, where I was raised. A fellow gets a few drinks in him, puts a pistol in his pocket, and says, 'I know I am going to have a fight with Tom Jones.' Tom hears about it, puts a pistol in one pocket and a dirk in another, and says, 'I am ready.' Then if Tom carelessly starts to get his tobacco out of his hip pocket, the fellow shoots him. That is precisely what we are doing to-day. What do they say? We are going to have a war; we are going to be invaded; we are going into a war with Europe; let us get ready. Let us arm, let us equip, let us be ready so that at the drop of the hat or the pop of the match we are ready to go off. How many of you want your sons to go into the standing army to-day? Cry patriotism! How many sons of Members of Congress are serving as private soldiers in the standing army? Mr. Chairman and gentlemen of the House, no nation at any time was ever able to have a standing army without military compulsion. Why do you not tell the American people the plain, unvarnished truth, that you are heading toward compulsory service? The time is coming, if the American people do not right about face and stem this awful cry of fanaticism and hysteria, when you will be sending the corporals and colonels around to put the handcuffs on the young men of America and putting them into a standing army as in Europe they are doing to-day. This country had better stop and think. Nowhere in all the annals of the world has a republic grown so great, is a people so happy and so prosperous and free. We began it without these doctrines of organized, high military preparedness, and all the years we have grown with the wisdom of the fathers. I appeal to you as representatives of the people of this country, think you well before you set your face against these great traditions upon which we are builded and turn back to the theories of the old blood-soaked soil of Europe. [Great applause.]"

Mr. CULLOP. Mr. Chairman, I move to strike out the last two words for the purpose of asking the chairman of the committee a question with reference to the paragraph just read. I see there is an appropriation of $5,000 each for the salaries of five consular inspectors. What is the duty of a consular inspector?

Mr. FLOOD. The duty of a consular inspector is somewhat similar to the duty of a bank examiner. He travels all over the world examining and inspecting consulates and making reports to the State Department as to the condition of the consulate and the methods of the management of the business of those consulates by the consuls general, consuls, and vice consuls.

Mr. CULLOP. Is this for five additional men?

Mr. FLOOD. No.

Mr. GARNER. That has been in the bill for a long time.

Mr. FLOOD. In the reorganization of the Consular Service, by law enacted in 1906, these five men were provided for and have been appropriated for in this appropriation bill ever since.

Mr. CULLOP. How are they appointed?

Mr. FLOOD. Like other consuls are appointed now. When the law first became effective they were appointed by the President, without any reference to their efficiency, but by that I do not mean that the President did not consider their efficiency, because they are the most important officers connected with the Consular Service. I mean that there was no efficiency test, so called, applied to them.

Mr. CULLOP. When the gentleman refers to the act of 1906, does he mean the Lodge Act?

Mr. FLOOD. No; I think the act originated in this House. My recollection is that Mr. Adams, of Pennsylvania, was principally responsible for it. At any rate, it was an act passed in 1906, the purpose of which was, to some extent, to reorganize the Consular Service, and it did something along that line.

Mr. CULLOP. How many of these inspectors are there in all?

Mr. FLOOD. Five. The law provides for five.

Mr. CULLOP. Has the salary been $5,000 each heretofore?

Mr. FLOOD. My recollection is that the law creating them fixed the salary at $5,000.

Mr. CULLOP. Mr. Chairman, I withdraw the pro forma amendment.

The Clerk read as follows:

EXPENSES OF CONSULAR INSPECTORS.

For the actual and necessary traveling and subsistence expenses of consular inspectors while traveling and inspecting under instructions from the Secretary of State, $15,000: *Provided*, That inspectors shall be allowed actual and necessary expenses for subsistence not in excess of $10 per day.

Mr. COX. Mr. Chairman, I reserve a point of order on that.

Mr. MANN. I reserve the point of order on the paragraph. I make the point of order on the proviso.

Mr. COX. That is what I intended to do. I make the point of order on the proviso because it is a change of law.

The CHAIRMAN. Does the gentleman from Virginia desire to be heard?

Mr. FLOOD. No.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

Post allowances to consular officers: To enable the President, in his discretion and in accordance with such regulations as he may prescribe, to make special allowances by way of additional compensation to consular officers in order to adjust their official income to the ascertained cost of living at the posts to which they may be assigned, $100,000.

Mr. COX. Mr. Chairman, I reserve the point of order on that. The language in that paragraph strikes me as peculiar. Is there any law for it?

Mr. FLOOD. No.

Mr. COX. I suppose it is put in here under the general complaint of the war, the high cost of living, and so forth.

Mr. FLOOD. That is the reason for it partially, but even without that something ought to be done for these people.

Mr. COX. It is an indirect attempt, is it not, to increase the salaries of these consuls?

Mr. FLOOD. No; it is not an indirect attempt to increase their salaries.

Mr. COX. In the last analysis it will be that.

Mr. FLOOD. It will make them some allowances.

Mr. COX. And increase their salaries?

Mr. FLOOD. Increase allowances made to them on account of the increased cost of living.

Mr. COX. This is the first time that this item has ever been carried in the bill?

Mr. FLOOD. Yes.

Mr. COX. Does the gentleman feel that this is just the beginning of a permanent appropriation for this purpose?

Mr. FLOOD. I do not.

Mr. COX. Does he not feel, if that be true, that the salaries ought to be increased and that that ought to be done directly by statute?

Mr. FLOOD. No; I think this is the better way to do it, for these allowances will be temporary and under normal conditions will not be allowed.

Mr. COX. Why?

Mr. FLOOD. This is to enable the President, in his discretion, and in accordance with such regulations as he may prescribe, to make special allowances by way of additional compensation to consular officers in order to adjust their official income to the ascertained cost of living at the posts to which they may be assigned.

The Secretary of State asked for $150,000 for which to make allowances, in his discretion, to the various consular officers for the purpose of increasing their compensation in proportion to the increase in the cost of living since the beginning of the war in Europe. In certain places in Europe the cost of living has tremendously increased. I have here, which I shall put in

the RECORD, a table showing the increase in different items; and our consuls under the salaries which they get find it almost impossible to live and support their families.

The following table shows the percentage of increase in the cost of the principal necessary articles of food in eight belligerent and seven neutral countries during the first six months of the war as compared with the period immediately preceding the war.

Countries Nos. 1, 2, 3, 4, 5, 7, 9, and 15 are belligerent countries; Nos. 6, 8, 10, 11, 12, 13, and 14 are neutral countries.

Article.	Per cent of increase in countries Nos.—															Average.
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	
Bread, brown	.....	33	.....	50	.....	.....	14	.....	.....	25	42	15	19	33	.....	29

Potatoes	100	.....	100	100	.....	20	100	33	.....	.....	.....	.....	50	73	150	80
Rice	75	94	.....	20	20	20	.....	20	18	45	13	10	33	.....	400	64
Salt	33	333	.....	50	.....	.....	.....	33	.....	.....	.....	.....	.....	.....	50	99
Sugar	14	66	75	9	60	29	.....	.....	.....	.....	14	.....	33	.....	264	62
Wheat flour	62	66	.....	20	33	.....	.....	.....	20	.....	25	18	30	66	37	37
Other flour	.....	.....	.....	50	.....	.....	.....	.....	.....	50	60	28	.....	.....	.....	34
Average	50	95	53	35	25	33	54	29	58	38	32	27	38	49	154	.....

This table shows an increase of from 6 per cent to 400 per cent in the cost of certain articles of food and an average increase in the cost of food of from 25 per cent to 154 per cent, according to the country.

Since the foregoing table was compiled, detailed reports have been obtained from nearly one-half of the consular officers in belligerent countries and contiguous neutral countries covering the period from July to December, 1915. These reports are not limited to cost of food, but cover also rent, fuel, and clothing. The percentage of increase in the cost of living, based upon an average of the increase in the cost of rent, fuel, clothing, and food, ranges all the way from 15 per cent to 128 per cent over the prices for the period of from January to June, 1914, before the outbreak of the war. The percentage of increase in the cost of food alone in some countries rises as high as 250 per cent above the prices for January to June, 1914. These percentages of increase are not mere expressions of opinion, but are based upon actual prices of the principal articles of food, clothing, fuel, and rent entering into the cost of living in each country. It will readily be seen that the effect of the change in living expenses upon the higher salaried officers in the Consular Service works great hardship, while the effect upon officers receiving $3,000 to $1,000 a year is exceedingly serious. It will obviously be impossible for the latter class of officers to remain in the service unless they be granted some relief in the way of increased compensation.

The condition described can not be met by any horizontal increase in salary because the percentage of increase in the cost of living not only differs in one country from that existing in another country, but there is considerable variation as between cities and consular districts in the same country, due to many local conditions, such as impaired transportation facilities, decrease of production, and other causes. Therefore, the only manner in which the condition can be remedied economically and effectively is by empowering the Secretary of State to increase the annual compensation of each consular officer affected by making a post or local allowance of an amount based upon the ascertained increase in the legitimate living expenses.

At the time the estimate for $150,000 for post allowances was transmitted to Congress, the Department of State was without sufficient data upon which to make an accurate and intelligent estimate. Therefore the arbitrary amount of $150,000 was specified. Now that detailed reports have been received from a large number of consular officers, it is possible to make an approximate estimate of the amount which would be required. If each officer's compensation were increased in proportion to the increase in the cost of living in the belligerent countries and the contiguous neutral countries, an appropriation of at least $260,000 would be necessary for consuls general and consuls alone in those countries and approximately $50,000 for increased allowances at the same rate to salaried subordinate consular officers, making a total of $310,000, instead of $150,000 as requested. This estimate leaves entirely out of consideration any relief to officers in noncontiguous neutral countries and the colonies of the belligerent countries, where reports show that there has been considerable increase in the cost of living.

As an illustration of the necessity of increasing the compensation of consular officers, it may be pointed out that some of the belligerent Governments, where the increase in prices has not reached the maximum stated in the foregoing, have increased the compensation of certain classes of their employees from 37 per cent to 60 per cent because of the unusual conditions growing out of the war.

This appropriation will not be permanent, but it is just to meet the condition of affairs that has arisen as a result of the war. Consular officers getting from two to three thousand dollars a year find the increased cost of living so enormously raised that it is almost impossible for them to live.

Mr. COX. It will be a curiosity if this item is permitted to remain if it does not become permanent for all time to come.

Mr. FLOOD. I will say to the gentleman it will be subject to a point of order after the war ends, as it is now, and I have no doubt the gentleman will be in Congress when the war ends, and many years afterwards, and it certainly is a hardship on these gentlemen as it is.

Mr. COX. I expect the cost of living has increased somewhat over there, and has increased here.

Mr. SIMS. Some!

Mr. COX. At least the men who keep house know what "some" means.

Mr. FLOOD. In some places the increase is as high as 150 to 200 per cent.

Mr. COX. Would not the gentleman be willing to reduce the item, as it is an experiment, to $75,000? The Secretary of State only asked $150,000.

Mr. FLOOD. I will accept it with pleasure.

Mr. COX. If the gentleman will accept that to start with——

Mr. FLOOD. I accept the gentleman's suggestion.

Mr. COX. I will withdraw the point of order.

Mr. CULLOP. Mr. Chairman, I make the point of order against the amendment. If this gets in here, it will never get out.

The CHAIRMAN. The Chair sustains the point of order.

Mr. HARRISON. Will the gentleman reserve the point of order?

Mr. CULLOP. I will, but I want to notify the gentleman I will make it.

The CHAIRMAN. The Chair has sustained the point of order.

Mr. HARRISON. Will the gentleman reserve it for a moment?

Mr. CULLOP. I will reserve it, but I am going to make it.

Mr. HARRISON. Mr. Chairman, the gentleman from Indiana [Mr. CULLOP] is always so gracious and big-hearted I know he does not want to do anybody an injustice. As I understand it, there are three or four of these countries that have passed provisions to take care of these men in the employ of the Government who have to live in these centers where food has gone so high, and if the gentleman had heard the statement of Mr. Carr, who came before the committee, he would have been impressed with the fact that something ought to be done for the men who are in the service of this Government in Berlin, Vienna, and other places throughout the war zone, where the price of food has increased so much.

Now, the committee was asked for an appropriation of $150,000 for this purpose. It is in the discretion of the President as to how much he is going to allow, what additional rules and regulations he may prescribe, and I am sure the department is not

going to do wrong in this matter, but is going to take care of conditions that have arisen by virtue of the war. This is simply a temporary provision; we have cut the appropriation from $150,000 to $100,000, and we are now willing to cut it to $75,000, and there are people who now, by virtue of circumstances, are placed in the war zone who can not live on the salaries they are getting, and they certainly ought to get a little increase. I think this should appeal to the gentleman, and I hope he will not make the point of order, but let us reduce the amount if the gentleman thinks this is too high.

Mr. FLOOD. Mr. Chairman, I will add, if the gentleman will permit, that the point of order can be made at any time. There is no law authorizing this appropriation. If we carry it this year and carry it next year, the year after, if the war is ended and conditions have changed, the gentlemen, who will be here, can raise the point of order against it. The conditions certainly are such as to entitle these consuls to some kind of an additional allowance now. They are performing their duties to this country, and the State Department wants to aid them when they need assistance. Many of them are men without any means, and they can hardly support their families on the little salary they get.

Mr. SIMS. Will the gentleman yield for a question?

Mr. FLOOD. I will.

Mr. SIMS. Has it not just recently appeared in the newspapers that the German Empire has absolutely prohibited the use of meat for eight weeks on account of conditions?

Mr. FLOOD. Yes, sir.

Mr. SMITH of New York. Mr. Chairman, I wish to add a word to what the chairman of the committee has said. It is impossible to make specific statements as to the increased cost of living in the belligerent countries because the State Department can not properly give out those facts. The representatives of the State Department, however, gave information privately to the committee, and the committee after careful consideration decided that this appropriation should remain at $100,000.

The committee, when the proposition was first made, was in the same mood as the gentleman from Indiana [Mr. CULLOP], but after hearing the argument and listening to the presentation of the facts the committee was unanimous in putting this item in the bill.

Mr. CULLOP. Mr. Chairman, I have heard the gentleman's statement with a good deal of pleasure. In my judgment, if this item gets into this bill now, it will never get out, but will grow larger and larger from year to year.

Now, I would like to suggest a way of relief, and that is to notify the powers upon the seas to keep their hands off our commerce and let us go into those ports and reduce the cost of living. [Applause.] That will bring about a change in the cost of living and bring about a condition that does not require this increased appropriation in this matter. Tell all in emphatic terms to keep their hands off our commerce on the seas and then see that they do it, in order that the products of this country may move to the markets of the world unhampered and free from censorship and hold-ups on the high seas. Conditions heretofore have prevailed in the transportation of our products on the seas which have injuriously affected our commerce, hampered our access to foreign markets, and impaired our trade abroad very much to the detriment of our people as well as those in foreign countries who wanted our goods. Many acts affecting this matter have been inexcusable until they have become almost intolerable. It is about time it seems to me that certain powers which have been actively engaged in this matter should be told it must cease, and told that we mean what we say. If this should be done, I dare say it will end and there will be no more of it. The people are growing impatient on this matter, and there is some occasion for their impatience in this regard, and I hope that there will soon be a stop put to it in order that our products may be transported unmolested to the markets to which they are consigned and freedom of commerce reestablished. The seas should be a common highway to all for the transportation of their products, and humanity as well as duty requires that they be so maintained, and now is a most appropriate time to give all who interfere with this privilege to understand further interference will not be tolerated. Do this and it will meet the approval of the people, not only here but abroad as well, and will also lower the high cost of living in some of the countries where it is excessively high, and such appropriations as in this item proposed will be unnecessary. For one I think it the better plan, and hence I am prompted for these reasons to take this course in reference to this question.

We owe a duty to our people, aye, to the world, and I hope to see that fully discharged; and it matters not what nation interferes, let such nation know in positive terms such interference must stop, and it will no longer interfere. If it does, it will be at its peril; and such a course will be approved by humanity the world over. It will end much suffering and anxiety and be a great stimulus to commerce and swell the volume of our prosperity. This is a good time to do it—the sooner the better—and our people expect it. They are ready for it now.

American rights and American interests are at stake, and we should see they are strictly preserved; and in doing so we will be serving humanity all over the world. I shall therefore insist upon my point of order.

The CHAIRMAN. The Chair has already sustained the point of order. The Clerk will read.

The Clerk read as follows:

ALLOWANCE FOR CLERK HIRE AT UNITED STATES CONSULATES.

Allowance for clerk hire at consulates, to be expended under the direction of the Secretary of State, $493,000.

Mr. CULLOP. Mr. Chairman, I desire to make a point of order against that item, and will reserve it.

The CHAIRMAN. The gentleman from Indiana reserves a point of order on the item.

Mr. HARRISON. What is the gentleman's point of order? What are the gentleman's reasons?

Mr. CULLOP. I want to inquire whether under this there is any increase of appropriation?

Mr. FLOOD. Not a cent.

Mr. CULLOP. It is a new appropriation?

Mr. FLOOD. No. It has been here for years.

Mr. CULLOP. How is this money expended with reference to these different positions—under the direction of the Secretary of State as he sees fit?

Mr. FLOOD. Absolutely.

Mr. CULLOP. A lump-sum appropriation?

Mr. FLOOD. Yes; provided by law.

Mr. CULLOP. And he makes the expenditure of it?

Mr. FLOOD. Yes.

Mr. CULLOP. It is not allotted, then, to any particular post, but it is under the Secretary of State to allot as he sees fit?

Mr. FLOOD. It is to be allotted to various points. It is not subject to a point of order.

Mr. CULLOP. I regret that, because I would like to knock it out.

Mr. FLOOD. Then you would break up the Consular Service.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Paying for the keeping and feeding of prisoners in China, Chosen, Siam, and Turkey, $9,000: *Provided*, That no more than 50 cents per day for the keeping and feeding of each prisoner while actually confined shall be allowed or paid for any such keeping and feeding. This is not to be understood as covering cost of medical attendance and medicines when required by such prisoners.

Mr. FLOOD. Mr. Chairman, I want to offer an amendment on page 25, line 17. It is just a change in language.

The CHAIRMAN. The gentleman from Virginia offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. FLOOD: Page 25, line 17, after the word "Turkey," insert the words "and of those convicted by the United States Court for China."

Mr. MANN. You have there the language "paying for the keeping and feeding of prisoners in China." Do you want to insert the words "and those convicted in the United States court"?

Mr. FLOOD. Yes. I will read to the gentleman a letter that I received from the Secretary of State. He says:

FEBRUARY 11, 1916.

Hon. HENRY D. FLOOD,
Chairman Committee on Foreign Affairs,
House of Representatives.

SIR: I have the honor to recommend that in the bill now pending in Congress covering appropriations for the Diplomatic and Consular Service the second paragraph of the item "Expenses of prisons for American convicts" be amended to read as follows:

"Paying for the keeping and feeding of prisoners in China, Chosen, Siam, and Turkey, and of those convicted by the United States Court for China, $9,000: *Provided*, That no more than 50 cents per day for the keeping and feeding of each prisoner while actually confined shall be allowed or paid for any such keeping and feeding. This is not to be understood as covering cost of medical attendance and medicines when required by such prisoners."

The only change is the addition of the words "and of those convicted by the United States Court for China." Under the law the United States Court for China has jurisdiction under the extraterritorial provisions in all criminal cases against Americans arising in China where the punishment may exceed 60 days' imprisonment. The consular jail in Shanghai is not fitted for the accommodation of long-term prisoners because of lack of facilities for exercise and employment therein, and it is therefore occasionally necessary to send such prisoners to prisons in the United States or the Philippines, and it is to meet such cases that the proposed amendment is requested.

I have the honor to be, sir, your obedient servant,

ROBERT LANSING.

Mr. MANN. I see the gentleman's words "for the keeping and feeding of prisoners in China."

Mr. FLOOD. Yes.

Mr. MANN. And the other is for the payment to those somewhere else that have been convicted in China?

Mr. FLOOD. Yes.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Expenses of providing all such stationery, blanks, record and other books, seals, presses, flags, signs, rent (so much as may be necessary), repairs to consular buildings owned by the United States, postage, furniture, including typewriters and exchange of same, statistics, newspapers, freight (foreign and domestic), telegrams, advertising, messenger service, traveling expenses of consular officers and consular assistants, compensation of Chinese writers, loss by exchange, and such other miscellaneous expenses as the President may think necessary for the several consulates and consular agencies in the transaction of their business, and payment in advance of subscriptions for newspapers (foreign and domestic) under this appropriation is hereby authorized, $597,000.

Mr. MANN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois moves to strike out the last word.

Mr. MANN. I see in this paragraph you have taken the limit off the amount of rent that can be paid. Is that the reason for the increase in the amount of the appropriation by about $130,000?

Mr. FLOOD. No. The reason for the increase is that they needed it. They did not have enough.

Mr. MANN. Heretofore we have carried a provision in reference to rent, that the allowance for rent should not exceed in any case 30 per cent of the official's salary. Now you have removed that limit and left it purely discretionary with the State Department as to how much the rent may be, saying here, "so much as may be necessary."

I apprehend that if that stays in the law the increase of $130,000 a year will not be a circumstance to what we will be called upon to pay, because if we are going to pay unlimited rent all of these very distinguished gentlemen, from consular agents and vice consuls up to ambassadors, will want to live in very nice quarters if the Government of the United States is to pay the rent. Now, when we limited the rent to 30 per cent of the official's salary, of course they could not engage the finest house in town. They can not now, of course, unless it is allowed by the State Department; but they can ask for it, because there is no limit on the amount that they can ask for. I am afraid in the future they will overpersuade us.

Mr. FLOOD. Mr. Chairman, I notice the change that the gentleman alludes to. I really do not think the committee considered it very carefully.

Mr. MANN. I really think it is rather a dangerous change. I do not care what the limitation is, but there ought to be some limitation to it.

Mr. FLOOD. Mr. Chairman, I move to strike out the words in the bill in line 18, page 26, "so much as may be necessary," and insert in lieu thereof "allowance for rent not to exceed in any case 30 per cent of the officer's salary."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Virginia.

The Clerk read as follows:

Amendment offered by Mr. FLOOD: Page 26, line 18, strike out the words "so much as may be necessary" and insert the words "allowance for rent, not to exceed in any case 30 per cent of the officer's salary."

The CHAIRMAN. The question is on the amendment.

The amendment was agreed to.

Mr. FLOOD. Mr. Chairman, I ask unanimous consent that the Clerk may be allowed to correct the totals wherever necessary.

The CHAIRMAN. By unanimous consent, that will be done.

Mr. FLOOD. Mr. Chairman, I move that the committee do now rise and report the bill to the House with the amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. MOON, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 13383) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1917, and had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to, and that the bill as amended do pass.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them in gross.

The amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

On motion of Mr. FLOOD, a motion to reconsider the last vote was laid on the table.

CALL OF COMMITTEES.

The SPEAKER. The Clerk will call the committees.

The Committee on Ways and Means was called.

PORTS OF ENTRY, WASHINGTON.

Mr. KITCHIN. Mr. Speaker, I desire to take up for consideration the bill (H. R. 12954) for the establishment of Northport, Chopaka, and Laurier, in the State of Washington, as ports of entry and delivery for immediate transportation without appraisement of dutiable merchandise.

Mr. MANN. This bill is on the Union Calendar.

Mr. KITCHIN. I ask unanimous consent that the bill may be considered in the House as in Committee of the Whole House on the state of the Union.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that the bill be considered in the House as in Committee of the Whole House on the state of the Union. Is there objection?

There was no objection.

The bill was read, as follows:

Be it enacted, etc., That the privileges of the first and seventh sections of the act approved June 10, 1880, governing the immediate transportation of dutiable merchandise without appraisement, be, and are hereby, extended to the ports of Northport, Chopaka, and Laurier, in the State of Washington.

With the following committee amendment:

Page 1, line 3, strike out the words "and seventh sections" and insert in lieu thereof the word "section."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

By unanimous consent, the title of the bill was amended so as to read: "A bill for the establishment of Northport, Chopaka, and Laurier, in the State of Washington, as ports of entry for immediate transportation without appraisement of dutiable merchandise."

On motion of Mr. KITCHIN, a motion to reconsider the vote by which the bill passed was laid on the table.

PORT OF JACKSONVILLE, FLA.

Mr. KITCHIN. Mr. Speaker, I desire to call up the bill (S. 4506) to amend an act entitled "An act to amend the statutes in relation to immediate transportation of dutiable goods, and for other purposes," approved June 10, 1880.

The bill is on the Union Calendar, and I ask unanimous consent to consider it in the House as in Committee of the Whole House on the state of the Union.

The SPEAKER. The gentleman from North Carolina asks unanimous consent to consider the bill in the House as in Committee of the Whole House on the state of the Union. Is there objection?

There was no objection.

The bill was read, as follows:

Be it enacted, etc., That the privileges of the first section of the act approved June 10, 1880, entitled "An act to amend the statutes in relation to immediate transportation of dutiable goods, and for other purposes," be, and the same are hereby, extended to the port of Jacksonville, Fla.

The bill was ordered to a third reading, and was accordingly read the third time and passed.

On motion of Mr. KITCHIN, a motion to reconsider the vote by which the bill was passed was laid on the table.

ALCOHOL.

Mr. KITCHIN. Mr. Speaker, I desire to call up the bill (H. R. 15347) to amend existing laws relating to the use of alcohol, free of tax, by scientific institutions or colleges of learning.

The SPEAKER. This bill is on the Union Calendar.

Mr. KITCHIN. I ask unanimous consent to consider it in the House as in the Committee of the Whole.

The SPEAKER. The gentleman from North Carolina asks unanimous consent to consider this bill in the House as in Committee of the Whole House on the state of the Union. Is there objection?

There was no objection.

The bill was read, as follows:

Be it enacted, etc., That an act entitled "An act to extend the provisions of section 3297 of the Revised Statutes to other institutions of learning," approved May 3, 1878, is hereby amended to read as follows:

"That the Secretary of the Treasury is authorized to grant permits, as provided for in section 3297 of the Revised Statutes of the United States, for the withdrawal of alcohol from bond, free of tax, to any scientific university or college of learning created and constituted as

such by any State or Territory under its laws, though not incorporated or chartered, and to any hospital maintained by endowment or otherwise, and not conducted for profit, upon the same terms and subject to the same restrictions and penalties already provided by said section 3297: *Provided, however*, That alcohol so obtained by hospitals may be used in surgical operations and, except as a beverage, in the treatment of patients, under such regulations as the Secretary of the Treasury may prescribe: *And provided further*, That the bond required by said section 3297 may be executed by an officer of such hospital or institution or by any other person for it, and on its behalf, with two good and sufficient sureties, upon like conditions, and to be approved as by said section is provided."

Mr. MANN. Mr. Speaker, I take it that the committee and the department have given careful consideration to this subject or they would not extend to all hospitals not conducted for profit the authority to use alcohol free of tax, not only in any scientific work which the hospital may do, but also in all operations and the treatment of patients, except as a beverage; and I suppose that the department, with the experience that they have on the subject, may be able to protect the Government. They say they think they can, though I have grave doubts whether they really can.

Mr. KITCHIN. I really think they can as well in an unchartered hospital as in a chartered one. At the present time, if the hospital is chartered and a corporation, they hold that they can do it now.

Mr. MANN. I understand that.

Mr. KITCHIN. Now, in these unchartered and unincorporated hospitals, but not for profit like a great many private hospitals, they ought to have this privilege. I recall one where a hospital was built for the poor under a will by a gentleman from Missouri, and we desired to extend it so that such a private hospital, run not for profit, should have the benefit.

Mr. MANN. I know, and I can see the purpose; but where you undertake to give anybody who says that he is running a hospital, if he can make the claim, authority to get alcohol free from tax, you open quite a wide door with a pretty strong invitation for them to try it, especially in the big cities.

Mr. KITCHIN. The department would have to supervise it pretty strictly; but that same party could incorporate under the law now and get alcohol free.

Mr. MANN. He could; but there are some restrictions on the incorporation of charitable hospitals. I would not be in favor of the bill at all if they had not been trying it with reference to hospitals under the existing law, and they think there is no loss.

Mr. KITCHIN. I talked with the department and the Commissioner of Internal Revenue, and they thought that they could protect it.

Mr. MANN. I would like to offer a formal amendment by inserting on page 1, line 5, after the word "learning," quotation marks.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend, on page 1, line 5, after the word "learning," by inserting quotation marks.

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. KITCHIN, a motion to reconsider the vote whereby the bill was passed was laid on the table.

The SPEAKER. Has the Ways and Means Committee any more bills?

Mr. KITCHIN. No, Mr. Speaker; it has not. Mr. Speaker, I ask unanimous consent that to-morrow we take up the Unanimous Consent Calendar.

Mr. MANN. And I suggest that we commence where we left off.

The SPEAKER. Beginning where we left off, with the same restrictions that we had on Monday.

Mr. MANN. That has already been agreed to.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that to-morrow we take up the Unanimous Consent Calendar, beginning where we left off on Monday. Is there objection?

There was no objection.

Mr. WATSON of Pennsylvania. Mr. Speaker, I ask unanimous consent to print in the RECORD some remarks on the bill revising and amending the statutes relative to trade-marks.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. MANN. Mr. Speaker, before we adjourn I would like to ask the gentleman from North Carolina a question. We take up the Unanimous Consent Calendar to-morrow. Will we take up the Private Calendar on Friday or Saturday?

Mr. KITCHIN. Yes; we will take it up on Friday or Saturday.

Mr. MANN. One of the two calendars the rest of the week?

Mr. KITCHIN. Yes.

The SPEAKER. The Chair will state to the House for the benefit of Members that there are nine pages remaining of the Unanimous Consent Calendar. We got through three pages on Monday.

Mr. MANN. I would like to inquire if anybody would object to first taking up the bridge bills. We have a lot of bridge bills on the calendar that will be passed as fast as read. I have no interest in them, but I would like to know whether we could not meet at 11 o'clock and dispose of those first?

Mr. KITCHIN. That is agreeable to me, to meet at 11 o'clock and take up the bridge bills first from the Unanimous Consent Calendar.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that the bridge bills be given precedence to-morrow on the Unanimous Consent Calendar. Is there objection?

There was no objection.

HOUR OF MEETING TO-MORROW.

Mr. KITCHIN. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow. Is there objection?

There was no objection.

ADJOURNMENT.

And then, on motion of Mr. KITCHIN (at 2 o'clock and 16 minutes p. m.), the House adjourned until to-morrow, Thursday, June 8, 1916, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, a letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Hattie Willis and Mollie T. Willis, daughters and sole heirs of Phlegman W. Willis, *v.* The United States (H. Doc. No. 1194), was taken from the Speaker's table, referred to the Committee on War Claims, and ordered to be printed.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills were introduced and severally referred as follows:

By Mr. EDMONDS: A bill (H. R. 16303) to permit the manufacture of denatured alcohol by mixing domestic and wood alcohol while in process of distillation; to the Committee on Ways and Means.

By Mr. SISSON: A bill (H. R. 16304) to provide for the purchase of a site and the erection of a public building thereon at Winona, in the State of Mississippi; to the Committee on Public Buildings and Grounds.

By Mr. DAVIS of Texas: A bill (H. R. 16305) to make classifications for military and naval service, to promote preparedness, to provide for adequate and efficient national defense, to require that in all naval and military service of the United States, whether in time of peace or war, wealth shall bear and perform its proportional part of the service, and that money shall be made to fight for its country the same as men; to the Committee on Ways and Means.

By Mr. EVANS: A bill (H. R. 16306) for the purchase of a site for and the erection of a post-office building at Anaconda, Mont.; to the Committee on Public Buildings and Grounds.

By Mr. McDERMOTT: A bill (H. R. 16307) to authorize the registration of pure-bred live stock; to the Committee on Agriculture.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. ASHBROOK: A bill (H. R. 16308) granting a pension to Margaret Berry; to the Committee on Invalid Pensions.

By Mr. BAILEY: A bill (H. R. 16309) granting a pension to Izora B. Hewitt; to the Committee on Pensions.

By Mr. DYER: A bill (H. R. 16310) to restore First Lieut. Archibald Grymes Hutchinson, resigned, to the active list of the Army; to the Committee on Military Affairs.

By Mr. EAGAN: A bill (H. R. 16311) granting an increase of pension to Theodore Kiefer; to the Committee on Invalid Pensions.

By Mr. FOSTER: A bill (H. R. 16312) granting an increase of pension to James H. Leonard; to the Committee on Invalid Pensions.

By Mr. HOUSTON: A bill (H. R. 16313) granting an increase of pension to Claude A. Holder; to the Committee on Pensions.

By Mr. HUDDLESTON: A bill (H. R. 16314) granting an increase of pension to William G. Beckley; to the Committee on Invalid Pensions.

By Mr. HULL of Tennessee: A bill (H. R. 16315) granting an increase of pension to John S. Wooten; to the Committee on Invalid Pensions.

By Mr. NOLAN: A bill (H. R. 16316) granting a pension to Maxwell Gray; to the Committee on Pensions.

Also, a bill (H. R. 16317) for the relief of Horatio S. Turrell, alias Horatio Seaward; to the Committee on Military Affairs.

By Mr. POWERS: A bill (H. R. 16318) granting a pension to N. Ellen Peters and George N. Peters; to the Committee on Pensions.

By Mr. ROWLAND: A bill (H. R. 16319) granting an increase of pension to Isaiah Copelin; to the Committee on Invalid Pensions.

By Mr. TAGGART: A bill (H. R. 16320) granting an increase of pension to Sarah E. Lukens; to the Committee on Invalid Pensions.

By Mr. THOMAS S. WILLIAMS: A bill (H. R. 16321) granting an increase of pension to Samuel Barton; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ASHBROOK: Petition of D. L. Williams and 22 others, of Pataskala, Ohio, favoring a peace amendment to the Constitution; to the Committee on the Judiciary.

By Mr. BAILEY: Protest of Nelson A. Elsasser, Alex H. When, J. A. Keating, A. Quigley, K. Boyd, E. J. Cohoe, E. P. Harding, Margaret McDermott, Laura Scott, C. B. Johns, Walter Everett Burnett, Viola McGuire, Anna Lawrence, Mollie Buxton, Alice Buxton, Bea Campbell, Jane Hartnett, Bertha Stern, Mrs. D. Boyle, Mrs. M. Boyle, James Coyle, George J. Hammer, D. F. Boyle, Mrs. Annie Campbell, Sue Boyle, Mary Rogers, Mrs. Pat McConlogue, Mrs. M. Harrington, Mrs. J. Harrigan, Anna Boyle, Mrs. Frank Molloy, Hugh Rodgers, Mrs. Richard Goggin, Margaret McKernan, Mrs. Frank Dunphy, and Mary H. Clougher, all of Johnstown, Pa., against the passage of the Stephens bill to establish price control; to the Committee on the Judiciary.

By Mr. DALE of New York: Memorial of Schenectady (N. Y.) Board of Trade, favoring the Shields water-power bill; to the Committee on Interstate and Foreign Commerce.

Also, petition of Dr. D. Challiss Faust and Eleanor Blimson, of Philadelphia, Pa., favoring woman suffrage amendment; to the Committee on the Judiciary.

By Mr. FOCHT: Evidence in support of House bill 7079, for the relief of Riley R. Zerbe; to the Committee on Invalid Pensions.

By Mr. FULLER: Petition of National Society for Promotion of Industrial Education, favoring bill for vocational schools; to the Committee on Education.

Also, petition of Board of County Commissioners of Morgan County, Ill., favoring House bill 15526, to permit the removal of dams on the Illinois River; to the Committee on Flood Control.

By Mr. HUMPHREY of Washington: Petition of sundry citizens of the State of Washington, against Sunday observance bill; to the Committee on the District of Columbia.

Also, petition of sundry citizens of the State of Washington, against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. MAPES: Petition of 59 citizens of Kent County, Mich., against passage of Sunday observance bill; to the Committee on the District of Columbia.

By Mr. OAKEY: Memorial of Sons of Veterans, Connecticut Division, advocating by the Congress and constitutional authorities of the United States a wise policy of preparedness; to the Committee on Military Affairs.

By Mr. SNELL: Petition of Paul Cloke, H. M. Royal, O. E. Parks, J. B. Brooks, J. R. Weston, L. H. Pelton, H. A. Miner, G. R. Smith, E. E. Tryon, J. Pimberton, P. R. Pierson, H. B. Jebo, Lilly A. MacBrien, Ella J. MacBrien, J. F. Day, William M. Towle, L. C. Merrill, W. M. Countryman, F. R. Griffiths, H. H. MacDonald, W. Taylor, F. F. McCue, S. J. Wise, W. B. Davis, L. E. Olson, M. H. Montross, P. R. Cloke, A. B. Gibson, C. J. Dresser, F. B. Cowan, L. K. Russell, J. A. Hill, W. A. Bassette, Edgar Fobes, K. W. Morrison, H. H. Plank, F. N. Dodge, C. S. Winchester, E. L. Pelton, F. H. Fisk, H. M. Smith, L. F. Ayers, M. M. Timmerman, M. S. Hoskins, J. W. Sancto, Mrs. A. E. Morgan, Mrs. Ada Pray, D. J. Armstrong, Mrs. D. J. Armstrong, Mrs. R. J. Sanford, Mrs. J. S. Hosmer, Mrs. E. L. Whitmore, D. L. Fisher, G. W. F. Smith, B. F. Scott, R. E. Roberts, George W. Sisson, jr., L. D. Taggart, J. F Hummer, and F S. Needham, all of Potsdam, N. Y., in favor of national prohibition; to the Committee on the Judiciary.

By Mr. STINESS: Petition of Rhode Island, Nos. 5 and 1, National Association of Stationery Engravers, favoring passage of Senate bill 4874; to the Committee on Agriculture.

By Mr. WARD: Petition of Louis C. Winhold and others, of Summit, N. Y., favoring national prohibition; to the Committee on the Judiciary.

SENATE.

THURSDAY, *June 8, 1916.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we lift our hearts to Thee, seeking Thy blessing upon this our land and country. We thank Thee for the great spiritual ideals upon which the institutions of this land have been founded. We bless Thee that, coming out of all the kindreds of the earth, we are not to be controlled by the artificial distinctions of blood or by even the traditions of the ancient nations of the earth. We thank Thee for the liberty of thought and of conscience, so that we shall never be controlled by any organization of whatever character, however great. We bless Thee that lying back of all the incidental things pertaining to government is the thought of God and of freedom and of soul. At this time, when great parties seek to guide the Nation and to express the policies of the Government for the years to come, we pray that all who are in places of influence and power, and are shaping the public opinion, may remember that God is above all and that there is a hand of Divine Providence that guides the affairs of men. So may Thy name be glorified in all the future course of our national history, we ask for Jesus' sake. Amen.

NAMING A PRESIDING OFFICER.

The Secretary (James M. Baker) read the following:

UNITED STATES SENATE,
Washington, D. C.

To the Senate:

The Vice President being absent from the Senate, and the undersigned being also necessarily absent therefrom, he, as President pro tempore of the Senate, hereby names the Senator from Alabama, Mr. JOHN H. BANKHEAD, to perform the duties of the Chair on the 8th day of June, 1916; this substitution not to extend beyond an adjournment.

JAMES P. CLARKE,
President pro tempore of the Senate.

Mr. BANKHEAD thereupon took the chair as Presiding Officer and directed the Secretary to read the Journal of the proceedings of Saturday last.

The Secretary proceeded to read the Journal of the proceedings of Saturday last, when, on motion of Mr. VARDAMAN and by unanimous consent, the further reading was dispensed with and the Journal was approved.

CONCENTRATION AND MANEUVER CAMP, WASHINGTON.

The PRESIDING OFFICER laid before the Senate a communication from the Secretary of War, transmitting, in response to a resolution of May 31, 1916, copies of reports and memoranda with reference to the American Lake Concentration and Maneuver Camp in the State of Washington, which, with the accompanying papers, was referred to the Committee on Military Affairs.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the following bills:

S. 1793. An act granting to the State of Kansas title to certain lands in said State for use as a game preserve;

S. 4506. An act to amend an act entitled "An act to amend the statutes in relation to immediate transportation of dutiable goods, and for other purposes," approved June 10, 1880;

S. 5274. An act to ratify, approve, and confirm an act duly enacted by the Legislature of the Territory of Hawaii amending the franchise held by the Hawaiian Electric Co. (Ltd.) by extending it to include all of the island of Oahu, Territory of Hawaii;

S. 5658. An act to ratify, approve, and confirm an act duly enacted by the Legislature of the Territory of Hawaii amending the franchise held by the Honolulu Gas Co. (Ltd.) by extending it to include all of the island of Oahu, Territory of Hawaii;

S. 5708. An act for the establishment of Winston-Salem, in the State of North Carolina, as a port of delivery under the act of June 10, 1880, governing the immediate transportation without appraisement of dutiable merchandise; and

S. 5776. An act to amend certain public-utility company franchises in the Territory of Hawaii.

The message also announced that the House had passed the bill (S. 1388) to authorize the Secretary of the Interior to furnish hot water from the hot springs on the Hot Springs Reservation for drinking and bathing purposes free of cost to the Leo N. Levi Memorial Hospital Association, with amendments, in which it requested the concurrence of the Senate.

The message further announced that the House had passed the bill (S. 1066) authorizing leave of absence to homestead settlers upon unsurveyed lands, with an amendment, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the bill (S. 1843) to authorize the Secretary of the Interior to acquire certain right of way near Engle, N. Mex., with an amendment, in which it requested the concurrence of the Senate.

The message further announced that the House agrees to the amendments of the Senate to the bill (H. R. 15005) entitled "An act to appropriate $200,000 for training the Organized Militia or National Guard of any State, Territory, or of the District of Columbia."

The message also announced that the House disagrees to the amendments of the Senate to the bill (H. R. 13486) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. RUSSELL of Missouri, Mr. ASHBROOK, and Mr. FULLER managers at the conference on the part of the House.

The message further announced that the House disagrees to the amendments of the Senate to the bill (H. R. 14484) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. RUSSELL of Missouri, Mr. ASHBROOK, and Mr. FULLER managers at the conference on the part of the House.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 14864) to alter, and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from the Central Pacific Railroad, in California, to Portland, in Oregon," approved July 25, 1866, as amended by the acts of 1868 and 1869, and to alter and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from Portland to Astoria and McMinnville, in the State of Oregon," approved May 4, 1870, and for other purposes.

The message further announced that the House had agreed to a resolution consenting that the Senate may adjourn from June 3 to June 8, 1916.

The message also announced that the House had passed the following bills and joint resolutions, in which it requested the concurrence of the Senate:

H. R. 21. An act authorizing the city of Salida, Colo., to purchase certain public lands for public-park purposes;

H. R. 600. An act to validate title to the town site of McCabe, in the State of Montana;

H. R. 7613. An act to authorize the Terral Bridge Co. to construct a bridge across the Red River near Terral, Jefferson County, Okla.;

H. R. 8492. An act to restore homestead rights in certain cases;

H. R. 10124. An act to add certain lands to the Rocky Mountain National Park, Colo.;

H. R. 10305. An act to grant certain lands to the State of Oregon as a public park for the benefit and enjoyment of the people;

H. R. 10312. An act relating to appeals and writs of error and costs thereof;

H. R. 11162. An act to amend an act entitled "An act to authorize entry of the public lands by incorporated cities and towns for cemetery and park purposes," approved September 30, 1890, and for other purposes;

H. R. 11472. An act to reserve certain lands and make them a part of the Pike National Forest;

H. R. 12954. An act for the establishment of Northport, Chopaka, and Laurier, in the State of Washington, as ports of entry for immediate transportation without appraisement of dutiable merchandise;

H. R. 13223. An act to provide for appeals from decisions of boards of local inspectors of vessels, and for other purposes;

H. R. 13383. An act making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1917;

H. R. 13618. An act to amend section 4931 of the Revised Statutes of the United States;

H. R. 13720. An act to amend section 4894 of the Revised Statutes relating to patent applications;

H. R. 13831. An act to amend section 4464 of the Revised Statutes of the United States, relating to number of passengers to be stated in certificate of inspection of passenger vessels, and section 4465 of the Revised Statutes of the United States prescribing penalty for carrying excessive number of passengers on passenger vessels, and section 4466 of the Revised Statutes of the United States relating to special permits for excursions on passenger steamers;

H. R. 15347. An act to amend existing laws relating to the use of alcohol, free of tax, by scientific institutions or colleges of learning;

H. R. 15947. An act making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes;

H. J. Res. 78. Joint resolution authorizing the Secretary of War to loan certain tents, saddles, and bridles for the use of the national encampment, Knights of Pythias, to be held at Nashville, Tenn., in August, 1916;

H. J. Res. 145. Joint resolution authorizing the erection, on the public grounds in the city of Washington, D. C., of a statue of James Buchanan, a former President of the United States; and

H. J. Res. 184. Joint resolution providing for one year's extension of time to make installment payments for the land of the former Fort Niobrara Military Reservation, Nebr.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills and joint resolution, and they were thereupon signed by the Presiding Officer:

S. 6073. An act granting the consent of Congress to George Fabyan to construct a bridge across the Fox River;

H. R. 529. An act creating an additional land district in the State of California, and for other purposes;

H. R. 755. An act to incorporate the Boy Scouts of America, and for other purposes;

H. R. 2744. An act to correct title to certain lands in Colorado;

H. R. 3794. An act for the relief of Thomas S. Johnson;

H. R. 4297. An act for the relief of Frances L. Llewellyn;

H. R. 6651. An act providing for the payment for certain services arising under the Navy Department;

H. R. 7804. An act to authorize the issuance of patent to Oscar R. Howard, and for other purposes;

H. R. 7817. An act to validate the homestead entry of George S. Clark;

H. R. 12835. An act to authorize and empower officers and enlisted men of the Navy and Marine Corps to serve under the Government of the Republic of Haiti, and for other purposes;

H. R. 13064. An act for the relief of the M. A. Sweeney Shipyards & Foundry Co.;

H. R. 13112. An act to amend section 14 of the seamen's act of March 4, 1915;

H. R. 13474. An act to amend section 6 of an act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes, approved March 14, 1900, as amended by the act of March 2, 1911;

H. R. 13765. An act to amend section 73 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, and for other purposes;

H. R. 14864. An act to alter, and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from the Central Pacific Railroad, in California, to Portland, in Oregon," approved July 25, 1866, as amended by the acts of 1868 and 1869, and to alter and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from Portland to Astoria and McMinnville, in the State of Oregon," approved May 4, 1870, and for other purposes;

H. R. 15005. An act to appropriate $200,000 for training the Organized Militia or National Guard of any State, Territory, or of the District of Columbia; and

H. J. Res. 214. Joint resolution increasing the number of sheets of customs stamps and of checks, drafts, and miscellaneous work to be executed by the Bureau of Engraving and Printing during the fiscal year 1916.

PETITIONS AND MEMORIALS.

The PRESIDING OFFICER presented a petition from the Chamber of Commerce of Washington, D. C., praying for the erection of a modern municipal hospital building on the site of the Washington Asylum Hospital and remonstrating against its proposed erection at the corner of Fourteenth and Upshur Streets NW., Washington, D. C., which was referred to the Committee on the District of Columbia.

Mr. SHEPPARD presented petitions of sundry citizens of Galveston, Houston, and Tyler, all in the State of Texas, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. SHAFROTH presented a memorial of sundry citizens of Denver, Colo., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

Mr. CHAMBERLAIN presented a petition of sundry citizens of Bellefontaine, Oreg., praying for Federal censorship of motion pictures, which was referred to the Committee on Education and Labor.

Mr. LANE. I present a resolution unanimously adopted at a mass meeting in the capitol building at Salem, Oreg., which I ask may be printed in the RECORD.

There being no objection, the resolution was ordered to lie on the table and to be printed in the RECORD, as follows:

Resolution unanimously passed at a mass meeting in the capitol, Salem, Oreg., by about 400 citizens.

Be it resolved, That the men and women voters at this meeting in the capitol, Salem, Oreg., on April 29, 1916, do protest at the action of the Judiciary Committee of the Sixty-fourth Congress in preventing the Susan B. Anthony amendment enfranchising women from being voted upon by the Representatives of the people on the floor of the House, and do also protest against the inconsistent attitude of the party in power—the Democratic Party—in withholding the right of full citizenship from half the people—the women—and further request that this resolution be forwarded to the President of the United States, the Speaker of the House, members of the House Judiciary Committee, and to our Oregon delegation, requesting that it be read into the CONGRESSIONAL RECORD by Senator LANE and by Congressman HAWLEY.

FLORENCE B. CARTWRIGHT,
Chairman.

Mr. VARDAMAN. I have received a letter from W. B. Watkins, president of the Aberdeen National Bank, of Aberdeen, Miss., with reference to the bill (S. 6001) to amend section 19 of the Federal reserve law, relating to reserves, which is now in the Committee on Banking and Currency. I do not ask that the communication be read, but that it be printed in the RECORD and referred to the Committee on Banking and Currency.

There being no objection, the communication was referred to the Committee on Banking and Currency and ordered to be printed in the RECORD, as follows:

THE ABERDEEN NATIONAL BANK,
Aberdeen, Miss., May 27, 1916.

Hon. JAMES K. VARDAMAN,
Washington, D. C.

DEAR SIR: We are addressing you in the interest of Senate bill 6001, now in the hands of the Committee on Banking and Currency.

We respectfully urge your support of this bill. We are satisfied with the 12 per cent reserve requirement in the law for cities outside of reserve and central reserve cities, and do not object to its distribution as follows:

Four-twelfths in vault after 36 months from its passage in 1913, five-twelfths with Federal reserve bank in its district, and three-twelfths with a member bank in reserve and central reserve cities.

But we do object to the requirement that the balance of our reserve fund shall be kept in the vault or with the Federal reserve, or both, where we will receive no interest on daily balances.

Twelve per cent is a very small proportion of the reserve maintained by banks, and to be forced to keep the excess—averaging around 40 per cent more than the law requires—where it will be idle so far as producing revenue, viz, "in the vault and with Federal reserve bank," is quite unnecessary and unreasonable.

We prefer that it be left optional as to where this extra reserve be kept, provided it shall be kept (as amendment provides) within a radius of 300 miles or with solvent member banks approved by the Comptroller of the Currency, where we may receive interest on the daily balance.

Very respectfully, W. B. WATKINS, *President.*

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. VARDAMAN:

A bill (S. 6304) for the relief of the widow and heirs at law of George H. White, deceased; to the Committee on Naval Affairs.

By Mr. BECKHAM:

A bill (S. 6305) granting a pension to Arabella G. Walker; to the Committee on Pensions.

By Mr. JONES:

A bill (S. 6306) to assess benefits for the opening, extension, widening, and straightening of alleys and minor streets in the District of Columbia; to the Committee on the District of Columbia.

By Mr. CUMMINS:

A bill (S. 6307) granting an increase of pension to Jasper Trimble (with accompanying papers); to the Committee on Pensions.

By Mr. ASHURST:

A bill (S. 6308) to authorize the Secretary of the Interior to lease for production of oil and gas ceded lands of the Shoshone or Wind River Indian Reservation in the State of Wyoming; and

A bill (S. 6309) to authorize mining for metalliferous minerals on Indian reservations in the State of Arizona; to the Committee on Indian Affairs.

A bill (S. 6310) granting a pension to Andrew Bird; to the Committee on Pensions.

By Mr. NORRIS (for Mr. TAGGART):

A bill (S. 6311) granting an increase of pension to Jacob H. Vinson;

A bill (S. 6312) granting an increase of pension to Jane A. Caldwell;

A bill (S. 6313) granting an increase of pension to William C. McLaughlin;

A bill (S. 6314) granting an increase of pension to Jesse L. Vick;

A bill (S. 6315) granting an increase of pension to Frank Schaffer;

A bill (S. 6316) granting an increase of pension to Luke Tuttle (with accompanying papers);

A bill (S. 6317) granting an increase of pension to Venila Simpson;

A bill (S. 6318) granting an increase of pension to Mary E. Herron (with accompanying papers);

A bill (S. 6319) granting an increase of pension to James Pickett;

A bill (S. 6320) granting a pension to Tabitha Lewis; and

A bill (S. 6321) granting an increase of pension to James Duke; to the Committee on Pensions.

By Mr. GORE:

A bill (S. 6322) to remove the charge of desertion against Allen Ellsworth; to the Committee on Military Affairs.

A bill (S. 6323) granting a pension to Andrew J. Heatley; and

A bill (S. 6324) granting a pension to Jesse Watkins; to the Committee on Pensions.

By Mr. HITCHCOCK (for Mr. JOHNSON of Maine):

A bill (S. 6325) granting an increase of pension to Loren E. Steward (with accompanying papers);

A bill (S. 6326) granting an increase of pension to Daniel W. Smith (with accompanying papers);

A bill (S. 6327) granting an increase of pension to Owen Stacy (with accompanying papers);

A bill (S. 6328) granting an increase of pension to Mary A. Hanson (with accompanying papers); and

A bill (S. 6329) granting an increase of pension to George L. Merrill (with accompanying papers); to the Committee on Pensions.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. FLETCHER submitted an amendment proposing to appropriate $10,000 for the investigation of the disease known as Phoma Rot and other diseases prevalent in and affecting the tomato crop in the State of Florida, intended to be proposed by him to the Agricultural appropriation bill (H. R. 12717), which was ordered to lie on the table and be printed.

Mr. CUMMINS submitted an amendment proposing to appropriate $650 to grade Woodridge Street from Twenty-fourth to Thayer Streets NE., Washington, D. C., intended to be proposed by him to the District of Columbia appropriation bill (H. R. 15774), which was ordered to be printed and, with the accompanying paper, referred to the Committee on Appropriations.

VOCATIONAL EDUCATION.

Mr. SMITH of Georgia. Mr. President, I have here resolutions passed by the Western Drawing and Manual Training Association in convention assembled in the city of Grand Rapids, Mich., expressing their approval of the bill now pending before the Senate providing Federal aid to vocational education.

I have also similar action by the Master House Painters and Decorators' Association, of Philadelphia, Pa. I ask that the action of each of these organizations may be printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

WESTERN DRAWING AND MANUAL TRAINING ASSOCIATION.
A resolution on the Smith-Hughes bill.

Whereas we need a system of education which will not only preserve our own ideals as a people and advance learning and culture but bring greater efficiency in all the work of this busy Nation. Particularly do we need more brains, better taste, and greater skill in

all the productive callings of field, shop, and mine; we need nation-wide training in the agricultural and the mechanic arts to preserve and conserve our national resources; to minister to our rising standards of comfort and taste; and to gain the social wealth whereby we may do more and better things for the happiness and the conservation of our people. We need vocational education in these arts to give countless millions in the days to come their way out to efficiency and happiness; to make the Nation economically independent; to equip her for commercial supremacy in markets both at home and beyond the sea; to prepare her with the resources wherewith she may meet every problem that may perplex or threaten at home or abroad. We need to begin now a program for a nation-wide system of vocational education; the problem is too large and the issues at stake too great for delay; we need the help of the National Government, because it is the Nation's welfare that is at stake and because Federal aid is necessary to stimulate and give prestige to the movement, and to supplement, with the larger resources of the National Government, the efforts of States and local communities: Be it therefore

Resolved, That the Western Drawing and Manual Training Association in convention assembled in the city of Grand Rapids, Mich., on the 5th day of May, 1916, unanimously indorse the spirit and the purpose of the report of the National Commission on Federal Aid to Industrial Education and of the Smith-Hughes bill now pending before Congress, and ask that in view of the overwhelming sentiment of the country in its favor by all classes of our people that this bill be passed at this session, and that a copy of this resolution be sent to the President of the United States, the chairman of the House Committee on Education, and the chairman of the Senate Committee on Education and Labor.

C. T. COTTER, *Chairman*,
MARTHA PIERCE,
FLORENCE H. FITCH,
Resolution Committee.

—

MASTER HOUSE PAINTERS' AND DECORATORS' ASSOCIATION OF PHILADELPHIA,
Philadelphia, Pa., May 9, 1916.

Senator HOKE SMITH,
United States Senate.

DEAR SIR: At a very largely attended meeting of the Master Painters' and Decorators' Association of Philadelphia it was unanimously passed that we should petition you to ask for the passage of the vocational training and guiding education bill now before the Senate and House of Congress.

It was further resolved that we should urge the appointmant on the commission of men who are engaged in the industries of the Nation as the only fitting men to meet the conditions and remedy the defects existing in our present industrial requirements, the Commissioner of Education to be one of the committee.

Respectfully submitted.

J. CLIFFORD WILSON, *President.*
ROBERT BOYD, *Secretary.*

COMPULSORY OBSERVANCE OF SUNDAY.

Mr. SMITH of Georgia. Mr. President, I have been requested to present to the Senate a memorial from the Seventh-day Adventists of Georgia. It gives me pleasure to comply with their request, although in doing so I wish to say that I do not agree with the conclusions reached in the memorial. I believe that a day should be recognized by the Nation and by the States as one to be set apart for religious service and for the cessation of ordinary labor. I agree, also, with the great body of the American people, that Sunday should be the day so recognized. I would not, however, deprive anyone of a hearing on this subject, and I ask that the memorial be printed in the RECORD.

There being no objection, the memorial was ordered to lie on the table and to be printed in the RECORD, as follows:

A Memorial.

To the honorable the Senate and House of Representatives of the United States:

The ministers and lay delegates of the Seventh-day Adventist denomination of the Georgia Conference, assembled in annual convention at Fairburn, Ga., on May 24, 1916, beg leave to address the following memorial to you concerning certain un-American bills now pending before Congress:

As citizens of the United States, who have the general welfare of the Nation at heart, we are exceedingly jealous that the fundamental principles of civil and religious liberty guaranteed to each individual by the Federal Constitution be not jeopardized and overriden by the enactment of statutes which are in direct opposition to these sacred guaranties and immunities.

Three press bills—H. R. 491, H. R. 6468, and H. R. 13778—are now pending before Congress which, if enacted into law, would create a one-man censorship of the press and might result in the complete destruction of the freedom of the press, without recourse to our courts.

Four religious measures are also pending, viz, S. 645, S. 5677, S. J. Res. 42, and H. R. 652, which, if enacted, would commit Congress to the subject of religious legislation, would establish the Christian religion and some of its religious institutions as the legal religion of the Government, and would penalize every dissenter and nonconformist because of his faith and practice.

We regret that Congress has ever been asked to legislate in favor of a religious institution concerning which there is so divergent a religious sentiment as the Sunday and Sabbath questions. We are in harmony with the following sentiments expressed in the Senate report on Sunday mails, by Mr. Richard Johnson, of Kentucky, who was chairman of the Senate Committee on the Post Office and Post Roads, January 19, 1829:

"The proper object of government is to protect all persons in the enjoyment of their religious as well as civil rights, and not to determine for any whether they shall esteem one day above another or esteem all days alike holy. * * * It is not the legitimate province of the legislature to determine what religion is true or what false. Our Government is a civil and not a religious institution. Our Constitution recognizes in every person the right to choose his own religion and to enjoy it freely without molestation. * * *

"Among all the religious persecutions with which almost every page of modern history is stained no victim ever suffered but for the violation of what government denominated the law of God. To prevent a similar train of evils in this country, the Constitution has wisely withheld from our Government the power of defining the divine law. * * * If the principle is once established that religion or religous observances shall be interwoven with our legislative acts, we must pursue it to its ultimatum."

We believe that the Sabbath ought to be observed with piety and due respect to God, but we do not believe that any man should be compelled to observe Sunday or any other day as long as he is a free moral creature and has the liberty to be religious or nonreligious by choice. Enforced religion can only engender hypocrisy instead of true piety. It makes slaves out of free men. Congress has no more right to prohibit legitimate and honorable business on Sunday because the church demands it than it has to prohibit church services on show day because the show demands it.

We believe that Sunday laws are not only un-American but un-Christian. Neither Christ nor His apostles sought at any time to enforce their teachings by the force of civil statutes and penalties.

We, as Seventh-day Adventists, feel that we have a just reason to remonstrate against these compulsory Sunday bills. The enactment into law of Sunday legislation has subjected many of our members to hardships and cruel persecutions. A revival of the Sunday blue laws always opens the way for religious bigotry to stir the smoldering embers of persecution, and it is impossible to set a bound beyond the limits which it dare not go.

We therefore ask your honorable body to refrain from any course which may lead again to the persecution of individuals or sects who have the divine and constitutional right to differ on points of religious dogmas and to enjoy the free exercise of their religious functions in such a manner and at such a time as they may choose, provided the exercise of that choice respects the same and equal rights of their neighbors.

And we, your memorialists, beg leave to assure you that we are kindly disposed to support the Government of our country and to maintain a due submission to the lawful exercise of its authority in purely civil matters.

Signed by order of the convention.

N. V. WILLESS, *President.*
J. K. MACMILLAN, *Secretary.*

ADDRESSES BY SENATOR ASHURST.

Mr. ASHURST. Mr. President, I ask unanimous consent to include in the RECORD a copy of certain addresses delivered by myself last year.

The PRESIDING OFFICER. Such will be the order, in the absence of objection.

The addresses referred to are as follows:

ADDRESS OF SENATOR HENRY F. ASHURST, OF ARIZONA, AT THE EIGHTEENTH ANNUAL CONVENTION OF THE AMERICAN NATIONAL LIVE STOCK ASSOCIATION, AT SAN FRANCISCO, CAL., WEDNESDAY, MARCH 24, 1915.

"Mr. ASHURST. Mr. President, members and delegates of the American National Live Stock Association, I am a Member of a body of men—the Senate of the United States—who are supposed to and frequently do talk for hours upon one subject without any hesitation, preparation, manuscript, reflection, or remorse; but in addressing a body of producers a speaker does not feel justified in coming before them to deliver an address upon the essence and life of their business without some preparation. So I made some notes. Former Vice President Fairbanks said in a speech the other evening, "He had a few stray thoughts." It was in my mind on that occasion to suggest to Mr. Fairbanks that he ought to have "roped" and "branded" those "strays" before they got away. I have taken precaution and have "roped" and "branded" and put down before they got away the stray thoughts that came into my mind during the past hour.

"I had planned to reach Arizona by the 20th of this month, but the invitation extended to me to remain here caused me to reflect that it was a part of my duty to stay, not only for the pleasure that I might derive in meeting you here in this city but for the higher and nobler purpose of absorbing the ideas which you delegates shall communicate to one another. So I remained in order also that I might be here to receive such instructions as this honorable body may see fit to make to a United States Senator, who is your public servant.

"Twenty years have passed, and passed forever, since I gave up the range, the saddle, and the bridle for the more precarious occupation of practicing law. I am pleased to see so many of my old cowboy friends here—not all wealthy, but all at least in a position of affluence and independence. I do not envy them; I am glad and proud of their success, and I can testify to the fact that the success which has come to the Arizona stockmen has not come by chance or mere good luck; but every dollar which you have and every cow which you own to-day has come to you because of your perseverance, your hard labor, and your rigid economy. Let me say further to the American National Live Stock Association and to the Wool Growers' Association—in fact, it would apply to all businesses—that whatever success you have achieved or expect to achieve will not come through any law—because a law can not make a man rich; it will only assist him in the protection of the property which his industry helps him to acquire—but the success you achieve will be because of your thinking correctly regarding your business; it will come because of your rigid economy and your persistent labor. In no other way will success come to you.

"I realize this morning that I am talking to ladies and gentlemen who are disciples of effort, who are apostles of industry. The life of a man engaged in the live-stock business is not an easy, indolent life. There can be no drones in the great hive of the live-stock industry, because the exacting law of compensation will drive out the idle and the indolent. The live-stock industry requires men who are continually face to face with the stern realities of this life and its duties. The life of the 'cowman' is not, as some novelists would have us believe, simply the drifting down a sunlit and flower-bordered stream, but it is a life of persistent labor; the stock business requires men of iron will, of lion courage, and of sustained effort. You are men who look difficulties squarely in the face and hypnotize those difficulties. The live-stock industry, in a large degree, requires men who can think accurately and whose processes of thought bring results. Now, frequently we hear of this man and that man being a speaker. It is very fine; we all have an ambition to be speakers. It is a rare thing to hear a real public speaker, but it is a still rarer thing to see a great thinker. Do you know that one of the most difficult things in this world is to sit down for five minutes and think continuously on any one subject? When we attempt to think continuously we find that, in spite of ourselves, things other than our subject will come into our minds and will filter into our processes of reflection. Now, that which will bring success to you is not being skilled in the art of speaking, but being skilled in the art of accurate thinking. The great thinker is the one who succeeds most frequently, not the great speaker. I would rather be able to think accurately and keep still in one language than to talk in twelve.

"I had the pleasure to be present last night at the sumptuous banquet which was tendered by the cattlemen of this State to the American National Live Stock Association, and if you will pardon me I will repeat what I said last evening—that in order to maintain our supremacy among the nations of the world, in order to maintain this foremost position which we have achieved as the most puissant nation of the earth—in fact, the leader of all nations of the earth—we should carefully see that we have an abundant supply of meat foods, especially beef and mutton; and while, of course, the other flesh foods and the fish and plant foods are all extremely important, nevertheless, if there be one food more necessary than another it is the beef food. Let scientific men explain it if they may, I will only state the conclusion which those of an investigating turn of mind have reached, and that is that the protoplasmic cells which go to make up beef meat are very nourishing to the human body. So, I repeat, in order to maintain our place as the leader of the nations of the earth, we must have an adequate supply of beef, and that beef must be raised in our own country. It must be grown upon our own ranges.

"On the 2d of April this year the population of the United States of America will be 100,000,000 people. We are increasing in population at an enormously rapid pace, and during the past decade our production of beef cattle has not kept pace with the proportion of our population, although in the year just closed there was slight increase in the production of cattle, I believe, over 1913. So it is wise that the American National Live Stock Association is formed. It is money in your pocket, it is success to your business, that you are here to see and learn and study these great problems and learn how to improve the carrying capacity of your ranges; learn how—but you will learn it elsewhere than here, although you will get much valuable information here—you can cause two 'critters'—two cows, two beef animals—to subsist where only one subsisted before.

"A large number of intricate and delicate questions arise the moment we attempt to discuss the methods as to how to improve the carrying capacities of the ranges. I am not going to detain you long, as it is now past the lunch hour, and you have had numerous excellent speeches; hence I will take but little of your time.

"Your efforts to increase the carrying capacity of your ranges are in the right direction. I was especially glad that Congress immediately passed the act appropriating a sufficient sum of money temporarily to cope with the foot-and-mouth disease, and a sum of money sufficient to enable the Agricultural Department in some measure to exterminate the predatory animals that have been destroying your herds, and the Cummins bill, signed by the President during the closing hours of the Sixty-third Congress. Our Government, I believe, should carefully guard the matter of the inspection of all food products that come into our country, and, as was well pointed out by your distinguished president, Mr. Jastro, the greatest care, the most rigid inspection, should be had with respect to the importations of wool and hides, beef and mutton, and all the food products. I hope that Congress will, and I know that it should at once, give attention to the matter of inspections. Moreover, our Government, in my opinion, should not be satisfied merely with the inspection made in a foreign country. We should reserve the right, and exercise it, of making our own inspections of these meat foods at our own customhouses or other appropriate places established by the Government.

"A very historical Congress closed on the 4th of this March. It honestly tried to take care of some of the rights of the consumers. I want to repeat what I said last night, that I hope the succeeding Congresses will attend to the equally important duty of seeing to it that the producers of this country, who are going to feed the consumers, shall have their rights taken care of and conserved.

"I was gratified and instructed to hear the able address of your president, Mr. Jastro. It was a profound address; it evidenced the fact that your distinguished president was a close thinker and a great reasoner. I made some fugitive notes regarding his speech as he proceeded. He said, among other things:

"'This war has demonstrated how interwoven is the international commercial fabric, and how every civilized nation is, in a greater or less degree, dependent on the supplies, the markets, and the credit of other countries.'

"How true the statement, for the war has demonstrated that great truth. Just reflect for a moment that on the 1st day of August, 1914, we had bumper crops—the largest wheat crop we ever had, the largest cotton crop by nearly a half million bales, our mines producing copper to a degree almost unprecedented; yet suddenly, like a flash of lighting, the devastating scourge of war swept over half the civilized world, and with our abundant cotton crop, our enormous wheat crop, we could not get a market, and our produce was rotting at the wharves. We had nothing with which to bring our gold home. Every year tourists from the United States to continental Europe and to the United Kingdom took $250,000,000 of American gold abroad; and for years our cotton, our wheat, and our copper have brought the gold home in the fall, just as the tourists took it abroad in the summer. There was $400,000,000 of our gold abroad when the war broke out. We could not get our copper, cotton, or beef marketed. The situation demonstrated how interwoven is our international commercial fabric, and how every civilized nation is, in a greater or less degree, dependent on the supplies, the markets, and the credit of other countries.

"President Jastro also said:

"'Temporarily we may increase our exports, but in the end we must buy from other countries approximately as much as we sell abroad, in order to maintain a proper trade equilibrium.'

"That is absolutely true. We must in the end, in some way, buy from other countries as much as we sell in order to maintain our trade equilibrium. So it would seem to me to be the duty of Congress, of this association, and of kindred associations, to see to it that every legitimate and proper effort shall be exercised so that markets for American products may be secured in the nations to the south of us, in the nations in the Orient, in continental Europe, and in the United Kingdom. It will be recalled that the lamented President McKinley, in the last speech he ever delivered, said almost the same thing which has been repeated by Mr. Jastro to-day. You remember Mr. McKinley's speech contained a sentence like this:

"'We, as a Nation, need not suffer under the delusion that we shall always be able to sell, but never required to buy.'

"He made the point that there must be some reciprocity among nations in a commercial way, just as there is among individuals. No individual lives unto himself, and no nation lives unto itself.

"Now I approach the question of your grazing and your lease law. I know that this association for many years has been in favor of the lease system. At first, so far as I am able to understand, not much headway was made regarding obtaining favorable expressions for such bill, but in more recent years large numbers of persons have been converted to the lease system. Frankness and plainness of speech I always use, and that is what you wish; so I will say that I believe you are correct in advocating the 640-acre grazing homestead law, for this reason: It is a good law. That is reason enough. But in politics and in legislation a man is sometimes like a man on roller skates; whenever you want to get a bill through Congress, whenever you want to get a bill passed, you go partly where you would like to go and partly where the skates take you. Now, then, a great many of the small owners are not converted to your proposition for a lease system. The small stock owners seem to pin their faith to, and seem to favor, the 640-acre or 1,280-acre grazing homestead law. Therefore I believe you are right; I believe you are adopting the psychology of the situation in helping your lease bill by honestly, openly, and bravely advocating the passage of the 640-acre or 1,280-acre homestead law. It has been said

that there are approximately 350,000,000 acres of unappropriated public land. Some authorities think only 20,000,000 acres would ever be brought under the 640-acre homestead law; some think only 10,000,000; some think as high as 50,000,000 acres; but whatever the proportion may be that could be utilized under the 640-acre grazing homestead law, it is a wise thing, in my judgment, for this association to indorse that bill and help pass it through Congress as a supplement to the lease law. For, I repeat, the small owner believes he will get more adequate protection in the 640-acre grazing homestead than under the lease law.

"This constitutes about all I have to say. I had no prepared speech; I assumed you did not want it. Others, who are more closely in touch with the live-stock industry, have reported to you in their official capacity the progress made in the last year.

"You may not, as an organization or as an association, believe that you secured from Congress every measure of relief to which you think you are entitled. That, of course, is your opinion; you are entitled to it. I myself feel that some bills which ought to have been passed were not; but, with 30,000 bills pending in Congress, it is a most difficult thing to pass even one, because our country is so vast. It is one great Republic made up of 48 little republics, with their ever-present propositions of State and National sovereignty; and what seemingly might be good for one State the others might not approve.

"I had the honor to attend your ninth annual convention in Denver in 1906. I note immense progress since that time. I had, in Denver, the pleasure of hearing Mr. Cowan, your able attorney, deliver a great speech. Since that occasion, and looking back over the course of the years that have glided away since your meeting in Denver in 1906, I see many reforms that have come to you—much good individually and as an association; although you, being so near to it, might not be able to appreciate it as fully as some one who is not a member of the association.

"As I said last night, you sent, and so did the National Wool Growers' Association, a dignified body of gentlemen to come before Congress; and even if they failed to secure the legislation they wanted, they conducted themselves as gentlemen. They won the esteem if not the votes of the Members of the Congress of the United States. Wishing you the full measure of success which one old "cow hand" may wish other people, I thank you for your attention."

—

EXTRACT FROM ADDRESS OF SENATOR ASHURST, OF ARIZONA, AT THE DEDICATION OF THE GRANITE CREEK RESERVOIR, PRESCOTT, ARIZ., APRIL 8, 1916.

"* * * Of all the States in our American Union, Arizona is one of the most interesting. No State offers more tempting allurements to investors or fairer fields to endeavor than does Arizona.

"Are you interested in romance? If so, read the history of Arizona. Do you love the artistic? If so, here you will find landscapes whose beauties can not be imprisoned on any canvas. You will find here the rich imagery of the desert, the storm-riven crags, the rolling prairie, and the evergreen forests which winter's inclement winds do not dismantle.

"Would you think in the raptures of poetry? Here is a sun which, like a disk of burnished gold, sends down its shafts of light with indescribable beauty. Here are the silver stars, the seasons that bring variety, and all the fruits and flowers.

"Are you fevered by ambition? Ah, here is the forum where you may render valuable services to a State, gain the esteem of a sturdy people, and hear the bugle call of fame.

"Would you be interested in stock raising? Then journey no farther, for here we grow the wool and hides which clothe a nation and the beef and mutton which must feed a powerful race.

"Do you name hydroelectric power? Here are creeks, rivers, and strategic points where can be generated sufficient hydroelectric power to turn millions of wheels and spindles and run all the trains necessary to carry the commerce of the Southwest.

"Are you seeking mineral wealth? Would you be interested in nature's alembic, where the base metals are transmuted into gold? Here is your new El Dorado. Remain, and shout Eureka! for into the hills and caverns of Arizona nature has poured more mineral wealth than Ophir had to burden the mighty fleets of Solomon.

"Do you seek health? Here is a dreamful tranquillity which soothes the throbbing nerves of pain; here is a bracing air whose wonder-working secrets redden the bloodless lip and paint the rose upon the invalid's pallid cheek.

"Would you follow that noble, that most independent of all occupations—agriculture? Would you become a producer as well as a consumer? Then consider our fields and valleys which, when given the living waters, produce all the vegetables, grains, melons, fruits, and flowers. In Arizona we have imprisoned tumbling waters that once rushed madly to the sea and have built irrigation projects so big and yet so simple that they appeal to all. Irrigation charms with its magic spell the patriotic imagination of the masses, and touches with its wizardry our self-interest, the heart of which throbs in the pocketbook. It kindles fires of unselfish sentiment, for it is poetical yet practical, exalted as an ideal, yet hard as iron in its common sense. The agricultural products of Arizona are the most varied of any State on the American continent. We produce the Egyptian date, the Egyptian long-staple cotton, the orange, the lime, the lemon, the Louisiana sugar cane, the Michigan sugar beet, the Canadian strawberry, the California cantaloupe, the Kalamazoo celery, and the French asparagus.

"And here in Arizona is a people who are disciples of industry, and therefore apostles of success—a people who know that independence, competence, and all livable conditions of life come, and come only, from constant striving and long-sustained effort; who know that from out of the infinite sea of the future there will never touch our beach and shoal of time a richer or more precious gift than liberty.

"Hail! the giant Commonwealth of Arizona. Her past is secure and proud, her present is radiant and pulsates with energy, and her future spreads a bright and balmy effulgence against the eastern sky."

—

SPEECH OF SENATOR ASHURST AT LAUNCHING OF THE U. S. S. "ARIZONA," JUNE 19, 1915, AT BROOKLYN NAVY YARD.

"Hon. Secretary of the Navy, ladies, and gentlemen, this is an occasion which quickens the heart of every American who loves his country and her institutions. With our Nation leading in commerce, wealth, enlightenment, and Christianity; with our Nation teaching the other powers of the earth lessons in true moral courage, justice, and magnanimity, and with our country setting the world an example in moderation, forbearance, and prudence, we to-day launch a mighty leviathan of the deep, whose mission it shall be to engulf any hostile craft that disturbs or threatens our American civilization.

"If the man who gives his family over to the dangers and vicissitudes of his neglect and indolence is deserving of censure and scorn, how much greater should be the contempt and censure for the public servant who, sworn to protect and defend his country, neglects his duty, evades his obligations, and exposes not only his family but his constituency—indeed, his entire nation—to the dangers of conquest, defeat, and degradation? To neglect one's liberty is to lose it; to neglect one's country is to perish with it.

"On the surface of the earth are 51,886,000 square miles of land, as compared with 145,054,000 square miles of water; hence it does not require a diagram to see that in all probability a large part of the commerce of the world will always be carried on this vast water area; while the wonders and transformations that have been wrought within the past 70 years in science, mechanics, electricity, transportation, and the hurling of projectiles make it manifest that the battles of the future will in large part take place on this water area.

"The Sixty-third Congress, with its unparalleled record of constructive legislation, acting under the leadership of the President of the United States and upon the report of the Secretary of the Navy, authorized the construction of additional dreadnaughts, destroyers, submarines, and other necessary craft; for, while it is easy and pleasing to indulge in self-deception, and thus evade the unwelcome thought of national defeat or degradation, it is neither wise, judicious, nor statesmanlike to do so. It is wiser and safer to be on guard and preclude all possibility of danger than to hide our fears of danger in the secret recesses of our closets.

"The world seems out of joint just now, and it is better for us to be 'sure than sorry.' In a day of trouble we can not instantaneously convert sleepy, fat self-assurance into national security. Men may be heroes, but unless they are drilled their heroism will end only in unavailing martyrdom. Our caverns and mountains are filled with copper and iron ore, but these can not instantly be metamorphosed into battleships. Preparation and vigilance only can work the necessary changes. Men do not ascend to eminence, strength, and power by a single leap or by growth overnight. It is only by steady tread that a man moves up the rough and rugged path to success. Those who reach eminence and distinction are they who subject their lives to the fires of intellectual and physical endeavor. Success and efficiency come only after many years of anxious striving and long-sustained effort. So it is with a nation. It holds its place and preserves its liberty only by never becoming careless and by never despising nor underrating an opponent. Ever since the days of the children of Noah men have sought to build

them a tower which they might ascend and thus escape the hardships of this world. But such can not be; under nature's harsh yet profound laws we must meet and overcome dangers and perform duties; we can not build a tower lofty enough to take us above and beyond the trials and duties of this life.

"So, in consideration of these truths, Congress saw the need for a healthy and steady growth of our Navy, and we to-day launch one of the superdreadnaughts ordered by the Sixty-third Congress.

"It is well that she should be named the *Arizona*. The Secretary of the Navy showed a true appreciation of the history of that State when he named this ship the *Arizona*.

"In every walk of life, in war and in peace, Arizona's people have proved themselves to be—

"Zealous, yet modest; innocent, tho' free;
Patient of toil, serene amidst alarms,
Inflexible in faith, invincible in arms.

"She is a land where, in the bracing air of toil and temperance, her people tirelessly labor for the public good. Her people resolutely see to it that all the ends which they attempt to achieve shall be for the cause of their country and the cause of truth, and neither ambition's bugle call nor fame's alluring smile nor the piling up of gold can induce them to abate one jot or tittle from the path of rectitude which makes nations truly great.

"Under these favorable auspices we launch this ship; we send her forth as an additional guaranty that America may possess her soul in peace; we send her forth as an additional guaranty that, though the passions in other lands may hurl reason from her throne, nothing shall deter America from her course of wisdom and justice; we send her forth to guard a people who demand justice, not ignoble revenge, and who show strength of heart in steadfast self-control.

"We send her forth with the proud consciousness that when the storm king gathers his clouds, obscures the fickle moon, opens the mysterious caverns where his hurricanes and tornadoes are imprisoned, and loosens furies to ride on the wings of the wind, flouting the wild and wasteful ocean with tempestuous and angry waves, she will cleave atwain the tumbling billows and send her serene and effulgent rays out upon the deadly waters, lending help, hope, and encouragement to every friendly ship. We send her forth with the calm assurance that if some hostile craft should assail these shores and attempt to subvert or destroy this Nation, where—under the providence of God—a people consecrated to liberty dwell under a peaceful and happy sky, the plume of smoke from the *Arizona* may be backward blown, but all else about her will be bounding forward, and with our astral banner held high aloft she will repel the invader and keep our Nation more powerful than ever for good in the affairs of men."

EXTRACT FROM AN ADDRESS OF SENATOR HENRY F. ASHURST, OF ARIZONA, ENTITLED "A LESSON OF LIFE," TO THE STUDENTS OF THE HIGH SCHOOL AT NEW LEXINGTON, OHIO, NOVEMBER 24, 1915.

"Teach me the power of truth and courage. Teach me that no man can be 'downed' who is in the right and 'keeps coming.' Teach me that a dollar honestly earned is a friend that will never ask me for an office; teach me to plug my ears with the cotton of prudence and common sense against the voice of the stock ticker; teach me that the man who wastes his time wastes his life, for life is made up of time. Give me the fortitude to endure the thrusts I can not parry. Deafen me to the jingle of tainted money. Teach me that I will never regret not eating more nor saying more; teach me to rid my room and office of trash and my brain of slosh; teach me to be accurate in all things, whether serious, humorous, or fantastic.

"Teach me that all success and every livable condition of life come only from constant endeavor and long-sustained effort; teach me that to succeed I must subject myself to the fierce fires of intellectual and physical endeavor; that I must walk while others ride; and that, like 'Cascarets,' I must work while others sleep.

"Teach me to pay all my debts, moral, social, and financial; teach me to return something good to this world for the food, raiment, and shelter it gives me. Teach me never to lack sympathy with the poor. Teach me that happiness, wisdom, and success come from within, not from without. Teach me that no statute can be enacted that will give discernment to the fool, wealth to the improvident, or wisdom to the man who will not think. Teach me that a firm faith is the best theology. Teach me to live by day so that I can sleep by night, and when I have been taught all these things, then will my heart not be troubled when the grand jury meets, then will the sheriff be confounded, then will my way be pleasant and I will know the symmetry, the beauty, the zest, and use of life; then will I fear no man and shall live a broad life, possibly a long one, but, be it brief or long, I shall be guided by a 'brilliant star shinning from the inmost veil of Heaven, beckoning to the abodes where the eternal are.'"

OSAGE INDIAN OIL LANDS.

Mr. LANE. Mr. President, I desire to present a communication addressed to me by some Osage Indians in regard to the disposal of their oil lands. They are not satisfied with the manner in which their oil lands have been disposed of, and they have the right, in my opinion, to voice their dissent to a transaction with which I myself am not entirely in harmony, so far as that is concerned. I ask that the communication may be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The communication referred to is as follows:

WASHINGTON, D. C., *May 19, 1916.*

Hon. HARRY LANE,
United States Senator from Oregon,
United States Senate, Washington, D. C.

SIR: We, the undersigned, respectfully represent that the Department of the Interior, together with four members out of the eight members of the Osage tribal council, have agreed to and have granted oil leases to divers persons on about 235,000 acres of Osage oil lands, and which is a part of the 680,000 acres embraced within what is known as the Foster leases and which expired on March 16, 1916. The said area is about 235,000 acres, 70,000 acres of which is developed and producing territory, and has a vast leasing value. The remaining 165,000 acres is at this time undeveloped, but it, too, has a vast leasing value. The leasing values referred to as to both the producing and undeveloped areas mentioned has a value in excess of one-sixth royalty, and while the exact amount of such value can not be estimated it is known to be of great value.

We further represent that the duty is imposed upon the honorable Secretary of the Interior and the Osage tribal council to do all within their power to secure to the Osages the greatest possible values for the mineral lands in question, and we complain that the granting of the area referred to, to the divers lessees referred to without other consideration than the royalties and rentals provided for, was an improvident and excessive abuse of the powers granted and was a dismal failure of the performance of the duty imposed, and that the granting of said area to the divers lessees referred to will result in the loss of many millions of dollars to the Osage Tribe of Indians.

We further represent that hearings have been had before the Senate Committee on Indian Affairs relative to different features of the leasing of Osage oil and gas lands and that the result of said hearings was that much confusion ensued and little or nothing was brought to bear upon the committee from the standpoint of the Osage Tribe of Indians, who were most directly and greatly affected by the action taken, or to be taken, by the Department of the Interior and the Osage tribal council.

We further represent that one safe and certain way of disposing of the area in question (i. e., 235,000 acres herein referred to) was to have put up the same under competitive bids to the highest bidder either upon a royalty basis, or a royalty and bonus basis, and had that plan been followed no one could have been heard to complain of the result, therefore, the injustice that has been done to the Osage Tribe of Indians has been the result of the failure to put these mineral lands up to the highest bidder under competitive bids and instead thereof to grant the area in divers tracts to divers lessees upon the meager royalty and rentals provided in the contracts. The said failure upon the part of the Department of the Interior is more striking when it is known and understood that the policy of letting Osage mineral lands only to the highest bidder has been in force for some time and no lease was ever granted on any other basis except in the instance of the original Foster lease, which was made 20 years ago. The Osage people have been, and are, a unit in favor of leasing their mineral lands to the highest bidder under a competitive-bid system, and we feel that a great wrong is being done to us by giving the lands referred to to the lessees referred to without any consideration whatsoever, other than the meager rentals and royalties provided in the contracts.

We respectfully represent that there can be no justification for the action of the Department of the Interior in permitting the leases referred to to be granted.

We respectfully represent that it is no justification for the Department of the Interior to say that four of the eight members of the Osage Tribal Council were in favor of making the grant, for the reason that Congress has imposed upon the Secretary of the Interior and his subordinate officials the duty, not only in law, but in strictest conscience, of preserving the property rights of tribal Indians, and it is the duty of said Interior Department to not permit the Osage Tribal Council to improvidently give away vast mineral wealth which is the property of the Osage Tribe of Indians.

We further represent that at the instance of a mass meeting of about 300 members of the Osage Tribe of Indians and intermarried citizens thereof we instituted a suit in the Supreme Court of the District of Columbia to enjoin the honorable Secretary of the Interior from approving the leases on the area referred to, and said suit was filed on the 24th day of April, 1916; that the injunction was denied, and that the Secretary of the Interior on the day following the denial of the injunction and the signing of the decree by the court, i. e., on the 16th day of May, 1916, the Secretary of the Interior hurriedly approved the leases and mailed the same out to the lessees to whom they were granted.

We further represent that it is an open question whether our suit will avail us even though we won in the court of final resort upon appeal; however that may be, we call your attention to the great hurry evinced by the Interior Department to get the leases after approval into the hands of the lessees and thus prevent action by the Congress of the United States in granting the Osage people such relief in the premises as they were justly entitled to.

We further represent that the Osage people have over 1,000,000 acres of land remaining that are yet unleased and are located in what is known as the "mid-continent oil field" and are supposedly rich in oil and gas, and we, therefore, make this appeal to you to bring the matter to the attention of the Congress of the United States that a great wrong has been done to us and that we be protected from similar injury in the future as to our remaining lands.

We fully understand how futile our efforts might be as compared to the great power of the Department of the Interior and the rich and powerful interests that have seemingly joined hands in defeating our wishes and desires in the premises herein referred to.

As a striking evidence of the methods employed by the rich and powerful oil interests referred to to gain their ends, we submit herewith as an accompanying paper a copy of an affidavit filed in the Supreme Court of the District of Columbia by James E. O'Neil, president of the Prairie Oil & Gas Co., a concern which is referred to in the records submitted to the Committee on Indian Affairs and which is to be found on page 255 of the hearings before the Senate Indian Committee as a sublessee whose address is at Independence, Kans., date of acceptance August 31, date received August 31. Here we have a sublessee, namely, the Prairie Oil & Gas Co., demanding that its leases be approved by the Secretary of the Interior, and saying to the court in which we were suing that if the court would prevent the Secretary from approving his leases together with others no oil would be run from the Osage field by the Prairie Oil & Gas Co., the sublessee before referred to. The Prairie Oil & Gas Co., as you will remember as shown at the hearings before your committee, is a subsidiary of the Standard Oil Co., as a sublessee saying to the court that if you prevent the Secretary from approving our leases and other leases we will not run oil from the Osage field.

Without going further into details of this matter, we feel that you are sufficiently acquainted with the seme to warrant us in making the request that by resolution, or otherwise, you provide for an investigation of this whole transaction in its minutest details to the end that some measure of justice may be done to us in reparation of the wrongs already done, and that the Department of the Interior in the future be not permitted to lease Osage mineral lands only under competitive bids to the highest bidders upon either a royalty, or a royalty and bonus basis.

We feel that the extraordinary spectacle of the giving away of 235,000 acres of our mineral lands to certain lessees without competition and without other consideration than meager royalties and rentals, calls for immediate and searching investigation, and justice to the Osage people dictates that the Department of the Interior in the future be not permitted to do the same with our remaining mineral lands.

We beg to say that in making this request of you, we do it upon our own behalf as members of the Osage Tribe of Indians, and also upon the behalf of the mass meeting of Osages and intermarried citizens above referred to, and on behalf of every member of the tribe who is directly interested in the matters herein complained of and the relief and protection sought.

Very respectfully,

FRANKLIN SHAW.
JOHN F. PALMER.

IN THE SUPREME COURT OF THE DISTRICT OF COLUMBIA—FRANKLIN SHAW ET AL. v. FRANKLIN K. LANE, SECRETARY OF THE INTERIOR. EQUITY No. 34279.

AFFIDAVIT OF JAMES E. O'NEIL.

I, James E. O'Neil, of Independence, Kans., on oath depose and say that I am president of the Prairie Oil & Gas Co., a corporation organized and existing under the laws of the State of Kansas, and engaged in doing business in the State of Oklahoma; that the business of said corporation includes in part the purchasing, producing, and sale of oil mined in said State of Oklahoma; that it operates within the Osage oil territory and purchases extensively from lessees engaged in mining oil in that field; that said corporation produces and purchases from operating lessees about 81 per cent of all the oil produced or mined in the Osage Nation (and that of these figures, its production amounts to only about 4 per cent); that he is informed of the existence of the above-entitled suit and understands its purpose and its existing status, i. e., that the court has rendered an opinion dismissing the bill, but has now under consideration a motion to stay the effect of decree dismissing the bill, pending appeal.

He further states that the said corporation has been purchasing and taking oil from former sublessees under the Foster lease, whose leases expired March 16, 1916, since said date under the temporary orders issued by the Secretary of the Interior, first for a month expiring April 16, 1916, and then for another month expiring May 16, 1916; that this arrangement was made in view of the fact that said lessees had in the course of preparation certain leases made under the resolution of the Osage Council of June 17, 1915, and the rules and regulations of the Secretary of August 26, 1915, which said leases, it was expected, would unquestionably be approved. Hence, as a temporary arrangement, to meet the emergency existing by the fact that the leases were not wholly completed and in form perfected, the corporation was willing for the short time involved to run and purchase the oil as aforesaid. But owing to the existence of this litigation and regarding it as doubtful if the Secretary has power to continue indefinitely or for any longer period the arrangement aforesaid, as he has been by his counsel advised, and having considered fully the uncertainty of title to the oil continued to be mined or attempted to be purchased in face of this litigation, the Prairie Oil & Gas Co. will be compelled to discontinue the running and purchasing of crude oil from properties within the Osage Nation under temporary order or permission from the Secretary of the Interior after midnight, May 16, 1916. In other words, if the Secretary is by order of the court prevented from approving the leases in controversy, the running and purchasing of said company in the Osage Nation must and will cease forthwith.

Affiant further states that he has been informed of the text of a certain proposed regulation presented for the Secretary's consideration, having in view an arrangement whereby the leases aforesaid might be conditionally approved, but he states that even if such regulation might receive the approval of the Secretary, that the attitude of his company would be the same; i. e., that said company would not feel justified, as a matter of prudence, and would not continue to purchase and take oil mined under leases thus conditionally approved.

JAMES E. O'NEIL.

Subscribed and sworn to this 16th day of May, 1916, before me.

[SEAL.] NEENAH LAMB,
Notary Public.

BID ON OIL LANDS OF OSAGE NATION.

C. K. Davis bid on the SW. ¼ sec. 1, T. 21, R. 7 E., one well producing 109 barrels per day, for which tract the Gypsy Co. at the recent sale bid only $50,000.

I have bid 52½ per cent royalty, guaranteeing to drill not less than nine wells two years from date of execution of lease to me. On present production same will net Osages $85.83 per day, or $31,327.95 per year, which is $21,381.70 more per year on present production than a one-sixth royalty. But I wish to call particular attention to the fact that this piece of property is not developed, and I am making a bid, offering a bond to guarantee development of same.

Nine more wells on this piece of property, making a total of ten wells (which is approximately one-third the number of wells drilled on 160 acres to develop it), granting those wells are no larger than the present well on this property (and I have reason for believing they will be much larger), will produce 1,090 barrels of oil per day. Fifty-two and one-half per cent of this oil at the present price of oil will net the Osages $885.88 per day, or $323,346.20 per year, and this is ⅓ acre less than one-third developed. On a one-sixth royalty the Osages would receive $102,200 per year, or $221,146 less per year. And this property has a cash bonus bid of $50,000. On this property the Government gaugers in November, 1915, report a production of 3,753.08 barrels, which is over 125 barrels per day. Their reports on same for the last of February and fore part of March this year are 109 barrels per day.

February being a cold month, it was impossible to get an accurate gauge on production. I learned at the lease from men in a position to know that this well is now doing 165 barrels per day. However, my figures are all compiled from Government reports on same.

I will also take, if permitted enough undeveloped acreage to make total acreage 4,800 acres, and develop same under departmental regulations at a royalty to the Osages of 52½ per cent.

Respectfully submitted.

C. K. DAVIS,
By R. R. BRADER.

THE MERCHANT MARINE.

Mr. MARTINE of New Jersey. Mr. President, I desire to offer and to have printed in the RECORD an editorial appearing in the Washington Post of some days ago entitled "The American merchant marine and governmental control of ocean rates." I do not ask that the editorial be read, but that it may be printed in the RECORD.

The PRESIDING OFFICER. Without objection, such will be the order.

The matter referred to is as follows:

THE AMERICAN MERCHANT MARINE AND GOVERNMENTAL CONTROL OF OCEAN RATES.

Eight dollars a ton for the railway freight on barley from San Francisco to Galveston may be a fair and reasonable rate; at least it should be, with National and State regulation of rates and with official commissions to see that the railway interests are fairly cared for and the public not exploited unfairly.

What the rate would be if it were not for the power given by legislation to the Interstate Commerce Commission and to the various State commissions no business man in the United States would attempt to state.

But with ocean transportation, unregulated by either National Government or by States, with the shipping combines of Europe reaching for the last copper of the shippers or the consumers, and private capital, after 50 years' talk of providing an American merchant marine, either in partnership with foreign combines or in operating agreements with them, or controlling few, very few vessels independent of these combines, we have to-day statements that $32 a ton is to be charged for transporting barley from Galveston to European ports.

And we have some legislators who still balk at governmental protection of the interests of American farmers, American miners, American manufacturers, the masses of the American people, and who are opposed to governmental control of rates in a governmental owned or governmental aided merchant marine.

Thirty-two dollars a ton ocean freight to western Europe on barley produced on the lands of the farmers of the United States makes it highly profitable for owners of vessels, for private capital invested in vessels, and, of course, they want no governmental owned merchant marine, no governmental control of rates, no governmental service for the producers and the shippers of the Republic.

The farmers who produce the barley, working early and late, through winter's cold and summer's heat, working in every season throughout the year to produce the grain crop for the market, do not receive per ton for the grain as much as the owners of the vessels which carry it on the two weeks' trip from Galveston to Europe.

And private capital has had 50 years to furnish an American merchant marine, and yet some Members of the Congress oppose the governmental establishment of a marine and are strongly against governmental control of ocean rates on freights carried by governmental owned or governmental controlled vessels.

The manufacturers of the United States and the miners of the United States will find themselves at great disadvantage if there is not created at once an American merchant marine, with governmental control of rates on ocean transportation.

It is not many years since governmental control of railway rates was established in the States and in the Nation.

Is there a business man in the United States who to-day would favor removal of the State and National control of railway rates?

Is there a Senator or Representative in Congress to-day who will go to his constituents and advocate the repeal of all legislation looking to such control and regulation of rates upon the railways of this country? If such control and regulation is injurious to the interests of the masses of the country, why not say so? If it is not injurious, if it is beneficial, why not give the people of the United States the benefits resultant from establishing control of rates on the American merchant marine, owned by the Government or aided by the Government, and, whether owned or aided, dependent upon the cash of the citizens of the United States.

PONCA TRIBE OF INDIANS.

Mr. HITCHCOCK. I desire to enter a motion at this time for a reconsideration of the vote by which on Saturday last the Senate passed the bill (S. 4251) to authorize the Ponca Tribe of Indians to appear in and be made parties to any suits filed in the Court of Claims by the Omaha Tribe. I merely enter the motion at this time because, on account of the absence of the Senator from Oklahoma [Mr. OWEN], it is proper to postpone the consideration of it until his return.

Mr. NORRIS. Mr. President, may I ask my colleague, in conection with the motion which he has entered, whether the bill has not been sent to the House; and if so, whether the motion to reconsider ought not to include a request for the House to return the bill to the Senate.

Mr. HITCHCOCK. That is a request which can be made by the Chair or by the Secretary, I presume, as the bill was passed at the last session of the Senate.

The PRESIDING OFFICER. The Chair thinks the Senator from Nebraska had better include the request in his motion.

Mr. HITCHCOCK. Then I will take the liberty, Mr. President, of including the request in the motion.

The PRESIDING OFFICER. That the House be requested to return the bill to the Senate?

Mr. HITCHCOCK. That the House be requested to return the bill to the Senate.

Mr. PAGE. Mr. President, may I inquire of the Senator from Nebraska if that is an Indian bill?

Mr. HITCHCOCK. It is a bill which proposes to grant to the Ponca Tribe of Indians the right to intervene in a proceeding in the Court of Claims which is practically concluded, and it would result in delaying the award which will undoubtedly be made to the Omaha Tribe of Indians.

Mr. PAGE. Is it a bill which has been considered by the Committee on Indian Affairs?

Mr. HITCHCOCK. Oh, yes; certainly. It was on the calendar and had been considered, but it had not been contested in any way. It was a matter which did not come to my knowledge until after the committee had reported the bill, and it was then brought to my knowledge by a delegation of Omaha Indians who visited this city, and who represented that the case had been pending in the court for years, had practically reached its conclusion, the testimony had been closed, and there was nothing remaining except the filing of briefs in the case, and that to permit the other Indians, who had really no equitable claim, to intervene in the case simply meant another long delay in giving the Omaha Indians what they were justly entitled to from the Government.

The PRESIDING OFFICER. The motion of the Senator from Nebraska will be entered.

LAWS OF PORTO RICO.

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying paper, referred to the Committee on Pacific Islands and Porto Rico:

To the Senate and House of Representatives:

As required by section 31 of the act of Congress approved April 12, 1900, entitled "An act temporarily to provide revenues and a civil government for Porto Rico, and for other purposes," I transmit herewith copies of the acts and resolutions enacted by the Eighth Legislative Assembly of Porto Rico during its second session (February 14 to April 13, 1916, inclusive).

These acts and resolutions have not previously been transmitted to Congress, and none of them has been printed.

WOODROW WILSON.

THE WHITE HOUSE, *June 5, 1916.*

PRESIDENTIAL APPROVAL.

A message from the President of the United States, by Mr. Sharkey, one of his secretaries, announced that the President had on the 5th instant approved and signed the joint resolution (S. J. Res. 72) to provide for holding the Texas Bicentennial and Pan American Exposition in 1918.

HOUSE BILLS REFERRED.

The following bills and joint resolution were read twice by their titles and referred to the Committee on Public Lands:

H. R. 21. An act authorizing the city of Salida, Colo., to purchase certain public lands for public park purposes;

H. R. 600. An act to validate title to the town site of McCabe, in the State of Montana;

H. R. 10124. An act to add certain lands to the Rocky Mountain National Park, Colo.;

H. R. 10305. An act to grant certain lands to the State of Oregon as a public park, for the benefit and enjoyment of the people;

H. R. 11162. An act to amend an act entitled "An act to authorize entry of the public lands by incorporated cities and towns for cemetery and park purposes," approved September 30, 1890, and for other purposes;

H. R. 11472. An act to reserve certain lands and make them a part of the Pike National Forest; and

H. J. Res. 184. Joint resolution providing for one year's extension of time to make installment payments for the land of the former Fort Niobrara Military Reservation, Nebr.

The following bills were severally read twice by their titles and referred to the Committee on Commerce:

H. R. 7613. An act to authorize the Terral Bridge Co. to construct a bridge across the Red River near Terral, Jefferson County, Okla.;

H. R. 13223. An act to provide for appeals from decisions of boards of local inspectors of vessels, and for other purposes; and

H. R. 13831. An act to amend section 4464 of the Revised Statutes of the United States, relating to number of passengers to be stated in certificate of inspection of passenger vessels, and section 4465 of the Revised Statutes of the United States, prescribing penalty for carrying excessive number of passengers on passenger vessels, and section 4466 of the Revised Statutes of the United States, relating to special permits for excursions on passenger steamers.

The following bills were severally read twice by their titles and referred to the Committee on Finance:

H. R. 12954. An act for the establishment of Northport, Chopaka, and Laurier, in the State of Washington, as ports of entry for immediate transportation without appraisement of dutiable merchandise; and

H. R. 15347. An act to amend existing laws relating to the use of alcohol, free of tax, by scientific institutions or colleges of learning.

The following bills were severally read twice by their titles and referred to the Committee on Patents:

H. R. 13618. An act to amend section 4931 of the Revised Statutes of the United States; and

H. R. 13720. An act to amend section 4894 of the Revised Statutes relating to patent applications.

H. R. 8492. An act to restore homestead rights in certain cases was read twice by its title and referred to the Committee on Indian Affairs.

H. R. 10312. An act relating to appeals and writs of error and costs thereof was read twice by its title and referred to the Committee on the Judiciary.

H. R. 13383. An act making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1917, was read twice by its title and referred to the Committee on Appropriations.

H. R. 15947. An act making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes, was read twice by its title and referred to the Committee on Naval Affairs.

H. J. Res. 78. Joint resolution authorizing the Secretary of War to loan certain tents, saddles, and bridles for the use of the national encampment, Knights of Pythias, to be held at Nashville, Tenn., in August, 1916, was read twice by its title and referred to the Committee on Military Affairs.

H. J. Res. 145. Joint resolution authorizing the erection on the public grounds in the city of Washington, D. C., of a statue of James Buchanan, a former President of the United States, was read twice by its title and referred to the Committee on the Library.

The PRESIDING OFFICER. If there be no further business, under the unanimous-consent agreement the Senate stands adjourned until 12 o'clock on Saturday next.

Thereupon (at 12 o'clock and 25 minutes p. m.) the Senate adjourned until Saturday, June 10, 1916, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

THURSDAY, *June 8, 1916.*

The House met at 11 o'clock a. m.

Rev. John Van Schaick, jr., pastor of the Church of Our Father, Washington, D. C., offered the following prayer:

O God, who turneth into morning the shadows of the night, grant that we may be the children of the light and of the day. Let the sun of Thy righteousness shine in our hearts, enlighten our reason, make clear our conscience, purify our affections. We dedicate ourselves to Thee this day, beseeching Thee so to rule and govern us that all evil thoughts, all unholy desires, all anxious cares and fears may be driven from our minds, and that we may walk with joy in the light of Thy countenance and the comfort of Thy presence. Amen.

The Journal of the proceedings of yesterday was read and approved.

ENLARGED HOMESTEADS.

Mr. GANDY. Mr. Speaker, I ask unanimous consent to vacate the proceedings by which the Senate amendment to the bill H. R. 8654, an act to amend an act entitled "An act to provide for an enlarged homestead," approved February 19, 1909, by

adding a new section, to be known as section 7, was agreed to on Monday last, and to return to the consideration of the Senate amendment.

The SPEAKER. The gentleman from South Dakota asks unanimous consent to vacate the proceedings touching the agreement by the House to the Senate amendment to the bill H. R. 8654 and to return to the consideration of the Senate amendment. Is there objection?

There was no objection.

The SPEAKER. The question now is on agreeing to the Senate amendment.

Mr. GANDY. Mr. Speaker, I move to concur in the Senate amendment with an amendment as follows:

Add, at the end of the Senate amendment, the following: "if the entryman is residing on his former entry."

The SPEAKER. The question is on agreeing to the Senate amendment with the amendment of the gentleman from South Dakota.

Mr. MONDELL. Mr. Speaker, I would like to ask the gentleman from South Dakota what change this makes in the procedure of the other day?

Mr. GANDY. Just a change of one word. We change the word "original" to the word "former." We have second homestead statutes whereby a man may have had an original entry and then, exercising his rights under the second homestead law, have taken another one. The department is of the opinion that the use of the word "original" in that connection might get them into endless difficulty whereas the word "former" would not.

Mr. MONDELL. Mr. Speaker, I think the department is entirely wrong. It is not a former entry. You are proposing to give to a man an additional entry, and an additional entry must be additional to the original. The language in the bill as it passed the House was correct. The legislation does not provide for a new entry succeeding a former entry. It provides for an additional entry to an original entry. The language the House adopted is the correct language.

Mr. MANN. I think the gentleman is wrong about that.

Mr. MONDELL. I believe I am entirely right; but if the department insists we must use certain language in connection with the bill, there is nothing for anyone to do but to accept it, because if we do not accept it the department may decline to carry out the provisions of the law; but the change is erroneous. The provision as it stood before is correct.

Mr. GANDY. Mr. Speaker, I do not think the gentleman from Wyoming [Mr. MONDELL] yet gets the idea in this proposition. A man may have heretofore exercised his right under the second homestead law, and the use of the word "original" in this connection was thought by the department to refer to the original entry which he might have made—the first entry—whereas he may have a second entry, to which the additional entry is desired.

Mr. NORTON. Mr. Speaker, may we have the amendment reported, together with the Senate amendment?

The SPEAKER. The Clerk will report the Senate amendment with the House amendment.

The Clerk read as follows:

Senate amendment: On page 2, line 9, after the word "laws," insert a comma and the words "except that where the land embraced in the additional entry is located not exceeding 20 miles from the land embraced in the original entry no residence shall be required on such additional entry"

House amendment: Add at the end of the Senate amendment the following: "if the entryman is residing on his former entry."

So that the Senate amendment as amended will read: "Page 2, line 9, after the word 'laws,' insert a comma and the following: 'Except that where the land embraced in the additional entry is located not exceeding 20 miles from the land embraced in the original entry no residence shall be required on such additional entry if the entryman is residing on his former entry.'"

The SPEAKER. The question is on agreeing to the Senate amendment with the Gandy amendment.

The Senate amendment as amended was agreed to.

THE JUDICIARY IN POLITICS.

Mr. MURRAY rose.

The SPEAKER. For what purpose does the gentleman from Oklahoma rise?

Mr. MURRAY. Mr. Speaker, I ask unanimous consent to proceed for five minutes.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent to proceed for five minutes.

Mr. MANN. About what?—oh, the gentleman is always entertaining, and I will not object.

The SPEAKER. Is there objection?

There was no objection.

Mr. MURRAY. Mr. Speaker, it has been the experience of all nations that when its judiciary becomes corrupt the nation is in its last stage of decadence. History also teaches us that such corruption often grows out of questionable politics. The framers of the Constitution of the United States fully understood this, and in order to avoid its dangers provided that all judges should hold office for life, believing that life tenure, with a fixed and unchangeable salary, would be the strongest safeguards against their entry into political contest for public office; and candor compels us to admit that, with few exceptions, this belief has been justified by the decisions and practices of the Supreme Court of the United States, although too often have the inferior Federal courts degenerated into questionable practices or decisions. Nevertheless, it is true that with few exceptions the Supreme Court has proven itself above such practices. Whenever it has departed even in a slight degree agitation not to the best interest either of the court or of the country has resulted. In the Dred Scott decision Judge Roger B. Taney could not resist the temptation, which strong political agitation of the time influenced, to pronounce an obiter dictum as addition to his decision. He reaped the just reward for his misconduct, which materially dimmed his otherwise glorious career. Immediately following the Dred Scott decision the opponents of further extension of slavery in the Territories began an agitation to combat the effect of this political decision, or, rather, of this uncalled-for dictum, which had no rightful part in the decision. The Republican Party was born out of scathing criticism of the Supreme Court and out of rebuke of what Lincoln and others justly termed a political decision.

Some 15 years ago I remember reading the American Commonwealth, by James Bryce, and my astonishment at his statement that the Federal courts would some day destroy the American Republic, reciting as a bad precedent the raising of the number of judges in 1868 in order to have declared constitutional the paper-money issue. This statement of Mr. Bryce was contrary to my training, and at the time I pronounced it absurd; but there has occurred too many regretful incidents in the career of the Supreme Court of the United States, too many reversals of a long line of decisions, like the income-tax case some few years ago. Therefore, sirs, I can not restrain a critical examination of any departure of the practices of the Supreme Court of the United States, which has characterized it from the beginning of the Republic, and I look with dread upon any movement which would likely bring it into bad repute.

In contemplating the judiciary, having a regard for its future welfare, I can not resist analyzing the effect of a recent utterance of a member of the Supreme Court, whose friends say that he is, or at least they present him as a candidate for the Republican nomination for President of the United States; or mentally to question whether or not it would be wise now to prohibit the nomination or election of any member of that court to any other office while a member of the court. True enough, Mr. Justice Hughes has been remarkably and commendably silent until the eve of the Republican national convention, when he took occasion to pronounce a eulogy on the flag, which at any other time would have gone unnoticed; but his friends immediately pronounced it a "keynote speech for the nomination," and if a man's real character and motives can not be ascertained from the statement and judgment of his friends, to whom can we look for the truth of his purpose and motives? I do not wish to be understood now as inveighing against his nomination nor to consider the wisdom of electing Mr. Justice Hughes to the Presidency. I will agree that should he receive that nomination the contest between him and the Democratic nominee, Woodrow Wilson, would be like pitting classic Roman against classic Greek. The acme of literary taste in American politics would certainly be realized in the campaign speeches of the two contestants in their use of pure diction, rhetoric, and classic learning; but such nomination, to say the least, brings to our mind the fear that such course will be too often attempted. Suppose four years hence an agitation is started to nominate Justice Louis D. Brandeis. Does anyone doubt, even though he keep his mouth closed, the "spasms" into which certain interest-serving publications would be thrown by the very suggestion of his nomination? Indeed, we can reasonably expect every man and every influence who opposed his confirmation by the Senate immediately to begin the cry that the suggestion of his name meant the dragging of the judiciary into political mire, and the suggestion would do so. Therefore I repeat the question, ought there not to be a written or unwritten inhibition against any member of the Supreme Court ever receiving the nomination for President while serving on the judiciary? If not should the object now sought by the friends of Mr. Justice Hughes be repeated, would not that itself bring the Supreme Court into political discussion and controversy? Do we not realize that it has already brought to the door of the Supreme Court too much agitation and discussion as to whether one of their members shall receive the nomination of a great political party? This suggests the further question, to wit, What has been the line of mental consideration of the able and learned jurist, Mr. Justice Hughes, during the many months

since his name became associated with the possible nomination for the Presidency? Has he been studying sharp quillets of the law in order to balance the scales of justice exactly and to render decisions upholding the clear intent and purpose of the Constitution of the United States, or has his mentality strenuously endeavored to answer the personal question, "What shall I do and say if I become the nominee of the Republican Party at Chicago?"

I trust I may be pardoned, therefore, when I say that either Mr. Justice Hughes should have made it clear that under no circumstances would he have accepted the nomination for the Presidency or have resigned from the bench at the first serious consideration of his name 12 months ago. His remaining on the bench and flirting with his supporters, like a girl wanting to be kissed, is reprehensible in the extreme, dangerous to the future integrity of the court, and to the best interest of the country.

We are progressive in Oklahoma and in a measure radical, but have never thought it wise to make of the judiciary a training school of political success. [Applause on the Democratic side.]

Mr. MANN. Mr. Speaker, the speech of the distinguished gentleman from Oklahoma [Mr. MURRAY] is such an evidence of fear on that side of the House that I will ask for the regular order without replying any further.

CALENDAR FOR UNANIMOUS CONSENT.

The SPEAKER. The regular order is the Unanimous Consent Calendar, bridge bills to have precedence. The Clerk will report the first bill.

BRIDGE ACROSS THE MISSISSIPPI RIVER, MEMPHIS, TENN.

The first bill in order on the Unanimous Consent Calendar was the bill (H. R. 12999) extending the time for the completion of the bridge across the Mississippi River at Memphis, Tenn., authorized by an act entitled "An act to authorize the Arkansas & Memphis Railway Bridge & Terminal Co. to construct, maintain, and operate a bridge across the Mississippi River at Memphis, Tenn," approved August 23, 1912.

The Clerk read the title.

The SPEAKER. Is there objection?

Mr. CARAWAY. Mr. Speaker, I wish to ask unanimous consent that this bill be passed over without losing its place on the calendar.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas? [After a pause.] The Chair hears none.

BRIDGE ACROSS THE WABASH RIVER, WABASH, IND.

The next business in order on the Unanimous Consent Calendar was the bill (H. R. 13669) to authorize the county of Wabash, in the State of Indiana, to construct a bridge across the Wabash River, at the city of Wabash, Ind.

The Clerk read the title of the bill.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

Be it enacted, etc., That the county of Wabash, State of Indiana, is hereby authorized to construct, maintain, and operate a bridge across the Wabash River, at a point suitable to the interests of navigation, at the city of Wabash, in the State of Indiana, in accordance with the provisions of the act approved June 23, 1910, entitled "An act to amend an act entitled 'An act to regulate the construction of dams across navigable waters,' approved June 21, 1906."

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The committee amendments were read, as follows:

Page 1, line 5, at the beginning of the line, insert the words "and approaches thereto."

Page 1, line 8, strike out the words "approved, June 23, 1910," and, line 9, strike out the words "amend an act entitled 'An act to.'"

Line 10, strike out the words "and across" and insert the words "bridges over."

Line 1, page 2, strike out the words "June 21" and insert the words "March 23."

In line 2, page 2, strike out the quotation marks after the word "six."

The question was taken, and the amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. CULLOP, a motion to reconsider the vote by which the bill was passed was laid on the table.

BRIDGE ACROSS THE MISSISSIPPI RIVER, BATON ROUGE, LA.

The next business in order on the Calendar for Unanimous Consent was the bill (S. 3722) to extend the time for constructing a bridge across the Mississippi River at or near the city of Baton Rouge, La.

The Clerk read the title of the bill.

Mr. MANN. Mr. Speaker, I ask that this bill be passed over.

The SPEAKER. Under the agreement, the bill will be passed over without prejudice.

BRIDGE ACROSS THE MISSISSIPPI RIVER IN AITKIN COUNTY, MINN.

The next business in order on the Calendar for Unanimous Consent was the bill (H. R. 13835) to authorize the county commissioners of Aitkin County, Minn., and the town board of Logan Township, in said county and said State, to construct a bridge across the Mississippi River on the line between sections 26 and 27, township 149 north, range 25 west, fourth principal meridian.

The Clerk read the title.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

Be it enacted, etc., That the county commissioners of Aitkin County, Minn., and the town board of Logan Township, in said county and said State, are hereby authorized to construct, maintain, and operate a bridge and approaches thereto across the Mississippi River at its intersection with the division line between sections 26 and 27, township 149 north, range 25 west, fourth principal meridian, in the county of Aitkin, in the State of Minnesota, in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The committee amendments were read, as follows:

Page 1, line 7, after the word "river," insert the words "at a point suitable to the interests of navigation."

The question was taken, and the amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. SIMS, a motion to reconsider the vote by which the bill was passed was laid on the table.

BRIDGES ACROSS BAYOU BARTHOLOMEW, ASHLEY COUNTY, ARK.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 10849) granting the consent of Congress to Ashley County, Ark., to construct a bridge across Bayou Bartholomew.

The SPEAKER. Is there objection to the consideration of the bill? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to Ashley County, Ark., and its successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Bayou Bartholomew at a point suitable to the interests of navigation, at or near the town of Wilmot, in the county of Ashley, in the State of Arkansas, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. SIMS, a motion to reconsider the vote by which the bill was passed was laid on the table.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13715) granting the consent of Congress to C. M. Simpson, Z. T. Hedges, J. C. Hackney, and Mark Brown to construct a bridge across Bayou Bartholomew, Ashley County, Ark.

The SPEAKER. Is there objection to the consideration of the bill? [After a pause.] The Chair hears none. The Clerk will report the bill.

The bill was read, as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to C. M. Simpson, Z. T. Hedges, J. C. Hackney, and Mark Brown, and their successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Bayou Bartholomew at a point suitable to the interests of navigation, at or near the town of Morrell, or about one-half mile above or north of said town, in the county of Ashley, in the State of Arkansas, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time and passed.

On motion of Mr. SIMS, a motion to reconsider the vote by which the bill was passed was laid on the table.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 12197) authorizing Ashley County, Ark., to construct a bridge across Bayou Bartholomew.

The SPEAKER. Is there objection to the consideration of the bill? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to Ashley County, Ark., to construct, maintain, and operate a bridge and approaches thereto across the Bayou Bartholomew at a point suitable

to the interests of navigation, at or near the section line between section 17 and section 20, township 16 south, range 5 west, in the county of Ashley, in the State of Arkansas, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

Also the following committee amendments were read:

Page 1, lines 7 and 8, strike out the words "17 and section 20" and insert in lieu thereof "19, township 16, range 5 west, and section 24."

Page 1, line 9, strike out the word "five" and insert the word "four."

The SPEAKER. The question is on agreeing to the committee amendments.

The question was taken, and the amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. SIMS, a motion to reconsider the vote by which the bill was passed was laid on the table.

BRIDGE ACROSS BRAZOS RIVER, TEX.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 12362) granting the consent of Congress to the Dallas & Southwestern Motorway Co. to construct a bridge across the Brazos River, in the State of Texas.

The SPEAKER. Is there objection to the consideration of the bill? [After a pause.] The Chair hears none.

The bill was read, as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the Dallas & Southwestern Motorway Co. and its successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Brazos River at a point about 300 feet above the mouth of Georges Creek in county of Somerville, in the State of Texas, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

Also the following committee amendment was read:

Page 1, line 6, after the word "point," insert the words "suitable to the interests of navigation."

The SPEAKER. The question is on agreeing to the committee amendment.

The question was taken, and the amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. SIMS, a motion to reconsider the vote by which the bill was passed was laid on the table.

KANSAS CITY & MEMPHIS RAILWAY & BRIDGE CO.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 10251) authorizing the Kansas City & Memphis Railway & Bridge Co. to make settlement with Crittenden County, Ark., and for other purposes.

The SPEAKER. Is there objection to the consideration of the bill?

Mr. MONDELL. Mr. Speaker, reserving the right to object, what difference is there between this bill, H. R. 10925, and the bill which has just passed, H. R. 10849? It seems to provide for the same bridge or a bridge at the same point.

Mr. CARAWAY. May I answer the gentleman?

Mr. MONDELL. It says "at a point suitable to the interests of navigation, at or near the town of Wilmot, Ark." The bill now before us has an additional description, but the location seems to be the same. Do they both apply to the same bridge?

Mr. CARAWAY. You refer to House bill 10925? That has not been reported yet.

Mr. MONDELL. I refer to House bill 10849.

Mr. CARAWAY. And what other bill?

Mr. MONDELL. And the bill now before us, H. R. 10925. They both provide for a bridge at a point suitable to the interests of navigation at or near the town of Wilmot, in the county of Ashley, in the State of Arkansas.

Mr. CARAWAY. I understand that the bill, H. R. 10925, has not yet been reported. We reported H. R. 10251, and have not reached H. R. 10925 yet.

Mr MONDELL. H. R. 10849 was passed some time ago.

The SPEAKER. The gentleman from Wyoming [Mr. MONDELL] is talking about one bill and the gentleman from Arkansas [Mr. CARAWAY] about another.

Mr. MONDELL. Mr. Speaker, are we not now considering H. R. 10925?

The SPEAKER. We are not. The one that the House is considering is H. R. 10251.

Mr. MONDELL. I thought we had disposed of it and reached the next, No. 179.

The SPEAKER. No. The gentleman is mistaken. The Clerk will report this bill by title, so that Members will know what they are talking about.

The Clerk read as follows:

A bill (H. R. 10251) authorizing the Kansas City & Memphis Railway and Bridge Co. to make settlement with Crittenden County, Ark., and for other purposes.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, Mr. Speaker, this is a new proposition. Is it involved at all in this proposition of the bill that the gentleman had up before?

Mr. CARAWAY. Not at all. There are two bridge companies there.

Mr. MANN. I know. They are both seeking to get legislation from Congress.

Mr. CARAWAY. This bill seeks to ratify a settlement made between the bridge company and Crittenden County. Crittenden County lies right across the river in Arkansas from Memphis. When the former bridge was constructed a wagon way was to be maintained across the old bridge, and Crittenden County built an approach to it. Two years ago the wagon way fell down, and it has never been reconstructed. The new company has built a new wagon way that is more satisfactory, and the county has entered into a contract with a new company. The figures here ought to be $12,000 instead of $12,500.

Mr. MANN. There are two bridge companies there, apparently. I do not know how many more there may be. The former bill that the gentleman had passed over provided for the extension of the time for the company to construct its bridge?

Mr. CARAWAY. Yes.

Mr. MANN. I take it that the two propositions are related to each other in some way—not the companies or the bridges.

Mr. CARAWAY. I will state to the gentleman that Crittenden County, which built an old bridge which fell down, made an agreement with the company by which the company was to pay $12,000 to Crittenden County when the Secretary of War under this bill granted them the right not to be compelled to reconstruct their wagon way, which was never used.

Mr. MANN. I understand the Secretary of War states the further fact that no improved highway has ever been constructed by the Arkansas authorities from the Arkansas levees to connect with the bridge approach.

Mr. CARAWAY. It was not a very good way. I have crossed it several times. The approach was so steep that it was never a very practicable bridge. It has fallen down, and the company and the county have entered into this agreement by which the company is to pay Crittenden County $12,000. The amount ought to be amended to "$12,000," not "$12,500."

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the committee amendment.

The Clerk read as follows:

Strike out all after the enacting clause and insert:

"That the Secretary of War is hereby authorized and empowered to release the Kansas City & Memphis Railway & Bridge Co., a corporation, from the duty now imposed upon it by the act entitled 'An act to authorize the construction of a bridge across the Mississippi River at Memphis, Tenn.,' approved April 24, 1888, and all acts amendatory thereof, to maintain approaches to its bridges at Memphis, Tenn., and a way over and across said bridge for wagons and other vehicles, animals, and foot passengers, upon its payment to the road fund of Crittenden County, Ark., the sum of $12,500.

"SEC. 2. That upon the compliance by the said Kansas City & Memphis Railway & Bridge Co., a corporation aforesaid, with the provisions of section 1 of this act the provision hereof shall take effect, and for that purpose an act entitled 'An act to authorize the construction of a bridge across the Mississippi River at Memphis, Tenn.,' approved April 24, 1888, and all acts amendatory thereof are hereby so amended as to relieve said company of the necessity of maintaining said approaches to and said passageway across said bridge for wagons and other vehicles, animals, and foot passengers.

"SEC. 3. All laws and parts of laws in conflict herewith are hereby repealed."

Mr. CARAWAY. Mr. Speaker, I move to amend the amendment in line 22, page 2, by striking out the figures "$12,500" and inserting the figures "$12,000."

The SPEAKER. The Clerk will report the gentleman's amendment.

The Clerk read as follows:

Page 2, line 22, strike out "$12,500" and insert "$12,000."

The SPEAKER. The question is first on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER. The question is on the amendment offered by the gentleman from Arkansas [Mr. CARAWAY].

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. SIMS, a motion to reconsider the vote whereby the bill was passed was laid on the table.

The SPEAKER. The Clerk will report the next bill.

BRIDGE ACROSS BAYOU BARTHOLOMEW.

The next business in order on the Calendar for Unanimous Consent was the bill (H. R. 10925) authorizing Ashley County, Ark., to construct a bridge across Bayou Bartholomew.

The title of the bill was read.

The SPEAKER. Is there objection?

Mr. MONDELL. Mr. Speaker, reserving the right to object, I now desire to ask the gentleman from Arkansas [Mr. CARAWAY] if the bridge that it is proposed to build under the authority granted by this act is the same bridge that is proposed in the bill H. R. 10849? They both seem to be near the town of Wilmot, Ark.

Mr. CARAWAY. I am not informed as to that.

Mr. MONDELL. I do not see that there is any particular harm if the two bills do refer to the same bridge.

Mr. MANN. This is the third bill to provide a bridge to be built at or near the town of Wilmot.

Mr. MONDELL. Yes; but one other is a bridge to be built by a private corporation, and still another bridge that my friend refers to is at a different point specifically located.

Mr. MANN. I think I spoke to some gentleman about it. This is for a county. I guess what they are trying to do is to get a bridge built. They may not be absolutely certain just where to build it, and they do not want to incur any expense until they know the particular place where the bridge is to be built.

Mr. MONDELL. They are evidently trying a number of localities.

Mr. MANN. Yes. It probably takes a vote of the people to determine just where it will go.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to Ashley County, Ark., and its successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across Bayou Bartholomew at a point suitable to the interests of navigation, at or near Wilmot, Ark., on section line between sections 1 and 12, township 19, range 5, where it crosses said bayou in the county of Ashley in the State of Arkansas, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. SIMS, a motion to reconsider the vote whereby the bill was passed was laid on the table.

The SPEAKER. The Clerk will report the next one.

BRIDGE ACROSS MISSISSIPPI RIVER, BATON ROUGE, LA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 9235) to extend the time for constructing a bridge across the Mississippi River at or near the city of Baton Rouge, La.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. MANN. I ask to have the bill passed over.

The SPEAKER. The bill goes over without prejudice.

BRIDGE ACROSS LITTLE RIVER, MISSISSIPPI COUNTY, ARK.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 6923) to authorize the construction, maintenance, and operation of a bridge across Little River at a point where the line between townships 12 and 13 north, range 8 east, crosses said river.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

There was no objection.

The bill was read, as follows:

Be it enacted, etc., That the Osceola and Little River road improvement district No. 1, of Mississippi County, Ark., be, and it is hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across Little River, at a point where the line between townships 12 and 13 north, range 8 east, crosses said river, in accordance with the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906: *Provided*, That permission be granted to construct and maintain said bridge without building and maintaining a draw therein.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

With the following committee amendments:

Page 1, after the word "river" in line 6, insert the words "at a point suitable to the interests of navigation"; page 2, line 3, strike out the words "*Provided*, That permission be granted to construct and maintain said bridge without building and maintaining a draw therein."

The SPEAKER. The question is on the committee amendments.

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

On motion of Mr. CULLOP, a motion to consider the last vote was laid on the table.

DAUPHIN ISLAND RAILWAY & HARBOR CO., ALABAMA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11616) to amend an act to authorize the Dauphin Island Railway & Harbor Co., its successors or assigns, to construct and maintain a bridge or bridges or viaducts across the water between the mainland, at or near Cedar Point and Dauphin Island, both Little and Big; also to dredge a channel from the deep waters of Mobile Bay into Dauphin Bay; also to construct and maintain docks and wharves along both Little and Big Dauphin Islands, as amended by an act approved June 18, 1912.

The Clerk read the title of the bill.

Mr. GRAY of Alabama. Mr. Speaker, I ask unanimous consent that Calendar No. 188, S. 4476, which is a Senate bill identical with this House bill, be considered in lieu of H. R. 11616. The Senate bill has passed the Senate.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. MANN. Reserving the right to object, I expect to ask to have both the House bill and the Senate bill go over. I have no objection to extending the time reasonably for this work, but apparently this would extend for five years the time for beginning the bridge. I am not willing to do that. I do not know whether that is what they want or not, but I suppose it is easy enough to provide that the bill shall not make that extension.

Mr. HARRISON. Will the gentleman consent to pass the bill for the present?

Mr. MANN. Yes.

Mr. HARRISON. So that if we can get together the bill may be passed at some time later in the day.

Mr. MANN. I am perfectly willing.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. GRAY of Alabama. I yield to the gentleman.

Mr. MOORE of Pennsylvania. In what State is this located?

Mr. GRAY of Alabama. In Alabama.

Mr. HARRISON. I ask unanimous consent that the bill may lie over for the present.

The SPEAKER. The gentleman from Mississippi asks unanimous consent to pass this bill temporarily without prejudice. Is there objection?

Mr. MANN. This bill and the next one, S. 4476.

The SPEAKER. To pass this bill and the next one temporarily. Is there objection?

There was no objection.

BRIDGES ACROSS GRAND CALUMET RIVER, IND.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 15006) to authorize the board of commissioners of Lake County, Ind., to construct a bridge across the Grand Calumet River, in the State of Indiana.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

There was no objection.

The bill was read, as follows:

Be it enacted, etc., That the board of commissioners of Lake County, Ind., be, and they are hereby, authorized to construct, maintain, and operate a public bridge and approaches thereto across the Grand Calumet River, at a point where the same intersects Calumet Avenue, in the city of Hammond, in the State of Indiana, in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is expressly reserved.

With the following committee amendments:

Page 1, line 3, after the word "consent," insert the words "the consent of Congress is hereby granted to."

Page 1, line 4, after the word "Indiana," strike out the words "be, and are hereby, authorized" and insert the words "and their successors and assigns."

Page 1, line 6, strike out the word "public."

Page 1, line 7, after the word "point," insert the words "suitable to the interests of navigation."

The SPEAKER. The question is on the committee amendments.

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

On motion of Mr. CULLOP, a motion to reconsider the last vote was laid on the table.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 15007) to authorize the board of commis-

sioners of Lake County, Ind., to construct a bridge across the Grand Calumet River, in the State of Indiana.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

There was no objection.

The bill was read as follows:

Be it enacted, etc., That the board of commissioners of Lake County, Ind., be, and are hereby, authorized to construct, maintain, and operate a public bridge and approaches thereto across the Grand Calumet River at a point where the same intersects Kline Avenue, in the city of East Chicago, in the State of Indiana, in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is expressly reserved.

With the following committee amendments:

Page 1, line 3, after the word "consent" insert the words "the consent of Congress is hereby granted to."

Page 1, line 4, after the word "Indiana," strike out the words "be, and are hereby, authorized" and insert the words "and their successors and assigns."

Page 1, line 6, strike out the word "public."

Page 1, line 7, after the word "point" insert the words "suitable to the interests of navigation."

Page 1, line 8, strike out the word "Kline" and insert the word "Cline."

The SPEAKER. The question is on the committee amendments.

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

On motion of Mr. CULLOP, a motion to reconsider the last vote was laid on the table.

SALT FORK, ARKANSAS RIVER, PONCA INDIAN RESERVATION, OKLA.

The next business on the Calendar for Unanimous Consent was the bill (S. 3423) to provide for the construction of a bridge across the Salt Fork of the Arkansas River, near White Eagle Agency, in the Ponca Indian Reservation, Okla.

The Clerk read the title of the bill.

Mr. SIMS. Mr. Speaker, I notice this bill is from the Committee on Indian Affairs. It seems to provide for the construction of a bridge. I have no objection, but I understood the consent was for the consideration of bridge bills coming from the Committee on Interstate and Foreign Commerce.

Mr. MANN. There was nothing said about that. I do not think anybody will have any objection to this.

The SPEAKER. Is there objection?

There was no objection.

The bill was read, as follows:

Be it enacted, etc., That there is hereby appropriated, out of any money in the Treasury to the credit of the Ponca Tribe of Indians, the sum of $6,000, or so much thereof as may be necessary, to be expended under the direction of the Secretary of the Interior, for the purpose of paying one-third of the cost of the construction of a bridge across the Salt Fork of the Arkansas River, between sections 3 and 10, township 24 north, range 2 east, Indian meridian, near White Eagle Agency, in the Ponca Indian Reservation, Okla.: *Provided*, That no part of the money herein appropriated shall be expended until the Secretary of the Interior shall have obtained from the proper authorities of Kay County and Noble County, in Oklahoma, satisfactory guaranties of the payment by said counties of at least two-thirds of the cost of such bridge, and that the proper authorities of the said counties assume full responsibility for and will at all times maintain and repair said bridge and the approaches thereto.

The SPEAKER. This bill is on the Union Calendar.

Mr. MANN. I ask unanimous consent that it may be considered in the House as in Committee of the Whole House on the state of the Union.

The SPEAKER. The gentleman from Illinois asks unanimous consent that this bill be considered in the House as in Committee of the Whole House on the state of the Union. Is there objection?

There was no objection.

The bill was ordered to a third reading, and was accordingly read the third time and passed.

On motion of Mr. SIMS, a motion to reconsider the last vote was laid on the table.

Mr. MANN. I ask unanimous consent that the report of the committee on this bill be inserted in the RECORD.

The SPEAKER. The gentleman asks unanimous consent to insert in the RECORD the report of the committee on this bill. Is there objection?

There was no objection.

The report (by Mr. CARTER of Oklahoma) is as follows:

The Committee on Indian Affairs, to whom was referred the bill (S. 3423) providing for the construction of a bridge across the Salt Fork of the Arkansas River, near White Eagle Agency, in the Ponca Indian Reservation, Okla., having carefully considered the same, reports the bill back without amendment, and recommends that the bill do pass.

The report of the Senate Committee on Indian Affairs to the Senate shows the necessity for the appropriation for the bridge, but instead of making the appropriation a gratuity from Government funds, the bill appropriates the money direct from the tribal funds of the Indians, the bridge being built on an Indian reservation and being for the purpose of affording the Indians a crossing over the Salt Fork of the Arkansas River. Only one-third of the cost of the bridge is to be paid for by the Indians, the other two-thirds being borne by Kay and Noble Counties, Okla. The report of the Senate is hereby adopted and made a part of this report, and is as follows:

[Senate Report No. 302, Sixty-fourth Congress, first session.]

"The Committee on Indian Affairs, to which was referred Senate bill 3423, to provide for the construction of a bridge across the Salt Fork of the Arkansas River near White Eagle Agency, in the Ponca Indian Reservation, Okla., having carefully considered the same, recommends that the bill do pass without amendment.

"This bill provides for the construction of a bridge across the Salt Fork of the Arkansas River between Kay County and Noble County, Okla., one-third of the expense to be borne by each of the said counties and one-third to be borne by the United States Government, the total cost to the Government not to exceed $6,000; and no part of the appropriation to be used until the authorities of the two counties have furnished proper guaranties that the shares which they contribute will be available, the said counties named to be responsible for the maintenance and repairs to the bridge.

"The Government is asked to contribute its proportion of the cost of this bridge for the reason that a considerable portion of the land in each of these counties is Indian land and not subject to taxation, and for that reason the county authorities could not collect from these Indian landowners their proportion of the assessed cost of the construction of the bridge.

"This bill when originally introduced was referred to the Committee on Commerce, and subsequently, on motion, the Committee on Commerce was discharged and the bill was referred to the Committee on Indian Affairs.

"While pending before the Committee on Commerce the bill was referred to the Interior Department for a report, and the Secretary of the Interior reported thereon to the Committee on Commerce under date of February 12, 1916. In this report the Secretary calls attention to the fact that the erection of the proposed bridge would increase the value of the land on the Ponca Indian Reservation south of the Salt Fork River far beyond the amount proposed to be contributed, and states that it would be an inducement for many of the Indians now living north of the river to make their homes on their own allotments in Noble County, which they are not now willing to do on account of the remoteness of that section and its inaccessibility, due to the fact that the river is not bridged and is frequently not fordable.

"The Secretary's report is as follows:

"DEPARTMENT OF THE INTERIOR,
"*Washington, February 12, 1916.*

"MY DEAR SENATOR: Referring to the letter of your committee, dated January 21, submitting for report Senate bill 3423, appropriating $6,000 to pay one-third of the cost of the construction of a bridge across the Salt Fork of the Arkansas River, I have to state that all the information at my command indicates it is only fair that the Government should assist the counties in the construction of the proposed bridge.

"The erection of such a bridge would increase the value of land on the Ponca Reversation south of the Salt Fork River far beyond the amount proposed to be contributed. It would also be an inducement for many of the Indians now living north of the river to make their homes on their own allotments in Noble County, which they are not now willing to do on account of the remoteness of that section and its inaccessibility, due to the fact that the river is not bridged and is frequently not fordable. The bridge would afford a direct gateway from Ponca City to the south portion of the Ponca Reservation and to the Otoe Reservation, would give the Indians access to competitive markets, and their lands would be leased more readily and for better prices.

"It frequently happens that this river is unfordable for considerable periods of time, stopping the travel between the two parts of the reservation or making it necessary to go about 25 miles from the agency at White Eagle, Okla., to reach land 2 or 3 miles south thereof. Under these conditions the white lessees of Indian lands and the Indians living on the south end of the reservation are placed at a disadvantage, the Indian land leasing and selling cheaper than it would otherwise, and the Indians themselves being unwilling to settle upon their allotments. The superintendent in charge of the agency has been furnished figures showing that the entire cost of the bridge will be from $15,000 to $18,000.

"Considerable Indian land in these counties is not subject to taxation, and this appropriation is asked for by the county authorities because of this condition.

"I am submitting the facts in this case, leaving the question of the propriety of making the appropriation to the determination of the Congress.

"Cordially, yours,

"FRANKLIN K. LANE, *Secretary.*

"Hon. JAMES P. CLARKE,
"*Chairman Committee on Commerce, United States Senate.*"

ENROLLED BILLS SIGNED.

The Speaker announced his signature to enrolled bills of the following titles:

S. 1793. An act granting to the State of Kansas title to certain lands in said State for use as a game preserve; and

S. 5776. An act to amend certain public-utility company franchises in the Territory of Hawaii.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States for his approval the following bills:

H. R. 529. An act creating an additional land district in the State of California, and for other purposes;

H. R. 13112. An act to amend section 14 of the seamen's act of March 4, 1915;

H. R. 13474. An act to amend section 6 of an act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes, approved March 14, 1900, as amended by the act of March 2, 1911;

H. R. 13765. An act to amend section 73 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, and for other purposes.

H. J. Res. 214. Joint resolution increasing the number of sheets of customs stamps and of checks, drafts, and miscellaneous work to be executed by the Bureau of Engraving and Printing during the fiscal year 1916;

H. R. 4297. An act for the relief of Frances L. Llewellyn;

H. R. 7817. An act to validate the homestead entry of George S. Clark;

H. R. 7804. An act to authorize the issuance of patent to Oscar R. Howard, and for other purposes;

H. R. 6651. An act providing for the payment for certain services arising under the Navy Department;

H. R. 3794. An act for the relief of Thomas S. Johnson;

H. R. 12835. An act to authorize and empower officers and enlisted men of the Navy and Marine Corps to serve under the Government of the Republic of Haiti, and for other purposes;

H. R. 755. An act to incorporate the Boy Scouts of America, and for other purposes;

H. R. 2744. An act to correct title to certain lands in Colorado;

H. R. 13064. An act for the relief of the M. A. Sweeney Shipyards & Foundry Co.;

H. R. 15005. An act to appropriate $200,000 for training the Organized Militia or National Guard of any State, Territory, or of the District of Columbia; and

H. R. 14864. An act to alter, and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from the Central Pacific Railroad, in California, to Portland, in Oregon," approved July 25, 1866, as amended by the acts of 1868 and 1869, and to alter and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from Portland to Astoria and McMinnville, in the State of Oregon," approved May 4, 1870, and for other purposes.

BRIDGE ACROSS YELLOWSTONE RIVER, MONT.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 14823) to authorize the Savage Bridge Co. to construct, maintain, and operate a bridge across the Yellowstone River in the State of Montana.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Savage Bridge Co., a corporation organized under the laws of the State of Montana, its successors and assigns, be, and are bereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Yellowstone River at a point suitable to the interests of navigation from the northwest bank thereof in section 28, township 20 north, range 58 east, Montana principal meridian, to the southeast bank thereof, landing on Bear Island in section 33, township 20 north, range 58 east, Montana principal meridian, and from the northeast bank of Bear Island to the southwest bank thereof, all in section 34, township 20 north, range 58 east, Montana principal meridian, all in the county of Richland, State of Montana, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended.

On motion of Mr. DILLON a motion to reconsider the vote whereby the bill was passed was laid on the table.

BRIDGE ACROSS MISSOURI RIVER, WILLISTON, N. DAK.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 14483) to authorize the construction of a bridge across the Missouri River at or near the city of Williston, N. Dak.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Missouri River Bridge Co., a corporation organized under the laws of the State of North Dakota, its successors and assigns, be, and they are hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Missouri River at a point suitable to the interest of navigation, at or near the city of Williston, N. Dak., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. NORTON, a motion to reconsider the vote whereby the bill was passed was laid on the table.

BRIDGE ACROSS MISSOURI RIVER, MONT.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 14534) permitting the Missouri River Transportation Co. to construct, maintain, and operate a bridge across the Missouri River in the State of Montana.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Missouri River Transportation Co., a corporation organized under the laws of the State of Montana, its successors and assigns, be, and are hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Missouri River at a point suitable to the interests of navigation, from the north bank thereof in the county of Sheridan, State of Montana, to the south bank thereof in the county of Richland, State of Montana, all in section 23, township 27, range 50 east, Montana principal meridian, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The following committee amendment was read:

Strike out all after the enacting clause and insert in lieu thereof the following:

"That the consent of Congress is hereby granted to the Missouri River Transportation Co. and its successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Missouri River at a point suitable to the interests of navigation, from the north bank thereof in the county of Sheridan, State of Montana, to the south bank thereof in the county of Richland, State of Montana, all in section 23, township 27, range 50 east, Montana principal meridian, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

"SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved."

Amend the title to read:

"A bill granting the consent of Congress to the Missouri River Transportation Co. and its successors and assigns, to construct, maintain, and operate a bridge and approaches across the Missouri River."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended.

On motion of Mr. DILLON, a motion to reconsider the vote whereby the bill was passed was laid on the table.

BRIDGE ACROSS PERDIDO BAY, ALA.

The next business on the Calendar for Unanimous Consent was the bill (S. 5841) to authorize the Perdido Bay Bridge & Ferry Co., a corporation existing under the laws of the State of Alabama, to construct a bridge over and across Perdido Bay from Lillian, Baldwin County, Ala., to Cummings Point, Escambia County, Fla.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Perdido Bay Bridge & Ferry Co., a corporation existing under the laws of the State of Alabama, be, and hereby is, authorized to construct, operate, and maintain a bridge and approaches thereto across Perdido Bay at a point suitable to the interests of navigation, from the town of Lillian, on the western shore thereof, in the county of Baldwin and State of Alabama, to Cummings Point, on the eastern shore thereof, in the county of Escambia and State of Florida, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. SIMS, a motion to reconsider the vote whereby the bill was passed was laid on the table.

BRIDGE ACROSS RED RIVER, N. DAK.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 15322) granting the consent of Congress to the board of county commissioners of Traill County, N. Dak., to construct a bridge across the Red River of the North.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The Clerk read the bill, as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the board of county commissioners of Traill County, N. Dak., and its successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Red River of the North, at a point suitable to the interests of navigation, at or near the village of Caledonia, in the county of Traill, in the State of North Dakota, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The following committee amendments were read:

Page 1, lines 3 and 4, strike out the words "the board of county commissioners of."

Amend the title so as to read: "Granting the consent of Congress to Traill County, N. Dak., to construct a bridge across the Red River of the North.

Mr. BORLAND. Mr. Chairman, I move to strike out the last word. I have no objection to this particular bill, but I wanted to ask the acting chairman of the committee a question. These

bills have been following a very uniform course and very uniform language. It seems to me that it might be possible, and I wanted to inquire whether it is in the minds of the committee, to pass a general law so as to permit the construction of bridges across navigable streams whenever they comply with certain requirements of the War Department. In other words, is it necessary that we shall in the future on these private local bills be obliged to have a separate bill for each bridge that is intended to be built?

Mr. SIMS. I can not go into that question in the time that I have while on the Unanimous Consent Calendar. The committee has shown a disposition to require a separate act of Congress for each bridge across a navigable stream.

Mr. BORLAND. I wanted to bring out, if I could, the reason for that. The committee has been very good to me and I have no complaint to make.

Mr. SIMS. It is the general policy of the committee to require a separate act for each bridge or dam. There has been a uniform dam law passed—the general bridge and dam act—and I think the committee will stand by that policy. I do not believe that the committee at the present time would favor a bill creating a general law by which navigable streams might be bridged by complying with regulations or requirements of the War Department.

Mr. BORLAND. That is what I wanted to get at, the reason for that.

Mr. SIMS. As I said, in a unanimous-consent proceeding I do not feel warranted in taking up much time.

Mr. BORLAND. I did not know but that the gentleman might state it briefly. It is now necessary that all these bills should follow a stereotyped form as the form has been approved by the War Department as to the wording of the bill, and then the structure must conform to certain specifications.

Mr. SIMS. The practice is to refer all of these bills to the War Department as to whether or not the bridge will in any way impair or obstruct navigation. The committee never reports a bill until they get the report from the War Department and find that it does not impede or obstruct navigation.

Mr. BORLAND. I thought that there was some theory in the minds of the committee, and I did not know but that we might get at it.

Mr. SIMS. That is the policy of the committee.

Mr. BORLAND. Mr. Speaker, I have no objection to this bill, and I withdraw my pro forma amendment.

The SPEAKER. The question is on the committee amendments.

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

Mr. DILLON. Mr. Speaker, I move to amend the title by striking out the words "board of county commissioners of."

The motion was agreed to.

On motion of Mr. DILLON, a motion to reconsider the vote whereby the bill was passed was laid on the table.

BRIDGE ACROSS THE RED RIVER OF THE NORTH.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 15318) granting the consent of Congress to the village and township of Hendrum, Norman County, Minn., and the township of Elm River, Traill County, N. Dak., to construct a bridge across the Red River of the North on the boundary line between said States.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the village and township of Hendrum, Norman County, Minn., and the township of Elm River, Traill County, N. Dak., and their successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Red River of the North at a point suitable to the interests of navigation, at or near the section line between sections 23 and 26, township 144 north, range 49 west, fifth principal meridian, on the boundary line between Minnesota and North Dakota, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. DILLON, a motion to reconsider the vote by which the bill was passed was laid on the table.

BRIDGE ACROSS WEST PASCAGOULA RIVER, MISS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 15682) granting the consent of Congress to Jackson County, Miss., to construct a bridge across West Pascagoula River at or near Pascagoula, Miss.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

Mr. HARRISON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill S. 6041, of similar title, substantially the same as this bill, and that it be substituted for the bill H. R. 15682.

The SPEAKER. The gentleman from Mississippi asks unanimous consent that the bill S. 6041, on the Speaker's table, identical with this, be considered in lieu of House bill 15682. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the Senate bill.

The Clerk read as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to Jackson County, Miss., and its successors and assigns to construct, maintain, and operate a bridge and approaches thereto across the West Pascagoula River at a point suitable to the interests of navigation, at or near Pascagoula, Miss., in the county of Jackson, in the State of Mississippi, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. SIMS, a motion to reconsider the vote by which the bill was passed was laid on the table, and the bill H. R. 15682 was also laid on the table.

BRIDGE ACROSS SNAKE RIVER, WASH.

The next business on the Calendar for Unanimous Consent was the bill (S. 5310) to authorize the county commissioners of Walla Walla and Franklin Counties, Wash., to construct a bridge across the Snake River between Pasco and Burbank.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the county commissioners of Walla Walla and Franklin Counties, Wash., are hereby authorized to construct, maintain, and operate a bridge and approaches thereto across the Snake River over the southern end of Strawberry Island about 2 miles above the confluence of the Columbia and Snake Rivers, at a point suitable to the interests of navigation, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

The SPEAKER. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. DILLON, a motion to reconsider the vote by which the bill was passed was laid on the table.

Mr. MANN. Mr. Speaker, there are two Senate bridge bills on the House Calendar, just reported in, but not now on the Unanimous Consent Calendar. I think we may as well clean them up at the same time. They are Nos. 136 and 137 on the House Calendar.

Mr. SIMS. Those bills have been reported from the House Committee?

Mr. MANN. Oh, yes.

Mr. SIMS. I ask unanimous consent that we consider these bills at this time, Mr. Speaker.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that the bills referred to be considered at this time. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report them.

BRIDGE ACROSS EASTERN BRANCH OF ELIZABETH RIVER, VA.

The next business was the bill S. 5851, to extend the time for constructing a bridge across the Eastern Branch of the Elizabeth River, in Virginia.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the time for commencing and completing the bridge authorized by act of Congress approved January 2, 1915, to be built across the Eastern Branch of the Elizabeth River in the city of Norfolk, Va., by the Norfolk-Berkley Bridge Corporation, of Virginia, is hereby extended one year and three years, respectively, from date of approval hereof.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. SIMS, a motion to reconsider the vote by which the bill was passed was laid on the table.

BRIDGE ACROSS YELLOWSTONE RIVER, MONT.

The next business was the bill (S. 5805) permitting the Riverview Ferry Co. to construct, maintain, and operate a bridge across the Yellowstone River in the State of Montana.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Riverview Ferry Co., a corporation organized under the laws of the State of Montana, is hereby authorized to construct, maintain, and operate a bridge and approaches thereto across the Yellowstone River at a point suitable to the interests of navigation, 3 miles south of Sidney, in said State, from the west bank thereof on lot 3, section 9, in the county of Richland, State of Montana, to the east bank thereof, in the said county and State aforesaid, in section 16, township 22 north, range 59 east, Montana principal meridian, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. DILLON, a motion to reconsider the vote by which the bill was passed was laid on the table.

PATENTS FOR CERTAIN LANDS TO DUCHESNE, UTAH.

The next business on the Calendar for Unanimous Consent was the bill (S. 36) to authorize the Secretary of the Interior to issue patents for certain lands to the town of Duchesne, Utah.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized to issue patents to the town of Duchesne, Utah, for the southeast quarter of the southeast quarter, section 2, township 4 south, range 5 west, Uinta special meridian, for cemetery purposes: *Provided*, That if the said town shall at any time permit the said lands hereby granted to be used for any purpose not contemplated by this act the said lands shall revert to the United States.

With the following committee amendment:

Page 1, line 7, after the word "purpose," insert the words "upon the payment of $1.25 per acre."

The SPEAKER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

Mr. MANN. Mr. Speaker, I think there is only one piece of property to be conveyed here, and there should be only one patent. I therefore move to strike out the word "patents," in line 4, page 1, and insert in lieu thereof the word "patent."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend, on page 1, line 4, by striking out the word "patents" and inserting the word "patent."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question now is on the third reading of the Senate bill as amended.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. MAYS, a motion to reconsider the vote by which the bill was passed was laid on the table.

MARCUS A. JORDAN.

The next business on the Calendar for Unanimous Consent was the bill (S. 888) authorizing the Secretary of the Treasury to confer upon Marcus A. Jordan the life-saving medal of the first class.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, I object.

The SPEAKER. The gentleman from Illinois objects, and the bill is passed without prejudice.

LAND LEASE, MUSKINGUM RIVER, OHIO.

The next business on the Calendar for Unanimous Consent was the bill (S. 4026) authorizing and directing the Secretary of War to abrogate a contract lease of land and water power on the Muskingum River, Ohio.

The title of the bill was read.

The SPEAKER. Is there objection?

Mr. COOPER of Wisconsin. Mr. Speaker, I would like to know something about this bill. Why is it necessary to direct the abrogation of this lease? What are the circumstances attending it.

Mr. SIMS. Does the gentleman from West Virginia wish to explain this?

Mr. LITTLEPAGE. Mr. Speaker, the object of this bill is to secure a release to some gentlemen in the city of Parkersburg, W. Va., a district represented by my colleague [Mr. Moss], who is now sick and who is very much interested in the passage of this bill. The Government leased, through the Secretary of War, to these gentlemen, for the price of $8,800 per annum, the water power on the Muskingum River arising from Locks 3, 4, 5, and 6. They have paid the first year's rent, I understand, and upon the investigation of the water power it was ascertained it was a failure for the purposes for which it was leased; and the object of this bill is to release them from further obligation, and it requires them to pay an additional $8,800 for something from which they got no benefit.

Mr. SISSON. If they had made a good trade and had made a good deal of money, would they then ask to be released?

Mr. LITTLEPAGE. Well, I do not suppose that would hardly be a fair question here, would it?

Mr. SISSON. I want to know.

Mr. LITTLEPAGE. If the Government has gotten——

Mr. SISSON. Is it not true if they had in leasing this water power made a great deal of money out of it they would not be here asking to be relieved from their contract?

Mr. LITTLEPAGE. That is undoubtedly true, but when the people who lease from the Government are being destroyed and ruined and getting no earthly benefit out of it, I never conceived it the duty of the Government or the Government's representatives to break people up, and that is what this is doing.

Mr. SISSON. And I never heard of the Government being relieved when people were breaking the Government up and getting a great deal more for what the Government does.

Mr. LITTLEPAGE. But the gentleman as a Member of this House would not want to stand here and see the Government break up private citizens?

Mr. SISSON. The Government is not breaking up private citizens when a man gets a lease of water power and makes a bad trade. That is all; is not that it?

Mr. LITTLEPAGE. They took it upon the supposition and information that the water power was there.

Mr. SISSON. Is there any evidence to the fact that the Government had made certain representations concerning the water power to be developed and that those representations were untrue?

Mr. LITTLEPAGE. They took it on the supposition——

Mr. SISSON. But is there any evidence?

Mr. LITTLEPAGE. Has the gentleman read the report?

Mr. SISSON. I have not, and I do not know anything about it, except the statement of the gentleman.

Mr. LITTLEPAGE. I will read to the gentleman from the report.

Mr. SISSON. Do not read it all, but read that portion of the report, if there is any, where representation was made to these people who leased the water power and that the Government misstated the facts.

Mr. LITTLEPAGE. Let me say this to my distinguished colleague. This matter is outside of my district, but is in my State. There are two distinguished Members of this House very much interested in this bill and who are absent, unavoidably detained, one of them, a resident of Parkersburg, I fear may never enter this House again, and I do not want to take the chances of failing to do them a service and at the same time to impress upon the Members of this House the value and importance as well as the justice of this bill. Here are the facts, as set forth in the report:

The facts in regard to the pending bill are these: Pursuant to the act of Congress of August 11, 1888, the Secretary of War leased to W. W. Mills, of Marietta, Ohio; S. D. Camden and Henry H. Archer, of Parkersburg, W. Va., on February 28, 1913, certain land and water power on the Muskingum River in Ohio at Dams Nos. 3, 4, 5, and 6 for a period of 22 years, upon the payment of an annual rent of $8,800. The lease was made to the men named after advertising for bids, no other bidders appearing. The lessees named had acted upon a report made by a local engineer, but subsequent to signing the contract and preliminary to making the improvements they contemplated for developing the water power they secured a report from a firm of hydraulic engineers, Messrs. Sanderson & Porter, of New York, upon the feasibility of the plan. The report was distinctly unfavorable and disclosed the fact that for the purpose for which the water power in question was intended to be used, on account of flood waters at certain seasons of the year and a scarcity of water during the summer months and for other reasons given, the plan was not feasible. The lessees had expected to use the power to be developed for the production of electrical power for interurban trolley line purposes.

The fact that the water power was insufficient and uncertain made it impracticable to utilize it where constant energy was needed. It developed that it would be necessary to maintain a 100 per cent reserve combustion power station, and the lessees, after paying a year's rental

of $8,800 to the Government, decided to abandon the project. It is not held nor claimed that they have a legal right to ask the abrogation of the lease, but inasmuch as the enforcement of the lease would entail an unnecessary hardship under the circumstances, your committee has approved the bill, with the amendments suggested above, which provide that an additional year's rental shall be paid and that the money paid on the lease shall not be refunded. All the rights of the Government in and to the water power and land in question are intact and have been in nowise disturbed nor lessened in value. It is possible that the power can be utilized for other purposes not requiring constant application.

Mr. SISSON. Now, Mr. Speaker, under this report it seems that these individuals not only did not rely upon the Government's report but had a private firm of engineers—Sanderson & Porter, of New York—to make an investigation——

Mr. COADY. If the gentleman will permit an interruption, I desire to say they did not make the investigation until after the contract was entered into.

Mr. SISSON. The contract was not signed, so the report states; there was a tentative agreement that they would pay that much for the water power; but after getting this report from this firm of engineers they then signed the report, which would indicate that they had made some investigation of their own and were backing it up.

Mr. MANN. The gentleman did not hear the report read. It was subsequent to signing the contract——

Mr. SISSON. I am sure——

Mr. MANN. That is what the gentleman read. Subsequent to signing the contract they really made an investigation.

Mr. SISSON. The payment of money was made subsequent to this investigation.

Mr. CULLOP. But these people paid rental.

Mr. MANN. They first asked the opinion of the local engineers and bid on the power. They had a contract made out, and then had somebody investigate it who knew something about it. It is indisputable, as far as that is concerned, that they can not develop the power, and they should be relieved.

Mr. DEWALT. Will the gentleman yield?

Mr. SISSON. I yield to the gentleman.

Mr. DEWALT. This matter was given very careful consideration by the committee, and we considered it in this light, namely, that these lessees were asking for what lessees generally term equitable relief. They had made a lease for 17 years. The rental for each year was $8,800. They had used the lease for one year and had paid the rental for one year. After they made an investigation of the plant they came to the conclusion that they could not use the water at a profit, and they asked for this release. The department thought it ought to be granted to them, but the committee took the ground that if they asked for such a release they ought to do equity. In other words, they ought to pay one year's additional rent. And under that consideration the bill was reported favorably from the committee.

Mr. SISSON. In other words, they pay two years' rental in all?

Mr. DEWALT. Yes. Now they will have to pay $8,800 in addition.

Mr. FERRIS. If the gentleman will permit, I do not know intimately about this, but I wish to say that there are about 35,000,000 potential horsepower by water in the United States, only 6,000,000 of which has been developed, leaving nearly 30,000,000 undeveloped. Now, if it is shown that these people can not develop water power, I do not believe that the Congress ought to hold them too harshly to the contract. To hold them to a harsh contract and make them pay for something they never can get, I think would place a kind of blight on water-power development. The development of water power means cheap lights in your homes, on your streets, in your automobiles, and on your traction lines, and it ought to be developed as rapidly as possible; and the Government ought to take a very broad view, I think, in getting it developed. And for that reason, if it is made sure that they can not develop this power, I do not think that they ought to be forced to pay for it.

Mr. SISSON. Mr. Speaker, I realize fully the condition as it has been represented here by these gentlemen who seem to know the facts. But the Government has been frequently too ready, or the Congress has been too ready, or the department has been too ready, when those who have made contracts with the Government desire to be released, to permit them to rescind these contracts, whereas if dealing with the public on business principles they would not think of even asking to be relieved, but would make the best of a bad bargain. But in view of the representations made here by these gentlemen I shall not object and shall not consume more of the time of the House.

Mr. DEWALT. I wish to inform the gentleman further and the House that the committee took care in investigating to find out whether the interests of the Government had been preserved or any damage had been done.

Mr. SISSON. I understood that from the gentleman's first statement.

Mr. DILLON. Mr. Speaker, I wish to say that there were some members of the committee who thought that this second year's rental ought not to be required. I was one of that number. It seemed to me that the consideration had wholly failed. The Government thought that they had a water power, and these people thought that they were getting a water power, when they entered into this contract. They paid one year's rental of $8,800, and the committee reached the conclusion that they ought to pay a second year's rental. That makes $17,600 that they will have paid, and for which they absolutely get nothing. The consideration entirely failed, and it seems to me that these people could have gone into court upon the broad proposition of a failure of consideration and also upon the ground of a material mistake of the facts, and could have maintained a suit in equity for the cancellation of the lease.

Mr. SIMS. Mr. Speaker, I am not objecting to the bill, of course, but I want to make a little explanation, as some of the gentlemen seem to be a little bit off about the facts. This company is a trolley railroad line, as I understand it, and it wanted the power for the purpose of operating its trolley cars. Now, they were mistaken, and it seems the engineers on whom they relied were mistaken, as to the use of this water power when developed for that purpose, because in the winter the water was excessively high and in the summer excessively low. When they found out that they could not use it for operating their trolley system they had no use for it. But it does not follow that the water power proved absolutely valueless. Some gentlemen even on this side seem to think that this water power was valueless and that they were paying rental for which they got absolutely nothing.

Mr. DILLON. Will the gentleman yield to me at that point?

Mr. SIMS. Yes.

Mr. DILLON. Is it not true that these people were all laboring under a mistake of facts?

Mr. SIMS. They were laboring under a mistake of miscalculation. Beforehand they thought that a water power could be developed that would be sufficient to operate their cars, and they had no other use for it; but the House should not come to the conclusion that that power is utterly valueless because we release them under an equitable consideration. Because they were mistaken, and because they could not make the use they intended of the water power, it does not follow that the water power is utterly valueless. The Government hereafter, perhaps, can get all out of this water power, and possibly more, than it will get if this contract is carried out to the letter. I did not want the House to have the idea that they had something absolutely valueless, and that we have taken it off of their hands simply as a favor.

The SPEAKER pro tempore (Mr. TALBOTT). Is there objection to the consideration of the bill? [After a pause.] The Chair hears none.

Mr. MANN. Mr. Speaker, I move to amend the committee amendment, in line 6, by striking out the word "none" and inserting the words "no part."

Mr. COADY. Mr. Speaker, this bill is on the Union Calendar.

Mr. LITTLEPAGE. I ask unanimous consent, Mr. Speaker, that the bill be considered in the House as in Committee of the Whole.

The SPEAKER pro tempore. The gentleman from West Virginia asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of War be authorized, and he is hereby directed, to abrogate a contract lease entered into on the 28th day of February, 1913, between said Secretary of War, for the United States of America, and William W. Mills, of Marietta, Ohio, and S. D. Camden and Henry H. Archer, of Parkersburg, W. Va., for the land and water power at Dams Nos. 3, 4, 5, and 6 on the Muskingum River, in the State of Ohio. The Secretary of War is hereby directed to collect no rental under lease other than that already paid in full for the first year of the contract.

With committee amendments as follows:

After the word "That," in line 3, insert the following: "upon the payment of an additional $8,800 by the lessees to the United States Government, to be paid within six months after this act is approved and with the understanding that none of the moneys paid by the lessees to the United States Government shall ever be refunded, and in satisfaction of all claims of both parties and in cancellation of the contract between the parties."

Amend, on line 10, page 1, by striking out the word "abrogate" and inserting the word "cancel."

Amend, page 2, by striking out lines 8, 9, and 10.

Mr. MANN. Mr. Speaker, I move to amend the amendment on line 6, page 1, by striking out the word "none" and inserting the words "no part."

The SPEAKER pro tempore. The Clerk will report the amendment offered by the gentleman from Illinois.

The Clerk read as follows:

Amend, page 1, line 6, by striking out the word "none" and inserting the words "no part."

The SPEAKER. The question is on agreeing to the amendment offered by the gentleman from Illinois [Mr. MANN].

The amendment was agreed to.

The SPEAKER. The question is on agreeing to the Committee amendment as amended.

Mr. MANN. The original bill, Mr. Speaker, as passed the Senate, directed the Secretary of War to abrogate the contract. The House committee proposes to have the Secretary of War cancel the contract. Just what is the distinction? I should have supposed that abrogating the contract was the proper thing. That is to end it, not to cancel it.

Mr. SIMS. Mr. Speaker, while I do not remember just what occurred in the committee, I think it was suggested that abrogation would make it void ab initio, and that would involve the question of the Government receiving any rent at all.

Mr. MANN. I think it was just the other way. That is the reason why I raised the question, that to abrogate the contract was to end it.

Mr. COOPER of Wisconsin. When we abrogate a treaty we do not end it ab initio.

Mr. SIMS. The gentleman from West Virginia who reported the bill is not present, and in his absence I do not feel authorized to consent to the amendment.

Mr. MANN. I think the term "abrogate" is the proper term. The contract is not to be canceled. It is to be abrogated; it is to be ended.

Mr. SIMS. I do not remember just exactly what did happen or what was the reason actuating the committee in making the amendment.

Mr. RAYBURN. I do not think it makes much difference.

Mr. MANN. I remember the discussion of this bill in the Senate, and if it had been reported in the House in the way it passed the Senate, I would not have given my consent for its consideration by unanimous consent. While I think these people ought not to be compelled to pay $200,000, or any sum like that, for a 22-year contract for the use of this water power, yet they went into it with their eyes open. They were not fooled by the Government. The Government made no statement to them which was in any way incorrect. They had their own engineers, and if they were foolish or wise enough to accept the word of a local engineer and base their opinion upon that, it was their own doing. It is quite certain that if they had obtained a contract worth $8,800 a year we would not have heard anything more from them about breaking the contract. But I am not in favor of breaking them up. Perhaps the full enforcement of this contract would throw them into bankruptcy. I would not like to see that happen, but I would like to see them pay the $8,800. When this bill gets into conference will the House gently recede from its amendment?

Mr. SIMS. I took exactly the same position before the committee that the gentleman has just announced, and that we must insist upon the additional year's rent or there would be no bill.

Mr. RAYBURN. And I will say further that the Senator from Ohio [Mr. HARDING], who appeared before that committee, said that he would agree to this amendment.

Mr. LITTLEPAGE. I will say further, Mr. Speaker, to the gentleman from Illinois that these men have told me that they were ready to pay the $8,800.

Mr. SIMS. Apropos to what the gentleman from Illinois has said, I think they are getting off lightly.

Mr. MANN. I would like to offer an amendment to strike out of the committee amendment the words "and in cancellation of the contract between the parties," and then disagree to the committee amendment, to "cancel" in place of "abrogate," and then change "direct" to "authorize," so that we authorize the Secretary of War on payment of this money to abrogate the contract.

Mr. SIMS. I see no objection to such an amendment, speaking for myself. I do not care to speak for other members of the committee who may not be present.

Mr. MANN. I move to amend the first committee amendment by striking out the words "and in cancellation of the contract between the parties."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend, on page 1, lines 8 and 9, by striking out the words "and in cancellation of the contract between the parties."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question is on agreeing to the committee amendment as amended.

Mr. MANN. The first committee amendment only.

The SPEAKER. The question is on agreeing to the committee amendment as amended.

The committee amendment as amended was agreed to.

Mr. MANN. Mr. Speaker, before the next committee amendment is acted upon, I move to amend, in line 10, by striking out the word "directed" and inserting the word "authorized."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 1, line 10, by striking out the word "directed" and inserting the word "authorized."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. MANN. The next committee amendment is striking out "abrogate" and inserting "canceled." I think that committee amendment ought to be disagreed to.

The SPEAKER. The question is on agreeing to the amendment.

Mr. RAYBURN. The language reads, "the Secretary of War be authorized, and he is hereby directed." Would it not be better to say, "the Secretary of War is hereby authorized"?

Mr. MANN. I think the word "directed" ought to be stricken out. Let him have some responsibility.

Mr. RAYBURN. Strike out the word "directed" and put in "authorized."

Mr. MANN. The gentleman is correct. I move to strike out the language "and he is hereby directed."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 1, line 10, by striking out the words "and he is hereby directed."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. MANN. The next amendment ought to be disagreed to.

Mr. RAYBURN. I shall not object to that.

Mr. MANN. That amendment is to strike out "abrogate" and insert "cancel."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend, in line 10, by striking out the words "abrogate" and inserting the word "cancel."

The SPEAKER. Without objection, that amendment will be disagreed to.

There was no objection.

Accordingly the amendment was rejected.

The Clerk reported the next committee amendment, to strike out lines 8, 9, and 10, on page 2.

The amendment was agreed to.

The bill as amended was ordered to a third reading, and was accordingly read the third time and passed.

On motion of Mr. LITTLEPAGE and Mr. SIMS, a motion to reconsider the vote by which the bill was passed was laid on the table.

OLD POST OFFICE AT YORK, PA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 486) authorizing the Secretary of the Treasury to sell the old post-office building and site thereof at York, Pa.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

There was no objection.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and is hereby, authorized, in his discretion, to sell the present post-office building and the site thereof, situate at the corner of Philadelphia and Beaver Streets, in the city of York and State of Pennsylvania, either by public or private sale, after proper advertisement, at such time and on such terms as he may deem to be to the best interest of the United States, and to execute a quitclaim deed to the purchaser thereof, and to deposit the proceeds of said sale in the Treasury of the United States as a miscellaneous receipt.

With the following committee amendment:

Page 2, after line 2, insert the words "*Provided*, That the said property shall not be sold for less than $10,000."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

On motion of Mr. MOORE of Pennsylvania, a motion to reconsider the vote by which the bill was passed was laid on the table.

RELIEF OF MAIL CONTRACTORS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11150) for the relief of mail contractors.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

There was no objection.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay the amounts due to mail contractors for mail service performed for the United States in the States of Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Arkansas, Louisiana, and Texas from July 1, 1860, to May 31, 1861, and in the States of Kentucky, Missouri, and Tennessee from July 1, 1860, to June 30, 1862, and an appropriation of $225,000, or so much thereof as may be necessary, is hereby made, out of any money in the Treasury not otherwise appropriated, for the payment of said amounts: *Provided*, That amounts which have been paid by the United States and amounts which were paid by the Confederate States Government and the State of Arkansas out of moneys belonging to the United States, as shown by records filed in the office of the Auditor for the Post Office Department, shall not be again paid.

SEC. 2. That where any contractor named in section 1 of this act is deceased payment shall be made to the executor or administrator of the estate upon filing with the Auditor for the Post Office Department proper evidence of his appointment and qualification. Where, however, the amount due the estate of the decedent is $300 or less, and no demand is presented by a duly appointed and qualified administrator of the estate, payment may be made to the decedent's widow or widower or legal heirs in the following order of precedence:

First, to the widow or widower.

Second, if there be no widow or widower, then to the children or their issue, per stirpes.

Third, if there be no widow or widower or descendants, then to the father.

Fourth, if there be no widow or widower, children or their issue, or father, then to the mother.

Fifth, if there be no widow or widower, children or their issue, father or mother, then to the brothers and sisters and children of deceased brothers and sisters, per stirpes.

Sixth, if there be no widow or widower, children or their issue, father or mother, brothers or sisters or their descendants, then to the grandparents.

Seventh, if there be no widow or widower, children or their issue, father or mother, brothers or sisters or their descendants, or grandparents, then to the uncles and aunts and their descendants in equal parts. In following the foregoing order of precedence there shall be no distinction between the whole blood and the half blood: *Provided*, That this act shall not be so construed as to prevent payment from the amount due the decedent's estate of funeral expenses or a refundment of said expenses to the person or persons who actually paid the same when a claim therefor is presented before payment is made by the Secretary of the Treasury: *Provided further*, That where the contractor was a corporation or quasi corporation which has since been merged in or consolidated with another corporation or quasi corporation, payment shall be made to the corporation or quasi corporation with which the consolidation or merger has been made.

With the following committee amendments:

Page 2, strike out the figures "$225,000" and insert in lieu thereof the figures "$196,000."

Page 2, line 9, strike out the words "Auditor for the Post Office Department" and insert in lieu thereof the word "Treasury."

Page 3, after line 25, insert "*Provided further*, That the Secretary of the Treasury shall require in the case of each claim before making payment that any agent, attorney, firm of attorneys, or any person engaged heretofore or hereafter in preparing, presenting, or prosecuting said claim shall file with him a waiver of all said fees in excess of 20 per cent.

The SPEAKER. Is there objection?

Mr. COX. Mr. Speaker, reserving the right to object, I want an explanation. I do not understand the proviso at the top of page 2. The bill appropriates $196,000 to make payments to various estates in the South for mail contracts. The proviso reads:

Provided, That amounts which have been paid by the United States and amounts which were paid by the Confederate States Government and the State of Arkansas out of moneys belonging to the United States, as shown by records filed in the office of the Treasury, shall not be again paid.

This bill carries $196,000. Is it probable that that amount will be reduced when these figures are ascertained in the auditor's office, and it is found that any part of the $196,000 has been paid, either by the State of Arkansas or by the government of the Confederate States?

Mr. ASWELL. It will.

Mr. COX. Do you know how much that reduction will amount to? Have you any data or figures on that?

Mr. ASWELL. I will say to the gentleman that in the report there is a list of the claimants and of the amounts.

Mr. COX. I read the report, and noticed this very voluminous list.

Mr. ASWELL. The amount is stated in the report.

Mr. COX. This bill carries an appropriation of $196,000, with a proviso which, if I am able to interpret the language, seems to indicate that that amount may be reduced.

Mr. ASWELL. I will say to the gentleman that it may be reduced, and the chances are that it will be. No claim will be paid unless it is proven, as provided in the bill, that the claimant has not received the amount.

Mr. COX. Has the gentleman any data or figures showing the probability as to the amount which this sum of $196,000 may be reduced?

Mr. ASWELL. The $196,000 covers the maximum.

Mr. COX. I understand that.

Mr. ASWELL. Just how many of these claimants will fail to prove that they have not been paid no one can now foretell.

Mr. MANN. As long as the gentleman from Indiana has raised the question, he is entitled to have the information. I propose to offer an amendment changing the proviso. A good while ago the auditor reported in detail the amounts that were unpaid, and by a process of figuring reached an amount of $195,000 plus, setting out the claims, but stating that according to the records of the government of the Confederate States more of these claims had been paid than the Post Office Department here had knowledge of. They have a portion of the records, but not all. Just how many of these claims were paid by the government of the Confederate States no one knows. Of course we have no desire to pay them a second time if they were paid by the other government. So I have an amendment to take care of that.

Mr. COX. Very well. I have no objection, Mr. Speaker.

The SPEAKER. Is there objection?

There was no objection.

Mr. CULLOP. Mr. Speaker, I have an amendment. I move to strike out lines 3, 4, and 5 on page 3. I think the degree of kinship there provided for is too remote.

Mr. MANN. What becomes of the committee amendments?

The SPEAKER. The question is first on the committee amendments.

Mr. MANN. One at a time.

The SPEAKER. The question is on the first committee amendment.

The first committee amendment was agreed to.

The SPEAKER. The question is on the second committee amendment.

The second committee amendment was agreed to.

Mr. MANN. Will the gentleman allow me to offer an amendment at this time?

Mr. ASWELL. Yes.

Mr. MANN. In behalf of the gentleman from Delaware [Mr. MILLER], a member of the committee, I offer the following amendment.

The Clerk read as follows:

Amend, page 2, by striking out the proviso, beginning in line 4, and insert in lieu thereof the following:

"*Provided*, That amounts which have been paid by the United States and amounts which were paid by the Confederate States Government, or the State of Arkansas, as shown by records filed in the office of the Auditor for the Post Office Department, shall not be again paid, nor shall any claim be paid until the claimant or some one on his behalf shall by affidavit or otherwise show to the satisfaction of the Secretary of the Treasury that the amount claimed under this act was not paid by the Confederate States Government and remains justly due from the United States."

The SPEAKER. The question is on the amendment offered by the gentleman from Illinois.

The question was taken, and the amendment was agreed to.

Mr. MANN. Now, Mr. Speaker, I offer an amendment to the third committee amendment on behalf of the gentleman from Delaware [Mr. MILLER].

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

At the end of the bill strike out the period and add the following:

"And upon receipt of such waiver the Secretary of the Treasury shall pay, out of the amount found due the claimant, to said agent, attorney, firm of attorneys, or other person holding a power of attorney to represent the claimant, a fee not in excess of 20 per cent of the amount allowed and shall pay the residue to the claimant direct by warrant on the Treasury."

The SPEAKER. The question is on the amendment to the amendment offered by the gentleman from Illinois.

The amendment to the committee amendment was agreed to.

The committee amendment as amended was agreed to.

Mr. CULLOP. Mr. Speaker, I move to strike out, on page 3, all of lines 3, 4, 5, 6, 7, 8, 9, 10, and 11, down to the period in line 12.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 3, strike out lines 3, 4, 5, 6, 7, 8, 9, 10, and 11, down to the period in line 12.

Mr. MANN. The gentleman does not accomplish anything by his amendment.

Mr. CULLOP. If there is no relationship further than the widow, children, father, and mother, there is not anything to be paid, because there is nobody to pay it to.

Mr. MANN. Oh, yes; it will go to somebody anyhow. The gentleman moved to strike out the fifth provision.

Mr. CULLOP. No; I moved to strike out the fifth, sixth, and seventh down to the period in line 12. I make my amendment to include lines 3 to 12, so that it takes out all of the distant relatives.

Mr. ASWELL. Will the gentleman from Illinois allow me?

Mr. MANN. Certainly.

Mr. ASWELL. I wish to state that it would be unfortunate to strike out these lines in this bill. The bill has been prepared and worked upon for about three years, and this is exactly in the line of descent that is adopted in the Army and the Navy for payment. It has been carefully studied by the Auditor of the War Department and the Treasury Department and of the Post Office Department, and the committee has worked upon it many months. The bill has been in preparation three years. To strike out these lines would merely confuse it. Since the amendment of the gentleman from Illinois was adopted the claimant has to prove his undoubted right to the claim, and certainly striking out these lines would only tend to confuse the whole bill. I sincerely hope the House will not adopt the amendment.

Mr. NORTON. Mr. Speaker, I think the amendment of the gentleman from Indiana should be agreed to. The provisions included in lines 3 to 12 are altogether too much refined, and to hand this money down to people who are not any blood relation or near relation to the original claimant does not seem to me wise. It simply makes business for some attorneys. If there is no widow, no father, no mother, no children to claim it, that is as far as it should go.

Mr. ASWELL. Is it not a fact that if there is no claimant the money will not be paid out anyhow?

Mr. NORTON. He provides for claimants down to about the fourteenth generation.

Mr. ASWELL. If these lines are stricken out, does the gentleman not believe that then it will open the door for claims attorneys and encourage litigation and all sorts of confusion?

Mr. NORTON. I do not think anything of the kind. I think it would simplify the bill and would endanger no one who had any rights under the bill.

Mr. DUPRÉ. Will the gentleman yield?

Mr. NORTON. Yes.

Mr. DUPRÉ. The gentleman concedes the justice and legality of the claim, and why does he want to narrow the scope of payment to whom it should go?

Mr. NORTON. I do not think you should dig up forty-ninth cousins.

Mr. DUPRÉ. But you exclude brother and sister in this amendment.

Mr. NORTON. A brother and sister? I think they should be excluded; yes, if there is no widow, no father, no mother.

The SPEAKER. The question is on agreeing to the Cullop amendment.

The question was taken, and the amendment was rejected.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ASWELL, a motion to reconsider the vote by which the bill was passed was laid on the table.

CERTAIN LANDS IN THE STATE OF WASHINGTON.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 3132) providing for the homestead entry of certain lands in the State of Washington, and for other purposes.

The SPEAKER. Is there objection?

Mr. MANN. I object.

The SPEAKER. The bill will go over under objection, and the Clerk will report the next bill.

UNITED STATES MILITARY RESERVATION AT FORT MIFFLIN, PA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13984) granting to the city of Philadelphia, in the State of Pennsylvania, a right of way through the United States Military Reservation at Fort Mifflin, Pa.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized to grant to the city of Philadelphia, in the State of Pennsylvania, an easement of a right of way for municipal purposes over a strip of land 100 feet wide, extending from Back Channel to the Delaware River, through and over the United States military reservation located in the said city of Philadelphia, county of Philadelphia, State of Pennsylvania, and known as the Fort Mifflin (Pa.) Military Reservation; the said city of Philadelphia to have a right of way over said strip of land, and as well authority to construct a paved roadway and an industrial railway thereon for the use of the sewage-treatment works of the said city of Philadelphia, and as well to construct upon the end of said right of way at the Delaware River a wharf or pier, and as well to construct and maintain under said right of way conduits from the said sewage-treatment works to the Delaware River: *Provided*, That the exact location of the said right of way and wharf shall be fixed by the Secretary of War; that the construction thereof shall be under his supervision; and that the city of Philadelphia shall remove the old earth battery and level the entire portion of the reservation west of the old fort: *Provided further*, That no title or property right whatever to said strip of land or interest therein, by reason of said conveyance, is to pass to the city of Philadelphia, excepting the right of use as above set forth; that the use by the city of Philadelphia of the said strip of land for any other purpose than herein set forth or the failure to maintain as directed by the Secretary of War shall work a forfeiture of the above-recited right; that the said right of easement of the city of Philadelphia may be declared terminated and ended by the Secretary of War of the United States for such breach in the use or failure to maintain; and that upon such forfeiture being declared all right hereunder shall cease and determine: *And provided further*, That the right is reserved to the United States to occupy the said right of way for military or other governmental purposes.

With the following committee amendment:

Page 3, at the end of the bill, insert as a new section:

"SEC. 2. That the right to alter, amend, or repeal this act is hereby reserved."

The SPEAKER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

Mr. MANN. Mr. Speaker, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 2, line 25, strike out the words "for such breach in the use or failure to maintain" and insert in lieu thereof the words "at any time, and he may thereupon resume complete possession of such strip of land," and also strike out at the end of line 25, on page 2, and in line 1, page 3, the words "and that upon such forfeiture being declared."

The SPEAKER. The question is on agreeing to the amendment offered by the gentleman from Illinois.

Mr. MOORE of Pennsylvania. Mr. Speaker, will the gentleman yield?

Mr. MANN. Yes.

Mr. MOORE of Pennsylvania. Does the gentleman think the proviso on page 3 is not sufficient to cover the purpose of his amendment, that the right is reserved to the United States to occupy such right of way for military or other governmental purposes?

Mr. MANN. That might require court proceedings, and it might happen that the Secretary of War would want to take immediate possession of this strip of land. While that is not likely to happen under any normal conditions, a situation might arise where he would want to take possession immediately and not wait for court proceedings to determine whether there had been a forfeiture.

Mr. MOORE of Pennsylvania. I have no objection to the amendment, except that it seemed to me that the right was reserved to the Secretary to take the land back if he found such emergency as the gentleman thinks might exist.

Mr. MANN. No; only for a forfeiture.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill as amended.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. MOORE of Pennsylvania, a motion to reconsider the vote by which the bill was passed was laid on the table.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 4550. An act granting to the Portland, Vancouver & Northern Railway Co. a license to cross the Vancouver Barracks Military Reservation at Vancouver, Wash.

EMPLOYEES OF UNITED STATES NAVY YARDS, ETC.

Mr. TALBOTT. Mr. Speaker, I ask unanimous consent that the bill (H. R. 11168) granting 30 days' leave of absence in each year, without forfeiture of pay during such leave, to employees at United States navy yards, gun factories, naval stations, and arsenals, being 183 on the Calendar for Unanimous Consent, be passed over without prejudice.

The SPEAKER. Is there objection?

There was no objection.

NATIONAL MILITARY PARK, GETTYSBURG, PA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13342) to improve and maintain certain public roads and parts thereof included within the limits of the national park at Gettysburg, as defined by the act of Congress, entitled "An act to establish a national military park at Gettysburg, Pa.," approved February 11, 1895, and making an appropriation therefor.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I just want to say that while this is a bill reported from the Committee on Military Affairs, the Committee on Appropriations has jurisdiction of appropriations for the improvement of national cemeteries and military parks, and I therefore object.

The SPEAKER. The gentleman from Illinois objects and the bill goes over.

DAMS ACROSS NAVIGABLE WATERS.

The next business on the calendar was the bill (S. 3331) to amend an act entitled "An act to regulate the construction of dams across navigable waters," approved June 21, 1906, as amended by the act approved June 23, 1910, and to provide for the improvement and development of waterways for the uses of interstate and foreign commerce.

The SPEAKER. , Is there objection?

Mr. MANN. Mr. Speaker, I object.

The SPEAKER. The gentleman from Illinois objects, and the bill goes over.

CUTTERS FOR THE COAST GUARD.

The next business on the Calendar for Unanimous Consent was the bill (S. 2719) providing for the purchase or construction of cutters for the Coast Guard.

The SPEAKER. Is there objection?

Mr. MANN. I object.

The SPEAKER. The gentleman from Illinois objects, and the bill goes over.

PUBLIC HEALTH SERVICE.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 721) to provide divisions of mental hygiene and rural sanitation in the United States Public Health Service.

The SPEAKER. Is there objection?

There was no objection.

Mr. COADY. Mr. Speaker, I ask unanimous consent that this bill be considered in the House as in the Committee of the Whole House on the state of the Union.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

Be it enacted, etc., That there shall be established one additional division each of mental hygiene and rural sanitation in the United States Public Health Service, and said divisions shall be in charge of commissioned medical officers of the United States Public Health Service, detailed by the Surgeon General, which officers, while thus serving, shall be assistant surgeons general within the meaning of section 3 of the act approved July 1, 1902, entitled "An act to increase the efficiency and change the name of the United States Marine Hospital Service."

SEC. 2. That the duties of the division of mental hygiene shall be to study and investigate mental disorders and their causes, care, and prevention. The duty of the division of rural sanitation shall be to investigate improved methods of rutal sanitation and the prevention and suppression of communicable diseases.

The committee amendments were read, as follows:

Page 2, line 5, strike out the word "duty" and insert the word "duties."

Page 2, line 7, strike out the word "rutal" and insert the word "rural."

The amendments were agreed to.

The bill as amended was ordered to be engrossed and read the third time, was read the third time, and passed.

On motion of Mr. COADY, a motion to reconsider the vote by which the bill was passed was laid on the table.

SCHOONER LEDGE RANGE FRONT LIGHT, PA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13233) authorizing the Secretary of Commerce to exchange lands belonging to the United States at the mouth of Crum River, Pa., for other lands adjacent thereto, for the purpose of removing thereto the Schooner Ledge Range Front Light, so that it may be on the range of the channel of the Delaware River, and further authorizing the Secretary of Commerce to remove said range light from its present location to the property acquired by the exchange.

The SPEAKER pro tempore (Mr. LINTHICUM). Is there objection?

Mr. COADY. Mr. Speaker, I ask unanimous consent that this bill be considered in the House as in the Committee of the Whole House on the state of the Union.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland that this bill be considered as in the Committee of the Whole House on the state of the Union? [After a pause.] The Chair hears none.

Mr. MANN. Mr. Speaker, I ask unanimous consent to dispense with the reading of the original bill and to read the committee substitute.

The SPEAKER pro tempore. The gentleman from Illinois asks unanimous consent to dispense with the reading of the original bill and to read the substitute. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

Strike out all after the enacting clause and insert:

"That the Secretary of Commerce be, and he is hereby, authorized and directed to grant and convey to Alba B. Johnson and Samuel M. Vauclain all that certain lot or piece or parcel of land granted and conveyed to the United States of America by the president and company of the Philadelphia & Reading Railroad Co. by deed dated December 29, 1879, situated in Tinicum Township, in the county of Delaware and State of Pennsylvania, described according to a recent survey as follows: Beginning at a point in the south side of the entrance gate to the basin (for the storage of canal boats in winter) on the upper side of the mouth of Crum Creek and running thence along the cross bank dividing said basin from the meadow at the mouth of Crum Creek south 4° west 157 feet; thence south 13° 55′ east 100 feet; thence south 26° east 319 feet, more or less, to low-water line in the Delaware River; thence by the low-water line of the Delaware River and Crum Creek to the place of beginning, containing 5 acres, more or less, being part of a certain larger tract or parcel of land which the president, managers, and company of the Schuylkill Navigation Co., by a certain indenture dated the 12th day of July, A. D. 1870, recorded, etc., granted and conveyed unto the Philadelphia & Reading Railroad Co., their successors and assigns, together with the free and uninterrupted use, right, liberty, and privilege of passage in and along a certain roadway 16 feet wide next to the line of Crum Creek and upon the bank extending along and following the course of the said creek from the railroad of the Philadelphia & Wilmington Railroad Co. to the herein described premises as now in use; for and in consideration of the said Alba B. Johnson and Samuel M. Vauclain granting and conveying to the United States in fee simple the following described premises and rights of way situated on Crum Creek after its course shall have been changed, in the county of Delaware, State of Pennsylvania, now belonging to them, to wit:

"A certain piece or parcel of land whose boundaries shall form a parallelogram containing 1 acre, more or less, with 200 feet frontage on the east side of the new course of Crum Creek, Pa., which frontage shall be intersected by the axis or center line of Chester Range at a point to be approved by the Secretary of Commerce, together with the full and uninterrupted use, right, liberty, and privilege of passage for persons and vehicles over an accessible, direct, and improved right of way 16 feet wide wholly above high-water mark, from the premises above described to the right of way of the Chester Branch of the Philadelphia & Reading Railroad Co., the said right of way to be used in common and wholly maintained by the said Alba B. Johnson and Samuel M. Vauclain, their heirs, executors, administrators, and assigns, and kept in passable condition at all times, also a suitable and sufficient right of way for beams of light on the Chester Range line over all the property on said range line between the proposed permanent front and rear lights of Chester Range and to the southward and westward of said front light: *Provided*, That the Attorney General shall first examine the title of said Alba B. Johnson and Samuel M. Vauclain to said premises to be conveyed to the United States as aforesaid and shall furnish his written opinion in favor of the validity thereof: *Provided further*, That the said Alba B. Johnson and Samuel M. Vauclain, within such reasonable time after the passage of this act as may be determined by the Secretary of Commerce, shall deed to the United States the premises herein described to be conveyed by them: *And provided further*, That the conveyance of the herein described lot or parcel of land now owned by the United States of America shall not be made and the title thereto shall not pass to the said Alba B. Johnson and Samuel M. Vauclain until the following shall have been done by said persons without expense to the United States and to the satisfaction of the Secretary of Commerce:

"First. Erect a bulkhead of permanent construction on the easterly side of the new course of Crum Creek along the entire frontage of the premises to be conveyed to the United States of America, which shall consist of a timber-pile foundation supporting a timber platform and a gravity section concrete retaining wall of the same construction, as approved by the United States Engineer Office and now being erected on the southwest side of the mouth of Crum Creek.

"Second. Fill the entire plot of land to be conveyed to the United States with sand, earth, or other suitable material to an elevation of 12 feet above mean low water.

"Third. Dredge a channel from the premises to be conveyed to the United States to the main channel of the Delaware River having a depth of not less than 6 feet at mean low water.

"Fourth. Construct and make available for the purposes of the United States the improved right of way for the passage of persons and vehicles provided for herein: *And provided further*, That the conveyance shall not be made by the United States and title shall not pass from the United States until the permanent tower and dwelling proposed to be built by it on the land to be conveyed to it shall be ready for occupancy nor until all valuable lighthouse property is removed by the United States from the site to be conveyed by it: *And provided further*, That the existing lights now in use shall continue, without interference by said Alba B. Johnson and Samuel M. Vauclain, until the establishment by the United States of permanent lights on Chester Range.

"That the said Alba B. Johnson and Samuel M. Vauclain, upon the passage of this act and after the rendition by the Attorney General of his opinion in favor of the validity of the title to be conveyed to the United States and the conveyance to the United States of such title, shall have the right to proceed with improvements upon the tract to be conveyed by the United States, except upon such portions as are actually required for lighthouse purposes, under conditions to be prescribed by the Secretary of Commerce.

"That all expenses incurred by the United States in making the exchange of property herein authorized, including the cost of such abstracts, official certifications and evidences of title as the Attorney General may deem necessary, and all expenses incurred in removing such lighthouse property on the present site as may be advantageous to the interests of the Government, shall be payable from the appropriation, General expenses, Lighthouse Service, for the fiscal years in which such expenses are incurred."

The question was taken, and the substitute was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. MOORE of Pennsylvania, a motion to reconsider the vote by which the bill was passed was laid on the table.

RADIO EQUIPMENT FOR SEAGOING VESSELS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 14340) to furnish all seagoing vessels in the Lighthouse Service and all other seagoing vessels of the Department of Commerce with radio equipment and auxiliary power for the operation thereof.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. MANN. Mr. Speaker, I object.

The SPEAKER pro tempore. The gentleman from Illinois objects and the bill goes over without prejudice under the unanimous-consent agreement.

LIFE-SAVING STATIONS ON THE COAST OF GEORGIA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 6903) providing for the establishment of life-saving stations on Tybee Island, coast of Chatham County; on Warsaw Island, coast of Chatham County; on Ossabaw Island, Coast of Bryan County; on St. Catherines Island, coast of Liberty County; on Blackbeard Island and on Sapelo Island, coasts of McIntosh County, Ga.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. MANN. Mr. Speaker, I ask that the bill go over without prejudice.

The SPEAKER pro tempore. The bill goes over without prejudice under the unanimous-consent agreement.

LIGHTHOUSE RESERVATION AT SCITUATE, MASS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13419) authorizing the sale of the lighthouse reservation at Scituate, Mass.

The SPEAKER pro tempore. Is there objection to the consideration of the bill? [After a pause.] The Chair hears none.

Mr. COADY. Mr. Speaker, I ask unanimous consent that this bill be considered in the House as in the Committee of the Whole House on the state of the Union.

Mr. MANN. Mr. Speaker, I wish the gentleman would ask also to consider Senate bill 5910, which is Unanimous Consent Calendar 263, Union Calendar 228, in lieu of this bill.

Mr. COADY. Mr. Speaker, I make that request.

The SPEAKER pro tempore. Will the gentleman state his request?

Mr. MANN. To consider Senate bill 5910, a similar bill, in lieu of this bill, in the House as in the Committee of the Whole House on the state of the Union.

The SPEAKER pro tempore. The gentleman from Maryland asks unanimous consent to consider Senate bill 5910 in lieu of the House bill in the House as in the Committee of the Whole House on the state of the Union. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of Commerce is hereby authorized and directed, in his discretion, to sell to the town of Scituate, Mass., for the sum of $1,000, that certain piece or parcel of land pertaining to the Lighthouse Service situate and lying on Cedar Point, Scituate, county of Plymouth, Commonwealth of Massachusetts, described April 4, 1811, by Seth Sprague, Joshua Thomas, and Nathan Rice, a committee appointed under the act of the Legislature of the Commonwealth of Massachusetts, ceding jurisdiction and authorizing the appraisement of land at Scituate Harbor, and recorded in Plymouth register of deeds, book 116, folio 183, and Book B, page 159, as follows: All the land and beach that lies southeasterly of a line beginning on the easterly side of Cedar Point at a place that bears south 49½° west from the Old Sow, so called, and that bears north 4° east from the willow tree on the first cliff, so called, and from said place running south 74° west across said Cedar Point to the harbor, together with the right of way and shore privilege, including the improvements thereon, no longer required for lighthouse purposes: *Provided*, That said town of Scituate shall maintain the site and structure thereon as an historic landmark.

Mr. MANN. Mr. Speaker, I desire to offer two amendments.

The SPEAKER pro tempore. The Clerk will report the amendments.

The Clerk read as follows:

Page 1, line 4, after the word "sell" insert the words "and convey."

Page 2, beginning in line 2, strike out the words "folio 183, and Book B, page 159," and insert in lieu thereof the following: "pages 182 and 183."

The question was taken, and the amendments were agreed to.

Mr. MANN. Mr. Speaker, I ask unanimous consent that the gentleman from Massachusetts [Mr. WALSH] have leave to extend his remarks on this bill.

The SPEAKER pro tempore. The gentleman from Illinois asks unanimous consent that the gentleman from Massachusetts [Mr. WALSH] have leave to extend his remarks in the RECORD on this bill. Is there objection? [After a pause.] The Chair hears none.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. COADY, a motion to reconsider the vote by which the bill was passed was laid on the table.

Mr COADY. Mr. Speaker, I move that the House bill lie on the table.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

COAST GUARD STATION NEAR BARATARIA BAY, LA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 12282) to establish a Coast Guard station on the coast of Louisiana, in the vicinity of Barataria Bay.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. MANN. Reserving the right to object, it seems to me they make out a very slim excuse for this life-saving station.

Mr. DUPRÉ. I think if the gentleman had visited the scene, as I have, and was familiar with the conditions there, he would agree with the report of the Treasury Department on this subject. I will call the gentleman's attention to the fact——

Mr. MANN. If we would endeavor to put a life-saving station on every little inland lake that had 4 or 5 feet of water, I do not know what would happen to us.

Mr. DUPRÉ. I will say to the gentleman that this is not in that category. Grand Isle, which is only about a mile wide, separates this Barataria Bay from the Gulf of Mexico, and is actually exposed to all the elements.

Mr. MANN. Yes; but it is not exposed to the wave motion from the Gulf.

Mr. DUPRÉ. I will assure the gentleman from my personal knowledge that frequently the waves from the Gulf of Mexico have swept over Grand Isle and caused loss of life and property. It is in the neighborhood, if the gentleman is interested in literature, of scenes made famous by Lafcadio Hearn, in his artistic romance, "Chita: A Memory of Last Island."

Mr. MANN. That may be the principal reason for it, but that is not a real reason.

Mr. DUPRÉ. I am not pleading for it on account of any literary reason. There are some fifteen hundred people on that island and in that vicinity, and no later than last September there were 20 people wrecked there who would have lost their lives but for the fact that one man walked about 30 miles through marsh and lagoons, arriving at his destination almost dead, and a rescue party went from the good people of Gretna and Harvey to help them. There is no telephone or telegraph station down there, and the people really have no communication with the outside. The nearest Coast Guard station is several hundred miles away.

Mr. MANN. They could get a telephone station without much expense.

Mr. DUPRÉ. I hope the gentleman will not press his objection. I ask to substitute an identical Senate bill now on the Speaker's table for this one.

Mr. MANN. The committee will soon be reached on Calendar Wednesday, when there will be time for this bill. I ask that it go over without prejudice.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

CUTTERS FOR THE COAST GUARD.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 515) providing for the purchase or construction of cutters for the Coast Guards.

The SPEAKER pro tempore. Is there objection to the consideration of the bill?

Mr. MANN. Mr. Speaker, I ask that the bill go over without prejudice.

The SPEAKER pro tempore. The bill goes over without prejudice.

AIDS TO NAVIGATION.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 14338) to authorize aids to navigation and for other work in the Lighthouse Service, and for other purposes.

The SPEAKER pro tempore. Is there objection?

Mr. MANN. I ask that the bill be laid aside without prejudice.

The SPEAKER pro tempore. Is there objection?

Mr. MOORE of Pennsylvania. Mr. Speaker, I was not here when this original agreement was made. The putting over of a bill does not necessarily put it off the calendar?

Mr. MANN. No; it retains its place on the calendar.

The SPEAKER pro tempore. The bill goes over without prejudice.

TRANSPORTATION OF IMMATURE CALVES.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 549) to regulate the interstate transportation of immature calves.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none.

The bill was read as follows:

Be it enacted, etc., That no person, firm, or corporation shall ship or deliver for shipment, nor shall any common carrier nor the receiver, trustee, or lessee thereof, receive for transportation or transport from one State or Territory or the District of Columbia into or through another State or Territory or the District of Columbia any live calf not accompanied by its mother unless the same is six weeks old or over: *Provided*, That the Secretary of Agriculture may make rules and regulations permitting, in cases of emergency only, the shipment in interstate commerce of live calves less than six weeks old; and the Secretary of Agriculture may also permit, under such restrictions as he may deem proper, one shipment in interstate commerce of live calves less than six weeks old and over three weeks old when the entire time consumed in such interstate shipment to final destination, including time of loading and unloading, does not exceed 12 hours.

SEC. 2. That any person, firm, or corporation, or any common carrier or the receiver, trustee, or lessee thereof, who shall violate any of the provisions of this act shall, upon conviction, be deemed guilty of a misdemeanor and shall be punished by a fine of not less than $20 nor more than $50 for each calf offered for shipment, shipped, or received for transportation or transported in violation of any of the provisions of this act.

Mr. COX. Mr. Speaker, I would like to have the gentleman explain this bill. I am fairly with him, but I do not understand some of the language in section 1, which is as follows:

And the Secretary of Agriculture may also permit, under such restrictions as he may deem proper, one shipment in interstate commerce of live calves less than six weeks old and over three weeks old, when the entire time consumed in such interstate shipment to final destination, including time of loading and unloading, does not exceed 12 hours.

What does that mean? Does it mean one shipment?

Mr. HAMILTON of Michigan. Mr. Speaker, this bill was drawn in the Bureau of Animal Industry, and the purpose of the language referred to by the gentleman from Indiana, as I understand it, is to permit the shipment of calves for breeding purposes.

Mr. COX. What I am trying to get at, if I can make myself plain, is this, Would that limit a shipper to only one calf?

Mr. HAMILTON of Michigan. Only one shipment.

Mr. COX. Just one shipment. It would mean, then, he would be entitled to one shipment one day and could ship the next day, and the next, and so on?

Mr. HAMILTON of Michigan. I should say the words "under such restrictions as he may deem proper, one shipment in interstate commerce of live calves less than six weeks old," and so forth, mean that application may be made from time to time, but that the Secretary of Agriculture can not make a blanket order.

Mr. COX. Then the gentleman's construction of that language is that a person seeking to comply with this law would first have to get permission from the Agricultural Department?

Mr. HAMILTON of Michigan. But he could not have a general order covering the season.

Mr. COX. And not for each individual shipment.

Mr. HAMILTON of Michigan. Does not it seem so to the gentleman?

Mr. COX. It seemed so to me, but I did not know whether it was so or not.

Mr. HAMILTON of Michigan. That was my understanding of it.

Mr. COX. And that would mean that if the shipper had half a dozen calves, say, to ship, he would have to apply to the Agricultural Department for a special permit each time that he shipped one, if he shipped them at different times.

Mr. HAMILTON of Michigan. I think so. The Agricultural Department seemed to think that was the better way to do it. It would seem to me, however, that if the shipper knew that at certain times he was going to ship calves for breeding purposes, he ought to be permitted to get an order covering shipments on certain days in the future, although I presume there will be no difficulty about the operation of this as it is written.

Mr. COX. Does the gentleman think that this language applies to the shipment of calves for breeding purposes?

Mr. HAMILTON of Michigan. That was the purpose of it; yes.

Mr. MANN. That is what this exception is in for, in order to permit them to be shipped.

Mr. STEPHENS of Texas. I desire to know if it changes the law in reference to shipping these calves, to protect them?

Mr. HAMILTON of Michigan. There is no Federal law, and great abuses have grown up in that connection.

Mr. STEPHENS of Texas. This would not affect that?

Mr. HAMILTON of Michigan. There is a 28-hour law, but the Bureau of Animal Industry is unable to reach these abuses. The fact is that these young calves, sometimes a day old, are taken out of warm stables, picked up by dealers for a dollar or two dollars apiece, collected at various stations along the road, shipped out, and kept sometimes two or three days on the road. These little chaps have no means of getting any nourishment except from their mothers, and many of them die on the way.

Mr. STEPHENS of Texas. Would they not be violating the 28-hour law, fixing the time that stock can be kept on a train?

Mr. MANN. This is the same bill as was proposed in the last Congress. The gentleman and myself and others agreed to it.

Mr. HAMILTON of Michigan. It is the same thing. Mr. Speaker, I want to offer an amendment, in order to keep faith with some of the New York Members. On page 1, line 9, I offer to amend by striking out the word "six" and substituting the word "four," and in line 12 the same change; and if I may be permitted to go on, in line 3, page 2, also strike out "six" and substitute "four."

Mr. COX. What is the purpose of that amendment? Does not that practically destroy the gentleman's bill?

Mr. HAMILTON of Michigan. No.

Mr. MANN. That is the way we passed it before.

Mr. COX. I like the six weeks much better than the four weeks.

Mr. HAMILTON of Michigan. So do I.

Mr. MANN. There was quite a contest before the committee on that.

Mr. HAMILTON of Michigan. That is the only way I could get it out.

The SPEAKER pro tempore. The Clerk will report the amendment offered by the gentleman from Michigan [Mr. HAMILTON].

The Clerk read as follows:

Amend, page 1, line 9, by striking out the word "six" and substituting the word "four"; on page 1, line 12, by striking out the word "six" and substituting the word "four"; and on page 2, line 3, by striking out the word "six" and substituting the word "four."

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. HAMILTON of Michigan, a motion to reconsider the vote whereby the bill was passed was laid on the table.

WAGES OF EMPLOYEES UNDER NAVY AND WAR DEPARTMENTS.

Mr. GRAY of Indiana. Mr. Speaker, I want to ask that No. 185 on the Unanimous Consent Calendar, the bill H. R. 9548, be passed over without prejudice.

The SPEAKER pro tempore. The gentleman from Indiana [Mr. GRAY] asks unanimous consent that No. 185 on the Unanimous Consent Calendar be passed over without prejudice. Is there objection?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the next bill.

AMERICAN NATIONAL RED CROSS.

The next business in order on the Calendar for Unanimous Consent was the bill (H. R. 14426) to amend section 6 of the act entitled "An act to incorporate the American National Red Cross," approved January 5, 1905.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection?

Mr. WEBB. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole, although it is not properly on the Union Calendar. It simply makes a change from January 1 to July 1.

The SPEAKER pro tempore. Is there objection to the consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The gentleman from North Carolina [Mr. WEBB] asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That section 6 of the act entitled "An act to incorporate the American National Red Cross," approved January 5, 1905, is hereby amended to read as follows:

"SEC. 6. That the said American National Red Cross shall on the 1st day of July of each year make and transmit to the Secretary of War a report of its proceedings for the fiscal year ending June 30 next preceding, including a full, complete, and itemized report of receipts and expenditures of whatever kind, which report shall be duly audited by the War Department, and a copy of said report shall be transmitted to Congress by the War Department."

Mr. MANN. Mr. Speaker, I move to amend, on page 1, line 8, by striking out the word "on" and inserting in lieu thereof "as soon as practicable after."

The SPEAKER pro tempore. The Clerk will report the amendment offered by the gentleman from Illinois.

The Clerk read as follows:

Amend, page 1, line 8, by striking out the word "on" and inserting the words "as soon as practicable after."

Mr. MANN. The bill provides that they shall make report on July 1 for the fiscal year ending June 30, including all expenditures. That is pretty rapid work. My amendment will make it read "as soon as practicable after the 1st of July" they shall make the report for the preceding fiscal year.

Mr. WEBB. I have no objection to that, Mr. Speaker. This is introduced at the request of the War Department.

Mr. MANN. Of course they could not put in the report on the day after the close of the fiscal year, and we should not require that they should violate the law.

The SPEAKER pro tempore. The question is on agreeing to the amendment offered by the gentleman from Illinois.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. WEBB, a motion to reconsider the vote whereby the bill was passed was laid on the table.

The SPEAKER pro tempore. The Clerk will report the next bill.

SALE OF INTOXICATING LIQUORS TO MINORS.

The next business in order on the Calendar for Unanimous Consent was the bill (H. R. 465) to prohibit the sale or gift of intoxicating liquors to minors within the admiralty and maritime jurisdiction of the United States.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That section 288 of the act approved March 4, 1909, entitled "An act to codify, revise, and amend the penal laws of the United States," is hereby amended by adding thereto the following as a new section:

"SEC. 288a. Whoever shall sell, give, or dispense in any manner intoxicating liquors of any kind as a beverage to any person under the age of 21 years, within the admiralty and maritime jurisdiction of the United States, shall be fined in any sum not exceeding $500 for each offense. The master of every vessel is directed to enforce this prohibition, and in case any violation of this act is permitted or is committed upon any vessel by any officer or employee of said vessel, then said vessel shall be fined in any sum not exceeding $500, the amount of the fine to be determined by the Secretary of Commerce in the same manner that other fines for violation of the navigation and inspection laws are now determined under section 5294 of the Revised Statutes of the United States."

Mr. COX. Mr. Speaker, I move to amend by striking out the language, in line 10, "to any person under the age of 21 years."

Mr. MANN. You might as well throw the bill away as to do that.

Mr. COX. I think the bill is a good measure as far as it goes.

Mr. MANN. I know; but if it is going to be radically amended we should not take it up in the absence of the gentleman who introduced it.

Mr. COX. Then, Mr. Speaker, I will withdraw my suggestion.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The SPEAKER pro tempore. The Clerk will report the next bill.

PREDACEOUS FISHES AND AQUATIC ANIMALS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11254) to conduct investigations and experiments for ameliorating the damage wrought to the fisheries by predaceous fishes and aquatic animals.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. COX. Reserving the right to object, I should like an explanation of this bill.

Mr. MANN. We passed this bill in the last House after quite full consideration. The bill is introduced by the gentleman from Maine [Mr. HINDS], the former parliamentary clerk of the House, and the proposition contained in it is a fair and legitimate one. The gentleman from Maine has given great study to this subject.

Mr. COX. Reserving the right to object, I will say that the author of the bill, the gentleman from Maine [Mr. HINDS], is a man for whom I have the very profoundest regard. I understand that his health at this time is not the best. The bill strikes me as committing the Government to a very far-fetched policy.

Mr. MANN. What the gentleman says has a great deal of virtue in it, but we passed this bill in the last House after a good deal of consideration, waiving that part of it which might be considered objectionable. The fact is, the Secretary of Commerce told me some time ago, in connection with some ocean fish, I have forgotten now what they were—that they had put these fish in carts——

Mr. COX. They were mussels, according to his own letter.

Mr. MANN. It was something else first—that they had done this until they had gotten people very anxious to eat the fish. I do not know whether that is a long bow or not. I understand they have done somewhat the same thing as to hotels.

The dogfish, which this bill seeks to get after, is a very destructive fish, that practically ruins, to a large extent, fishing grounds where other fish are caught. The gentleman from Maine [Mr. HINDS] thinks it may be possible not only to get rid of the dogfish as far as their preying upon other fish is concerned, but also to get people to acquire a taste for them, so that instead of being an evil they will become a blessing.

Mr. COX. I rather doubt the wisdom and propriety of the Government educating the taste of the people to like dogfish.

Mr. MANN. After all, that is one of the things that the Bureau of Fisheries is doing as to other fish.

Mr. COX. This is the first time that I know of the Government attempting to teach a love for the taste of dogfish.

Mr. MANN. But the gentleman knows that probably nobody ever has an appetite for oysters without acquiring it.

Mr. COX. Oh, that is not a fair comparison at all, to compare dogfish with oysters. Oysters have been eaten since the days when the Pilgrims landed on Plymouth Rock.

Mr. MANN. I suppose the gentleman would not eat snails?

Mr. COX. No; and I would not want the Government to try to teach me to acquire a taste for snails.

Mr. MANN. If we had great quantities of snails going around and destroying other things, it would be a good thing for the gentleman to acquire the taste.

Mr. MONDELL. If the gentleman will yield, I will remind him of the work that was undertaken by the Department of Commerce, possibly without authority, in connection with the introduction of the tilefish. The tilefish was formerly a food fish, but it disappeared from eastern waters for a long time. Several years ago it reappeared, and the Secretary of Commerce, by guaranteeing a reasonable profit to the captain of a certain fishing boat, persuaded him to catch and sell tilefish. By doing that the tilefish were reintroduced, and have, as I understand, become quite popular in the market as food fish. In that case it did not cost the Government anything——

Mr. COX. But this is costing the Government something. This bill proposes to appropriate $25,000, and if the bill becomes a law that will probably become a permanent appropriation.

Mr. MANN. Oh, I think not. I fully agree with the argument of the gentleman, as far as that is concerned, but——

Mr. COX. I think they have already solved this problem as the Secretary of Commerce can solve it. I do not know that I am going to object to the bill. The letter of the commissioner is very enthusiastic. I have read it two or three times. He says:

The belief is entertained that the proper method of procedure is not to exterminate the dogfish by indiscriminate destruction, but to convert a nuisance into an economically useful product and a source of profit. It is believed that the only way in which this can be accomplished is to induce the utilization of this pest as food. Although this has been scoffed at by some who would be the first and principal beneficiaries, the project is practical and economically sound. The dogfish is not eaten in the United States solely on account of prejudice. It is palatable and nutritious, and its food is but little different from that of the haddock and other valued food fishes. It is extensively eaten in Europe, and during the past few years it has grown in favor in England, where 5,000,000 pounds, with a value to the fishermen of $82,000, were marketed in 1914. This large and increasing production of a cheap and excellent food is a boon to the people at large, while the fishermen receive about $28 per ton for their catch as against $8 which they would receive if the Government were to engage in the unprofitable production of fertilizer under the conditions recently proposed in this country.

They seem to have solved the problem there, and I do not like to see the Government commit itself to the establishment of a commissary department to enable the people to enjoy the taste for a peculiar kind of fish that is already on the market in England. I think the letter is rather æsthetic. I do not think he knows very much about the subject, but out of due deference to the gentleman from Maine [Mr. HINDS] I shall not object.

Mr. MOORE of Pennsylvania. Will the gentleman yield for a question?

Mr. COX. Yes; I will yield.

Mr. MOORE of Pennsylvania. I wanted to know whether the gentleman was serious about introducing dogfish as human food during the present administration?

Mr. COX. Oh, no; we do not need it. We do not need dogfish now. If we did, I might not raise any question about it.

Mr. MANN. Well, probably both gentlemen have eaten dogfish without knowing it. I am told by a very distinguished authority that fillet of sole, which is one of the most popular dishes there is, is nine times out of ten, or maybe less often, dogfish—and fillet of sole is one of my favorite dishes.

Mr. COX. If this bill becomes a law, does the gentleman think this will practically amount to a permanent appropriation?

Mr. MANN. I do not think so.

Mr. COX. I will withdraw my objection, Mr. Chairman.

The SPEAKER pro tempore. Is there objection to the consideration of the bill?

Mr. MANN. I ask unanimous consent to consider in lieu of the House bill Senate bill 4401, which is No. 193 on the Unanimous Consent Calendar, and is the same bill. I ask unanimous consent to consider it in the House as in Committee of the Whole.

The SPEAKER pro tempore. The gentleman from Illinois asks unanimous consent to consider S. 4401. Is there objection?

There was no objection.

The SPEAKER pro tempore. Is there objection to considering the bill in the House as in Committee of the Whole House on the state of the Union?

There was no objection.

The Clerk read the bill S. 4401, as follows:

Be it enacted, etc., That the Commissioner of Fisheries be, and he is hereby, authorized and directed to conduct investigations and experiments for the purpose of ameliorating the damage wrought to the fisheries by dogfish and other predacious fishes and aquatic animals.

SEC. 2. That the said investigations and experiments shall be such as to develop the best and cheapest means of taking such fishes and aquatic animals, of utilizing them for economic purposes, especially for food, and to encourage the establishment of fisheries and markets for them.

SEC. 3. That the sum of $25,000, or so much thereof as may be necessary, is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to enable the Commissioner of Fisheries to carry out the provisions of this act, the same to be immediately available.

The bill was ordered to be read a third time, was read the third time, and passed.

The bill H. R. 11254 was laid on the table.

TITANIC MEMORIAL ASSOCIATION.

The next business on the Calendar for Unanimous Consent was House joint resolution 104, granting permission to the Woman's Titanic Memorial Association to erect a memorial on public ground in the city of Washington, D. C.

Mr. MANN. Mr. Speaker, I ask to have that bill go over without prejudice.

EXCLUSION OF INTOXICATING LIQUORS FROM NATIONAL PARKS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 6814) to exclude intoxicating liquors from national parks and national forest reserves.

Mr. RANDALL. Mr. Speaker, I ask to have that bill passed without prejudice.

ELECTRIC RAILWAY, FORT BARRANCAS, FLA.

The next business on the Calendar for Unanimous Consent was the bill (S. 3344) to authorize George H. Hervey, of Pensacola, Fla., to construct and operate an electric railway line on the Fort Barrancas and Fort McRee Military Reservations, Fla., and for other purposes.

The SPEAKER pro tempore. Is there objection?

Mr. MANN. Reserving the right to object, there is no information contained in the report, and I will ask to have it laid over without prejudice.

PATENTING CERTAIN PROPERTY AT PENSACOLA, FLA.

The next business on the Calendar for Unanimous Consent was the bill (S. 3581) authorizing the Secretary of the Interior to issue a patent to that portion of land, being a fractional block, bounded on the north and east by Bayou Cadet, on the west by Cevallos Street, and on the south by Intendencia Street, in the old city of Pensacola, in the State of Florida.

The SPEAKER pro tempore. Is there objection?

Mr. MANN. Reserving the right to object——

Mr. FERRIS. Mr. Speaker, the gentleman from Illinois will probably remember that this bill, with the next one on the calendar, were passed by the House last year. They relate to lots of land that have been occupied for more than 50 years.

Mr. MANN. This is plainly land that belongs to the Government. Why should not the Government get paid something for it?

Mr. FERRIS. Yes; the land does belong to the Government, but they were very lax about the title and the records were destroyed. The House has heretofore passed bills relating to these tracts that have been occupied. The gentleman from Florida [Mr. WILSON] is now at home.

Mr. MANN. It looks to me from the report of the case as though some of these persons squatted on the land, or took possession of it, did not pay anything for it, and have been in possession for so many years that now they think they own it. Congress passed a law as far back as 1832, and I think that was amendatory of an act passed in 1822, giving all these people authority to make application where titles were not perfect. This is what the Assistant Secretary of the Interior says:

After a careful examination of the records and said American State Papers relative to the claim for lots in Pensacola, I am unable to find that any application was ever made to said commissioners for the land above described, or that the title thereto has ever been confirmed by Congress to any person. It therefore appears that the title thereto remains in the United States.

Mr. FERRIS. There is no controversy about it. It is a question whether the United States is willing to give the land to these people who have occupied it so long. The House passed both bills last year.

Mr. MANN. Well, that shows that somebody somewhere else thought it not proper to pass them, and I think we had better let it go over and see whether the Government ought not to get something for the land that it owns.

Mr. FERRIS. Very well, but I think the gentleman will be induced to withdraw his objection when the gentleman from Florida gets back and explains the situation. It has been occupied by these people so long, and the Department of the Interior winds up by saying that "under the conditions mentioned, the department sees no objection to the passage of the bill." And the conditions are that the claimant shall make proof that he and his grantors have had continuous possession of it under a claim of ownership for the last 20 years.

Mr. MANN. I do not remember that this bill passed the House in the last Congress.

Mr. FERRIS. The gentleman from Florida told me that both bills passed last year, but died in the Senate. I know he came before the committee with some bills that were not quite in form last year, and we reported substitutes.

Mr. MANN. The gentleman is probably correct. I know that we passed some bills, but I have no recollection or memorandum that this was one of them. I ask to have the bill laid over.

Mr. FERRIS. The next bill is in the same position; they are both in the same category.

Mr. MANN. I will ask to have that laid over, too.

TOWN SITE OF PLUMMER, IDAHO.

The next business on the Calendar for Unanimous Consent was the bill H. R. 14725, authorizing the Secretary of the Interior to subdivide a part of the town site of Plummer, Idaho, and for other purposes.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to cause to be subdivided that part of the town site of Plummer, Cœur d'Alene Reservation, Idaho (which town site was created under the act of June 21, 1906; 34 Stat. L., pp. 325, 327), described as the southeast quarter of section 18, township 46 north, range 4 west, into streets or roads and into tracts of not exceeding 5 acres each, and to cause the tracts to be appraised, except such as are hereinafter reserved for the town of Plummer, and sold at not less than their appraised value.

SEC. 2. That the Secretary of the Interior is also authorized and directed to cause a patent to be issued to the town of Plummer for 5 acres of land so subdivided for the purpose of a reservoir site for the Plummer waterworks system, described as the east half of the northeast quarter of the southeast quarter of the southeast quarter of section 18, township 46 north, range 4 west, as well as 10 acres of the land so subdivided for the purpose of a public park, described as the northwest quarter of the northwest quarter of the southeast quarter of section 18, same township and range as above.

SEC. 3. That the purchase price of the tracts authorized to be sold shall be paid at such times and in such installments and upon such terms as the said Secretary may direct, and he shall cause 20 per cent of the net proceeds arising from said sale to be set apart and expended under his direction in the construction of schoolhouses or other public buildings or improvements within said town site.

Mr. FERRIS. Mr. Speaker, I ask unanimous consent to consider this bill in the House as in Committee of the Whole.

The SPEAKER pro tempore. The gentleman from Oklahoma asks unanimous consent to consider the bill in the House as in Committee of the Whole. Is there objection?

There was no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. FERRIS, a motion to reconsider the vote whereby the bill was passed was laid on the table.

HOMESTEADS IN WIND RIVER RESERVATION, WYO.

The next business on the Calendar for Unanimous Consent was the bill (S. 733) providing for patents to homesteads on the ceded portion of the Wind River Reservation, in Wyoming.

The SPEAKER pro tempore. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Oklahoma [Mr. FERRIS] if the committee substitute to the Senate bill is satisfactory to the gentleman from Wyoming [Mr. MONDELL]?

Mr. FERRIS. I have not interrogated him recently; but he sits so close to the gentleman from Illinois that I think he would be able to answer that himself.

Mr. MANN. What I want to know is whether he had indicated to the gentleman from Oklahoma his satisfaction or dissatisfaction with the committee substitute?

Mr. FERRIS. If he did, I have forgotten it. I do not recollect ever having any conversation with him about it.

Mr. MANN. It might make a difference. I think the committee substitute is a reasonable proposition, while the Senate bill is a vicious proposition.

Mr. MONDELL. Mr. Speaker, if the gentleman is really seeking information——

Mr. MANN. I am, because I am not going to let this bill go through by unanimous consent unless I know more about it.

Mr. MONDELL. I will state to the gentleman that the gentleman from Wyoming originally introduced and succeeded in having passed the act of April 27, 1912, which he believed was a very good act, and as this amendment which is now before the House is practically a copy of that act, the gentleman from Wyoming thinks it is excellent legislation.

Mr. MANN. But what I want to get at is whether, when it comes to a conference, the House conferees will have to meet not only the Senate conferees but also the gentleman from Wyoming [Mr. MONDELL] in the House as against the House amendment. If this bill is passed by unanimous consent with the House substitute, does the gentleman from Oklahoma opine that that probably would be the law if any law is enacted?

Mr. FERRIS. I have had some experience in going into conferences at the other end, and I never know what is going to happen to us. I try to uphold the views of the House always.

Mr. MANN. Then I think the gentleman would better find out, for otherwise I think it ought to go over.

Mr. MONDELL. I hope the gentleman will not ask to have the bill laid over.

Mr. MANN. If the gentleman does not know what is going to happen in conference, I will have to have the bill laid over until he can find out.

Mr. FERRIS. In good faith, how can anyone tell?

Mr. MANN. I could tell. I am not going to pin the gentleman down to any statement.

Mr. FERRIS. I think the gentleman from Illinois knows it would be hardly appropriate for me to say that I am going to bull a conference at the other end.

Mr. MANN. I asked a very simple question, which was susceptible of easy answer.

Mr. FERRIS. I have not intended to evade anything. What answer did the gentleman expect?

Mr. MANN. So that we could know what the gentleman is going to do without putting any declaration into the RECORD, and without being offensive to any other gentleman.

Mr. FERRIS. I will say that I will try to uphold the House, as I do on every occasion.

Mr. MONDELL. I will say to the gentleman from Illinois that I think the provision before the House in the form of an amendment is wise and proper legislation. I will say to him, as I said to the Committee on the Public Lands at the time I presented the matter to them, that I did not ask the committee to report favorably the Senate bill, and did not think they would be justified in doing it. I have not changed my mind in regard to the matter since. I suggested this amendment to the committee, as the gentleman will recall, as the proper legislation, and I shall not change my mind in that regard.

The SPEAKER pro tempore. Is there objection?

Mr. MANN. If this ever gets through with this Senate provision, I shall never give consent again so long as I live.

The SPEAKER pro tempore. The Chair hears no objection.

Mr. MONDELL. Mr. Speaker, I ask unanimous consent that the bill may be considered in the House as in Committee of the Whole.

The SPEAKER pro tempore. The gentleman from Wyoming asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The Clerk read as follows:

Be it enacted, etc., That all persons who prior to the passage of this act have made valid homestead entry on the ceded portion of the Wind River Reservation in Wyoming and established residence thereon in good faith, but who through no fault of their own were unable to secure water for the irrigation of their lands, shall be granted patent for their lands upon payment of the Indian price for the land and without the necessity of proving continuous residence thereon.

With the following committee amendment:

Strike out all after the enacting clause and insert:

"That any person, who, prior to the passage of this act, made homestead entry on the ceded portion of Wind River Reservation, in Wyoming, who has not abandoned the same, whose entry is still existent and of record, and who has been unable to secure water for the irrigation of the land covered by his entry, may secure title to the same upon the submission of satisfactory proof that he has established and maintained actual bona fide residence upon his land for a period of not less than eight months, and upon payment of all sums remaining due on said land, as provided for by the act of March 3, 1905."

The SPEAKER pro tempore. The question is on agreeing to the committee amendment in the nature of a substitute.

The amendment was agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. MONDELL, a motion to reconsider the vote by which the bill was passed was laid on the table.

TETON NATIONAL FOREST, WYO.

The next business on the Calendar for Unanimous Consent was the bill H. R. 12208, adding certain lands to the Teton National Forest, Wyo.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. MONDELL. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the following described areas be, and the same are hereby, included in and made a part of the Teton National Forest, subject to all prior adverse rights, and that said lands shall hereafter be subject to all laws affecting national forests:

All of section 4; east half; east half northwest quarter; east half southwest quarter of section 5; east half; east half northwest quarter; east half southwest quarter of section 8; all of section 9; all of section 16; the northeast quarter of section 17; the east half; north half northwest quarter; northeast quarter southwest quarter; southeast quarter northwest quarter of section 21; all of section 26; east half; north half northwest quarter; southeast quarter northwest quarter; northeast quarter southwest quarter of section 27, all in township 40 north, range 116 west of the sixth principal meridian, State of Wyoming.

The south half; south half northeast quarter; southeast quarter northwest quarter of section 9; all of section 16; southeast quarter; southeast quarter northeast quarter; southeast quarter southwest quarter of section 17; south half; south half northwest quarter; south half northeast quarter of section 19, all in township 41 north, range 115 west of the sixth principal meridian, State of Wyoming.

The southeast quarter; south half northeast quarter; southeast quarter northwest quarter; east half southwest quarter of section 24; all of section 25; the southeast quarter; east half northeast quarter of section 26; the south half southwest quarter; south half southeast quarter of section 33; the south half southwest quarter; south half southeast quarter of section 34; all of section 35; all of section 36, all in township 41 north, range 116 west of the sixth principal meridian, State of Wyoming.

The east half southeast quarter of section 1; east half; east half northwest quarter; east half southwest quarter of section 12; all of section 13; east half southeast quarter; southeast quarter northeast quarter of section 23; all of section 24; all of section 25; east half; southwest quarter of section 26; all of section 35; all of section 36, all in township 42 north, range 115 west of the sixth principal meridian, State of Wyoming.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. MONDELL, a motion to reconsider the vote by which the bill was passed was laid on the table.

COURT OF PRIVATE-LAND CLAIMS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 6430) to amend an act entitled "An act to establish a court of private-land claims and to provide for the settlement of private-land claims in certain States and Territories," approved March 3, 1891, and the acts amendatory thereto, approved February 21, 1893, June 27, 1898, and February 26, 1909.

The SPEAKER pro tempore. Is there objection?

Mr. MANN. I object.

The SPEAKER pro tempore. The bill will go over, and the Clerk will report the next bill.

LANDS FOR RESERVOIR AT LEMMON, S. DAK.

The next business on the Calendar for Unanimous Consent was the bill (S. 3203) granting to the city of Lemmon, S. Dak., certain lands for reservoir purposes.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. This bill is on the Union Calendar.

Mr. GANDY. Mr. Speaker, I ask unanimous consent that this bill be considered in the House as in the Committee of the Whole House on the state of the Union.

The SPEAKER. Is there objection to the request of the gentleman? [After a pause.] The Chair hears none.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to issue a patent to the authorities of the city of Lemmon, in the State of South Dakota, for reservoir purposes, in connection with the water supply of said city, for the following-described lands situate in the county of Adams and the State of North Dakota, to wit: The east half of the northeast quarter of section 10 and the west half of the northwest quarter of section 11, in township 129 north, of range 92 west of the fifth principal meridian, in the Dickinson (N. Dak.) land district, containing 160 acres, said patent to contain a provision that said land shall be used for reservoir purposes and in connection with the water supply for said city and for a public pleasure resort, and in case said land shall cease to be used for such purposes it shall at once revert to the United States: *Provided*, That said city shall pay $1.25 per acre therefor.

The amendment in the nature of a substitute was read as follows:

Strike out all after the enacting clause, page 1, and page 2, down to and including line 8, and substitute the following:

"That the Secretary of the Interior be, and he is hereby, authorized and directed to cause an appraisement to be made of the land, exclusive of all improvements, embraced in the southeast quarter of the southeast quarter of section 10 and the southwest quarter of the northwest quarter of section 11, in township 129 north, of range 92 west of the fifth principal meridian, in the county of Adams and the State of North Dakota and in the Dickinson, N. Dak., land district, containing 80 acres; and upon the payment of the appraised price by the city of Lemmon, in the State of South Dakota, to convey by patent to said city of Lemmon the said land."

Mr. MANN. Mr. Speaker, I move to strike out the last word. I would like to ask the gentleman who reported the bill in reference to the description of the property. This bill as introduced in the Senate covered the southeast quarter of the northwest quarter of section 10. As it passed the Senate it covered the southeast quarter of the northeast quarter of section 10. It commenced with the northwest quarter, skipped over to the northeast quarter, and is now reported for the southeast quarter. Where do they want these 80 acres?

Mr. GANDY rose.

Mr. MANN. Well, I will help the gentleman out. I move to amend the committee amendment in line 12 by striking out the word "southeast" where it occurs the second time and inserting the word "northeast."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend the committee amendment by striking out, in line 12, the word "southeast" where it occurs the second time and insert in lieu thereof the word "northeast."

Mr. MANN. The original bill was introduced covering the northwest quarter of the section, and the gentleman will find a letter from Mayor Watt in which he says:

Would say that the Senate bill gave us a full quarter of land, described as east one-half northwest quarter, section 10. We have since elected to take only the south 80 acres of the land above described, the legal description of what we now want is the southeast quarter of the northeast half of section 10, and the southwest quarter of the northwest quarter of section 11, as described.

So it is not the southeast quarter.

Mr. GANDY. That is right. It is a typographical error and I am very much pleased the gentleman noted it.

The SPEAKER. The question is on the amendment offered by the gentleman from Illinois.

The question was taken, and the amendment was agreed to.

The substitute as amended was agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

The title was amended to conform to the text.

YUMA RECLAMATION PROJECT, ARIZONA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 10116) for the relief of certain settlers under reclamation projects.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, I think this is one of the bills that ought to be considered when we have more Members present—this and the next one. We passed one over in which the gentleman from Washington was interested.

The SPEAKER. The gentleman from Illinois objects, and the bill goes over.

Mr. STEPHENS of Texas. I desire to say to the gentleman this only applies to one Indian reservation, to 13 settlers. There was a general bill first drawn, but the committee did not see proper to report the first bill, and this is only a special bill with reference to the Yuma Indians in Arizona.

Mr. MANN. This is to give trespassers special privileges; that is what it is for.

Mr. STEPHENS of Texas. They are not trespassers; they are simply settlers in good faith, as was shown to the committee and also reported by the department.

Mr. MANN. They were trespassers in the first instance, however.

The SPEAKER. The gentleman from Illinois objects, and the bill goes over.

Mr. MANN. I do not say the bill ought not to pass.

NAVAJO INDIAN RESERVATION, ARIZ.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 10115) authorizing the adjustment of rights of settlers on the Moqui and Navajo Indian Reservations in the State of Arizona.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I have not been able to make anything intelligent out of this bill.

Mr. HAYDEN. I think the bill speaks for itself.

Mr. MANN. I do not think it does.

Mr. HAYDEN. If there is any information I can give the gentleman, I would be very pleased to do it.

Mr. MANN. Then I will ask where the gentleman can find Executive order of January 8, 1900, referred to in the bill? The language of the bill reads:

Upon the making and approval of the public surveys of such lands, said Executive order being of date January 8, 1900.

There it ends with a period. I am quite certain it is not intended to do so. I do not think the gentleman has read the bill since he introduced it.

Mr. HAYDEN. I will say to the gentleman that the bill was prepared for me in the Indian Office and I introduced it as given to me. I think the period ought not to be there. The language following is—

extending the boundaries of a tract of land lying west of the Moqui and Navajo Indian Reservation in the Territory of Arizona—

covered by that Executive order of January 8, 1900.

Mr. MANN. Well, Executive orders, if they are proclamations, are supposed to be printed in the Statutes at Large. This order is not, not under that date. I am going to ask to have it passed over so the gentleman can find out in reference to that.

Mr. HAYDEN. I would be glad to do so.

The SPEAKER. The bill goes over.

CERTAIN CHIPPEWA LANDS IN MINNESOTA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 14533) to authorize the Secretary of the Interior to issue a patent in fee simple to the district school board No. 112, of White Earth Village, Becker County, Minn., for a certain tract of land upon payment therefor to the United States in trust for the Chippewa Indians of Minnesota.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The Clerk will read the bill.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized to issue to the district school board No. 112, of White Earth Village, Becker County, Minn., a patent in fee simple for the east half of the southeast quarter of the southeast quarter of section 22, in township 142 north, range 41 west, of the fifth principal meridian, in the State of Minnesota, or such part thereof as the said district school board may select, upon payment by them to the United States in trust for the Chippewa Indians of Minnesota of the appraised value of said land.

Mr. MONDELL. Mr. Speaker——

The SPEAKER. This bill is on the Union Calendar.

Mr. STEPHENS of Texas. Mr. Speaker, I ask unanimous consent that the bill may be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Texas asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

Mr. MONDELL. Mr. Speaker, I move to amend by striking out, on page 1, line 6, the words "in fee simple."

The SPEAKER. The gentleman from Wyoming offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, on page 1, line 6, by striking out the words "in fee simple."

The SPEAKER. The question is on agreeing to the amendment.

Mr. STEPHENS of Texas. I have no objection to the amendment.

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read a third time, and passed.

On motion of Mr. STEPHENS of Texas, a motion to reconsider the vote by which the bill was passed was laid on the table.

SALE OF CERTAIN INDIAN LANDS, OKLAHOMA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 11958) to provide for the sale of certain Indian lands in Oklahoma, and for other purposes.

The SPEAKER. Is there objection to the consideration of the bill?

Mr. MANN. Reserving the right to object, did the Indians have this money?

Mr. STEPHENS of Texas. The gentleman from Oklahoma [Mr. FERRIS] understands the situation.

Mr. FERRIS. This old abandoned town site used to be in my district. It is now in the district of the gentleman from Oklahoma [Mr. MCCLINTIC]. I feel I know pretty well the facts about it, however.

When this tract, along with 505,000 acres of other land, was opened under the act of June 6, 1906, under the act they reserved certain Government town sites, and they reserved this town site and named it Eschita, after one of the old Indian chiefs. The lots were auctioned off, and some of them sold on payments. Some of them were later forfeited. There is no one living there now. Most of the lots were forfeited because the railroad went through a little after the opening and they opened up the town of Grandfield, which has developed into a nice little town 3 or 4 miles away.

Tillman County has long desired part of this tract as a county farm and this bill gives it to them. The town of Grandfield has long desired to acquire part of it for a cemetery. This bill accomplishes that. They both agree to pay a nominal sum therefor and under the circumstances that is all they should pay.

The gentleman from Oklahoma [Mr. MCCLINTIC] has been faithful in getting up this legislation, and I am glad to join him in helping to pass it.

The 320 acres of prairie land is now unoccupied aside from a cemetery. A good many of the local people who made one payment on their lots lost them, and some who paid in full also lost it. The local community began using that part of the town site as a cemetery. Those are the facts. There was a time when the Indian Office thought they ought to be allotted to two Indian women, but as there were some town-site settlers there it was not thought proper to make that disposition of it.

Mr. MANN. These Indians got $60,000 or $70,000 for this land?

Mr. FERRIS. Yes. I have not the exact amount, but they got more than it was worth.

Mr. MANN. And they want to sell it over again? I do not see where they have got much claim for it.

Mr. FERRIS. The gentleman is about right about that. They were paid about ten times what the raw land was worth at the time. But the Government on its own initiative platted the town site there and the railroad came along and missed this Government town by 3 or 4 miles, and of course the poor people who had bought the lots had to lose their money and move away.

Mr. MANN. Supposing we were selling this property now, and then some attorney—and that is almost sure to happen—would come along after a while and say that the Government authorized the sale of this land for $1.25 an acre? It had already been sold in the neighborhood of $100,000, but it was not all paid for. The Government should certainly pay the value of the land to the Indians if they sold them at $1.25 an acre, and the Government should pay the balance. We have got from the Committee on Claims and the Committee on Indian Affairs half a dozen bills on the calendar to submit claims to the Court of Claims that are not as good as that.

Mr. FERRIS. There is an answer to that statement that will satisfy the gentleman and satisfy the Congress, that will cause them not to succeed in that. And that is this: There were 505,000 acres in this opening, and 480,000 acres in my home county. I want the gentleman's attention.

Mr. MANN. No one can distract my attention when the gentleman is talking.

Mr. FERRIS. The selling of this land and the giving of the money to the Kiowa Indians was a gratuity ab initio. To some one who was here before the Members from Oklahoma came it was represented that the Indians had large herds of ponies and cattle that therefore they had better make therefor a large reservation, and so they made it a 480,000-acre reservation and gave it to them as a gratuity, and gave them $25,000 as a so-called wood reservation. As a matter of law, this whole matter was a gratuity to the Indians. I never objected to their getting it, but the facts should be known.

Mr. MANN. Does the gentleman think that we should pay for the land after having given it to them once?

Mr. FERRIS. I believe the gentleman from Illinois had better trust to the Committee on Indian Affairs in this case. They have reported a bill that I believe we can all stand on, and I do not think there will be any afterclap from it. I think it is the best we can do.

Mr. MANN. Well, I confess I may be overpersuaded.

Mr. FERRIS. The Indians have already been paid a large sum of money for this town site.

Mr. STEPHENS of Texas. I will say to the gentleman from Illinois that the bill was reported unanimously.

Mr. MANN. Ah, that is a suspicious circumstance. If a bill is not reported unanimously, you know it has been considered, and has two sides to it. One of these little private bills, practically private bills, reported unanimously nearly always has never really been considered by any committee. I know; I have been there.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. This bill is on the Union Calendar.

Mr. FERRIS. I ask unanimous consent that it be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Oklahoma [Mr. FERRIS] asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

Mr. FERRIS. Mr. Speaker, I ask unanimous consent that the substitute be read in lieu of the bill, for the sake of economy of time.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent that the substitute be read in lieu of the bill. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the substitute.

The Clerk read as follows:

That the Secretary of the Interior is hereby authorized and directed, upon application therefor, to sell to the county of Tillman, State of Oklahoma, at $1.25 per acre, not exceeding 160 acres, for county farm purposes, and to the town of Grandfield, Okla., no exceeding 40 acres, for cemetery purposes, of vacant undisposed of lands within the town-site reserves in the State of Oklahoma, withdrawn by Executive orders under the act of March 20, 1906 (34 Stat. L., p. 80), the money received from the sale of said lands to be deposited in the Kiowa Indian Agency hospital fund, and to draw interest at the rate of 4 per cent per annum.

Mr. MANN. Mr. Speaker, I move to strike out, in line 17, the word "no" and insert the word "not."

Mr. FERRIS. That is accepted.

The SPEAKER. The question is on agreeing to the amendment of the gentleman from Illinois.

The amendment was agreed to.

Mr. MANN. Have we not reduced the rate of interest to 3 per cent in some of these cases?

Mr. FERRIS. Not with us.

The SPEAKER. The question is on agreeing to the substitute as amended.

The substitute as amended was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. FERRIS, a motion to reconsider the vote whereby the bill was passed was laid on the table.

ROADS ON THE SPOKANE INDIAN RESERVATION.

The next business in order on the Calendar for Unanimous Consent was the bill (H. R. 12123) to appropriate money to build and maintain roads on the Spokane Indian Reservation.

The title of the bill was read.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That there is hereby appropriated, out of the Treasury of the United States, out of any funds not otherwise appropriated, the sum of $2,000 for the building and maintenance of roads on the Spokane Indian Reservation, in Stevens County, Wash., said amount to be spent under the direction of the Secretary of the Interior: *Provided*, That said $2,000 shall not be available until Stevens County, Wash., appropriates $1,000 for the building and maintenance of roads on the Spokane Indian Reservation.

With a committee amendment, as follows:

On page 1, in line 3, strike out the words "the Treasury of the" and all of line 4 and insert "any funds in the Treasury of the United States to the credit of the Spokane Indians in the State of Washington, not otherwise appropriated."

Mr. STEPHENS of Texas. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The SPEAKER. The gentleman from Texas asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. STEPHENS of Texas, a motion to reconsider the vote whereby the bill was passed was laid on the table.

FEDERAL AID FOR INDIGENT TUBERCULOUS PERSONS.

The next business in order on the Calendar for Unanimous Consent was the bill (H. R. 11864) to provide Federal aid in caring for indigent tuberculous persons, and for other purposes.

The title of the bill was read.

The SPEAKER. Is there objection?

Mr. MANN. I think it is too important a matter to be considered with such a small number of Members present.

The SPEAKER. The gentleman from Illinois [Mr. MANN] objects. The Clerk will report the next one.

Mr. MANN. It will keep its place on the calendar.

THREATS AGAINST THE PRESIDENT.

The next business in order on the Calendar for Unanimous Consent was the bill (H. R. 15314) prohibiting threats against the President of the United States.

The title of the bill was read.

The SPEAKER. Is there objection?

Mr. MOORE of Pennsylvania. Mr. Speaker, reserving the right to object, the title of this bill does not seem to conform to the text. I do not know whether the gentleman representing the bill desires to answer. How can you prohibit threats against the President of the United States?

Mr. WEBB. Well, I will say to my friend that it covers the meaning of the bill fairly well. The title is no part of the bill. If the gentleman has a better suggestion for the title I will be glad to hear it.

Mr. MOORE of Pennsylvania. That bill provides for punishment for threats.

Mr. WEBB. I believe it would be better to provide punishment for those who make the threats.

Mr. MOORE of Pennsylvania. I have no objection to the consideration of the bill in the regular way.

The SPEAKER. Is there objection?

Mr. MOORE of Pennsylvania. Mr. Speaker, I hope the gentleman will let the bill go over.

Mr. WEBB. I have no objection to the amendment to the title suggested by the gentleman.

Mr. MANN. Mr. Speaker, does the gentleman remember what became of the bills concerning the protection of the President which were here shortly after the assassination of President McKinley?

Mr. WEBB. I do not. I was not in Congress then.

Mr. MANN. There was a good deal of consideration given to the subject at that time. My impression is that perhaps either the House or the Senate passed a bill. I am not sure but that both of them passed different bills. It is a very important subject. I think it ought to be very carefully examined. It was discussed uphill and down dale at that time, although no legislation resulted, so far as I now recall. I will not say that this bill is loosely drawn, because I think it is fairly well drawn, but I do not think it covers the case at all.

Mr. WEBB. I will say to my friend from Illinois that it is practically patterned after section 20 of the Post Office appropriation bill of a year ago, except that the bill before the House is not so full as section 20 in the Post Office appropriation bill. That provision punished persons making threats, not only against the President but against anyone in succession to the Presidency. That bill, I believe, died in conference. This is practically patterned after that bill, except that it is made shorter.

Mr. MANN. Supposing the man actually gets at the President, without making any threats?

Mr. WEBB. That is another crime.

Mr. MANN. Well, but it is not a crime. The gentleman is mistaken.

Mr. WEBB. Oh, it is a crime——

Mr. MANN. It is a crime to assault any person, but it is not a crime to assault the President any more than any other person. It is a crime against the person, but it ought to be a very different offense. Assaulting the President of the United States is quite a different matter from assaulting some private individual. That is the reason the gentleman's bill has the provision against threats. There is a law now covering the private individual, as far as these things are concerned, and the President to the same extent; but in this bill you are differentiating the office of President, and the man who fills the office, from any other citizen of the United States, as ought to be done.

Mr. WEBB. Of course.

Mr. MANN. But I do not think you begin to go far enough.

Mr. WEBB. This bill was drawn by the Department of Justice, and the committee went over it carefully and amended it, and struck out the punishment for threats, either orally or by mail, against the successors to the President, and made it apply to the President alone. I can say to my friend that for 25 years threatening letters have come in the White House mail, and something ought to be done in the way of protecting the Chief Executive of this great Republic, if possible, from this kind of annoyance.

Mr. MANN. This will not protect him. It will not have any tendency toward protecting him.

Mr. WEBB. A bad man can make a public threat, and put somebody else up to committing a crime against the Chief Executive, and that is where the harm comes. The man who makes the threat is not himself very dangerous, but he is liable to put devilment in the mind of some poor fellow who does try to harm him.

Mr. MANN. The men who write letters to the President threatening to take his life or to inflict bodily harm are not sane men, and all the legislation you can enact and put upon the statute books will not have any effect to stop the sending of these letters. Of course you can punish the men. We had a little incident here in the House the other day, when a man violated the dignity of the House by talking from the gallery. I do not know what has become of him. One of the officials of the House asked me whether I wanted him punished. I said, "Certainly not, as far as I am concerned. I have no desire to punish him." If he is an insane person and liable to do injury to anyone, he ought to be treated as an insane person, but they will have to get some one else to judge of that. I do not know. If the man is insane, he ought to be cared for as an insane person.

Mr. WEBB. I will say that threatening letters are sometimes written by insane persons, but I do not think that the writers of these threatening letters are always insane, and I think the time may come when we will have great need for this kind of a statute.

Mr. MANN. I think we have need of legislation to protect the body of the President. I do not think this does that. I am not going to object to the consideration of it, but this is a case where you are asking for bread and you are getting sand. I say that without any reflection upon the committee.

The SPEAKER. Is there objection?

Mr. CARAWAY. Reserving the right to object, I want to ask the chairman of the committee a question. In line 8 you provide—

> Or who knowingly and willfully otherwise makes any such threat against the President shall, upon conviction, be fined not exceeding $1,000 or imprisoned not exceeding five years, or both.

Now, what jurisdiction would a Federal court acquire if some man living in Maryland should orally threaten to do violence to the President? Where could you punish him in a Federal court? If he indulged in speech of a violent nature within the jurisdiction of a State court, the State court could punish him, but no Federal court could reach him.

Mr. WEBB. If you can punish the assault itself in a Federal court, you can pass a statute providing punishment in a Federal court for the making of the threat to commit the assault. Practically every Federal officer in the United States is protected by a Federal statute; and if you can punish the act itself in the Federal court, you can certainly punish the threat to commit the act, because if you have jurisdiction to punish the overt act itself, you certainly would have jurisdiction of a threat to commit the offense. The highest duty of a Government is to protect itself, and certainly the head of the Government should be protected both against assault and against any threat to do him physical harm.

Mr. CARAWAY. If I recall correctly, when McKinley was killed they had to go into a State court to punish the man who assassinated him.

Mr. WEBB. Precisely; because it was committed within the territory of a State; and there is no Federal statute punishing an actual assault upon the President, or his murder, as far as I know. That is one reason why we want this statute—in order to

decrease the possibility of actual assault by punishing threats to commit an assault.

Mr. MOORE of Pennsylvania. Is this the matter that the Attorney General brought to the attention of Congress sometime ago?

Mr. WEBB. I do not believe he did in his annual report.

Mr. MOORE of Pennsylvania. Did the bill originate in the office of the Attorney General.

Mr. WEBB. It did.

Mr. MOORE of Pennsylvania. There was a suggestion in the newspapers sometime ago that there was some irritation at the White House over threatening and that legislation was necessary to cover it.

Mr. WEBB. There has always been, for that matter.

Mr. MOORE of Pennsylvania. This bill provides for the punishment only of those who deposit—

for conveyance in the mail or for delivery from any post office or by any letter carrier any letter, paper, writing, print, missive, or document containing any threat to take the life of or to inflict bodily harm upon the President of the United States.

Is there no law now which would punish anyone committing any of these offenses as against the Speaker or the Vice President, for instance?

Mr. WEBB. I do not think so. Certainly not adequately. We took the statute and compared it, and in the opinion of the committee it did not cover that. That is why the Post Office Committee a year ago undertook to pass this very same act, and I presume it would have passed if the bill had not died in conference. The bill we are now considering is almost identical with section 20 of the Post Office bill of a year ago, which would have been passed except for the fact that it died in conference.

Mr. MOORE of Pennsylvania. Not to point out any particular official, but as a matter of fact letters containing threats do come to Members of Congress. Is there no law or regulation that would permit of the arrest and punishment of anyone offending in this regard?

Mr. WEBB. I do not know of any. There are laws against threatening men and trying to extort money.

Mr. MOORE of Pennsylvania. If that is the fact and a person who is not insane writes a threatening letter to the Speaker or to a Member of Congress why should we not provide a law sufficient to cover such cases?

Mr. WEBB. I am perfectly willing to do it. If we apply it to the Speaker of the House and Members of Congress and other Government officials, you make a pretty broad law to which some might object, but everybody admits that the Chief Executive of a great Nation like ours ought to be protected in every way possible, especially in view of the sad experience we have had in losing by assassination three of our beloved Presidents.

Mr. MOORE of Pennsylvania. It is true, however, that we were able to detect and arrest the men responsible and to punish them by death.

Mr. WEBB. Yes; but an ounce of prevention is worth a pound of cure, and we want to prevent the threats which often incite men to kill and murder.

Mr. MOORE of Pennsylvania. There were arrests and convictions and executions in the last two cases to which the gentleman referred. I assume that if any threat was now carried into execution we would be able to reach the culprits. All you intend to cover in this bill is the act of the person who makes a threat by depositing a newspaper clipping in an envelope and putting it into the mail or writing a letter.

Mr. WEBB. It must be a threat to kill the President or do him bodily harm. Any man that makes that sort of a threat ought to be punished, and punished severely.

Mr. MOORE of Pennsylvania. Then the law should be general. It seems to me that this is a bill of such importance that it ought to be laid over until we can have more time to consider it.

Mr. RAKER. I would like to ask the gentleman a question. Is it not a fact that under every State law a threat, either verbal or by letter, is punished under the State law?

Mr. MOORE of Pennsylvania. It is in my State.

Mr. RAKER. But the fine is very modest. Under the law, as I understand it, a threatening letter put in the post office, under the postal regulations, would be subject to punishment by using the mail in that way, but the punishment is very mild and light. This makes a special punishment and fixes the punishment at not less than $1,000 fine or five years' imprisonment. It makes it severe, and I think the bill ought to pass. The law covers all the other cases, as it ought to, by fine and a minor imprisonment.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That any person who knowingly and willfully deposits or causes to be deposited for conveyance in the mail or for delivery from any post office or by any letter carrier any letter, paper, writing, print, missive, or document containing any threat to take the life of or to inflict bodily harm upon the President of the United States, or who knowingly and willfully otherwise makes any such threat against the President, shall upon conviction be fined not exceeding $1,000 or imprisoned not exceeding five years, or both.

Mr. RAKER. Mr. Speaker, I would like to ask the chairman of the committee if he does not think that in line 3 the words "and willfully" and the same words in lines 8 and 9 ought to be stricken from the bill, for the reason that if a man knowing does an act, that ought to be sufficient to punish him; if the act is made an offense by this law, and not say that it has got to be both knowingly and willfully done. Practically all of the statutes carry the provision that before a man can be convicted the court shall instruct the jury he must do it with a will, and if he is not willing he is insane or an idiot, and not subject to conviction.

Mr. WEBB. I do not think so, Mr. Speaker. I think he ought to be shown to have done it willfully. I think it must be a willful intent to do serious injury to the President. If you make it a mere technical offense, you do not give him much of a chance when he comes to answer before a court and jury. I do not think we ought to be too anxious to convict a man who does a thing thoughtlessly. I think it ought to be a willful expression of an intent to carry out a threat against the Executive, and I hope that the gentleman will not offer his amendment.

Mr. RAKER. I have not offered an amendment. I just want to call the attention of the chairman to these words, and get his views upon the subject. The House can then act as it seems best. We want a workable statute, and are satisfied that is the purpose of the chairman of the committee. If a man knows the fact and knows what he is doing and knows the consequences of his act, that man ought not to go free.

Mr. WEBB. This is the language used in nearly all the statutes where the intent constitutes the crime. You find it in the statutes against murder and embezzlement, and I had rather keep the word "willfully" in.

Mr. RAKER. So as to give the fellow a chance, for fear he may have made a mistake.

Mr. WEBB. Yes.

Mr. VOLSTEAD. Mr. Speaker, I think it would be a mistake to strike out the word "willfully." Suppose a person found a document containing a threat and sent it through the mail to a friend as a matter of news. He might knowingly send the document, not intending to convey any threat. The word "willfully" adds an intention to threaten, and distinguishes a case of that kind so as to take it out of the category of criminal acts.

Mr. RAKER. The gentleman says that if it is stricken out it would permit the conviction without proof at the trial that the man knew what his act was.

Mr. VOLSTEAD. No; I did not say that. If the gentleman will read it with the word "willfully" stricken out, he will see that a person might send innocently, without any intention to convey a threat at all, an instrument to a friend that contained a threat, and he would be guilty if you strike out the word "willfully."

Mr. RAKER. If he knowingly sent what the gentleman says, there certainly could not be any excuse or reason why he should not be convicted of his act, because he did it knowingly, and that is the interpretation of the statutes. He knows what his act is, knows the consequences of his act.

Mr. VOLSTEAD. The gentleman does not catch the point I have in mind. This statute does not require that the instrument shall be sent to the President. It might be sent to some other person. If, as the gentleman suggests, you strike out the word "willfully," a person who simply sends an instrument, say, a newspaper that contains such a threat, to some friend to call his attention to the matter, would do so knowingly, and would come within the language of this bill.

Mr. RAKER. Does the gentleman mean that if a man should mail to a friend a newspaper that contained an article against the President saying that some injury should be done him, that that man would be guilty? What would become of the newspaper man that published the paper and circulated it?

Mr. VOLSTEAD. That is not the question.

Mr. RAKER. I know, but the very statement the gentleman makes, that if the newspaper was such that it would be an offense for a man to send it to a friend, suggests the inquiry of how the newspaper publisher and the people who handle it are affected under this statute, without all being convicted by virtue of the publication and circulation of the paper.

Mr. VOLSTEAD. The suggestion I want to make to the gentleman is this, that if this statute is to be saved at all, it seems to me it must be upon the theory that the act is willful. There is not anything in the language outside of that word to convey the idea that a threat must be an intentional threat against the President. The word "willful" conveys, as ordinarily used, the idea of wrongful as well as intentional. That idea ought to be preserved so as not to make innocent acts punishable.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

Mr. WEBB. Mr. Speaker, I ask that the title be amended in accordance with the suggestion of the gentleman from Pennsylvania.

The SPEAKER. How would the gentleman have the title amended?

Mr. MOORE of Pennsylvania. I would strike out the word "prohibiting" and insert the words "to punish persons who make."

The SPEAKER. The Clerk will report the amendment to the title.

The Clerk read as follows:

Strike out in the title the word "prohibiting" and insert the words "to punish persons who make."

The SPEAKER. Without objection, the title will be amended in accordance with the amendment just reported.

There was no objection.

On motion of Mr. WEBB, a motion to reconsider the vote by which the bill was passed was laid on the table.

NEWELL, S. DAK.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 12889) authorizing the Secretary of the Interior to convey certain lands to the town of Newell, S. Dak., and for other purposes.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, I ask to have the bill go over.

The SPEAKER. The gentleman from Illinois objects, and the bill will go over without prejudice.

INDIANS OF ROSEBUD SIOUX RESERVATION.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13298) authorizing the Secretary of the Interior to make payments to certain Indians of the Rosebud Sioux Reservation, in the State of South Dakota, who were enrolled and allotted under decisions of the United States district and circuit courts for the district of South Dakota.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized to pay, out of any funds in the Treasury to the credit of the Rosebud Band of Sioux Indians of the State of South Dakota, such sums as may be found by him to be due those Indians enrolled and allotted on the Rosebud Reservation in South Dakota, under the decisions of the United States district and circuit courts for the district of South Dakota, in the cases entitled "Mary Sully et al. *v.* The United States and John H. Scriven, allotting agent," and "Narcisus Drapeau et al. *v.* The United States and John H. Scriven, allotting agent," and each Indian who was enrolled and allotted under said decisions shall be entitled to and receive a sum of money equal in amount to all per capita and other payments made to individual members of the Rosebud Band of Sioux Indians from December 31, 1896, or from the date of the birth of such Indian if subsequent to December 31, 1896, to the date of the enrollment and allotment of said Indians under said decisions: *Provided*, That the Secretary of the Interior is authorized to determine what attorney or attorneys have actually rendered services of value to the Indians hereinbefore described in connection with the payments herein provided for, and all compensation therefor in such amounts as he may deem proper, and pay the amount so fixed and found to be due, less any counter claims, to such attorney or attorneys, and deduct the same from the amount paid to the Indians hereinbefore described, upon receipt in full by such attorney or attorneys of all claims and demands against said Indians.

With the following committee amendment:

Page 2, lines 18 and 19, after the word "therefor," insert the words "on a basis of quantum meruit."

The SPEAKER. This bill is on the Union Calendar.

Mr. GANDY. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER. The question now is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. STEPHENS of Texas, a motion to reconsider the vote by which the bill was passed was laid on the table.

CLAIMS OF VOLUNTEER SOLDIERS FOR PAY, ETC.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 3690) repealing certain sections contained in the urgent deficiency act approved December 22, 1911.

The SPEAKER. Is there objection?

There was no objection.

Mr. REAVIS. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the sections contained in the urgent deficiency act approved December 22, 1911, relating to claims for arrears of pay, bounty, or other allowances growing out of the Civil War and the War with Spain, are hereby repealed.

Mr. REAVIS. Mr. Speaker, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amend, by striking out in line 3 the word "sections" and inserting in lieu thereof the words "following provisions"; and in line 5 by inserting after the word "eleven" the words "to wit" and the following:

"No claim for arrears of pay, bounty, or other allowances growing out of the service of Volunteers who served in the Army of the United States during the Civil War shall be received or considered by the accounting officers of the Treasury unless filed in the office of the Auditor for the War Department on or before December 31, 1912: *Provided*, That hereafter no agent or attorney shall demand or accept, for his services in connection with the prosecution of claims for arrears of pay, bounty, or other allowances due on account of the services during the Civil War of an officer or enlisted man of the Regular or Volunteer Armies of the United States, filed after the passage of this act, any fee for any services rendered in connection therewith. Whoever shall violate this provision upon conviction shall be punished by a fine of not exceeding $500 or imprisonment for a period not exceeding six months, or both, and shall be disbarred from practice before the Treasury Department.

"No claim for arrears of pay, bounty, or other allowances growing out of the service of Volunteers who served in the Army of the United States during the War with Spain shall be received or considered by the accounting officers of the Treasury unless filed in the office of the Auditor for the War Department on or before December 31, 1914."

Mr. REAVIS. Mr. Speaker, I find that I have made a mistake in offering my amendment, and I ask unanimous consent to strike from the amendment the proviso, being the language:

Provided, That hereafter no agent or attorney shall demand or accept for his services in connection with the prosecution of claims for arrears of pay, bounty, or other allowances, due on account of the services during the Civil War of an officer or enlisted man of the Regular or Volunteer Armies of the United States, filed after the passage of this act, any fee for any services rendered in connection therewith. Whoever shall violate this provision upon conviction shall be punished by a fine of not exceeding $500 or imprisonment for a period of not exceeding six months, or both, and shall be disbarred from practice before the Treasury Department.

The SPEAKER. The gentleman asks unanimous consent to withdraw a portion of his amendment as indicated. Is there objection?

There was no objection.

The SPEAKER. The question now is on agreeing to the amendment as modified.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. REAVIS, a motion to reconsider the vote by which the bill was passed was laid on the table.

AMENDING COPYRIGHT LAW.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13981) amending the copyright law.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I think this ought to go over if there is no one here who——

The SPEAKER. The gentleman from Illinois objects and the bill goes over.

TO EXTEND TEMPORARILY THE TIME FOR FILING APPLICATIONS, ETC.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 13982) to extend temporarily the time for filing applications and fees and taking action in the United States Patent Office in favor of nations granting reciprocal rights to United States citizens.

The Clerk read the title of the bill.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. This bill is on the Union Calendar.

Mr. MANN. Mr. Speaker, I ask unanimous consent to consider the bill in the House as in the Committee of the Whole House on the state of the Union.

The SPEAKER. Is there objection to the request of the gentleman from Illinois? [After a pause.] The Chair hears none.

The Clerk read as follows:

Be it enacted, etc., That any applicant for letters patent or for the registration of any trade-mark, print, or label, being within the provisions of this act, if unable on account of the existing and continuing state of war to file any application or pay any official fee or take any required action within the period now limited by law, shall be granted an extension of nine months beyond the expiration of said period.

SEC. 2. That the provisions of this act shall be limited to citizens or subjects of countries which extend substantially similar privileges to the citizens of the United States, and no extension shall be granted under this act to the citizens or subjects of any country while said country is at war with the United States.

SEC. 3. That this act shall be operative to relieve from default under existing law occurring since August 1, 1914, and before the 1st day of January, 1918, and all applications and letters patent and registrations in the filing of prosecutions whereof default has occurred for which this act grants relief shall have the same force and effect as if said default had not occurred.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

GOVERNMENT EMPLOYEES SUFFERING INJURIES WHILE ON DUTY.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 15316) to provide compensation for the employees of the United States suffering injuries while in the performance of their duties, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, it is evident this bill could not be considered to-day. It is a long bill and the committee will soon be reached, and I ask to have it passed over without prejudice.

The SPEAKER. The bill goes over without prejudice.

NATIONAL-PARK SERVICE.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 15522) to establish a national-park service, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. COX. Mr. Speaker, I do not think this bill ought to pass by unanimous consent. I object to it.

The SPEAKER. The gentleman from Indiana objects, and the bill goes over without prejudice.

Mr. RAKER. Will the gentleman withhold his objection?

Mr. COX. I will withhold it.

Mr. FERRIS. Mr. Speaker, 12 national parks of the United States are running in a helter-skelter sort of way by borrowing clerks from other departments, and there is some reorganization needed very badly.

Mr. MANN. Mr. Speaker, I would like to ask the gentleman from Indiana—there is not very much remaining of the afternoon—does the gentleman intend to object?

Mr. COX. Yes; I intend to object.

Mr. MANN. I do not think we ought to take up the time any further on this bill. The Committee on Public Lands will be reached, I hope, before very long now. I think the bill ought to pass, but I do not think——

The SPEAKER. Is there objection?

Mr. COX. I object.

The SPEAKER. The bill is passed over without prejudice.

BERKSHIRE COUNTY TROUT HATCHERY, MASS.

The next business on the Calendar for Unanimous Consent was the joint resolution (H. J. Res. 218) authorizing the acceptance of the gift of the Berkshire Trout Hatchery, Berkshire County, Mass.

The title of the joint resolution was read.

The SPEAKER. Is there objection?

Mr. MANN. I ask to have the joint resolution go over.

The SPEAKER. The joint resolution goes over without prejudice.

LOSS OF ALCOHOL BY ACCIDENT DURING TRANSPORTATION.

The next business on the Calendar for Unanimous Consent was the bill (S. 3861) to amend an act entitled "An act to amend an act entitled 'An act for the withdrawal from bond tax free of domestic alcohol when rendered unfit for beverage or liquid medicinal uses when mixed with suitable denaturing materials,'" approved March 2, 1907.

The Clerk read the title of the bill.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. DUPRÉ. Mr. Speaker, I ask unanimous consent that this bill be considered in the House as in the Committee of the Whole House on the state of the Union.

The SPEAKER. Is there objection to the consideration of this bill in the House as in the Committee of the Whole House on the state of the Union? [After a pause.] The Chair hears none.

The Clerk read as follows:

Be it enacted, etc., That the act entitled "An act to amend an act entitled 'An act for the withdrawal from bond tax free of domestic alcohol when rendered unfit for beverage or liquid medicinal uses when mixed with suitable denaturing materials,'" approved March 2, 1907, be, and the same is hereby, amended by adding to section 3 thereof the following:

"*Provided*, That where alcohol is withdrawn from a distillery warehouse for shipment to a central denaturing bonded warehouse under the provisions of this act it shall be lawful under such rules, regulations, and limitations as shall be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, for an allowance to be made for leakage or loss by any accident, and without any fraud or negligence of the distiller, owner, carrier, or their agents or employees, occurring during transportation from a distillery warehouse to a central denaturing bonded warehouse."

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. DUPRÉ, a motion to reconsider the vote by which the bill was passed was laid on the table.

SALE OF SCHOOL PROPERTY, DENVER, COLO.

The next business in order on the Calendar for Unanimous Consent was the bill (H. R. 217) to authorize the sale of school property in the city of Denver, Colo., and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. This bill is on the Union Calendar.

Mr. HILLIARD. Mr. Speaker, I ask unanimous consent that the bill may be considered in the House as in the Committee of the Whole House on the state of the Union.

The SPEAKER. Is there objection to the request of the gentleman that this bill be considered in the House as in the Committee of the Whole House on the state of the Union? [After a pause.] The Chair hears none.

The Clerk read as follows:

Be it enacted, etc., That the board of education of school district No. 1, in the city and county of Denver, State of Colorado, be, and is hereby, authorized to sell and dispose of block No. 143 in the east division of the city of Denver, State of Colorado, donated and set apart for educational purposes by the act of Congress approved February 24, 1879 (20 Stat. L., 317–318), together with the improvements thereon, so much of said act of Congress as prohibited alienation or other use of the property, upon penalty of reversion to the United States, being hereby repealed: *Provided*, That all proceeds of sale or disposition of said block and the improvements thereon, less reasonable brokerage, if any, shall be set apart, appropriated, and expended by said board of education for the purchase of other land in said school district for school purposes, and the erection of school buildings thereupon: *And provided further*, That it shall not be incumbent upon the purchaser or purchasers of the said block and the improvements thereon to see to or be responsible for the appropriation or use of the proceeds of the sale or disposition of the said property.

The Clerk reported the committee amendment, as follows:

Page 2, line 10, after the word "That," strike out "it shall not be incumbent upon the purchaser or purchasers of the said block and the improvements thereon to see to or be responsible for the appropriation or use of the proceeds of the sale or disposition of said property" and insert "to the extent the said school district shall make use of the said proceeds for purposes other than as limited herein, it shall be held and deemed to be indebted to the Government of the United States, recoverable in appropriate proceedings in the United States District Court for the District of Colorado, which is hereby vested with jurisdiction in the premises."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. HILLIARD, a motion to reconsider the vote by which the bill was passed was laid on the table.

WATER LIMITATION IN DISTILLERIES.

The next business in order on the Calendar for Unanimous Consent was the bill (H. R. 9542) to amend the second paragraph of section 3264 of the Revised Statutes of the United States as amended by section 5 of the act of March 1, 1879, and as further amended by the act of Congress approved June 22, 1910.

The Clerk read the title of the bill.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. This bill is on the Union Calendar; who is running it?

Mr. FERRIS. Mr. Speaker, I am not running it; but I ask unanimous consent that this bill be considered in the House as in the Committee of the Whole House on the state of the Union.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

Be it enacted, etc., That the second paragraph of section 3264, Revised Statutes of the United States of America, as amended by section 5 of the act of March 1, 1879, and as further amended by the

act of Congress approved June 22, 1910, be amended so as to read as follows:

"In all surveys 45 gallons of mash or beer brewed or fermented from grain shall represent not less than 1 bushel of grain, and 7 gallons of mash or beer brewed or fermented from molasses shall represent not less than 1 gallon of molasses, except in distilleries operated on the sour-mash principle, in which distilleries 60 gallons of beer brewed or fermented from grain shall represent not less than 1 bushel of grain, and except that in distilleries where the filtration-aeration process is used, with the approval of the Commissioner of Internal Revenue; that is, where the mash after it leaves the mash tub is passed through a filtering machine before it is run into the fermenting tub, and only the filtered liquor passes into the fermenting tub, there shall hereafter be no limitation upon the number of gallons of water which may be used in the process of mashing or filtration for fermentation; but the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, in order to protect the revenue, shall be authorized to prescribe by regulation, to be made by him, such character of survey as he may find suitable for distilleries using such filtration-aeration process. The provisions hereof relating to filtration-aeration process shall apply only to sweet-mash distilleries."

Mr. COADY. Mr. Speaker, this bill comes before the House with the unanimous recommendation of the Committee on Ways and Means, which recommendation was made after a hearing before the Subcommittee on Internal Revenue.

The purpose of it is to enable distilleries using what is known as the filtration-aeration process to use an unlimited amount of water in extracting from the grain those ingredients which produce yeast and alcohol.

The law now provides that in distilleries where the filtration-aeration process is used 70 gallons of beer brewed or fermented from grain shall represent not less than a bushel of grain.

The meaning and effect of this is that the distiller is prohibited from using more than 70 gallons of water for each bushel of grain of any kind required in the process of manufacturing yeast and alcohol.

Before the passage of the law permitting the distiller to use 70 gallons of water to the bushel, he could use only 45 gallons to the bushel, and this latter quantity of water was found to be sufficient before the use of the filtration-aeration process.

After the adoption of this process it was found that 45 gallons of water were wholly insufficient to accomplish the extraction of a sufficient amount of the ingredients of the grain required for the manufacture of yeast and alcohol to justify its use, and that this limitation resulted in the waste of at least 15 per cent of the whole and also a loss to the Government in revenue.

The change in the law increasing the amount of water used to the bushel of grain from 45 gallons to 70 gallons resulted in the receipt of revenue to the Government from one company alone of $500,000 per annum, and it is estimated that the passage of this act will increase the annual revenue from this company more than $120,000.

When the original act of March 1, 1879, was passed prescribing a limit upon the amount of water which a distiller could use, the filtration-aeration process was not in use in this country, and that method was devised for the purpose of regulating distilleries employing an entirely different method.

It was thought to be necessary to make such a regulation in order to protect the Government revenue in distilleries of that kind, but it seems to be quite clear that there is no necessity for such a regulation in the case of distilleries using the filtration-aeration process, and it can really afford no protection to the Government in distilleries of that sort.

But, in any event, in order to make sure that the Government revenue will not suffer as a result of the elimination of the restrictions as to the amount of water to be used, this bill provides that the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall be authorized to prescribe, by regulation to be made by him, such character of surveys as he may find suitable for distilleries using the filtration-aeration process. I sincerely hope that this bill will be passed.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

EXCHANGE OF LANDS WITH NORTH DAKOTA.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 393) to authorize an exchange of lands with the State of North Dakota for promotion of experiments in dry-land agriculture, and for other purposes.

The SPEAKER. Is there objection to the consideration of the bill? [After a pause.] The Chair hears none.

Mr. NORTON. I move that this bill be considered in the House as in the Committee of the Whole.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That upon receipt of a proper deed from the State of North Dakota, executed under authority of the act of its legislative assembly, approved February 5, 1915, reconveying to the United States title to section 16, township 138 north, range 81 west, fifth principal meridian, the Secretary of the Interior is authorized to issue patents to said State for such vacant, surveyed, unreserved, unoccupied, nonmineral public lands as may be selected by said State within its boundaries, not exceeding 1,280 acres in aggregate area, and said section when so reconveyed shall not be subject to settlement, location, entry, or selection under the public-land laws, but shall be reserved for the use of the Department of Agriculture in carrying on experiments in dry-land agriculture at the Northern Great Plains Field Station, Mandan, N. Dak.

The following committee amendments were read:

Page 1, line 5, strike out "January 25" and insert "February 5."

Page 1, line 10, after the word "vacant," insert the words "unsurveyed, unreserved."

The SPEAKER. The question is on agreeing to the amendments.

The question was taken, and the amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. NORTON, a motion to reconsider the vote by which the bill was passed was laid on the table.

OPENING OF FORT ASSINNIBOINE MILITARY RESERVATION.

The next business on the Calendar for Unanimous Consent was the bill (S. 3646), an act to amend the act of February 11, 1915 (38 Stat. L., p. 807), providing for the opening of Fort Assinniboine Military Reservation.

Mr. MANN. Mr. Speaker, I ask to have the bill go over.

The SPEAKER. The gentleman objects, and it goes over without prejudice. The Clerk will report the next bill.

LANDS IN FORT BERTHOLD INDIAN RESERVATION, N. DAK.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 12030) to amend an act entitled "An act to provide for the disposal of certain lands in the Fort Berthold Indian Reservation, N. Dak.," approved August 3, 1914.

The SPEAKER. Is there objection to the consideration of the bill? [After a pause.] The Chair hears none. This bill is on the Union Calendar.

Mr. FERRIS. Mr. Speaker, I ask unanimous consent that it be considered in the House as in Committee of the Whole.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That section 3 of the act entitled "An act to provide for the disposal of certain lands in the Fort Berthold Indian Reservation, N. Dak.," approved August 3, 1914, be, and is hereby, so amended as to authorize the classification and appraisal of unallotted lands in sections 16 and 36, containing coal, and for such reason reserved by the terms of section 1, act of June 1, 1910 (36 Stat. L., p. 455), pending provision for their disposal by Congress; said lands when so classified and appraised to be subject to disposal under the laws applicable to other reserved coal lands within said former reservation.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. NORTON, a motion to reconsider the vote by which the bill was passed was laid on the table.

COLORADO AND PIKE NATIONAL FORESTS.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 15287) authorizing the addition of certain lands to the Colorado and Pike National Forests, Colo.

The SPEAKER. Is there objection to the consideration of the bill? [After a pause.] The Chair hears none. This bill is on the Union Calendar.

Mr. TIMBERLAKE. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That any lands within the following-described areas found to be chiefly valuable for the production of timber or the protection of stream flow may be included within and made parts of the Colorado or Pike National Forests by proclamation of the President, said lands to be thereafter subject to all laws affecting national forests and as otherwise provided herein.

Sixth principal meridian and base, State of Colorado:

Township 1 north, range 71 west: Sections 29 to 32, inclusive.

Township 1 north, range 72 west: Sections 1 to 11, inclusive; sections 14 to 23, inclusive; sections 25 to 28, inclusive; sections 33 to 36, inclusive.

Township 2 north, range 71 west: Sections 2 to 10, inclusive; sections 15 to 22, inclusive; sections 27 to 34, inclusive.

All of township 2 north, range 72 west.

Township 2 north, range 73 west: All of section 36.

Township 3 north, range 71 west: Sections 4 to 9, inclusive; sections 17 to 21, inclusive; sections 26 to 29, inclusive; north half of section 30; south half of section 31; sections 32 to 35, inclusive.

Township 3 north, range 72 west: Sections 1 to 35, inclusive.

Township 3 north, range 73 west; Sections 1, 2, 11, 12, 13, 14, 23, 24, 25, 26, 35, and 36.

Township 4 north, range 71 west: Sections 3 to 10, inclusive; west half of section 14; sections 15 to 23, inclusive; sections 26 to 33, inclusive.

Township 4 north, range 72 west: Sections 1 to 5, inclusive; east half of section 6; east half of section 7; sections 8 to 30, inclusive; that portion of section 31 lying north and east of the main hydrographic divide east of Cow Creek; sections 32 to 36, inclusive.

Township 4 north, range 73 west: All those portions of sections 10, 11, 12, 13, 14, 15, 22, 23, 24, 25, and 36 lying north and east of the divide between Aspen Brook, and Fish Creek, Aspen Brook and Lily Lake, and of the main hydrographic divide east of Cow Creek.

Township 5 north, range 70 west: Sections 4 to 9, inclusive; sections 17 and 18; north half of section 19; north half of section 20.

Township 5 north, range 71 west: Sections 1 to 14, inclusive; north half and southeast quarter of section 15; sections 17 to 21, inclusive; sections 27 to 34, inclusive; west half of section 35.

Township 5 north, range 72 west: Sections 1 to 5, inclusive; sections 10 to 15, inclusive; sections 21 to 28, inclusive; east half of section 32; sections 33 to 36, inclusive.

Township 6 north, range 70 west: Sections 7, 8, 17, 18, 19, and 20; west half of section 21; west half of section 28; sections 29 to 33, inclusive.

All of township 6 north, range 71 west.

Township 6 north, range 72 west: Sections 1, 12, 13, 14, and 15; sections 22 to 28, inclusive; sections 32 to 36, inclusive.

Township 7 north, range 70 west: Sections 2 to 11, inclusive; sections 14 to 30, inclusive; north half of section 32; sections 33, 34, and 35.

Township 7 north, range 71 west: Sections 1 to 35, inclusive.

Township 7 north, range 72 west: All of section 1; east half of section 2; sections 10 to 15, inclusive; sections 22, 23, 24, 25, and 36.

Township 8 north, range 70 west: West half of section 4; sections 5 to 8, inclusive; west half of section 9; sections 17 to 22, inclusive; sections 27 to 35, inclusive.

All of township 8 north, range 71 west.

Township 8 north, range 72 west: All of section 1.

Township 9 north, range 70 west: Sections 7 to 10, inclusive; sections 14 to 23, inclusive; sections 28 to 33, inclusive.

Township 9 north, range 71 west: Sections 12 and 13; sections 24 to 36, inclusive.

All of township 9 north, range 72 west.

Township 9 north, range 73 west: Sections 1 to 6, inclusive; sections 9 to 16, inclusive; sections 21 to 28, inclusive; sections 33 to 36, inclusive.

Township 10 north, range 72 west: Sections 2 to 11, inclusive; north half of section 12; sections 14 to 24, inclusive; sections 26 to 35, inclusive.

All of township 10 north, range 73 west.

Township 10 north, range 74 west: Sections 1 to 4, inclusive; sections 10, 11, 12, 13, 24, and 25.

Township 11 north, range 72 west: Sections 2 to 11, inclusive; north half of section 12; sections 14 to 24, inclusive; sections 26 to 34, inclusive.

All of township 11 north, range 73 west.

Township 11 north, range 74 west: Sections 2 to 6, inclusive; sections 8 to 36, inclusive.

Township 11 north, range 75 west: Sections 6, 7, 8, and 14; sections 17 to 31, inclusive.

Township 12 north, range 72 west: Fractional sections 19 and 20; sections 28 to 34, inclusive.

Township 12 north, range 73 west: Fractional sections 19 to 24, inclusive; sections 25 to 30, inclusive; sections 32 to 36, inclusive.

Township 12 north, range 74 west: Fractional sections 23 and 24; section 26.

Township 1 south, range 71 west: Sections 4 to 7, inclusive; west half and northeast quarter of section 8; north half of section 9; west half of section 17; sections 18 and 19; west half of section 20; northwest quarter of section 29; north half of section 30.

Township 1 south, range 72 west: Sections 1 to 4, inclusive, sections 9 to 16, inclusive; sections 21 to 28, inclusive; sections 31 to 36, inclusive.

Township 2 south, range 71 west: Sections 2 to 10, inclusive.

Township 2 south, range 72 west: Sections 1 to 12, inclusive.

Provided, That, in order to protect existing equities or to avoid undue hardship, the Secretary of the Interior may, in his discretion, continue thereafter to allow additional entries, within the previously described areas, under the provisions of section 3 of the act approved February 19, 1909, entitled "An act to provide for an enlarged homestead," as amended by the act approved March 3, 1915 (38 Stat., p. 956).

Also the following committee amendment was read.

Page 7, line 7, strike out the words: "In order to protect existing equities or to avoid undue hardship."

The SPEAKER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. MONDELL. Mr. Speaker, I move to strike out the last word. I want to call the attention of the gentleman from Colorado [Mr. TIMBERLAKE] to the fact that he has no saving clause in his bill. I wonder if he considers that is not necessary by reason of the fact that instead of definitely bringing these lands within the forest reserve he provides that they may be brought in by proclamation of the President? If that was his thought it would be necessary for the President in making his proclamation to include only unentered lands. Otherwise, if he included any entered land in his proclamation, there might be some question in some cases as to whether or not entries could be perfected without a saving clause in the bill.

Mr. TIMBERLAKE. I will say to the gentleman that that was the idea, that it was not intended that the President should include by proclamation other than unentered land in this area. As has been stated, it does not definitely place in the forest reserve, but the President is authorized upon the recommendation of the two departments by proclamation to place in the forest reserve, such lands as in the judgment of the two departments should be included to protect the watersheds of that vast area.

Mr. MONDELL. Only the unentered land?

Mr. TIMBERLAKE. Only the unentered land; yes, sir.

Mr. MONDELL. Well, I wondered if that were the thought, because that idea seems to be contradicted by the proviso which authorizes the Secretary of the Interior, in his discretion, to continue to allow additional entries under the enlarged-homestead law. If the Secretary only included unentered land, would that proviso be necessary?

Mr. TIMBERLAKE. It seems to me it would. There are certain entries or applications for additional entry that are pending before the department, and the department desires to examine this land to see whether or not it comes within the requirements of that character of land that ought to be allowed as an additional entry. My understanding is that it only includes unentered land.

Mr. MOORE of Pennsylvania. Mr. Speaker, I would like to ask the gentleman from Colorado to what extent the area of the Colorado and Pike National Forest will be increased by the passage of this bill? To what extent will the area be increased?

Mr. TIMBERLAKE. I will state to the gentleman it is a little hard to determine, because it is left open and for the departments to determine this. The whole area, as described here, contains something like 480,000 acres; but of course that will be reduced very much by the provisions of the bill, which contemplates taking in only the unentered land.

Mr. MOORE of Pennsylvania. How much of that is forest land?

Mr. TIMBERLAKE. I can not answer the gentleman definitely, but it is all forest land that is included within the boundaries as read in the bill.

Mr. MOORE of Pennsylvania. Is it overgrown or is it in a valley or on a mountain top?

Mr. TIMBERLAKE. If the gentleman has read the report, he will notice that it is in the mountains and along the gulches of the mountains, and some of it is reforested at the present time with a good growth, as shown by the report. Other portions of it contain valuable timber of fir and pine.

Mr. MOORE of Pennsylvania. Which the Government will now protect. That is the idea, is it?

Mr. TIMBERLAKE. Yes, sir; that is the idea.

Mr. MOORE of Pennsylvania. It is rugged country?

Mr. TIMBERLAKE. Yes; almost all of it is a very rugged country.

Mr. MOORE of Pennsylvania. It is a picturesque country?

Mr. TIMBERLAKE. Quite so.

Mr. MANN. It is from 7,000 to 11,000 feet above the sea level.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. TIMBERLAKE, a motion to reconsider the vote whereby the bill was passed was laid on the table.

CHANGE OF JUDICIAL DISTRICTS IN OKLAHOMA.

The next business in order on the Calendar for Unanimous Consent was the bill (H. R. 14471) to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary."

The title of the bill was read.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That section 101 of the act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, be, and the same is hereby, amended to read as follows:

"SEC. 101. The State of Oklahoma is divided into two judicial districts, to be known as the eastern and western districts of Oklahoma. The eastern district shall include the territory embraced on the 1st day of July, 1916, in the counties of Adair, Atoka, Bryant, Craig, Cherokee, Creek, Choctaw, Coal, Carter, Delaware, Garvin, Grady, Haskell, Hughes, Johnston, Jefferson, Latimer, Le Flore, Love, McClain, Mayes, Muskogee, McIntosh, McCurtain, Murray, Marshall, Nowata, Ottawa, Okmulgee, Okfuskee, Pittsburg, Pushmataha, Pontotoc, Rogers, Stephens, Sequoyah, Seminole, Tulsa, Washington, and Wagoner. Terms of the district court for the eastern district shall be held at Muskogee on the first Monday in January; at Vinita, on the first Monday in March; at Tulsa, on the first Monday in April; at South McAlester, on the first Monday in June; at Ardmore, on the first Monday in October; and at Chickasha, on the first Monday in November in each year. The western district shall include the territory embraced on the 1st day of July, 1916, in the counties of Alfalfa, Beaver, Beckham, Blaine, Caddo, Canadian, Cimarron, Cleveland, Comanche, Custer, Dewey, Ellis, Garfield, Grant, Greer, Harmon, Harper, Jackson, Kay, Kingfisher, Kiowa, Lincoln, Logan, Major, Noble, Oklahoma, Osage, Pawnee, Payne, Pottawatomie, Roger Mills, Texas, Tillman, Washita, Woods, and Woodward. Terms of the district court for the western district shall be held at Guthrie on the first Monday in January; at Oklahoma City, on the first Monday in March; at Enid, on the first Monday in June; at Lawton, on the first Monday in September; and at Woodward, on the first Monday in November: *Provided*, That suitable rooms and accommodations for holding court at Woodward are furnished free of expense to the United States. The clerk of the district court for the eastern district shall keep his office at Muskogee and the clerk for the western district at Guthrie, and shall maintain an office in charge of himself or a deputy at Oklahoma City."

The SPEAKER. The question is on the engrossment and third reading of the bill.

Mr. MANN. Mr. Speaker, I move to strike out the last word.

The SPEAKER. The gentleman from Illinois moves to strike out the last word.

Mr. MANN. Have there been no new counties created in Oklahoma since 1910?

Mr. FERRIS. We created some new counties after the adoption of the constitution, but not since 1910. There is only one change.

Mr. MANN. I know what the report says, but the report is incorrect in one respect. I do not know whether it is an intentional change in the bill or otherwise. The gentleman himself says it makes only one change. That is what the report says. I do not know whether that is an omission or an intentional change. What is that?

Mr. FERRIS. At the bottom of page 2 it is provided that a term of the district court shall be had at Woodward on the first Monday in November. In the law it is the first Monday of May and the second in November.

Mr. MANN. I understand.

Mr. FERRIS. Let me tell the gentleman a piece of interesting history about that.

Mr. MANN. Oh, I do not want to detain the House with the history. I want to know whether that is intentional or otherwise.

Mr. FERRIS. There are two prints of the law. We had to go to the State Department to find out about that. One print of the law we got from the statistician of the House here, Mr. Sabine, in the annex to the library here. We found one print that gave two terms of court, and another print that gave one term of court.

Mr. MANN. I would like to know where you found a print that gave one term. Out there in the Statutes at Large two terms are given. It is the Statutes at Large that are the official copy, and they are produced in evidence. If they are left out intentionally, that is all right.

Mr. FERRIS. They are left out intentionally. It is all right. Mr. MORGAN and I agreed about it. It is Mr. MORGAN'S town.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. FERRIS, a motion to reconsider the vote whereby the bill was passed was laid on the table.

The SPEAKER. The Clerk will report the next bill.

CENTRAL DIVISION, DISTRICT COURT IN NORTH DAKOTA.

Mr. YOUNG of North Dakota. Mr. Speaker, I ask unanimous consent to return to Calendar No. 120.

The SPEAKER. The gentleman from North Dakota asks unanimous consent to return to Calendar No. 120. Is there objection?

There was no objection.

Mr. MANN. Union Calendar No. 139; Unanimous Consent Calendar No. 120.

The SPEAKER. The Clerk will report the bill.

The Clerk read the title of the bill, as follows:

A bill (H. R. 11878) to amend section 99, chapter 231, of the act to codify, revise, and amend the laws relating to the judiciary.

The SPEAKER pro tempore (Mr. RAKER). Is there objection to the present consideration of the bill?

There was no objection.

Mr. YOUNG of North Dakota. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER pro tempore. The gentleman from North Dakota asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 99 of the act to codify, revise, and amend the laws relating to the judiciary, be amended to read as follows:

"SEC. 99. That the State of North Dakota shall constitute one judicial district, to be known as the district of North Dakota. The territory embraced on the 1st day of July, 1910, in the counties of Burleigh, Logan, McIntosh, Emmons, Kidder, McLean, Adams, Bowman, Dunn, Hettinger, Morton, Stark, and McKenzie shall constitute the southwestern division of said district; and the territory embraced on the date last mentioned in the counties of Cass, Richland, Barnes, Sargent, Ransom, and Steele shall constitute the southeastern division; and the territory embraced on the date last mentioned in the counties of Grand Forks, Traill, Walsh, Pembina, Cavalier, and Nelson shall constitute the northeastern; and the territory embraced on the date last mentioned in the counties of Ramsey, Benson, Towner, Rolette, Bottineau, Pierce, and McHenry shall constitute the northeastern division; and the territory embraced on the date last mentioned in the counties of Ward, Williams, Mountrail, Burke, and Renville shall constitute the western division; and the territory embraced on the date last mentioned in the counties of Griggs, Foster, Eddy, Wells, Sheridan, Stutsman, Lamoure, and Dickey shall constitute the central division. The several Indian reservations and parts thereof within said State shall constitute a part of the several divisions within which they are respectively situated. Terms of the district court for the southwestern division shall be held at Bismarck on the first Tuesday in March; for the southeastern division, at Fargo on the third Tuesday in May; for the northeastern division, at Grand Forks, on the second Tuesday in November; for the northwestern division, at Devils Lake on the first Tuesday in July; for the western division, at Minot on the second Tuesday in October; and for the central division, at Jamestown on the second Tuesday in April. The clerk of the court shall maintain an office in charge of himself or a deputy at each place at which court is held in his district.

With the following committee amendment:

On page 2, line 11, strike out "northeastern" and insert "northwestern." At the bottom of page 3, beginning with line 6, insert the following proviso: "*Provided*, That the Government of the United States shall incur no expense for rent, light, heat, water, or janitor service for the building in which court shall be held until such time as the Government may erect its own court room."

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

The amendment was agreed to.

Mr. YOUNG of North Dakota. Mr. Speaker, I offer an amendment.

The SPEAKER pro tempore. The Clerk will report it.

The Clerk read as follows:

Amendment offered by Mr. YOUNG of North Dakota: Page 1, line 9, strike out "July, 1910," and insert "January, 1916." And on page 2, line 1, after the word "Stark," insert the following: "Golden Valley, Slope, Sioux, Oliver, Mercer, Billings." And on page 2, line 13, after the word "Williams," insert "Divide."

The SPEAKER pro tempore. The question is on agreeing to the amendment offered by the gentleman from North Dakota.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. YOUNG of North Dakota, a motion to reconsider the vote whereby the bill was passed was laid on the table.

Mr. MANN. Mr. Speaker, I move to amend the title by striking out the words "Chapter 231."

The SPEAKER. Without objection, the title will be amended in accordance with the text.

There was no objection.

CHARLESTON-DUNBAR TRACTION CO., WEST VIRGINIA.

Mr. BURGESS. Mr. Speaker, I ask unanimous consent for the present consideration of H. R. 12455, which is No. 233 on the Union Calendar.

Mr. MANN. Is it on the Calendar for Unanimous Consent?

Mr. BURGESS. No. I ask unanimous consent to consider it in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Texas asks unanimous consent to consider the bill the title of which the Clerk will report.

The Clerk read the title of the bill (H. R. 12455) authorizing and directing the Secretary of War to lease to Charleston-Dunbar Traction Co. a certain strip or piece of land owned by the United States Government on the Great Kanawha River in West Virginia.

The SPEAKER. The gentleman asks unanimous consent to consider this bill in the House as in Committee of the Whole. Is there objection?

Mr. MANN. Reserving the right to object, is the gentleman going to object very strenuously if I offer an amendment to strike out "$25" and make it "$100 for the annual rental"?

Mr. BURGESS. Yes; I believe I would.

Mr. MANN. I am not willing to let the bill pass without it. They are now paying $150 a year rent, and they want to rent it for $25 a year. I think if we say $100 a year, they are doing very well.

Mr. BURGESS. Have you read the statement of the Secretary of War about that?

Mr. MANN. Oh, I have read all there is in the report.

Mr. LITTLEPAGE. May I ask the gentleman from Illinois a question?

Mr. MANN. Certainly.

Mr. LITTLEPAGE. This strip of land is 15 feet wide and about 600 feet long. It is within a few miles of my home. It is on a hillside. The company is now paying $150 a year. The Secretary of War in his report recommends $25, and says that is ample rent for it, and he says the only reason he charged $150 a year was because he wanted to make the company pay some nominal rent.

Mr. MANN. I know what the Secretary of War said. He was applied to for permission to use this land——

Mr. LITTLEPAGE. And granted it.

Mr. MANN. He gave a temporary permission at $150 a year. Temporary permission could not be worth as much as permanent permission. It is true the Secretary of War said that it would be a nominal rental. It is only a nominal rental anyhow. It would not pay the Government to fool with this matter for $25 a year. Before this $25 a year was paid into the Treasury, credited to the proper fund, and all the expenses incident to accounting were gone through with, it would cost the Government probably more than $25 a year. Now, if these people want the use of the land, and we reduce the rent one-third, they are getting off well enough. We ought to make it $150 a year.

Mr. LITTLEPAGE. Then you would be charging them what they are paying now.

Mr. MANN. The company are asking this, not for the purpose of reducing the rent but for the purpose of remaining there.

Mr. LITTLEPAGE. This land is in the country, on a steep hillside, where the land is absolutely worthless——

Mr. BURGESS. Except for this purpose.

Mr. LITTLEPAGE. It does not hurt the Government one particle. It is an accommodation. And I will say to the gentleman from Indiana——

Mr. MANN. Indiana! That is the last word. Nobody can get anything out of me now. [Laughter.] I apologize to Indiana.

Mr. BURGESS. I think $25 is reasonable.

Mr. MANN. I do not. We are not asking these people to take the land. They want to get it from us at less than it will cost us to give it to them. Let them pay $100. That is a nominal consideration. They do not need to pay it if they do not want to.

Mr. LITTLEPAGE. I know; but it means to break this railroad up——

Mr. MANN. If this railroad is going to be broken up because it pays $75 a year more rent, they had better break it up quickly. We have just given the State of West Virginia this afternoon $150,000 or $175,000.

Mr. BURGESS. Do not make it up on me. [Laughter.]

Mr. MANN. Now the gentleman from West Virginia wants us to give this company some land in addition. Oh, be fair to the Government!

Mr. LITTLEPAGE. Permit me to make this statement: I simply want to say again that this land is on a steep hillside. It is valueless for the purposes of cultivation. It is valueless for city purposes. It is 5 miles out of town, in the country, where few people live. This interurban line has been given the right of way in order to get the line there. It is an accommodation to the people and the Government to have it there, because Government officials come and go on the interurban road. The company will have to pay the $100 if the gentleman from Illinois says he will object otherwise, but it is an injustice to this street car line. I want to say further that Judge Grosscup, of Chicago, and his associates have invested $300,000 there, and they have not gotten back 2 per cent on the money they have invested.

Mr. MANN. If Judge Grosscup is one of the investors, he is amply able to pay the $100 or $200 a year. He has made enough money on street car lines to be able to do it. And if this is to let the car line run up a steep hill, as my friend from West Virginia suggests, it will be to their interest not to give them the right, for it will cost them too much to climb that hill.

Mr. LITTLEPAGE. I want to say this to the gentleman from Illinois, that I would not object to a bill in his district—a private bill such as this is, which no other Congressman in this House is interested in as I am. I would not object if it were in the gentleman's neighborhood.

Mr. MANN. Oh, well, I would not object if this was a matter giving something which belonged to the gentleman to his constituents. This is taking something that belongs to all of us to give to his constituents. I have observed my rights, and this will not get me to waive them.

Mr. BURGESS. Let me read what the Secretary of War says:

Mr. MANN. I do not want to waste time, unless the gentleman is willing to accept the proposition I have made.

Mr. LITTLEPAGE. All right, if the gentleman from Illinois insists.

Mr. BURGESS. Will not the gentleman from Illinois make it $50?

Mr. MANN. I will make it $125, if you want to.

The SPEAKER. Are the gentlemen from West Virginia and Texas willing to accept the amendment proposed by the gentleman from Illinois, for $100 instead of $25?

Mr. LITTLEPAGE. In order to get the bill through, I presume we will have to.

The SPEAKER. The Clerk will report the bill.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized and directed to lease at a nominal rental value of not exceeding $25 per year, to the Charleston-Dunbar Traction Co., a corporation, its successors or assigns, the strip of land 15 feet wide and 601.8 feet long, or approximately twenty-one one-hundredths of an acre, which said strip of land is situated at or near United States Government Lock and Dam No. 6 of the Great Kanawha River improvement near the city of Charleston, in the State of West Virginia, which said strip of land said Charleston-Dunbar Traction Co. is now occupying with its track: *Provided,* That said annual rental shall be promptly paid as required by the Secretary of War, and that the United States Government shall sustain no loss or expense by reason of said lease to said traction company: *And provided further,* That said traction company shall not fence up said strip of land unless required to do so by the Secretary of War; and shall, at its own expense, keep up and maintain the existing crossings over said traction company's line on the Government's property: *And provided further,* That said traction company shall not remove its station or stop upon or near the Government's said property as said stop and station is at present located.

With the following committee amendments:

Page 1, line 4, after the word "lease" insert the words "from year to year."

Page 2, after line 19, insert the following:

"*Provided,* That the right to alter, amend, or repeal this act is hereby expressly reserved, and the United States shall incur no liability for the alteration, amendment, or repeal thereof to the owner or owners or any other persons interested in said lease or any railroad or other structures placed on said lands by said Charleston-Dunbar Traction Co. or its assigns, and in case of such repeal any lease executed under the provisions of this act shall become null and void, and said company, or its assigns, shall immediately, without delay, vacate said land and remove all railroad track or tracks or other structures therefrom."

Mr. MANN. Mr. Speaker, I move to amend page 1, line 5, by striking out $25 and inserting $100.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend page 1, line 5, by striking out "$25" and inserting "$100."

The amendment was agreed to.

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. LITTLEPAGE, a motion to reconsider the vote whereby the bill was passed was laid on the table.

THE VANCOUVER & NORTHERN RAILWAY CO.

Mr. JOHNSON of Washington. Mr. Speaker, I ask unanimous consent to take up the bill H. R. 12545, and, this being an emergency, I ask unanimous consent that a similar Senate bill, S. 4550, on the Speaker's table be laid before the House and that it be considered.

The SPEAKER laid before the House the bill (S. 4550) granting to the Portland, Vancouver & Northern Railway Co. a license to cross the Vancouver Barracks Military Reservation at Vancouver, Wash.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. JOHNSON of Washington. Mr. Speaker, I ask unanimous consent to consider the Senate bill in the House as in Committee of the Whole, and that the similar House bill be laid on the table.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That there is hereby granted to the Portland, Vancouver & Northern Railway Co., a corporation organized under the laws of the State of Washington, under the conditions and restrictions in this act contained, a revocable license to construct, maintain, and operate an electric railroad, telephone, telegraph, and electric-power transmission lines across the Vancouver Barracks Military Reservation in the county of Clarke, State of Washington. Congress reserves the right to alter, amend, or repeal this act.

SEC. 2. That the work herein authorized shall be constructed, as near as practicable, upon the following location: Beginning at a point on the westerly side of Reserve Street where the same intersects the southerly boundary line of the city of Vancouver, Clarke County, Wash.; thence running in a northerly direction along the west line of said Reserve Street to a point 9 feet north of the south line of Fifth Street where the same goes through the United States military reservation; thence easterly on a line parallel to and the center line 9 feet north of the south line of said Fifth Street and south of the macadam portion of said street, running through said reservation to the eastern boundary line; thence north to a point where the said eastern boundary line intersects East Seventh Street in the city of Vancouver, the exact location to be fixed by the Secretary of War.

SEC. 3. That the work shall be begun within one year after the approval of this act, and within 90 days after the approval of this act the said railway company shall furnish a bond to the satisfaction of the Secretary of War conditioned for the completion of the said railroad and other works mentioned herein across said reservation within two years after the approval of the said bond by the Secretary of War.

SEC. 4. That the work herein authorized shall be constructed in such manner, of such character, and with such spurs, switches, and crossings as may be prescribed by the Secretary of War, and shall be maintained and operated subject to such rules and regulations as he or the commander at the said post may from time to time prescribe.

SEC. 5. That the licensee shall bear one-third of the cost of macadamizing Fifth Street and the public road on the eastern boundary of the reservation for the distance they occupy said street and road; macadamizing of said street and road to be of such width as may be prescribed by the Secretary of War. The licensee shall bear one-third of

the cost of maintenance of said street and road in addition to maintaining the space between the rails at all times in good condition for vehicle traffic.

SEC. 6. That the maintenance and operation of said railway within the limits of the reservation, including all road work, lighting of track on roadway without expense to the United States, and other work required to be done by the licensee in accordance with the provisions and conditions of this instrument or deemed necessary or advisable by the Secretary of War, shall be subject to the supervision and approval of the post commander and to such regulations as he may from time to time prescribe in the interests of good order, police, sanitation, discipline, public safety, and the conservation of the interests of the Government.

SEC. 7. That any other person or corporation having a franchise for operation of a street railway in the city of Vancouver, including any electric railway as may have authority to do a suburban and interurban business, may, upon obtaining a license from the Secretary of War, use the track and other construction herein authorized to be placed upon the reservation upon the payment of just compensation, and if the parties concerned can not agree upon the amount of such compensation the sum or sums to be paid for said use shall be fixed by the Secretary of War.

SEC. 8. That if any portion of said right of way herein authorized shall cease to be used for the purpose aforesaid the same shall be revoked. Any sums which have to be expended after the revocation of this license, or any portion thereof, in putting any premises or property herein authorized to be occupied in as good condition as it is at this time shall be paid by said licensee, its successors, or assigns.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. JOHNSON of Washington, a motion to reconsider the vote whereby the bill was passed was laid on the table.

DEFICIENCY ESTIMATES, WAR DEPARTMENT (H. DOC. NO. 1195).

The SPEAKER laid before the House a letter from the Secretary of the Treasury, transmitting a copy of a communication from the Secretary of War submitting deficiency estimates of appropriations required for the service of the War Department for the fiscal year ending June 30, 1916, which was referred to the Committee on Appropriations and ordered to be printed.

DISTRICT COURT, MIDDLE DISTRICT OF TENNESSEE.

Mr. MOON. Mr. Speaker, I ask unanimous consent to consider the bill (S. 377) providing for the establishment of a term of the district court for the middle district of Tennessee at Winchester, Tenn.

The SPEAKER. The gentleman from Tennessee asks unanimous consent for the present consideration of the bill which the Clerk will report.

The Clerk read as follows:

An act (S. 377) providing for the establishment of a term of the district court for the middle district of Tennessee at Winchester, Tenn.

Be it enacted, etc., That a term of the district court for the middle district of Tennessee shall be held at Winchester on the first Monday in April and the third Monday in November.

The SPEAKER. Is there objection?

There was no objection.

Mr. MOON. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman asks unanimous consent to consider this bill in the House as in Committee of the Whole. Is there objection?

There was no objection.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. MOON, a motion to reconsider the vote whereby the bill was passed was laid on the table.

ORDER OF BUSINESS.

Mr. MANN. Mr. Speaker, to-morrow is Private Calendar day. We can get through with the Unanimous Consent Calendar before long. I think there was an understanding with the gentleman from North Carolina that we should take up the unobjected bills on the Private Calendar to-morrow.

Mr. PAGE of North Carolina. That was the understanding.

Mr. FERRIS. Mr. Speaker, I ask unanimous consent that to-morrow be set aside to take up unobjected bills on the Private Calendar and that we meet at 11 o'clock a. m.

The SPEAKER. The gentleman from Oklahoma makes two requests for unanimous consent. First, that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow, and, second, that to-morrow we take up the unobjected bills on the Private Calendar. Is there objection to either request? [After a pause.] The Chair hears none.

EXTENSION OF REMARKS.

Mr. COADY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. RANDALL. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the juvenile court bill.

The SPEAKER. The gentleman from California asks unanimous consent to extend his remarks in the RECORD on the juvenile court bill. Is there objection?

There was no objection.

ADJOURNMENT.

On motion of Mr. FERRIS (at 4 o'clock and 30 minutes p. m.), the House adjourned until to-morrow, Friday, June 9, 1916, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, a letter from the Secretary of the Treasury, transmitting copy of a communication from the Secretary of War submitting deficiency estimates of appropriations required for the service of the War Department for the fiscal year ending June 30, 1916 (H. Doc. No. 1195), was taken from the Speaker's table, referred to the Committee on Appropriations, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. DOOLITTLE, from the Committee on Agriculture, to which was referred the bill (H. R. 16060) providing for the classification of salaries of veterinary inspectors and lay inspectors (grades 1 and 2) employed in the Bureau of Animal Industry, Department of Agriculture, reported the same without amendment, accompanied by a report (No. 810), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. ASHBROOK, from the Committee on Coinage, Weights, and Measures, to which was referred the bill (S. 5425) to standardize lime barrels, reported the same with amendment, accompanied by a report (No. 811), which said bill and report were referred to the House Calendar.

Mr. FERRIS, from the Committee on the Public Lands, to which was referred the bill (S. 3900) to authorize the sale and disposal of an island in the Coosa River, in the State of Alabama, reported the same without amendment, accompanied by a report (No. 812), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. SHERWOOD, from the Committee on Invalid Pensions, to which was referred the bill (S. 5911) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, reported the same without amendment, accompanied by a report (No. 809), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and resolutions were introduced and severally referred as follows:

By Mr. STEENERSON: A bill (H. R. 16322) granting the consent of Congress to the village and township of Halstad, Norman County, Minn., and the township of Herberg, Traill County, N. Dak., to construct a bridge across the Red River of the North on the boundary line between said States; to the Committee on Interstate and Foreign Commerce.

By Mr. HAWLEY: A bill (H. R. 16323) to authorize the construction and maintenance of a dike on Depot Slough, Lincoln County, Oreg.; to the Committee on Interstate and Foreign Commerce.

By Mr. CARTER of Oklahoma: A bill (H. R. 16324) making appropriation from the tribal funds of the Choctaw and Chickasaw Nations for the purpose of improving the Choctaw Sanitarium near Talihina, Okla.; to the Committee on Indian Affairs.

By Mr. RUCKER: A bill (H. R. 16325) for the purchase of a site for a public building at Milan, Sullivan County, Mo.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 16326) for the purchase of a site for a public building at Salisbury, Chariton County, Mo.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 16327) for the purchase of a site for a public building at Paris, Monroe County, Mo.; to the Committee on Public Buildings and Grounds.

By Mr. LONDON: A bill (H. R. 16328) to amend section 17 of the United States bankruptcy law of July 1, 1898, and amendments thereto of February 5, 1903; to the Committee on the Judiciary.

By Mr. CHURCH: A joint resolution (H. J. Res. 234) requesting the President of the United States to designate a day on which funds may be raised for the relief of the Armenians; to the Committee on Foreign Affairs.

By Mr. FLOOD: A joint resolution (H. J. Res. 235) to authorize the President of the United States to convey to the foreign Governments participating in the Panama-Pacific International Exposition the grateful appreciation of the Government and the people of the United States; to the Committee on Foreign Affairs.

By Mr. CASEY: A resolution (H. Res. 258) to designate a day on which the people of this country may express their sympathy by contributing toward the relief of the Lithuanians in the war zone; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. ASHBROOK: A bill (H. R. 16329) granting an increase of pension to Luther Sealey; to the Committee on Invalid Pensions.

By Mr. BACHARACH: A bill (H. R. 16330) granting a pension to Ellen M. Mason; to the Committee on Invalid Pensions.

By Mr. CAREW: A bill (H. R. 16331) for the relief of the owners of the British steamship *Clearpool;* to the Committee on Claims.

Also, a bill (H. R. 16332) for the relief of the owners of the steamship *Esparta;* to the Committee on Claims.

By Mr. CLINE: A bill (H. R. 16333) granting an increase of pension to Isaiah E. Lawrence; to the Committee on Invalid Pensions.

By Mr. EDMONDS: A bill (H. R. 16334) granting a pension to Mary Pierce; to the Committee on Pensions.

By Mr. GUERNSEY: A bill (H. R. 16335) granting an increase of pension to Benjamin H. Monk; to the Committee on Invalid Pensions.

By Mr. HAWLEY: A bill (H. R. 16336) granting an increase of pension to James Curtis; to the Committee on Invalid Pensions.

By Mr. KEATING: A bill (H. R. 16337) granting a pension to William D. Galligher; to the Committee on Pensions.

Also, a bill (H. R. 16338) granting a pension to William W. Gillette; to the Committee on Pensions.

Also, a bill (H. R. 16339) granting an increase of pension to John Conkie; to the Committee on Invalid Pensions.

By Mr. McCLINTIC: A bill (H. R. 16340) granting an increase of pension to Almon G. Cooley; to the Committee on Invalid Pensions.

By Mr. MATTHEWS: A bill (H. R. 16341) granting a pension to Emeline Verity; to the Committee on Invalid Pensions.

By Mr. PLATT: A bill (H. R. 16342) granting an increase of pension to Grace A. Negley; to the Committee on Invalid Pensions.

By Mr. RAKER: A bill (H. R. 16343) granting a pension to Susie F. White; to the Committee on Invalid Pensions.

By Mr. SLOAN: A bill (H. R. 16344) granting an increase of pension to Albert Mason; to the Committee on Invalid Pensions.

By Mr. STEPHENS of California: A bill (H. R. 16345) granting an increase of pension to William F. Fogarty; to the Committee on Pensions.

By Mr. SUTHERLAND: A bill (H. R. 16346) granting an increase of pension to Daniel W. Welsh; to the Committee on Invalid Pensions.

By Mr. TAGGART: A bill (H. R. 16347) reinstating Roy F. Waring to his former rank and grade in the United States Army; to the Committee on Military Affairs.

By Mr. TAYLOR of Arkansas: A bill (H. R. 16348) to amend and correct the military record of James Brumbelow; to the Committee on Military Affairs.

By Mr. TREADWAY: A bill (H. R. 16349) granting a pension to Edward J. Davis; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ASHBROOK: Papers to accompany House bill 16308, for relief of Margaret Berry; to the Committee on Invalid Pensions.

By Mr. BAILEY: Protest of E. C. Dorer, M. O. Hess, Mrs. Merle Hess, George F. Hess, Mrs. S. E. Horner, Caroline Rainey, and Zoe Markle, all of Johnstown, Pa., against the passage of House bill 9671, a bill to establish price control; to the Committee on the Judiciary.

By Mr. BRUMBAUGH: Evidence to accompany House bill 16291, for relief of Catherine J. Thayer; to the Committee on Invalid Pensions.

By Mr. CAREW: Memorial of Chamber of Commerce of State of New York, on Philippine independence bills; to the Committee on Insular Affairs.

By Mr. DALE of New York: Petition of Ella Jackson, of Denver, Colo., favoring the Susan B. Anthony amendment; to the Committee on the Judiciary.
